Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Internal Amendment

Import LC Internal Amendment process enables the user to make an amendment to the underlying LC details without impacting the terms and conditions of the LC.

This section contains the following topics:

| | |
|-----------------------------------------|--------------------------------------|
| Common Initiation Stage | Registration |
| Data Enrichment | Multi Level Approval |

Common Initiation Stage

The user can initiate the new import LC internal amendment request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

| Field | Description |
|--------------|-----------------------------------------------|
| Process Name | Select the process name to initiate the task. |
| Branch | Select the branch. |

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description |
|---------|--------------------------------------------------------------------|
| Proceed | Task will get initiated to next logical stage. |
| Clear | The user can clear the contents update and can input values again. |

Registration

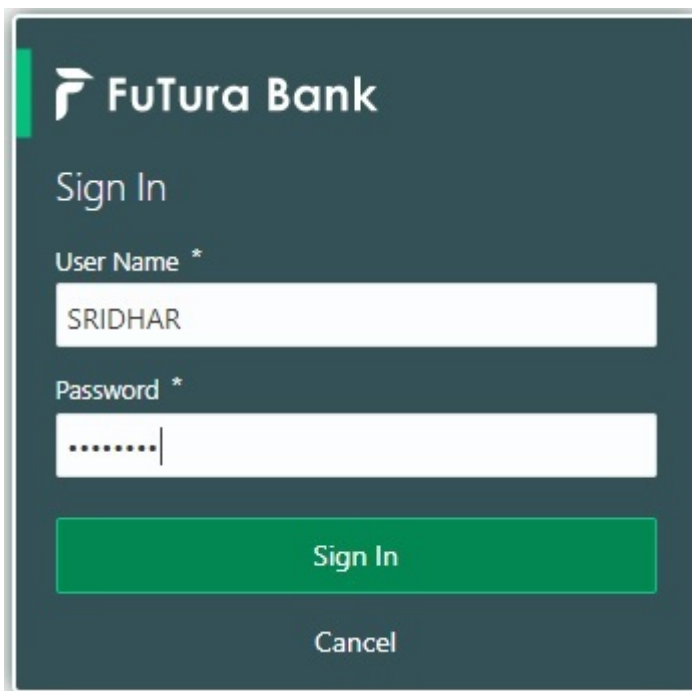

User can register request of new Import LC internal amendment received at the front desk through branch either by fax, mail, or physical application form, the Import LC internal amendment process starts from the Registration Stage.

During Registration stage, user can capture the basic details of the amendment application, check the signature of the applicant and upload the related documents of the applicant. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for an LC expert to handle the request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

| Field | Description | Sample Values |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Checklist | <p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p> <p>The checklist items under Registration Stage are:</p> <ul style="list-style-type: none"> ● Application signed and stamped ● Customer signature verified ● Any correction or alteration initialed by the applicant  | |

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

| Field | Description | Sample Values |
|----------------|-----------------------------------------------------------------------------------|---------------|
| Document Type | Select the Document type from list. Indicates the document type from metadata. | |
| Document Code | Select the Document Code from list. Indicates the document Code from metadata. | |
| Document Title | Specify the document title. | |

| Field | Description | Sample Values |
|----------------------|---------------------------------------------------------------------------------|---------------|
| Document Description | Specify the document description. | |
| Remarks | Specify the remarks. | |
| Document Expiry Date | Select the document expiry date. | |
| Link Document | The link to link the existing uploaded documents from DMS to the workflow task. | |

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

| Field | Description | Sample Values |
|----------------------|------------------------------------------------------|---------------|
| Customer ID | This field displays the transaction Customer ID. | |
| Document ID | Specify the document Id. | |

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of Registration of an Internal LC Amendment request, the request moves to Data Enrichment stage. At this stage the user enter/update the basic details of the amendment request and can verify if the request can be progressed further.

Non-Online Channel - Internal LC Amendment request that were received at the desk will move to Data Enrichment stage post successful Registration. The transaction will have the details entered during the Registration stage.

