Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Claim Update Under Guarantee Issued

As part of update a claim lodged under a Guarantee/SBLC Issued process, the applicant can register an update to a claim against the Guarantee/SBLC issued.

The various scenarios to Update a claim lodged under a Guarantee/SBLC issued are:

• Capturing response from the Applicant/ Instructing party for Extend or Settle request

(As per Article 23 or URDG - Extend or Pay, the guarantor may suspend payment for a period not exceeding 30 calendar days following its receipt of the demand an in case of counter-guarantees, the counter-guarantor may suspend payment for a period not exceeding four calendar days less than the period during which payment of the demand under the guarantee was suspended)

- Capturing details of further Presentation details/ Documents received from Beneficiary or claiming party
- Capturing details of any legal injunctions received from the Applicant/ Instructing Party
- Update of Settlement account or any other information in the underlying claim

In the subsequent sections, let's look at the details for update a claim lodged under a Guarantee/SBLC Issued process:

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval

Common Initiation Stage

The user can initiate the new update a claim lodged under a Guarantee/SBLC Issued request from the common Initiate Task screen.

- 1. Using the entitled login credentials, login to the OBTFPM application.
- 2. Click Trade Finance > Initiate Task.

≡ ORACLE°	Initiate Task		(300) Jan 1, 2016	JEEVA02 subham@gmail.com

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

During the Registration stage, the user can register an update to the claim lodged under a Guarantee/ SBLC Issued.

In this stage the user can initiate an update to the Guarantee/ SBLC Claim Lodged. The user can capture the basic details of the application, check the signature of the applicant and upload the related documents of the applicant.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is available, system should display all the signatures	
Documents	User can upload the claim documents.	
	Application will display the mandatory and optional documents.	
Remarks	User can enter the additional information regarding the Claim Update Guarantee Issuance. This information can be viewed by other users in other stages of the process.	
	Content from Remarks Field should be handed off to Remarks field in Backend application.	

Field	Description	Sample Values
Customer Instruction	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
View Guarantee/SBLC	User can view all the latest Guarantee/Standby LC details.	
Guarantee/SBLC Events	User can view all the previous events under the Guarantee/Standby LC.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Cancels the Guarantee Issuance Claim Update Registration stage input.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Submit	On Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee/ SBLC Issuance Claim Update. If mandatory fields have not been captured, system will display an error message until the	
Checklist	mandatory fields data are provided. Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	
	 Signatures on Claim verified Mandatory claim Documents received 	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

- 1. Navigate to the Registration screen.
- 2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
- 1. Customer Maintenance details are replicated from OBTF to OBTFPM.
- 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
- 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validates if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
- 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of Registration of a Guarantee SBLC Claim update request, the request moves to Data Enrichment stage. At this stage the bank user can update the various claim fields. The user can input the transaction details.

At this stage the gathered information during Registration stage and claim update request are scrutinized and enter the data as required.

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

The Data Enrichment stage has sections as follows:

- Main Details
- Claim Details

- Document Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields as part of Guarantee/SBLC claim update - Data Enrichment Stage. Some of the fields that are already having value from registration/ online channels may not be editable.

In case of requests received through SWIFT MT799, the task will be created in DE stage directly and the fields will be populated based on the incoming request.

Main Details

Main details section has three sub section as follows:

- Application Details
- Guarantee Details

Application Details

All fields displayed under Application details section, would be read only except for the **Priority**. Refer to Application Details in the Registration stage for more information of the fields.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents.	
	Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	
Customer Instructions	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	

Field	Description	Sample Values
Incoming Message	Clicking this button allows the user should be able to see the message in case of STP of incoming MT 767.	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
View Undertaking	Clicking this button allows the user should to view the undertaking details.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is available, system should display all the signatures	
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system and the task may be terminated or moved to Reject Approval Stage.	
	Reject Codes:	
	R1- Documents missing	
	R2- Signature Missing	
	R3- Input Error	
	 R4- Insufficient Balance/Limits R5 - Others. 	
	Select a Reject code and give a reject description.	
	This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Refer	On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes:	
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. 	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Cancel the Guarantee/ SBLC Claim update DE stage inputs.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Claim Details

As part of DE, the bank user can update the various claim fields. The user can also be able to input the transaction details.

The user can scrutinize the claim update request and input data as required.

In case of requests received through SWIFT MT799, the task will be created in DE stage directly and the fields will be populated based on the incoming request.

