# Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

## Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

## Import LC Amendment

Import LC Amendment process enables the user to make an amendment to the LC which had been already issued. The common amendments that are made to an Import LC are:

- Expiry date
- Latest Shipment Date
- Increase/Decrease in LC amount
- Tolerance percentage
- Confirmation instruction
- Available with bank
- Port of loading/discharge
- Goods quantity
- Related documents to be submitted

The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended LC is parked awaiting beneficiary consent.

The user can also amend an Import LC in closed status, when LC is reinstated. In the following sections, let's look at the details for Import LC amendment process.

This section contains the following topics:

Common Initiation Stage	Click Proceed to proceed to the next step. The Enriched Data screens appear.
OBTFPM- OBDX Bidirectional flow	Scrutiny
Data Enrichment	Customer Response - Draft Confirmation
Exceptions	Multi Level Approval
Customer - Acknowledgement	Customer - Reject Letter
Reject Approval	

### Common Initiation Stage

The user can initiate the new import LC amendment request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

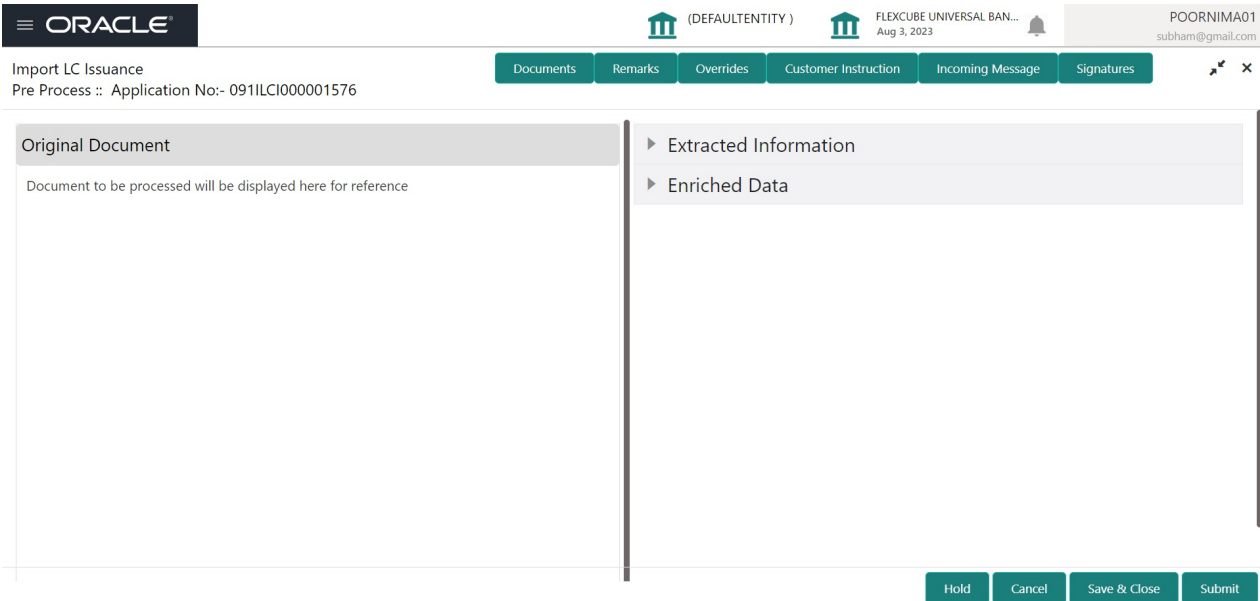

Field	Description
Process Name	Select the process name to initiate the task.
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

### Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

3. Click **Proceed** to proceed to the next step. The Enriched Data screens appears.

Provide the details based on the description in the following table:

Field	Description
Original Document	This section displays the original documents which is to be processed for reference.
Extracted Information	This section displays the retrieved information.
Enriched Data	This section displays the enriched information.

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for Import LC Issuance. Place holders are also available to upload additional documents submitted by the applicant.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Incoming Message	<p>This button displays the multiple messages.</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
<b>Action Buttons</b>		
Submit	On submit, task will get moved to next logical stage of Import LC Issuance.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancel the Import LC Issuance task inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

## Registration

If the Letter Of Credit Amendment request is submitted through branch either by fax, mail, or physical application form, the Import LC amendment process starts from the Registration Stage.

During Registration stage, user can capture the basic details of the amendment application, check the signature of the applicant and upload the related documents of the applicant. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for an LC Amendment expert to handle the request in the next stage.

For Task initiated vide MT798, when customer initiates a Import LC Amendment request through SWIFT (Corporate to SWIFT) channel, the MT798 message containing the request is parsed and based on the STP parameters maintained, can create a Import LC Amendment Task in OBTFPM. The MT798 message, is routed to the Issuing Bank. Issuing Bank receives the MT798 and creates a task in Import LC Amendment Process in Scrutiny stage in OBTFPM.

The Incoming MT798 message contains 3 sections.

- MT798 Index Message which contains the Sub message type 772
- MT798 Details Message which contains the Sub Message type 707 (MT707 tags with values)

MT798 Extension Message which contains the Sub Message type 708 (MT708 Extension message tag values) if applicable.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E ( of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Import - Documentary Credit> Import LC Amendment.

The Registration stage has two sections Application Details and LC Amendment Details. Let's look at the details of Registration screens below:

# Application Details

Provide the Application Details based on the description in the following table. In case of MT798, Application Details are defaulted to SWIFT

Field	Description	Sample Values
Documentary Credit Number	<p>Provide the documentary credit number. Alternatively, user can search the documentary credit number using LOV.</p> <p>In LOV search/advanced LOV search, user can input Applicant, Currency, Amount, User Reference and Contract Status to fetch the LC details. The user can also search the LC which are in 'Closed' contract status. On selecting a closed LC, system displays a confirmation message that 'The LC has been closed. Do you want to Reopen'.</p> <p>On confirmation, user can amend the required fields as in the case of amendment of an active LC</p> <p>Based on the search result, select the applicable LC to be amended.</p>	
Received From Party	<p>Import LC amendment request can be received from the applicant or from the applicant's bank.</p> <p>Select the option as 'Applicant', if Import LC amendment request is received from applicant's bank.</p>	
Received From - Customer ID	<p>Read only field.</p> <p>Customer ID will be auto-populated based on the selected LC from the LOV.</p>	001344

Field	Description	Sample Values
Received From - Customer Name	Read only field. Customer Name will be auto-populated based on the selected LC from the LOV.	EMR & CO
Branch	Read only field. Branch details will be auto-populated based on the selected LC from the LOV.	203-Bank Futura -Branch FZ1
Amendment No.	Read only field. Amendment number will be auto-populated based on selected LC using documentary credit number. Amendment number increases by 1 for each amendment.	
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Priority	System will default the Priority as Low/Medium/High based on maintenance.	High
Submission Mode	Select the submission mode of Import LC Amendment request. By default the submission mode will have the value as 'Desk'. <b>Desk-</b> Request received through Desk <b>Fax-</b> Request received through Fax <b>Email-</b> Request received through Email <b>Courier-</b> Request received through Courier	Desk
Application Date	By default, the application will display branch's current date and enables the user to change the date to any back date.   <b>Note</b> Future date selection is not allowed.	04/13/2018
Customer Reference Number	User can enter the 'Reference number' provided by the applicant/ applicant bank. Enables the user to provide a unique Customer Reference Number for the amendment.	
User Reference Number	User Reference Number will be auto populated by the system based on selected LC using documentary credit number.	