Online Channel - Requests that are received via SWIFT (MT730) are available directly for further processing in OBTFPM from Data Enrichment stage and relevant data should be auto populated.

For MT 730, system should validate the incoming MT 730 based on Related Reference field to identify whether it is Acknowledgment for Import LC or Export LC. If the MT 730 is for Import LC, system should process the MT 730 under Internal Amendment to Import LC.

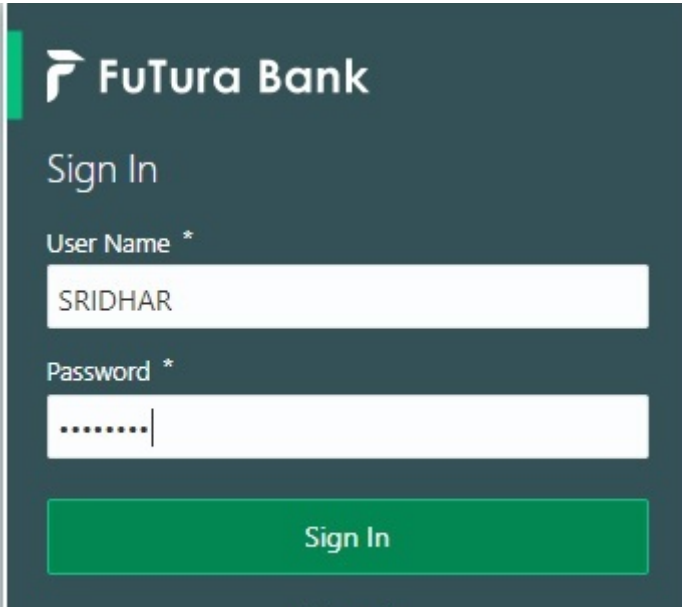

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

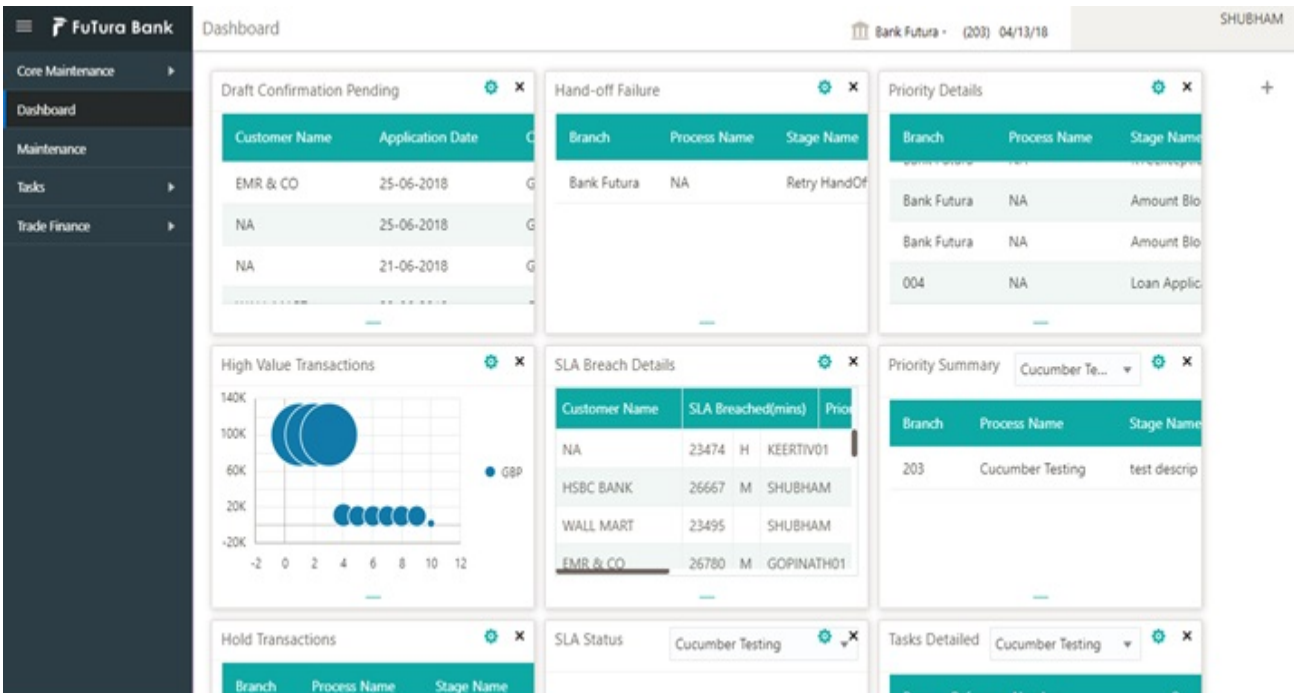

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features the bank's logo and name at the top. Below that, the text "Sign In" is displayed. There are two input fields: "User Name *" with the value "SRIDHAR" and "Password *" with masked characters. A green "Sign In" button is located at the bottom.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. The left sidebar contains navigation options: Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main dashboard area is titled "Dashboard" and shows the user's name "SHUBHAM" and the date "04/13/18". The dashboard is populated with several widgets:

- Draft Confirmation Pending:** A table with columns "Customer Name", "Application Date", and "Status".
- Hand-off Failure:** A table with columns "Branch", "Process Name", and "Stage Name".
- Priority Details:** A table with columns "Branch", "Process Name", and "Stage Name".
- High Value Transactions:** A bubble chart showing transaction values for GBP.
- SLA Breach Details:** A table with columns "Customer Name", "SLA Breached(mins)", and "Priority".
- Priority Summary:** A table with columns "Branch", "Process Name", and "Stage Name".