Provide the Claim details based on the description in the following table:

Field	Description	Sample Values		
Claiming Bank Reference	Specify the value for claiming bank reference.			
Date of Demand	Read Only field.			
	System defaults value from Guarantee /SBLC claim.			
Demand Indicator	Read Only field.			
	System defaults value from Guarantee /SBLC claim.			
Demand Type	Read Only field.			
	System defaults value from Guarantee /SBLC claim.			
Claim Currency/ Amount	Read Only field.			
	System defaults currency for claim and the claim amount from Guarantee /SBLC claim.			
New Expiry Date	Read Only field.			
	System defaults value from Guarantee /SBLC claim.			
	If the applicant has accepted the extension in expiry date, then the new expiry date should be updated in the Guarantee Amend module in OBTF. Any additional commission for the extension to be calculated from the Amendment module.			

Field	Description	Sample Values	
New Expiry Date-Local Undertaking	Read Only field. System defaults the new expiry date-local undertaking from Guarantee /SBLC claim.		
Demand Statement	Demand Statement Specify or click Search icon to search and select the narrative text that constitutes the demand.		
Presentation Completion Details	Specify or click Search icon to search and select the presentation of completion details. This field specifies information about the presentation documentation. If the presentation is incomplete, this must specify how the presentation will be completed.		
Additional Amount Information			
Intermediary	Read Only field. System defaults value from Guarantee /SBLC claim.		
Account with Institution	Read Only field.		
	System defaults value from Guarantee /SBLC claim.		
	This field specifies the financial institution through which the amount claimed must pass to reach the account with institution.		

Claim Update Details

Provide the Claim Update details based on the description in the following table:

Field	Description	Sample Values		
Guarantor Response	arantor Response The user can select the guarantor response.			
	This values are:			
	Legal Injunction			
	Reject Claim			
_	Extension			
New Expiry Date	Read Only field.			
	System defaults the value from Guarantee /SBLC claim.			
	This field appears if you select Extension option in Guarantor Response field.			
Old Expiry Date	Read Only field.			
	System defaults the value from Guarantee /SBLC claim.			

Field	Description	Sample Values
Status	Read Only field.	
	System with default status based on the user acceptance or rejection of the extension request.	
	If the applicant has accepted the extension, the status of the claim update should be Extension – Accepted and handoff from OBTFPM should be provided to the Guarantee Amendment function id in OBTF.	
	If the applicant has rejected the extension, the status of the claim update should be Extension – Rejected and handoff from OBTFPM should be provided to the Guarantee Claim Update function id in OBTF.	
	If the applicant has provided the legal injunction, the status of the claim update should be Injunction and handoff from OBTFPM should be provided to the Guarantee Claim Update function id in OBTF.	
	If the bank has found discrepancy in the claim, user selects Invalid Claim. The status should be Rejected and handoff from OBTFPM should be provided to the Guarantee Claim Update function id in OBTF.	
Legal Injunction	User can update the claim status if there is any legal injunction in processing the claim.	
	This option can be enabled if you select Legal Injunction and Reject Claim option in Guarantor Response field.	
Reason for Refusal	User can enter the reason for refusal.	
	This field appears if you select Reject Claim option in Guarantor Response field.	
Disposal of Documents	User can enter the mode in which the documents have to be disposed in case of rejection of claim.	
	This option is enabled if you select Legal Injunction and Reject Claim option in Guarantor Response field.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values	
Documents	Click the Documents icon to View/Upload the required documents.		
	Application will display the mandatory and optional documents.		
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.		
Overrides	Click to view overrides, if any.		
Incoming Message	Clicking this button allows the user should be able to see the message in case of STP of incoming MT 767.		
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.		
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.		
View Undertaking	Clicking this button allows the user should to view the undertaking details.		
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.		
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.		
	If more than one signature is available, system should display all the signatures		
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.		

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system and the task may be terminated or moved to Reject Approval Stage.	
	Reject Codes:	
	R1- Documents missing	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/LimitsR5 - Others.	
	Select a Reject code and give a reject description.	
	This reject reason will be available in the remarks window throughout the process.	
Refer	On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.	
	Refer Codes:	
	 R1- Documents missing 	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/LimitsR5 - Others.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	On click of Cancel the user can cancel the task window and return to the dashboard. The data input will not be saved.	
Save & Close	Save the information provided and holds the task in 'My Tasks' for working later.	
	This option will not submit the request	
Back	On clicking Back, system should move the task to the previous segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Document Details

In Document Details, the user can view the documents required for a claim and verify if the Claim Documents are submitted as per documents required. The user, can scrutinize the claim request and input data as required.

