**Viewing the Refund Request Details**

**Procedure**

To view the details of a refund request:

- 1. Search for the refund request in the **Refund/Write Off Request** screen.
- 2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to view.

The **Refund Request** screen appears. It consists of the following tabs:

- **Main** - Displays information about the refund request. It contains the following zones:
    - **Refund Request** - Displays the details of the refund request.
    - **Refund Details** - Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** - Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
  - **Log** - Lists the complete trail of actions performed on the refund request.
- 3. View the details of the refund request in the **Refund Request** zone.
  - 4. View the entities (such as payment events, payments, or credit bill line items) which must be refunded in the **Refund Details** zone.

## Refund Request

Once you create a refund request, the **Refund Request** screen allows you to:

- Edit and delete a refund request
- View the details of a refund request
- Submit a refund request for approval
- Approve or reject a refund request
- View the log of a refund request
- Add a log entry for a refund request
- Void a refund request

This screen consists of the following tabs:

- **Main** - Displays information about the refund request. It contains the following zones:
  - **Refund Request** - Displays the details of the refund request.
  - **Refund Details** - Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Bill Line Items** - Displays the details of the bill which must be refunded.

**Note:** This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:
  - **Search Bills** - Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** - Lists the debit and credit bill segments and adjustments of the bill.

This tab appears when the refund request is in the **Draft** status.

- **Payments** - Used to search payment events or individual payments that you want to refund. It contains the following zones:
  - **Search Payment Event** - Lists the payment events which are created for the account. You can filter the payment events using various search criteria.
  - **Payments** - Lists all payments created through the payment event.

This tab appears when the refund request is in the **Draft** status.

- **Log** - Lists the complete trail of actions performed on the refund request.

## Refund Request - Main

The **Main** tab displays information about the refund request. It contains the following zones:

- [Refund Request](#) on page 2583
- [Refund Details](#) on page 2586
- [Bill Line Items](#) on page 2587

## Refund Request

The **Refund Request** zone displays the details of the refund request. This zone contains the following sections:

- **Main** - This section provides basic information about the refund request. It contains the following fields:

Field Name	Field Description	
Refund Request Information	Displays information about the refund request.	
Refund Request Type	Indicates the refund request type using which the refund request is created.	
	<b>Note:</b> It has a link. On clicking the link, the <b>Refund/Write Off Request Type</b> screen appears where you can view the details of the refund request type.	
Status	Indicates the status of the refund request. The valid values are: <ul style="list-style-type: none"><li>• Approval In Progress</li><li>• Cancelled</li><li>• Deferred Cancel</li><li>• Deferred Processing</li><li>• Deferred Void</li><li>• Draft</li><li>• Hold</li></ul>	

Field Name	Field Description	
	<ul style="list-style-type: none"> <li>Processed</li> <li>Rejected</li> <li>Voided</li> </ul>	
Status Reason	<p>Indicates the reason why the refund request is rejected or voided.</p> <p><b>Note:</b></p> <p>This field appears when the refund request is in the <b>Rejected</b> or <b>Voided</b> status.</p> <p>It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the rejected or voided reason.</p>	
Account Information	<p>Indicates the account for which the refund request is created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>	
Person Name	Indicates the person for whom the refund request is created.	
Override Address	Indicates whether the account's mailing address is overridden.	
Address 1	Displays the house number and apartment name.	
Address 2	Displays the street name.	
Address 3	Indicates the landmark, if available.	
Address 4	Displays the village, town, or city name.	
City	Displays the city name.	
State	Displays the state name.	
Country	Displays the country name.	
Postal	Displays the postal or zip code.	
Comments	Displays additional information about the refund request.	
Total Refund Amount	Displays the total refund amount.	
Adjustment Level	<p>Indicates the adjustment level for which you want to create the write off request.</p> <p><b>Note:</b> It is a read-only field.</p>	No

- **Characteristics** - Lists the characteristics defined for the refund request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the refund request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the refund request.
	<b>Note:</b> The <b>Edit</b> button appears when the refund request is in the <b>Draft</b> status.
Delete	Used to delete the refund request.
	<b>Note:</b> The <b>Delete</b> button appears when the refund request is in the <b>Draft</b> status.
Submit	Used to submit the refund request for approval.
	<b>Note:</b> The <b>Submit</b> button appears when the refund request is in the <b>Draft</b> status.
Approve	Used to approve the refund request.
	<b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>• The refund request is in the <b>Approval In Progress</b> status.</li> <li>• A user with the approval To Do role is reviewing the refund request.</li> </ul>
Reject	Used to reject the refund request.
	<b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>• The refund request is in the <b>Approval In Progress</b> status.</li> <li>• A user with the approval To Do role is reviewing the refund request.</li> </ul>
Void	Used to void the refund request.
	<b>Note:</b> The <b>Void</b> button appears when the refund request is in the <b>Processed</b> status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the refund request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the refund request status is updated
Create Date/Time	Displays the date and time when the refund request is created.

Refund Details

The **Refund Details** zone lists the payment events, payments, and credit bill line items (such as bill segments and adjustments) that you have added to the refund request. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the entity ID.
Entity Type	Indicates whether the entity is a payment event, payment, bill, bill segment, or an adjustment.
Currency	Indicates the currency in which the entity was created.
Entity Amount	Displays the entity amount.
Refund Amount	Displays the amount that must be refunded. <b>Note:</b> By default, the amount which is eligible for refund appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created or against which the payment is matched. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created. <b>Note:</b> By default, the adjustment type specified in the refund request type appears in this column. You can change the adjustment type, if required, by editing the refund request.
Adjustment Information	Displays information about the refund adjustment. <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment. The data appears in this column when the status of the refund request is <b>Processed</b> . The information string appears when an algorithm of the <b>C1-ADI-INFO</b> algorithm type is attached to the <b>Adjustment Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options - Framework</b> screen.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Payment Refunded	Displays the amount that has been refunded.

**Note:** On clicking the Broadcast (📡) icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Displays the currency in which the entity was created.
Entity Amount	Displays the bill segment or adjustment amount.
Request Amount	Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.
	<b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Adjustment Information	Displays information about the refund adjustment.

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Refund Details** zone.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

## Bills

The **Bills** tab allows you to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:

- [Search Bills](#) on page 2588
- [Bill Line Items](#) on page 2589

### Search Bills

The **Search Bills** zone lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a bill using bill or bill and price item details. The valid values are: <ul style="list-style-type: none"><li>• Bill Details</li><li>• Bill and Price Item Details</li></ul>	Yes
	<b>Note:</b> By default, the <b>Bill Details</b> option is selected.	
Bill ID	Used to search a particular bill.	No
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the Search icon the <b>Bill Search</b> window appears.	
Bill Date From	Used to search bills which are created from a particular date onwards.	No
	<b>Note:</b> You can either manually specify the date or select it using the <b>Date Picker</b> icon corresponding to the field. The bill date from date cannot be later than the bill date to date.	
Bill Date To	Used to search bills which are created till a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> You can either manually specify the date or select it using the <b>Date Picker</b> icon corresponding to the field. The bill date to date cannot be earlier than the bill date from date.	
Price Item	Used to search bills which are created for a particular price item. <b>Note:</b> This field appears when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list. You can search for a price item by clicking the <b>search</b> (🔍) icon corresponding to the field.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Amount	Displays the total bill amount.

If you want to refund a bill with credit balance and all credit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All credit bill segments and adjustments of the bill are added in the **Refund Details** zone on the **Main** tab. However, if you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

**Related Topics**

For more information on...	See...
How to add a credit bill line item to the refund request	<a href="#">Adding a Credit Bill Line Item to the Refund Request</a> on page 2600

**Bill Line Items**

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. If the entity is a bill segment, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the <b>Adjustment</b> screen appears with the details of the respective adjustment on clicking the link.
Entity Amount	Displays the bill segment or adjustment amount.
Eligible Amount	Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.
	<b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Amount Refunded	Displays the amount which is already refunded to the account.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

You can select one or more credit bill segments or adjustments and click the **Add** button in this zone to add selected credit bill segments or adjustments to the refund request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Search Bills** zone.

**Related Topics**

For more information on...	See...
How to add a credit bill line item to the refund request	<a href="#">Adding a Credit Bill Line Item to the Refund Request</a> on page 2600

## Payments and Adjustments

The **Payments** tab allows you to search payment events or individual payments that you want to refund. It contains the following zones:

- [Search Payment Event](#) on page 2590
- [Payments](#) on page 2592

### Search Payment Event

The **Search Payment Event** zone lists the payment events which are created for the account. You can filter the payment events using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a payment event using the payment details. The valid values are: <ul style="list-style-type: none"><li>• Payment Details</li></ul>	Yes
	<b>Note:</b> By default, the <b>Payment Details</b> option is selected.	
Payment Event ID	Used to search a particular payment event.	No
Suspense/Excess Credit Contract	Used to search payment events which include payments made against a particular suspense or excess credit contract.	No
	<b>Note:</b> The suspense and excess credit contracts are listed when these contracts are associated with the account	
Check Number	Used to search a payment event which includes payment made through a particular check.	No
Payment Date	Used to search payment events which include payments created from a particular date onwards.	No
To	Used to search payment events which include payments created till a particular date.	No
MICR ID	Used to search payment events which include payments made with a particular MICR code.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Payment Event Information	Displays additional information about the payment event.
	<b>Note:</b> It has a link. On clicking the link, the <b>Payment Event</b> screen appears where you can view the details of the respective payment event.
Payment Date	Displays the date when the payments were created.
Tender Amount	Displays the tender amount.
Payment Event ID	Displays the payment event ID.

If you want to refund all payments of a payment event, you need to select the check box corresponding to the payment event and then click the **Add** button in the **Search Results** section. If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone on the **Main** tab. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

**Note:** If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

**Related Topics**

For more information on...	See...
How to add a payment event to the refund request	<a href="#">Adding a Payment Event to the Refund Request</a> on page 2597

Payments

The **Payments** zone lists only those payments which are created through the payment event and are currently in the **Frozen** status. This zone contains the following columns:

Column Name	Column Description
Payment ID	Displays the payment ID.
	<b>Note:</b> It has a link. On clicking the link, the <b>Payment</b> screen appears where you can view the details of the respective payment.
Payee Account Information	Displays additional information about the account for which the payment was made.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Payment Amount	Displays the payment amount.
Payment Currency	Indicates the currency in which the payment was made.
Payment Status	Indicates the status of the payment.
Match Type	Indicates the match type using which the payment was matched.
Match Value	Indicates the entity (such as bill, contract, and so on) against which the payment was matched.
Amount Refunded	Displays the amount which is already refunded to the payor account.

You can select one or more payments and click the **Add** button in this zone to add selected payments to the refund request. By default, the **Payments** zone does not appear in the **Payments** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the payment event in the **Search Payment Event** zone.

# Creating a Refund Request

**Prerequisites**

To create a refund request, you should have:

- Refund request types defined in the application

**Procedure**

To create a refund request:

1. Do either of the following:

If you want to...	Then...
Define a refund request from the Account Receivable Central screen	<p><b>a.</b> Click the <b>Main</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p><b>b.</b> From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Account Receivable Central</b>.</p> <p><b>c.</b> Search for the bill in the <b>Account Receivable Central</b> screen.</p> <p><b>d.</b> In the <b>Search Results</b> section, select the required bill and then click <b>Refund</b>.</p>
	<p><b>Note:</b> Only one bill at a time is allowed to select for <b>Refund Request</b> from the <b>Account Receivable Central</b> screen.</p>
Define a refund request from the Refund Request screen	<p><b>a.</b> Click the <b>Main</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p><b>b.</b> From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Refund/Write Off Request</b>.</p> <p>A sub-menu appears.</p>

If you want to...	Then...
	c. Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.
Define a refund request from the <b>Payment Event Summary</b> screen	<p>a. Click the <b>Main</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>Payments</b> and then click <b>Payment Event Summary</b>.</p> <p>c. Search for the payment event (whose payments you want to refund) in the <b>Payment Event Summary</b> screen.</p> <p>d. In the <b>Search Results</b> section, click the <b>Broadcast</b> (📡) icon corresponding to the payment event whose payments you want to view.</p> <p>The <b>Payments</b> zone appears.</p> <p>e. Select the check box corresponding to the payments that you want to refund.</p> <p>f. Click the <b>Refund</b> button in the <b>Payments</b> zone.</p>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	Used to indicate the type of request (refund or write off) to be created.	Not applicable
	<b>Note:</b> This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen.  This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.  This field appears read-only when you access the select <b>Request Type</b> screen from the <b>Payment Event Summary</b> screen.	
Refund/Write Off Request Type	Used to indicate the request type using which you want to create the refund or write off request.	Yes
	<b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b> .	
Account	Used to indicate the account for which you want to create the refund or write off request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b>  This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen.  This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.  You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the respective field.  This field appears read-only when you access the select <b>Request Type</b> screen from the <b>Payment Event Summary</b> screen.	
Adjustment Level	Used to indicate the adjustment level for which you want to create the refund request.	No
	<b>Note:</b> It is a read-only field.	

**Tip:**  
Alternatively, you can access the **Select Request Type** screen:

- By clicking the **Add** button in the **Page Title** area of **Refund/Write Off Request** screen.
- By selecting the payment which you want to refund in the **Payment Event Summary** screen and then clicking the **Refund** button. Note that the system will allow you to refund only those payments which are in the **Frozen** status and matched against the suspense or excess credit contract.

- 2. Select the required refund request type from the respective field.
- 3. Click **Save**.

The refund request is defined and the status of the refund request is set to **Draft**. The **Refund Request** screen appears where you can view the details of the refund request. It contains the following tabs:

**Note:** The refund request can be created only for bill with outstanding amount lesser than zero.

- **Main** - Displays information about the refund request. It contains the following zones:
  - **Refund Request** - Displays the details of the refund request.
  - **Refund Details** - Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** - Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
  - **Log** - Lists the complete trail of actions performed on the refund request.
- 4. Add payment events, payments, or credit bill line items that you want to refund.
- 5. Edit the refund amount of each entity, if required.
- 6. Define characteristics for the refund request, if required.
- 7. Override the address if you want to sent the refund to an address other than the account's main customer address.

## Defining a Characteristic for a Refund Request

### Prerequisites

To define a characteristic for a refund request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

### Procedure

To define a characteristic for a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to edit.  
The **Refund Request** screen appears.
3. Click the **Edit** button in the **Refund Request** zone.  
The **Edit Refund Request** screen appears.

**Note:** The **Edit** button appears only when the refund request is in the **Draft** status.

4. Ensure that the **Characteristics** section is expanded when you are editing the refund request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the refund request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the refund request.

5. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the refund request, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the refund request, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Adding a Payment Event to the Refund Request

**Prerequisites**

To add a payment event to the refund request, you should have:

- Payments made by the account for which you need to create the refund request

**Procedure**

To add a payment event to the refund request:

1. Click the **Payments** tab in the **Refund Request** screen.  
The **Payments** tab appears.
2. Filter the payment events, if required, in the **Search Payment Event** zone.

**Note:** You can only refund payments, which are matched against suspense or excess credit contracts, to the payor account. Therefore, you can only view payment events which includes payments matched against suspense or excess credit contracts. If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

3. Select the check box corresponding to the payment event, whose payments you want to refund, in the **Search Results** section.

**Note:** You can add more than one payment event to the refund request at the same time.

4. Click **Add**.  
A message appears indicating that the selected payment events are added to the refund request.
5. Click **OK**.

Note that the entity is added in the **Refund Details** zone on the **Main** tab.

**Note:**

You can only refund payments which are in the **Frozen** status.

If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

# Adding a Payment to the Refund Request

**Prerequisites**

To add a payment to the refund request, you should have:

- Payments made by the account for which you need to create the refund request

**Procedure**

To add a payment to the refund request:

1. Click the **Payments** tab in the **Refund Request** screen.  
The **Payments** tab appears.
2. Filter the payment events, if required, in the **Search Payment Event** zone.

**Note:** You can only refund payments, which are matched against suspense or excess credit contracts, to the payor account. Therefore, you can only view payment events which includes payments matched against suspense or excess credit contracts. If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

3. In the **Search Results** section, click the **Broadcast** (📢) icon corresponding to the payment event whose *payments* you want to view.  
The **Payments** zone appears.
4. Select the check box corresponding to the payment that you want to refund.

**Note:** You can add more than one payment to the refund request at the same time.

5. Click **Add**.  
A message appears indicating that the selected payments are added to the refund request.
6. Click **OK**.  
Note that the payments are added in the **Refund Details** zone on the **Main** tab.

**Note:** You can only refund payments which are in the **Frozen** status.

## Adding a Credit Bill to the Refund Request

You can refund the credit bills to the account.

### Prerequisites

To add a credit bill to the refund request, you should have:

- Completed bills for the account with one or more credit line items

### Procedure

To add a credit bill to the refund request:

1. Click the **Bills** tab in the **Refund Request** screen.  
The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
A bill has all credit line items and you want to add the credit bill to the refund request	<b>a.</b> In the <b>Search Bills</b> zone, select the bills that you want to refund. <b>b.</b> Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.
	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.
A bill has credit balance and one or more debit line items and you want to add the credit bill to the refund request	<b>a.</b> In the <b>Search Bills</b> zone, select the bills that you want to refund. <b>b.</b> Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.
	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.

4. Click **Add**.

A message appears indicating that the selected bills are added to the refund request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

5. Click **OK**.

Note that all the credit bill segments or adjustments of the bills are added in the **Refund Details** zone on the **Main** tab.

**Note:**  
Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.  
The system will not allow you to add a debit line item to the **Refund Details** zone.

## Adding a Credit Bill Line Item to the Refund Request

You can refund the credit bill line items, such as bill segments and adjustments, to the account. While adding a credit bill line item to the refund request, you can either:

- Directly add all credit line items of a bill to the refund request by adding the bill which has all bill segments and adjustments in credit
- Individually add a credit bill segment or adjustment of a bill (with one or more credit line items) to the refund request

### Prerequisites

To add a credit bill line item to the refund request, you should have:

- Completed bills for the account with one or more credit line items

### Procedure

To add a credit bill line item to the refund request:

1. Click the **Bills** tab in the **Refund Request** screen.  
The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
A bill has all credit line items and you want to add a particular credit bill line item to the refund request	<ol style="list-style-type: none"><li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li><li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li></ol>
A bill has credit balance and one or more debit line items	<ol style="list-style-type: none"><li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li><li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li></ol>
A bill has debit balance and one or more credit line items	<ol style="list-style-type: none"><li>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.  The <b>Bill Line Items</b> zone appears.</li><li>b. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li></ol>

4. Click **Add**.  
A message appears indicating that the selected bill segments or adjustments are added to the refund request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

5. Click **OK**.  
Note that the credit bill segments or adjustments are added in the **Refund Details** zone on the **Main** tab.

**Note:**  
Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.  
The system will not allow you to add a debit line item to the **Refund Details** zone.

## Editing a Refund Request

**Prerequisites**

To edit a refund request, you should have:

- Adjustment types with A/P request type defined in the application

**Procedure**

To edit a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to edit.  
The **Refund Request** screen appears.
3. Click the **Edit** button in the **Refund Request** zone.

The **Edit Refund Request** screen appears. It contains the following section:

Field Name	Field Description	Mandatory (Yes or No)
Refund Request Information	Displays information about the refund request.	Not applicable
Account Information	Indicates the account for which the refund request is created.	Not applicable
Person Name	Used to indicate the person for whom the refund request is created.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The system maintains a log when you edit the person name in a refund request. A log is created in the following format:</p> <pre>Person Name is changed; ' Old Value: &lt;OLD NAME&gt;; New ' Value: &lt;NEW NAME&gt;</pre>	
Override Address	<p>Used to indicate whether the account's mailing address must be overridden.</p> <p><b>Note:</b></p> <p>By default, the account's main customer's address appears in the following fields - Address 1, Address 2, Address 3, Address 4, City, Country, State, and Postal. You can override the address in these fields, if required.</p> <p>The system maintains a log when you edit the address in a refund request. A log is created in the following format:</p> <pre>Address is changed; Old ' Value: &lt;OLD ADDRESS&gt;; New ' Value: &lt;NEW ADDRESS&gt;</pre>	No
Address 1	Used to specify the house number and apartment name.	No
Address 2	Used to specify the street name.	No
Address 3	Used to specify any landmark, if available.	No
Address 4	Used to specify the village, town, or city name.	No
City	Used to specify the city name.	No
Country	Used to specify the country name.	No
State	Used to specify the state name.	No
Postal	Used to specify the postal or zip code.	No
Comments	Used to specify additional information about the refund request.	No

In addition, this screen contains the following two sections:

- **Characteristics** - Used to define the characteristics for the refund request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the refund request.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the refund request.

- 4. Modify the details of the refund request, if required.
- 5. Define, edit, or remove characteristics of the refund request, if required.
- 6. Click **Save**.  
The changes made to the refund request are saved.

**Editing the Refund Details**

**Prerequisites**

To edit the refund details, you should have:

- Adjustment types with A/P request type defined in the application

**Procedure**

To edit the refund details:

- 1. Search for the refund request in the **Refund/Write Off Request** screen.
- 2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose bill line item details you want to edit.  
The **Refund Request** screen appears. You can edit the bill line items by either of the following ways:

If...	Then
Select the bill whose details you want to edit in the <b>Refund Details</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.	The <b>Edit Request Details</b> screen appears.
In the <b>Refund Details</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items details you want to edit.	The <b>Bill Line Items</b> zone appears.
	<b>Note:</b> This zone appears when the Entity Type is <b>Bill</b> .
	<b>a.</b> Select the bill line item whose details you want to edit in the <b>Bill Line Items</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.  The <b>Edit Request Details</b> screen appears.

**Note:** A bill line item from the refund request can be edited when the refund request is in the **Draft** status.

The **Edit Request Details** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request ID	Displays the refund request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable
Adjustment Type	Indicates the adjustment type of the refund request type.  You can search for an adjustment type by clicking the <b>Search</b> (🔍) icon corresponding to the field.	No

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are <ul style="list-style-type: none"><li>Adjustments</li><li>Bill</li><li>Bill Segment</li><li>Payment Event</li><li>Payment</li></ul>
Entity ID	Displays the entity ID.
Entity Amount	Displays the entity amount.
Currency	Displays the currency in which the entity was created.
Request Amount	Displays the amount that must be refunded.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.

Column Name	Column Description
	<b>Note:</b> You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the field.
Bill ID	Displays the bill ID.

In addition to the above columns, the screen has following button:

Button Name	Button Description
Override	Used to override an adjustment type of the refund request.

**Note:**  
In the **Bill Line Items** zone, click the **Broadcast** (📡) icon corresponding to the bill line item which you want to delete  
Pagination is used to display limited number of records in the **Search Results** section. By default, 10 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** (◀◀), **Previous** (◀), **Next** (▶), and **Last** (▶▶) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.  
The values appear in the **Page Limit** list when you define values for the **PAGE\_NUMBER** lookup field.

3. Modify the details of the bill line items.
4. Click **Save**.  
The changes made to the refund bill line items are saved.

## Submitting a Refund Request

**Prerequisites**

To submit a refund request, you should have:

- Payment events, payments, or credit bill line items added in the refund request

**Procedure**

To submit a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request that you want to submit.  
The **Refund Request** screen appears.
3. Click the **Submit** button in the **Refund Request** zone.

The system behaves in the following manner:

If...	Then...
The <b>Approval Required</b> and <b>Hierarchical Approval</b> check boxes are selected in the refund request type using which the refund request is created	A To Do of the <b>C1-REFRQ</b> To Do type is created and sent to the approver at the first level in the approval hierarchy, and the status of the refund request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is selected, but the <b>Hierarchical Approval</b> check box is not selected in the refund request type using which the refund request is created	A To Do of the <b>C1-REFRQ</b> To Do type is created and sent to the approver at the hierarchy level where the total refund amount falls within the threshold limit. In addition, the status of the refund request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is not selected in the refund request type using which the refund request is created	The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to <b>Processed</b> .

If...	Then...
	<b>Note:</b> The refund adjustments are created in the <b>Frozen</b> status. If a match event is present for the credit bill line items (such as bill segments and adjustments) and for the payments which are matched against the excess credit contract, the existing match event is stamped on the refund adjustments and on the corresponding financial transactions. However, when a match event is not present for the payments which are matched against the suspense contract or if the match events does not exist, a new match event is created and stamped on the refund adjustments and on the corresponding financial transactions. If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b> . However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b> .
The total refund amount is less than minimum refund amount	The write up adjustment is created using the write up adjustment type specified in the refund request type. In addition, the status of the refund request is changed to <b>Processed</b> .
	<b>Note:</b> The write up adjustment is created in the <b>Frozen</b> status. If a match event is present for the credit bill line items (such as bill segments and adjustments) and for the payments which are matched against the excess credit contract, the existing match event is stamped on the write up adjustment and on the corresponding financial transaction. However, when a match event is not present for the payments which are matched against the suspense contract or if the match events does not exist, a new match event is created and stamped on the write up adjustment and on the corresponding financial transaction. If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b> . However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b> .
The total refund amount is less than the minimum threshold amount	The refund request is automatically approved by the system and refund adjustments are created using the specified adjustment types. In addition, the status of the refund request is changed to <b>Processed</b> .

If...	Then...
	<b>Note:</b> The refund adjustments are created in the <b>Frozen</b> status. If a match event is present for the credit bill line items (such as bill segments and adjustments) and for the payments which are matched against the excess credit contract, the existing match event is stamped on the refund adjustments and on the corresponding financial transactions. However, when a match event is not present for the payments which are matched against the suspense contract or if the match events does not exist, a new match event is created and stamped on the refund adjustments and on the corresponding financial transactions. If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b> . However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b> .

**Note:** The **Submit** button appears when the refund request is in the **Draft** status.

# Approving a Refund Request

You can view the number of refund requests which are pending for approval in the **Refund/Write Off Request** screen. The approver can review, and accordingly approve or reject the refund request based on the observations.

**Note:** The system will not allow you to approve or reject a refund request submitted by you.

**Procedure**

To approve a refund request:

1. Do either of the following:

If you want to...	Then...
<b>Approve a refund request through the Refund/Write Off Request screen</b>	<b>a.</b> Search for the refund request in the <b>Refund/Write Off Request</b> screen. <b>b.</b> In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the refund request which you want to review.
<b>Approve a refund request from the To Do List screen</b>	<b>a.</b> Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears. <b>b.</b> From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b> .

If you want to...	Then...
	<p>The <b>To Do Type for User Search</b> window appears.</p> <p>c. Enter <b>C1-REFRQ</b> in the <b>To Do Type</b> field.</p> <p>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p>f. Click the link in the <b>Message</b> column corresponding to the To Do of the refund request that you want to review.</p>

The **Refund Request** screen appears.

- 2. Review the refund request details.
- 3. Click the **Approve** button in the **Refund Request** zone.

The system behaves in the following manner:

If...	Then
The <b>Hierarchical Approval</b> check box is selected in the refund request type using which the refund request is created and the total refund amount is greater than the threshold amount specified at the next level in the approval hierarchy	A To Do of the <b>C1-REFRQ</b> To Do type is created and sent to the approver at the next level in the approval hierarchy, and the status of the refund request remains as <b>Approval In Progress</b> .
The <b>Hierarchical Approval</b> check box is selected in the refund request type using which the refund request is created and the total refund amount is less than the threshold amount specified at the next level in the approval hierarchy	The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to <b>Processed</b> .
	<b>Note:</b> The refund adjustments are created in the <b>Frozen</b> status. If a match event is present for the credit bill line items (such as bill segments and adjustments) and for the payments which are matched against the excess credit contract, the existing match event is stamped on the refund adjustments and on the corresponding financial transactions. However, when a match event is not present for the payments which are matched against the suspense contract or if the match events does not exist, a new match event is created and stamped on the refund adjustments and on the corresponding financial transactions. If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b> . However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b> .
The <b>Hierarchical Approval</b> check box is not selected in the refund request type using which the refund request is created	The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to <b>Processed</b> .

If...	Then
	<b>Note:</b> The refund adjustments are created in the <b>Frozen</b> status. If a match event is present for the credit bill line items (such as bill segments and adjustments) and for the payments which are matched against the excess credit contract, the existing match event is stamped on the refund adjustments and on the corresponding financial transactions. However, when a match event is not present for the payments which are matched against the suspense contract or if the match events does not exist, a new match event is created and stamped on the refund adjustments and on the corresponding financial transactions. If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b> . However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b> .

**Note:** The **Approve** button appears when:

- The refund request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the refund request.

## Rejecting a Refund Request

**Prerequisites**

To reject a refund request, you should have:

- Rejection reasons defined in the application

**Note:**

While rejecting a refund request, you need to specify the reason why you want to reject the refund request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-RefundReq** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a refund request submitted by you.

**Procedure**

To reject a refund request:

1. Do either of the following:

If you want to...	Then...
<b>Reject a refund request through the Refund/Write Off Request screen</b>	<div><b>a.</b> Search for the refund request in the <b>Refund/Write Off Request</b> screen.</div> <div><b>b.</b> In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column</div>

If you want to...	Then...
	corresponding to the refund request which you want to review.
Reject a refund request from the To Do List screen	<p>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</p> <p>The <b>To Do Type for User Search</b> window appears.</p> <p>c. Enter <b>C1-REFRQ</b> in the <b>To Do Type</b> field.</p> <p>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p>f. Click the link in the <b>Message</b> column corresponding to the To Do of the refund request that you want to review.</p>

The **Refund Request** screen appears.

- 2. Review the refund request details.
- 3. Click the **Reject** button in the **Refund Request** zone.

The **Reject Refund Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the refund request.	Yes
Comments	Used to specify additional information while rejecting the refund request.	No

**Note:** The **Reject** button appears when:

- The refund request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the refund request.

- 4. Select the rejection reason from the **Status Reason** list.
  - 5. Click **Save**.
- The status of the refund request is changed to **Rejected**.

## Viewing the Log of a Refund Request

### Procedure

To view the log of a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose log you want to view.

The **Refund Request** screen appears. It consists of the following tabs:

- **Main** - Displays information about the refund request. It contains the following zones:
  - **Refund Request** - Displays the details of the refund request.
  - **Refund Details** - Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Bill Line Items** - Displays the details of the bill which must be refunded.

**Note:**

This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Payments** - Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
  - **Log** - Lists the complete trail of actions performed on the refund request.
3. Click the **Log** tab.
  4. View the log of the refund request in the **Refund Request Log** zone.

**Note:** You can manually add a log entry for the refund request by clicking the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

## Adding a Log Entry for a Refund Request

### Procedure

To add a log entry for a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose log you want to edit.

The **Refund Request** screen appears. It consists of the following tabs:

- **Main** - Displays information about the refund request. It contains the following zones:
  - **Refund Request** - Displays the details of the refund request.
  - **Refund Details** - Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** - Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears when the refund request is in the **Draft** status.
  - **Log** - Lists the complete trail of actions performed on the refund request.
- 3. Click the **Log** tab.  
The **Log** tab appears.
- 4. Click the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the refund request.	Not applicable
Log Details	Used to specify additional comments for the refund request.	Yes

- 5. Enter the comments in the **Log Details** field.
- 6. Click **Save**.  
The log entry is added in the **Refund Request Log** zone.

## Voiding a Refund Request

There might be situations when incorrect refund request is processed in the system. In such case, the system provides you with an ability to void or cancel the refund request. However, note that you can void a refund request when the refund request is in the **Processed** status.

**Prerequisites**

To void a refund request, you should have:

- Void reasons defined in the application

**Note:** While voiding a refund request, you need to specify the reason why you want to void the refund request. You can select the appropriate void reason when you have defined the reasons for the **Voided** status of the **C1-RefundReq** business object in the **Status Reason** screen.

**Procedure**

To void a refund request:

- 1. Search for the refund request in the **Refund/Write Off Request** screen.
- 2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request that you want to void.  
The **Refund Request** screen appears.

3. Click the **Void** button in the **Refund Request** zone.

The **Void Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to void the refund request.	Yes
Comments	Used to specify additional information while voiding the refund request.	No

**Note:** The **Void** button appears when the refund request is in the **Processed** status.

4. Select the void reason from the **Status Reason** list.

5. Click **Save**.

The status of the refund request is changed to **Voided**.

**Note:** The **C1-REFVOID** algorithm cancels all the frozen adjustments created for the refund request which is in the **Processed** state.

# Write Off Request

Once you create a write off request, the **Write Off Request** screen allows you to:

- Edit and delete a write off request
- View the details of a write off request
- Submit a write off request for approval
- Approve or reject a write off request
- View the log of a write off request
- Add a log entry for a write off request
- Cancel a write off request

This screen consists of the following tabs:

- **Main** - Displays information about the write off request. It contains the following zones:
  - **Write Off Request** - Displays the details of the write off request.
  - **Write Off Details** - Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bill Line Items** - Displays the details of the bill which must be written off.

**Note:**  
This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Write Off Details** zone.

- **Bills** - Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:
    - **Search Bills** - Lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
    - **Bill Line Items** - Lists the debit and credit bill segments and adjustments of the bill.
- This tab appears when the write off request is in the **Draft** status.
- **Log** - Lists the complete trail of actions performed on the write off request.

## Write Off Request - Main

The **Main** tab displays information about the write off request. It contains the following zones:

- [Write Off Request](#) on page 2616
- [Write Off Details](#) on page 2618
- [Bill Line Items](#) on page 2619

## Write Off Request

The **Write Off Request** zone displays the details of the write off request. This zone contains the following sections:

- **Main** - This section provides basic information about the write off request. It contains the following fields:

Field Name	Field Description
Write Off Request Information	Displays information about the write off request.
Write Off Request Type	Indicates the write off request type using which the write off request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Refund/Write Off Request Type</b> screen appears where you can view the details of the write off request type.
Status	Indicates the status of the write off request. The valid values are: <ul style="list-style-type: none"><li>• Draft</li><li>• Approval In Progress</li><li>• Rejected</li><li>• Processed</li><li>• Cancelled</li></ul>
Status Reason	Indicates the reason why the write off request is rejected or cancelled.
	<b>Note:</b> This field appears when the write off request is in the <b>Rejected</b> or <b>Cancelled</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the rejected or cancelled reason.
Account Information	Indicates the account for which the write off request is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Comments	Displays additional information about the write off request.

