Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

ORACLE®

Import Documentary Collection Update Booking - Islamic

Details of Import Documentary Collection can be updated before liquidation, changes can be for Collection amount, Maturity Date, etc. The update can be requested through Online/Offline channels.

The various stages involved for Import Doc Collection update are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents received from the presenting bank
- Verify documents and capture details (Online/Non Online Channels)- Data Enrichment stage
- Input/Modify details of update Collection - Data Enrichment stage
- Check for limit availability if applicable
- Check balance availability for amount block if applicable
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Import Doc Collection Update process flow is similar to that of conventional Import Doc Collection Update process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new Islamic import collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

ORACLE®

2. Click **Trade Finance > Initiate Task.**

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration
 User can register request for an Islamic Import Doc Collection Booking Update at the front desk (as an application received physically/Courier). During Registration stage, user can capture the basic details of the transaction, check the signature of the applicant and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

ORACLE®

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

ORACLE®

3. Click **Trade Finance - Islamic > Import Documentary Collection> Import Documentary Collection Update - Islamic.**

The Registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

ORACLE®

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Documentary Collection Number	Provide the documentary collection Number. Alternatively, user can search the documentary collection reference using LOV. In the LOV, user can search giving any combination details of Documentary Collection Number, Drawer, Currency, Amount, Product Code and Booking Date to fetch the collection details. Based on the search result, select the applicable documentary collection to update the details.	
Drawee	Read only field. Drawee ID and name will be auto-populated based on the selected Documentary Collection Number. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties. **Note** If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.	
Branch	Read only field. Branch details will be auto-populated based on the selected Documentary Collection Number.	203-Bank Futura -Branch FZ1

Field	Description	Sample Values
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of task in Registration stage.	High
Submission Mode	Select the submission mode of Import Collection Update Booking request. By default the submission mode will have the value as 'Desk'. **Desk-** Request received through Desk **Courier-** Request received through Courier	Desk
Update Date	Read only field. By default, the application will display branch's current date.	04/13/2018
Remitting Bank/Remitter	Read only field. Remitting Bank/Remitter will be auto-populated based on the selected Documentary Collection Number. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties. **Note** In case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".	
Remitting Bank/Remitting Bank Reference	Read only field. Remitting Bank/Remitting Bank Reference will be auto-populated based on the selected Documentary Collection Number.	
Process Reference Number	Read only field. Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	
Remitting Bank Date/ Remitting Date	Read only field. Remitting Bank Date/Remitting Date will be auto-populated based on the selected Documentary Collection Number.	
Version Number	Read only field. Version Number will be auto-generated.	

ORACLE®

Collection Details

Registration user can provide collection details in this section. Alternately, details can be provided by Data Enrichment user.

Provide the Collection Details based on the description in the following table:

Field	Description	Sample Values
Documents Received	Documents Received will be auto-populated based on the selected Documentary Collection Number. User can change the documents received value.	
Duplicate	If a Duplicate (second set) of Import document is received, the user has to initiate Import Collection update process. User has to select the option as '**Second**' in "**Document Received**" and has to set the "Duplicate" toggle to Yes. .	
Tenor Type	Read only field. Tenor will be auto-populated based on the selected Documentary Collection Number. If Tenor type is Both, system should disable user input in Liquidation and Unlinked FX rate field. On Submit user will get an error message.	
Product Code	Read only field. Product Code will be auto-populated from the collection booking.	
Product Description	Read only field. This field displays the description of the product as per the product code.	

ORACLE®

Field	Description	Sample Values
Operation Type	Operation type will be auto-populated from the collection booking. User can update the operation code, if required. The options are: • ACC • NEG • COL • PUR • DIS • PAY • FOP - Free of Payment for bills booked with operation Collection or Acceptance. **Note** Change of Operation from Collection or Acceptance to Free of Payment should be enabled only for Documentary Bills not under LC. **Note** User cannot change the operation type, If the operation code is set as ADV or COL or DIS in collection Booking. **Note** User can change the operation type to ADV or DIS, if the operation code is set as ACC in collection booking.	
Stage	System displays the stage of the transaction. User can change the value from initial to final. **Note** User cannot change the stage value from Final to initial. **Note** For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.	
Contract Reference Number	System to populate contract reference number from the back end system once the Documentary Collection Number is selected.	

