Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Amendment Islamic

Import LC Amendment Islamic process enables the user to make an amendment to the LC which had been already issued. The common amendments that are made to an Import LC are:

- Expiry date
- Latest Shipment Date
- Increase/Decrease in LC amount
- Tolerance percentage
- Confirmation instruction
- Available with bank
- Port of loading/discharge
- Goods quantity
- Related documents to be submitted

The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended LC is parked awaiting beneficiary consent.

The various stages involved for Import LC Amendment are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Input/Modify details of amendment of LC - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements and draft LC copies
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office

The design, development and functionality of the Islamic Import LC Amendment process flow is similar to that of conventional Import LC Amendment process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Bi-Directional Flow for Offline Transactions Initiated from OBTFPM	Data Enrichment
Customer Response - Draft Confirmation	Exceptions
Multi Level Approval	Customer - Acknowledgement
Customer - Reject Letter	Reject Approval

Common Initiation Stage

The user can initiate the new import LC amendment request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

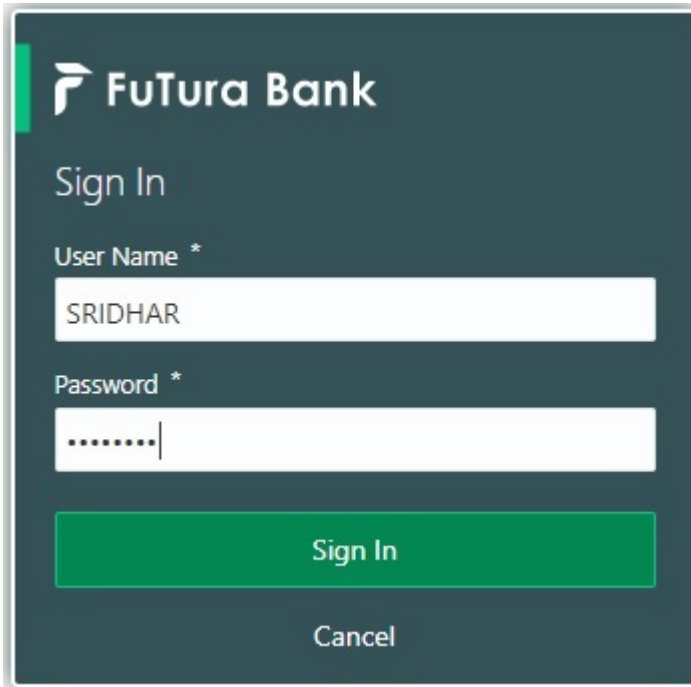

Registration

At the Registration stage, User can register a request for an Islamic Import LC amendment received at the front desk (as an application received physically/received by mail/fax). During Registration stage, the user captures the basic details of the amendment application, checks the signature of the applicant and uploads the related documents. On submit of the amendment request, the customer should be notified with acknowledgement and the request should be available for an LC Amendment expert to handle in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