Field Name	Field Description
Total Write Off Amount	Displays the total write off amount.

- **Characteristics** - Lists the characteristics defined for the write off request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the write off request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the write off request.
	<b>Note:</b> The <b>Edit</b> button appears when the write off request is in the <b>Draft</b> status.
Delete	Used to delete the write off request.
	<b>Note:</b> The <b>Delete</b> button appears when the write off request is in the <b>Draft</b> status.
Submit	Used to submit the write off request for approval.
	<b>Note:</b> The <b>Submit</b> button appears when the write off request is in the <b>Draft</b> status.
Approve	Used to approve the write off request.
	<b>Note:</b> The <b>Approve</b> button appears when: <ul style="list-style-type: none"> <li>• The write off request is in the <b>Approval In Progress</b> status.</li> <li>• A user with the approval To Do role is reviewing the write off request.</li> </ul>
Reject	Used to reject the write off request.
	<b>Note:</b> The <b>Reject</b> button appears when: <ul style="list-style-type: none"> <li>• The write off request is in the <b>Approval In Progress</b> status.</li> <li>• A user with the approval To Do role is reviewing the write off request.</li> </ul>
Cancel	Used to cancel the write off request.
	<b>Note:</b> The <b>Cancel</b> button appears when the write off request is in the <b>Processed</b> status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the write off request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.

Field Name	Field Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the write off request status is updated
Create Date/Time	Displays the date and time when the write off request is created.

## Write Off Details

The **Write Off Details** zone lists the debit bill line items (such as bill segments and adjustments) that you have added to the write off request. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the entity ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Indicates the currency in which the entity was created.
Entity Amount	Displays the entity amount.
Write Off Amount	Displays the amount that must be written off.  <b>Note:</b> By default, the amount which is eligible for write off appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the write off adjustment must be created.  <b>Note:</b> By default, the adjustment type specified in the write off request type appears in this column. You can change the adjustment type, if required, by editing the write off request.
Adjustment Information	Displays information about the write off adjustment.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment. The data appears in this column when the status of the write off request is <b>Processed</b> . The information string appears when an algorithm of the <b>C1-ADI-INFO</b> algorithm type is attached to the <b>Adjustment Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options - Framework</b> screen.

**Note:**  
On clicking the **Broadcast** (📡) icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Displays the currency in which the entity was created.
Entity Amount	Displays the bill segment or adjustment amount.
Request Amount	Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.
	<b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Adjustment Information	Displays information about the refund adjustment.

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Write Off Details** zone.

Related Topics

How to add a debit bill line item to the write off request	<a href="#">Adding a Debit Bill Line Item to the Write Off Request</a> on page 2627

## Write Off Request - Bills

The **Bills** tab allows you to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:

- [Search Bills](#) on page 2620
- [Bill Line Items](#) on page 2621

### Search Bills

The **Search Bills** zone lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a bill using the bill details. The valid values are: <ul style="list-style-type: none"><li>• Bill Details</li><li>• Bill and Price Item Details</li></ul>	Yes
	<b>Note:</b> By default, the <b>Bill Details</b> option is selected.	
Bill ID	Used to search a particular bill.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No
Price Item	Used to search bills which are created for a particular price item.	No
	<b>Note:</b> This field appears when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list. You can search for a price item by clicking the <b>search</b> (🔍) icon corresponding to the field.	

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Amount	Displays the total bill amount.

If you want to write off a bill with debit balance and all debit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All debit bill segments and adjustments of the bill are added in the **Write Off Details** zone on the **Main** tab. However, if you select a bill (with debit balance) which contains one or more credit line items or if you select a bill (with credit balance) which contains one or more debit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

**Related Topics**

For more information on...	See...
How to add a debit bill line item to the write off request	<a href="#">Adding a Debit Bill Line Item to the Write Off Request</a> on page 2627

**Bill Line Items**

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. If the entity is a bill segment, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the <b>Adjustment</b> screen appears with the details of the respective adjustment on clicking the link.
Entity Amount	Displays the bill segment or adjustment amount.
Eligible Amount	Displays the bill segment or adjustment amount which is eligible for write off. In other words, it means entity amount minus amount written off.
	<b>Note:</b> If the bill segment or adjustment has credit balance, the eligible amount for write off would be zero.
Amount Written Off	Displays the amount which is already written off to the account.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

You can select one or more debit bill segments or adjustments and click the **Add** button in this zone to add selected debit bill segments or adjustments to the write off request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (📡) icon corresponding to the bill in the **Search Bills** zone.

**Related Topics**

## Write Off Request - Log

The **Log** tab contains the following zone:

- [Write Off Request Log](#) on page 2622

### Write Off Request Log

The **Write Off Request Log** zone lists the complete trail of actions performed on the write off request. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the write off request.
Details	Displays the details about the action performed on the write off request.
User	Indicates the user who has performed the action on the write off request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the write off request.
Status Reason	Displays the status reason of action performed on the write off request.

**Note:** You can manually add a log entry for the write off request by clicking the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

The **Add Request Log** window appears. Enter **Log Details** and click **Save**. The write off request log is added.

## Creating a Write Off Request

**Prerequisites**

To create a write off request, you should have:

- Write off request types defined in the application

**Procedure**

To create a write off request:

1. Do either of the following:

If you want to...	Then...
Define a write off request from the Account Receivable Central screen	<p>a. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Account Receivable Central</b>.</p> <p>c. Search for the bill in the <b>Account Receivable Central</b> screen.</p> <p>d. In the <b>Search Results</b> section, select the required bill and then click <b>Write Off</b>.</p>
	<p><b>Note:</b> Only one bill at a time is allowed to select for <b>Write Off Request</b> from the <b>Account Receivable Central</b> screen.</p>
Define a write off request from the Write Off Request screen	<p>a. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>Accounting and Receivable</b> and then click <b>Refund/Write Off Request</b>.</p> <p>A sub-menu appears.</p> <p>c. Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.</p>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	Used to indicate the type of request (refund or write off) to be created.	Yes
	<p><b>Note:</b></p> <p>This field is pre-populated if the write off request is created from the <b>Account Receivable Central</b> screen.</p> <p>This field is editable if the write off request is created from the <b>Refund/Write Off Request</b> screen.</p> <p>This field appears read-only when you access the select <b>Request Type</b> screen from the <b>Payment Event Summary</b> screen.</p>	
Refund/Write Off Request Type	Used to indicate the request type using which you want to create the refund or write off request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b> .	
Account	Used to indicate the account for which you want to create the refund or write off request.	Yes
	<b>Note:</b> This field is pre-populated if the write off request is created from the <b>Account Receivable Central</b> screen. This field is editable if the write off request is created from the <b>Refund/Write Off Request</b> screen. You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the respective field. This field appears read-only when you access the select <b>Request Type</b> screen from the <b>Payment Event Summary</b> screen.	
Adjustment Level	Used to indicate the adjustment level for which you want to create the write off request.	No
	<b>Note:</b> It is a read-only field.	

**Tip:** Alternatively, you can access the **Select Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request** screen.

- 2. Select the required write off request type and account from the respective fields.
- 3. Click **Save**.

The write off request is defined and the status of the write off request is set to **Draft**. The **Write Off Request** screen appears with the details of the write off request. It contains the following tabs:

**Note:** The write off request can be created only for bill with outstanding amount greater than zero.

- **Main** - Displays information about the write off request. It contains the following zones:
    - **Write Off Request** - Displays the details of the write off request.
    - **Write Off Details** - Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bills** - Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
  - **Log** - Lists the complete trail of actions performed on the write off request.
- 4. Add debit bill line items that you want to write off.
  - 5. Edit the write off amount of each entity, if required.
  - 6. Define characteristics for the write off request, if required.

## Defining a Characteristic for a Write Off Request

### Prerequisites

To define a characteristic for a write off request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

### Procedure

To define a characteristic for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.  
The **Write Off Request** screen appears.
3. Click the **Edit** button in the **Write Off Request** zone.  
The **Edit Write Off Request** screen appears.

**Note:** The **Edit** button appears only when the write off request is in the **Draft** status.

4. Ensure that the **Characteristics** section is expanded when you are editing the write off request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the write off request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the write off request.

5. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (Q) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the write off request, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the write off request, click the **Delete** (■) icon corresponding to the characteristic.

## Adding a Debit Bill to the Write Off Request

**Prerequisites**

To add a debit bill to the write off request, you should have:

- Completed bills for the account with one or more debit line items

**Procedure**

To add a debit bill to the write off request:

1. Click the **Bills** tab in the **Write Off Request** screen.  
The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
<b>A bill has all debit line items and you want to add the debit bill to the write off request</b>	<b>a.</b> In the <b>Search Bills</b> zone, select the bills that you want to write off. <b>b.</b> Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.
	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.
<b>A bill has debit balance and one or more credit line items</b>	<b>a.</b> In the <b>Search Bills</b> zone, select the bills that you want to write off. <b>b.</b> Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.

If...	Then...
and you want to add the debit bill to the write off request	<b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.

4. Click **Add**.  
A message appears indicating that the selected bills are added to the write off request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

5. Click **OK**.  
Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

**Note:**  
Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.  
The system will not allow you to add a credit line item to the **Write Off Details** zone.

## Adding a Debit Bill Line Item to the Write Off Request

You can write off the debit bill line items, such as bill segments and adjustments, of the account. While adding a debit bill line item to the write off request, you can either:

- Directly add all debit line items of a bill to the write off request by adding the bill which has all bill segments and adjustments in debit
- Individually add a debit bill segment or adjustment of a bill (with one or more debit line items) to the write off request

**Prerequisites**

To add a debit bill line item to the write off request, you should have:

- Completed bills for the account with one or more debit line items

**Procedure**

To add a debit bill line item to the write off request:

1. Click the **Bills** tab in the **Write Off Request** screen.  
The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

3. Do any of the following:

If...	Then...
A bill has all debit line items and you want to add a particular debit bill line item to the write off request	<p>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.</p> <p>The <b>Bill Line Items</b> zone appears.</p> <p>b. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</p>
A bill has debit balance and one or more credit line items	<p>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.</p> <p>The <b>Bill Line Items</b> zone appears.</p> <p>b. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</p>
A bill has credit balance and one or more debit line items	<p>a. In the <b>Search Bills</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items you want to view.</p> <p>The <b>Bill Line Items</b> zone appears.</p> <p>b. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</p>

4. Click **Add**.  
A message appears indicating that the selected bill segments or adjustments are added to the write off request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

5. Click **OK**.  
Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

**Note:**  
Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.  
The system will not allow you to add a credit line item to the **Write Off Details** zone.

# Editing a Write Off Request

**Prerequisites**

To edit a write off request, you should have:

- Adjustment types without A/P request type defined in the application

**Procedure**

To edit a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.  
The **Write Off Request** screen appears.
3. Click the **Edit** button in the **Write Off Request** zone.

The **Edit Write Off Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Write Off Request Information	Displays information about the write off request.	Not applicable
Account Information	Indicates the account for which the write off request is created.	Not applicable
Comments	Used to specify additional information about the write off request.	No

In addition, this screen contains the following two sections:

- **Characteristics** - Used to define the characteristics for the write off request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the write off request.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the write off request.

4. Modify the details of the write off request, if required.
5. Define, edit, or remove characteristics of the write off request, if required.
6. Click **Save**.  
The changes made to the write off request are saved.

## Editing the Write Off Details

### Prerequisites

To edit the write off details, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit the write off details:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose bill line item details you want to edit.  
The **Write Off Request** screen appears. You can edit the bill line items of the write off request by using either of the following ways:

If...	Then...
Select the bill whose details you want to edit in the <b>Write Off Details</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.	The <b>Edit Request Details</b> screen appears.
In the <b>Write Off Details</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the bill whose line items details you want to edit.	The <b>Bill Line Items</b> zone appears.
	<b>Note:</b> This zone appears when the Entity Type is <b>Bill</b> .
	<b>a.</b> Select the bill line item whose details you want to edit in the <b>Bill Line Items</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.  The <b>Edit Request Details</b> screen appears.

**Note:** A bill line item from the write off request can be edited when the write off request is in the **Draft** status.

The **Edit Request Details** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request ID	Displays the write off request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable
Adjustment Type	Indicates the adjustment type of the write off request type.	No

Field Name	Field Description	Mandatory (Yes or No)
	You can search for an adjustment type by clicking the <b>Search</b> (🔍) icon corresponding to the field.	

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are <ul style="list-style-type: none"><li>Adjustments</li><li>Bill</li><li>Bill Segment</li><li>Payment Event</li><li>Payment</li></ul>
Entity ID	Displays the entity ID.
Entity Amount	Displays the entity amount.
Currency	Displays the currency in which the entity was created.
Request Amount	Displays the amount that must be write off.
Adjustment Type	Indicates the adjustment type using which the write off adjustment must be created.  <b>Note:</b> You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the field.
Bill ID	Displays the bill ID.

In addition to the above columns, the screen has following button:

Button Name	Button Description
Override	Used to override an adjustment type of the write off request.

**Note:**  
Pagination is used to display limited number of records in the **Search Results** section. By default, 10 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** (⏪), **Previous** (⏴), **Next** (⏵), and **Last** (⏩) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.  
The values appear in the **Page Limit** list when you define values for the **PAGE\_NUMBER** lookup field.

3. Modify the details of the bill line items.
4. Click **Save**.  
The changes made to the write off bill line items are saved.

## Submitting a Write Off Request

**Prerequisites**

To submit a write off request, you should have:

- Debit bill line items added in the write off request

**Procedure**

To submit a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.

- 2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request that you want to submit.  
The **Write Off Request** screen appears.
- 3. Click the **Submit** button in the **Write Off Request** zone.

The system behaves in the following manner:

If...	Then
The <b>Approval Required</b> and <b>Hierarchical Approval</b> check boxes are selected in the write off request type using which the write off request is created	A To Do of the <b>C1-WOREQ</b> To Do type is created and sent to the approver at the first level in the approval hierarchy, and the status of the write off request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is selected, but the <b>Hierarchical Approval</b> check box is not selected in the write off request type using which the write off request is created	A To Do of the <b>C1-WOREQ</b> To Do type is created and sent to the approver at the hierarchy level where the total write off amount falls within the threshold limit. In addition, the status of the write off request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is not selected in the write off request type using which the write off request is created	The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b> .
	<b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b> . However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b> .
The total write off amount is less than the minimum threshold amount	The write off request is automatically approved by the system and write off adjustments are created using the specified adjustment types. In addition, the status of the write off request is changed to <b>Processed</b> .
	<b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b> . However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b> .

**Note:** The **Submit** button appears when the write off request is in the **Draft** status.

## Approving a Write Off Request

You can view the number of write off requests which are pending for approval in the **Refund/Write Off Request** screen. The approver can review, and accordingly approve or reject the write off request based on the observations.

**Note:** The system will not allow you to approve or reject a write off request submitted by you.

### Procedure

To approve a write off request:

1. Do either of the following:

If you want to...	Then...
Approve a write off request through the Refund/Write Off Request screen	<p>a. Search for the write off request in the <b>Refund/Write Off Request</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the write off request which you want to review.</p>
Approve a write off request from the To Do List screen	<p>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar.</p> <p>A list appears.</p> <p>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</p> <p>The <b>To Do Type for User Search</b> window appears.</p> <p>c. Enter <b>C1-WOREQ</b> in the <b>To Do Type</b> field.</p> <p>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</p> <p>The <b>To Do List</b> screen appears.</p> <p>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</p> <p>f. Click the link in the <b>Message</b> column corresponding to the To Do of the write off request that you want to review.</p>

The **Write Off Request** screen appears.

2. Review the write off request details.
3. Click the **Approve** button in the **Write Off Request** zone.

The system behaves in the following manner:

If...	Then...
The <b>Hierarchical Approval</b> check box is selected in the write off request type using which the write off request is created and the total write off amount is greater than the threshold amount specified at the next level in the approval hierarchy	A To Do of the <b>C1-WOREQ</b> To Do type is created and sent to the approver at the next level in the approval hierarchy, and the status of the write off request remains as <b>Approval In Progress</b> .

If...	Then...
The <b>Hierarchical Approval</b> check box is selected in the write off request type using which the write off request is created and the total write off amount is less than the threshold amount specified at the next level in the approval hierarchy	The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b> .
	<b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b> . However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b> .
The <b>Hierarchical Approval</b> check box is not selected in the write off request type using which the write off request is created	The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b> .
	<b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b> . However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b> .

**Note:** The **Approve** button appears when:

- The write off request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the write off request.

## Rejecting a Write Off Request

**Prerequisites**

To reject a write off request, you should have:

- Rejection reasons defined in the application

**Note:**

While rejecting a write off request, you need to specify the reason why you want to reject the write off request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-WORequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a write off request submitted by you.

**Procedure**

To reject a write off request:

1. Do either of the following:

If you want to...	Then...
Reject a write off request through the Refund/Write Off Request screen	<div><div>a. Search for the write off request in the <b>Refund/Write Off Request</b> screen.</div><div>b. In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the write off request which you want to review.</div></div>
Reject a write off request from the To Do List screen	<div><div>a. Click the <b>Menu</b> link in the <b>Application</b> toolbar.<div>A list appears.</div></div><div>b. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.<div>The <b>To Do Type for User Search</b> window appears.</div></div><div>c. Enter <b>C1-WOREQ</b> in the <b>To Do Type</b> field.</div><div>d. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.<div>The <b>To Do List</b> screen appears.</div></div><div>e. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</div><div>f. Click the link in the <b>Message</b> column corresponding to the To Do of the write off request that you want to review.</div></div>

The **Write Off Request** screen appears.

2. Review the write off request details.
3. Click the **Reject** button in the **Write Off Request** zone.

The **Reject Write Off Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the write off request.	Yes
Comments	Used to specify additional information while rejecting the write off request.	No

**Note:** The **Reject** button appears when:

- The write off request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the write off request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.  
The status of the write off request is changed to **Rejected**.

## Viewing the Log of a Write Off Request

### Procedure

To view the log of a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose log you want to view.

The **Write Off Request** screen appears. It consists of the following tabs:

- **Main** - Displays information about the write off request. It contains the following zones:
  - **Write Off Request** - Displays the details of the write off request.
  - **Write Off Details** - Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bill Line Items** - Displays the details of the bill which must be written off.

**Note:**

This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Write Off Details** zone.

- **Bills** - Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
  - **Log** - Lists the complete trail of actions performed on the write off request.
3. Click the **Log** tab
  4. View the log of the write off request in the **Write Off Request Log** zone.

**Note:** You can manually add a log entry for the write off request by clicking the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

## Adding a Log Entry for a Write Off Request

### Procedure

To add a log entry for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose log you want to edit.

The **Write Off Request** screen appears. It consists of the following tabs:

- **Main** - Displays information about the write off request. It contains the following zones:
  - **Write Off Request** - Displays the details of the write off request.
  - **Write Off Details** - Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bills** - Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears when the write off request is in the **Draft** status.
  - **Log** - Lists the complete trail of actions performed on the write off request.
- 3. Click the **Log** tab.  
The **Log** tab appears.
- 4. Click the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the write off request.	Not applicable
Log Details	Used to specify additional comments for the write off request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.  
The log entry is added in the **Write Off Request Log** zone.

## Cancelling a Write Off Request

There might be situations when incorrect write off request is processed in the system. In such case, the system provides you with an ability to cancel the write off request. However, note that you can cancel a write off request when the write off request is in the **Processed** status.

**Prerequisites**

To cancel a write off request, you should have:

- Cancel reasons defined in the application

**Note:** While cancelling a write off request, you need to specify the reason why you want to cancel the write off request. You can select the appropriate cancel reason when you have defined the reasons for the **Cancelled** status of the **C1-WORequest** business object in the **Status Reason** screen.

**Procedure**

To cancel a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.

2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request that you want to cancel.  
The **Write Off Request** screen appears.
3. Click the **Cancel** button in the **Write Off Request** zone.

The **Cancel Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to cancel the write off request.	Yes
Comments	Used to specify additional information while cancelling the write off request.	No

**Note:** The **Cancel** button appears when the write off request is in the **Processed** status.

4. Select the cancel reason from the **Status Reason** list.
5. Click **Save**.  
The status of the write off request is changed to **Cancelled**.

**Note:** The **C1-WOCANCEL** algorithm cancels all the frozen adjustments created for the write off request which is in the **Processed** state.

Oracle Revenue Management and Billing enables you to create a deal for an existing customer, account, or prospect person. A deal facilitates you to simulate the proposed pricing on the proposed commitments, and thereby analyze the cost, revenue, and profitability of the deal. The system provides different ways in which you can simulate the pricing for an existing customer, account, or prospect person. You can use the following simulation types while creating a deal:

- **Customer** - This simulation type can be used while creating a deal for an existing customer or a prospect person. If you use this simulation type for an existing customer, the system does the following:
  - Copies the customer, all its accounts, and the customer hierarchy (i.e. its child persons and child persons' accounts), and creates the corresponding prospect persons and accounts in the system
  - Copies the price list assignments and price assignments of the customer, accounts, child persons and child persons' accounts, and assigns the price lists and pricing to the respective prospect persons and accounts in the **Proposed** status
  - Copies the product enrollments of the customer's and child persons' accounts, and enrolls the respective prospect accounts for the products in the **Proposed** status
  - Copies the commitments from the SQL-based billable charges of the customer's and child persons' accounts (based on the deal frequency and usage period), and accordingly adds proposed commitments for the respective prospect accounts

However, if you use this simulation type for a prospect person, you need to manually:

- Assign a price list and pricing to the prospect person, its accounts, and to its hierarchy
- Enroll the prospect account for a product
- Add commitments for the prospect account
- **Account** - This simulation type can be used while creating a deal for an existing account. If you use this simulation type, the system does the following:
  - Copies the account and creates the corresponding prospect account in the system
  - Copies the price list assignments and price assignments of the account and assigns the price lists and pricing to the respective prospect account in the **Proposed** status
  - Copies the product enrollments of the account, and enrolls the respective prospect account for the products in the **Proposed** status

- Copies the commitments from the SQI-based billable charges of the account (based on the deal frequency and usage period), and accordingly adds proposed commitments for the respective prospect account
- **Deal** - This simulation type can be used while creating a deal for an existing customer or a prospect person. If you use this simulation type for an existing customer, the system does the following:

- Copies the customer and creates the corresponding prospect customer in the system
- Copies the price list assignments and price assignments of the customer, and assigns the price lists and pricing to the respective prospect person in the **Proposed** status
- Copies the commitments from the SQI-based billable charges of the customer's accounts (based on the deal frequency and usage period), and accordingly adds the rolled up proposed commitments for the respective prospect person

However, if you use this simulation type for a prospect person, you need to manually:

- Assign a price list and pricing to the prospect person
- Add commitments for the prospect person

For more information about different stages involved in the deal lifecycle, see [Different Stages in Deal Lifecycle](#) on page 2677.

# Price Item Status Transition in a Deal

The following figure graphically indicates how a price item moves from one status to another in a deal lifecycle. Since the price item status transition flow spans across multiple pages, we have split the flow into four parts - Part 1a, Part 1b, Part 1c, and Part 1d.