Field	Description	Sample Values
Beneficiary Consent	<p><b>Toggle on:</b> Beneficiary consent required for the amendment made to the fields. Toggle must be on if amendments are made to the following fields:</p> <ul style="list-style-type: none"> <li>Beneficiary</li> <li>Documentary Credit Amount</li> <li>Expiry Date</li> <li>Tolerance</li> <li>Available By</li> <li>Tenor</li> <li>Mixed/Deferred Payment Detail</li> <li>Latest Shipment Date</li> </ul> <p>Application will display warning message, if the toggle is not enabled for the amendments made to the above mentioned fields.</p> <p><b>Toggle off:</b> Switch off the toggle if beneficiary consent is not required for the amendments.</p>	

## LC Details

Details in this screen displays the data from the LC issued.

The screenshot shows the 'LC Details' screen with the following fields and values:

- Revolving:**
- Advising Bank:** [Searchable field]
- Date of Expiry:** May 31, 2021
- Beneficiary:** [Searchable field]
- Limits/Collateral Required:**
- Closure Date:** Jun 30, 2021
- LC Type:** Sight
- 40A - Form of Documentary Credit:** IRREVOCAABLE
- 31D - Place of Expiry:** LONDON
- Accountee:** [Searchable field]
- 39C - Additional Amount Covered:** [Empty field]
- Product Code:** ILSR
- 31C - Date of Issue:** May 5, 2021
- 51A - Applicant Bank:** [Searchable field]
- 32B - Currency Code, Amount:** GBP £200,000.00
- Amount In Local Currency:** GBP £200,000.00
- Product Description:** Import LC Sight - Revolving advance Per
- 40E - Applicable Rules:** UCP LATEST VERSION
- Applicant:** 001044 GOODCARE PLC
- 39A - Percentage Credit Amount Tolerance:** /
- Back to Back LC:**

Provide the LC Details based on the description in the following table:

Field	Description	Sample Values
Revolving	<p><b>Toggle On:</b> LC type is Revolving.</p> <p><b>Toggle Off:</b> LC is type Non Revolving.</p>	
LC Type	<p>Read only field.</p> <p>LC type will be populated based selected LC using documentary credit number.</p>	
Product Code	<p>Read only field.</p> <p>This field displays the product code of the selected LC.</p>	

Field	Description	Sample Values
Product Description	Read only field. This field displays the description of the product as per the product code.	
Advising Bank	This field displays the advising bank details (if provided) of the selected LC and user can amend if required.   <p><b>Note</b> In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message “RMA arrangement not available, please change the bank or use MAIL Medium”.</p>	
40A - Form of Documentary Credit	Read only field. This field displays the form of documentary credit details of the selected LC.	
Date of Issue	Read only field. This field displays the LC issuance date.	
Applicable Rules	This field displays the rules of the selected LC and user can amend if required.	
Date Of Expiry	This field displays the expiry date of the selected LC. and user can amend if required.   <p><b>Note</b> If amendment to the Expiry date (postponing the expiry date before expiry date of the underlying Export LC), field in the Import LC, system validates the amended value against the Export LC value and display configurable override.</p>	09/30/18
Place of Expiry	This field displays the place of expiry of the selected LC and user can amend if required.	
Applicant Bank	Read only field. This field displays the applicant bank details of the selected LC.	
Applicant	Read only field. This field displays the details of the applicant of the selected LC.	

Field	Description	Sample Values
Beneficiary	<p>This field displays the beneficiary details of the selected LC and user can amend if required.</p>  <p><b>Note</b></p> <p>If the user amend this field and the selected beneficiary/ party is blacklisted the system displays a warning message.</p>	
Accountee	Click Search to search and select the accountee details from lookup.	
Currency Code, Amount	<p>This field displays the value of LC along with the currency details of the selected LC and user can amend if required.</p>  <p><b>Note</b></p> <p>If amendment to the Amount (greater than the Export LC outstanding amount), field in the Import LC, system validates the amended value against the Export LC value and display configurable override.</p>	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details of the selected LC and user can amend if required.	
Limits/Collateral Required	<p><b>Toggle On:</b> Set the toggle 'On' to enable limit check.</p> <p><b>Toggle Off:</b> Set the toggle 'Off' to disable limit check.</p>	
Additional Amount Covered	This field displays the details of additional amount covered of the selected LC and user can amend if required.	
Amount In Local Currency	<p>After the tab out of 'Currency Code, Amount' field, system populates the Local currency and amount value in this field.</p> <p>System fetches the local currency equivalent value for the LC amount from back office (with decimal places).</p>	
Back to Back LC	<p>Flag to check if the Import LC is a back to back LC.</p> <p>Toggle On: Set the Toggle On if back to back LC is applicable.</p> <p>Toggle Off: Set the Toggle Off if back to back LC is applicable.</p>	

Field	Description	Sample Values
Closure Date	<p>System default the “Closure Date” value from the previous version of the contract.</p> <p>User can modify the system defaulted “Closure Date” and system should validate the same for the below conditions,</p> <ul style="list-style-type: none"> <li>• Closure Date must be after the Issue Date.</li> <li>• Closure Date must be after the Expiry Date.</li> <li>• Closure Date cannot be blank, when the “Auto Close” is checked.</li> </ul>	

## Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Documents	Upload the required documents.	

Field	Description	Sample Values
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
<b>Action Buttons</b>		
Submit	<p>On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Import LC Amendment.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	
Save & Close	<p>Save the information provided and displays the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	<p>Cancels the Import LC Amendment Registration stage inputs.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Checklist	<p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p> 	

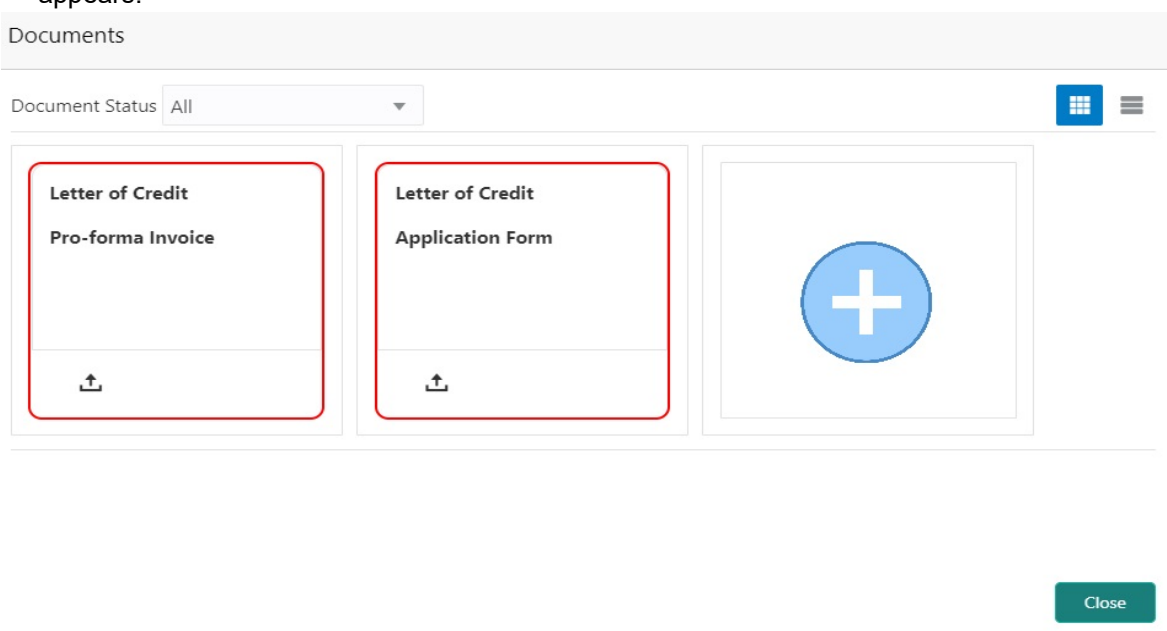

## Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
<b>Search Result</b>		
Document ID	This field displays the document Code from metadata.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from metadata.	
Document Code	This field displays the document code from metadata.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

**Link Document**

## OBTFPM- OBDX Bidirectional flow

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling.

