Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance

As part of Guarantee Issuance, the applicant approaches a bank and requests the bank to issue a Bank Guarantee on their behalf to the beneficiary.

The various activities involved in OBTFPM during issuance of a guarantee are:

- Receive and verify application and other documents (Non Online Channel) - Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Check balance availability for amount block
- Input/Modify details of the guarantee - Data enrichment stage
- Conduct legal checks
- Check for limit availability
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks during any stage of transaction for other users to check and act
- Draft guarantee copy for legal verification
- Generate acknowledgement and draft guarantee copy to customer
- Notify customer on any negative statuses during any of the stages to the applicant
- Hand off approved transaction to back office

In the subsequent sections, let's look at the details for Guarantee Issuance process:

This section contains the following topics:

Common Initiation Stage	Registration
OBTFPM- OBDX Bidirectional flow	Scrutiny
Data Enrichment	Exceptions
Multi Level Approval	Customer - Acknowledgement letter
Customer - Reject Letter	Reject Approval
Initiate - Guarantee Issuance Template Maintenance	Create Guarantee Issuance Template Maintenance (SWIFT 2021)

Common Initiation Stage

The user can initiate the new guarantee issuance request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer ID	Select the customer id of the applicant or applicant's bank.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

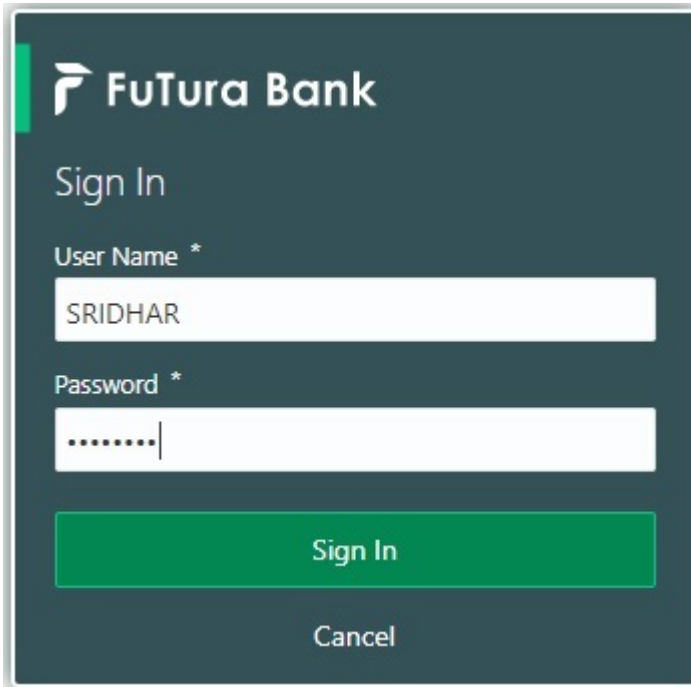

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

If the Guarantee Issuance request is given through branch either by fax, email or physical application form, the Guarantee Issuance process starts from the registration stage.

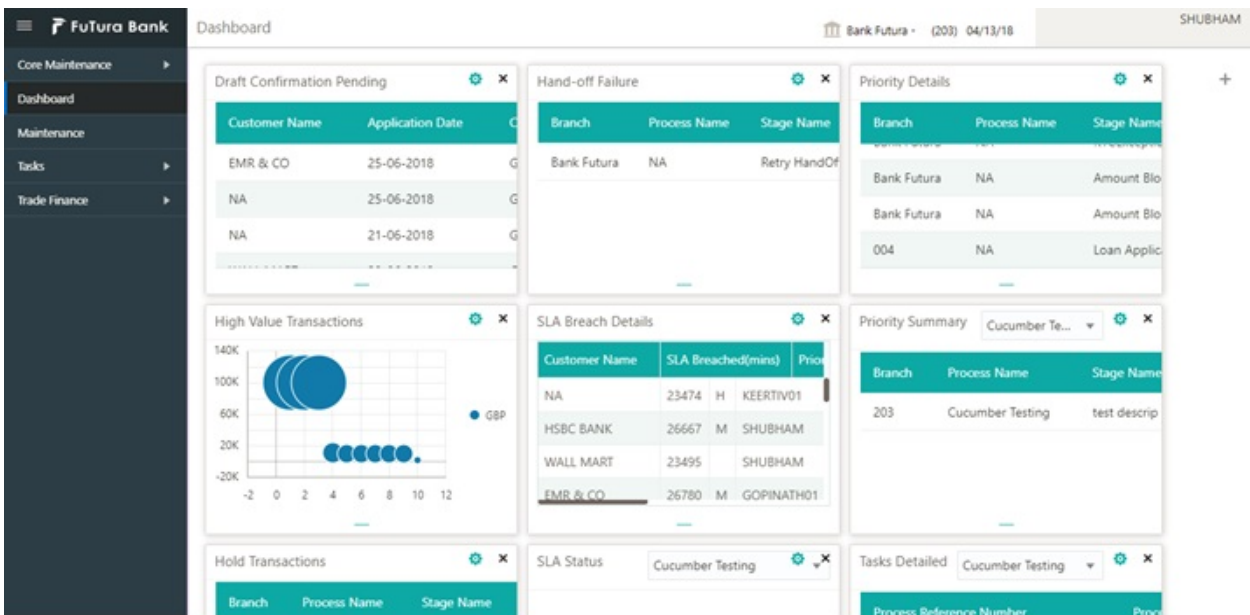

During registration stage, user can capture the basic details of the application, check the signature of the authorised signatories and upload the related documents of the applicant. It also enables the user to capture some additional product related details as an option. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for a Guarantee Issuance expert to handle the request in the next stage.

3. Using the entitled login credentials for registration stage, login to the OBTFPM application.

The image shows the 'FuTura Bank Sign In' interface. It features a dark blue header with the bank's logo and name. Below the header, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' with masked characters. A prominent green 'Sign In' button is located below the password field, and a 'Cancel' button is positioned at the bottom center.

4. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The screenshot displays the FuTura Bank dashboard for user SHUBHAM. The dashboard is populated with several data widgets:

- Draft Confirmation Pending:** A table listing customer applications.

Customer Name	Application Date	Stage Name
EMR & CO	25-06-2018	G...
NA	25-06-2018	G...
NA	21-06-2018	G...
- Hand-off Failure:** A table showing process failures.

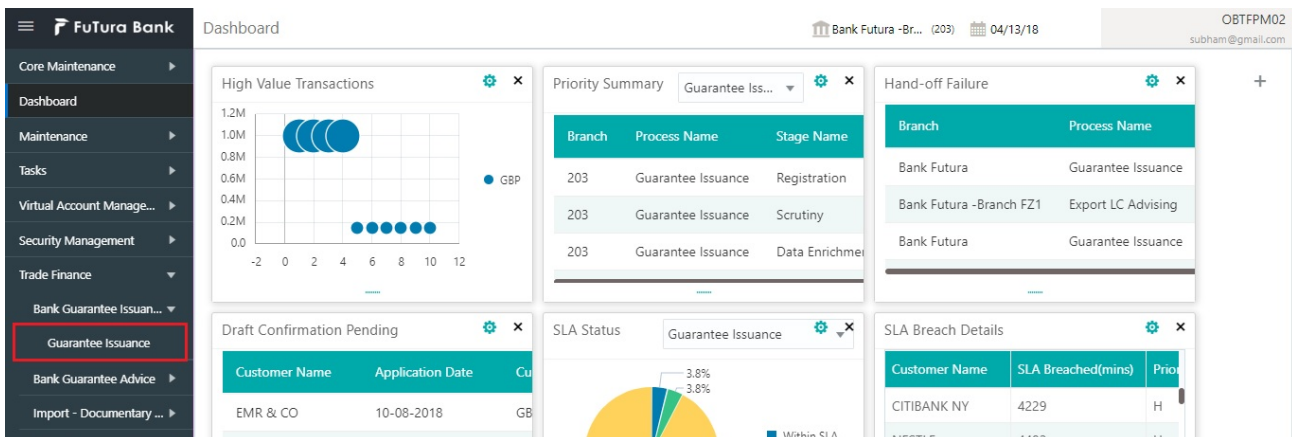

Branch	Process Name	Stage Name
Bank Futura	NA	Retry HandOf
- Priority Details:** A table of priority tasks.