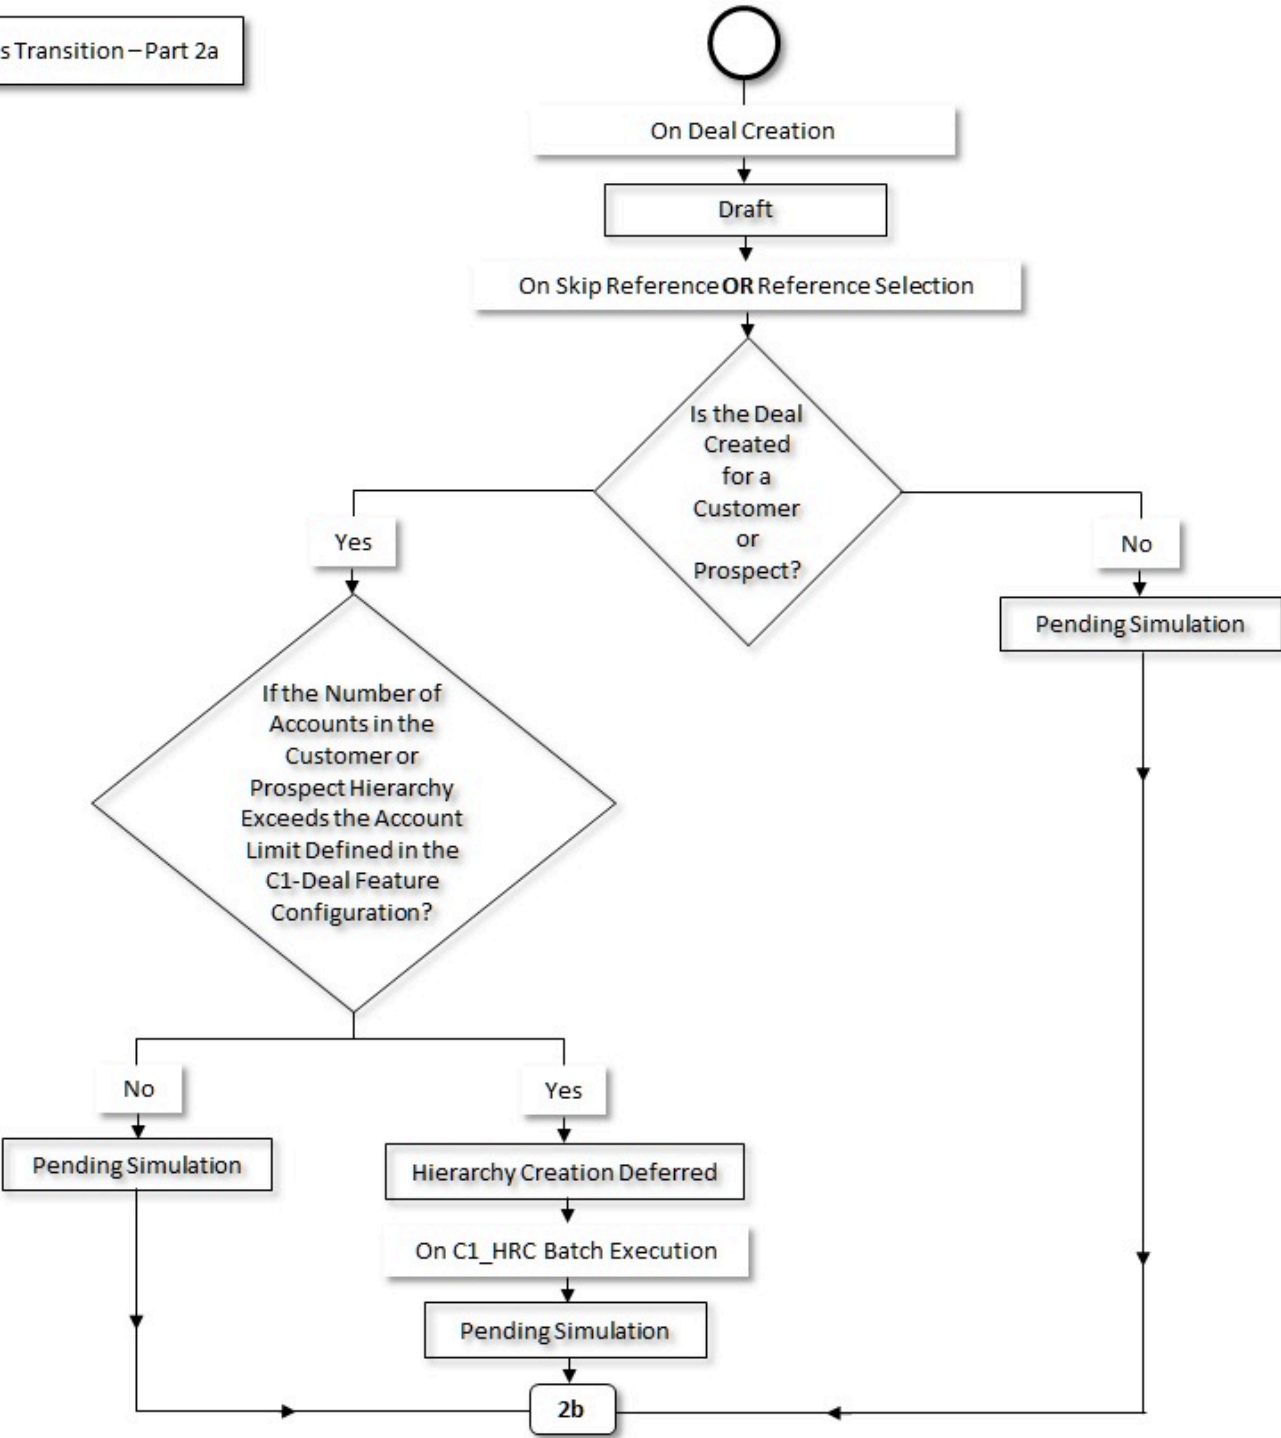

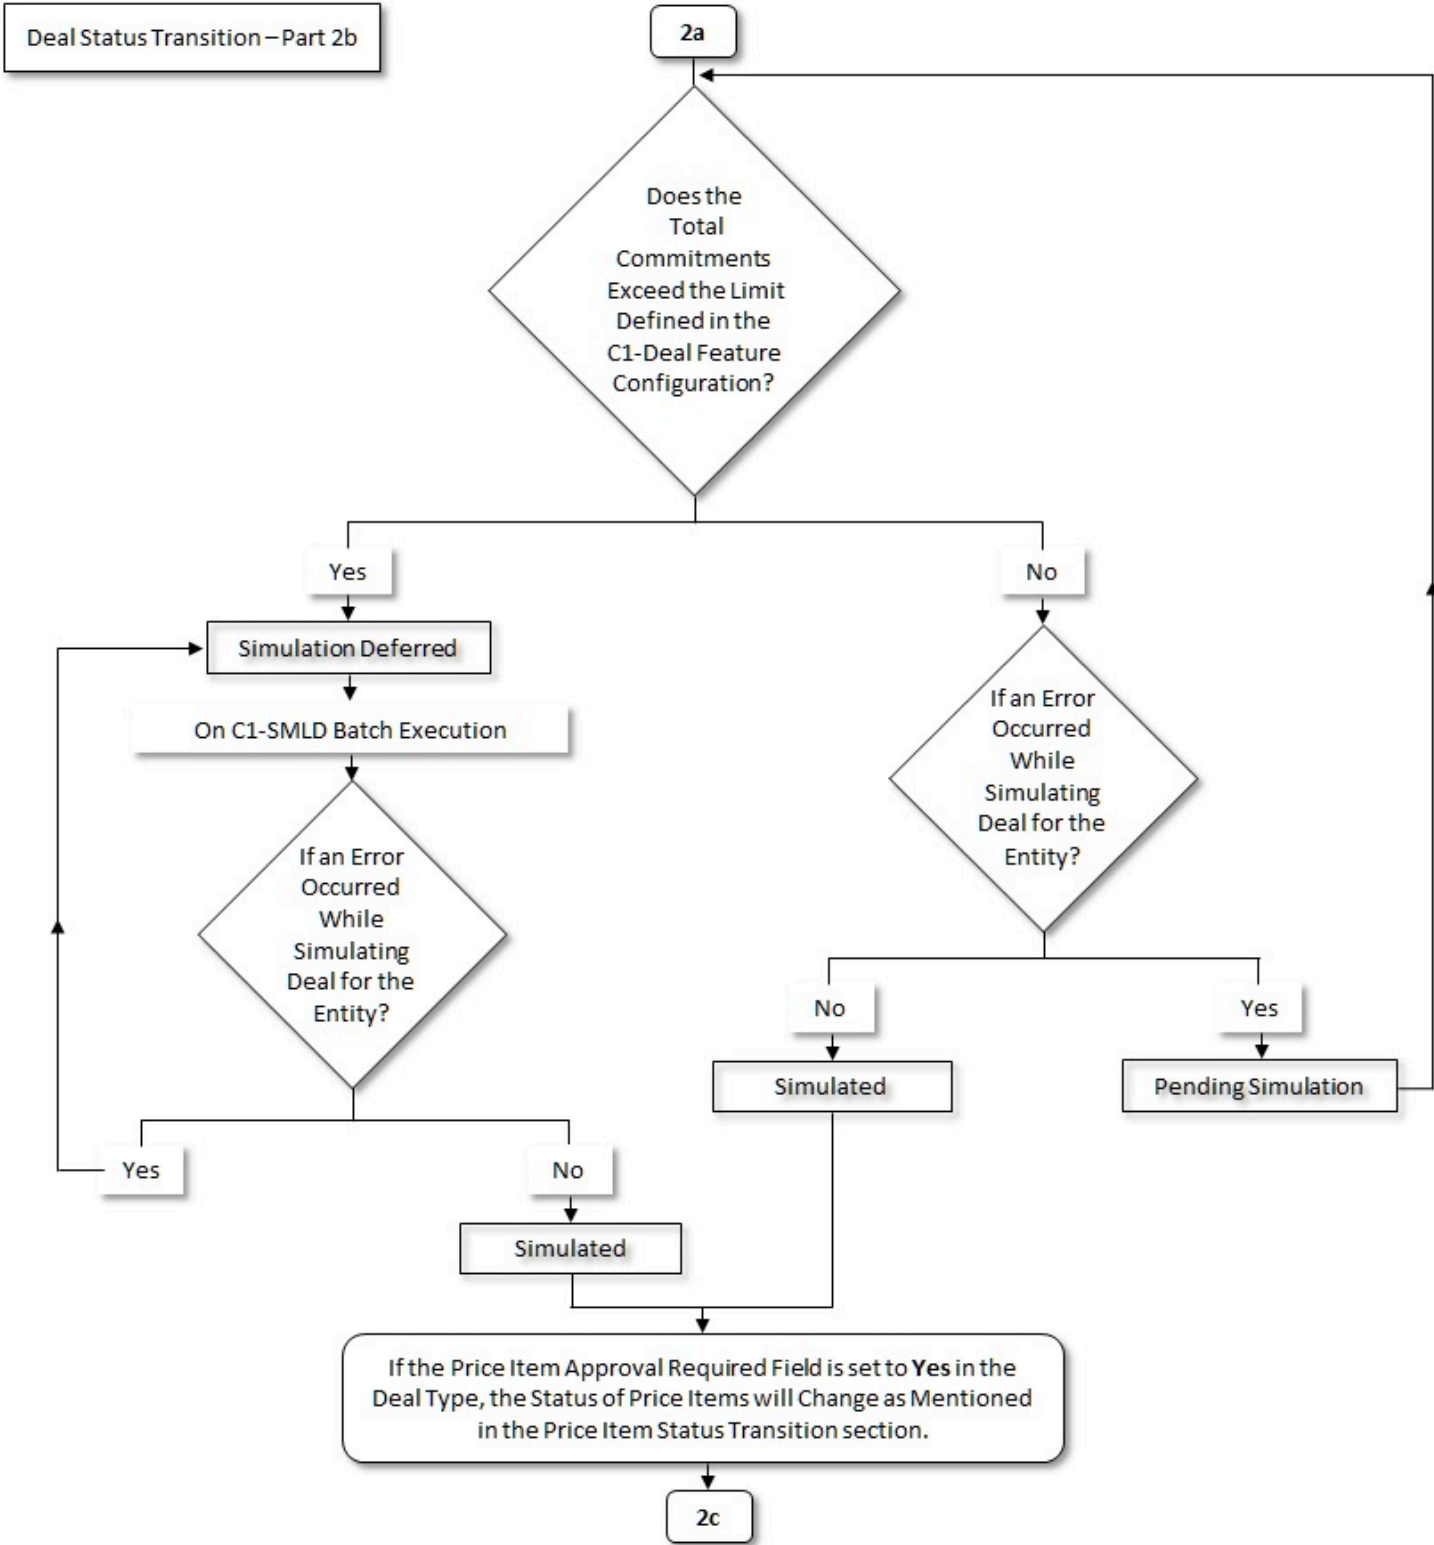

## Deal Status Transition

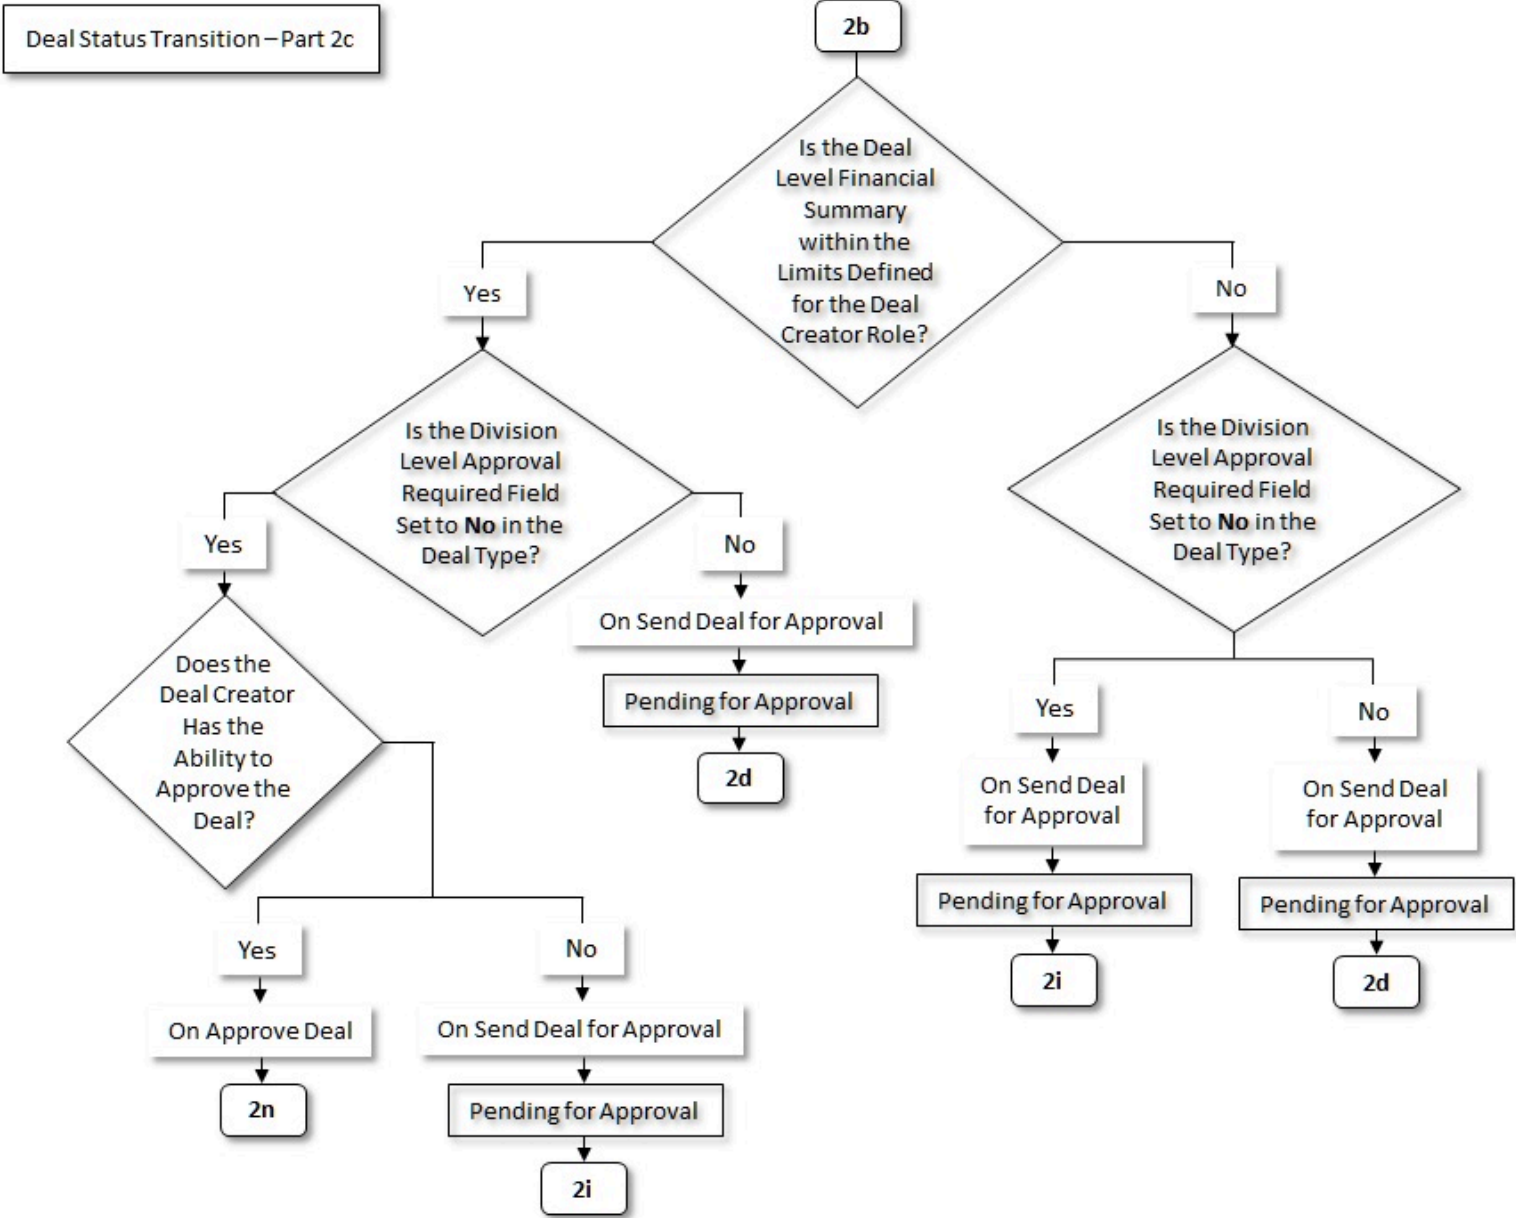

The following figure graphically indicates how a deal moves from one status to another in its lifecycle. Since the deal status transition flow spans across multiple pages, we have split the flow into multiple parts - Part 2a, Part 2b, Part 2c, Part 2d, Part 2e, Part 2f, Part 2g, Part 2h, Part 2i, Part 2j, Part 2k, Part 2l, Part 2m, and Part 2n.