- Hold Transactions:** A table with columns "Branch", "Process Name", and "Stage Name".
- SLA Status:** A widget showing "Cucumber Testing".
- Tasks Detailed:** A widget showing "Cucumber Testing".

3. Click **Trade Finance> Tasks> Free Tasks**.

Main Details

Main details section has two sub section as follows:

- Application Details
- LC Amendment Details

Application Details

All fields displayed under Application details section, would be read only except for the **Priority**. Refer to [Application Details](#) for more information of the fields.

The screenshot shows the Oracle application details form for 'Import LC Internal Amendment'. The form is divided into two main sections: 'Application Details' and 'LC Amendment Details'. The 'Application Details' section includes fields for '20 - Documentary Credit Number', 'Received From Applicant Bank', 'Received From - Customer ID', 'Received From - Customer Name', 'Branch', 'Process Reference Number', 'Priority', 'Submission Mode', 'Amendment Date', 'User Reference Number', and 'Customer Reference Number'. The 'LC Amendment Details' section includes fields for 'Revolving', 'LC Type', 'Product Code', 'Product Description', '56A - Advising Bank', '31D - Date of Expiry', '31D - Place of Expiry', '59A - Beneficiary Name', 'Limits/Collateral Required', '40A - Form of Documentary Credit', '30 - Date of Issue', '51A - Applicant Bank', '39A - Percentage Credit Amount Tolerance', '32B - Currency Code, Amount', '39C - Additional Amount Covered', and 'Auto Close'. The form also includes a navigation bar at the top with buttons for 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', 'Common Group Messages', 'Incoming Message', 'View LC', and 'Signatures'. At the bottom, there are buttons for 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