ORACLE®

Field	Description	Sample Values
Bill Amount	Read only field. Bill amount will be auto-populated based on the selected Documentary Collection Reference.	
Amount In Local Currency	System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated from the collection booking.	
Finance Amount	Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number. User can update the Finance Amount, if the Operation Type is set to DIS and PUR.	
Acceptance Date	Provide the acceptance date.	
Non Acceptance Date	Specify the non acceptance date.	
Non Payment Date	Specify the non payment date.	
Drawer	Read only field. Drawer Name will be auto-populated from the collection booking. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties. **Note** If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.	
Limit verification required	Toggle On- Enables for limit verification. If the toggle is disabled and **Finance amount** has been provided, the system prompts an override message on Submit.	
Rebate Amount	Provide rebate to the bill outstanding amount.	
Transferee Bank	Read only field. Displays the name of the transferee bank.	

ORACLE®

Field	Description	Sample Values
Avalization/Co-Acceptance Requested	Enable this option, if the bill is to be avalized. User can enable this option either during the Bill Booking or Amendment. During bill booking, the option can be enabled both INTIAL/FINAL stage and **Operation** is COL/ACC /DIS During the Amendment, stage should be Final. By default this option is disabled. Once the option is enabled, it can not be unchecked during any further actions or operations. ![Note icon] **Note** Option is not applicable for Sight bills, Multi-tenor and Bills Under LC.	

Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the collection booking update.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	

Field	Description	Sample Values
Customer Instruction	Click to view/ input the following ● **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Events	On click, system will display the details of collection and liquidations if any, in chronological sequence.	
Action Buttons

Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

ORACLE

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.

1. Customer Maintenance details are replicated from OBTF to OBTFPM.

2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".

3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.In case submission mode is not "Online", the system will validates if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.

4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of registration of an Import Collection Update Booking, the request moves to Data Enrichment stage. A DE user can input Islamic Import Doc Collection update. As part of data enrichment, user can enter/update basic details of the incoming request.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

ORACLE®

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
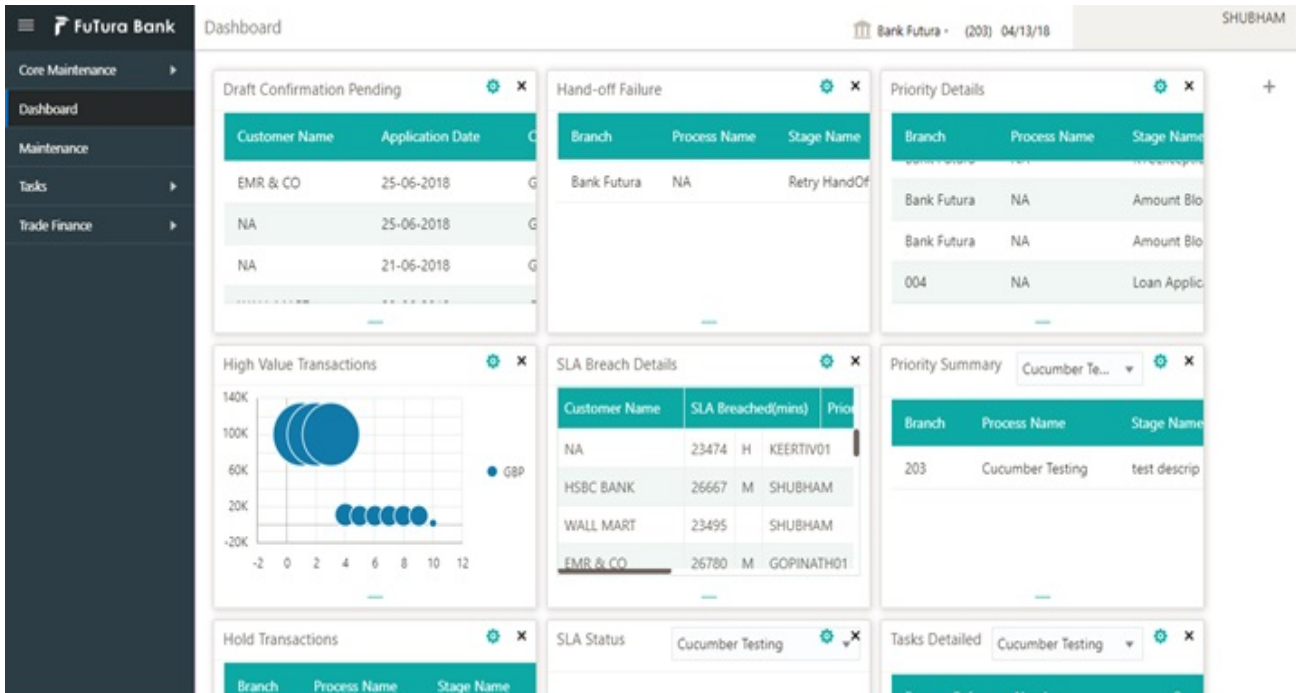