Deal Status Transition – Part 2a

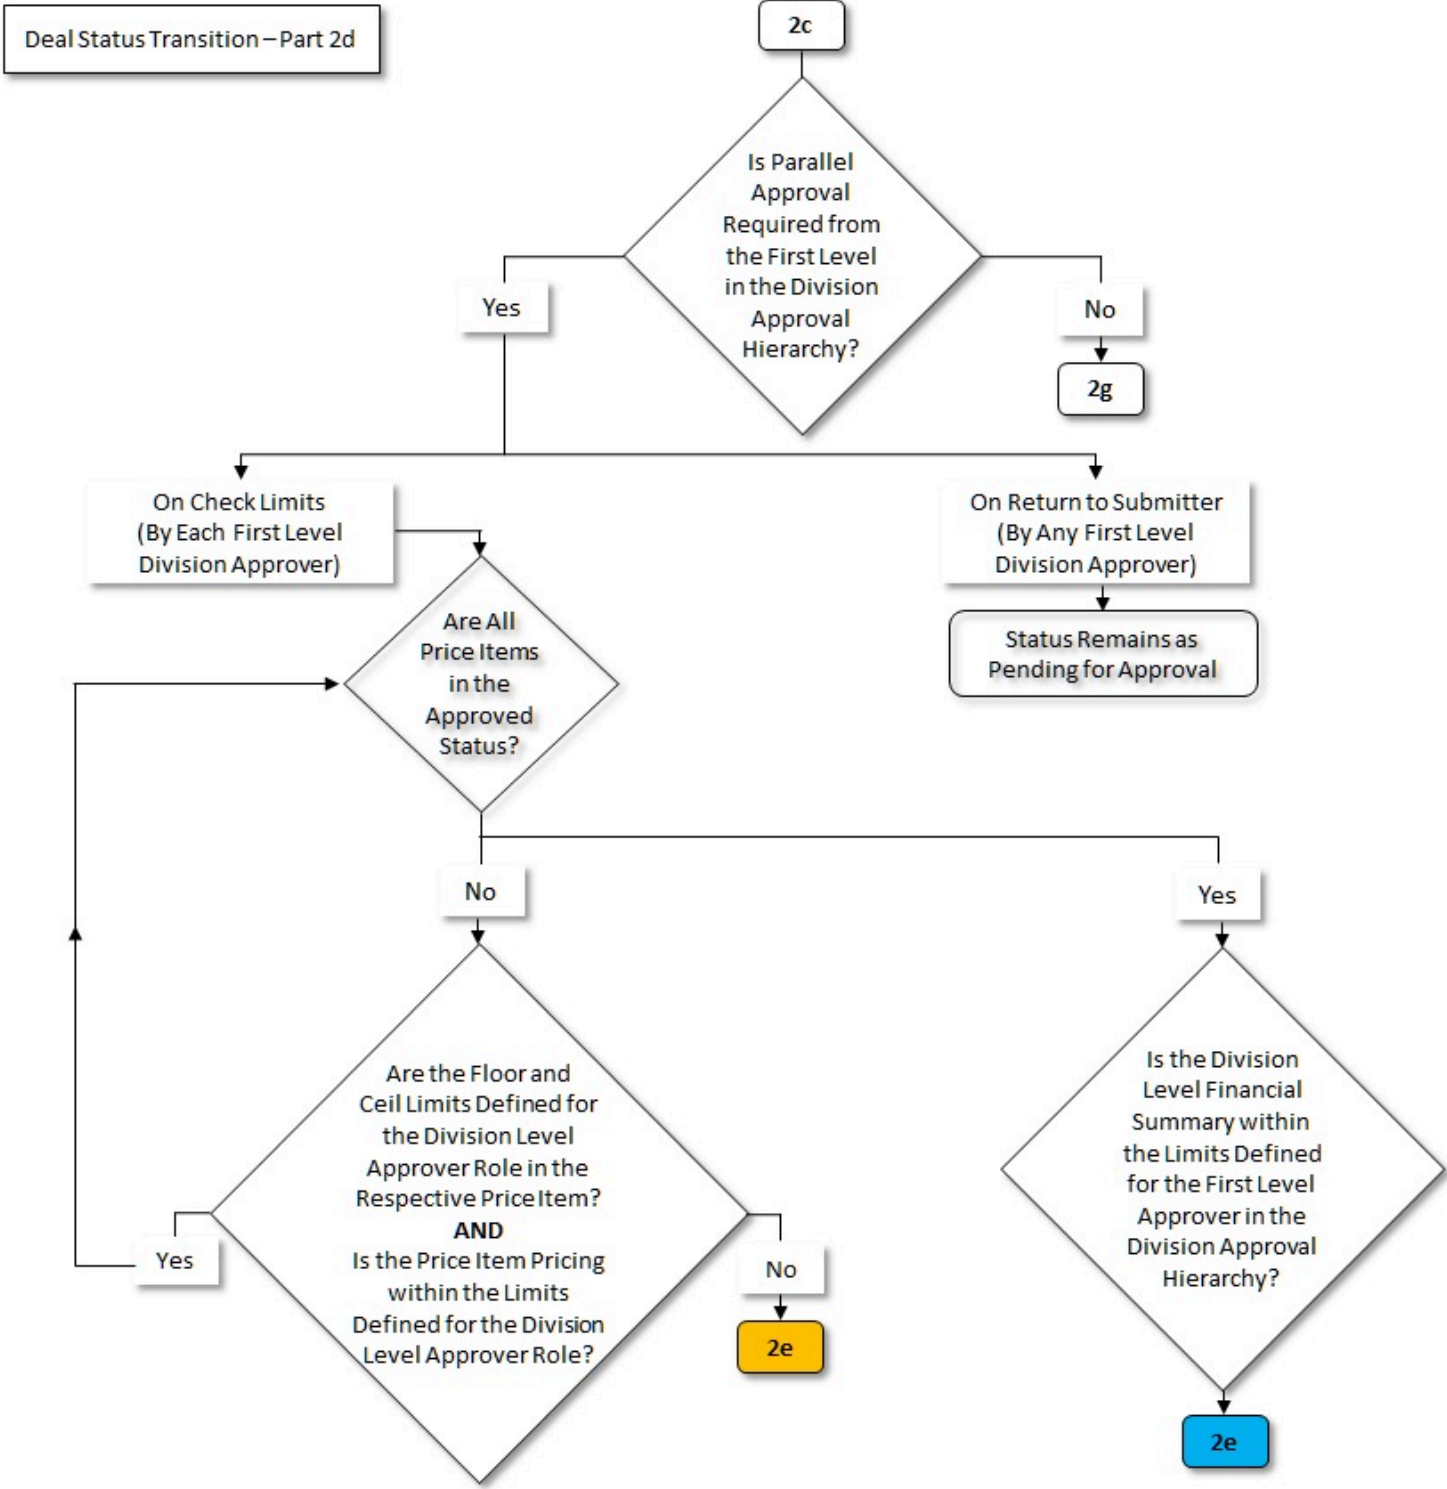

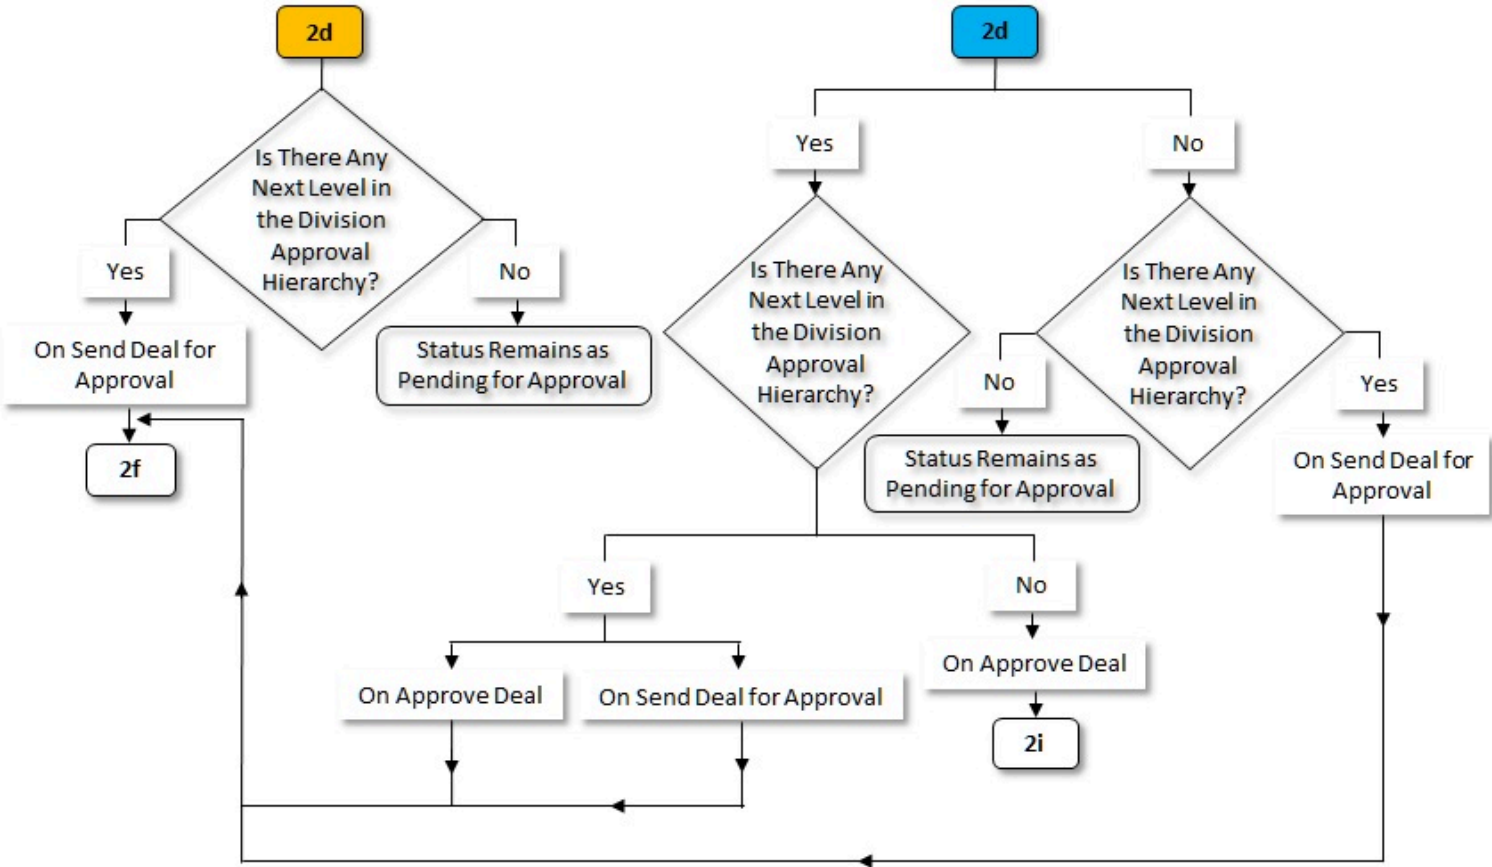

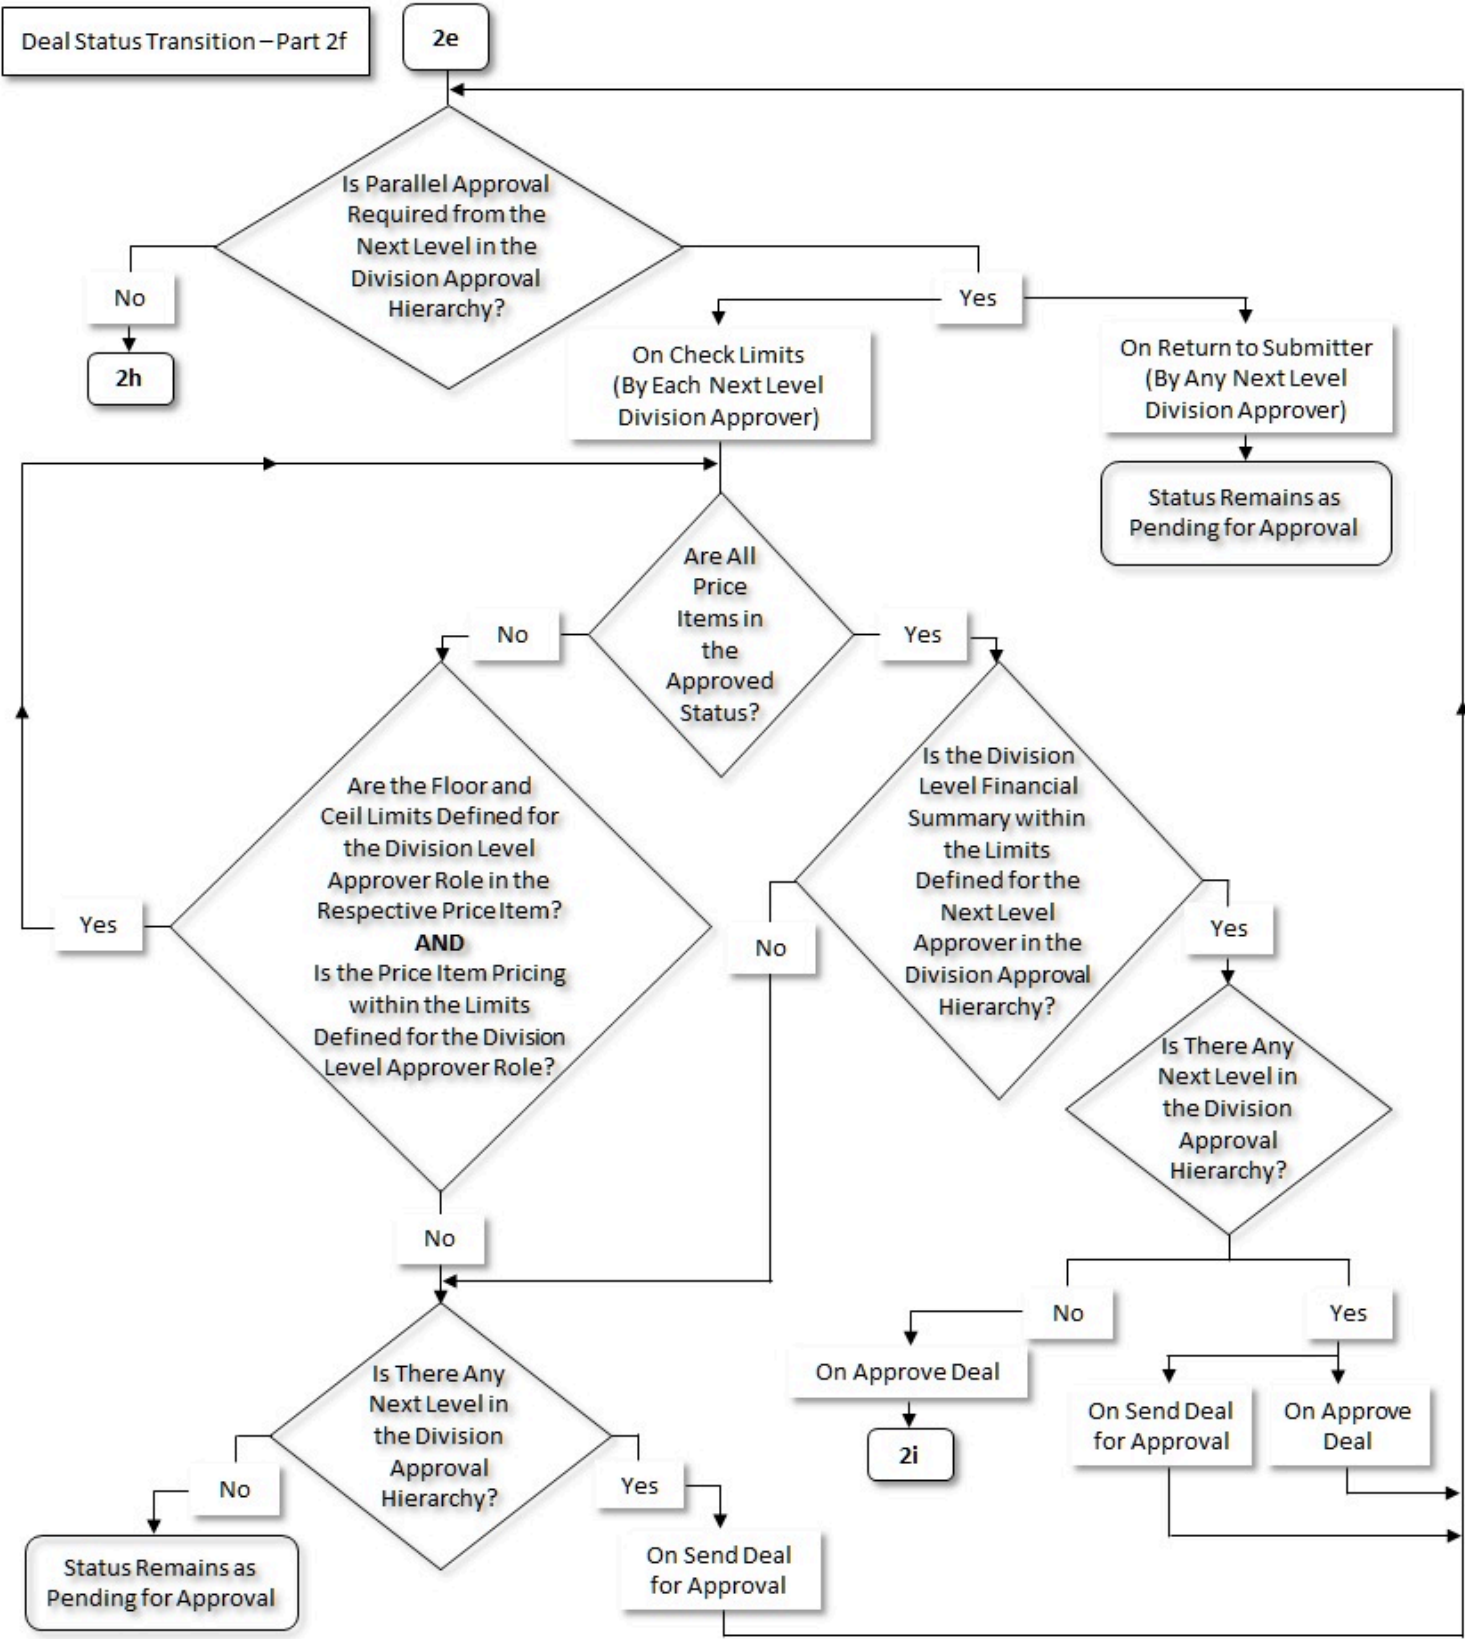

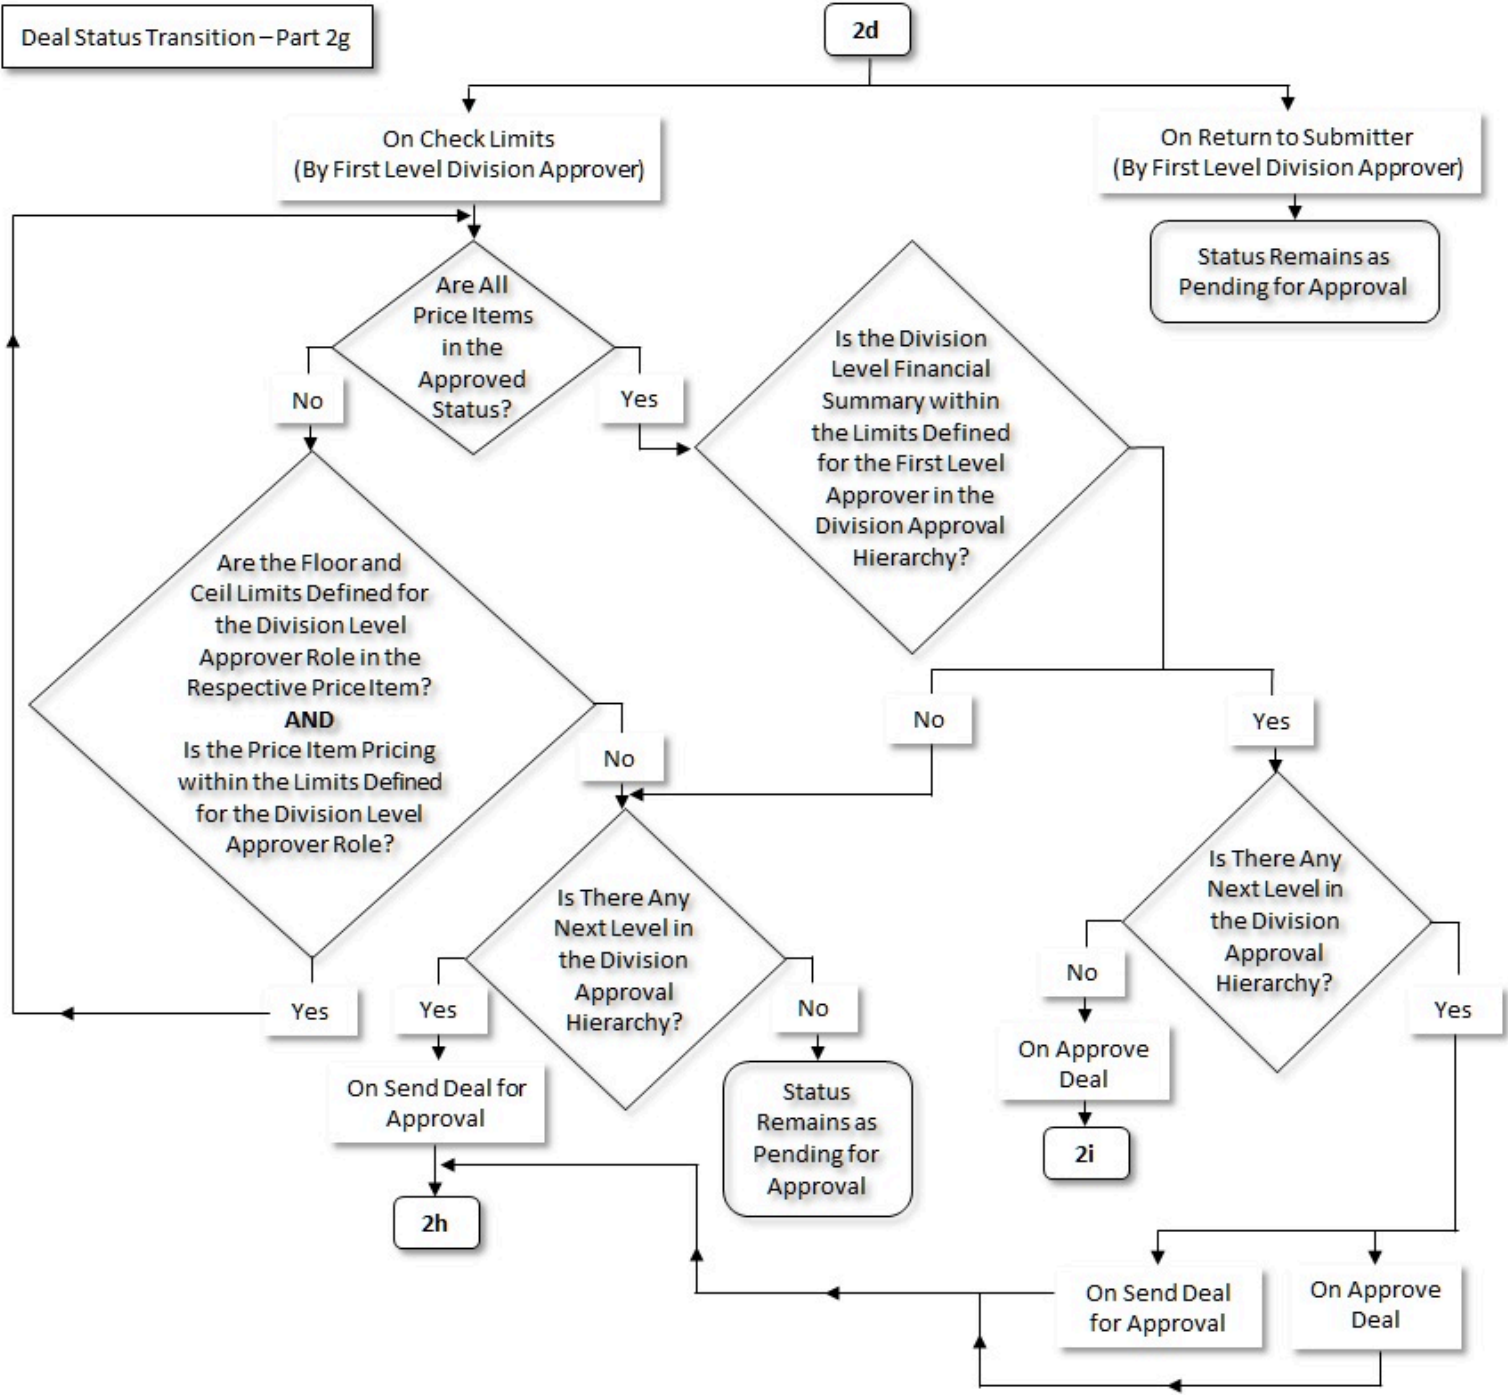

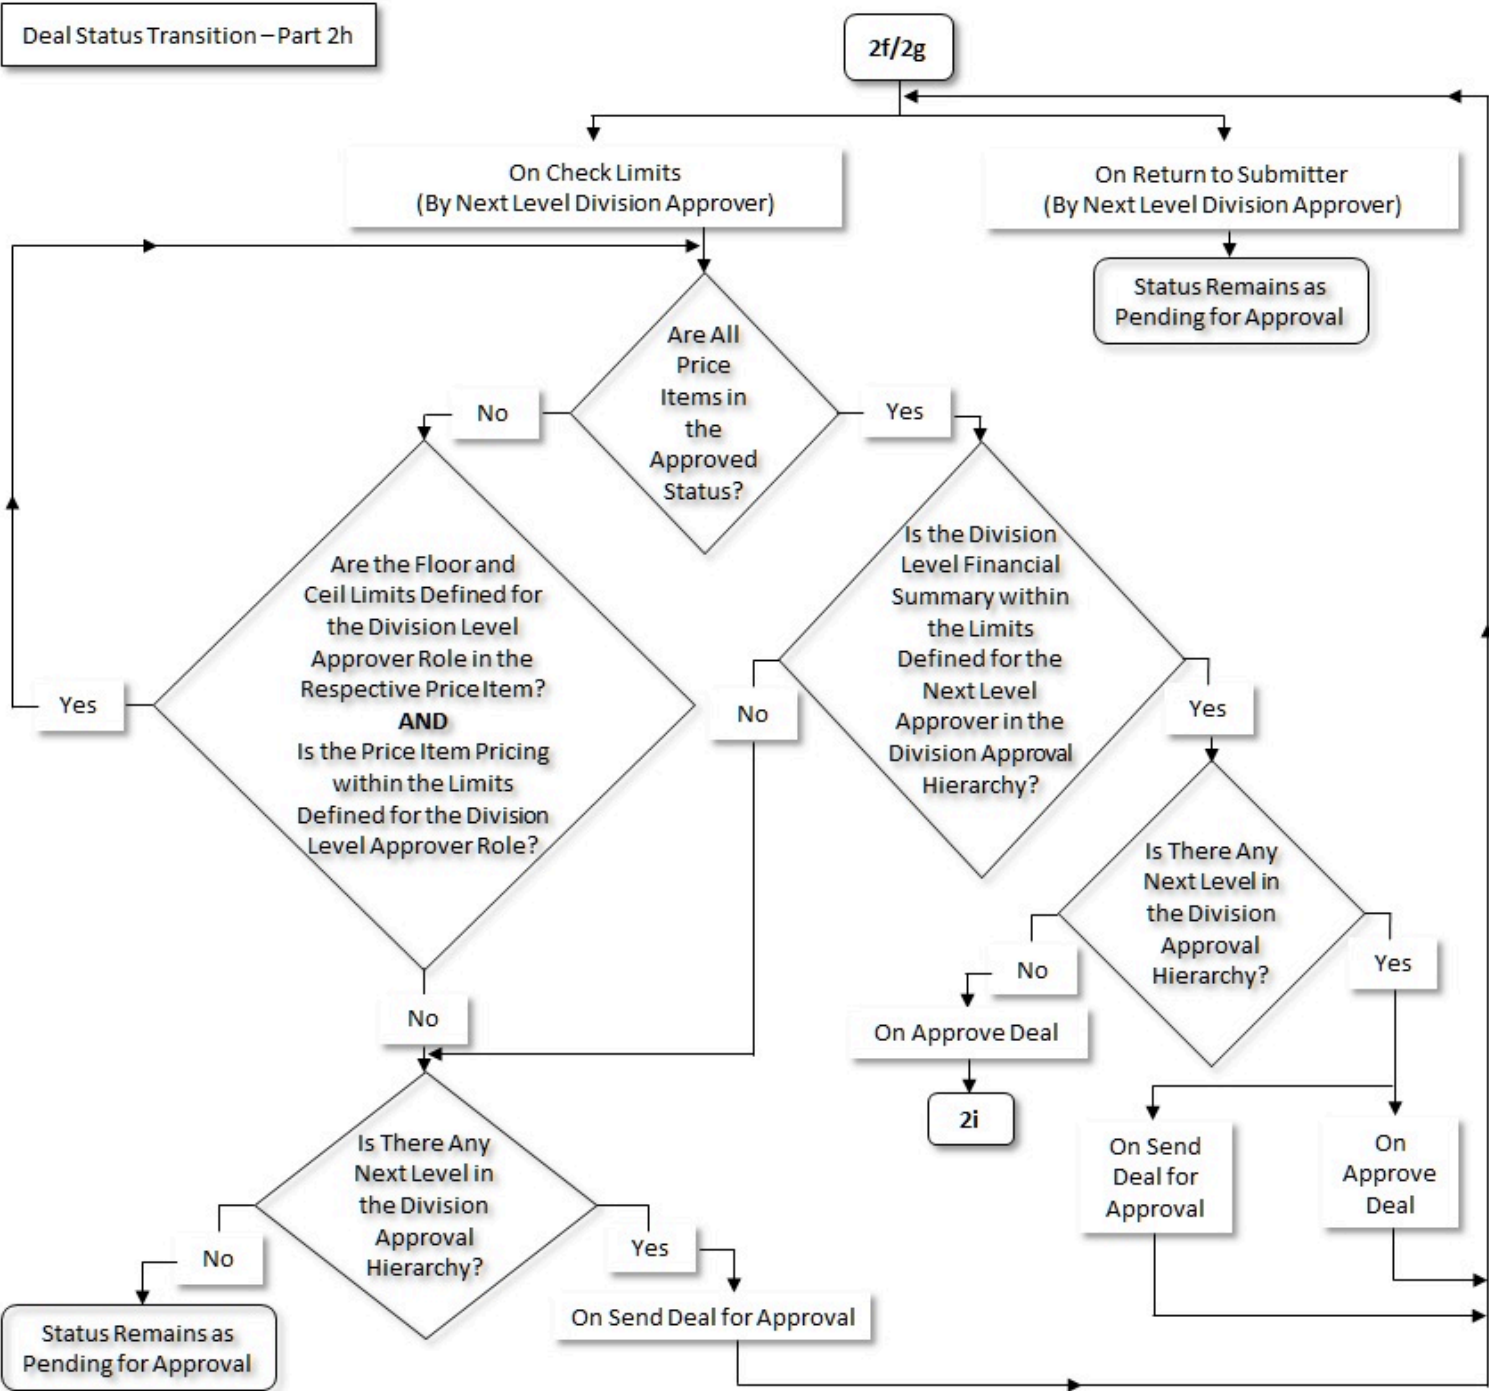

Deal Status Transition – Part 2e

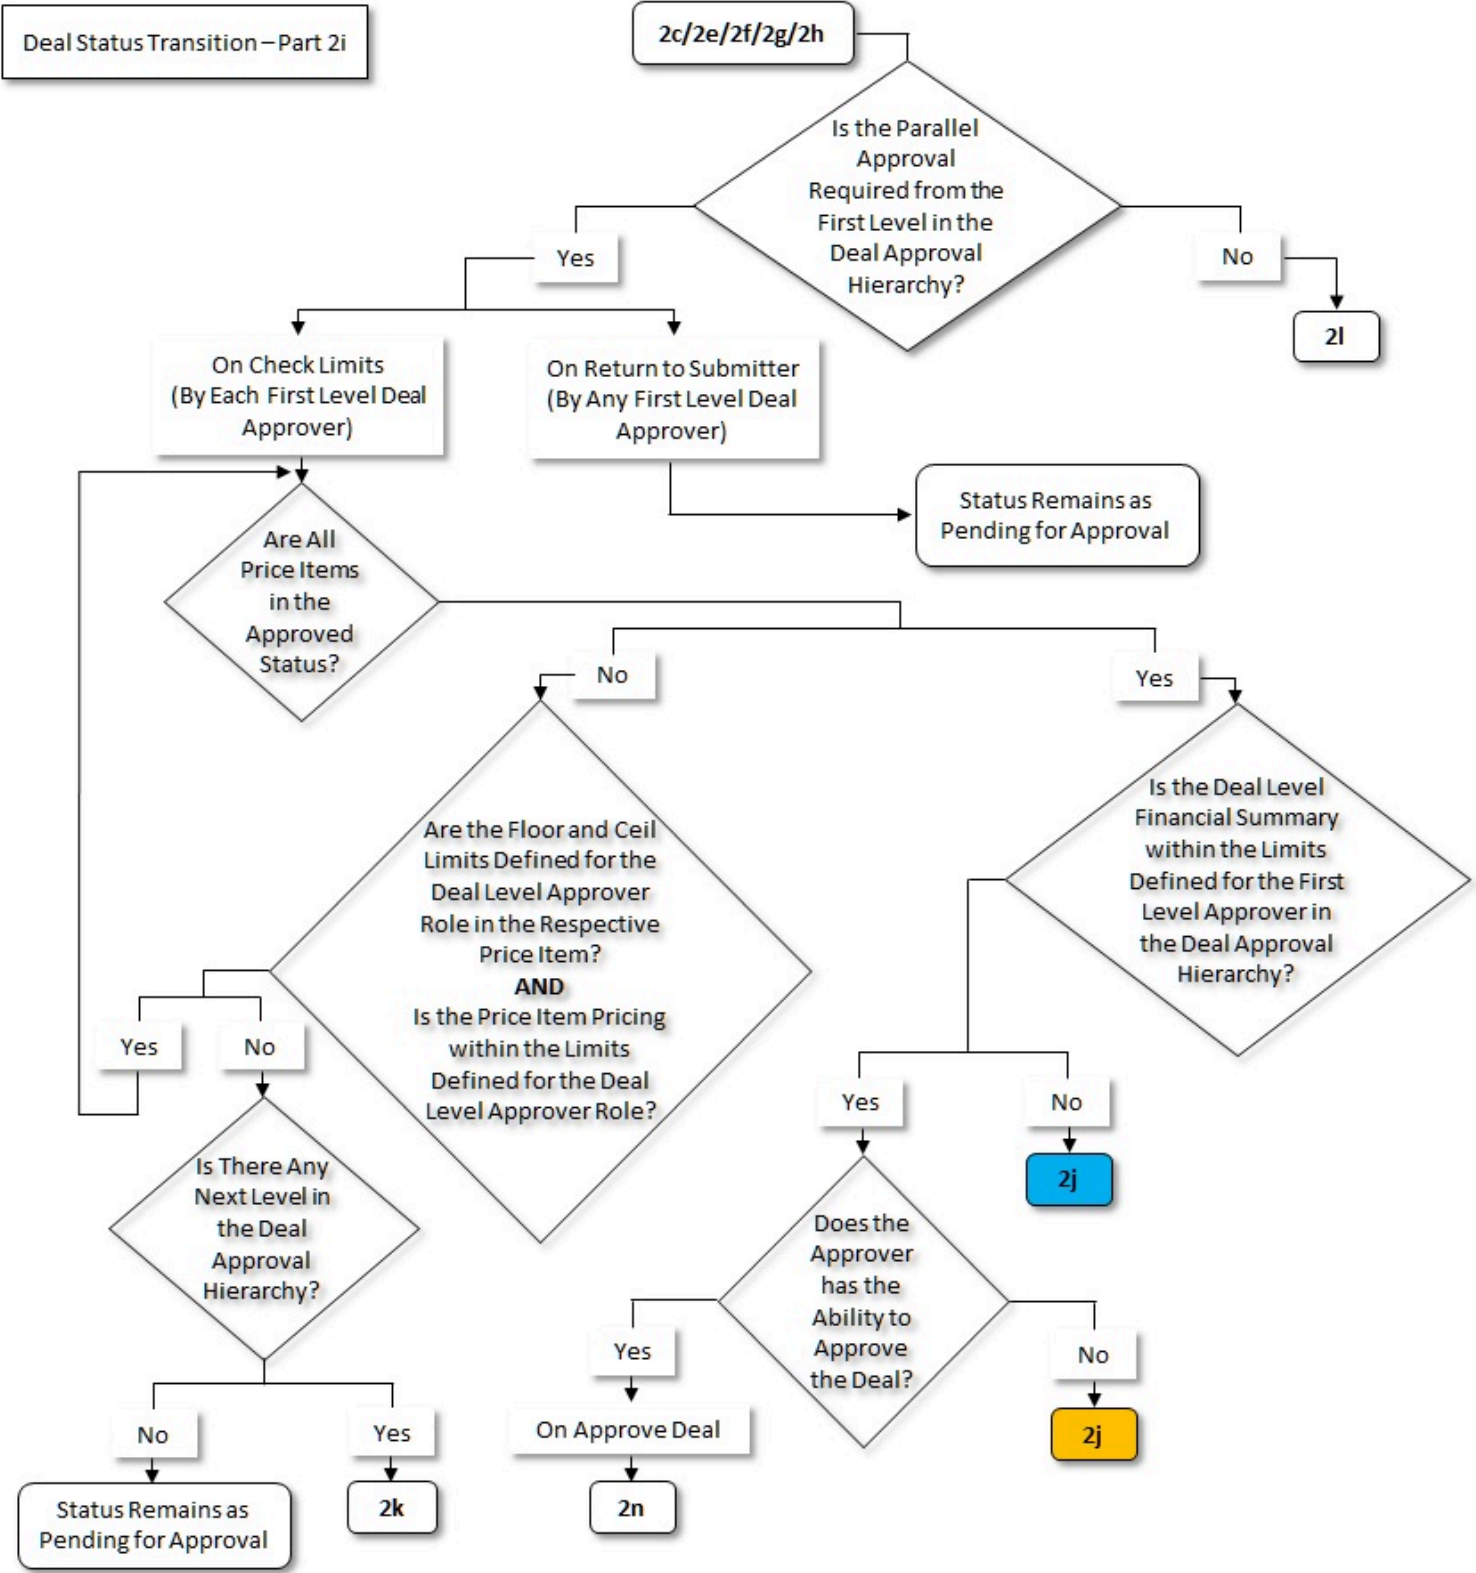

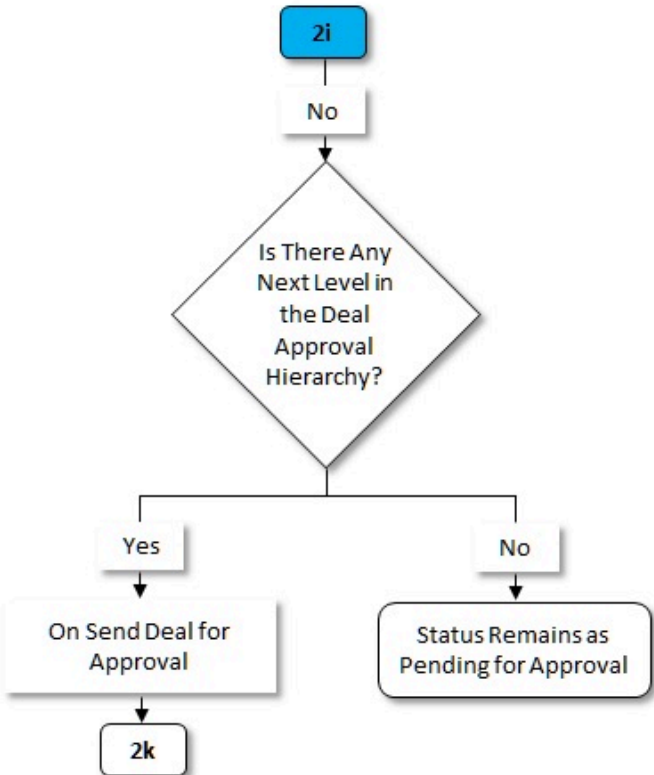

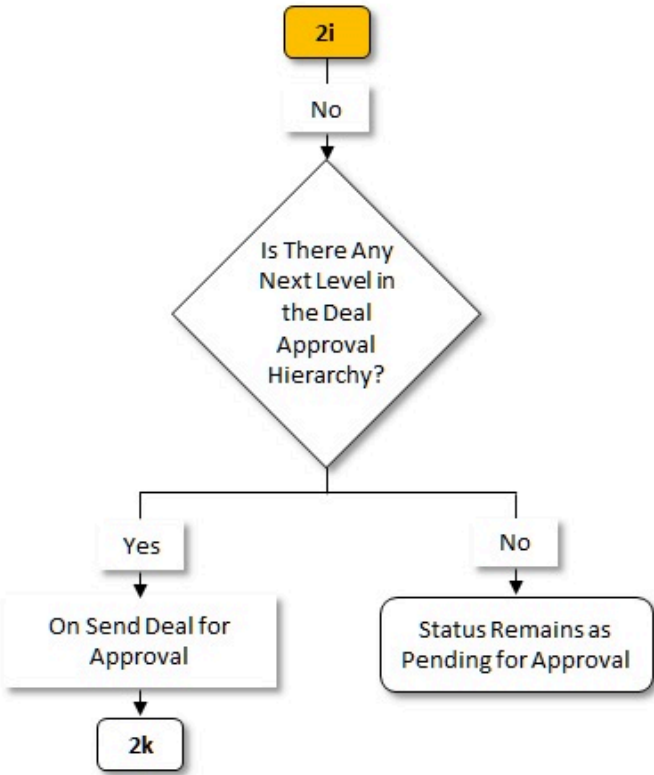

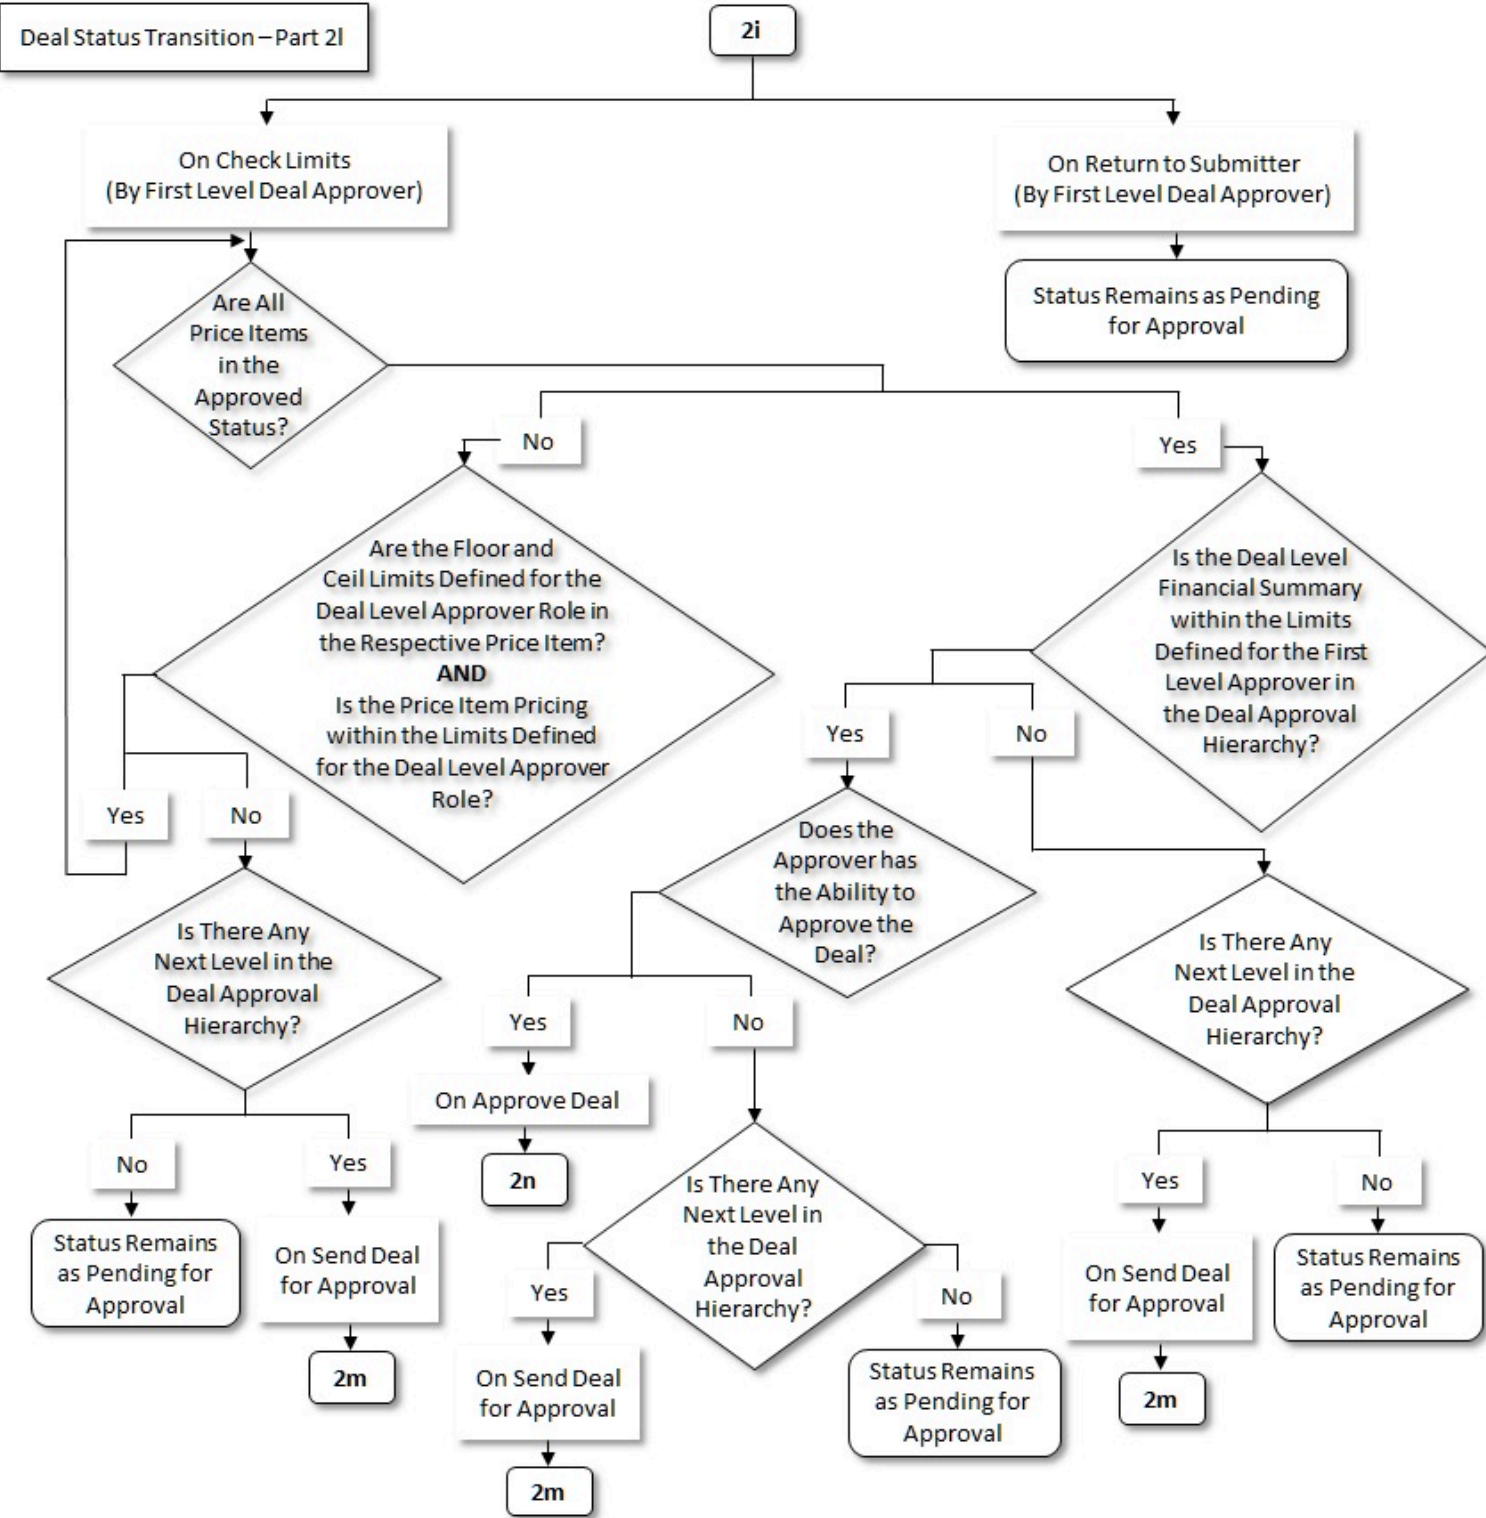

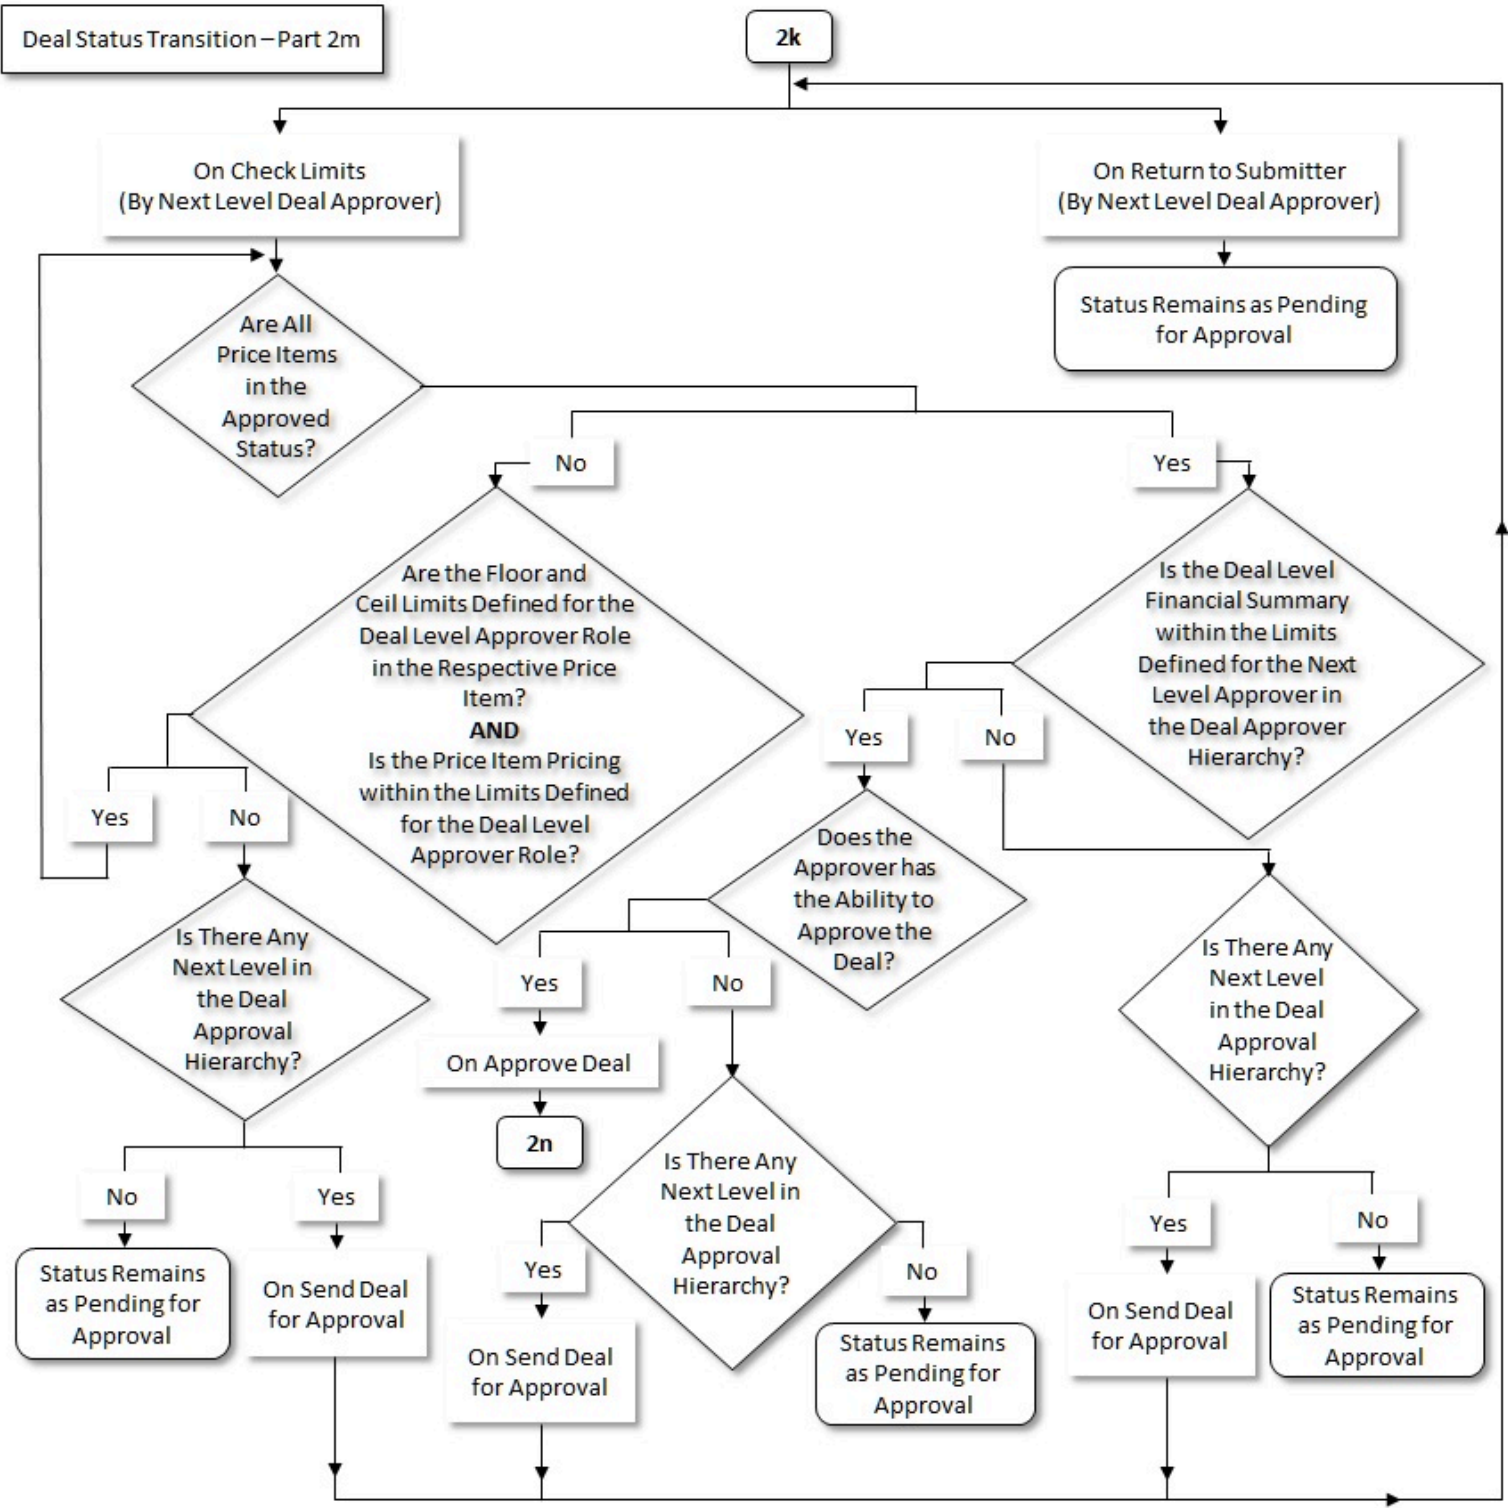

Deal Status Transition – Part 2j

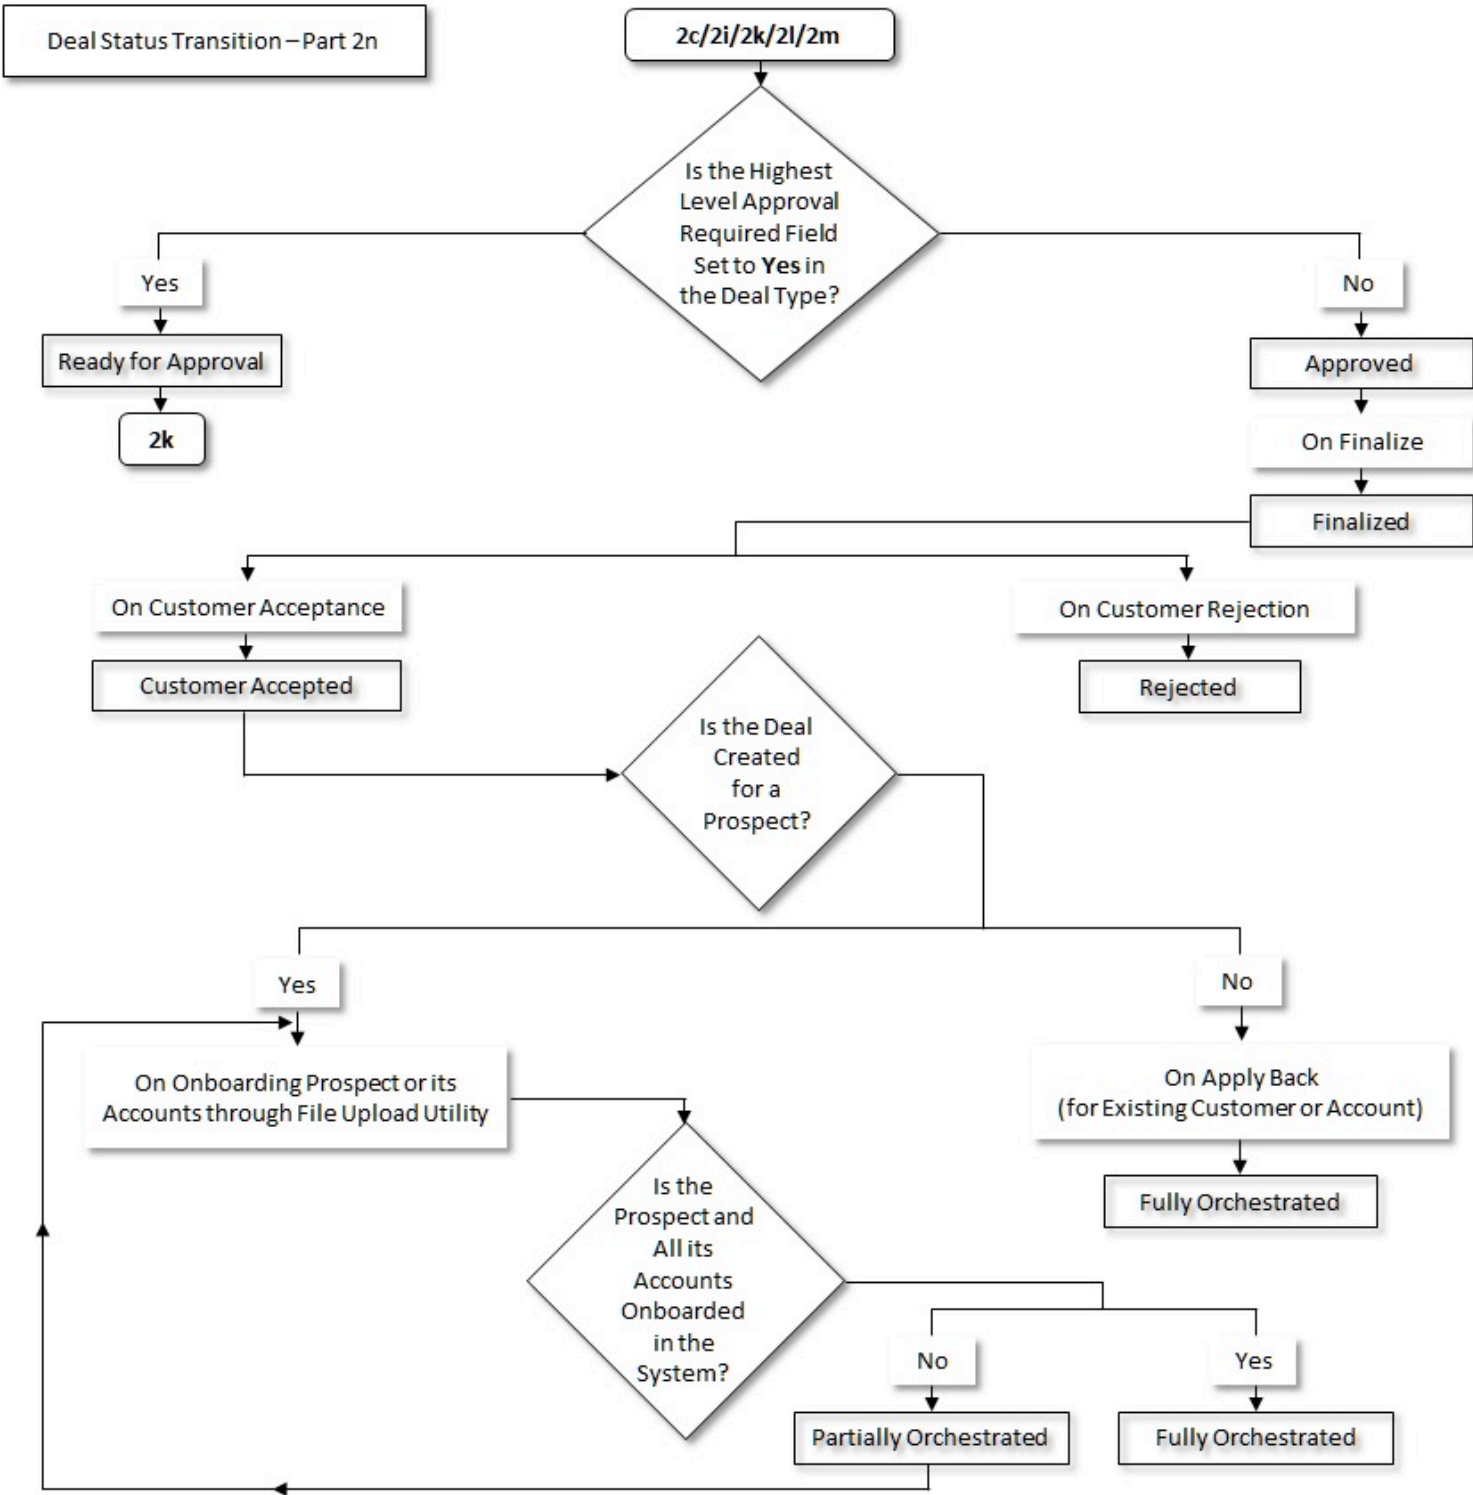

# Deal Approval Scenarios

This section illustrates how a deal moves from one approver to another in the following scenarios:

- [Deal Approval Scenario 1](#) on page 2662
- [Deal Approval Scenario 2](#) on page 2662

- [Deal Approval Scenario 3](#) on page 2663
- [Deal Approval Scenario 4](#) on page 2664
- [Deal Approval Scenario 5](#) on page 2665
- [Deal Approval Scenario 6](#) on page 2667
- [Deal Approval Scenario 7](#) on page 2669
- [Deal Approval Scenario 8](#) on page 2670
- [Deal Approval Scenario 9](#) on page 2672
- [Deal Approval Scenario 10](#) on page 2674

## Deal Approval Scenario 1

The following table illustrates the different levels of approval that are required for a deal in scenario 1:

Scenario 1	
Price Item Approval Required	No
Product Level Approval Required	No
Division Level Approval Required	No
Parallel Approval in the Deal Approval Hierarchy	No
Highest Level Approval Required	Yes

The following table lists the approvers at different levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	No
Level 1	Pricing Manager (PM)	No
Level 2	Senior Pricing Manager (SPM)	No
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Deal Approval Scenario 2

The following table illustrates the different levels of approval that are required for a deal in scenario 2:

Scenario 2	
Price Item Approval Required	No
Product Level Approval Required	No
Division Level Approval Required	No

Scenario 2	
Parallel Approval in the Deal Approval Hierarchy	Yes
Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

### Deal Approval Scenario 3

The following table illustrates the different levels of approval that are required for a deal in scenario 3:

Scenario 3	
Price Item Approval Required	Yes
Product Level Approval Required	No
Division Level Approval Required	No
Parallel Approval in the Deal Approval Hierarchy	No
Highest Level Approval Required	Yes

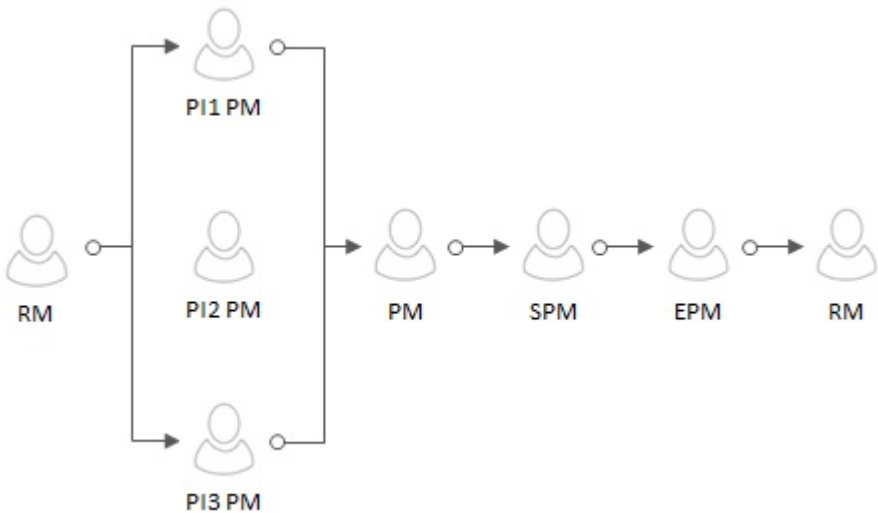

The following table lists the approvers at different levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	No
Level 1	Pricing Manager (PM)	Yes
Level 2	Senior Pricing Manager (SPM)	No
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers	
PI1	PI1 Pricing Manager (PI1 PM)
PI2	PI2 Pricing Manager (PI2 PM)
PI3	PI3 Pricing Manager (PI3 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

### Deal Approval Scenario 4

The following table illustrates the different levels of approval that are required for a deal in scenario 4:

Scenario 4	
Price Item Approval Required	Yes
Product Level Approval Required	No
Division Level Approval Required	No
Parallel Approval in the Deal Approval Hierarchy	Yes
Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

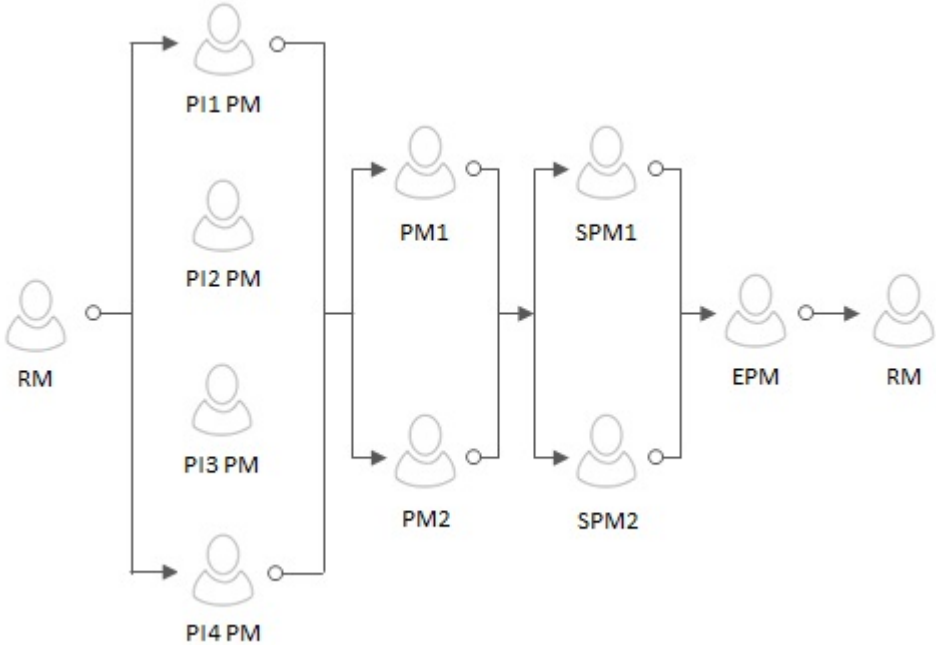

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers	
PI1	PI1 Pricing Manager (PI1 PM)
PI2	PI2 Pricing Manager (PI2 PM)
PI3	PI3 Pricing Manager (PI3 PM)
PI4	PI4 Pricing Manager (PI4 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

### Deal Approval Scenario 5

The following table illustrates the different levels of approval that are required for a deal in scenario 5:

Scenario 5	
Price Item Approval Required	No

Scenario 5	
Product Level Approval Required	No
Division Level Approval Required	Yes
Parallel Approval in the Division or Deal Approval Hierarchy	No
Highest Level Approval Required	Yes

The following table lists the approvers at different levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager (D1 SPM)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels in the D2 division approval hierarchy:

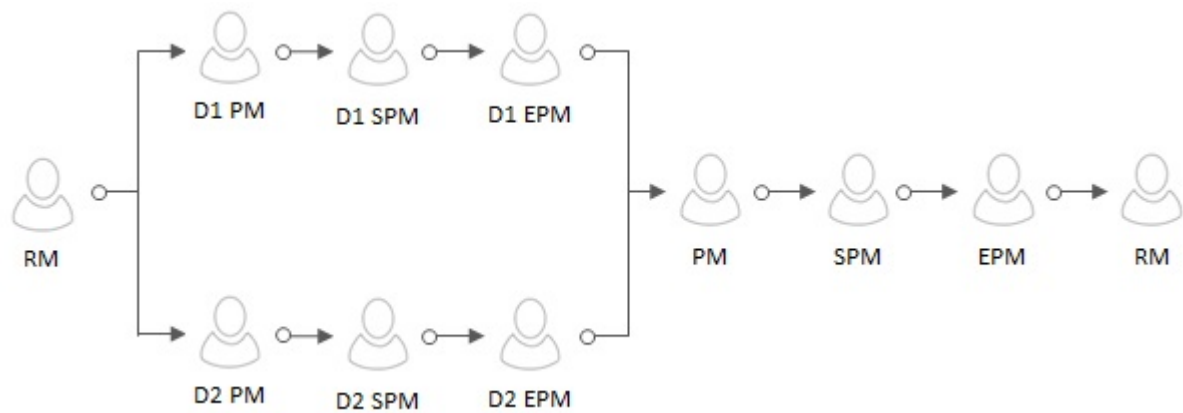

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager (D2 PM)	Yes
Level 2	D2 Senior Pricing Manager (D2 SPM)	Yes
Level 3	D2 Executive Pricing Manager (D2 EPM)	Yes

The following table lists the approvers at different levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager (PM)	Yes
Level 2	Senior Pricing Manager (SPM)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Deal Approval Scenario 6

The following table illustrates the different levels of approval that are required for a deal in scenario 6:

Scenario 6	
Price Item Approval Required	Yes
Product Level Approval Required	No
Division Level Approval Required	Yes
Parallel Approval in the Division or Deal Approval Hierarchy	No
Highest Level Approval Required	Yes

The following table lists the approvers at different levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager (D1 SPM)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager (D2 PM)	Yes
Level 2	D2 Senior Pricing Manager (D2 SPM)	Yes
Level 3	D2 Executive Pricing Manager (D2 EPM)	Yes

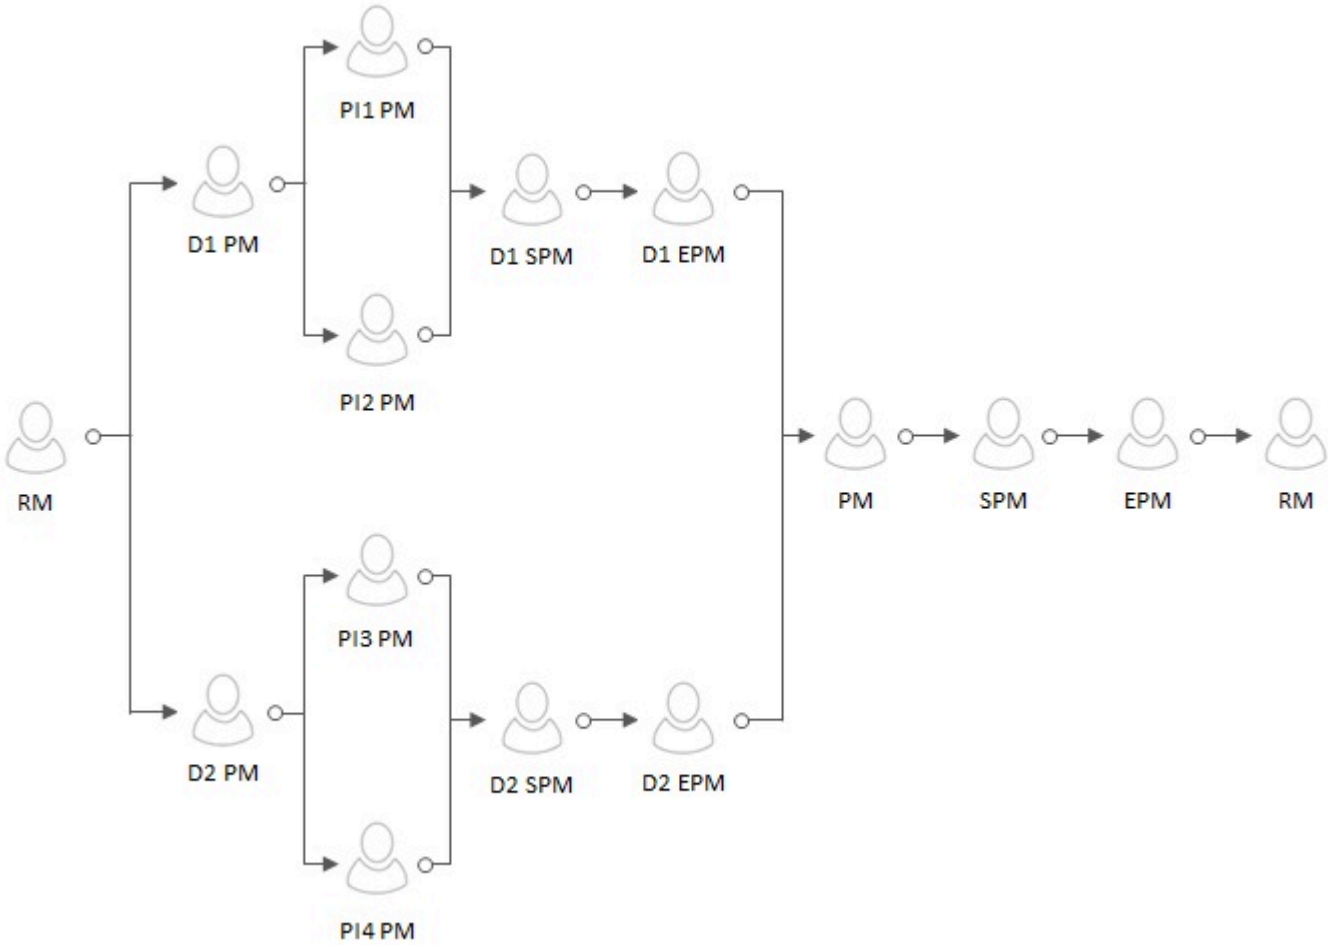

The following table lists the approvers at different levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager (PM)	Yes
Level 2	Senior Pricing Manager (SPM)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers		
Price Item	Division	Price Item Manager
PI1	D1	PI1 Price Item Manager (PI1 PM)
PI2	D1	PI2 Price Item Manager (PI2 PM)
PI3	D2	PI3 Price Item Manager (PI3 PM)
PI4	D2	PI4 Price Item Manager (PI4 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Deal Approval Scenario 7

The following table illustrates the different levels of approval that are required for a deal in scenario 7:

Scenario 7	
Price Item Approval Required	No
Product Level Approval Required	No
Division Level Approval Required	Yes
Parallel Approval in the Division or Deal Approval Hierarchy	Yes
Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

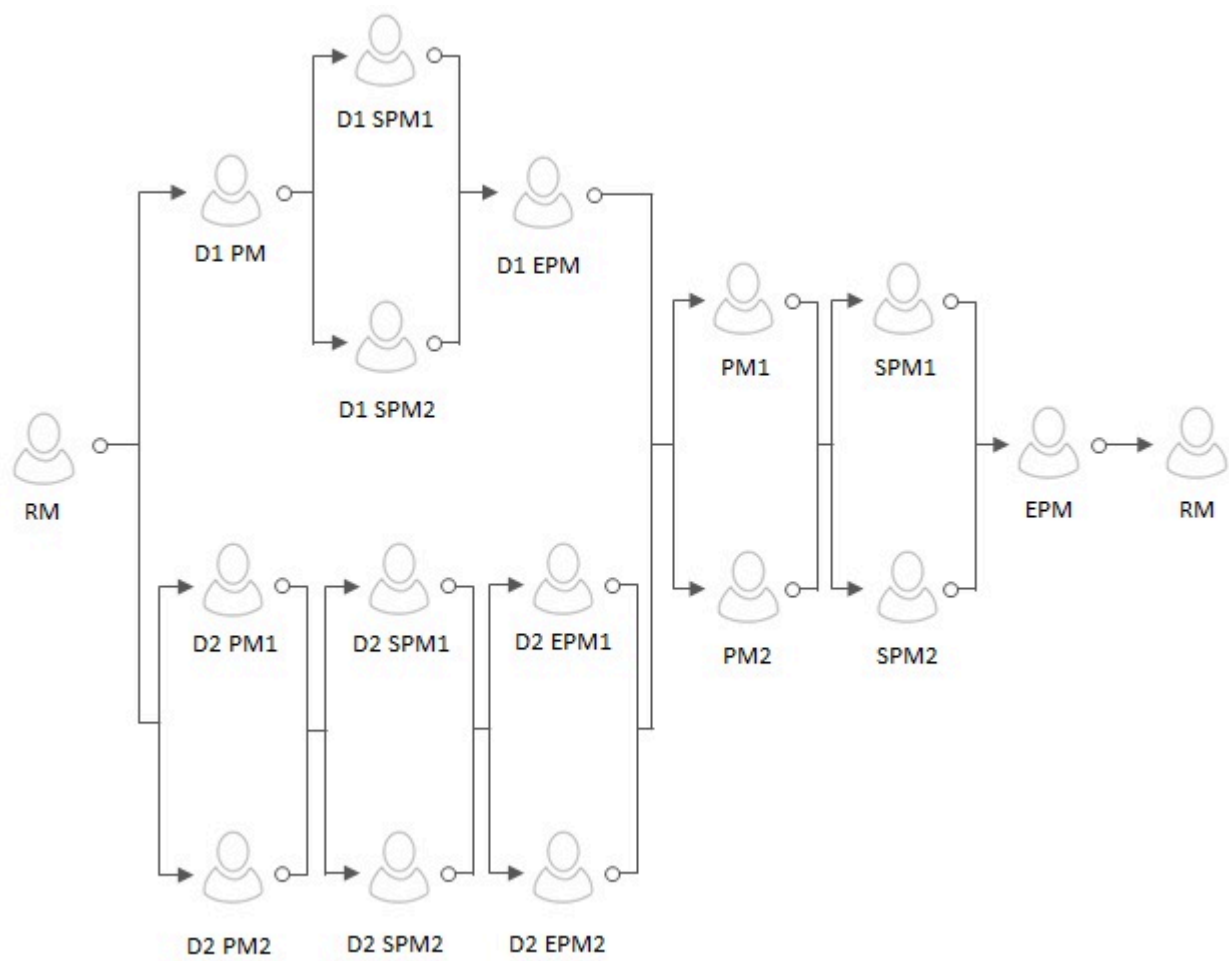

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager 1 (D2 SPM1)	Yes
Level 2	D2 Senior Pricing Manager 2 (D2 SPM2)	Yes
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

Deal Approval Scenario 8

The following table illustrates the different levels of approval that are required for a deal in scenario 8:

Scenario 8	
Price Item Approval Required	Yes
Product Level Approval Required	No
Division Level Approval Required	Yes
Parallel Approval in the Division or Deal Approval Hierarchy	Yes
Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager 1 (D2 SPM1)	Yes
Level 2	D2 Senior Pricing Manager 2 (D2 SPM2)	Yes
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

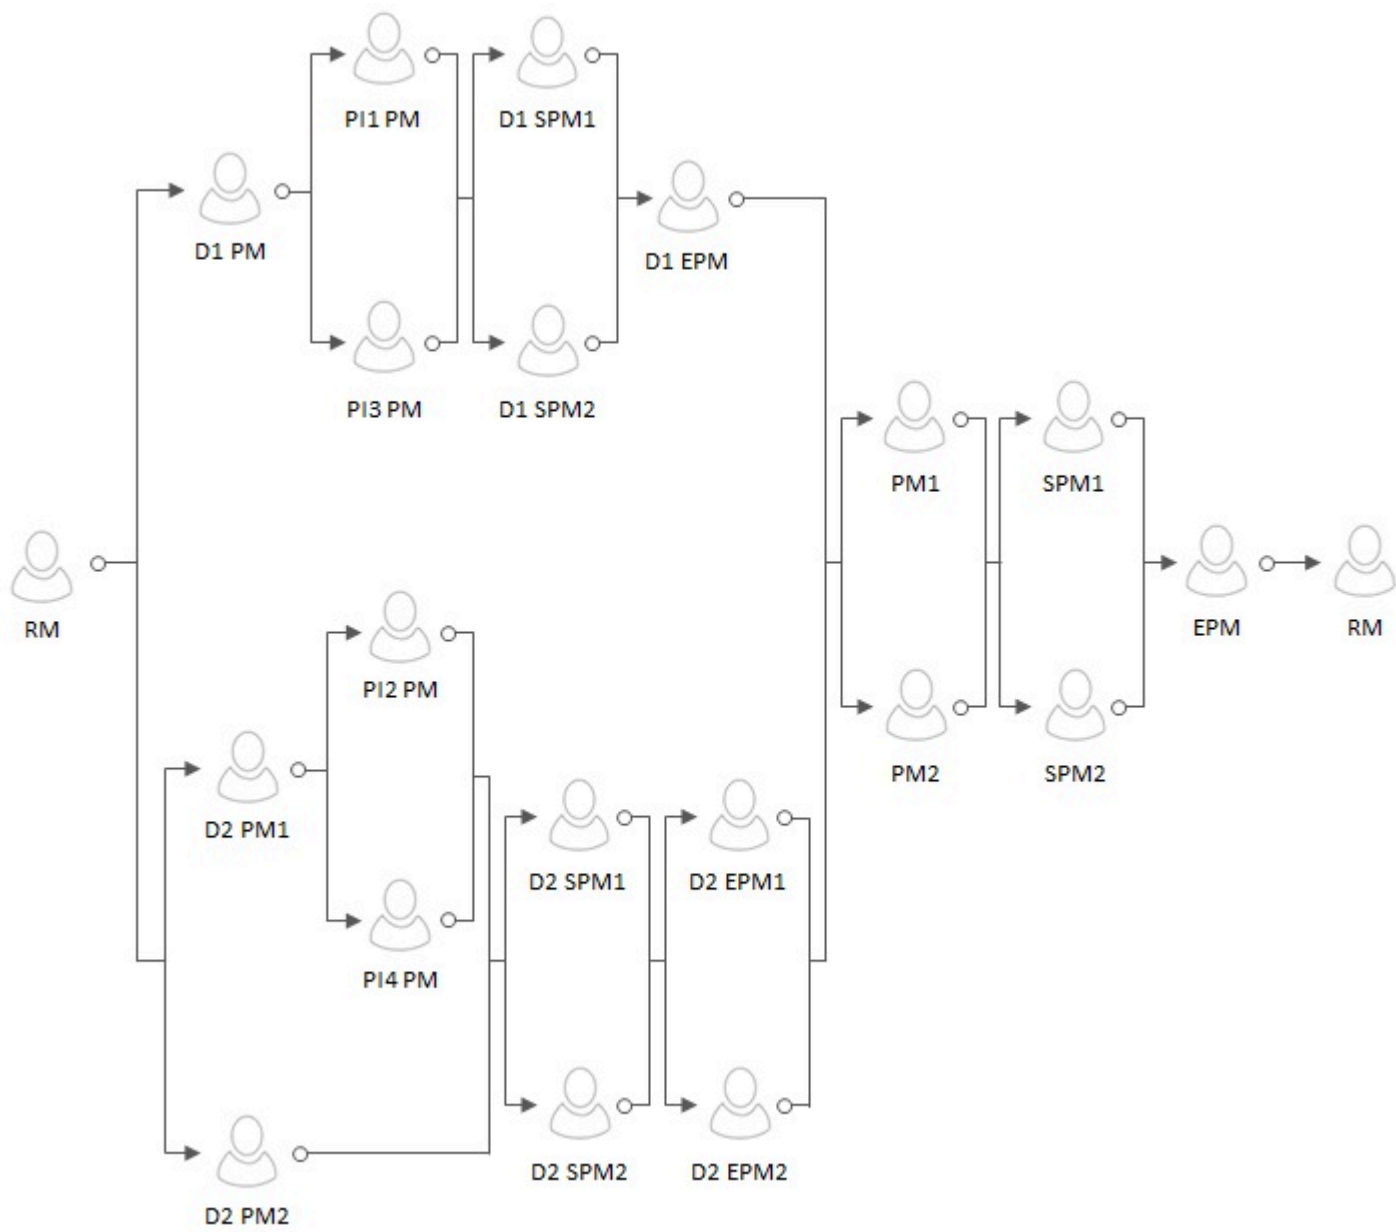

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers		
Price Item	Division	Price Item Manager
PI1	D1	PI1 Price Item Manager (PI1 PM)
PI2	D2	PI2 Price Item Manager (PI2 PM)
PI3	D1	PI3 Price Item Manager (PI3 PM)
PI4	D2	PI4 Price Item Manager (PI4 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

### Deal Approval Scenario 9

The following table illustrates the different levels of approval that are required for a deal in scenario 9:

Scenario 9	
Price Item Approval Required	No
Product Level Approval Required	Yes
Division Level Approval Required	Yes
Parallel Approval in the Product, Division, or Deal Approval Hierarchy	Yes

<b>Scenario 9</b>		
Highest Level Approval Required		Yes

The following table lists the approvers at different levels including the parallel levels in the P1 product approval hierarchy:

<b>P1 Product Approval Hierarchy</b>		
<b>Approval Level</b>	<b>To Do Role</b>	<b>Approve Deal</b>
Level 1	P1 Product Manager 1 (P1 PM1)	Yes
Level 1	P1 Product Manager 2 (P1 PM2)	Yes
Level 2	P1 Senior Product Manager 1 (P1 SPM1)	Yes
Level 2	P1 Senior Product Manager 2 (P1 SPM2)	Yes
Level 3	P1 Executive Product Manager (P1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the P2 product approval hierarchy:

<b>P2 Product Approval Hierarchy</b>		
<b>Approval Level</b>	<b>To Do Role</b>	<b>Approve Deal</b>
Level 1	P2 Product Manager (P2 PM1)	Yes
Level 2	P2 Senior Product Manager 1 (P2 SPM1)	Yes
Level 2	P2 Senior Product Manager 2 (P2 SPM2)	Yes
Level 3	P2 Executive Product Manager 1 (P2 EPM1)	Yes
Level 3	P2 Executive Product Manager 2 (P2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

<b>D1 Division Approval Hierarchy</b>		
<b>Approval Level</b>	<b>To Do Role</b>	<b>Approve Deal</b>
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

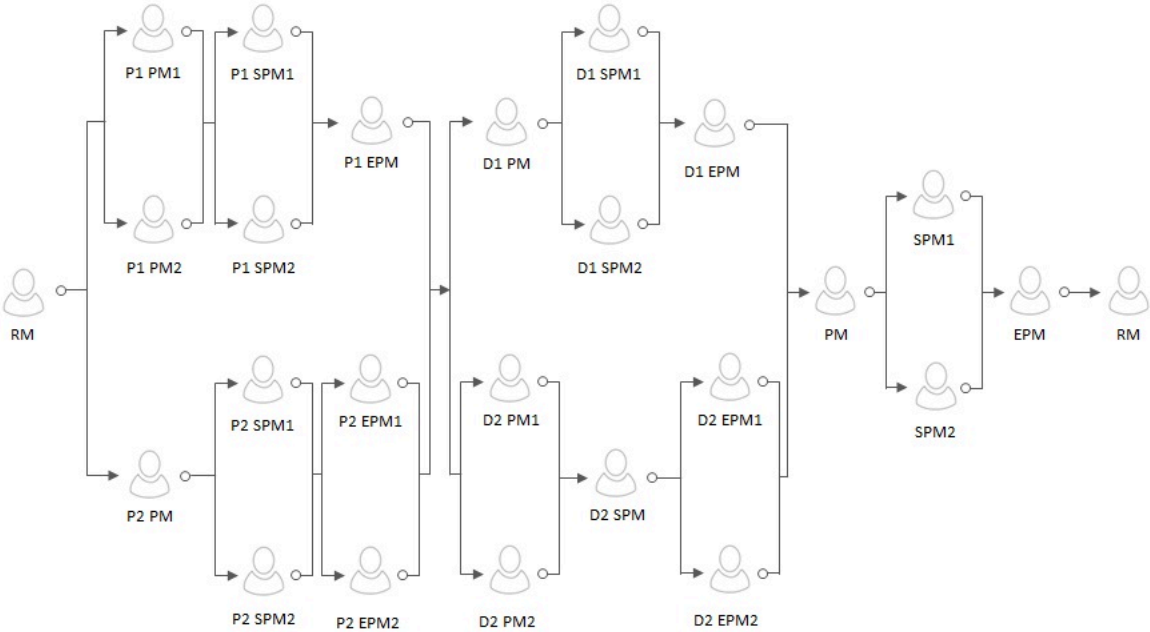

<b>D2 Division Approval Hierarchy</b>		
<b>Approval Level</b>	<b>To Do Role</b>	<b>Approve Deal</b>
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager (D2 SPM)	Yes

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager (PM)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

Deal Approval Scenario 10

The following table illustrates the different levels of approval that are required for a deal in scenario 10:

Scenario 10	
Price Item Approval Required	Yes
Product Level Approval Required	Yes
Division Level Approval Required	Yes

Scenario 10	
Parallel Approval in the Product, Division, or Deal Approval Hierarchy	Yes
Highest Level Approval Required	Yes

The following table lists the approvers at different levels including the parallel levels in the P1 product approval hierarchy:

P1 Product Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	P1 Product Manager 1 (P1 PM1)	Yes
Level 1	P1 Product Manager 2 (P1 PM2)	Yes
Level 2	P1 Senior Product Manager 1 (P1 SPM1)	Yes
Level 2	P1 Senior Product Manager 2 (P1 SPM2)	Yes
Level 3	P1 Executive Product Manager (P1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the P2 product approval hierarchy:

P2 Product Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	P2 Product Manager (P2 PM1)	Yes
Level 2	P2 Senior Product Manager 1 (P2 SPM1)	Yes
Level 2	P2 Senior Product Manager 2 (P2 SPM2)	Yes
Level 3	P2 Executive Product Manager 1 (P2 EPM1)	Yes
Level 3	P2 Executive Product Manager 2 (P2 EPM2)	Yes