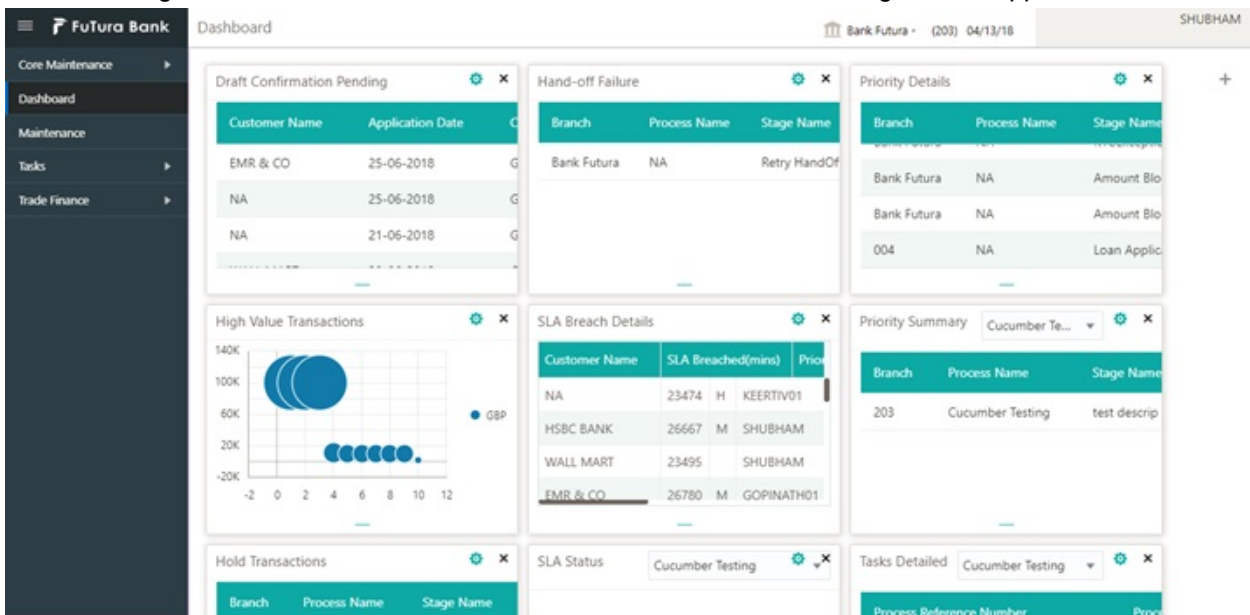

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text "Sign In". Below the header, there are two input fields: "User Name *" containing the text "SRIDHAR" and "Password *" with masked characters. At the bottom, there are two buttons: a green "Sign In" button and a white "Cancel" button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. On the left is a navigation sidebar with options like "Core Maintenance", "Dashboard", "Maintenance", "Tasks", and "Trade Finance". The main dashboard area contains several widgets:

- Draft Confirmation Pending:** A table with columns "Customer Name" and "Application Date".

Customer Name	Application Date
EMR & CO	25-06-2018
NA	25-06-2018
NA	21-06-2018
- Hand-off Failure:** A table with columns "Branch", "Process Name", and "Stage Name".

Branch	Process Name	Stage Name
Bank Futura	NA	Retry HandOf
- Priority Details:** A table with columns "Branch", "Process Name", and "Stage Name".

Branch	Process Name	Stage Name
Bank Futura	NA	Amount Blo
Bank Futura	NA	Amount Blo
004	NA	Loan Applic
- High Value Transactions:** A bubble chart showing transaction values for different categories. The y-axis ranges from -20K to 140K. A large blue bubble is visible at approximately (4, 100K).
- SLA Breach Details:** A table with columns "Customer Name", "SLA Breached(mins)", and "Priority".

Customer Name	SLA Breached(mins)	Priority
NA	23474	H KEERTIV01
HSBC BANK	26667	M SHUBHAM
WALL MART	23495	M SHUBHAM
EMR & CO	26780	M GOPINATH01
- Priority Summary:** A table with columns "Branch", "Process Name", and "Stage Name".

Branch	Process Name	Stage Name
203	Cucumber Testing	test descrip
- Hold Transactions:** A table with columns "Branch", "Process Name", and "Stage Name".
- SLA Status:** A widget showing "Cucumber Testing" with a status indicator.
- Tasks Detailed:** A widget showing "Cucumber Testing" with a status indicator.

3. Click Trade Finance> Import - Documentary Credit> Import LC Amendment.

The screenshot shows the FuTura Bank dashboard with the 'Import LC Amendment' option highlighted in the left-hand navigation menu. The main dashboard area contains three summary cards:

- Priority Summary:** A table showing the status of 'Export LC Amendment Beneficiary Consent' processes across different stages (Registration, Approval1, Approval2) for branch GS1. All counts for high and medium priority items are zero.
- High Priority Tasks:** A table listing tasks for branch NA at the 'Scrutiny' stage, with process reference numbers and customer names (Marks and Spencer).
- Pending Exception Approval:** A table showing KYC Exception Approval requests for customers like NESTLE and EMR & CO, with process reference numbers and branch names (FBN UK).