3. Click **Tasks> Free Tasks.**
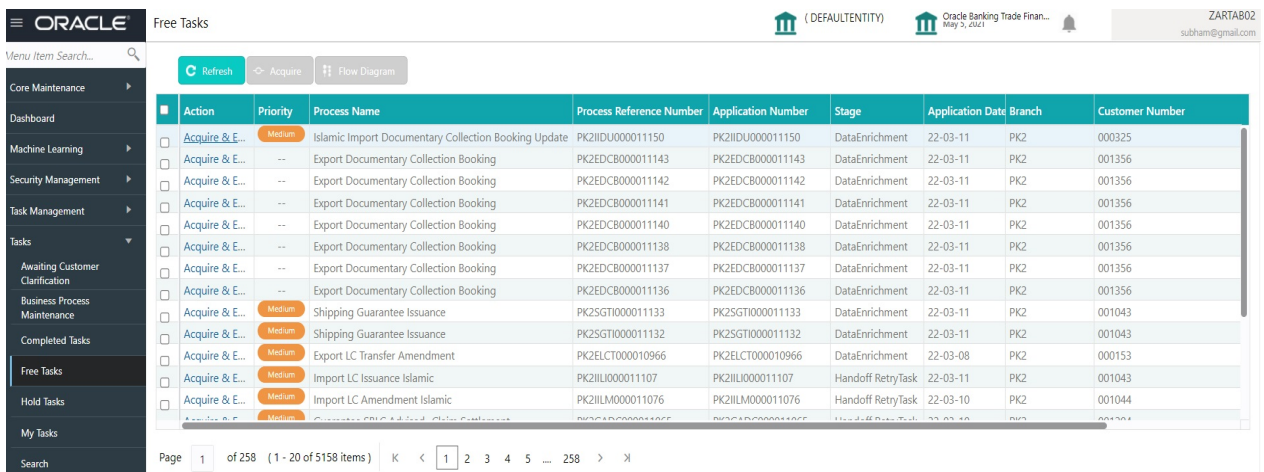

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
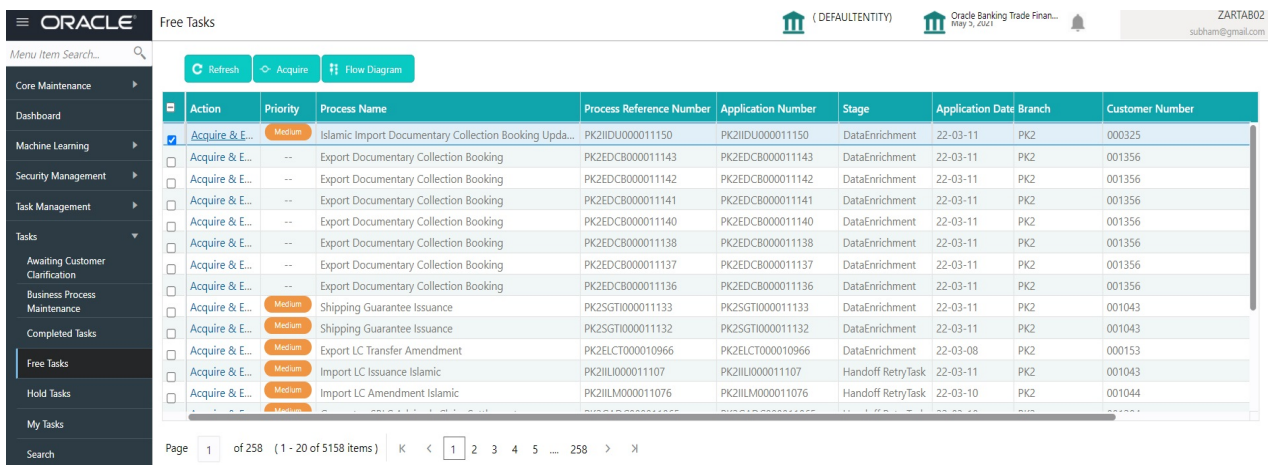

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task.