The following table lists the approvers at different levels including the parallel levels in the D1 division approval hierarchy:

D1 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D1 Pricing Manager (D1 PM)	Yes
Level 2	D1 Senior Pricing Manager 1 (D1 SPM1)	Yes
Level 2	D1 Senior Pricing Manager 2 (D1 SPM2)	Yes
Level 3	D1 Executive Pricing Manager (D1 EPM)	Yes

The following table lists the approvers at different levels including the parallel levels in the D2 division approval hierarchy:

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 1 (D2 PM1)	Yes

D2 Division Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 1	D2 Pricing Manager 2 (D2 PM2)	Yes
Level 2	D2 Senior Pricing Manager 1 (D2 SPM1)	Yes
Level 2	D2 Senior Pricing Manager 2 (D2 SPM2)	Yes
Level 3	D2 Executive Pricing Manager 1 (D2 EPM1)	Yes
Level 3	D2 Executive Pricing Manager 2 (D2 EPM2)	Yes

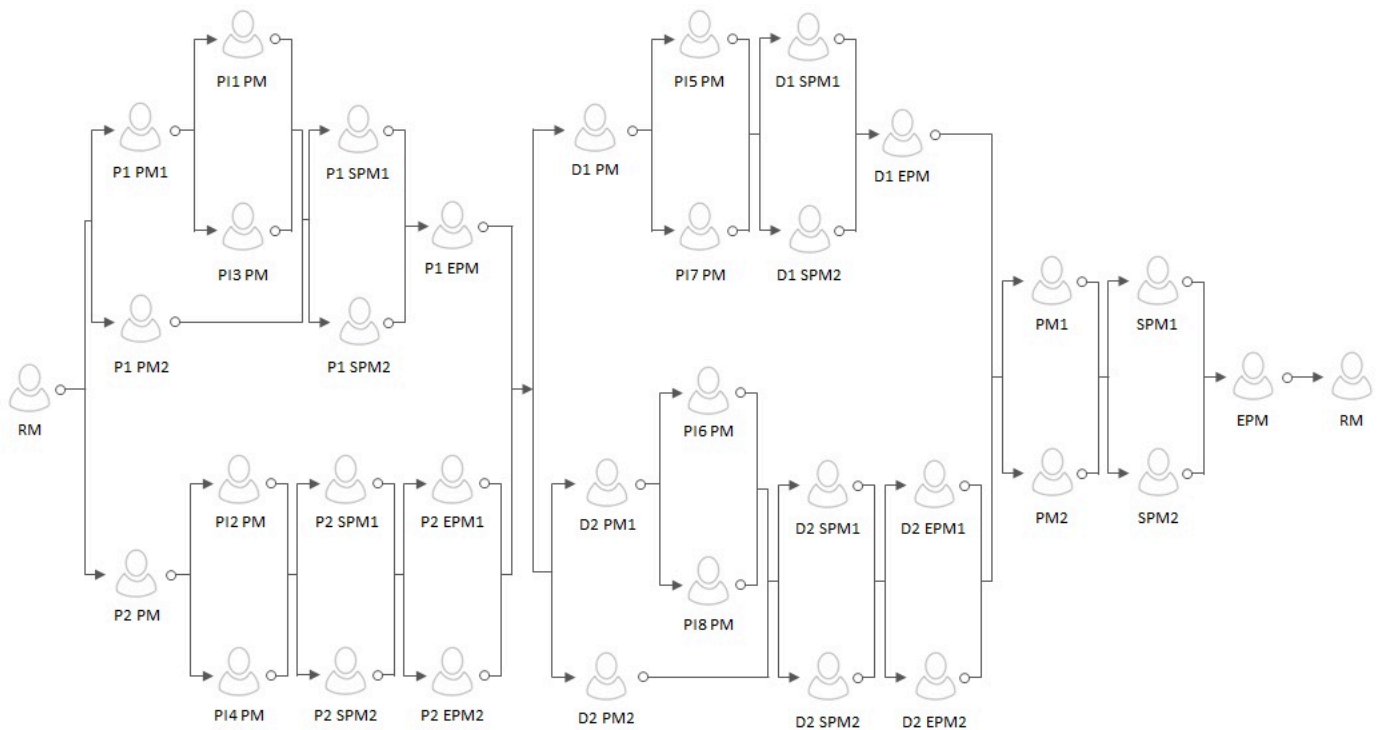

The following table lists the approvers at different levels including the parallel levels in the deal approval hierarchy:

Deal Approval Hierarchy		
Approval Level	To Do Role	Approve Deal
Level 0	Relationship Manager (RM)	Yes
Level 1	Pricing Manager 1 (PM1)	No
Level 1	Pricing Manager 2 (PM2)	No
Level 2	Senior Pricing Manager 1 (SPM1)	No
Level 2	Senior Pricing Manager 2 (SPM2)	Yes
Level 3	Executive Pricing Manager (EPM)	Yes

The following table lists the price item managers who can approve the respective price item in the deal:

Price Item Managers			
Price Item	Product	Division	Price Item Manager
PI1	P1		PI1 Pricing Manager (PI1 PM)
PI2	P2		PI2 Pricing Manager (PI2 PM)
PI3	P1		PI3 Pricing Manager (PI3 PM)
PI4	P2		PI4 Pricing Manager (PI4 PM)
PI5		D1	PI5 Pricing Manager (PI5 PM)
PI6		D2	PI6 Pricing Manager (PI6 PM)
PI7		D1	PI7 Pricing Manager (PI7 PM)
PI8		D2	PI8 Pricing Manager (PI8 PM)

The following figure graphically indicates how a deal moves from one approver to another in the given deal approval scenario:

## Different Stages in Deal Lifecycle

Following stages are involved in deal modelling:

- [Deal Creation](#) on page 2677
- [Reference Selection](#) on page 2678
- [Simulation](#) on page 2679
- [Price Item Approval](#) on page 2679
- [Division Level Approval](#) on page 2679
- [Deal Level Approval](#) on page 2680
- [Deal Finalization](#) on page 2680
- [Customer Acceptance or Rejection](#) on page 2680
- [Apply Back or Orchestration](#) on page 2680

## Deal Creation

While creating a deal, you need to specify various details, such as entity for which you want to create the deal, simulation type, deal type, deal date range, price selection date, deal frequency, usage period, review frequency, deal version, etc. You can maintain different versions of a deal. A deal version feature facilitates you to perform what-if analysis. Through each deal version, you can analyze the cost, revenue, and profitability for a different set of proposed pricing and commitments. However, you can only send one best version of a deal for the approval. The system then automatically discards the other versions in a deal.

A deal type helps the system to determine:

- Whether the pricing for each price item should be approved in the deal.
- Whether the deal should be assigned to users for approval as per the limits defined in the deal approval profile.
- Whether the pricing and financial summary should be approved by the respective division.
- Whether the highest level approval is required for the deal.

- Whether the existing pricing should be pre-approved in the deal.
- The deal approval profile that should be used for a division level approval.
- The deal approval profile that should be used for the deal level approval based on the division, customer segment, and customer tier combination.

Whereas, the deal approval profile helps the system to determine:

- Different levels in the division or deal approval hierarchy which can approve the pricing and financial summary of the deal.

**Note:** At present, you can add an approval level from 0 to 10. If required, you can add more approval levels in the system through the **C1\_DEALHIERARCHYLEVEL** lookup field.

- To Do type using which a To Do should be created for the approver at each level.
- To Do role whose users must receive the To Do for approval.
- Whether the users at the approval level can propose a new pricing for a price item while approving the deal.

**Note:** As per the business requirements, a deal level approver can only propose a new pricing for a price item while approving a deal. However, this feature is currently not implemented and would be available for use in the future release.

- Whether the users at the approval level can request the respective price item manager to approve the pricing for the price item.
- Whether the users at the approval level can approve the deal.
- Whether the users at the approval level should only view those price items for approval for whom floor and ceil limits are defined for the price item.
- The minimum and maximum profitability, deviation, and revenue which the users at the approval level can approve in the deal.

The system enables you to configure parallel approval at any level in the division or deal approval hierarchy. Once the deal is created in the **Draft** status, you can either skip the reference or provide the reference.

## Reference Selection

---

The system enables you to refer another customer, account, or deal for pricing and commitments. The system does the following when you select the respective reference:

- **Customer** - You can refer another customer while creating a deal for an existing customer or a prospect person. If you use this reference, the system does the following:
  - Copies the price list assignments and price assignments of the referenced customer and assigns the price lists and pricing to the prospect person in the **Proposed** status.
  - Copies the commitments from the SQI-based billable charges of the referenced customer's accounts (based on the deal frequency and usage period), and accordingly adds rolled up proposed commitments for the prospect person.

In addition, if you use this reference for a prospect person, the system copies the hierarchy of the referenced customer when the **Refer Customer Hierarchy** option is selected.

- **Account** - You can refer another account while creating a deal for an existing account. If you use this reference, the system does the following:
  - Copies the price list assignments and price assignments of the referenced account and assigns the price lists and pricing to the prospect account in the **Proposed** status.
  - Copies the commitments from the SQI-based billable charges of the referenced account (based on the deal frequency and usage period), and accordingly adds proposed commitments for the prospect account.
- **Deal** - You can refer another deal which is created for a customer while creating a deal for an existing customer or a prospect person. And, you can refer another deal which is created for an account while creating a deal for an existing account. If you use this reference for an existing customer or a prospect person, the system does the following:

- Copies the price list assignments and price assignments of the referenced deal's customer and assigns the price lists and pricing to the prospect person in the **Proposed** status.
- Copies the commitments from the SQI-based billable charges of the referenced deal's customer (based on the deal frequency and usage period), and accordingly adds proposed commitments for the prospect person.

However, if you use this reference for an existing account, the system does the following:

- Copies the price list assignments and price assignments of the referenced deal's account and assigns the price lists and pricing to the prospect account in the **Proposed** status.
- Copies the commitments from the SQI-based billable charges of the referenced deal's account (based on the deal frequency and usage period), and accordingly adds proposed commitments for the prospect account.

Once you select or skip the reference, the system checks whether the number of accounts in the customer hierarchy exceeds the account limit defined in the **C1-Deal** feature configuration. If the number of accounts in the customer hierarchy does not exceed the account limit, the system creates the corresponding prospect persons and accounts immediately and then changes the status of the deal to **Pending Simulation**. However, if the number of accounts in the customer hierarchy exceeds the account limit, the status of the deal is changed to **Hierarchy Creation Deferred**. On executing the **C1\_HRC** batch, the system checks whether there are any deals in the **Hierarchy Creation Deferred** status. If so, the system creates the corresponding prospect persons and accounts for the deal and then changes the status of the deal to **Pending Simulation**.

## Simulation

---

Once the deal is in the **Pending Simulation** status, you can do the following:

- Assign a new price list to the prospect person or account
- Edit/override the proposed price assignment of the prospect person or account
- Enroll the prospect account for a new product
- Edit the proposed commitments of the prospect account

Once the required changes are made to the deal, you can simulate the proposed pricing on the proposed commitments. In other words, you can simulate the deal version. On simulating a deal version, the system checks whether the proposed commitments exceed the limit defined in the **C1-Deal** feature configuration. If the proposed commitments do not exceed the limit, the system calculates the cost, revenue, and profitability for the deal version immediately and then changes the status of the deal to **Simulated**. However, if the proposed commitments exceed the limit, the status of the deal is changed to **Simulation Deferred**. On executing the **C1\_SMLD** batch, the system checks whether there are any deals in the **Simulation Deferred** status. If so, the system calculates the cost, revenue, and profitability for the deal version and then changes the status of the deal and its version to **Simulated**.

## Price Item Approval

---

If the **Price Item Approval Required** field is set to **Yes** in the deal type, the pricing of all the price items should be approved before the deal is approved. An approver at any level in the division or deal approval hierarchy can approve the pricing of a price item when the pricing falls within the floor and ceil limits of the approver. Additionally, if the **Submit Price Item for Approval** field is set to **Yes** for an approval level, the approver at the respective level can request the price item manager to approve the pricing for the price item. On clicking the **Submit Price Item for Approval** button, the status of the deal is changed to **Pending for Approval**.

## Division Level Approval

---

If the **Division Level Approval Required** field is set to **Yes** in the deal type, the system creates a To Do for the approver at the first level in the division approval hierarchy. The approver can either approve the division-specific pricing and financial summary or request the submitter to resubmit the deal for approval after making the required changes. If the approver at the first level in the division approval hierarchy approves the division-specific pricing and financial

summary, or if the approver at the first level in the division approval hierarchy cannot approve the division-specific pricing and financial summary, the system creates a To Do for the approver at the next level in the division approval hierarchy. This process continues until the approval is received from all the levels in the division approval hierarchy.

## Deal Level Approval

---

Once the approval is received from all the levels in the division approval hierarchy, the system creates a To Do for the approver at the first level in the deal approval hierarchy. The approver can either approve the deal or request the submitter to resubmit the deal for approval after making the required changes. If the approver at the first level in the deal approval hierarchy approves the deal and if the highest level approval is not required, the system changes the status of the deal to **Approved**. However, if the approver at the first level in the deal approval hierarchy cannot approve the deal, the system creates a To Do for the approver at the next level in the deal approval hierarchy. This process continues until the deal is approved by any level in the deal approval hierarchy. However, if the highest level approval is required for the deal, this process continues until the deal is approved by the highest level in the deal approval hierarchy.

## Deal Finalization

---

Once a deal is approved, you can finalize the deal. On clicking the **Finalize** button, the status of the deal is changed to **Finalized**.

## Customer Acceptance or Rejection

---

The system enables you to either accept or reject the finalized deal based on the customer feedback. On clicking the **Accept** button, the status of the deal is changed to **Customer Accepted**. However, on clicking the **Reject** button, the status of the deal is changed to **Rejected**.

## Apply Back or Orchestration

---

Once the deal is accepted for an existing customer or account, you can click the **Apply Back** button. On clicking the **Apply Back** button, the system does the following:

- Copies a new proposed price list assignment and assigns the price list to the respective customer or account in the **Active** status.
- Ends the price assignment of the respective customer or account when it is overridden or edited for the prospect customer or account.
- Creates a new price assignment for respective customer or account when it is overridden or edited for the prospect customer or account.
- Copies a new proposed product enrollment and enrolls the respective account for the product in the **Active** status.

The customer acceptance date is used as the start date while adding the new price list assignments, price assignments, and product enrollments.

Once the above changes are made, the system changes the status of the deal to **Fully Orchestrated**. The system enables you to onboard a prospect person or account through the **File Upload Request** utility. Once the person or account is created, the system checks whether there is any deal with the specified deal identifier in the **Customer Accepted** status. If so, the system checks whether the primary person or account identifier matches with the primary prospect person or account identifier, respectively. If so, the system adds the person or account ID corresponding to the prospect person or account. Then, the system changes the status of the deal to **Partially Orchestrated**. Once the system creates persons and accounts for the entire prospect hierarchy, the status of the deal is changed to **Fully Orchestrated**.

# Deal Monitoring

Oracle Revenue Management and Billing enables the relationship manager to assess the deal at regular intervals using the **Deal Monitoring** feature. The system sends the To Do reminders to the relationship manager at predefined intervals to review the deal. On assessing a deal, the relationship manager can accordingly add the review comments for the deal.

To send the To Do reminders for deal review, you need to set the following fields in the required deal types:

- **To Do Reminder Days** - Used to indicate the number of days using which the system calculates the To Do reminder date.
- **To Do High Priority Days** - Used to indicate the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.
- **Deal Monitor To Do Type** - Used to indicate the To Do type using which the To Do should be created for the deal review.

The **Deal Monitoring (C1\_DLMTR)** batch is used to monitor or check whether there is any deal in the **Fully Orchestrated** status. If there is a deal in the **Fully Orchestrated** status, the system considers its deal version which is in the **Fully Orchestrated** status. It then does the following:

- Calculates the review date and To Do reminder date for the deal
- Create a To Do for deal review and changes the status of the deal to **Pending For Review** when the To Do reminder date is equal to the system date

If the deal is not yet reviewed even once, the batch calculates the first review date using the deal effective start date and deal review frequency. For example, if there is a deal which is effective from 07-01-2020 to 12-31-2021 and where the deal review frequency is set to **Biannually**, the system sets the first review date to 01-01-2021 (i.e. 07-01-2020 + 6 months). However, if the deal is already reviewed in the past, the batch calculates the subsequent review date using the last review date and deal review frequency. For example, if there is a deal which is effective from 07-01-2020 to 12-31-2021 and where the last review date is set to 01-01-2021 and the deal review frequency is set to **Biannually**, the system sets the subsequent review date to 07-01-2021 (i.e. 01-01-2021 + 6 months). Note that if the calculated review date is later than the deal effective end date, then the batch sets the review date to the deal effective end date. For example, if there is a deal which is effective from 07-01-2020 to 12-31-2021 and where the last review date is set to 07-01-2021 and the deal review frequency is set to **Biannually**, the system sets the subsequent review date to 12-31-2021. This is because the calculated review date (i.e. 01-01-2022) is later than the deal effective end date (i.e. 12-31-2021).

In addition, the batch calculates the To Do reminder date which is review date minus the To Do reminder days. For example, if the review date is 12-31-2021 and To Do reminder days is 60, the system sets the To Do reminder date to 11-01-2021. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*. After executing the **Deal Monitoring (C1\_DLMTR)** batch, you need to execute the **Recalculate To Do Priority (F1-TDCLP)** batch. The **Recalculate To Do Priority (F1-TDCLP)** batch recalculates and changes the priority of the To Do reminder using the following formula:

$$(\text{To Do Reminder Days} - \text{To Do High Priority Days}) / \text{Number of Priority}$$

For example,

The following table lists the parameters and their values which are used for calculating the priority of the To Do reminders:

Parameter	Value
To Do Reminder Days	90
To Do High Priority Days	30
To Do Reminder Date	01-April-20
Deal Review Date	30-June-20
Number of Priority	8

In this case, the system changes the priority of the To Do reminder after every 8 days (i.e.  $(90-30)/8=7.5$ ) as mentioned in the below table:

System Date	Priority
1-April-2020	Lowest - Priority 9
9-April-2020	Priority 8
17-April-2020	Priority 7
25-April-2020	Priority 6
02-May-2020	Priority 5
10-May-2020	Priority 4
18-May-2020	Priority 3
26-May-2020	Priority 2
01-June-2020	Highest Priority 1

The system changes the To Do priority from Priority 9 to Priority 1 where 9 is the lowest and 1 is the highest. The system always ensures that the priority of the To Do reminder to highest is set 10 days before the deal review date. However, if the output of the above formula is zero, the system changes the priority of the To Do reminder every day.

If a deal is in the **Pending For Review** status, the **Review Deal** icon appears corresponding to the deal in the **Search Deal** zone of the **Deal Dashboard** screen. On clicking the **Review Deal** icon, the **Deal Review** window appears. Here, the relationship manager can add the review comments for the deal after assessing its performance. On adding the review comments, the status of the deal is changed from **Pending For Review** to **Fully Orchestrated**.

## Product Level Approval for Deals

Until now, the relationship manager could send one best version of the deal for the division and deal level approvals. Now, in addition, the relationship manager can send one best version of the deal for the product level approval when the following conditions are met:

- Customers or accounts in the deal have enrolled for the products
- **Product Level Approval Required** field is set to **Yes** in the respective deal type
- Deal approval profile is specified for the division and product combination in the respective deal type

The system enables you to design a deal approval profile for the product approval hierarchy. The deal approval profile of a product and division combination helps the system to determine:

- Different levels in the product approval hierarchy which can approve the price item pricing and financial summary of the product in the deal. Note that the product level approver can only approve the pricing of those price items which are included in the product.
- Whether the product level approver can recommend a new pricing for a price item while approving the deal.
- Whether the product level approver can request the respective price item manager to approve the pricing for the price item.
- Whether the product level approver can approve the deal.
- Whether the product level approver should only view those price items for approval for which floor and ceil limits are within his approval range.
- The minimum and maximum profitability, profit, profit variation, and revenue which the product level approver can approve in the deal.

In a deal type, you can now specify the approval profile for a division and product combination using the approval type as **Product**. If a product is associated to multiple divisions, you can specify the approval profile for each division and product combination. If a deal is created for a customer or prospect whose accounts belong to different divisions,

but have enrolled for the same product, the system then creates a product approval hierarchy for each division and product combination. For example, if the SAVINGS product is associated to two divisions named CA and US and an approval profile is specified for both the combinations (i.e. SAVINGS and CA; SAVINGS and US) in the deal type, the system will create two product approval hierarchies when two accounts belonging to different divisions (i.e. CA and US) have enrolled for the SAVINGS product in a deal. One product approval hierarchy would be for the SAVINGS and US combination and another product approval hierarchy would be for the SAVINGS and CA combination. However, if the SAVINGS product is associated to two divisions named CA and US and an approval profile is specified only for the SAVINGS and CA combination in the deal type, the system will create one product approval hierarchy for the SAVINGS and CA combination. The system will not create product approval hierarchy for the SAVINGS and US combination because there is no approval profile configured for this combination in the deal type.

**Note:** You cannot specify the same approval profile for the same or different product and different division combination. However, you can specify the same approval profile for the different product and same division combination.

The system enables you to configure parallel approval at any level in the product approval hierarchy. If the **Product Level Approval Required** field is set to **Yes** and the **Division Level Approval Required** field is set to **Yes**, the system first sends the deal to the product approval hierarchy, then to the division approval hierarchy and finally to the deal approval hierarchy for approval. However, if the **Product Level Approval Required** field is set to **Yes** and the **Division Level Approval Required** field is set to **No**, the system first sends the deal to the product approval hierarchy and then to the deal approval hierarchy for approval.

If the **Product Level Approval Required** field is set to **Yes** in the deal type, the system creates a To Do for the approver at the first level in the product approval hierarchy. The approver can either approve the product-specific price item pricing and product financial summary or request the submitter to resubmit the deal for approval after making the required changes. If the approver at the first level in the product approval hierarchy approves the product-specific price item pricing and product financial summary, or if the approver at the first level in the product approval hierarchy cannot approve the product-specific price item pricing and product financial summary, the system creates a To Do for the approver at the next level in the product approval hierarchy. This process continues until the approval is received from all the levels in the product approval hierarchy.

Note that a product level approver can recommend a price for a price item which is included in the product when the **Propose Pricing** field is set to **Yes** for the approval level in the deal type. After recommending a new price (i.e. rate), the product level approver needs to request the submitter to resubmit the deal for approval after considering the recommended price.

If the **Product Level Approval Required** field is set to **Yes** and if customers or accounts in the deal have enrolled for the products, the **Product Financial Summary** section appears in the **Simulation Details** zone when you simulate the deal. It indicates the revenue, cost, profit, and profitability for each product and division combination. In addition, the **Product Financial Summary** section appears in the **Pricing and Commitments** screen. It indicates the revenue and cost of each product to which existing customer's or prospect's account is enrolled. The system calculates the revenue and cost based on the original, proposed, and recommended prices, and accordingly shows the variation between original, proposed and recommended revenue.

## Recommended Pricing

Oracle Revenue Management and Billing enables the approver at any level in the product approval hierarchy, division approval hierarchy, and deal approval hierarchy to recommend a price for a price item. An approver can recommend a price for a price item when the **Propose Pricing** field is set to **Yes** for the respective level in the approval hierarchy.

**Note:** The **Propose Pricing** field is non-editable for the Level 0 in the deal approval hierarchy. By default, it is set to **No**.

The recommended pricing related columns (such as **Pricing Information**, **Average Price**, and **Revenue**) are visible to the approver in the **Pricing and Commitments** section of the **Pricing and Commitments** screen. The **Recommend Price** link appears in the **Pricing Information** column corresponding to each price item. On clicking the **Recommend Price** link, the **Deal Pricing** screen appears. The **Rate** field corresponding to each price component is editable in the **Projected Pricing** section of the **Deal Pricing** screen. The approver can recommend a new price for the price item.

However, note that the recommended price for the price item should be within the negotiability floor and ceil limits of the approver.

On simulating the deal, the system calculates the average price, revenue, cost, profit, and profitability based on the recommended price. It checks whether the average price of the price item is within the average price floor and ceil limits of the approver and accordingly changes the status of the price item to **Approved**, **Pending for Approval**, or **Error**. After analyzing the profitability of the deal, the approver can click the **Return to Submitter** button and thereby request the submitter to consider the recommended price for the price item. On clicking the **Return to Submitter** button, the status of the price item is changed to **Approver Recommended**. In addition, a To Do is generated for the relationship manager of the deal. If required, the approver who has recommended the price can edit or delete the recommended price before clicking on the **Return to Submitter** button.

If the approver has sent the price item to the price item manager for approval, the approver cannot recommend the price for the price item. And, if the approver has recommended the price for a price item, the approver cannot send the price item to the price item manager for approval. In such case, the approver can send the price item to the price item manager for approval only after deleting the recommended price for the price item.

In case of parallel approval, if one approver has recommended the price for a price item, the other approver can view the recommended price for the price item. But, the other approver cannot edit or delete the recommended price for the price item. Also, in case of parallel approval, if one approver has sent the price item to the price item manager for approval, then other approver cannot recommended price for the price item. And, vice-versa, if one approver has recommended price for the price item, then other approver cannot send the price item to the price item manager for approval.

On viewing the recommended price for the price item, the relationship manager may or may not edit the price of the price item based on the approver recommendation. If the relationship manager edits the price of the price item based on the approver recommendation, the system checks whether the proposed price is within the negotiability floor and ceil limits of the relationship manager. Then, on simulating the deal, the system calculates the average price, revenue, cost, profit, and profitability based on the new proposed price. It checks whether the average price of the price item is within the average price floor and ceil limits of the relationship manager. Here, the system derives a new floor and ceil range for the relationship manager dynamically using the approver recommended price and accordingly changes the status of the price item to **Approved**, **Pending for Approval**, or **Error**.

## Deal Currency Conversion

---

Oracle Revenue Management and Billing enables you to view the division financial summary (i.e. revenue, cost, profit, and profitability of the division) in the deal currency or in the respective division currency. A toggle switch appears above the **Division Financial Summary** section. By default, the division financial summary is shown in the deal currency. On clicking the toggle switch, you can view the division financial summary in the division's base currency.

In addition, the system enables you to:

- View the original and proposed revenue and cost of a customer (in the customer hierarchy) in the deal currency or in the respective customer's division currency
- View the original and proposed revenue and cost of an account (in the customer hierarchy) in the deal currency or in the respective account's invoice currency
- View the original and proposed revenue and cost of a price item assigned to a customer in the deal currency or in the respective customer's division currency
- View the original and proposed revenue and cost of a price item assigned to an account in the deal currency or in the respective account's invoice currency
- View the average price of a price item assigned to a customer in the pricing currency or in the respective customer's division currency
- View the average price of a price item assigned to an account in the pricing currency or in the respective account's invoice currency

A toggle switch appears above the respective section. By default, the original and proposed revenue and cost are shown in the deal currency and the average price of the price item is shown in the pricing currency. On clicking the toggle

switch, you can view the original and proposed revenue and cost and average price of the price item in the customer's division currency or account's invoice currency.

During currency conversion, the system uses the currency conversion algorithm attached to the **Currency Conversion For Bill Segments** system event of the division. Note that the currency conversion happens when the **Allow Multi-Currency Accounts** option type of the **C1\_MLTCURACC** feature configuration is set to **Y**.

## Reference Selection Based on Questionnaire

---

Oracle Revenue Management and Billing enables you to derive reference customers and deals during a deal creation using a questionnaire. Note that the reference deals are those deals which belong to the reference customers which are derived using the questionnaire. The system displays the questions from the questionnaire template which is specified in the respective deal type. Note that the system considers the questionnaire template specified in the deal type when it is effective on the deal start date. You can also skip the questionnaire using the **Skip Questionnaire** option. If a questionnaire template is not specified in the respective deal type or if the questionnaire template is not effective on the deal start date or if the **Skip Questionnaire** option is selected during the deal creation, the system derives the reference customers for the deal using the division, customer segment, and customer tier combination. Note that reference deals are not derived when the **Skip Questionnaire** option is selected during the deal creation.

While defining a questionnaire template, you can specify the following:

- The date range when the questionnaire template is effective
- Whether to display the questions from the questionnaire template in a particular sequence or when a rule of a particular rule type is satisfied
- A set of questions that you want the customer to answer
- Whether the answer for the question should be:
  - Date
  - Decimal Value
  - From Multi Selection Drop Down List
  - From Multi Selection Check Box List
  - Numeric Value
  - Percentage
  - From Radio Button List
  - From Single Selection Drop Down List
  - Text
- Whether the answer value set for the following answer types should be derived from the reference data or from a predefined list:
  - Multi Selection Drop Down List
  - Multi Selection Check Box List
  - Radio Button List
  - Single Selection Drop Down List
- The reference table, column, and criteria when the answer value set is set to **Reference Data**. Note that you can only use the Equal To and IN operators while defining the reference criteria.
- The default answer for the question
- Whether the question is mandatory or optional in the questionnaire
- The parameter which helps to derive the reference customers when the question is answered in the questionnaire. Note that you can only specify a parameter where the source entity is set to **Person** or **Account** and the source type is set to **Characteristic** or **Field**.
- The rule type which helps to determine the rules that should be executed to display the next question in the questionnaire
- Whether the response from the question should be used to derive the reference customer list
- The predefined values when the answer value set is set to **Predefined List**

A new screen named **Questionnaire Template** is introduced in this release. You can define, edit, delete, copy, and preview a questionnaire template through this screen. On previewing a sequence based or rule based questionnaire template, the questions appear in the specified sequence. When a rule based questionnaire template is used during a deal creation, the system displays the next question based on the output of the previous question.

A new page named **Questionnaire** is added to the **Deal Information** screen which helps to answer the questionnaire. The number of questions that appear in the **Questionnaire** page depends on the value specified in the **Questionnaire UI Pagination Limit** option type of the **C1-DEAL** feature configuration.

## Rate Negotiability for Price Item in Deal

---

Oracle Revenue Management and Billing enables you to indicate whether the rate is negotiable for a price item in a deal. A new field named **Negotiability Switch** is introduced while defining or editing a price item. The system enables you to set the negotiability option for a price item at the division level. Therefore, you can set different the negotiability option for the divisions to which the price item is associated. By default, the **Negotiability Switch** field is set to **No**.

If you set the **Negotiability Switch** field to **No** for a division of a price item, you cannot edit or override the rate of the price item in a deal when the customer or account to which the price item is assigned belongs to the division. However, if you set the **Negotiability Switch** field to **Yes** for a division of a price item, you can edit or override the rate of the price item in a deal when the customer or account to which the price item is assigned belongs to the division. Along with the **Negotiability Switch** field, you can also set the **Only Within Range** field which indicates that the system should validate whether the negotiated rate is within the negotiability floor and ceil limits. The **Only Within Range** field is enabled only when the **Negotiability Switch** field is set to **Yes**. By default, the **Only Within Range** field is set to **No**.

If the **Only Within Range** field is set to **No**, the system does not validate whether the negotiated rate is within the negotiability floor and ceil limits. However, if the **Only Within Range** field is set to **Yes**, the system validates whether the negotiated rate is within the negotiability floor and ceil limits. You can define the negotiability floor and ceil limits for a division of a price item at the price item level or at the price assignment level.

On clicking the link in the **Pricing Information** column corresponding to a price item in the **Pricing and Commitments** screen, the system enables you to edit or override the original pricing when the **Negotiability Switch** field is set to **Yes** for the price item and thereby create a proposed pricing. If the **Only Within Range** field is set to **Yes**, the system first validates whether the negotiated rate is within the negotiability floor and ceil limits specified in the original pricing (in case of override) or proposed pricing (in case of edit). To validate the rate, the system considers the pricing where the price item, pricing currency, and division (for which pricing is defined on the customer or account) is same. If the negotiated rate is within the negotiability floor and ceil limits specified in the original or proposed pricing, the system enables you to edit or override the rate. However, if the negotiated rate is not within the negotiability floor and ceil limits specified in the original or proposed pricing, an error occurs indicating that the specified rate is not within the negotiability floor and ceil limits.

If the negotiability floor and ceil limits are not specified for the division in the original or proposed pricing, the system checks whether the negotiated rate is within the negotiability floor and ceil limits specified at the price item level. The system considers the negotiability range of the pricing currency. If the negotiated rate is within the negotiability floor and ceil limits specified at the price item level, the system enables you to edit or override the rate. However, if the negotiated rate is not within the negotiability floor and ceil limits specified at the price item level, an error occurs indicating that the specified rate is not within the negotiability floor and ceil limits. If the negotiability range is not defined for the pricing currency, the system does not validate whether the negotiated rate is within the negotiability floor and ceil limits of the price item.

If the rate negotiability feature is configured for a price item, the system enables:

- The relationship manager to propose a negotiated rate for the price item
- The product level approver, division level approver, and deal level approver to recommend a rate for the price item.

## Price Item Selection during Deal Creation

---

Oracle Revenue Management and Billing enables you to select the price items which you want to offer in a deal. If you create a deal for an existing customer, the system, by default, selects the following price items:

- Whose pricing is directly assigned to the customer
- Whose pricing is inherited by the customer

Note that the system does not by default select the price items assigned to the customer's accounts and the price items assigned to the child customers and their accounts. And, if you create a deal for an existing account, the system, by default, selects the following price items:

- Whose pricing is directly assigned to the account
- Whose pricing is inherited by the account

The default price item selection is done when the following conditions are met:

- Deal is created for an existing customer or an account
- Default commitments are not defined in the respective deal type

However, if the deal is created for a proposed customer or if the default commitments are defined in the respective deal type, the system does not select the price items, by default, in the **Price Item Selection** screen. You have to manually select the required price items in the **Price Item Selection** screen. Only then, the system considers the pricing and commitments of the selected price items in the deal.