LC Amendment Details

The fields listed under this section are same as the fields listed under the [LC Amendment Details](#) section in [Registration](#). Refer to [LC Amendment Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Following are the fields on the landing page of the LC Main screen with the latest LC values. Provide the details for the amendable fields based on the description in the following table:

| Field | Description | Sample Values |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| Received From Applicant bank | Read only field. Value will be defaulted as available in LC. | Toggle off |
| Received From - Customer ID | Read only field. Customer ID will be auto-populated based on the selected LC from the LOV. | 001344 |
| Received From - Customer Name | Read only field. Customer Name will be defaulted as available in LC. | EMR & CO |
| Documentary Credit Number | Non Online: Ready only defaults from Registration stage. Online: Read only. Received from the online request/ Incoming MT730. | |
| Branch | Read only field. Branch details will be defaulted from LC. | 203-Bank Futura -Branch FZ1 |
| Process Reference Number | Read only field. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code. | |
| Priority | System will default the Priority as Low/Medium/ High based on maintenance. User are allowed to change the value. | High |

| Field | Description | Sample Values |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Submission Mode | Read only field. The submission mode of Import LC Amendment request. By default the submission mode will have the value as 'Desk' for transactions created via registration. | Desk |
| Amendment Date | Read only field. By default, the application will display branch's current date. User cannot change the date to a back date or future date. | 04/13/2018 |
| Customer Reference Number | Read only field. The 'Reference number' provided by the applicant/ applicant bank. | |

LC Amendment Details

All fields displayed in LC amendment details section are read only fields.

| Field | Description | Sample Values |
|----------------------------------|----------------------------------------------------------------------------------------------------------------|---------------|
| Revolving | Read only field. This field displays the value used for 'Revolving' as per the latest LC amendment details. | |
| LC Type | Read only field. This field displays the value used for LC Type as per the latest LC amendment details. | |
| Product Code | Read only field. This field displays the product code used during Issuance of the selected LC. | |
| Product Description | Read only field. This field displays the description of the product as in Import LC Issuance. | |
| Advising Bank | Read only field. This field displays the advising bank as per the latest LC amendment details. | |
| 40A - Form of Documentary Credit | Read only field. This field displays the value available in LC record. | |
| Date of Issue | Read only field. This field displays the LC issuance date. | |
| Applicable Rules | Read only field. This field displays the applicable rule as per the latest LC amendment details. | |

| Field | Description | Sample Values |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Date Of Expiry | Read only field. This field displays the expiry date as per the latest LC amendment details. | 09/30/18 |
| Place of Expiry | Read only field. This field displays the place of expiry as per the latest LC amendment details. | |
| Applicant Bank | Read only field. This field displays the applicant bank if available as per the latest LC amendment details. | |
| Applicant | Read only field. This field displays the applicant as per the latest LC amendment details. | |
| Beneficiary Name | Read only field. This field displays the beneficiary as per the latest LC amendment details. | |
| Currency Code, Amount | Read only field. This field displays the currency code/ Outstanding LC Amount as per the latest LC amendment details. | |
| Percentage Credit Amount Tolerance | Read only field. This field displays the percentage credit amount tolerance details as per the latest LC amendment details. | |
| LC Outstanding Amount | Read only field. This field displays the LC Outstanding amount details as per the latest LC amendment details. | |
| Limits/ Collateral Required | Toggle On: Set the toggle 'On' to enable limit check. Toggle Off: Set the toggle 'Off' to disable limit check. | |
| Additional Amount Covered | Read only field. This field displays the details of additional amount covered as per the latest LC amendment details. | |
| Auto Close | Toggle On: Enable the toggle, if Auto close is required for that transactions. Toggle Off: Disable the toggle, if Auto close is not required for that transactions. | |

| Field | Description | Sample Values |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Closure Date | <p>Read only field.</p> <p>System default the “Closure Date” value, if any, from the contract.</p> <p>If the system defaulted value for Auto Close is Yes, then Closure Date field will be a display only field and user is not allowed to edit the same.</p> <p>If the system defaulted value for Auto Close is No, then user can edit the Closure Date field by enabling the “Auto Close” toggle as “Yes”.</p> <p>User can provide the value in this field, if Auto Close is enabled as a part of this internal amendment.</p> | |