The Registration stage has two sections Application Details and LC Amendment Details. Let's look at the details of Registration screens below:

Application Details

The 'Application Details' screen is divided into two main sections:

- Application Details:** Includes fields for '20 - Documentary Credit Number', 'Branch', 'Submission Mode', 'Received From Applicant Bank', 'Amendment No', 'Application Date', 'Received From - Customer ID', 'Process Reference Number', 'Customer Reference Number', 'Received From - Customer Name', 'Priority', and 'Beneficiary Consent'.
- LC Details:** Includes fields for 'Revolving', 'Advising Bank', 'Date of Expiry', 'Beneficiary', '39C - Additional Amount Covered', 'LC Type', '40A - Form of Documentary Credit', '31D - Place of Expiry', '32B - Currency Code, Amount', 'Amount In Local Currency', 'Product Code', '31C - Date of Issue', '51A - Applicant Bank', '39A - Percentage Credit Amount Tolerance', 'Product Description', '40E - Applicable Rules', 'Applicant', and 'Limits/Collateral Required'.

Provide the Application Details based on the description in the following table. In case of MT798, Application Details are defaulted to SWIFT

Field	Description	Sample Values
Documentary Credit Number	<p>Provide the documentary credit number. Alternatively, user can search the documentary credit number using LOV.</p> <p>In LOV search/advanced LOV search, user can input Applicant, Currency, Amount, User Reference and Contract Status to fetch the LC details. The user can also search the LC which are in 'Closed' contract status. On selecting a closed LC, system displays a confirmation message that 'The LC has been closed. Do you want to Reopen'.</p> <p>On confirmation, user can amend the required fields as in the case of amendment of an active LC</p> <p>Based on the search result, select the applicable LC to be amended.</p>	
Received From Applicant Bank	<p>Import LC amendment request can be received from the applicant or from the applicant's bank.</p> <p>Toggle on: Switch on the toggle if LC Amendment request is received from applicant's bank.</p> <p>Toggle off: Switch off the toggle if LC Amendment request is received from applicant.</p>	
Received From - Customer ID	<p>Read only field.</p> <p>Customer ID will be auto-populated based on the selected LC from the LOV.</p>	001344
Received From - Customer Name	<p>Read only field.</p> <p>Customer Name will be auto-populated based on the selected LC from the LOV.</p>	EMR & CO
Branch	<p>Read only field.</p> <p>Branch details will be auto-populated based on the selected LC from the LOV.</p>	203-Bank Futura -Branch FZ1
Amendment No.	<p>Read only field.</p> <p>Amendment number will be auto-populated based on selected LC using documentary credit number. Amendment number increases by 1 for each amendment.</p>	
Process Reference Number	<p>Unique sequence number for the transaction.</p> <p>This is auto generated by the system based on process name and branch code.</p>	
Priority	<p>System will default the Priority as Low/Medium/High based on maintenance.</p>	High

Field	Description	Sample Values
Submission Mode	<p>Select the submission mode of Import LC Amendment request. By default the submission mode will have the value as 'Desk'.</p> <p>Desk- Request received through Desk</p> <p>Fax- Request received through Fax</p> <p>Email- Request received through Email</p> <p>Courier- Request received through Courier</p>	Desk
Application Date	<p>By default, the application will display branch's current date and enables the user to change the date to any back date.</p> <p style="text-align: center;">  Note Future date selection is not allowed. </p>	04/13/2018
Customer Reference Number	<p>User can enter the 'Reference number' provided by the applicant/ applicant bank.</p> <p>Enables the user to provide a unique Customer Reference Number for the amendment.</p>	
Beneficiary Consent	<p>Toggle on: Beneficiary consent required for the amendment made to the fields. Toggle must be on if amendments are made to the following fields:</p> <ul style="list-style-type: none"> • Beneficiary • Documentary Credit Amount • Expiry Date • Tolerance • Available By • Tenor • Mixed/Deferred Payment Detail • Latest Shipment Date <p>Application will display warning message, if the toggle is not enabled for the amendments made to the above mentioned fields.</p> <p>Toggle off: Switch off the toggle if beneficiary consent is not required for the amendments.</p>	

LC Details

Details in this screen displays the data from the LC issued.