Branch	Process Name	Stage Name
Bank Futura	NA	Amount Blo
Bank Futura	NA	Amount Blo
004	NA	Loan Applic
- High Value Transactions:** A bubble chart showing transaction values for GBP. The y-axis ranges from -20K to 140K. There are three large blue bubbles at approximately 100K, 110K, and 120K, and several smaller ones below 20K.
- SLA Breach Details:** A table of SLA breaches.

Customer Name	SLA Breached(mins)	Prio
NA	23474	H KEERTIVO1
HSBC BANK	26667	M SHUBHAM
WALL MART	23495	SHUBHAM
EMR & CO	26780	M GOPINATH01
- Priority Summary:** A table showing task priorities.

Branch	Process Name	Stage Name
203	Cucumber Testing	test descrip
- Hold Transactions:** A table of held transactions with columns for Branch, Process Name, and Stage Name.
- SLA Status:** A dropdown menu currently set to 'Cucumber Testing'.
- Tasks Detailed:** A dropdown menu currently set to 'Cucumber Testing'.

5. Click Trade Finance> Bank Guarantee Issuance> Guarantee Issuance.

The screenshot shows the dashboard after navigating to 'Guarantee Issuance'. The left-hand navigation menu is expanded, and 'Guarantee Issuance' is highlighted with a red box. The dashboard widgets are updated to reflect this selection:

- High Value Transactions:** A bubble chart showing transaction values for GBP. The y-axis ranges from 0.0 to 1.2M. There are three large blue bubbles at approximately 1.0M, 1.1M, and 1.2M, and several smaller ones below 0.2M.
- Priority Summary:** A table showing priority tasks for 'Guarantee Issuance'.

Branch	Process Name	Stage Name
203	Guarantee Issuance	Registration
203	Guarantee Issuance	Scrutiny
203	Guarantee Issuance	Data Enrichme
- Hand-off Failure:** A table showing process failures for 'Guarantee Issuance'.

Branch	Process Name
Bank Futura	Guarantee Issuance
Bank Futura -Branch FZ1	Export LC Advising
Bank Futura	Guarantee Issuance
- Draft Confirmation Pending:** A table listing customer applications.

Customer Name	Application Date	Stage Name
EMR & CO	10-08-2018	GB...
- SLA Status:** A dropdown menu currently set to 'Guarantee Issuance'.
- SLA Breach Details:** A table of SLA breaches.

Customer Name	SLA Breached(mins)	Prio
CITIBANK NY	4229	H
NFTI F	4402	H

The registration stage has two sections Application Details and Guarantee Details. Let's look at the registration screens below:

Application Details

Provide the Application Details based on the description in the following table. In case of MT798, Application Details are defaulted to SWIFT.

Guarantee received from Applicant Bank has following three scenarios:

1. Guarantee/SBLC received through SWIFT MT 760 in favour of a beneficiary through an Advising Bank and Advise Through Bank.
2. Counter Guarantee/SBLC received through MT 760 in favour of a bank to issue Local guarantee/SBLC which in turn can advise the Local Guarantee/SBLC to the Beneficiary through an Advising Bank.

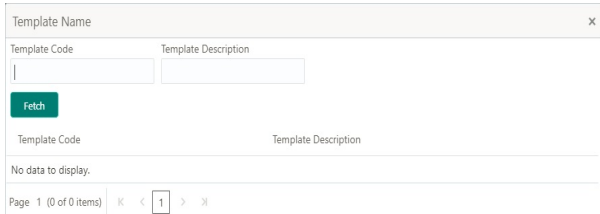

Note: Counter Guarantee/SBLC received through SWIFT MT 760 in favour of a bank to issue in favour of the beneficiary. In favor of another bank which in turn has to issue a Local Guarantee/SBLC

Fields that are marked with asterisk "*" are mandatory.

Field	Description	Sample Values
Received From Applicant bank	Guarantee Issuance request can be received from the applicant or from the applicant's bank. Toggle on: Switch on the toggle if Guarantee Issuance request is received from applicant's bank. Toggle off: Switch off the toggle if Guarantee Issuance request is received from applicant.	Toggle off
Received From - Customer ID	Select the customer id of the applicant or applicant's bank.	001345
Received From - Customer Name	Name of the customer or applicant. This field will be auto populated based on the selected customer ID.	EMR & CO

Field	Description	Sample Values
Branch	<p>Select the branch. Customer's home branch will be displayed based on the customer ID and it can be changed, if required.</p>  <p>Note Once the request is submitted, Branch field is non-editable.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), Branch to be resolved from CIF.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), Branch to be resolved from CIF.</p>	203-Bank Futura -Branch FZ1
Currency code, Amount	<p>Select the currency code and Provide the guarantee value (with decimal places) as per currency type.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	GBP
Priority	<p>Priority maintained will be populated as either 'Low or Medium or High'. If priority is not maintained for a customer, 'Medium' priority will be defaulted.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is defaulted and user can change its value.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is defaulted and user can change its value.</p>	High
Submission Mode	<p>Select the submission mode of Guarantee Issuance request. By default the submission mode will have the value as 'Desk'.</p> <p>Desk- Request received through Desk</p> <p>Fax - Request received through Fax</p> <p>Email - Request received through Email</p> <p>SWIFT-Non STP - Request received through SWIFT</p> <p>Courier - Request received through Courier</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and SWIFT.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and SWIFT.</p>	Desk

Field	Description	Sample Values
Process Reference Number	<p>Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and generated by system.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and generated by system.</p>	203GTEISS000 001134
Application Date	<p>By default, the application will display branch's current date and enables the user to change the date to any back date.</p> <p> Note Future date selection is not allowed.</p>	04/13/2018
Customer Reference Number	User can enter the 'Reference number' provided by the applicant/applicant bank.	
Copy Existing Undertaking	Select any existing undertaking to be copied, if required.	
Template name	<p>This is applicable only for the non-online Guarantee Issuance request.</p> <p>This option allows user to select a template if the applicant details are already captured and the data can be reused with the template to reduce the effort. The details pertaining to the subsequent screens in Scrutiny and Data Enrichment screens will be persisted and populated when you move to the relevant screens.</p> <p>Before populating the screens, application will check if there are any existing values and will display an alert message ' Value exist already in few fields - Do you want to use the template - Yes/No'. If the you click on Yes the existing details will be over-written with the template values.</p> <p>Click the look up icon to search the Template code with Template Code or Template Description.</p> <div data-bbox="564 1765 1166 1977" data-label="Form">  </div>	

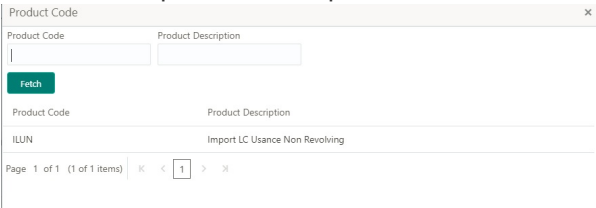

SBLC/Guarantee Details

Registration user can provide Guarantee details in this section. Alternately, guarantee details can be provided by Scrutiny user.

Provide the Guarantee Details based on the description in the following table:

Field	Description	Sample Values
Form of Undertaking	<p>Select the Form of Undertaking from the available options:</p> <ul style="list-style-type: none"> • DGAR - Guarantee • STBY - Standby LC <p> Note This is a mandatory field.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Type of Undertaking	<p>Select the type of undertaking from the following available options:</p> <ul style="list-style-type: none"> • Advance Payment Guarantee • BILL - Bill of Lading • CUST - Customs • DPAY - Direct Pay • INSU - Insurance • JUDI - Judicial • LEAS - Lease • PAYM - Payment • PERF - Performance • RETN - Retention • SHIP - Shipping • TEND - Tender or Bid • WARR - Warranty/ maintenance • OTHR - Others <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Narrative	<p>Provide the narrative.</p> <div style="text-align: center;">  <p>Note</p> </div> <p>This field is applicable only if the Type of Undertaking field value is OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Product Code	<p>Select the applicable product code.</p> <p>Click the look up icon to search the product code with code or product description.</p>  <p>You can also enter the product code and on tab out system will validate and populate the selected product description. The product codes will be listed based on the selected value in Form of Undertaking.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), user can enter the product code.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), user can enter the product code.</p>	GUIS
Product Description	Auto populated by the application based on the Product Code selected.	Guarantee Issuance / Re-issuance upon receiving request
Undertaking Number	<p>Read only field.</p> <p>System defaults the undertaking number available in the guarantee/SBLC.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), Undertaking Number is generated from Back office System and in incoming MT 760 to be populated against Reference field for party CIB.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), Undertaking Number is generated from Back office System and in incoming MT 760 to be populated against Reference field for party CIB.</p>	
User Reference Number	<p>System defaults the user reference number, depending on the selection of product code.</p> <p>User can change the User Reference Number.</p>	PK2GUI121144 0001