The Data Enrichment stage has sections as follows:

- Main Details
- Document Details
- Other Details
- Shipment Details
- Maturity Details
- Additional Fields
- Advices
- Updated Details
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields in Application Details that are already having value from registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority** and **Submission Mode** fields. Refer to Application Details for more information of the fields.

Collection Details

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. Refer to Collection Details for more information of the fields. During Registration, fields that were not captured during Registration can be updated in Data Enrichment stage.

Note

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same.(Display only field if Submission mode is Online.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.

Port Of Loading	This field specifies the port of discharge or airport of destination as indicated on the transport document. Provide the details of Port/Airport of Loading. **Note** This field is alternate to **Place Of Taking In Charge**.	
Port Of Discharge	This field specifies the port of discharge or airport of destination as indicated on the transport document. Provide the details of Port/Airport of Discharge. **Note** This field is alternate to **Place Of Final Destination**.	

ORACLE®

Field	Description	Sample Values
Place Of Final Delivery	This field specifies the final destination or place of delivery as indicated on the transport document. Provide the details of Place Of Final Destination. **Note** This field is alternate to **Port Of Discharge**.	
Carrier Name	Provide the name of the carrier through which the goods were shipped.	
Shipping Agent	Provide the shipping agent name as per the document received.	
Shipping Agent Address	Provide the shipping agent details, if more than one carrier is used for the shipment.	
INCO Terms	Select the appropriate INCO terms.	
INCO Terms Description	The description of the INCO Term.	

Description of Goods and/or Services

Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
+ Icon	Click + icon to add goods details.	
Goods Code	Click look up icon to select the goods code. Once you select goods code, value will populate in Goods Type and Goods Description.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	
Edit icon	Click the Edit icon to edit the goods description.	
No of Units	Specify the number of units being imported or exported.	
Price per Unit	Specify the value for price per unit.	
Total Amount	System to calculate the total price. In case of online request, the system should populate the total amount from incoming request. System should validate that the total amount is equal to the value of the transaction (LC/Collection).	
Action	Click the Edit icon to edit the goods code. Click the Delete icon to delete the goods code.	

ORACLE®

Field	Description	Sample Values
Country of Origin	Provide the country of origin details as per the documents received.	
Insurance Company Code	Select the Insurance Company Code from the LOV.	
Insurance Company	Read only field. Insurance company details will be displayed as per the selected Insurance Company Code from the LOV.	
Policy Number	Provide the policy number.	

Multimodal/Transshipment Details

During shipment, if goods are shipped using multiple transports on its way or any transit ports, the details must be captured in this section.

Field	Description	Sample Values
Carrier Name	Provide the details of the carrier as per the documents received, if the goods were shipped via multiple carriers.	
Port	Provide the port details as per the document received, if the ship has transit on its way to the destination.	
Action	Click Edit icon to edit the Carrier name and port. Click Delete icon to delete the record.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

ORACLE®

Field	Description	Sample Values
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	Click to view/ input the following ● **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.	
Back	On click of Back, system moves the task back to previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	

ORACLE®

Field	Description	Sample Values
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

ORACLE®

Maturity Details

A Data Enrichment user can enrich the maturity details for Islamic Import Collection Update.

Draft Details

Update the draft details based on the description in the following table:

Field	Description	Sample Values
Draft Code	Update the draft code. Alternatively, user can search the draft details using LOV.	
Draft Amount	Update the draft amount.	
Action	Click Edit icon to edit the draft code. Click Delete icon to delete the draft code.	

Maturity and Multi Tenor Liquidation Details

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
SNo.	Serial number of the tenor record.	
Tenor Basis	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.	
Tenor Description	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.	
Start Date	Select the start date.	

Field	Description	Sample Values
Tenor Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.	
Transit Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.	
Maturity Date	Maturity date as Start date + Tenor Days or Transit Days. This field is disabled if the Tenor Type is 'Both'	
Bill Amount	Provide the bill amount.