The screenshot shows the 'LC Details' screen with the following data:

- Revolving:**
- Advising Bank:** 001041 WELLS FARGO
- Date of Expiry:** Dec 30, 2021
- Beneficiary:** 001043 MARKS AND
- 39C - Additional Amount Covered:** (Empty)
- LC Type:** Sight
- 40A - Form of Documentary Credit:** IRREVOCABLE
- 31D - Place of Expiry:** Chennai
- 32B - Currency Code, Amount:** GBP £100,000.00
- Amount In Local Currency:** GBP £100,000.00
- Product Code:** IRLI
- 31C - Date of Issue:** May 5, 2021
- 51A - Applicant Bank:** (Empty)
- 39A - Percentage Credit Amount Tolerance:** /
- Back to Back LC:**
- Product Description:** Import Non Revolving Sight
- 40E - Applicable Rules:** UCP LATEST VERSION
- Applicant:** 001044 GOODCARE PLC
- Limits/Collateral Required:**

Provide the LC Details based on the description in the following table:

Field	Description	Sample Values
Revolving	<p>Toggle On: LC type is Revolving.</p> <p>Toggle Off: LC is type Non Revolving.</p>	
LC Type	<p>Read only field.</p> <p>LC type will be populated based selected LC using documentary credit number.</p>	
Product Code	<p>Read only field.</p> <p>This field displays the product code of the selected LC.</p>	
Product Description	<p>Read only field.</p> <p>This field displays the description of the product as per the product code.</p>	
Advising Bank	<p>This field displays the advising bank details (if provided) of the selected LC and user can amend if required.</p> <p> Note In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available, please change the bank or use MAIL Medium".</p>	
40A - Form of Documentary Credit	<p>Read only field.</p> <p>This field displays the form of documentary credit details of the selected LC.</p>	
Date of Issue	<p>Read only field.</p> <p>This field displays the LC issuance date.</p>	

Field	Description	Sample Values
Applicable Rules	This field displays the rules of the selected LC and user can amend if required.	
Date Of Expiry	<p>This field displays the expiry date of the selected LC. and user can amend if required.</p>  <p>Note If amendment to the Expiry date (postponing the expiry date before expiry date of the underlying Export LC), field in the Import LC, system validates the amended value against the Export LC value and display configurable override.</p>	09/30/18
Place of Expiry	This field displays the place of expiry of the selected LC and user can amend if required.	
Applicant Bank	<p>Read only field.</p> <p>This field displays the applicant bank details of the selected LC.</p>	
Applicant	<p>Read only field.</p> <p>This field displays the details of the applicant of the selected LC.</p>	
Beneficiary	<p>This field displays the beneficiary details of the selected LC and user can amend if required.</p>  <p>Note If the user amend this field and the selected beneficiary/ party is blacklisted the system displays a warning message.</p>	
Currency Code, Amount	<p>This field displays the value of LC along with the currency details of the selected LC and user can amend if required.</p>  <p>Note If amendment to the Amount (greater than the Export LC outstanding amount), field in the Import LC, system validates the amended value against the Export LC value and display configurable override.</p>	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details of the selected LC and user can amend if required.	

Field	Description	Sample Values
Limits/Collateral Required	<p>Toggle On: Set the toggle 'On' to enable limit check.</p> <p>Toggle Off: Set the toggle 'Off' to disable limit check.</p>	
Additional Amount Covered	This field displays the details of additional amount covered of the selected LC and user can amend if required.	
Amount In Local Currency	<p>After the tab out of 'Currency Code, Amount' field, system populates the Local currency and amount value in this field.</p> <p>System fetches the local currency equivalent value for the LC amount from back office (with decimal places).</p>	
Back to Back LC	<p>Flag to check if the Import LC is a back to back LC.</p> <p>Toggle On: Set the Toggle On if back to back LC is applicable.</p> <p>Toggle Off: Set the Toggle Off if back to back LC is applicable.</p>	
Export LC Reference	<p>Export LC Reference that is to be linked to Back to back LC.</p> <p>User can select or enter the underlying Export LC reference.</p>	
Export LC Available Amount	The system displays the available amount under the Export LC.	
Export LC Expiry Date	The system displays the expiry date of the underlying Export LC.	
Export LC Shipment Date	<p>The system displays the latest shipment date of the underlying Export LC.</p> <p> Note</p> <p>If amendment to the Date (postponing the Latest Shipment Date before the Latest Shipment date of the underlying Export LC) , field in the Import LC, system validates the amended value against the Export LC value and display configurable override.</p>

Cancel	<p>Cancels the Import LC Amendment Registration stage inputs.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Checklist	<p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p> 	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.

- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Scrutiny

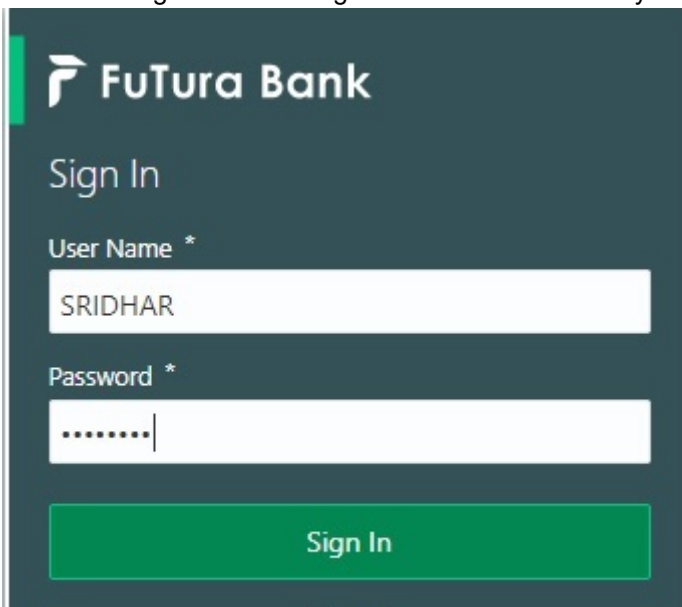

On successful completion of Registration of an Import LC Amendment request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized for Islamic Import LC Amendment.

As part of scrutiny, the user can enter/update basic details of the Islamic LC Amend request and can verify if the request can be progressed further.

Online Channel - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated as in conventional process flow.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

FuTura Bank

Sign In

User Name *

SRIDHAR

Password *

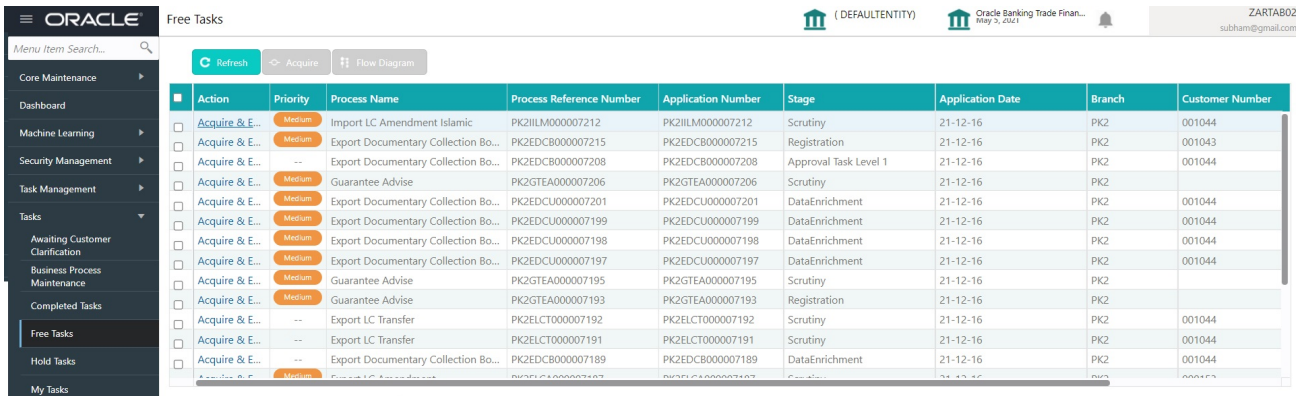

.....