Field	Description	Sample Values
Purpose of message	<p>Select the purpose of message from the LOV:</p> <ul style="list-style-type: none"> ● ISSU - Issue of Undertaking <p>In case the Undertaking is sent through SWIFT MT 760, the advising bank has to just advise the Undertaking to the Beneficiary.</p> <p>In case the Undertaking is advised through Mail Advice, the guarantee can be directly mailed by the Issuing bank to the Beneficiary.</p> <p>This is applicable for Guarantees/ Local Guarantees and SBLC (Standby LC)</p> <ul style="list-style-type: none"> ● ICCO - Issuance of counter-counter-undertaking and request to issue counter-undertaking <p>The bank receiving the Undertaking (usually through SWIFT MT 760) is required to issue a Counter- undertaking to another bank requesting the third Bank to issue Local Undertaking favoring the Beneficiary.</p> <ul style="list-style-type: none"> ● ISCO - Issuance of counter-undertaking and request to issue local undertaking <p>The bank receiving the Undertaking (usually through SWIFT MT 760) is required to issue Local Undertaking to the beneficiary.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), Purpose of Message is 'ISCO'.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), Purpose of Message is 'ISSU'.</p>	
File Identification	<p>This field enables the user to select the type of delivery channel and its associated file name or reference from the available values:</p> <ul style="list-style-type: none"> ● COUR - Courier delivery ● EMAL - Email transfer ● FACT - SWIFTNet FileAct ● FAXT - Fax transfer ● HOST - Host-to-Host ● MAIL - Postal Delivery ● OTHR - Other delivery channel <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Narrative	<p>If File Identification field values are COUR or OTHR, user must be able to provide description in this field.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Date of Issue	<p>Read only field.</p> <p>Application will default the branch's current date in date of issue. User cannot change the defaulted date.</p> <p>Application will populate the Date of Issue field with branch date on approval if date of approval is later than date of registration.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), Date of Issue = Branch Date (Date of Issue in incoming MT 760 should be mapped to Party CIB- Field Date).</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), Date of Issue = Branch Date (Date of Issue in incoming MT 760 should be mapped to Party CIB- Field Date).</p>	04/13/18
Applicable Rules	<p>Select the applicable rules for the Guarantee Issuance from the available options:</p> <ul style="list-style-type: none"> ● URDG - Uniform rules for demand guarantees ● UCPR - Uniform customs and Practices ● ISPR - International standby Practices ● NONE - Not subject to any rules ● OTHR <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	URDG - Uniform rules for demand guarantees
Narrative	<p>If Applicable Rules field value is OTHR, user must be able to provide description in this field.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Expiry Type	<p>This field indicates whether undertaking has specified expiry date or is open-ended. Select the applicable value from the available options:</p> <ul style="list-style-type: none"> • COND - With Expiry • CONU - Without Expiry • FIXD - Specified expiry date (with/without automatic expansion) • OPEN - No specific date of expiry <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Effective Date	<p>The effective date is defaulted from guarantee issuance.</p> <p>The user can change the date.</p>	
Tenor	<p>Specify the value for tenor and select the value from the drop-down.</p> <p>The drop down is enabled, if Expiry Type is COND and FIXD</p>	
Date Of Expiry	<p>Provide the expiry date of the Guarantee Issuance.</p> <p>The expiry date can be equal or greater than the issue date. If the Expiry Date is earlier than the issue date, system will provide an error and if the 'Expiry Date is equal to the Issue Date', system will provide an alert message.</p> <p>This field is applicable only if Expiry Type is COND or FIXD.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	09/30/18

Field	Description	Sample Values
Expiry Condition/Event	<p>This field specifies the documentary condition/ event that indicates when the local undertaking will cease to be available.</p> <p>This field is applicable only if Date of Expiry field value is COND and CONU.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Applicant Bank	<p>In application details, if Received From Applicant Bank toggle is on, the applicant bank details will be displayed here.</p> <p>If request is not received from applicant bank, this field must be blank.</p>	001342 -HSBC Bank
Applicant	<p>Applicant details will be auto populated based on the details provided in Application Details section.</p> <p>If the request is received from Applicant bank, select the applicant from the List of Values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	001345 Nestle
Beneficiary	<p>Select the beneficiary in whose favor the undertaking (or counter-undertaking) is issued.</p> <p>If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not Valid, then system will display alert message.</p> <p>If the Guarantee Issuance at Counter Issuing Bank (CIB) the field is Read only and Populated from Incoming MT 760.</p> <p>If the Guarantee Issuance at Local Issuing Bank (LIB), Customer ID to be resolved from incoming message. If required use Walk-in ID. Bene ID/ name should be made amendable by the user.</p>	001344 EMR & CO

Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Documents	<p>Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p>	
Remarks	<p>Provide any additional information regarding the Guarantee Issuance. This information can be viewed by other users processing the request.</p>	

Field	Description	Sample Values
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Submit	<p>On Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee Issuance.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	<p>Cancels the Guarantee Issuance Registration stage input.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Checklist	<p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p>	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	

Field	Description	Sample Values
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	
Document ID	This field displays the document Code from meta data.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from meta data.	

Field	Description	Sample Values
Document Code	This field displays the document code from meta data.	
Upload Date	The field displays the upload date of the document.	
Reference Number	The field displays the reference number of the document.	

6. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

7. Click Edit icon to edit the documents. The Edit Document screen appears.

OBTFPM- OBDX Bidirectional flow

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling.

OBTFPM user, for task received from online channel, raise clarification and receive response from the customer.

1. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

2. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.

3. In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks **Request Clarification** button to request for online clarification from customer.

4. The **Request Clarification** detailed screen appears, user enters the information and clicks **Save**, the information should be sent to customer.

5. OBTFPM user should be able to see the details in the View Clarification window and the status will be Clarification Requested. The user can click Re clarification if required.

6. The task goes to **Awaiting Customer Clarification** state until the response received from the customer.

Action	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Customer Number	Amount
<input checked="" type="checkbox"/> Edit	M	Guarantee Issuance	PK2ILCA000042586	PK2ILCA000042586	Scrutiny	20-12-16	PK2	006466	

7. Click **Edit**.

Clarification	Raised By	Clarification Date	Response	Response Date	Response Type	Status
<input type="checkbox"/> Proforma Invoice is not uploaded. Instead some other document is	SUNDAR01	2019-03-21T18:31				Clarification Requested

8. The user can click **Accept Clarification** button, if the query raised has been answered by the customer. The status should change to Clarification Accepted. on next the task moves to the next logical stage.

9. Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in

a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the documents.

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

OBTFPM supports the Bi-Directional Flow for Offline Transactions initiated from OBTFPM directly. Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.

Steps of Bi-Directional Flow

1. Customer Maintenance details are replicated from OBTF to OBTFPM.
2. In OBTFPM, user clicks on **Request Clarification**, , the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder, which is an existing functionality.
3. .In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system displays the error message that 'The customer is not subscribed to Trade Finance Portal'.
5. Once the request is submitted, the existing Request Clarification functionality would be applicable to offline initiated transactions also.

Scrutiny

On successful completion of registration of a Guarantee Issuance request, the request moves to Scrutiny stage. At this stage the gathered information during registration are scrutinized.

In case of MT798 message, if the User encounters validation error during handling the task, user can put the task on 'Hold' and resume after getting the correct details from the customer (by manually sending a

message through common group messages). The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value.

Guarantee Issuance request initiated by Customer having SWIFT for corporates (MT798-MT784/MT760/MT761) will be STP and task will be available in Scrutiny stage for further handling by the Bank User.

The Incoming MT798 message contains 3 sections.