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Documents | <p>The user can view the uploaded documents. Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p> | |
| Remarks | The user can view the remarks captured in the process during earlier stages. | |
| Overrides | User can view the various overrides that have been generated and accepted. | |
| Customer Instructions | <p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. | |

| Field | Description | Sample Values |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Common Group Message | Click Common Group Message button, to send MT799, MT999, MT759 and MT79-1,2,5,6,798 messages from within the task. | |
| Incoming Message | User can view the incoming SWIFT message MT730. In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task. | |
| View LC | Enables user to view the details of the underlying LC. | |
| Signature | Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures. | |
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. | |
| Refer | User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others | |

| Field | Description | Sample Values |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Hold | The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided. | |
| Cancel | Cancel the task window and return to dashboard. The data input will not be saved. | |
| Save & Close | Save the information provided and holds the task in you queue for working later. This option will not submit the request. | |
| Next | On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. | |

Acknowledgement - MT730 Details

User must scrutinize the incoming MT730 details of an Internal LC amendment request for the different fields under the respective data segments.

At this stage the incoming MT730 details are auto populated. If required, the MT 730 details can also be entered by the user.

The screenshot displays the Oracle Banking Trade Finance application interface. The top navigation bar includes the Oracle logo and user information: (DEFAULTTENITY), Oracle Banking Trade Finan..., Jun 13, 2021, and ZARTAB01 subham@gmail.com. The main content area is titled 'Acknowledgement Details' and shows 'MT730 - Acknowledgement Received'. The interface contains several input fields for data entry, including 'Advising Bank Reference', '25 Account Identification', '30 Date of Acknowledgement' (set to Jun 13, 2021), '32a Amount of Charges', '57a - Account with Bank', '71 D Charges', '72-Sender to Receiver Information', and '79 Z Narrative'. A bottom toolbar includes buttons for 'Audit', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

As part of amendment, user can change the values available in the fields based on the description in the following table:

| Field | Description | Sample Values |
|------------------------|-------------|---------------|
| Acknowledgment Details | | |

| Field | Description | Sample Values |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Advising Bank Reference | <p>Non Online: User can enter the Advising Bank Reference details.</p> <p>Online: Read only.</p> <p>Details received from the online request/ Incoming MT730 will get auto populated.</p> | |
| Account Identification | User can enter the account identification details. | |
| Date of Acknowledgment | <p>Non Online: User can enter the date.</p> <p>Online: Read only.</p> <p>Details received from the online request/ Incoming MT730 will get auto populated.</p> | |
| Amount of Charges | <p>Non Online: User can enter the amount of charges.</p> <p>Online: Read-only. System defaults the Amount of Charge from the incoming MT730 received.</p> | |
| Account with Bank | <p>Non Online: User can enter the account with bank details.</p> <p>Online: Read-only. System defaults the Account with Bank from the incoming MT730 received. User can manually enter the details if not processed as STP.</p> | |
| Charges | <p>Non Online: User can enter the charge details.</p> <p>Online: Read-only. System defaults the charges from the incoming MT730 received. User can manually enter the details if not processed as STP.</p> | |
| Sender to Receiver Information | <p>Non Online: User to enter the details.</p> <p>Online: Read-only. System defaults the Sender to Receiver information from the incoming MT730 received.</p> | |
| Narrative | <p>Non Online: User can enter the details.</p> <p>Online: Read-only. System defaults the Narrative from the incoming MT730 received</p> | |

Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Documents | <p>The user can view the uploaded documents. Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p> | |
| Remarks | The user can view the remarks captured in the process during earlier stages. | |
| Overrides | User can view the various overrides that have been generated and accepted. | |
| Customer Instructions | <p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. | |
| Common Group Message | Click Common Group Message button, to send MT799, MT999, MT759 and MT79-1,2,5,6,798 messages from within the task. | |
| Incoming Message | <p>User can view the incoming SWIFT message MT730.</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p> | |
| View LC | Enables user to view the details of the underlying LC. | |

| Field | Description | Sample Values |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Signature | <p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p> | |