OBTFPM user, for task received from online channel, raise clarification and receive response from the customer. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

8. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.

9. In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks **Request Clarification** button to request for online clarification from customer

The screenshot shows the Oracle Trade Finance interface for 'Import LC Amendment - Scrutiny' with Application No: 300ILCA000039469. The interface is divided into 'Main Details' and 'LC Details' sections. The 'Request Clarification' button at the bottom is highlighted with a red box.

Application Details

<input type="checkbox"/> Proforma Invoice is not uploaded. Instead some other document is	SUNDAR01	2019-03-21T18:31				Clarification Requested

14. The user can click **Accept Clarification** button, if the query raised has been answered by the customer. The status should change to Clarification Accepted. on next the task moves to the next logical stage.

15. Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in

a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the documents.

## Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

### Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
  - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
  2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
  3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
  4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

## Scrutiny

On successful completion of Registration of an Import LC Amendment request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized.

**Non-Online Channel** - Import LC Amendment request that were received at the desk will move to Scrutiny stage post successful Registration. The requests will have the details entered during the Registration stage.

**Online Channel** - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

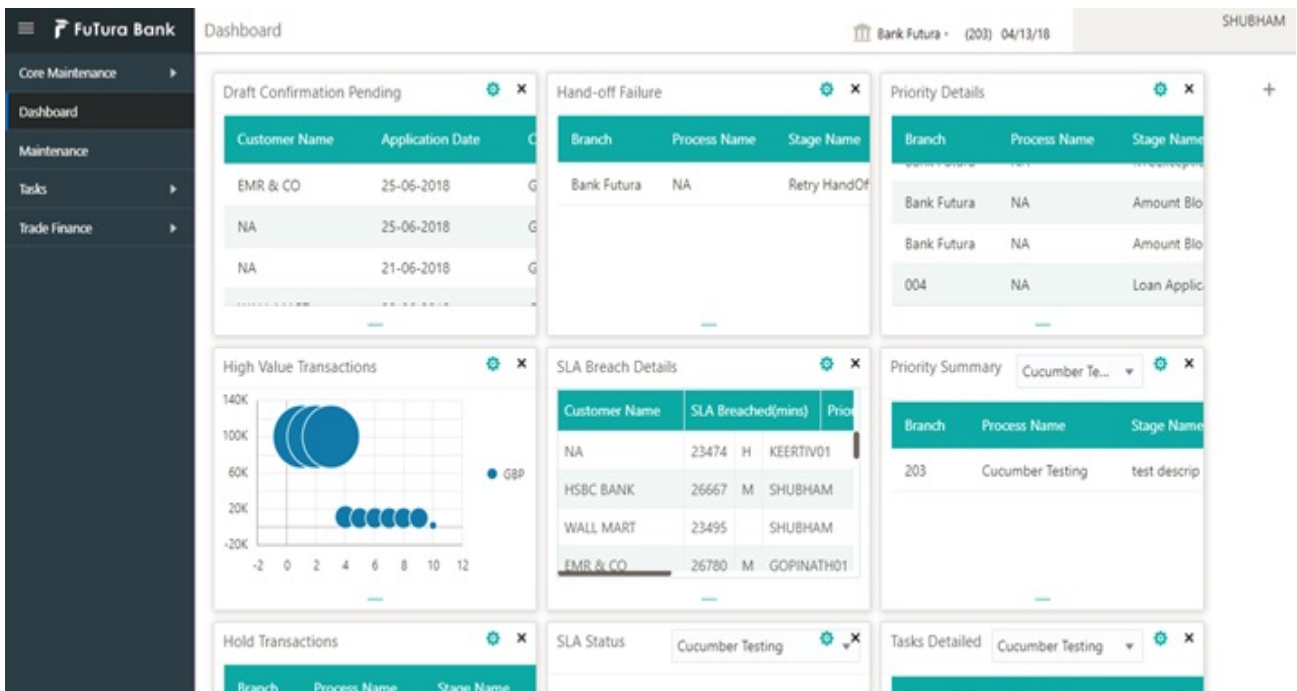

In case of MT798 message, the task is verified and enriched. The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value. If the User encounters validation error during handling the task, a MT719 (Bank to Corporate message) common group message is created in the workflow and the task is put on 'Hold'.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

### 3. Click Trade Finance> Tasks> Free Tasks.

## Main Details

Main details section has three sub section as follows:

- Application Details
- LC Amendment Details

## Application Details

All fields displayed under Application details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

The screenshot displays the Oracle LC Amendment form for application PK21LCA000019105. The form is divided into several sections:

- Main Details:**
  - Application Details:** Includes fields for Document Number (PK2ILSR211255502), Branch (PK2-Oracle Banking Trade Finan...), Submission Mode (Desk), Application Date (Jun 10, 2021), Received From (Customer ID: 001044, Name: GOODCARE PLC), Process Reference Number (PK21LCA000019105), Customer Reference Number, and Priority (Medium).
  - LC Details:** Includes fields for LC Type (Sight), Product Code (ILSR), Product Description (Import LC Sight Revolving advance Per), Advising Bank, Date of Expiry (May 31, 2021), Beneficiary, Limits/Collateral Required, 40A - Form of Documentary Credit (IRREVOCABLE), 31C - Date of Issue (May 5, 2021), 51A - Applicant Bank, 328 - Currency Code, Amount (GBP, £200,000.00), Amount In Local Currency (GBP, £200,000.00), 39A - Percentage Credit Amount Tolerance, and Closure Date (Jun 30, 2021).

Navigation buttons at the bottom include: Audit, Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, Next.

## LC Details

The fields listed under this section are same as the fields listed under the [LC Details](#) section in [Provide the Miscellaneous Details based on the description in the following table](#):. Refer to [LC Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Following are the fields which can be amended apart from the fields carried over from LC Details of Click Proceed to proceed to the next step. The Enriched Data screens appears.. Provide the details for the amendable fields based on the description in the following table:

Field	Description	Sample Values
Advising Bank	<p>This field displays the advising bank details (if provided) of the selected LC and user can amend if required.</p> <p> <b>Note</b></p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message “RMA arrangement not available, please change the bank or use MAIL Medium”.</p>	
Applicable Rules	This field displays the rules of the selected LC and user can amend if required.	
Date of Expiry	This field displays the expiry date of the selected LC. and user can amend if required.	
Place of Expiry	This field displays the place of expiry of the selected LC and user can amend if required.	
Beneficiary	<p>This field displays the beneficiary details of the selected LC and user can amend if required.</p> <p> <b>Note</b></p> <p>If the user amend this field and the selected beneficiary/ party is blacklisted the system displays a warning message</p>	
Accountee	Click Search to search and select the accountee details from lookup.	

Field	Description	Sample Values
Currency Code, Amount	This field displays the value of LC along with the currency details of the selected LC and user can amend if required.	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details of the selected LC and user can amend if required.	
Limits/Collateral Required	<p><b>Toggle On:</b> Set the toggle 'On' to enable limit check.</p> <p><b>Toggle Off:</b> Set the toggle 'Off' to disable limit check.</p>	
Additional Amounts Covered	This field displays the details of additional amount covered of the selected LC and user can amend if required.	
Beneficiary Consent	<p><b>Toggle on:</b> Beneficiary consent required for the amendment made to the fields. Toggle must be on if amendments are made to the following fields:</p> <ul style="list-style-type: none"> <li>• Beneficiary</li> <li>• Documentary Credit Amount</li> <li>• Expiry Date</li> <li>• Tolerance</li> <li>• Available By</li> <li>• Tenor</li> <li>• Mixed/Deferred Payment Detail</li> <li>• Latest Shipment Date</li> </ul> <p>Application will display warning message, if the toggle is not enabled for the amendments made to the above mentioned fields.</p> <p><b>Toggle off:</b> Switch off the toggle if beneficiary consent is not required for the amendments.</p>	
Closure Date	<p>System retain the "Closure Date" value from the registration stage and defaults the same in the Data Enrichment stage.</p> <ul style="list-style-type: none"> <li>• Closure Date must be after the Issue Date.</li> <li>• Closure Date must be after the Expiry Date.</li> <li>• Closure Date cannot be blank.</li> </ul>	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	

Field	Description	Sample Values
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> Select a Reject code and give a Reject Description.  This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system.  Refer Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

## Availability Shipment

User must verify/ Input/Update Availability, Shipment and Goods details of an Import LC request for the different fields under the respective data segments.