- MT798 Index Message which contains the Sub message type 784
- MT798 Details Message which contains the Sub Message type 760 (MT700 tags with values)
- MT798 Extension Message which contains the Sub Message type 761 (MT761 Extension message tag values) if applicable.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

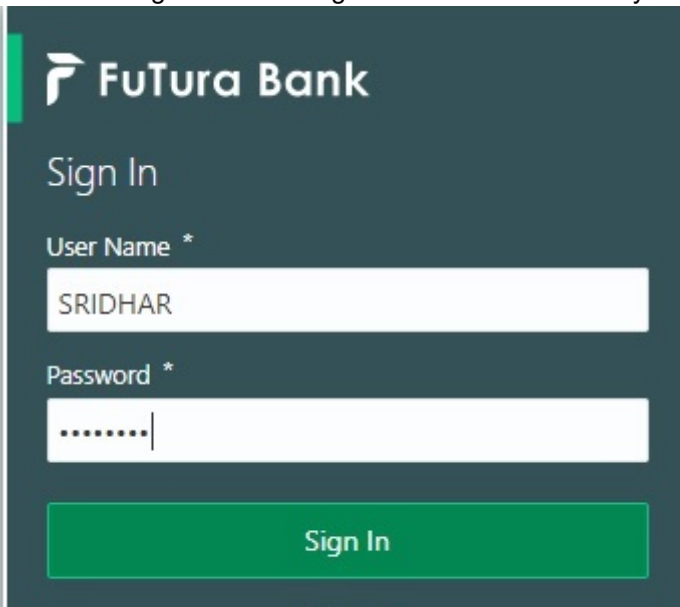

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Fields that are marked with asterisk “*” are mandatory.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

FuTura Bank

Sign In

User Name *

SRIDHAR

Password *

.....

Sign In

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard for FuTura Bank displays several widgets. On the left is a navigation menu with options like Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main area contains:

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and Status. Rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns Branch, Process Name, and Stage Name. A row shows Bank Futura, NA, and Retry HandOf.
- Priority Details:** A table with columns Branch, Process Name, and Stage Name. Rows include Bank Futura (NA, Amount Blo) and 004 (NA, Loan Applic).
- High Value Transactions:** A bubble chart showing transaction values for GBP, with a scale from -20K to 140K.
- SLA Breach Details:** A table with columns Customer Name, SLA Breached(mins), and Priority. Rows include NA (23474, H, KEERTIVO1), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns Branch, Process Name, and Stage Name. A row shows 203, Cucumber Testing, and test descrip.
- Hold Transactions:** A table with columns Branch, Process Name, and Stage Name.
- SLA Status:** A dropdown menu currently set to Cucumber Testing.
- Tasks Detailed:** A dropdown menu currently set to Cucumber Testing.

3. Click Trade Finance> Tasks> Free Tasks.

The Oracle Free Tasks page shows a table of tasks. The left sidebar has 'Free Tasks' highlighted. The table has the following data:

Action	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Ct
Acquire & Edit	M	Guarantee Issuance	300GTEI000030653	300GTEI000030653	Scrutiny	20-04-20	300	0

4. Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.

This screenshot is identical to the previous one, but the 'Acquire & Edit' button for the first task (Guarantee Issuance) is highlighted with a red box. The table data remains the same.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task.

The screenshot shows the Oracle 'My Tasks' interface. On the left is a navigation menu with 'My Tasks' highlighted. The main area displays a table with the following data:

Ac...	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Customer
Edit	M	Guarantee Issuance	300GTEI000030653	300GTEI000030653	Scrutiny	20-04-20	300	001506

At the bottom, there is a pagination control showing 'Page 1 of 1 (1 - 1 of 1 items)'.

The Scrutiny stage has three sections as follows:

- Main Details
- Guarantee Preferences
- Local Guarantee
- Additional Details
- Summary

Let's look at the details for Scrutiny stage. User can enter/update the following fields. Some of the fields that are already having value from registration/online channels may not be editable.

Main Details

Main details section has three sub section as follows:

- Application Details
- Guarantee Details

Application Details

All fields displayed under Application details section, would be read only except for the **Priority** and **Customer Reference Number**. Refer to [Application Details](#) for more information of the fields.

Following fields are the additional new fields apart from the fields carried over from [SBLC/Guarantee Details](#) of [Registration](#). Provide the details for the two additional fields based on the description in the following table:

Field	Description	Sample Values
Copy Existing Undertaking	Select any existing undertaking to be copied, if required.	
Template name	<p>This is applicable only for the non-online Guarantee Issuance request.</p> <p>This option allows user to select a template if the applicant details are already captured and the data can be reused with the template to reduce the effort. The details pertaining to the subsequent screens in Scrutiny and Data Enrichment screens will be persisted and populated when you move to the relevant screens.</p> <p>Before populating the screens, application will check if there are any existing values and will display an alert message ' Value exist already in few fields - Do you want to use the template - Yes/No'. If the you click on Yes the existing details will be over-written with the template values.</p> <p>Click the look up icon to search the Template code with Template Code or Template Description.</p> 	
View Guarantee/ SBLC	Click View to view the details of the selected template in Template Name.	
Use	Click Use to use the selected template in Template Name.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.</p>	
Overrides	<p>Click to view overrides, if any.</p>	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Incoming Message	<p>This button displays the multiple messages (MT760 + up to 7 MT761).</p> <p>Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(784,760/761).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p>	
Cancel	<p>Cancel the Guarantee Issuance Scrutiny stage inputs.</p>	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

Auto Extension Period	<p>Select the auto extension period for expiry date from the following options:</p> <ul style="list-style-type: none"> • Days • One year • Others <p> Note This field is applicable only if Auto Extension Required toggle is set to On.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Extension Details	<p>Provide the extension details for the expiry date.</p>  <p>Note This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Non-Extension Details	<p>Provide the non-extension details for automatic expiry date extension such as notification methods or notification recipient details.</p>  <p>Note This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Non-Extension Notice Period	<p>Provide the non-extension notice days.</p>  <p>Note This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Auto Extension Final Expiry Date	<p>Provide the final extension date for automatic expiry date extension after which no automatic extension is allowed.</p>  <p>Note This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.</p> <p>If Automatic Extension Required toggle is set to Yes, the user can manually enter the value. This date/duration can be beyond the calculated value provided in the “Auto Extension Period”.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Liability Change Schedule

In this section, user can enter the details of increase or decrease of liability on a pre-scheduled date as applicable.

Provide the **Liability Change Schedule** based on the description in the following table:

Field	Description	Sample Values
Liability Change Type	<p>Select the liability change type. This field describes the basis for liability change.</p> <p>Values are:</p> <ul style="list-style-type: none"> • Event Based - User can enter the Event details in “Additional Details” field. The actual liability change for Event based type should be operationally handled by the user based on the event details • Time Based - The liability change should happen automatically on the pre-scheduled date as given. 	
Additional Details	Specify the additional details to increase or decrease of liability or both are involved.	
Standard Type	<p>This field describes whether liability change is standard or non-standard.</p> <p>This field is disable if, Liability Change Type is Event Based.</p>	

Field	Description	Sample Values
Liability Type	This field describes whether Increase or decrease of liability or both are involved.	
Number of Periods	User can enter the numeric value of the period corresponding to the units.	
Units	User can select the value from drop down. Values are: <ul style="list-style-type: none"> • Monthly • Quarterly • Half Yearly • Yearly 	
Amount	User can enter the Liability Amount that should be increased or decreased on the liability change date.	
Percentage	User can either enter the amount of liability to be changed or percentage of liability to be changed. If percentage is chosen, then system should calculate the equivalent amount of liability to be changed.	
Schedule Grid	If the liability change is for more than one date, or if the liability change is not based on time, user can input the details in the schedule grid.	
Sequence Number	Serial number of the liability change.	
Scheduled Date	User can enter the date on which liability change to happen.	
Amount	User can enter the Liability Amount that should be increased or decreased on the liability change date.	
Percentage	The user can either enter the amount of liability to be changed or percentage of liability to be changed. If percentage is chosen, then system should calculate the equivalent amount of liability to be changed.	
Liability Type	This field describes whether Increase or decrease of liability or both are involved.	
Plus Icon 	Click plus icon to add a new row to input the liability change details in the grid.	
Minus Icon 	Click minus icon to remove any existing grid Details.	