If required, you can deselect a price item the **Price Item Selection** screen. You can access the **Price Item Selection** screen in either of the following ways:

- By clicking the **Edit** (✎) icon in the **Price Item Selection** column corresponding to the customer or account in the **Simulation Details** zone of the **Deal Information** screen
- By clicking the **Select Price Item Group** button in the **Pricing and Commitments** screen
- By clicking the **Save and Select Price Item Group** button in the **Price List Assignment** screen

Only the selected price items are then considered in the deal for simulation. On assigning a price list to an entity in the customer hierarchy, you need to select the price items whose pricing you want to inherit from the price list. Only the selected price items from the price list will be considered in the deal for simulation. If you remove a price list which is newly assigned to an entity in the deal, the price item pricing inherited from the price list is removed from the **Pricing and Commitments** screen.

However, if you override a price list pricing and create a customer or account agreed pricing for the entity, the system does not delete the customer or account agreed pricing when the assigned price list is removed from the deal.

The system enables you to select or deselect all price items within a root level or non-root level hierarchy entity by selecting the check box corresponding to the root level or non-root level hierarchy entity. On clicking the check box corresponding to the root level hierarchy entity, all the subsequent non-root level hierarchy entities and their price items are selected.

## Price Item and Hierarchy Entity Selection in a Deal Based on Characteristic Value

---

The system provides an alternative solution wherein the price items and hierarchy entities are automatically selected based on their characteristic in the **Price Item Group Selection** screen. Two new algorithm spots named **Price Item Group List Filter** and **Price Item Selection Validation** are available while defining a deal type. A new algorithm type named **C1-DPIG-ELIG** is introduced in this release. This algorithm checks whether the characteristic type specified in the parameter is defined on each price item and hierarchy entity. A new characteristic type named **C1\_SEL\_T** is shipped with the product. It has three predefined values - **Standard**, **Mandatory**, and **Optional**. On accessing the **Price**

**Item Group Selection** screen of an entity for the first time in a deal, the system checks whether the **C1-DPIG-ELIG** algorithm is attached to the **Price Item Group List Filter** system event in the respective deal type.

If the **C1-DPIG-ELIG** algorithm is not attached to the **Price Item Group List Filter** system event in the respective deal type, the system behaves in the traditional manner. However, if the **C1-DPIG-ELIG** algorithm is attached to the **Price Item Group List Filter** system event in the respective deal type, the system checks whether the characteristic type specified in the **C1-DPIG-ELIG** algorithm is defined for each price item and hierarchy entity. If so, the system behavior for each price item and hierarchy entity varies depending on the value defined for the **C1\_SEL\_T** characteristic type on the respective price item and hierarchy entity. The following table explains the significance of each predefined characteristic value:

Characteristic Value	System Behavior
Standard	If the characteristic value is set to <b>Standard</b> , the system, by default, selects the check box corresponding to the price item or hierarchy entity in the <b>Price Item Group Selection</b> screen. The check box is editable. If the <b>C1_SEL_T</b> characteristic of a parent entity in the price item hierarchy is set to <b>Standard</b> , the system checks the <b>C1_SEL_T</b> characteristic of each child entity in the respective hierarchy and behaves based on the value defined for the <b>C1_SEL_T</b> characteristic type on the respective child entity.
Mandatory	If the characteristic value is set to <b>Mandatory</b> , the system, by default, selects the check box corresponding to the price item or hierarchy entity in the <b>Price Item Group Selection</b> screen. The check box is non-editable. If the <b>C1_SEL_T</b> characteristic of a parent entity in the price item hierarchy is set to <b>Mandatory</b> , the system checks the <b>C1_SEL_T</b> characteristic of each child entity in the respective hierarchy and behaves based on the value defined for the <b>C1_SEL_T</b> characteristic type on the respective child entity.
Optional	If the characteristic value is set to <b>Optional</b> , the system, by default, does not select the check box corresponding to the price item or hierarchy entity in the <b>Price Item Group Selection</b> screen. The check box is editable. If the <b>C1_SEL_T</b> characteristic of a parent entity in the price item hierarchy is set to <b>Optional</b> , the system does not check the <b>C1_SEL_T</b> characteristic of each child entity in the respective hierarchy and considers all the child and grandchild entities as optional.

The following table illustrates how the price items and hierarchy entities would be selected based on their characteristic value:

Level 1	Level 2	Level 3	Characteristic Value	Check Box Selected (Y or N)	Check Box Disabled (Y or N)
PG1	-	-	Standard	Y	N
	PG2	-	Mandatory	Y	Y
		PI1	Mandatory	Y	Y
		PI2	Optional	N	N
	PI3	-	Standard	Y	N
	PI4	-	Optional	N	N
	PG3	-	Optional	N	N
		PI5	Mandatory	Y	Y
		PI6	Standard	Y	N

If a user deselects a price item or hierarchy entity, the system deselects all the child entities including the mandatory entity (if any) in the respective hierarchy. However, if a user selects a price item (for example, PI1 in the above example which was deselected earlier), the system does the following:

- Checks the **C1\_SEL\_T** characteristic of other siblings (i.e. PI2) in the hierarchy and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective sibling entity.
- Selects the check box corresponding to the immediate parent and its grandparent hierarchy entities (i.e. PG2 and PG1) in the price item hierarchy.
- Checks the **C1\_SEL\_T** characteristic of the child entities in the parent and grandparent hierarchies (i.e. PI3, PI4, PG3) and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective child entity.

However, if a user selects a hierarchy entity (i.e. PG2), the system does the following:

- Checks the **C1\_SEL\_T** characteristic of the child entities (i.e. PI1 and PI2) in the respective hierarchy and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective child entity.
- Selects the check box corresponding to the immediate parent and its grandparent hierarchy entities (i.e. PG1) in the price item hierarchy.
- Checks the **C1\_SEL\_T** characteristic of the child entities in the parent and grandparent hierarchies (i.e. PI3, PI4, PG3) and behaves based on the value defined for the **C1\_SEL\_T** characteristic type on the respective child entity.

You can opt to validate the selection (if required) by designing a custom logic and then attaching the algorithm to the **Price Item Selection Validation** system event of the respective deal type. On clicking the **Save & View Pricing & Commitment** button, the system will invoke the algorithm attached to the **Price Item Selection Validation** system event and accordingly validate the price item and hierarchy entity selection of an entity in the deal.

Earlier, while using the search filter in the **Price Item Group Selection** screen, the system used to extract only those price items and hierarchy entities which met the search criteria. Now, the system highlights the price item hierarchies in the entire set with either the green or grey color. Two shades of grey are used - one highlights the entire price item hierarchy where none of price items or hierarchy entities meet the search criteria, and another highlights the price item hierarchy where one or more price items or hierarchy entities but not all meets the search criteria. The system highlights the price item hierarchy with the green color when all its price items or hierarchy entities meet the search criteria. Two new icons named **Up** and **Down** are available in the **Search Criteria** section which enable you to quickly jump from one search result to another (highlighted in the green color).

Now, on clicking the **Select All** button in the **Price Item Group Selection** screen, the system selects all the hierarchy entities and price items irrespective of the **C1\_SEL\_T** characteristic value. However, on clicking the **Deselect All** button in the **Price Item Group Selection** screen, the system deselects all the hierarchy entities and price items except the ones where the **C1\_SEL\_T** characteristic value is set to **Mandatory**.

## Seasonal Pricing for Price Items in a Deal

---

Oracle Revenue Management and Billing enables the relationship manager to create a seasonal pricing for a price item. This feature enables the relationship manager to offer different rates for a price item for different periods. You can create a seasonal pricing for a price item by overriding the proposed pricing of the price item which is effective from the deal start date. While creating a seasonal pricing, you need to ensure the following:

- Start and end dates are specified in the seasonal pricing
- Start date is later than the deal start date
- End date is not later than the date which is calculated using the start date and number of months specified in the **Validity Period for Deal in Months** option type of the **C1-Deal** feature configuration
- Price assignment type of the seasonal pricing should be same as the proposed pricing which is overridden

If the proposed pricing which you are overriding to create the seasonal pricing is open-ended (i.e. the end date is not specified in the proposed pricing), the system automatically ends the proposed pricing of the price item. The end date of the proposed pricing is set to Seasonal Pricing Start Date - 1.

You can define more than one seasonal pricing for a price item which is effective during a different date range. However, note that you cannot define more than 10 seasonal pricing for a customer or an account. Along with the proposed pricing,

the system sends the seasonal pricing of a price item for product, division, and deal level approval. An approver can only approve the seasonal pricing, but cannot recommend a change in the seasonal pricing. An approver can approve the seasonal pricing when the average price falls within the floor and ceil limits of the approver. The relationship manager or approver can send the seasonal pricing of a price item to the price item manager for approval. In such case, the price item manager can view both proposed and seasonal pricing for the price item. But, the price item manager can only approve the seasonal pricing of the price item.

You cannot specify the commitments for the seasonal pricing in the deal. By default, the system considers the commitments of the proposed pricing while calculating the revenue from the seasonal pricing. Also, the system does not consider the seasonal pricing of a price item while calculating the product, division, and deal level financial summary. The system only considers the proposed pricing of a price item while calculating the product, division, and deal level financial summary. You can view the revenue generated for a price item from the seasonal pricing in the **Pricing and Commitments** screen.

If the seasonal pricing is created for a price item with the assignment level other than **Customer Agreed** or **Account Agreed**, the system will automatically consider the proposed pricing of the price item after the seasonal pricing's effective end date. However, if the seasonal pricing is created for a price item with the assignment level as **Customer Agreed** or **Account Agreed**, the relationship manager will have to create a new seasonal pricing for the price item for the remaining deal period.

The following table illustrates different seasonal pricing scenarios at different assignment levels:

Scenario	Assignment Level	Proposed Pricing		Seasonal Pricing	
		Start Date	End Date	Start Date	End Date
Scenario 1	Customer Price List or Account Price List	01-01-2021	31-12-2021	01-03-2021	30-06-2021
Scenario 2	Customer Agreed or Account Agreed	01-01-2021	31-12-2021	01-02-2021	31-05-2021

In scenario 1, the system considers the proposed pricing of the price item after the seasonal pricing of the price item is expired. However, in scenario 2, the relationship manager will have to create a new seasonal pricing for the price item which is effective from 01-06-2021 to 31-12-2021.

## Include Customer Hierarchy in a Deal

Earlier, while creating a deal for an existing customer, the system, by default, considered all child and grandchild persons and their accounts in the customer hierarchy. Now, the system facilitates you to indicate whether you want to consider all child and grandchild persons and their accounts in the customer hierarchy while creating a deal.

A new option named **Include Hierarchy** is introduced in this release. It appears when the entity type is set to **Customer** and simulation type is set to **Customer** while creating a deal. If you select the **Include Hierarchy** option while creating a deal, the system considers all child and grandchild persons and their accounts in the customer hierarchy. Note that if you select a reference customer while creating a deal for an existing customer, the system considers all child and grandchild persons and their accounts in the referenced customer's hierarchy irrespective of whether the **Include Hierarchy** option is selected or not.

## Contracted Deal

At present, the relationship manager of a deal can offer a customer or account agreed pricing for a price item or can inherit the pricing for a price item from a price list. If you inherit the pricing for a price item from a price list in a deal and if you change the price item pricing in the price list after orchestrating the deal, the price list is updated in the system.

As a result, the pricing offered for a price item to an entity in the deal is overridden. Oracle Revenue Management and Billing enables you to handle this issue by creating a contracted deal.

A new option named **Contracted Deal** is introduced in this release. If you select the **Contracted Deal** option while creating a deal for an existing customer, account, or prospect, any change in the price item pricing of the price list (after orchestration) will not affect the price item pricing offered in the deal.

The **Contracted Deal** option works in conjunction with a new option named **Variable Price** which is available while defining a price item. If the **Variable Price** option is selected for a price item, the system will inherit the pricing for the price item from the price list. In such case, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system.

However, if the **Variable Price** option is not selected for a price item, the system will create a customer or account agreed pricing for the price item, whose pricing is inherited from the price list, whenever the relationship manager orchestrates the deal. In such case, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe. Note that the system creates a customer or account agreed pricing for the price item whose pricing is inherited from the price list only when the commitments are specified for the price item in the deal. If the commitments are not specified for the price item in the deal, the system does not create customer or account agreed pricing for the price item, whose pricing is inherited from the price list. In such case, the system ignores the price items without commitments. It neither creates an error message nor creates a To Do to indicate the error that occurred while creating the price assignments during orchestration.

While accepting a contracted deal, you need to specify the customer acceptance end date. The system then uses the customer acceptance end date as the effective end date while creating the customer or account agreed price assignments during orchestration.

**Note:** You cannot define seasonal pricing for a price item in a contracted deal.

## Deal Inactivation

Oracle Revenue Management and Billing enables the relationship manager to create multiple deals and deal versions until he reaches the best-optimized deal for a customer. Most of the deals which are created to check multiple permutation combinations to reach the best deal are later not updated in the system. Oracle Revenue Management and Billing provides the ability to automatically inactivate such deals which are not active in the system for a long time. The system stamps the last updated date on a deal when an action is performed on the deal or when there is a change in the deal status.

To automatically inactivate the deals which are not updated in the system for a long time, you need to:

- Attach an algorithm which is created using the **C1-INACDEAL** algorithm type to the **Deal Inactivation** system event in the required deal types.
- Set the following fields in the required deal types:
  - **Days to Inactivate Deal** - Used to indicate the number of days after which the deal should be inactivated when it is not active in the system. Here, you must specify a numeric value greater than zero. The numeric value should be greater than the values specified in the **To Do Reminder Days** and **To Do High Priority Days** fields. This field is required when the deal inactivation algorithm is attached to the deal type.
  - **To Do Reminder Days** - Used to indicate the number of days using which the system calculates the first To Do reminder date.
  - **To Do High Priority Days** - Used to indicate the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.

The deal inactivation algorithm (i.e. **C1-INACDEAL**) does the following:

- Calculates the following dates for the deal:
  - **Deal Inactivation Date** = Last Updated Date + Days to Inactivate Deal
  - **First To Do Reminder Date** = Deal Inactivation Date - To Do Remainder Days
  - **Second To Do Remainder Date** = Deal Inactivation Date - To Do High Priority Days

- Creates two reminder notifications (i.e. To Dos) for the relationship manager which indicates that the system will inactivate the deal on a particular date if no actions are performed on it before the deal inactivation date. The reminder notifications are sent when the First To Do Reminder Date or Second To Do Remainder Date is equal to the system date.
- Changes the status of the deal to **Inactive** when the deal inactivation date is equal to the system date.

This algorithm is triggered when the **Deal Monitoring (C1\_DLMTR)** batch is executed. The **Deal Monitoring (C1\_DLMTR)** batch considers all deals which are in the following status:

- Draft
- Error
- Hierarchy Creation Deferred
- Pending For Approval
- Pending Simulation
- Ready For Approval
- Simulated
- Simulation Deferred

For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*. Once a deal is inactivated, you can only view the profitability details of its deal version and extract the deal version information in the PDF and Excel formats. If the inactivated deal has simulation date, then its deal version is available for deal comparison. All other functionalities, such as viewing approval workflow, finalizing deal, accepting deal, rejecting deal, deal orchestration, reviewing deal, etc. are not available for an inactivated deal. Also, you cannot refer an inactivated deal or use an inactivated deal as a template deal.

## Average Price Validation Using Floor and Ceil Limits

---

Until now, the system ensured that the relationship manager, division level or deal level approver, and price item manager could approve the average price of a price item in a deal when it is within the absolute floor and ceil limits of the respective To Do role. Now, in addition, the system provides the following features:

- Validate Average Price Using Spread Amount or Spread Percentage
- Validate Average Price Against Eligible Price List Pricing

On simulating the deal, the system checks whether the **Price Item Approval Required** field is set to **Yes** in the respective deal type. If the **Price Item Approval Required** field is set to **Yes**, the system derives the eligible price lists for the customer using the division, customer segment, and customer tier attributes. If one or more eligible price lists exist for the customer, the system checks whether a price assignment for the price item exists in any of the eligible price list. If the price assignment exists for the price item in an eligible price list, the system checks whether the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Absolute Value Range**, **Spread Amount**, or **Spread Percentage**. The system does the following depending on the value specified in the **Average Price Floor and Ceil Limits** field:

- **Absolute Value Range** - If the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Absolute Value Range**, the system checks whether the average price of the price item in the deal is within the floor and ceil limits of the relationship manager's To Do role. If the pricing currency is different from the floor and ceil currency, the system does the currency conversion. If the average price of the price item in the deal is within the absolute floor and ceil limits, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the absolute floor and ceil limits, the status of the price item remains as **Pending for Approval**.
- **Spread Amount** - If the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Spread Amount**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

Average Price = Price Item Revenue/Price Item Commitments

The system then considers the spread amount specified for the relationship manager's To Do role in the price assignment. Using the spread amount and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- **Spread Percentage** - If the **Average Price Floor and Ceil Limits** field in the price assignment is set to **Spread Percentage**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread parentage specified for the relationship manager's To Do role in the price assignment. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

If the absolute floor and ceil limits, spread amount, or spread percentage is not defined for the To Do role in the price assignment, the system checks whether the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, **Spread Amount**, or **Spread Percentage**. The system does the following depending on the value specified in the **Average Price Floor and Ceil Limits** field:

- **Absolute Value Range** - If the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, the system checks whether the average price of the price item in the deal is within the floor and ceil limits of the relationship manager's To Do role. If the pricing currency is different from the floor and ceil currency, the system does the currency conversion. If the average price of the price item in the deal is within the absolute floor and ceil limits, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the absolute floor and ceil limits, the status of the price item remains as **Pending for Approval**.
- **Spread Amount** - If the **Average Price Floor and Ceil Limits** field in the price item is set to **Spread Amount**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread amount specified for the relationship manager's To Do role in the price item. Using the spread amount and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- **Spread Percentage** - If the **Average Price Floor and Ceil Limits** field in the price item is set to **Spread Percentage**, the system calculates the average price of the price assignment. If a flat pricing is defined in the price assignment, the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread parentage specified for the relationship manager's To Do role in the price item. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

However, if the absolute floor and ceil limits, spread amount, or spread percentage is not defined for the To Do role in the price item, the system changes the status of the price item to **Error**. If the system could not derive a price assignment for

the price item from any of the eligible price list, the system checks whether the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, **Spread Amount**, or **Spread Percentage**. If the **Average Price Floor and Ceil Limits** field in the price item is set to **Absolute Value Range**, the system validates the average price of the price item in the deal using the absolute floor and ceil values of the respective To Do role. But, if the **Average Price Floor and Ceil Limits** field in the price item is set to **Spread Amount** or **Spread Percentage**, the system changes the status of the price item to **Error**.

Similarly, the system validates the average price of a price item when the product level approver, division level approver, deal level approver, or price item manager approves the price item in a deal.

## Considering Pass Through Charges While Calculating Original Revenue

---

The system considers the recurring and non-recurring pass through charges of an account while calculating the original revenue of the account and customer in a deal. It also considers the recurring and non-recurring pass through charges which are generated through the **Transaction Aggregation** process (in the **Transaction Feed Management (TFM)** module). The system does the following while deriving the recurring and non-recurring pass through charges of an account:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date specified in the deal
2. Considers those billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates
3. Calculates the pass through charges for the usage period in the deal frequency
4. Converts the pass through charges in the account's invoice currency and deal currency when the pass through charges are in the different currency

You can view the pass through charges of a price item which are billed to the account in the **Pass Through Charge Information** section of the **Pricing and Commitments** screen. The system enables you to derive the pass through charges of an account in either of the following mode:

- **Online Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **N**, the system derives the recurring and non-recurring pass through charges of an account in the online mode. The online mode means that the pass through charges of an account are derived for the usage period in the deal frequency at the runtime when you view the pricing and commitment details of the account.
- **Deferred Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **Y**, the system derives the recurring and non-recurring pass through charges of an account in the deferred mode (i.e. in the background). The deferred mode means when you execute the following batches:
  - **Aggregate Account's Volume and Count (PREAGGR)** - The **Aggregate Account's Volume and Count (PREAGGR)** batch derives the recurring and non-recurring pass through charges of an account for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_CHARGE\_AGGR** table. If you want to derive the pass through charges of an account in the deferred mode, you need to execute the **Aggregate Account's Volume and Count (PREAGGR)** batch before creating a deal for an existing account. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.
  - **Aggregate Customer's Volume and Count (CSTPREAG)** - The **Aggregate Customer's Volume and Count (CSTPREAG)** batch aggregates the pass through charges of all accounts of a customer for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_CHARGE\_AGGR** table. If you want to aggregate the pass through charges of all accounts of a customer in the deferred mode, you need to execute the **Aggregate Customer's Volume and Count (CSTPREAG)** batch after executing the **Aggregate Account's Volume and Count (PREAGGR)** batch. For more information about these batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

The system then extracts the pass through charges of an account from the **C1\_CHARGE\_AGGR** table while creating a deal. We recommend you to use this mode to experience a better system performance.

### Recurring Pass Through Charge Calculation

Let us understand how the recurring pass through charges are calculated for a usage period in a deal frequency.

**Example 1:**

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following recurring pass through charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	Bill Period	Monthly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jan-20	31-Mar-20	Bill Period	Monthly	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Apr-20	31-May-20	Bill Period	Monthly	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

Now, while calculating the original revenue, the system derives the recurring pass through charges for the usage period in the deal frequency. To derive the recurring pass through charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
```

2. Considers those recurring billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	Bill Period	Monthly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2

3. Derives the final start and end dates for the selected billable charges in the following manner:

```
Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date -
whichever is earlier
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jul-20	31-Aug-20	Bill Period	Monthly	100 + 200 = 300 INR	PI1	2-Jul-20	1-Aug-20
15-Jul-20	20-Aug-20	Bill Period	Monthly	150 + 350 = 500 INR	PI2	15-Jul-20	1-Aug-20

4. Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Monthly** bill period contains the following schedules:

Bill Date	Bill Segment End Date
1-Jan-20	31-Jan-20
1-Feb-20	29-Feb-20
1-Mar-20	31-Mar-20
1-Apr-20	30-Apr-20
1-May-20	31-May-20
1-Jun-20	30-Jun-20
1-Jul-20	31-Jul-20
1-Aug-20	31-Aug-20

In such case, the system will derive the factor using the bill period in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Bill Period Schedules between which Final Start and End Dates Fall)
1-Jul-20	31-Aug-20	Bill Period	Monthly	100 + 200 = 300 INR	PI1	2-Jul-20	1-Aug-20	2
15-Jul-20	20-Aug-20	Bill Period	Monthly	150 + 350 = 500 INR	PI2	15-Jul-20	1-Aug-20	2

- Multiplies the total pass through charges with the factor, and thereby derives the final pass through charges in the following manner:

Total Recurring Pass Through Charges of PI1 =  $(300 \times 2) = 600$  INR  
 Total Recurring Pass Through Charges of PI2 =  $(500 \times 2) = 1000$  INR

- Calculates the pass through charges for the usage period in the deal frequency in the following manner:

Recurring Pass Through Charges of PI1 for the Usage Period in the -  
 Deal Frequency =  $(\text{Total Recurring Pass Through Charges of PI1} \times \text{Deal Frequency}) / \text{Usage Period} = (600 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 1800$  INR  
 Recurring Pass Through Charges of PI2 for the Usage Period in the -  
 Deal Frequency =  $(\text{Total Recurring Pass Through Charges of PI2} \times \text{Deal Frequency}) / \text{Usage Period} = (1000 \times 3 \text{ (i.e. Quarterly)}) / 1 \text{ (i.e. Monthly)} = 3000$  INR

- Converts the pass through charges in the deal currency (i.e. USD) using the available exchange rate (for example, 0.013):

Recurring Pass Through Charges of PI1 in USD =  $1800 \times 0.013 = 23.4$  USD -  
 Recurring Pass Through Charges of PI2 in USD =  $3000 \times 0.013 = 39$  USD -

In this way, the system calculates and derives the recurring pass through charges for the A1 account in the D1 deal.

### Example 2:

A deal is created for an account named A2 where the deal start date is set to 01-Jan-2020, deal end date is set to 28-Feb-2020, deal currency is set to USD, price selection date is set to 20-Jan-2020, usage period is set to Annually, and deal frequency is set to Quarterly. Let us assume that the following recurring pass through charges exists for the A2 account where the invoice currency is set to EURO:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

Now, while calculating the original revenue, the system derives the recurring pass through charges for the usage period in the deal frequency. To derive the recurring pass through charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 20-Jan-2020
Usage End Date = Price Selection Date = 20-Jan-2020
Usage Start Date = Usage End Date -- Usage Frequency = 20-Jan-2020 -- 1 -
Year (i.e. Annually)= 21-Jan-2019
Usage Period = 21-Jan-2019 to 20-Jan-2020
```

2. Considers those recurring billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A2 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

3. Derives the final start and end dates for the selected billable charges in the following manner:

```
Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date -
whichever is earlier
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	150 + 350 = 500 INR	PI2	21-Jan-19	31-Dec-19
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	125 + 325 = 450 INR	PI2	1-Jun-19	20-Jan-20
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	100 + 450 = 550 INR	PI1	1-Jan-20	20-Jan-20

4. Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Quarterly** invoice frequency contains the following periodic intervals:

Start Date	End Date
1-Jan-19	31-Mar-19
1-Apr-19	30-Jun-19
1-Jul-19	30-Sep-19
1-Oct-19	31-Dec-19
1-Jan-20	31-Mar-20
1-Apr-20	30-Jun-20
1-Jul-20	30-Sep-20
1-Oct-20	31-Dec-20

In such case, the system will derive the factor using the invoice frequency in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	Total Pass Through Charges	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Periodic Intervals between which Final Start and End Dates Fall)
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	150 + 350 = 500 INR	PI2	21-Jan-19	31-Dec-19	4
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	125 + 325 = 450 INR	PI2	1-Jun-19	20-Jan-20	4
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	100 + 450 = 550 INR	PI1	1-Jan-20	20-Jan-20	1

5. Multiplies the total pass through charges with the factor, and thereby derives the final pass through charges in the following manner:

Total Recurring Pass Through Charges of PI1 =  $(550 \times 1) = 550$  INR  
 Total Recurring Pass Through Charges of PI2 =  $(500 \times 4) + (450 \times 4) = -$   
 $2000 + 1800 = 3800$  INR

6. Calculates the pass through charges for the usage period in the deal frequency in the following manner:

Recurring Pass Through Charges of PI1 for the Usage Period in the -  
 Deal Frequency =  $(\text{Total Recurring Pass Through Charges of PI1} \times \text{Deal Frequency}) / \text{Usage Period} = (550 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = -$   
 $(1650 / 12) = 137.5$  INR  
 Recurring Pass Through Charges of PI2 for the Usage Period in the -  
 Deal Frequency =  $(\text{Total Recurring Pass Through Charges of PI2} \times \text{Deal Frequency}) / \text{Usage Period} = (3800 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = -$   
 $(11400 / 12) = 950$  INR

7. Converts the pass through charges in the account's invoice currency (i.e. EURO) and deal currency (i.e. USD) using the available exchange rates:

For example, to convert the pass through charges in the account's invoice currency, the exchange rate from INR to USD is 0.013:

Recurring Pass Through Charges of PI1 in USD =  $137.5 \times 0.013 = 1.79$  USD -  
 Recurring Pass Through Charges of PI2 in USD =  $950 \times 0.013 = 12.35$  USD -

For example, to convert the pass through charges in the deal currency, the exchange rate from INR to EURO is 0.012:

Recurring Pass Through Charges of PI1 in EURO =  $137.5 \times 0.012 = 1.65$  EURO -  
 Recurring Pass Through Charges of PI2 in EURO =  $950 \times 0.012 = 11.4$  EURO -

In this way, the system calculates and derives the recurring pass through charges for the A2 account in the D1 deal.

### Non-Recurring Pass Through Charge Calculation

Let us understand how the non-recurring pass through charges are calculated for a usage period in a deal frequency.

#### Example 3:

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following non-recurring pass through charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2
1-Jan-20	31-Mar-20	10	125 INR	20	325 INR	125 + 325 = 450 INR	PI2
1-Apr-20	31-May-20	10	100 INR	20	450 INR	100 + 450 = 550 INR	PI1

Now, while calculating the original revenue, the system derives the non-recurring pass through charges for the usage period in the deal frequency. To derive the non-recurring pass through charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
```

2. Considers those non-recurring billable charges with the pass through amount where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following non-recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	Line 1	Line 1 Amount	Line 2	Line 2 Amount	Total Pass Through Charges	Price Item
1-Jul-20	31-Aug-20	10	100 INR	20	200 INR	100 + 200 = 300 INR	PI1
15-Jul-20	20-Aug-20	10	150 INR	20	350 INR	150 + 350 = 500 INR	PI2

3. Derives the former start date and latter end date of the billable charges in the following manner:

```
Former Start Date = Compare the Start Dates of All Billable Charges and -
Reterive the Earliest Start Date -
Latter End Date = Compare the End Dates of All Billable Charges and -
Reterive the Latest End Date
```

In this case, the former start date is 01-Jul-2020 and latter end date is 31-Aug-2020.

4. Derives the number of months between the former start date and latter end date. In this case, the number of months between 01-Jul-2020 and 31-Aug-2020 is 2.
5. Derives the monthly non-recurring pass through charges in the following manner:

```
Monthly Non-Recurring Pass Through Charges of PI1 = Total Non-Recurring -
Pass Through Charges of PI1/Number of Months between Former Start and -
Latter End Dates = 300/2 = 150 INR
Monthly Non-Recurring Pass Through Charges of PI2 = Total Non-Recurring -
Pass Through Charges of PI2/Number of Months between Former Start and -
Latter End Dates = 500/2 = 250 INR
```

6. Calculates the non-recurring pass through charges for the usage period in the deal frequency in the following manner:

```
Non-Recurring Pass Through Charges of PI1 for the Usage Period in the -
Deal Frequency = (Monthly Non-Recurring Pass Through Charges * Deal -
Frequency)/Usage Frequency = (150 * 3 (i.e. Quarterly))/1(i.e. Monthly) = -
(450/1) = 450 INR
Non-Recurring Pass Through Charges of PI2 for the Usage Period in the -
Deal Frequency = (Monthly Non-Recurring Pass Through Charges * Deal -
Frequency)/Usage Frequency = (250 * 3 (i.e. Quarterly))/1(i.e. Monthly) = -
(750/1) = 750 INR
```

7. Converts the pass through charges in the deal currency (i.e. USD) using the available exchange rate (for example, 0.013):

```
Non-Recurring Pass Through Charges of PI1 in USD = 450*0.013 = 5.85 USD -
Non-Recurring Pass Through Charges of PI2 in USD = 750*0.013 = 9.75 USD -
```

In this way, the system calculates and derives the non-recurring pass through charges for the A1 account in the D1 deal.

## Considering SQI Based Billable Charges While Calculating Commitments

---

The system considers the recurring and non-recurring SQI based billable charges of an account while calculating the original and proposed commitments of the account and customer in a deal. It also considers the recurring and non-recurring SQI based billable charges which are generated through the **Transaction Aggregation** process (in the **Transaction Feed Management** (TFM) module). The system does the following while deriving the service quantities from the recurring and non-recurring billable charges of an account:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date specified in the deal
2. Considers those SQI based billable charges where the usage start or end date falls within the billable charge start and end dates
3. Calculates the service quantities for the usage period in the deal frequency

The system enables you to derive the service quantities from the recurring and non-recurring billable charges of an account in either of the following mode:

- **Online Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **N**, the system derives the service quantities from the recurring and non-recurring billable charges of an account in the online mode. The online mode means that the service quantities from the recurring and non-recurring billable charges of an account are derived for the usage period in the deal frequency at the runtime when you view the pricing and commitment details of the account.
- **Deferred Mode** - If you set the **Refer Volume Aggregation** option type of the **C1-DEAL** feature configuration to **Y**, the system derives the service quantities from the recurring and non-recurring billable charges of an account in the deferred mode (i.e. in the background). The deferred mode means when you execute the following batches:
  - **Aggregate Account's Volume and Count (PREAGGR)** - The **Aggregate Account's Volume and Count (PREAGGR)** batch derives the service quantities from the recurring and non-recurring billable charges of an account for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_VOLUME\_AGGR** table. If you want to derive the service quantities from the recurring and non-recurring billable charges of an account in the deferred mode, you need to execute the **Aggregate Account's Volume and Count (PREAGGR)** batch before creating a deal for an existing account. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.
  - **Aggregate Customer's Volume and Count (CSTPREAG)** - The **Aggregate Customer's Volume and Count (CSTPREAG)** batch aggregates the billed service quantities of all accounts of a customer for all deal frequencies (i.e. Monthly, Quarterly, Half Annually, and Annually) and stores the information in the **C1\_VOLUME\_AGGR** table. If you want to aggregate the billed service quantities of all accounts of a customer in the deferred mode, you need to execute the **Aggregate Customer's Volume and Count (CSTPREAG)** batch after executing the **Aggregate Account's Volume and Count (PREAGGR)** batch. For more information about these batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

The system then extracts the billed service quantities of an account from the **C1\_VOLUME\_AGGR** table while creating a deal. We recommend you to use this mode to experience a better system performance.

### Considering Recurring SQI Based Billable Charges for Commitment Calculation

Let us understand how the original and proposed commitments are calculated from the recurring SQI based billable charges for a usage period in a deal frequency.

#### Example 1:

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following recurring SQI based billable charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1
				Transaction Volume	25000	
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2
				Transaction Volume	50000	
1-Jan-20	31-Mar-20	Bill Period	Monthly	Number of Transactions	3500	PI2
				Transaction Volume	25000	
1-Apr-20	31-May-20	Bill Period	Monthly	Number of Transactions	4000	PI1
				Transaction Volume	25000	

Now, while calculating the original and proposed commitments, the system derives the service quantities from the recurring billable charges for the usage period in the deal frequency. To derive the service quantities from the recurring billable charges for the usage period in the deal frequency, the system does the following:

- Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```

Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
    
```