Sign In

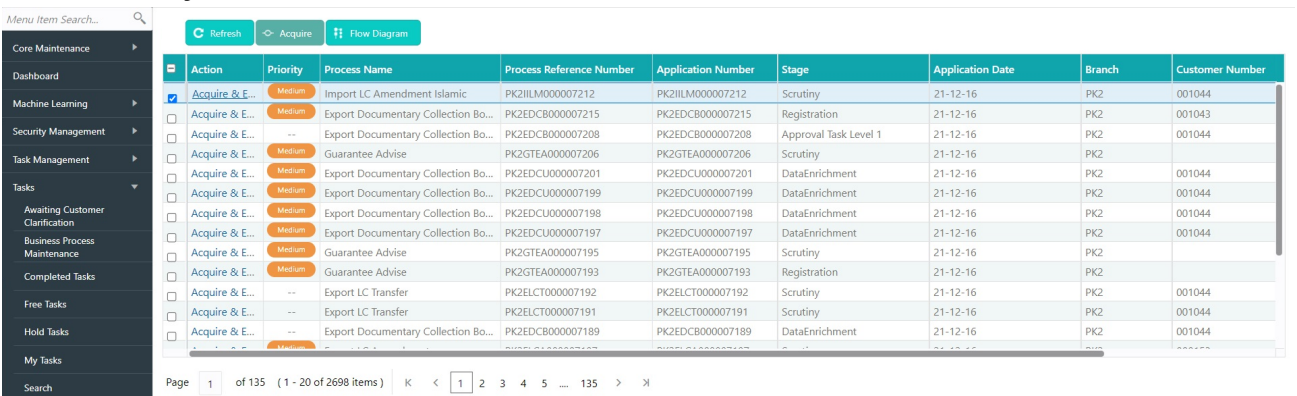

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance > Tasks > Free Tasks.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task.

Collateral availability needs to be checked if amendment involves increase in amount or tolerance. Provide the collateral details based on the description provided in the following table:

Field	Description	Sample Values
Cash Collateral Details		
Collateral Percentage	Specify the percentage of collateral to be linked to this transaction.	
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.	

Field	Description	Sample Values
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.	

Click + plus icon to add new collateral details.

Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.

Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.	
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.	
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.	
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.	
Collateral Contribution Amount	Collateral contribution amount will get defaulted in this field. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Settlement Account	Select the settlement account for the collateral.	
Settlement Account Currency	Settlement Account Currency will be auto-populated based on the Settlement Account selection.	
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.	
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.	
Account Available Amount	Read only field. Account available amount will be auto-populated based on the Settlement Account selection.	

Field	Description	Sample Values
Response	Response can be 'Success' or 'Amount not Available'. System populates the response on clicking the Verify button.	
Response Message	Detailed Response message. System populates the response on clicking the Verify button.	
Verify	Click to verify the account balance of the Settlement Account.	
Save & Close	Click to save and close the record.	
Cancel	Click to cancel the entry.	

Below fields appear in the **Cash Collateral Details** grid along with the above fields.

Collateral %	User must enter the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. System defaults the collateral % maintained for the customer into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display an override message "Defaulted Collateral Percentage modified".	
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified".	
Account Balance Check Response	This field displays the account balance check response.	
Delete Icon 	Click minus icon to remove any existing Collateral Details.	
Edit Link	Click edit link to edit any existing Collateral Details.	

Deposit Linkage Details

In this section which the deposit linkage details is captured.

System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly.

Field	Description	Sample Values
Click + plus icon to add new deposit details.		
Deposit Account	Click Search to search and select the deposit account from the look-up. All the Deposits of the customer should be listed in the LOV search. User should be able to select the deposit for linkage.	
Deposit Branch	Branch will be auto populated based on the Deposit account selection.	
Deposit Available Amount	Amount will be auto-populated based on the Deposit Account selection.	
Deposit Maturity Date	Maturity Date of deposit is displayed based on the Deposit Account selection.	
Exchange Rate	Latest Exchange Rate for deposit linkage should be displayed. This will be picked up from the exchange rate maintenance from the common core.	
Deposit Available in Transaction Currency	Deposit amount available should be displayed after exchange rate conversion, if applicable.	
Linkage Percentage%	Specify the value for linkage percentage.	
Linkage Amount (Transaction Currency):	System to default the transaction amount user can change the value. System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.	

Field	Description	Sample Values
Below fields appear in the Deposit Details grid along with the above fields.		
Deposit Currency	The currency will get defaulted in this field.	
Transaction Currency	The currency will get defaulted in this field from the underlying task.	
Delete Icon 	Click minus icon to remove the existing Linked deposit details by selecting the Deposit.	
Edit Link	Click edit link to edit any existing deposit Details.	