Demand Indicator

Field	Description	Sample Values
Demand Indicator	<p>This field specifies whether partial and/or multiple demands are not permitted. Select the demand indicator from the following options:</p> <ul style="list-style-type: none">• Multiple demands are not permitted - Partial amount can be claimed• Partial demands are not permitted - Entire amount can be claimed• Multiple and partial demands are not permitted - Entire amount can be claimed <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Underlying Transaction Details

Field	Description	Sample Values
Underlying Transaction Details	<p>Select the underlying business transaction details (for which the undertaking is issued) from the LOV.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Delivery of Original Undertaking

Field	Description	Sample Values
Delivery of Original Undertaking	<p>Select the method of the delivery from the following options by which the original local undertaking needs to be delivered:</p> <ul style="list-style-type: none"> • COLL - By Collection • COUR - By Courier • MAIL - By Mail • MESS - By Messenger - Hand Deliver • OTHR - Other Method • REGM - By Registered Mail or Airmail <p> Note This field is not applicable, if Purpose of Message field value is ICCO/ISCO.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Narrative	<p>Provide the description of method of delivery of original undertaking.</p> <p> Note This field is applicable only if the Delivery of Original Undertaking field value is COUR/OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Delivery to/Collection by	<p>Select the details of to whom the original local undertaking is to be delivered or by whom the original local undertaking is to be collected:</p> <ul style="list-style-type: none"> • BENE - Beneficiary • OTHR - Others <div style="text-align: center;">  <p>Note</p> <p>This field is not applicable, if Purpose of Message field value is ICCO/ISCO.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p> </div>	
Narrative	<p>Provide the name and address.</p> <div style="text-align: center;">  <p>Note</p> <p>This field is applicable only if the Delivery to/Collection by field value is OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p> </div>	

Transfer Details

Field	Description	Sample Values
Transfer Indicator	<p>Select the check box if the undertaking is transferable.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Transfer Conditions	<p>Provide the conditions to transfer the undertaking.</p> <p> Note</p> <p>This field is applicable only if the Transfer Conditions check box is checked.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Others

Field	Description	Sample Values
Sender to Receiver Information	<p>Select the additional information for receiver from the LOV.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Charges	<p>Select the charger for the undertaking from the LOV.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Advice Through Bank	<p>Select the additional bank to advise the undertaking from the LOV.</p>  <p>Note</p> <p>This field is enabled only if Advising Bank in Main Details hop has value.</p>	
Available With	<p>This field identifies the bank with which the credit is available of the issued LC.</p> <p>User must capture the bank details or any free text.</p> <ul style="list-style-type: none"> • Search the bank with SWIFT code (BIC) or Bank Name. <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address gets defaulted.</p>  <p>Note</p> <p>This field is applicable only for SBLC.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Confirmation Instructions	<p>Select the confirmation instruction from the available values:</p> <ul style="list-style-type: none"> • CONFIRM • MAY ADD • WITHOUT  <p>Note</p> <p>This field is applicable if the Form of Undertaking is STBY - Standby LC.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Requested Confirmation Party	<p>Select the requested confirmation party from the available options:</p> <ul style="list-style-type: none"> • Advising Bank • Advise Through Bank • Others <p> Note This field is applicable if the Confirmation Instructions is Confirm or May Add.</p> <p> Note This field is applicable only for SBLC.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Confirming Bank	<p>Select the Confirming Bank from the LOV.</p> <p> Note This field is applicable only for SBLC.</p> <p> Note This field is applicable if the Requested Confirmation Party value is Others.</p>	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.</p>	
Overrides	<p>Click to view overrides, if any.</p>	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Incoming Message	<p>This button displays the multiple messages (MT760 + up to 7 MT761).</p> <p>Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(784,760/761).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p>	
Cancel	<p>Cancel the Guarantee Issuance Scrutiny stage inputs.</p>	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Back	<p>Click Back button to navigate to the previous screen.</p>	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Local Guarantee

User must provide Local Guarantee (Sequence C) details. Values from [Guarantee Preferences](#) (Sequence B) and [Main Details](#) will get defaulted to few of fields in this section. Provide the details based on the description in the following table:

Field	Description	Sample Values
Form of Undertaking	<p>Read only field.</p> <p>The value will get defaulted from Main Details.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Req. Local Undertaking T & C	<p>Specify the terms and conditions.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is populated from Incoming MT 760. User can modify this field.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is populated from Incoming MT 760. User can modify this field.</p> <p>This field displays the content from MT760 and all applicable MT761.</p>	
Applicable Rules	<p>The value will get defaulted from Main Details.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Narrative	<p>Specify the description of type of undertaking.</p> <p>This field is enabled, if Applicable Rules field value is OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Type of Undertaking	<p>Select the type of undertaking from the following available options:</p> <ul style="list-style-type: none"> • Advance Payment Guarantee • BILL - Bill of Lading • CUST - Customs • DPAY - Direct Pay • INSU - Insurance • JUDI - Judicial • LEAS - Lease • PAYM - Payment • PERF - Performance • RETN - Retention • SHIP - Shipping • TEND - Tender or Bid • WARR - Warranty/ maintenance • OTHR - Others <p>The value will get defaulted from Main Details.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Narrative	<p>Provide the narrative.</p> <div style="text-align: center;">  <p>Note</p> </div> <p>This field is applicable only if the Type of Undertaking field value is OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Applicant	<p>Read only field.</p> <p>The value will get defaulted from Main Details.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Beneficiary	<p>Read only field.</p> <p>The value will get defaulted from Main Details.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Undertaking Amount	<p>Read only field.</p> <p>The value will get defaulted from Main Details.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Available With	<p>Read only field.</p> <p>The value will get defaulted from Guarantee Preferences.</p> <div data-bbox="683 1048 746 1137" style="text-align: center;">  <p>Note</p> </div> <p style="text-align: center;">This field is applicable only for SBLC.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Requested Issue Date	<p>Provide the date on or by which the requested local undertaking must be issued.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Expiry Type	<p>This field indicates whether undertaking has specified expiry date or is open-ended. Select the applicable value from the available options:</p> <ul style="list-style-type: none"> • COND - Conditional Expiry • FIXD - Specified expiry date (with/without automatic expansion) • OPEN - No specific date of expiry <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Expiry Date	<p>Provide the expiry date.</p> <p>This field is applicable only if Expiry Type field has value Fixed.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Expiry Condition/Event	<p>Read only field.</p> <p>The value will get defaulted from Main Details.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Standard Wording Required	<p>Select the check box if standard wording is required for the terms and conditions.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Guarantee Language	<p>Select the guarantee language from the LOV.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is populated from Incoming MT 760. User can modify the field.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is populated from Incoming MT 760. User can modify the field.</p>	

Field	Description	Sample Values
Documents and Presentation Instructions	<p>Select the documents and presentation instructions from the LOV.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Supplementary Information About Amounts	<p>Provide any additional amounts related to undertaking.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Governing Law	<p>Select the applicable governing law and jurisdiction for the undertaking.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Advise Through Bank	<p>Read only field.</p> <p>The additional bank to advice the undertaking will get defaulted from guarantee issuance.</p>	

Auto Extension Details

Auto extension details is applicable only if it is enabled in [Guarantee Preferences](#). The values will be defaulted from [Guarantee Preferences](#) and can be amended, if required. Provide the Automatic Extension Details based on the description in the following table:

Field	Description	Sample Values
Automatic Extension Required	<p>Toggle On: Set the toggle On, if automatic extension for expiry date is required.</p> <p>Toggle Off: Set the toggle Off, if automatic extension for expiry date is not required.</p> <p>Note: This field is not applicable Validity field in registration stage has value as Open.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Auto Extension Period	<p>Select the auto extension period for expiry date from the following options:</p> <ul style="list-style-type: none"> • Days • One year • Others <p> Note</p> <p>This field is applicable only if Auto Extension Required toggle is set to On.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Extension Details	<p>Provide the extension details for the expiry date.</p> <p> Note</p> <p>This field is applicable only if Auto Extension Period field value is Days/ Others.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is populated from Incoming MT 760. User can modify this field.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is populated from Incoming MT 760. User can modify this field.</p>	

Field	Description	Sample Values
Non-Extension Details	<p>Provide the non-extension details for automatic expiry date extension such as notification methods or notification recipient details.</p>  <p>Note This field is applicable only if Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is populated from Incoming MT 760. User can modify this field.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is populated from Incoming MT 760. User can modify this field.</p>	
Non-Extension Notice Period	<p>Provide the non-extension notice days.</p>  <p>Note This field is applicable only if Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is populated from Incoming MT 760. User can modify this field.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is populated from Incoming MT 760. User can modify this field.</p>	
Auto Extension Final Expiry Date	<p>Provide the final extension date for automatic expiry date extension after which no automatic extension is allowed.</p>  <p>Note This field is applicable only if Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is populated from Incoming MT 760. User can modify this field.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is populated from Incoming MT 760. User can modify this field.</p>	

Transfer Details

Field	Description	Sample Values
Transfer Indicator	Read only field. The value will get defaulted from Guarantee Preferences .	
Transfer Conditions	Read only field. The value will get defaulted from Guarantee Preferences .	