## Availability Details

As part of amendment, user can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Available With	<p>This field identifies the bank with which the credit is available of the issued LC.</p> <p>User must capture the bank details or any free text.</p> <ul style="list-style-type: none"> <li>If the LC is restricted to any particular bank,, search the bank with SWIFT code (BIC) or Bank Name.</li> </ul>  <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address gets defaulted.</p> <ul style="list-style-type: none"> <li>If the LC is not restricted to any bank, provide free text - (YOURSELVES, WITH ANY BANK etc.).</li> </ul>	

Field	Description	Sample Values
Available By	<p>This field displays the value of 'Available By' as per the issued LC. Choose one of the following values from drop down, if required.</p> <ul style="list-style-type: none"> <li>● BY ACCEPTANCE</li> <li>● BY DEF PAYMENT</li> <li>● BY MIXED PAYMENT</li> <li>● BY NEGOTIATION</li> </ul> <p>Validation:</p> <p>1) If <b>By Mixed Payment</b> option is selected, there must be a value in tag 42M- Mixed payment</p> <p>2) If <b>By deferred payment</b> is selected, there must be a value in tag 42P- Deferred payment</p> <p>3) If <b>By payment</b> is selected, payment at sight is applicable. It must be applicable for Sight Type of product only.</p>	
Drafts At	<p>This field displays the details of tenor of drafts to be drawn under the documentary credit as per the issued LC.</p>	
Drawee	<p>This field displays the Drawee value as per the issued LC.</p> <p>This field will have value only if 'Drafts at' field has values.</p> <p>Select the Drawee bank (Advising bank or Confirming bank).</p> <ul style="list-style-type: none"> <li>● Search the bank with SWIFT code (BIC) or Bank Name.</li> </ul> <div data-bbox="568 1279 1166 1480" style="border: 1px solid #ccc; padding: 5px; margin: 10px 0;"> <p>Available With <span style="float: right;">✕</span></p> <p>BIC <input type="text"/> Bank Name <input type="text"/></p> <p><span style="background-color: #00a651; color: white; padding: 2px 5px;">Fetch</span></p> <p>BIC <input type="text"/> Bank Name <input type="text"/></p> <p>No data to display.</p> <p>Page 1 (0 of 0 items) <span style="font-size: small;">⏪ &lt; 1 &gt; ⏩</span></p> </div> <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.</p> <div style="text-align: center; margin: 10px 0;">  <p><b>Note</b></p> </div> <p>This field is mandatory if value is provided at <b>Drafts At</b> field.</p>	
Payment Details	<p>This field displays the value of payment details as per the issued LC and can be amended if required.</p>	

## Shipment Details

As part of amendment, user can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Partial Shipments	<p>This field displays the value of Partial Shipments as per the issued LC and can be amended if required.</p> <p>This field specifies whether or not partial shipments are allowed under the documentary credit.</p> <p>Select the appropriate value from the drop down. Available values are:</p> <ul style="list-style-type: none"> <li>• ALLOWED</li> <li>• CONDITIONAL</li> <li>• NOT ALLOWED</li> </ul>	
Transshipment	<p>This field displays the value of Transshipments as per the issued LC and can be amended if required.</p> <p>This field specifies whether or not transshipment is allowed under the documentary credit.</p> <p>Select the appropriate value from the drop down. Available values are:</p> <ul style="list-style-type: none"> <li>• ALLOWED</li> <li>• CONDITIONAL</li> <li>• NOT ALLOWED</li> </ul>	
Place Of Taking In Charge	<p>This field displays the value of place of taking in charge as per the issued LC and can be amended if required.</p> <p>This field specifies the place of taking in charge (in case of a multi-modal transport document), the place of receipt (in case of a road, rail or inland waterway transport document or a courier or expedited delivery service document), the place of dispatch or the place of shipment to be indicated on the transport document.</p> <div style="text-align: center;">  <p><b>Note</b></p> </div> <p>This field is alternate to <b>Port Of Loading</b>. Any of these fields must have value and if both the fields has values, application will display an error message.</p>	

Field	Description	Sample Values
Port Of Loading	<p>This field displays the value of port of loading as per the issued LC and can be amended if required.</p> <p>This field specifies the port of discharge or airport of destination to be indicated on the transport document.</p> <p> <b>Note</b> This field is alternate to <b>Place Of Taking In Charge</b>. Any of these fields must have value and if both the fields has values, application will display an error message.</p>	
Port Of Discharge	<p>This field displays the value of port of discharge as per the issued LC and can be amended if required.</p> <p>This field specifies the port of discharge or airport of destination to be indicated on the transport document.</p> <p> <b>Note</b> This field is alternate to <b>Place Of Final Destination</b>. Any of these fields must have value and if both the fields has values, application will display an error message.</p>	
Place Of Final Destination	<p>This field displays the value of Place of Final Destination as per the issued LC and can be amended if required.</p> <p>This field specifies the final destination or place of delivery to be indicated on the transport document.</p> <p> <b>Note</b> This field is alternate to <b>Port Of Discharge</b>. Any of these fields must have value and if both the fields has values, application will display an error message.</p>	

Field	Description	Sample Values
Latest Date Of Shipment	<p>This field displays the value of Latest Date of Shipment as per the issued LC and can be amended if required.</p>  <p><b>Note</b> This field is alternate to <b>Shipment Period</b>. Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.</p>	
Shipment Period	<p>This field displays the value of shipment period as per the issued LC and can be amended if required.</p>  <p><b>Note</b> This field is alternate to <b>Latest Date Of Shipment</b>. Latest date of shipment or shipment period must have value and if both the fields has values, application will display an error message.</p>	
Transport Mode	<p>Select the transportation mode.</p> <p>The options are:</p> <ul style="list-style-type: none"> <li>• Air</li> <li>• Sea</li> <li>• Road</li> <li>• Rail</li> <li>• Multimodal</li> <li>• Other</li> </ul>	
Transport Details	Specify the transportation details of shipment.	

### Description Of Goods And Or Services

This field contains a description of the goods and/or services of the issued LC and can be amended if required. Provide the Shipment Details based on the description in the following table:

Field	Description	Sample Values
INCO Terms	Select the appropriate INCO terms.	
INCO Terms Description	The INCO terms description is auto populated depending on selected INCO terms.	
+ Icon	Click + icon to add goods details.	
Delete Icon	Click - icon to remove goods details.	

Field	Description	Sample Values
Goods Code	Click look up icon to select the goods code. Once you select goods code, value will populate in Goods Type and Goods Description.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	
No of Units	Enter the number of units being imported or exported.	
Price per Unit	Enter the value for price per unit.	
Total Amount	System to calculate the total price In case of online request, the system should populate the total amount from incoming request. System should validate that the total amount is equal to the value of the transaction (LC/ Collection).	
Action	Click Edit icon to edit the goods details. Click Delete icon to delete the goods details.	

### Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

Field	Description	Sample Values
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Back	<p>On click of Back, system moves the task back to the previous data segment.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

# Payment Details

As part of amendment, user can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Special Payment conditions for beneficiary	This field displays the value of Spl Paymt Cond- Beneficiary as per the issued LC and can be amended if required. If any special payment condition has to be provided to beneficiary, the details for the same must be captured in this field.

If any special payment condition has to be provided to receiving bank, the details for the same must be captured in this field. This field specifies special payment conditions applicable to the receiving bank without disclosure to the beneficiary, for example, post-financing request/ conditions for receiving bank only.	
Period for Presentation	This field displays the value of Period for Presentation as per the issued LC and can be amended if required. If the period of presentation is based on any event other than shipment, then you can capture the event name in text along with the number of days in number.	

Field	Description	Sample Values
Confirmation Instructions	<p>This field displays the value of Confirmation Instructions as per the issued LC and can be amended if required.</p> <p>Select the confirmation instruction for the LC from the available LOV values – CONFIRM, MAY ADD, WITHOUT.</p> <p>Applicable only if field 49 - confirmation instruction is 'confirm' or 'may add'. You can search through LOV, Party type with banks should only be displayed in LOV. The system must display the following:</p> <ul style="list-style-type: none"> <li>a) SWIFT code (if available),</li> <li>b) Name and address of the bank</li> </ul> <p>On selection of the record, if SWIFT code is available then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.</p>	
Requested Confirmation Party	<p>This field displays the value of Requested Confirmation Party as per the issued LC and can be amended if required.</p>	
Reimbursing Bank	<p>This field displays the value of Reimbursing Bank as per the issued LC and can be amended if required.</p> <p>Search through LOV. Party type with banks will be displayed in LOV.</p> <ul style="list-style-type: none"> <li>• SWIFT code (if available),</li> <li>• Name and address of the bank</li> </ul> <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.</p> <div style="margin-top: 10px;">  <p><b>Note</b></p> <p>In case the selected Bank is not RMA Compliant, the system prompts me to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message “RMA arrangement not available, please change the bank or use MAIL Medium”.</p> </div>	

Field	Description	Sample Values
Advise Through Bank	<p>Online Channel – User can update the details received.</p> <p>Non-Online Channel -</p> <p>Search through LOV. Party type with banks must be displayed in LOV.</p> <ul style="list-style-type: none"> <li>• SWIFT code (if available)</li> <li>• Name and address of the bank</li> </ul> <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.</p>	
Instructions to P/A/N Bank	This field displays the value of Instructions to P/A/N Bank as per the issued LC and can be amended if required.	
Sender to Receiver Information	This field displays the value of Sender to Receiver Information (FFT Details) as per the issued LC and can be amended if required.	
Charges	Charge Description as maintained in FFT will be available. User can modify the description.	
Amendment Charges Payable by	This field specifies the party who bear the amendment charges.	

Reimbursement Authorization

Field	Description	Sample Values
Reimbursing Bank	<p>If reimbursing bank is applicable user must update the field.</p> <p>Online Channel - Update the details received.</p> <p>Non Online Channel - Search through LOV. Party type with banks will be displayed in LOV.</p> <ul style="list-style-type: none"> <li>• SWIFT code (if available),</li> <li>• Name and address of the bank</li> </ul> <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.</p> <p> <b>Note</b></p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available, please change the bank or use MAIL Medium".</p> <p> <b>Note</b></p> <p>If the party is blacklisted the system displays a warning message.</p>	
Sender to Receiver Information - MT747	Select the FFT maintained for MT740 and change the description if required.	
Narrative - MT747	Select the FFT maintained for Narrative- MT747 and change the description if required, if <b>Reimbursement bank</b> field has value.	

### Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	

Field	Description	Sample Values
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Back	<p>On click of Back, system moves the task back to the previous data segment.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

## Amendment Details

This section lists the amendments made to the issued LC. The amendment details table displays the amended value and the value prior to the amendment of the amended fields in two different columns to enable Scrutiny user to identify the modifications made to the issued LC.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul>	
Back	On click of Back, system moves the task back to the previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

## Additional Fields

Banks can configure these additional fields during implementation. **Action Buttons**

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	

Field	Description	Sample Values
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Back	<p>On click of Back, system moves the task back to the previous data segment.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

## Additional Details

## Revolving Details

Field	Description	Sample Values
Revolving	Read only field. Displays the LC is revolving or non-revolving.	
Revolving In	Read only field. The LC can revolve with Time or Units.	
Revolving Frequency	Read only field. This field captures the frequency in days and months by which the LC revolves.	
Revolving Units	Read only field. This field captures the units by which the LC revolves.	
Next Reinstatement Date	Read only field. This field defaults the date of next reinstatement for the LC based on the revolving frequency selected.	

Field	Description	Sample Values
Cumulative	Read only field. This field is a toggle to indicate if the LC value has to be cumulative or not on reinstatement.	
Automatic Reinstatement	Read only field. This field enables to have automatic reinstatement on the reinstatement day without manual intervention.	

## Limits & Collateral

Limit availability needs to be checked if amendment involves increase in amount or tolerance or both.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office. Provide the Limit Details based on the description in the following table:

Limits and Collaterals x

#### Limit Details

Click + plus icon to add new limit details.

Below fields are displayed on the Limit Details pop-up screen, if the user clicks plus icon.

Customer ID	Applicant's/Applicant Bank customer ID will get defaulted.	
Linkage Type	Select the linkage type. Linkage type can be: <ul style="list-style-type: none"> <li>• Facility</li> <li>• Liability</li> </ul>	
Contribution%	System will default this to 100%. User can modify, if contribution is more than 100%. System will display an alert message, if modified.  Once contribution % is provided, system will default the amount.  System to validate that if Limit Contribution% plus Collateral% is equal to 100. If the total percentage is not equal to 100 application will display an alert message.	

Field	Description	Sample Values
Liability Number	Click <b>Search</b> to search and select the Liability Number from the look-up. The list has all the Liabilities mapped to the customer.	
Contribution Currency	The LC currency will be defaulted in this field.	
Line ID/Linkage Ref No	Click <b>Search</b> to search and select the from the various lines available and mapped under the customer id gets listed in the drop down. LINE ID-DESCRIPTION will be available for selection along with Line ID. When you click on 'verify', the system will return value if the limit check was successful or Limit not Available. If limit check fails, the outstanding limit after the transaction value will be shown in the limit outstanding amount.   <p><b>Note</b> User can also select expired Line ID from the lookup and on clicking the verify button, system should default "The Earmarking cannot be performed as the Line ID is Expired" in the "Response Message" field.</p> <p>This field is disabled and read only, if <b>Linkage Type</b> is <b>Liability</b>.</p>	
Line Serial	Displays the serial of the various lines available and mapped under the customer id. This field appears on the Limits grid.	
Limit/ Liability Currency	Limit Currency will be defaulted in this field, when you select the <b>Liability Number</b>	
Limits Description	This field displays the limits description.	
Limit Check Response	Response can be 'Success' or 'Limit not Available' based on the limit service call response.	
Amount to Earmark	Amount to earmark will default based on the contribution %. User can change the value.	
Expiry Date	This field displays the date up to which the Line is valid.	

Field	Description	Sample Values
Limit Available Amount	This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount.  The value in this field appears, if you click the Verify button.	
Response Message	This field displays the detailed response message.  The value in this field appears, if you click the Verify button.	
ELCM Reference Number	This field displays the ELCM reference number.

Collateral availability needs to be checked if amendment involves increase in amount or tolerance. Provide the collateral details based on the description provided in the following table:

Field	Description	Sample Values
Cash Collateral Details		
Collateral Percentage	Specify the percentage of collateral to be linked to this transaction.	