The user can view the documents as part of claim under Guarantee/SBLC - DE Stage.

Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled.	
	The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settl. Accnt	Details of the settlement account.	

Tracers Details

The bank users can capture these tracer details for Claim Lodgement in Guarantee and should send the tracers to the customer till its Settled / Extended / Rejected / Injunction.

racer Code	Description	Party Type	Required	Maximum Tracers	Number Sent	Start Days	Last Sent On	Medium	Frequency	Template Id	Action
GUA_CLM_TRA				2	2	1		SWIFT 🔻	15		1

Field	Description	Sample Values
Tracer Code	Read only field.	
	Tracer code is defaulted by the system maintained in the Product level.	
Description	Read only field.	
	Description of the tracer code is auto populated.	
Party Type	Specify the party type or click 'Search' to search and select the Rreceiver party type from the lookup.	
Required	Enable this option, if the respective tracer is required.	
Maximum Tracers	Specify the value for maximum number of tracers to be sent.	
	Maximum allowed is 99 exceeding the same system should prompt an error message for the same "Maximum number of numerals allowed is: 2" and should clear the field to enter the correct value by the user.	
	Maximum Tracers cannot be less than the "Number Sent", system needs to validate the same.	
Number Sent	Number Sent is defaulted by the System with the value, where the number of tracers sent so far. And it cannot be greater than the "Maximum Tracers".	

Field	Description	Sample Values
Start Days	Specify the number of days after which the tracer has to be sent from the Tracer Start date. It should be positive numeric value.	
Last Sent On	Read only field.	
	Tracer last sent date is defaulted by the system.	
Medium	Select the medium in which the Tracer has to be generated. It lists all the possible mediums maintained in the system.	
	The options are:	
	SWIFT	
	MAIL	
Frequency	Specify the medium in which the Tracer has to be generated. It should be positive numeric value.	
	System should default the Frequency captured as part of the Contract here and should allow the user to modify the same.	
Template ID	Specify the party type or click 'Search' to search and select the template ID in which the tracer has to be generated from the lookup.	
	It is a lookup which lists all the possible templates maintained in the system.	
	Template ID is nothing but the data that goes in Tag 79 in MT799.	
	This template ID is applicable only for medium 'SWIFT'	
	Template lookup displays all the template ids applicable for the given Tracer Code.	
Action	Click the Edit icon to edit the tracer details.	

Preview Message

The bank user can view a preview of the message and advice simulated from back office which is based on the guarantee Claim captured in the previous screen.

Action Buttons

Use action buttons based on the description in the following table:

	Field	Description	Sample Values
-	Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents.	
	Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	
Customer Instructions	Click to view/ input the following	
	 Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. 	
	• Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Incoming Message	Clicking this button allows the user should be able to see the message in case of STP of incoming MT 767.	
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.	
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
View Undertaking	Clicking this button allows the user should to view the undertaking details.	

Field	Description	Sample Values
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is available, system should display all the signatures	
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	
Reject	On click of Reject, user must select a reject reason from a list displayed by the system and the task may be terminated or moved to Reject Approval Stage.	
	Reject Codes:	
	 R1- Documents missing 	
	R2- Signature Missing	
	 R3- Input Error R4- Insufficient Balance/Limits 	
	 R5 - Others. 	
	Select a Reject code and give a reject description.	
	This reject reason will be available in the remarks window throughout the process.	
Refer	On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.	
	Refer Codes:	
	 R1- Documents missing 	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	On click of Cancel the user can cancel the task window and return to the dashboard. The data input will not be saved.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in 'My Tasks' for working later. This option will not submit the request	
Back	On clicking Back, system should move the task to the previous segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

	This option is used, if there are any pending information yet to be received from applicant.	
Cancel	On click of Cancel the user can cancel the task window and return to the dashboard. The data input will not be saved.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in 'My Tasks' for working later. This option will not submit the request	
Back	On clicking Back, system should move the task to the previous segment.	
Submit	On clicking Submit, system validates for all mandatory field values and the task should move to the next logical stage. If the user submits without visiting other mandatory steps, then error message is displayed and force the user to visit mandatory tabs/update mandatory fields.	

Multi Level Approval

This stage allows the approver user to approve a Claim Update under Guarantee Issued transaction.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Claim Amount
- Currency

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