Demand Details

Field	Description	Sample Values
Demand Indicator	Read only field. The value will get defaulted from Guarantee Preferences . If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.	

Underlying Transaction Details

Field	Description	Sample Values
Underlying Transaction Details	Select the underlying business transaction details (for which the undertaking is issued) from the LOV. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.	

Delivery of Original Undertaking

Field	Description	Sample Values
Delivery of Original Undertaking	<p>Select the method of the delivery from the following options by which the original local undertaking needs to be delivered:</p> <ul style="list-style-type: none"> • COLL - By Collection • COUR - By Courier • MAIL - By Mail • MESS - By Messenger - Hand Deliver • OTHR - Other Method • REGM - By Registered Mail or Airmail <p> Note This field is not applicable, if Purpose of Message field value is ICCO/ISCO.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	
Narrative	<p>Provide the description of method of delivery of original undertaking.</p> <p> Note This field is applicable only if the Delivery of Original Undertaking field value is COUR/OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p>	

Field	Description	Sample Values
Delivery to/Collection by	<p>Select the details of to whom the original local undertaking is to be delivered or by whom the original local undertaking is to be collected:</p> <ul style="list-style-type: none"> • BENE - Beneficiary • OTHR - Others <div style="text-align: center;">  <p>Note</p> <p>This field is not applicable, if Purpose of Message field value is ICCO/ISCO.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p> </div>	
Narrative	<p>Provide the narrative.</p> <div style="text-align: center;">  <p>Note</p> <p>This field is applicable only if the Delivery to/Collection by field value is OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is Read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is Read only and populated from Incoming MT 760.</p> </div>

Limits & Collateral

If the Guarantee Issuance is at Counter Issuing Bank (CIB), the user can enter the details.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

If the Guarantee Issuance is at Local Issuing Bank (LIB), the user can enter the details.

Commission Details

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	

Field	Description	Sample Values
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Select the check box to waive charges/ commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Split	The user can split the Commission by enabling/ disabling the flag as per the requirement.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	<p>Details of the Settlement Account is defaulted.</p> <p>User can change the settlement account.</p>	
Amend	Displays if the field is amendable or not.	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	

Field	Description	Sample Values
Split	The bank User can split the Charges/Commission by enabling/disabling the flag as per the requirement.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Provide the Tax Details based on the information in the following table:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

Split Settlement

Once the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice, new section "Split Settlement" will appear below the 'Tax' section. The default parties in Split row should be fetched from OBTF.

Field	Description	Sample Values
Select	The option to select the split settlement record.	
Component	The split component type eligible for Split .	
Currency	The currency of split settlement.	

Field	Description	Sample Values
Amount	The amount of split settlement.	

Split Settlement Details

Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for Data Enrichment stage.

The screenshot shows the Oracle 'My Tasks' interface. A single task is displayed in a table with columns for Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Customer. The 'Edit' button in the first row is highlighted in red. The 'My Tasks' tab in the left sidebar is also highlighted in red.

Action	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Customer
Edit	M	Guarantee Issuance	300GTEI000030653	300GTEI000030653	DataEnrichment	20-04-20	300	001506

The Data Enrichment stage has five sections as follows:

- Main Details
- Guarantee Preferences
- Documents and Instructions
- Local Guarantee
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Main Details

Refer to [Main Details](#).

Guarantee Preferences

Refer to [Guarantee Preferences](#).

Document and Conditions

Documents maintained at the product level will be populated and user must be able to update the details if required.

The screenshot shows the Oracle application interface for 'Guarantee Issuance'. The main content area displays 'Documents and Conditions' with a table of document details. The table has the following data:

Code	Document Description	Copy	Original	Document Received	Action
ROAD_RECPT	TRANSPORT COMPANY	1	1	<input type="checkbox"/>	<input type="button" value="Edit"/> <input type="button" value="Delete"/>

Field	Description	Sample Values
Code	Click Search icon to search and select the document code based on the document received. User can add or delete the code by deleting the line on the grid.	
Document Description	System displays the document description based on the document code selection. User can edit the description.	
Copy	Specify the number copies received from the Drawer. User can edit the actual copies received.	
Original	Specify the number of original documents received from the Drawer. User can edit the actual originals received.	
Document Received	System displays whether original document is required or not. The user can enable the option, if original document is required.	
Action	Click Edit icon to edit the document details. Click Delete icon to delete the document details.	

Additional Fields

Banks can configure these additional fields during implementation.

The screenshot shows the Oracle Flexcube Universal Bank interface. The top navigation bar includes the Oracle logo, 'My Tasks', and user information for SRIDHAR01. The main header displays 'Guarantee Issuance - DataEnrichment :: Application No: 300GTEI000030653'. A left sidebar contains a menu with options like Main, Guarantee Preferences, Documents and Instructions, Local Guarantee, Additional Fields (selected), Advices, Additional Details, and Summary. The main content area is titled 'Additional Fields' and shows a message: 'No Additional fields configured!'. At the bottom, there are buttons for 'Audit', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Local Guarantee

Refer to [Local Guarantee](#).

Acknowledgement Details

An acknowledgment in format MT 768 is sent by advising bank to the issuing for Guarantee. The user can input the details required for issuing bank as part of MT 768. The outgoing MT 798 should display the 761 as applicable.

The screenshot shows the Oracle Flexcube Universal Bank interface for 'Acknowledgement Details'. The top navigation bar includes the Oracle logo, '(DEFAULTTENITY)', and user information for ZARTAB02. The main header displays 'Guarantee Issuance' and 'DataEnrichment :: Application No:- 000GTEI000164955'. A top menu bar contains options like Clarification Details, Documents, Remarks, Overrides, Customer Instruction, Incoming Message, and Signatures. A left sidebar contains a menu with options like Main, Guarantee Preferences, Documents and Conditions, Additional Fields, Local Guarantee, Acknowledgement Details (selected), Advices, Additional Details, Settlement Details, and Summary. The main content area is titled 'Acknowledgement Details' and shows 'MT 768 Guarantee Acknowledgment'. It contains several input fields: 'Issuing Bank Reference' (with a search icon), '25 Account Identification' (with a search icon), 'Issuing Bank Date' (with a calendar icon), '32a Amount of Charges' (with a dropdown arrow), '57a - Account with Bank' (with a search icon), '71 D Charges', and '72-Sender to Receiver Information' (with a search icon and a document icon). At the bottom, there are buttons for 'Audit', 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Provide the Acknowledgment Details based on the information in the following table:

Field	Description	Sample Values
Issuing Bank Reference	This field specifies the issuing bank reference.	
Account Identification	This field identifies, where necessary, the account which is used for settlement of charges.	
Issuing Bank Date	This field specifies the date on which the acknowledgement message being issued was sent. System displays the Branch Date. If the task is approved on a later date, then the date should be updated as the branch date as on approval.	
Amount of Charges	This field specifies the currency code and total amount of charges claimed by the advising bank. If the Sender services an account for the Receiver in the currency of the charges, and this System should default the Date of Debit as the branch date as on approval.	
Account with Bank	This field specifies the bank at which the Sender wishes to receive credit for charges claimed.	
Charges	The user should be able to input more details about the charges	
Sender to Receiver Information	This field should be available for the user to enter any additional information the advising bank sends to the Issuing bank. This can be maintained as an FFT	

Advices

Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

If the Guarantee Issuance is at Counter Issuing Bank (CIB) - Guarantee Instrument (MT 760), Acknowledgment (MT 768)

If the Guarantee Issuance is at Local Issuing Bank (LIB) - Guarantee Instrument - Mail Advice, Acknowledgment (MT 768)

The user can also suppress the Advice, if required.

Field	Description	Sample Values
Suppress Advice	<p>Toggle on: Switch on the toggle if advice is suppressed.</p> <p>Toggle off: Switch off the toggle if suppress advice is not required for the amendments</p>	
Advice Name	User can select the advise name.	
Medium	The medium of advices is defaulted from the system. User can update if required.	