Field	Description	Sample Values
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.	
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.	

Click + plus icon to add new collateral details.

Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.

Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.	
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.	
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.	
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.	
Collateral Contribution Amount	Collateral contribution amount will get defaulted in this field.  The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Settlement Account	Select the settlement account for the collateral.	
Settlement Account Currency	Settlement Account Currency will be auto-populated based on the Settlement Account selection.	
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.	

Field	Description	Sample Values
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.	
Account Available Amount	Read only field. Account available amount will be auto-populated based on the Settlement Account selection.	
Response	Response can be 'Success' or 'Amount not Available'. System populates the response on clicking the <b>Verify</b> button.	
Response Message	Detailed Response message. System populates the response on clicking the <b>Verify</b> button.	
Verify	Click to verify the account balance of the Settlement Account.	
Save & Close	Click to save and close the record.	
Cancel	Click to cancel the entry.	

Below fields appear in the **Cash Collateral Details** grid along with the above fields.

Collateral %	User must enter the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message.  System defaults the collateral % maintained for the customer into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product.  User can modify the defaulted collateral percentage, in which case system should display an override message "Defaulted Collateral Percentage modified".	
Contribution Amount	This field displays the collateral contribution amount.  The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified".	
Account Balance Check Response	This field displays the account balance check response.	

Field	Description	Sample Values
Delete Icon 	Click minus icon to remove any existing Collateral Details.	
Edit Link	Click edit link to edit any existing Collateral Details.	

### Deposit Linkage Details

In this section which the deposit linkage details is captured.

System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly.

Field	Description	Sample Values
Click + plus icon to add new deposit details.		
Customer Id	Customer ID is defaulted from the system. User can change the customer ID.	
Deposit Account	Click <b>Search</b> to search and select the deposit account from the look-up. All the Deposits of the customer should be listed in the LOV search. User should be able to select the deposit for linkage.	
Deposit Branch	Branch will be auto populated based on the Deposit account selection.	
Deposit Available Amount	Amount will be auto-populated based on the Deposit Account selection.	
Deposit Maturity Date	Maturity Date of deposit is displayed based on the Deposit Account selection.	

Field	Description	Sample Values
Exchange Rate	Latest Exchange Rate for deposit linkage should be displayed. This will be picked up from the exchange rate maintenance from the common core.	
Deposit Available in Transaction Currency	Deposit amount available should be displayed after exchange rate conversion, if applicable.	
Linkage Percentage%	Specify the value for linkage percentage.	
Linkage Amount (Transaction Currency):	System to default the transaction amount user can change the value.  System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.	
Below fields appear in the <b>Deposit Details</b> grid along with the above fields.		
Deposit Currency	The currency will get defaulted in this field.	
Transaction Currency	The currency will get defaulted in this field from the underlying task.	
Delete Icon 	Click minus icon to remove the existing Linked deposit details by selecting the Deposit.	
Edit Link	Click edit link to edit any existing deposit Details.	

### Commission, Charges and Taxes Details

On click of 'Next' in the previous screen, system will auto populate the charges, commission and tax components mapped to the product from the back office system.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system. The system also default the Charges/Commission Party maintained for the customer as per

defined Class Maintenance in OBTF. System simulates the Charges, Commission and Tax details from the Back office.

## Commission Details

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component. The user can click the link to view the commission details.	
Rate	Defaults from product. User can change the rate, if required. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	

Field	Description	Sample Values
Ccy	Defaults the currency in which the commission needs to be collected	
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Select the check box to waive charges/ commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Split	The user can split the Commission by enabling/ disabling the flag as per the requirement.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	
Amend	The value is auto-populated as the commission can be amended or not.	

## Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	

Field	Description	Sample Values
Split	The bank user can split the Charges/Commission by enabling/disabling the flag as per the requirement.	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settl. Acct	Details of the settlement account.	

### Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Ccy	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settl. Acct	Details of the settlement account.	

### Split Settlement

Once the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice, new section "Split Settlement" will appear below the 'Tax' section. The default parties in Split row should be fetched from OBTF.

Field	Description	Sample Values
Select	The check box to select the Split Settlement record.	
Component	The split component type eligible for Split .	

Field	Description	Sample Values
Currency	The currency of split settlement.	
Amount	The amount of split settlement.	

### Split Settlement Details

Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.

Field	Description	Sample Values
Sequence	The sequence number is auto populated with the value, generated by the system.	
Component	The split component type eligible for Split.	
Amount	The system splits the respective Charge/ Commission amount automatically between counter party and third party with 50% value by default.  The bank user can modify the amount.  More than two splits are not allowed.	
Customer	Indicates the ID of the Customer in Split Settlement Details section.	
Account	The system defaults the settlement account.  User can modify the settlement account. System initiates a call to common core tables within OBTFPM to select the account	

Field	Description	Sample Values
Account Currency	Defaults the currency of the account.	
Branch	Indicates the branch of the customer where transaction is getting processed.	
Percentage	<p>The system splits the respective Charge/ Commission percentage automatically between counter party and third party with 50% value by default.</p> <p>More than two splits are not allowed.</p> <p>The bank user can modify the amount.</p> <p>The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount.</p>	
Exchange Rate	System populates the exchange rate maintained.	
Original Exchange Rate	System displays the Original Exchange Rate as simulated in split settlement details section.	
Party Type	System displays the party type in split settlement details section.	
Negotiation Reference	Specify the negotiation reference number.	
AR-AP Tracking	<p>Indicates to defer the charge/ commission in Split Settlement Details section.</p> <p>The user can modify the AR-AP Tracking flag as per the requirements.</p>	
Loan/Finance Account	Displays the loan account.	
Negotiation Rate	Specify the negotiation rate.	

## FX Linkage Details

Following are the conditions of FX Linkage:

- If any LC Amendment is pending for beneficiary confirmation with FX changes, then the system, will not allow another amendment on this contract further.
- FX request will be processed in external system, only after successful amendment confirmation has been done.
- Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
- Delink of linked FX or Reduction of linked amount from the LC is allowed if the same is not attached to any Bills.

- Reduction of LC contract amount with FX, through LC amendment will be restricted, when the contract amount goes below the FX linkage amount. User will be intimated with the message.

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV. On selection, system defaults date, available amount, bought currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> <li>Counterparty of the FX contract should be the counterparty of the Bill contract.</li> <li>Active Forward FX transactions authorized not marked for auto liquidation.</li> <li>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</li> </ul>	

Field	Description	Sample Values
Currency	System defaults from the linked FX contract.	
Bought Currency	System defaults from the linked FX contract.	
SOLD Currency	System defaults from the linked FX contract.	
Available Contract Amount	Available amount will be FX contract amount minus the linked amount.  Available amount for linkage should be greater than Zero.	
Rate	Exchange rate is defaulted from the linked FX contract.	
Linked Amount	Sum of Linked amount will not be greater than Bill/LC contract amount.  Linked amount will not be greater than the available amount for linkage.	
Current Utilized Amount	Current Utilized amount displays the liquidated / purchased /discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.	
Total Utilized Amount	Total Utilized amount displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
FX Expiry Date	System defaults expiry date from the linked FX contract.	
FX Delivery Period From	Displays the FX delivery start date.	
FX Delivery Period To	Displays the FX delivery end date.	
Action	Click the Edit icon to edit the FX linkage details.  Click the Delete icon to delete the FX linkage details.	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>● <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>● <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	

Field	Description	Sample Values
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> Select a Reject code and give a Reject Description.  This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system.  Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul>	
Back	On click of Back, system moves the task back to the previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

## Summary

User can review the summary of details updated in Scrutiny Import LC Amendment request.

Log in to Oracle Banking Trade Finance Process Management (OBTFFM) system to see the Summary tiles. The tiles must display a list of important fields with values. User can drill down from Summary Tiles into respective data segments.