	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field.	
	The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.	
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	If check box is selected, charges/commissions has to be deferred and collected at any future step.	
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.	
	If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	
Amendable	The value is auto-populated as the commission can be amended or not.	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default.	
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Waive	If charges have to be waived, this check box has to be selected. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if 'Defer' toggle is enabled.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

Message Preview

This section displays the preview message of MT412, if acceptance is involved.

FX Linkage

This section enables the user to link the existing FX contract(s) to the bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

ORACLE®

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

ORACLE®

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
FX Reference Number	Select the FX contract reference number from the LOV. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, • Counterparty of the FX contract should be the counterparty of the Bill contract. • Active Forward FX transactions authorized not marked for auto liquidation. Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.	
Bought Currency	This field displays the currency from the linked FX contract.	

ORACLE®

Field	Description	Sample Values
Sold Currency	This field displays the currency from the linked FX contract.	
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Rate	This field displays the rate at which the contract is booked.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.	
Current Utilized amount	This field displays the liquidated /purchased / discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Action	Click the Edit icon to modify the FX details. Click the Delete icon to delete the FX details.	
Average FX Rate	Multiple forward FX contract could be linked,and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

ORACLE®

Payment Details

Select the payment details options based on the description in the following table:

Field	Description	Sample Values
Auto Liquidate	Enable Auto Liquidate option, if required. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system.	
Advance by Finance	Enable the Advance by finance option, if required. Advance by Finance enables creation of loan at the time of Final liquidation.	
Settle Available Amount	Enable this option, if during settlement, the amount as available in the CASA account of the customer has to be utilized and for the balance if a loan has to be availed.	
Allow Roll over	Select Allow Rollover check box to allow rollover, if required.	

ORACLE®

Field	Description	Sample Values
Auto Change from Acceptance to Advance	Select Auto Change from Acceptance to Advance, if required. This flag indicates whether an Acceptance type of bill should be automatically converted into an Advance type of bill on its liquidation date. **Note** This option is applicable only for the bills that are co-accepted by the bank.	
Liquidate using Collateral	Select Liquidate using Collateral check box, if required.	
Outstanding Collateral Amount	Read only field. The outstanding collateral amount along with the currency. **Note** Cash collateral is applicable only for the bills which are co-accepted by the bank.	
Split Settlement	**Toggle On**: Enables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill **Toggle Off**: Disables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill	Disable
Settlement Details - Liquidation		
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	
Debit/Credit	Application displays debit/ credit for the component.	
Account	Customer account.	
Account Description	Description of the account.	
Branch	Branch of the customer's account.	
Account Currency	Currency of the account.	
Split Settlement		

ORACLE®

Field	Description	Sample Values
Component	Components gets defaulted based on the product selected.	
Contract Currency	Application displays the default currency for the component.	
Amount	Amount for each component. This is populated from the transaction details of the drawing.	
Split Settlement Details		
Sequence	Sequence of the settlement details.	
Amount	Amount for the split settlement.	
Settlement Account	Details of the settlement account.	
Account Customer	Customer account.	
Account Currency	Currency of the account.	
Account Branch	Branch of the customer's account.	
Original Exchange Rate	Click the Fetch Exchange Rate button, the system displays the Original Exchange Rate as simulated in settlement details section from OBTF	
Action	Click Edit icon to edit the split settlement details record. Click Delete icon to delete the split settlement details record.	

Tracers

This section enables the user to view the defaulted tracer details from back end application. It also allows the user to add new tracer details. Add new tracer details based on the description in the following table:

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

Field	Description	Sample Values
Tracer Required	Enable the option, if tracer is required or not.	

ORACLE®

Field	Description	Sample Values
Number of Tracers	Provide the number tracers required.	
Tracer Frequency	Select the frequency for generation of the tracer.	
Tracer Medium	Select the tracer medium from the LOV.	
Tracer Receiver Party	Select the tracer receiver party from the LOV.	
Tracer Start Date	Select the tracer start date. Start date cannot be earlier than the branch date.	
Reason for Non Payment	Specify the reason for non payment.	
Acceptance Tracer		
Tracer Required	Enable the option, if tracer is required or not.	
Number of Tracers	Provide the number tracers required.	
Tracer Frequency	Select the frequency for generation of the tracer.	
Tracer Medium	Select the tracer medium from the LOV.	
Tracer Receiver Party	Select the tracer receiver party from the LOV.	
Tracer Start Date	Select the tracer start date. Start date cannot be earlier than the branch date.	
Template ID	Select the template ID from LOV. This field is enabled if Tracer Medium has value as SWIFT.	
Reason for Non Acceptance	Specify the reason for non acceptance.	