Field	Description	Sample Values
Advice Party	Value be defaulted from Guarantee /SBLC Issuance. User can update if required.	
Party ID	Value be defaulted from Guarantee /SBLC Issuance. User can update if required.	
Party Name	Read only field. Value be defaulted from Guarantee /SBLC Issuance.	
Free Format Text		
FFT Code	User can select the FFT code as a part of free text.	
FFT Description	FFT description is populated based on the FFT code selected.	
	Click plus icon to add new FFT code.	
	Click minus icon to remove any existing FFT code.	
Instruction Details		
Instruction Code	User can select the instruction code as a part of free text.	
Instruction Description	Instruction description is populated based on the instruction code selected.	
	Click plus icon to add new instruction code.	
	Click minus icon to remove any existing instruction code.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment Stage Inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.

Preview Message

This screen provides preview of draft guarantee details. If required, the draft can be sent for legal verification to legal team and draft confirmation to customer. The system sends Draft MT760 along with up to seven MT761 messages as attachment to the customer.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number.

The Transaction Reference Number is masked, before sending the Draft Import LC for Customer approval.

If the Guarantee Issuance is at Counter Issuing Bank (CIB)/ Local Issuing Bank (LIB), preview message is populated with the outgoing MT760 and all the applicable MT761.

Guarantee Text

Select the language to preview the draft guarantee details. Based on the guarantee text captured in the previous screen, guarantee draft is generated in the back office and is displayed in this screen.

Legal Verification

Set the Legal Verification toggle on, if the guarantee message is to be verified and approved by Legal department before issue. The Legal Verification details must be captured in legal verification stage.

Draft Confirmation

Set the Draft Confirmation Required toggle on, if the guarantee message needs to be approved by customer before issue.

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

Field	Description	Sample Values
Preview - SWIFT Message		
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	
Message Status	Read only field. Display the message status of draft message of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of draft message of guarantee details.	
Preview Message	Display a preview of the draft message.	
Preview - Mail Device		
Language	Read only field. English is set as default language for the preview.	
Advice Type	Select the advice type.	

Field	Description	Sample Values
Message Status	Read only field. Display the message status of draft message of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of draft message of guarantee details.	
Preview Message	Display a preview of advice.	
Draft Confirmation		
Draft Confirmation Required	This toggle enables the user to select if draft confirmation is required or not	
Following fields will have values on receipt of customer response.		
Customer Response	User can enter the response received from customer. If the response is received online, the response is auto populated in this field by the system	
Customer Remarks	Remarks from the customer for the draft	
Response Date	Customer Response received date.	
Customer Email ID 1	Default email address of the customer. System fetches the Email ID from Customer Address maintenance in Back office and auto populates the available Email ID.	
Customer Email ID 2	By default this field is blank. User can search and select the Email ID from lookup from the Customer Email Address field of the customer maintenance in Back Office and replicated in OBTFPM.	

Create Template

This option allows user to create a new template with the already captured details and the data can be reused with the template to reduce the effort. The user can enter the template name and create the

template, details pertaining to the subsequent screens in Scrutiny and Data Enrichment screens will be persisted and populated.

Summary

User can review the summary of details updated in Data Enrichment stage Guarantee Issuance request.

The tiles will display a list of important fields with values. User must be also able to drill down from summary Tiles into respective data segments.

The screenshot shows the Oracle Guarantee Issuance Summary screen. The interface includes a navigation menu on the left with 'Summary' selected. The main area displays a grid of summary tiles for various data segments: Main, Guarantee Preferences, Additional Fields, Local Guarantee, Advices, Limits and Collaterals, Commission, Charges and Taxes, Accounting Details, Settlement Details, Parties Details, Compliance details, and Preview Messages. At the bottom, there are buttons for 'Audit', 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', 'Next', and 'Submit'.

Tiles Displayed in Summary

- Main Details - User can view application details and Guarantee details.
- Guarantee Preferences - User can view the guarantee preferences.
- Additional Fields - User can view the additional Fields.
- Local Guarantee - User can view the local guarantee.
- Advices - User can view the advices
- Limits and Collaterals - User can view limits and collateral details.
- Commission, Charges and Taxes - User can view commission,charges and taxes details.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated by back office system.

Note
When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message “ Value Date is different from Transaction Date for one or more Accounting entries.

- Settlement Details - User can view the settlement details.
- Parties Details - User can view party details like beneficiary, advising bank etc.
- Compliance details - User can view the compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Preview Message - User can view the preview message details.

- Documents and Conditions - User can view document details.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	

Exceptions

The Guarantee Issuance request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office.

On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office.

If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and guarantee details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Guarantee Details - User can view and modify Counter Guarantee details and Guarantee details, if required.
- Draft Confirmation - User can view and modify draft guarantee details, legal verification and customer confirmation details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Amount Block Exception Inputs.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application KYC exception queue. KYC exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and guarantee details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the KYC Exception inputs.	

Field	Description	Sample Values
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application limit check exception queue. Limit check exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Application

Refer to [Application Details](#).

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and guarantee details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Guarantee Details - User can view and modify Counter Guarantee details and Guarantee details, if required.

- Draft Confirmation - User can view and modify draft guarantee details, legal verification and customer confirmation details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Limit check inputs.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT798, on approval the task is handed off to back office system to create a Guarantee contract and generate the required MT760/761 messages.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

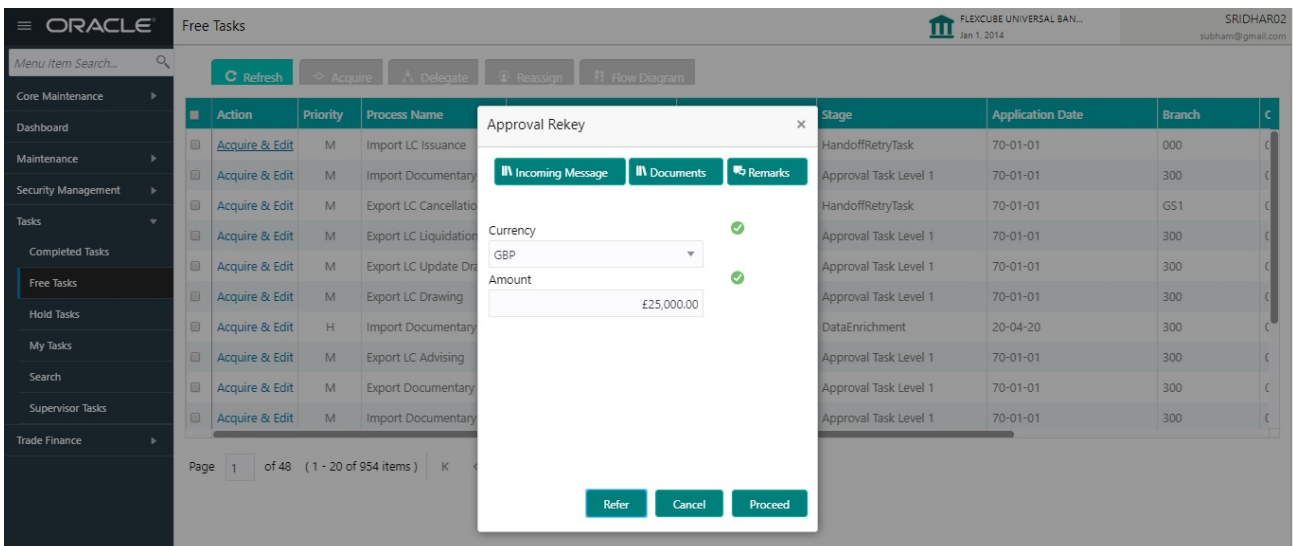

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

received this communication in error, please notify us by reply e-mail or telephone and immediately and permanently delete the message and any attachments. Thank you

Customer - Reject Letter

Reject Letter is generated by the system and addressed to the customer, when a task is rejected by the user. The Reject Letter format is as follows:

FROM:

<BANK NAME>

<BANK ADDRESS>

TO:DATE <DD/MM/YYYY>

<CUSTOMER NAME>

<CUSTOMER ADDRESS>

<CUSTOMER ID>

Dear Sir,

SUB: Your Guarantee Application <Customer Reference Number> under our Process Ref <Process Ref No> - Rejected

Further to your recent Guarantee application request dated <Application Date –DD/MM/YYYY>, under our process ref no <process ref no>, this is to advise you that we will not be able to issue the Guarantee.

After a thorough review of your application and the supporting documents submitted, we have concluded we will not be able to issue the Guarantee due to the below reason

<Reject Reason >

On behalf of Demo Bank, we thank you for your ongoing business and trust we will continue to serve you in future.