Cancel	Cancel the Scrutiny stage inputs.	

Field	Description	Sample Values
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> Select a Reject code and give a Reject Description.  This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system.  Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul>	
Back	On click of Back, system moves the task back to the previous data segment.	
Submit	Task will get moved to next logical stage of Import LC Amendment.  If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

## Data Enrichment

As part of Data Enrichment, user can enter/update basic details of the incoming request.

### Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data Enrichment stage:

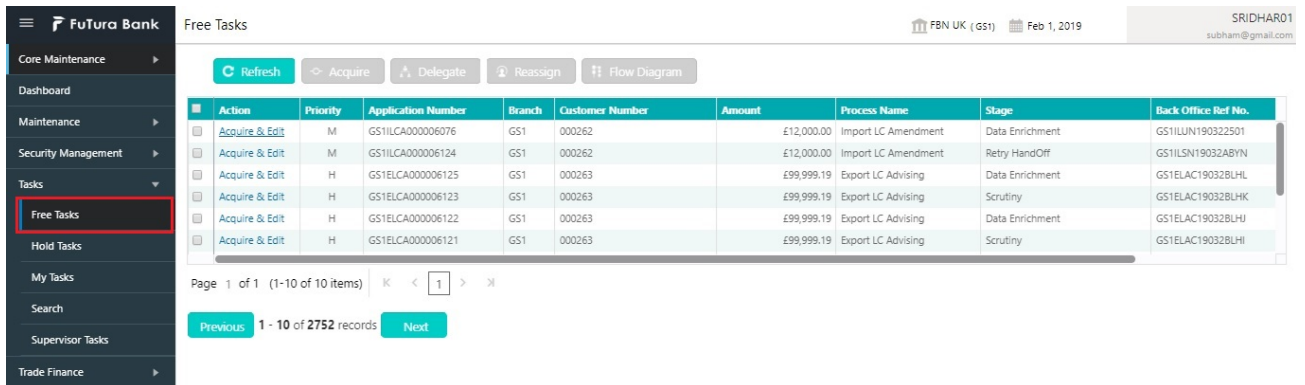

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance > Tasks > Free Tasks.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks** tab.

Action	Priority	Application Number	Branch	Customer Number	Amount	Process Name	Stage	Back Office Ref No.

The Data Enrichment stage has six sections as follows:

- Main Details
- Availability Shipment
- Documents and Conditions
- Payment Details
- Amendment Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

## Main Details

Refer to [Main Details](#).

## Availability & Shipment

Refer to [Availability Shipment](#).

## Documents & Conditions

User must provide details of the required documents and additional conditions (if applicable) in this section.

### Documents Details

Documents required section displays the list of documents required as per the issued LC and can be amended if required.

#### Note

Insurance document is available in Documents Details section, if value in the 'INCO Term' field is not 'CFR', 'FOB', 'FCA', 'FAS' or 'EXW' in the Availability stage. If not system gives the warning message.

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both 'Bill Of lading' and 'Airway Bill' are chosen.

Field	Description	Sample Values
Code	Document code is auto-populated from the latest LC.	
Document Description	Description of the document is auto-populated from the latest LC.	
Copy	Number of duplicate copies of documents as required in LC.	
Original	Number of documents in original as required in LC.	

Field	Description	Sample Values
Clause Details	System displays the clause details. User can view and edit the clause description by clicking the link.	
Original Doc. Required	System defaults the value to display whether the original document is required or not. The user can enable the option, if document is required.	
Action	Click Edit icon to edit the document details. Click Delete icon to delete the document details.	

### Additional Conditions

Additional Conditions section displays the conditions of the issued LC and can be amended if required.

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line de-limiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

Field	Description	Sample Values
FFT Code	This field displays the FFT code as per the latest LC.	
FFT Description	This field displays the description of the FFT code as per the latest LC.	
Action	Click Edit icon to edit the additional conditions details. Click Delete icon to delete the additional conditions details.	

### Payment Details

Refer to [Payment Details](#).

### Amendment Details

Refer to [Amendment Details](#).

### Additional Fields

Refer to [Additional Fields](#).

### Preview

User can view the draft LC amendment message (outgoing MT707 SWIFT message format) being displayed on the preview message text box.

A copy of draft LC amendment can be sent for customer confirmation and the same can be done by choosing the customer response toggle as 'yes'. The Draft MT707 message along with up to seven MT708 messages is sent to the applicant by Email as an attachment to the customer.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number. On submit, the message will be sent to the customer. The task will be moved to 'pending customer response' stage. Upon receipt of customer's confirmation, the transaction moves to approval.

In case the customer has requested for changes, the transaction will move to Data Enrichment and once the necessary changes made, the request moves to approval stage.

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	

Field	Description	Sample Values
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

# Settlement Details

The screenshot displays the Oracle Settlement Details interface. At the top, there's a navigation bar with tabs like 'Clarification Details', 'Documents', 'Remarks', etc. The main content area is divided into several sections:

- Settlement Details Table:** A table with columns: Component, Currency, Debit/Credit, Account, Account Description, Account Currency, Netting Indicator, Current Event, Original Exchange Rate, Exchange Rate, and Deal Reference Num. It lists several entries for 'GOODCARE PLC' and 'Domestic Export Sig'.
- AILSRS\_COM1\_LIQD - Party Details:** A section with dropdowns for Transfer Type, Charge Details, Netting Indicator, and Ordering Customer. It also includes search fields for Senders/Receivers Correspondent, Beneficiary Institution, Ultimate Beneficiary, and Intermediary Institution.
- Payment Details:** A section with input fields for Sender To Receiver 1 through 6.
- Remittance Information:** A section with input fields for Payment Detail 1 through 4.

Provide the settlement details based on the description in the following table:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	System displays the default currency for the component.	
Debit/Credit	System displays the debit/credit indicators for the components.	
Account	System displays the account details for the components.	
Account Description	System displays the description of the selected account.	
Account Currency	System defaults the currency for all the items based on the account number.	
Netting Indicator	System displays the applicable netting indicator.	

Field	Description	Sample Values
Current Event	System displays the the current event as Y or N.	

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. Cancel	Cancel the Scrutiny stage inputs.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul>	
Back	On click of Back, system moves the task back to the previous data segment.	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

## Summary

User can review the summary of details updated in Data Enrichment stage Import LC Amendment request.

The screenshot shows the Oracle Financials Summary page for an Import LC Amendment request. The page is titled 'Import LC Amendment' and 'DataEnrichment :: Application No:- PK2ILCA000025648'. The summary is organized into a grid of 16 tiles, each representing a different category of details. The tiles are: Main Details, Availability Shipment, Documents and Conditions, Payment Details, Amendment Details, Additional Fields, Advices, Limits and Collaterals, Commission, Charges and taxes, Revolving Details, Settlement Details, Preview Messages, Parties Details, Compliance details, Accounting Details, and FX Linkage. Each tile contains key-value pairs for various fields. For example, in 'Main Details', 'Form of LC' is 'IRREVOCABLE' and 'Submission Mode' is 'Desk'. The 'Summary' tile is currently selected in the left-hand navigation menu.

### Tiles Displayed in Summary

- Main Details - User can view and modify details about application details and LC details, if required.
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Payment Details - User can view and modify all details related to payments, if required.
- Amendment Details - User can view the amended details of the issued LC.
- Additional Fields - User can view and modify the details of additional fields, if required.
- Advices - User can view and modify the advice details, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Commission and Charges and Taxes - User can view and modify commission, charge and tax details, if required.
- Revolving Details - User can view revolving details on revolving LC, if applicable.
- Settlement Details - User can view and modify settlement details, if required.
- Preview Messages - User can view and modify preview details, if required.