Commission, Charges and Taxes Details

On click of 'Next' in the previous screen, system will auto populate the charges, commission and tax components mapped to the product from the back office system.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system. The system also default the Charges/Commission Party maintained for the customer as per defined Class Maintenance in OBTF. System simulates the Charges, Commission and Tax details from the Back office.

Commission Details

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. User can change the rate, if required. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	

Field	Description	Sample Values
Waive	<p>Select the check box to waive charges/ commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Split	The user can split the Commission by enabling/ disabling the flag as per the requirement.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	

Field	Description	Sample Values
Split	The bank User can split the Charges/Commission by enabling/disabling the flag as per the requirement.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

Split Settlement

Once the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice, new section "Split Settlement" will appear below the 'Tax' section. The default parties in Split row should be fetched from OBTF.

Field	Description	Sample Values
Component	The split component type eligible for Split .	
Currency	The currency of split settlement.	
Amount	The amount of split settlement.	

Split Settlement Details

Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.

The Data Enrichment stage has six sections as follows:

- Main Details
- Availability & Shipment
- Documents & Conditions
- Payment Details
- Amendment Details
- Additional Fields
- Additional Details
- Settlement Detils
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

Main Details

Refer to [Main Details](#).

Availability & Shipment

Refer to [Availability Shipment](#).

Documents & Conditions

User must provide details of the required documents and additional conditions (if applicable) in this section.

Documents Required

Documents required section displays the list of documents required as per the issued LC and can be amended if required.

Insurance document is available in Documents Details section, if value in the 'INCO Term' field is not 'CFR', 'FOB', 'FCA', 'FAS' or 'EXW' in the Availability stage. If not system gives the warning message.

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both 'Bill Of lading' and 'Airway Bill' are chosen.

Additional Conditions

Additional Conditions section displays the conditions of the issued LC and can be amended if required.

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line de-limiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

Payment Details

Refer to [Payment Details](#).

Amendment Details

Refer to [Amendment Details](#).

Preview

User can view the draft LC amendment message (outgoing MT707 SWIFT message format) being displayed on the preview message text box.

A copy of draft LC amendment can be sent for customer confirmation and the same can be done by choosing the customer response toggle as 'yes'. The Draft MT707 message along with up to seven MT708 messages is sent to the applicant by Email as an attachment to the customer.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number.

On submit, the message will be sent to the customer. The task will be moved to 'pending customer response' stage. Upon receipt of customer's confirmation, the transaction moves to approval.

In case the customer has requested for changes, the transaction will move to Data Enrichment and once the necessary changes made, the request moves to approval stage.

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

Summary

User can review the summary of details updated in Data Enrichment stage Import LC Amendment Islamic request. The user can view the summary tiles. The tiles displays the list of important fields with values.

Tiles Displayed in Summary

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Availability Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Amendment Details - User can view the amended details of the issued LC.
- Additional Fields - User can view and modify the details of additional fields, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Commission, Charges and Taxes - User can view and modify charge details, if required.
- Revolving Details - User can view revolving details on revolving LC, if applicable.
- FX Linkage Details - User can view FX Linkage details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Import LC Amendment. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Customer Response - Draft Confirmation

The customer response can be received both by online and offline mode.

In non-online mode, user receives the response in the branch.

In online mode the customer will share their response online that will be automatically updated in the customer response field in the task, which is available in the customer response pending stage.

Log in into OBTFPM application, and open the task to see customer response screen.

Customer Response

Language - Read only field

Draft Message - Read only field

Draft Confirmation

Draft Confirmation required - Read only field

Customer Response - This field will be available for you to update any of the below response based on the customer's reply

- Accepted
- Changes Required - Change and proceed

For non-online response – User can select customer response from one of the three drop list values mentioned above.

For Online response – Read only

Customer Remarks - Capture the remarks of the customer.

Response Date - Non-Online channel – Update the date on which the customer response has been received.

Online Channel – Read only

Summary

Exceptions

The Import LC Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Amendment Details - User can view the amended details of the issued LC.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Import LC Amendment Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

User can view the summary of details updated in multilevel approval stage of Import LC Amend Islamic request.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- Application Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
Remarks	Provide any additional information regarding the LC Amendment. This information can be viewed by other users processing the request.