For any further queries about details of your Guarantee application review, please contact us at our bank customer support ph.no xxxxxxxxxxxx

Yours Truly

Authorized Signatory

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Guarantee Issuance in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view and modify details about application details and guarantee details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify charge details, if required.
- Guarantee Details - User can view and modify Counter Guarantee details and Guarantee details, if required.
- Draft Confirmation - User can view and modify draft guarantee details, legal verification and customer confirmation details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Remarks - As a Reject approval user, you will be able to view the remarks captured in the process during earlier stages. User also can see the Reject code with reason for rejection in the Remarks column

Action Buttons

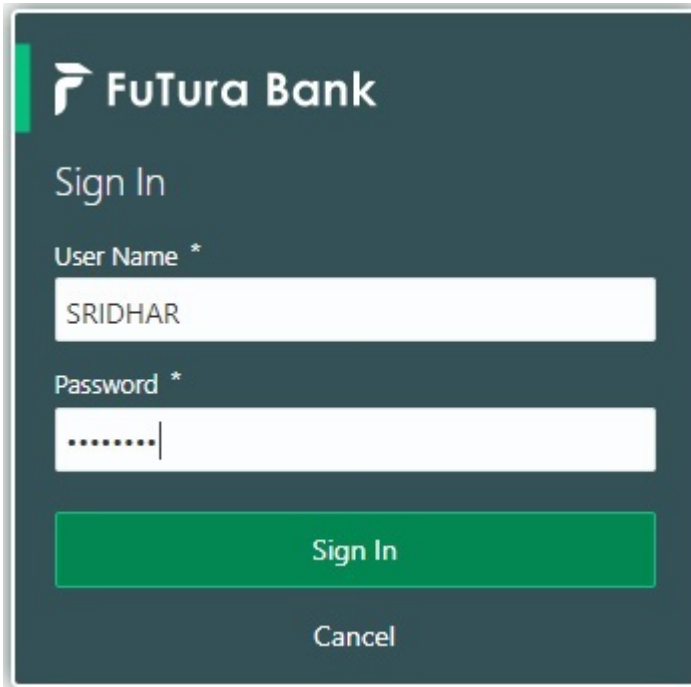

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.	

Initiate - Guarantee Issuance Template Maintenance

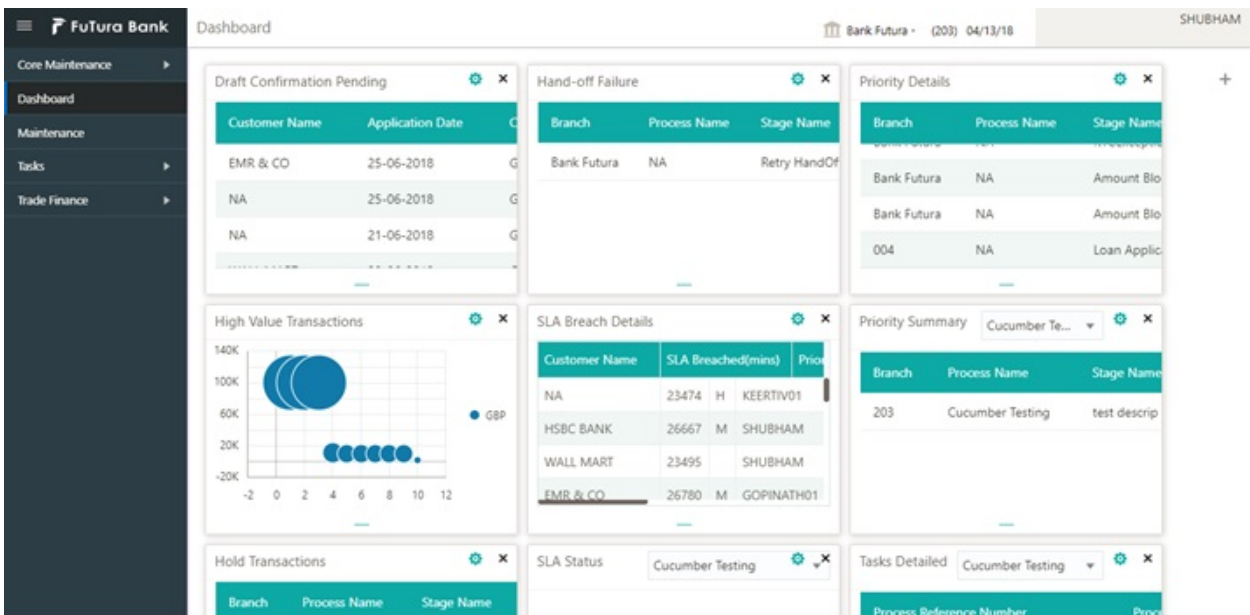

The user can create Guarantee Issuance Template and can use these templates to create Guarantee Issuance. The user can provide the basic application details to initiate the process.

Using the entitled login credentials, login to the OBTFPM application.

The image shows a login form for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text 'Sign In'. Below the header, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' with masked characters. At the bottom, there are two buttons: a green 'Sign In' button and a white 'Cancel' button.

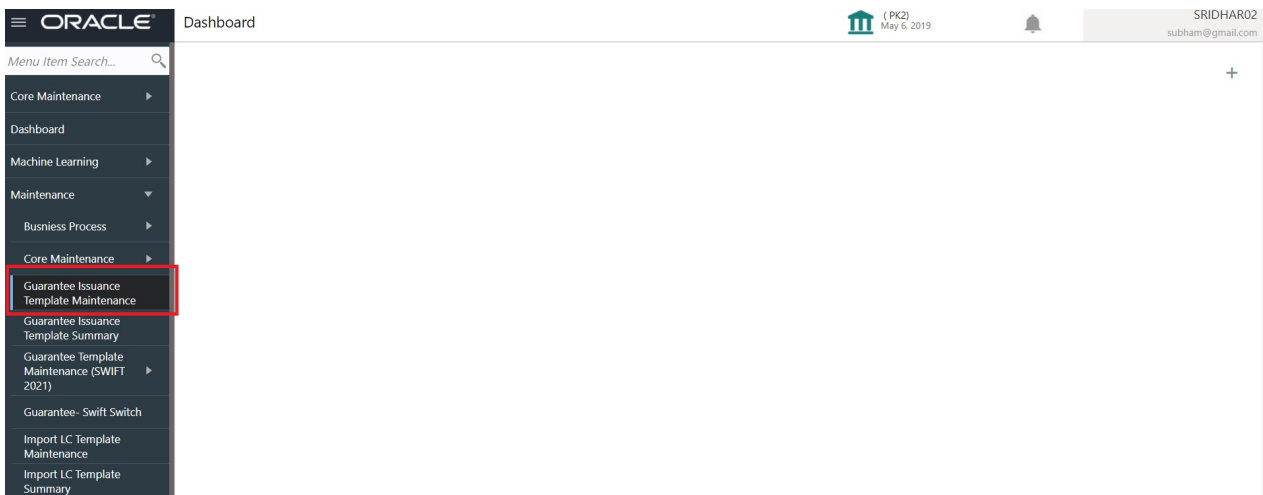

6. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image shows a screenshot of the FuTura Bank dashboard. The dashboard is titled 'Dashboard' and includes a navigation menu on the left with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main content area displays several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'. Data rows include 'EMR & CO' (25-06-2018), 'NA' (25-06-2018), and 'NA' (21-06-2018).
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row: 'Bank Futura', 'NA', 'Retry HandOf'.
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data rows include 'Bank Futura', 'NA', 'Amount Blo', and '004', 'NA', 'Loan Applic'.
- High Value Transactions:** A bubble chart showing transaction values for 'GBP'.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Prio'. Data rows include 'NA' (23474, H, KEERTIV01), 'HSBC BANK' (26667, M, SHUBHAM), 'WALL MART' (23495, SHUBHAM), and 'EMR & CO' (26780, M, GOPINATH01).
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row: '203', 'Cucumber Testing', 'test descrip'.
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A dropdown menu showing 'Cucumber Testing'.
- Tasks Detailed:** A dropdown menu showing 'Cucumber Testing'.

7. Click **Maintenance > Guarantee Issuance Template Maintenance > Guarantee Issuance Template Maintenance.**

Create Guarantee Issuance Template Maintenance (SWIFT 2021)

User can create a new Guarantee Issuance template maintenance.

The user can capture the basic application details in the Guarantee Issuance Template Maintenance screen. The Guarantee Issuance Template Maintenance screen has three sections as SBLC Guarantee Details, Sequence B and Sequence C.