- Parties Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Compliance Details - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated in back office.

**Note**

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message “Value Date is different from Transaction Date for one or more Accounting entries.

- FX Linkage - User can view and modify the details of FX Linkage, if required.

**Action Buttons**

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
View LC	Enables user to view the details of the LC.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Scrutiny stage inputs.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul>	
Back	On click of Back, system moves the task back to the previous data segment.	
Submit	Task will get moved to next logical stage of Import LC Update Drawing. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

## Customer Response - Draft Confirmation

The customer response can be received both by online and offline mode.

In non-online mode, user receives the response in the branch.

In online mode the customer will share their response online that will be automatically updated in the customer response field in the task, which is available in the customer response pending stage.

Log in into OBTFPM application, and open the task to see customer response screen.

### Customer Response

Language - Read only field

Draft Message - Read only field

### Draft Confirmation

Draft Confirmation required - Read only field

Customer Response - This field will be available for you to update any of the below response based on the customer's reply

- Accepted
- Changes Required - Change and proceed

For non-online response – User can select customer response from one of the three drop list values mentioned above.

For Online response – Read only

Customer Remarks - Capture the remarks of the customer.

Response Date - Non-Online channel – Update the date on which the customer response has been received.

Online Channel – Read only

## Summary

Tiles Displayed in Summary

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Amendment Details - User can view the amended details of the issued LC.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Documents – User must be able to view the documents uploaded in the system and upload documents if customer response has been received through non- online channel.

Remark - Capture remarks if required and must be able to view the remarks captured during earlier stages.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Import LC Amendment. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Cancel	Cancel the Draft Confirmation.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance- Limits</li> <li>• R5 - Others</li> </ul>	

## Exceptions

The Import LC Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

### Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

## Amount Block Exception

This section will display the amount block exception details.

The screenshot displays the FuTura Bank interface for an 'Amount Block Exception Approval'. The page title is 'Import LC Amendment - Amount Block Exception Approval :: Application No: GS1ILCA000006076'. The user is SRIDHAR01 (subham@gmail.com) and the date is Feb 1, 2019. The interface includes a navigation menu with 'Amount Block Exception' and 'Summary' options. The main content area shows 'Amount Block Exception Details' with a table of exception records.

Type	Contract Currency	Block Amount	Branch	Account	Account Currency	Block Ref No	Block Status	Block Status Details
Charge	GBP	50	000	625362256	GBP		BF	
Charge	GBP	500	000	0224	USD		BF	
Charge	GBP	50	000	1201200000	GBP		BF

## Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

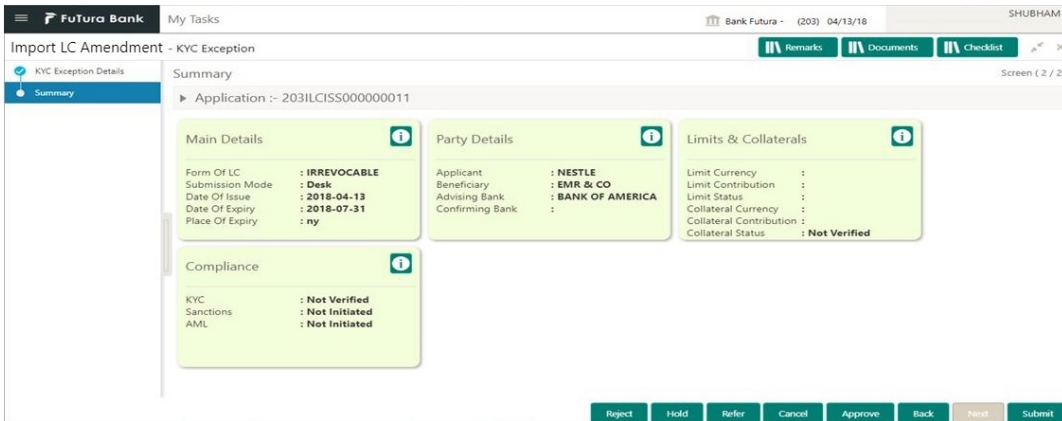

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

### Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

### Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

### Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Field	Description	Sample Values
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance- Limits</li> <li>● R5 - Others</li> </ul>	
Cancel	Cancel the Import LC Amendment KYC exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

### Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

#### Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

#### Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

#### Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

#### Reject

The transaction due to non-availability of limits capturing reject reason.

## Limit/Credit Check

This section will display the amount block exception details.

### Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Amendment Details - User can view the amended details of the issued LC.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance- Limits</li> <li>● R5 - Others</li> </ul>	
Cancel	<p>Cancel the Import LC Amendment Limit exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

## Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT798, on approval the task is handed off to back office system to amend the LC contract and generate the required MT707/708/747 messages.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

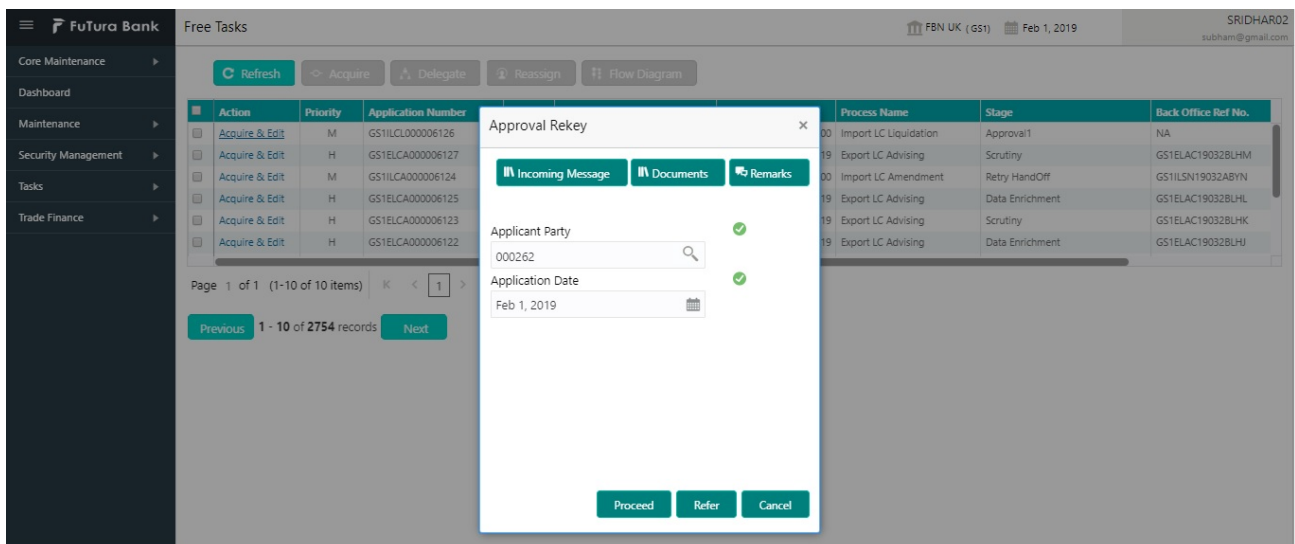

## Authorization Re-Key

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- Application Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents.	
Remarks	Provide any additional information regarding the LC Amendment. This information can be viewed by other users processing the request.	
Incoming Message	Displays the incoming message, if any.	
<b>Action Buttons</b>		
Proceed	On proceed, the screen navigates to approval summary screen.	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R5 - Others</li> </ul>	
Cancel	Cancel the Import LC Amendment Approval Rekey.

For any further queries about details of your LC application review, please contact us at <bank customer support ph.no>

Yours Truly

<Authorized Signatory>

## Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import LC Amendment in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

## Application Details

The application details data segment have values for requests received from both non-online and online channels.

## Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Amended Details - User can view the amended details of the issued LC.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

## Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