Finance Preference

This section enables the user to link a finance to liquidate the document under collection. This section will be enabled based on the product selected for documents under collection.

ORACLE®

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Customer Id	Defaults from the underlying task. User cannot change the value.	
Customer Name	Applicant/ Drawee Name. Defaults from the underlying task. User cannot change the value.	
Product Code	Defaults from the underlying Collection/ Drawing Product maintenance. User cannot change the value.	
Finance Currency-Amount	Finance currency is defaulted from the bill currency. User can change this to Local Currency. System should display an error message on tab out if the currency selected is not a Bill currency or Local Currency. System populates the loan account based on the outstanding drawing/ Collection amount less the collateral amount. User cannot change the Finance amount.	
Original Exchange Rate	System displays the original Exchange rate from maintenance. User cannot change the value.	
Exchange Rate	Exchange rate applicable for Local Currency. System displays the Exchange rate from maintenance. User cannot change the value. System validates the exchange rate is within the allowed range.	
Finance Tenor Units	Period of loan. System defaults the value. User can change the value. The numerical value for Days or months or Years is applicable.	
Tenor Type	System defaults the value. User can change the value. Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.	
Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	
Finance Maturity Date	Finance maturity date as default based on Tenor type and Tenor units. User cannot change the value.	

ORACLE®

Field	Description	Sample Values
Finance Profit/UDE Details		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	
Usage	System populates the details as part of simulation.	
UDE Value	System populates the value as part of simulation.	
Limits		
Serial Number	System defaults the value.	
Linkage Type	System defaults the linkage type as "Facility" from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.	

Linked Finance Details

This user can view the details of linked finance accounts.

Provide the finance preference details based on the description in the following table:

Field	Description	Sample Values
Finance Account	The details of the linked finance account.	
Finance Currency	Finance Currency of the linked finance account.	

ORACLE®

Field	Description	Sample Values
Finance Amount	Finance amount of the linked finance account.	

Profit Details

The user can view and modify the Profit Details Simulated from Back Office system.

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: - Fixed Floating - Special	
Rate Code	This field displays the rate code applicable for the Componen.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the **Rate Type** is **Floating.**	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the **Rate Type** is **Floating.**	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the **Rate Type** is **Fixed**. System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	

ORACLE®

Field	Description	Sample Values
Special Pricing Reference Number	Specify the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component). Special Pricing Reference is not applicable for Penal Interest components. For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same. **Note** System displays an override as "Special Pricing Applicable", on clicking "Save" in the Interest Details screen, if Special Pricing Reference number has been provided.	
Currency	System defaults the Interest currency in this field.	
Interest Amount	User can input the interest amount, in case the **Rate Type** is **Special**, else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	System displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..	
Settlement Account	System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM)..	

ORACLE®

Field	Description	Sample Values
Settlement Currency	This field displays the settlement account currency.	
Settlement Branch	This field displays the settlement account branch.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents.	
	Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.	
	Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following	
	● **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.	
	● **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	

ORACLE®

Field	Description	Sample Values
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.	
Back	On click of Back, system moves the task back to previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	

ORACLE®

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

Settlement Details

A Data Enrichment user can enter basic settlement details available in the Islamic Import Collection Update. In case the request is received through online channel user can verify the details populated.

Provide the settlement details based on the description in the following table:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	System displays the default currency for the component.	
Debit/Credit	System displays the debit/credit indicators for the components.	
Account	System displays the account details for the components.	
Account Description	System displays the description of the selected account.	
Account Currency	System defaults the currency for all the items based on the account number.	
Netting Indicator	System displays the applicable netting indicator.	
Current Event	System displays the current event as Y or N.	

Action Button

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents.	
	Application will display the mandatory and optional documents.	
	The user can view and input/view application details simultaneously.	
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

ORACLE®

Field	Description	Sample Values
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following • **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.	
Back	On click of Back, system moves the task back to previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	

ORACLE®

Field	Description	Sample Values
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

Summary

User can review the summary of details updated in Data Enrichment stage of Import Documentary Collection Update Booking request.

ORACLE®

The tiles must display a list of important fields with values. User can drill down from summary Tiles into respective data segments.

Tiles Displayed in Summary

- Main Details - User can view details about application details and collection details.
- Party Details - User can view party details like remitting bank, drawee, drawer etc.
- Maturity Details - User can view the maturity details in case usance and multi tenor.
- Document Details - User can view the document details.
- Other Details - User can view the other details.
- Shipment Details - User can view the shipment details.
- Additional Fields - User can view the details of additional fields.

- Advices - User can view the details of advices.
- Limits and Collaterals - User can view limits and collateral details.
- Commission, Charges and taxes - User can view the commission, charges and taxes details.
- Tracers - User can view the tracer details.
- Message Preview - User can view the preview of the simulated messages to remitting bank.
- FX Linkage - User can view the details of FX Linkage.
- Finance Preferences - User can view the details of the finance preferences selected.
- Payment Details - User can view the payment details.
- Settlement Details - User can view the settlement details.
- Compliance Details - User can view the compliance details.
- Profit Details - User can view the profit details.
- Accounting Details - User can view the accounting entries generated by back office system.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message " Value Date is different from Transaction Date for one or more Accounting entries.

- Updated Details - User can view the details updated to the Import Collection.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instruction	Click to view/ input the following ● **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.	
Submit	Task will move to next logical stage of Import Documentary Collection Update Booking. If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

ORACLE®

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

Exceptions

The Islamic Import Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block

ORACLE®

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Document Details - User can view the document details.
- Other Details - User can view the other details.
- Shipment Details - User can view the shipment details.
- Maturity Details - User can view the maturity details.
- Additional Fields - User can view additional fields.
- Advices - User can view the advices.

Cancel	Cancel the Import Collection Update Booking Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

A User can view the summary of details updated in multilevel approval stage of Import Collection update request. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving. User sees the summary tiles. The tiles should display a list of important fields with values. Use can also drill down from summary Tiles into respective data segments where user can verify the details of all fields under the data segment.

On successful Handoff, system triggers TRFB event in the Back office.

ORACLE®

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.
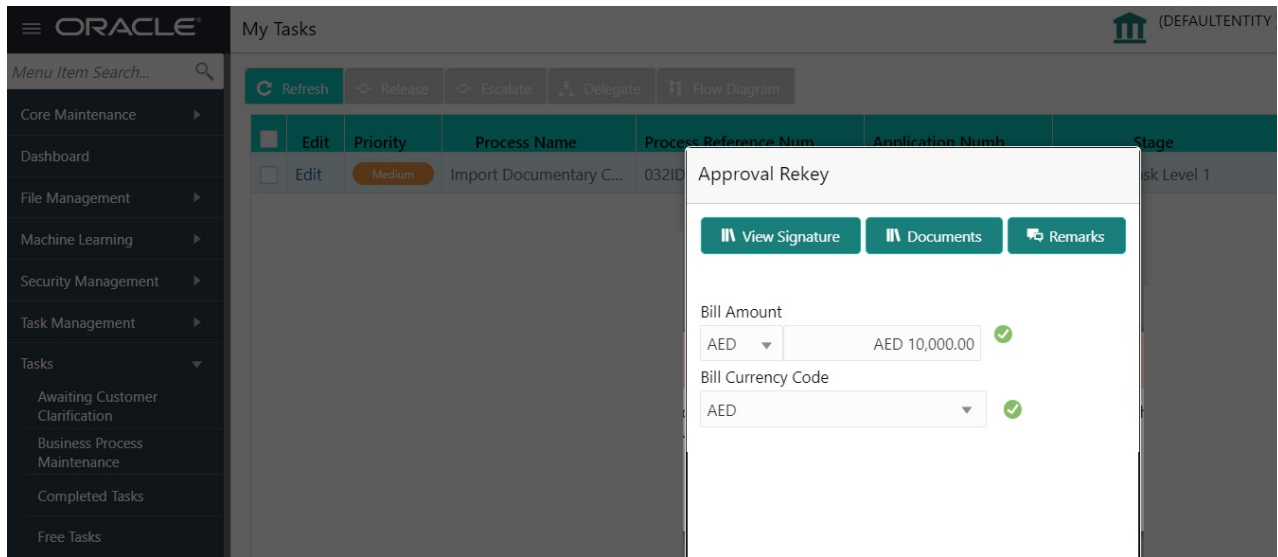

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