- Considers those recurring SQI based billable charges where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1
				Transaction Volume	25000	
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2
				Transaction Volume	50000	

- Derives the final start and end dates for the selected billable charges in the following manner:

```

Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date -
whichever is earlier
    
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1	2-Jul-20	1-Aug-20
				Transaction Volume	25000			
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2	15-Jul-20	1-Aug-20
				Transaction Volume	50000			

- Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Monthly** bill period contains the following schedules:

Bill Date	Bill Segment End Date
1-Jan-20	31-Jan-20
1-Feb-20	29-Feb-20
1-Mar-20	31-Mar-20
1-Apr-20	30-Apr-20
1-May-20	31-May-20
1-Jun-20	30-Jun-20
1-Jul-20	31-Jul-20
1-Aug-20	31-Aug-20

In such case, the system will derive the factor using the bill period in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Bill Period Schedules between which Final Start and End Dates Fall)
1-Jul-20	31-Aug-20	Bill Period	Monthly	Number of Transactions	1000	PI1	2-Jul-20	1-Aug-20	2
				Transaction Volume	25000				
15-Jul-20	20-Aug-20	Bill Period	Monthly	Number of Transactions	1500	PI2	15-Jul-20	1-Aug-20	2
				Transaction Volume	50000				

5. Multiplies the service quantities with the factor in the following manner:

Total Number of Transactions of PI1 = (1000\*2) = 2000  
Total Transaction Volume of PI1 = (25000\*2) = 50000

Total Number of Transactions of PI2 = (1500\*2) = 3000  
Total Transaction Volume of PI2 = (50000\*2) = 100000

6. Calculates the service quantities for the usage period in the deal frequency in the following manner:

Number of Transactions of PI1 for the Usage Period in the Deal Frequency -  
= (Total Number of Transactions of PI1 \* Deal Frequency)/Usage Frequency -  
= (2000 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 6000  
Number of Transactions of PI2 for the Usage Period in the Deal Frequency -  
= (Total Number of Transactions of PI2 \* Deal Frequency)/Usage Frequency -  
= (3000 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 9000

Transaction Volume of PI1 for the Usage Period in the Deal Frequency -  
= (Total Transaction Volume of PI1 \* Deal Frequency)/Usage Frequency = -  
(50000 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 150000  
Transaction Volume of PI2 for the Usage Period in the Deal Frequency -  
= (Total Transaction Volume of PI2 \* Deal Frequency)/Usage Frequency = -  
(100000 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 300000

In this way, the system derives the original and proposed commitments for the A1 account in the D1 deal.

**Example 2:**

A deal is created for an account named A2 where the deal start date is set to 01-Jan-2020, deal end date is set to 28-Feb-2020, deal currency is set to USD, price selection date is set to 20-Jan-2020, usage period is set to Annually, and deal frequency is set to Quarterly. Let us assume that the following recurring SQI based billable charges exists for the A2 account where the invoice currency is set to EURO:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2
				Transaction Volume	2500	
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2
				Transaction Volume	5000	
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1
				Transaction Volume	50000	

Now, while calculating the original and proposed commitments, the system derives the service quantities from the recurring billable charges for the usage period in the deal frequency. To derive the service quantities from the recurring billable charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 20-Jan-2020
Usage End Date = Price Selection Date = 20-Jan-2020
Usage Start Date = Usage End Date -- Usage Frequency = 20-Jan-2020 -- 1 -
Year (i.e. Annually)= 21-Jan-2019
Usage Period = 21-Jan-2019 to 20-Jan-2020
```

2. Considers those recurring SQI based billable charges where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following recurring billable charges of the A2 account:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2
				Transaction Volume	2500	
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2
				Transaction Volume	5000	
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1
				Transaction Volume	50000	

3. Derives the final start and end dates for the selected billable charges in the following manner:

```
Final Start Date = Billable Charge Start Date or Usage Period Start Date -
whichever is later
Final End Date = Billable Charge End Date or Usage Period End Date -
whichever is earlier
```

The following table indicates the final start and end dates for the selected billable charges:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2	21-Jan-19	31-Dec-19
				Transaction Volume	2500			
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2	1-Jun-19	20-Jan-20
				Transaction Volume	5000			
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1	1-Jan-20	20-Jan-20
				Transaction Volume	50000			

4. Derives the factor using the final start and end dates and recurring method in the following manner:

Let us assume that the **Quarterly** invoice frequency contains the following periodic intervals:

Start Date	End Date
1-Jan-19	31-Mar-19
1-Apr-19	30-Jun-19
1-Jul-19	30-Sep-19
1-Oct-19	31-Dec-19
1-Jan-20	31-Mar-20
1-Apr-20	30-Jun-20
1-Jul-20	30-Sep-20
1-Oct-20	31-Dec-20

In such case, the system will derive the factor using the invoice frequency in the following manner:

Billable Charge Start Date	Billable Charge End Date	Recurring Method	Bill Period	SQI	Service Quantity	Price Item	Final Start Date After Evaluation	Final End Date After Evaluation	Factor (Number of Periodic Intervals between which Final Start and End Dates Fall)
1-Jan-19	31-Dec-19	Invoice Frequency	Quarterly	Number of Transactions	500	PI2	21-Jan-19	31-Dec-19	4
				Transaction Volume	2500				
1-Jun-19	31-Mar-20	Invoice Frequency	Quarterly	Number of Transactions	750	PI2	1-Jun-19	20-Jan-20	4
				Transaction Volume	5000				
1-Jan-20	31-May-20	Invoice Frequency	Quarterly	Number of Transactions	1000	PI1	1-Jan-20	20-Jan-20	1
				Transaction Volume	50000				

5. Multiplies the service quantities with the factor in the following manner:

Total Number of Transactions of PI1 =  $(1000 \times 1) = 1000$   
 Total Transaction Volume of PI1 =  $(50000 \times 1) = 50000$

Total Number of Transactions of PI2 =  $(500 \times 4) + (750 \times 4) = 2000 + 3000 = 5000$   
 Total Transaction Volume of PI2 =  $(2500 \times 4) + (5000 \times 4) = 10000 + 20000 = 30000$

6. Calculates the service quantities for the usage period in the deal frequency in the following manner:

Number of Transactions of PI1 for the Usage Period in the Deal Frequency -  
 $= (\text{Total Number of Transactions of PI1} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (1000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (3000 / 12) = 250$   
 Number of Transactions of PI2 for the Usage Period in the Deal Frequency -  
 $= (\text{Total Number of Transactions of PI2} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (5000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (15000 / 12) = 1250$

Transaction Volume of PI1 for the Usage Period in the Deal Frequency -  
 $= (\text{Total Transaction Volume of PI1} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (50000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (150000 / 12) = 12500$   
 Transaction Volume of PI2 for the Usage Period in the Deal Frequency -  
 $= (\text{Total Transaction Volume of PI2} \times \text{Deal Frequency}) / \text{Usage Frequency}$   
 $= (30000 \times 3 \text{ (i.e. Quarterly)}) / 12 \text{ (i.e. Annually)} = (90000 / 12) = 7500$

In this way, the system derives the original and proposed commitments for the A2 account in the D1 deal.

### **Considering Non-Recurring SQI Based Billable Charges for Commitment Calculation**

Let us understand how the original and proposed commitments are calculated from the non-recurring SQI based billable charges for a usage period in a deal frequency.

#### **Example 3:**

A deal is created for an account named A1 where the deal start date is set to 01-Jul-2020, deal end date is set to 31-Aug-2020, deal currency is set to USD, price selection date is set to 01-Aug-2020, usage period is set to Monthly, and deal frequency is set to Quarterly. Let us assume that the following non-recurring SQI based billable charges exists for the A1 account where the invoice currency is set to INR:

Billable Charge Start Date	Billable Charge End Date	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Number of Transactions	100	PI1
		Transaction Volume	2500	
15-Jul-20	20-Aug-20	Number of Transactions	150	PI2
		Transaction Volume	5000	
1-Jan-20	31-Mar-20	Number of Transactions	350	PI2
		Transaction Volume	2500	
1-Apr-20	31-May-20	Number of Transactions	400	PI1
		Transaction Volume	2500	

Now, while calculating the original and proposed commitments, the system derives the service quantities from the non-recurring billable charges for the usage period in the deal frequency. To derive the service quantities from the non-recurring billable charges for the usage period in the deal frequency, the system does the following:

1. Derives the usage period (i.e. usage start date and usage end date) using the price selection date and usage frequency in the following manner:

```
Price Selection Date = 01-Aug-2020
Usage End Date = Price Selection Date = 01-Aug-2020
Usage Start Date = Usage End Date -- Usage Frequency = 01-Aug-2020 -- 1 -
Month (i.e. 30 days) = 02-Jul-2020
Usage Period = 02-Jul-2020 to 01-Aug-2020
```

2. Considers those non-recurring SQI based billable charges where the usage start or end date falls within the billable charge start and end dates. For example, the system considers the following non-recurring billable charges of the A1 account:

Billable Charge Start Date	Billable Charge End Date	SQI	Service Quantity	Price Item
1-Jul-20	31-Aug-20	Number of Transactions	100	PI1
		Transaction Volume	2500	
15-Jul-20	20-Aug-20	Number of Transactions	150	PI2
		Transaction Volume	5000	

3. Derives the former start date and latter end date of the billable charges in the following manner:

```
Former Start Date = Compare the Start Dates of All Billable Charges and -
Retain the Earliest Start Date -
Latter End Date = Compare the End Dates of All Billable Charges and -
Retain the Latest End Date
```

In this case, the former start date is 01-Jul-2020 and latter end date is 31-Aug-2020.

4. Derives the number of months between the former start date and latter end date. In this case, the number of months between 01-Jul-2020 and 31-Aug-2020 is 2.
5. Derives the monthly commitments in the following manner:

```
Monthly Number of Transactions of PI1 = Total Number of Transactions of -
PI1/Number of Months between Former Start and Latter End Dates = 100/2 = -
50
Monthly Number of Transactions of PI2 = Total Number of Transactions of -
PI2/Number of Months between Former Start and Latter End Dates = 150/2 = -
75
```

```
Monthly Transaction Volume of PI1 = Total Transaction Volume of PI1/
Number of Months between Former Start and Latter End Dates = 2500/2 = 1250
```

Monthly Transaction Volume of PI2 = Total Transaction Volume of PI2/  
 Number of Months between Former Start and Latter End Dates = 5000/2 = 2500

6. Calculates the commitments for the usage period in the deal frequency in the following manner:

Number of Transactions of PI1 for the Usage Period in the Deal Frequency -  
 = (Monthly Number of Transactions of PI1 \* Deal Frequency)/Usage -  
 Frequency = (50 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 150  
 Number of Transactions of PI2 for the Usage Period in the Deal Frequency -  
 = (Monthly Number of Transactions of PI2 \* Deal Frequency)/Usage -  
 Frequency = (75 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 225

Transaction Volume of PI1 for the Usage Period in the Deal Frequency = -  
 (Monthly Transaction Volume of PI1 \* Deal Frequency)/Usage Frequency = -  
 (1250 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 3750  
 Transaction Volume of PI2 for the Usage Period in the Deal Frequency = -  
 (Monthly Transaction Volume of PI2 \* Deal Frequency)/Usage Frequency = -  
 (2500 \* 3 (i.e. Quarterly))/1(i.e. Monthly) = 7500

In this way, the system derives the original and proposed commitments for the A1 account in the D1 deal.

## Stacking Commitments in Deal

Oracle Revenue Management and Billing enables you to stack commitments of a customer in a deal when a price assignment of its account is defined at the parent customer, grandparent customer, or at the sibling customer level in the customer hierarchy. Stacking means aggregating the service quantities of the customer, parent customers, grandparent customers, and sibling customers in the customer hierarchy. The system then derives the tiered pricing based on the stacked commitments of the customer instead of using the actual commitments of the account. To enable the stacking feature for a deal, you need to do the following:

- Ensure that the **Stacking Required (Y/N)** parameter is set to **Y** in the rate value algorithm of the required rate components
- Attach the **C1\_STACKDEAL** algorithm to the **Hierarchy Creation Completion** system event in the respective deal type

When you create a deal for an existing customer without reference, the system stacks the commitments (if required) and uses it as the original and proposed commitments of the customer during the customer hierarchy creation. The system then calculates the original and proposed average price and revenue using the stacked commitments of the customer. However, when you create a deal for an existing customer with reference or when you create a deal for an existing account with or without reference, the system stacks the commitments (if required) and uses it as the original commitments of the customer during the customer hierarchy creation. The system then calculates the original average price and revenue using the stacked commitments of the customer.

## Terms and Conditions Selection in a Deal Based on Characteristic Value

Earlier, the system, by default, did not select the deal, price item, or hierarchy entity level terms and conditions while creating a deal. You had to manually select the required terms and conditions for the deal, price items, and hierarchy entities.

Now, the system provides an alternative solution wherein the terms and conditions at the deal, price item, and hierarchy entity levels are automatically selected based on their characteristic in the **Terms and Conditions** screen. Two new algorithm spots named **Terms and Conditions Filter** and **Terms and Conditions Selection Validation** are available while defining a deal type. A new algorithm type named **C1-DEAL-TCFL** is introduced in this release. This algorithm checks whether the selection characteristic type specified in the parameter is defined on the deal, price item and hierarchy

entity level terms and conditions. A new characteristic type named **C1\_SEL\_T** is shipped with the product. It has three predefined values - **Standard**, **Mandatory**, and **Optional**. While creating a deal, the system checks whether the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type. If the **C1-DEAL-TCFL** algorithm is not attached to the **Terms and Conditions Filter** system event in the respective deal type, the system behaves in the traditional manner. However, if the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type, the system checks whether the selection characteristic type specified in the **C1-DEAL-TCFL** algorithm is defined for the deal, price item, and hierarchy entity level terms and conditions. If so, the system behavior for each terms and conditions varies depending on the value defined for the **C1\_SEL\_T** characteristic type on the respective terms and conditions. The following table explains the significance of each predefined characteristic value:

Characteristic Value	System Behavior
Standard	If the characteristic value is set to <b>Standard</b> , the system, by default, selects the check box corresponding to the deal, price item, or hierarchy entity level terms and conditions in the <b>Terms and Conditions</b> screen. The check box is editable.
Mandatory	If the characteristic value is set to <b>Mandatory</b> , the system, by default, selects the check box corresponding to the deal, price item, or hierarchy entity level terms and conditions in the <b>Terms and Conditions</b> screen. The check box is non-editable.
Optional	If the characteristic value is set to <b>Optional</b> , the system, by default, does not select the check box corresponding to the deal, price item, or hierarchy entity level terms and conditions in the <b>Terms and Conditions</b> screen. The check box is editable.

The following table explains the above scenarios with the help of an example:

Level	Terms and Conditions	Characteristic Value	Check Box Selected (Y or N)	Check Box Disabled (Y or N)
Deal	T1	Standard	Y	N
Deal	T2	Mandatory	Y	Y
Deal	T3	Optional	N	N
Price Item	T4	Standard	Y	N
Price Item	T5	Mandatory	Y	Y
Price Item	T6	Optional	N	N
Hierarchy Entity	T7	Standard	Y	N
Hierarchy Entity	T8	Mandatory	Y	Y
Hierarchy Entity	T9	Optional	N	N

If required, you can anytime deselect or select any standard or optional terms and conditions at the deal, price item, or hierarchy entity level. If the selection characteristic type is not specified in the **C1-DEAL-TCFL** algorithm or if the selection characteristic type is not defined for the terms and conditions, the system considers the terms and conditions as optional at the respective level.

You can opt to validate the selection (if required) by designing a custom logic and then attaching the algorithm to the **Terms and Conditions Selection Validation** system event of the respective deal type. On clicking the **Save** button, the system will invoke the algorithm attached to the **Terms and Conditions Selection Validation** system event and accordingly validate the terms and conditions selection at the deal, price item, or hierarchy entity level. Now, on clicking the **Select All** button in the **Terms and Conditions** screen, the system selects all the terms and conditions at the respective level irrespective of the **C1\_SEL\_T** characteristic value. However, on clicking the **Deselect All** button in the **Terms**

and **Conditions** screen, the system deselects all the terms and conditions at the respective level except the ones where the **C1\_SEL\_T** characteristic value is set to **Mandatory**.

## Terms and Conditions Grouping in a Deal Based on Characteristic Value

Oracle Revenue Management and Billing provides the ability to automatically group the terms and conditions at the deal, price item, and hierarchy entity levels based on their characteristic in the **Terms and Conditions** screen. Two new algorithm spots named **Terms and Conditions Filter** and **Terms and Conditions Selection Validation** are available while defining a deal type. A new algorithm type named **C1-DEAL-TCFL** is introduced in this release. This algorithm checks whether the grouping characteristic type specified in the parameter is defined on the deal, price item and hierarchy entity level terms and conditions. You need to create a characteristic type for terms and conditions grouping and define the group names as its predefined characteristic values.

While creating a deal, the system checks whether the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type. If the **C1-DEAL-TCFL** algorithm is attached to the **Terms and Conditions Filter** system event in the respective deal type, the system checks whether the grouping characteristic type specified in the **C1-DEAL-TCFL** algorithm is defined for the deal, price item, and hierarchy entity level terms and conditions. If so, the system logically groups the terms and conditions at the deal, price item, and hierarchy entity levels based on the group name (i.e. based on the value defined for the grouping characteristic type). If the **C1-DEAL-TCFL** algorithm is not attached to the **Terms and Conditions Filter** system event in the respective deal type or if the grouping characteristic type is not specified in the **C1-DEAL-TCFL** algorithm, or if the grouping characteristic is not defined for a terms and conditions, the system does not group the terms and conditions under any head.

The following table explains the grouping logic with the help of an example:

Level	Terms and Conditions	Characteristic Value
Deal	T1	G1
Deal	T2	G2
Deal	T3	G1
Deal	T10	-
Deal	T11	-
Price Item	T4	G3
Price Item	T5	G3
Price Item	T6	G3
Hierarchy Entity	T7	G4
Hierarchy Entity	T8	G4
Hierarchy Entity	T9	G4

In the above example, the system will group T1 and T3 under G1 and T2 under G2 at the deal level. Note that the system will not group T10 and T11 under any head at the deal level. Similarly, the system will group T4, T5, and T6 under G3 at the price item level and T7, T8, and T9 under G4 at the hierarchy entity level.

## Overriding Terms and Conditions in a Deal

Oracle Revenue Management and Billing enables you to override the default terms and conditions at the deal, price item, and hierarchy entity levels and add specific information related to the deal. The system maintains the edited version

of terms and conditions separately from the default version for each deal. You can view both the default and edited versions of the terms and conditions in the **Terms and Conditions** (Used for Editing in Deal) screen. On subsequent edits, the system overrides the edited version of the terms and conditions. The system highlights the edited and non-edited versions of the terms and conditions with different color scheme.

## Refreshing Terms and Conditions in a Deal

Oracle Revenue Management and Billing enables you to refresh the terms and conditions at the deal, price item, and hierarchy entity levels. On refreshing the terms and conditions, the system updates the terms and conditions based on their selection and grouping characteristics. Note that while refreshing the terms and conditions, the system loses the manual selection and deselection of terms and conditions and edited version of the terms and conditions. The adhoc terms and conditions are retained while refreshing the terms and conditions at the deal, price item, and hierarchy entity levels.

## Bespoke Price List Creation during Deal Orchestration

Deal pricing management offers the feasibility to create a pricing model that is suitable to the customer requirements with accustomed price and volume combination, and thereby achieve the optimal revenue, cost, and profitability. You can simulate the deal multiple times until the best financial summary is achieved.

You can also use the same pricing for other customers by creating new deals using the deal template option. Here, the drawback is that you will have to create a new deal for each customer or account to reuse the same pricing. To overcome this cumbersome process, the system enables you to create a bespoke price list which contains the latest pricing from the deal. You can assign a bespoke price list to another customers or accounts without creating a deal for them.

While orchestrating a non-contracted deal, the system does the following:

1. Ends the existing agreed or price list pricing of an entity which is overridden or edited in the deal
2. Creates a bespoke price list with the new price assignments and assigns the bespoke price list to the respective entity

However, while orchestrating a contracted deal, the system does the following:

1. Ends the existing agreed or price list pricing of an entity irrespective of whether it is changed or not
2. Creates a bespoke price list with the new price assignments and assigns the bespoke price list to the respective entity

**Note:** If the **Variable Price** flag for a price item is set to **Yes**, then the system does not create a bespoke pricing for the price item when there is no change in the rate offered for the price item in the deal.

**Note:** The system creates a separate bespoke price list for the entities at different levels in the customer hierarchy (i.e. for the customer, its account, child customer, and for the child customer's account).

You can opt to create an effective pricing or bespoke pricing for the customers and accounts during deal orchestration. Depending on the business requirements, you can set the **Create Bespoke Price List during Orchestration** option type of the **C1-DEAL** feature configuration. It indicates whether the system should create bespoke price lists or effective pricing for the customers and accounts during deal orchestration. The valid values are **Y** and **N**. This option type is not mandatory. If you do not set this option type, the system, by default, creates the effective pricing for the customers and accounts during deal orchestration.

If the **Create Bespoke Price List during Orchestration** option type is set to **Y**, you also need to set the **Assignment Limit for Online Deal Orchestration** option type in the **C1-DEAL** feature configuration. It is used to determine whether the bespoke price lists should be created and assigned to the customers and accounts in the online or deferred mode. Here, you must specify a value greater than or equal to zero. If the number of price assignments in the customer hierarchy does not exceed the specified limit, the system creates the bespoke price lists and assigns it to the customers and accounts immediately. However, if the number of price assignments in the customer hierarchy exceeds the specified limit, the system changes the status of the deal to **Orchestration Deferred**.

Note that in case of a contracted deal, the system considers all price assignments of the selected price items (including the selected price items from the assigned price lists) irrespective of whether it is changed or not; whereas in case of non-

contracted deal, the system considers only those price assignments of the selected price items (including the selected price items from the assigned price lists) which are edited or overridden. Also, note that for both contracted and non-contracted deals, the system does not consider the price assignments without commitments while using the **Assignment Limit for Online Deal Orchestration** option type.

A new batch named **C1\_ORCH** is introduced in this release. On executing the **C1\_ORCH** batch, it monitors or checks whether there is any deal in the **Orchestration Deferred** status. If there is a deal in the **Orchestration Deferred** status, the system behaves in the following manner:

- For a non-contracted deal, the system does the following:
  - Ends the existing agreed or price list pricing of an entity which is overridden or edited in the deal
  - Creates a bespoke price list with the new price assignments and assigns the bespoke price list to the respective entity
  - Copies a new proposed price list assignment and assigns the price list to the respective entity in the **Active** status
  - Copies a new proposed product enrollment and enrolls the respective account for the product in the **Active** status
- For a contracted deal, the system does the following:
  - Ends the existing agreed or price list pricing of an entity irrespective of whether it is changed or not
  - Creates a bespoke price list with the new price assignments and assigns the bespoke price list to the respective entity.

**Note:** If the **Variable Price** flag for a price item is set to **Yes**, then the system does not create a bespoke pricing for the price item when there is no change in the rate offered for the price item in the deal.

- Copies a new proposed price list assignment and assigns the price list to the respective entity in the **Active** status
- Copies a new proposed product enrollment and enrolls the respective account for the product in the **Active** status

The customer acceptance date is used as the start date while adding the bespoke price lists, price list assignments, price assignments, and product enrollments.

Once the above listed changes are made, the system changes the status of the deal to **Fully Orchestrated**. This batch is a multi-threaded batch. The multi-threading is based on deal ID and chunks for multi-threading are created based on numerical distribution of deal ID. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

To implement this feature, a new status named **Orchestration Deferred** is introduced in the lifecycle of the **C1-DEAL** business object.

Two new algorithm spots are available while defining or editing a deal type:

- **Bespoke Price List Pre-Processing** - Used to attach an algorithm which you want to execute before creating a bespoke price list for an entity during deal orchestration.
- **Bespoke Price List Post Processing** - Used to attach an algorithm which you want to execute after creating a bespoke price list for an entity during deal orchestration.

While creating a bespoke price list from the user interface or through a batch process, the system sets the description of the bespoke price list to **Bespoke\_<Deal\_Identifier>\_<Entity\_ID>**. Also, the priority of the bespoke price list is always set to the highest compared to other price lists which are assigned to the entity. If the existing assigned price lists have the highest priority, the system sets the priority of the bespoke price list to the highest and decreases the priority of the existing assigned price lists by 1. For example, an entity has PL1 assigned with the priority 1 and PL2 assigned with the priority 2. Now, when the system assigns a bespoke price list to the entity, it will set the priority of the bespoke price list to 1 and decrease the priority of PL1 and PL2 by 1 (i.e. PL1 priority will be set to 2, and PL2 priority will be set to 3).

**Note:** If no price list is assigned to the entity in the system, then the priority of the bespoke price list is set to 1. Note that the priority 1 is considered as the highest priority in ORMB.

## Assign Additional Price Items to Deal Entity

Until now, in a deal, you were able to simulate the revenue, cost, and profitability of those price items which are assigned to the customer hierarchy or are present in the assigned price lists. Now, the system enables you to:

- Add a price item to a deal which is not present in the customer hierarchy or assigned price list
- Add a pricing for a price item from a price list to a deal without assigning the price list to an entity in the deal
- Add a customer or account agreed pricing to a deal from another customer or account who is not included in the customer hierarchy

You can assign additional price items only to the entity for which the deal is created and not to any other entity in the customer hierarchy. A new button named **Additional Price Item** is available when you view or edit the pricing and commitment details of any entity in the customer hierarchy from the **Pricing and Commitments** screen. On clicking the **Additional Price Item** button, the **Pricing and Commitments** screen appears where you can define the pricing and commitments for a price item. If you want to assign an additional price item to the deal entity, you need to select the price item using the **Price Item Search** functionality. Once you select the price item, you need to specify other details in the **Main**, **TFM Information**, **Characteristics**, **Price Item Parameters**, and **Price Component** sections. However, if you want to copy a price list pricing, customer agreed pricing, or account agreed pricing, you need to select the price assignment using the **Price Assignment Search** functionality. Once the assignment details appear from the pricing which is copied, you can edit the assignment details based on the customer requirements.

### Note:

The **Price Item** and **Price Assignment ID** fields are non-editable.

You can only assign those price items to the deal entity which are associated with the division to which the deal entity belongs. Similarly, you can copy price assignments of those price items which are associated with the division to which the deal entity belongs. Note that you can copy only those price assignments which are in the **Active** status.

If an agreed pricing is effective for a price item and pricing parameters combination for the deal entity, you cannot define another agreed pricing for the same combination with an overlapping date range.

While assigning a price item or while copying a pricing, you need to specify the commitments for the price item. If the default commitments are defined in the respective deal type, the system will default the commitments from the deal type. You can then edit the commitments, if required.

On assigning a price item to the deal entity or on copying a price list pricing, customer agreed pricing, or account agreed pricing for the deal entity, the system creates a customer or account agreed pricing depending on the deal entity to which the price item is assigned. The assigned price item then appears in the **Additional Price Items** section of the **Price Item Selection** screen. The system does not display the hierarchy entity details of the price items in the **Additional Price Items** section.

The check box corresponding to the additional price item is, by default, selected and editable. If the check box corresponding to an additional price item is selected, the system considers the additional price item for simulation along with the other price items which are selected in the **Price Item Hierarchy** section.

While orchestrating the deal, an effective pricing or bespoke pricing would be created for the selected additional price items depending on the value set in the **Create Bespoke Price List during Orchestration** option type of the **C1-DEAL** feature configuration. If you set the **Deal Version Creation Method** field to **Copy From Current Version With Changes** while creating a new deal version, the system will also copy additional price items to the new deal version.

## Associate Price Items for Relationship Based Pricing in Deal

Oracle Revenue Management and Billing provides the ability to pair two or more price items along with the parameters and their values whose pricing is expected to be same in a deal. It enables you to associate a price item with other price

items, and thereby group price items to offer relationship based pricing for the associated price items in a deal. A new zone named **Associate Price Items for Relationship Based Pricing** is added in the **Price Item Relationship** screen. On clicking the **Add** link in the upper right corner of the **Associate Price Items for Relationship Based Pricing** zone, you can associate one or more price items with the parent price item to offer relationship based pricing in a deal. While associating the price items for relationship based pricing, you can specify the following:

- **Price Item** - Indicates the parent price item to which you want to associate other price items to offer relationship based pricing in a deal
- **Date Range** - You can specify the association start and end dates which indicates the period for which relationship based pricing is effective for the associated price items in a deal.
- **Parameters and Their Values** - You can associate or group two or more price items along with a set of parameters and their values. You can select the parameter using the **Parameter Search** functionality. While selecting a parameter, the system only allows you to select a parameter which is associated with the parent price item and which is effective on the association start date. Note that the selected parameter should also be associated with the other selected price items and should be effective on the association start date.
- **Division** - You can specify one or more divisions for which the relationship based pricing group is valid. You can select a division using the **Division Search** functionality. While selecting a division, the system only allows you to select a division which is associated with the parent price item.
- **Associated Price Items** - You can select a price item using the **Price Item Search** functionality. While selecting a price item, the system only allows you to select the price item which is associated to the parent price item's division.

While associating the price items for relationship based pricing, the system sets the relationship type of the associated price items using the **Associating Price Items For Relationship Type** option type of the **C1\_PRICING** feature configuration.

At a time, you can include a set of price items and pricing parameters in only one relationship based pricing group for a particular date range. You can view the relationship based pricing group of the parent price item from the **Price Item Relationship** screen. A new zone named **Associate Price Items for Relationship Based Pricing** is added in the **Price Item Relationship** screen. On clicking the **Broadcast** icon corresponding to a relationship based pricing group in the **Associate Price Items for Relationship Based Pricing** zone, the **Associate Price Item Relationship** zone appears where you can view the associated price items of the group.

The system allows you to edit a relationship based pricing group. However, you can only change the end date of the relationship based pricing group. You cannot delete a relationship based pricing group. However, you can end the relationship based pricing group by updating the end date.

While saving the changes in the **Price Item Selection** screen in a deal, the system checks whether any of the selected price items is a part of any relationship based pricing group which is effective on the deal start date. If so, the system checks whether all the price items from the relationship based pricing group are selected in the **Price Item Selection** screen. If so, the system considers all the associated or paired price items for simulation along with other selected price items. If not, the system throws an appropriate error message. You need to then ensure that all associated or paired price items from the relationship based pricing group are selected in the **Price Item Selection** screen.

If you override or edit a pricing of a price item in a deal, the system checks whether the price item is a part of any relationship based pricing group which is effective on the price assignment start date. If so, the system checks whether all the associated price items from the relationship based pricing group are selected for simulation. If so, the system automatically overrides or edits the pricing of other associated price items to ensure that the pricing offered across all the associated or paired price items in a deal is same. While overriding the pricing of an associated or paired price item, the system creates a customer agreed pricing for the associated or paired price item. Also, while editing the pricing of an associated or paired price item, if the customer agreed pricing is not available for the associated or paired price item, the system creates a customer agreed pricing for the associated or paired price item. Note that the system only automatically overrides or edits the pricing of the associated price items where the price assignment type is set to **Regular**.

## Send Email on To Do Generation for a Deal

---

Until now, the system created a To Do notification in the following scenarios:

Scenario...	To Do notification was sent to...
A deal was created and sent to the next level for approval	<ul style="list-style-type: none"> <li>Deal Creator (at Level 0) - To all users with the To Do role specified at Level 0</li> <li>Deal Approver (at Level 1) - To all users with the To Do role specified at Level 1</li> </ul>
A deal was approved or rejected by the approver (at Level 1)	<ul style="list-style-type: none"> <li>Deal Creator (at Level 0) - To all users with the To Do role specified at Level 0</li> <li>Deal Approver (at Level 1) - To all users with the To Do role specified at Level 1</li> </ul>
A deal was approved or rejected by the approver (at Level 3)	<ul style="list-style-type: none"> <li>Deal Creator (at Level 0) - To all users with the To Do role specified at Level 0</li> <li>Deal Approver (at Level 2) - To all users with the To Do role specified at Level 2</li> <li>Deal Approver (at Level 3) - To all users with the To Do role specified at Level 3</li> </ul>
A deal was sent to the next level (for example, Level 2) for approval by deal approver (at Level 1)	<ul style="list-style-type: none"> <li>Deal Creator (at Level 0) - To all users with the To Do role specified at Level 0</li> <li>Deal Approver (at Level 2) - To all users with the To Do role specified at Level 2</li> </ul>

Now, the system enables you to send an email notification when a To Do is generated for the deal creator and deal approver from the user interface or through a batch process. The following two algorithm types are introduced in this release:

- C1-EMAIL** - This algorithm creates an email notification whenever a To Do is created or updated. It is invoked when it is attached to the **To Do Post-Processing** algorithm spot of a To Do type. On creating a To Do or on updating a To Do which is in the **Open** status, the email notification is sent to all users with the To Do role at the respective approval level of the deal approval profile. However, while updating a To Do which is in the **Being Worked On** status, the email notification is sent only to the assigned user. It contains the following parameters:
  - Outbound Message Type** - Used to indicate the outbound message type using which you want to create an outbound message in the form of email notification.
  - External System** - Used to indicate the external system to which you want to send the outbound message in the form of email notification.
  - Email's From Address** - Used to specify the sender's email address which indicates from where the email notification is received.
  - Environment URL** - Used to specify the ORMB environment URL which is used while constructing a hyperlink for a database object.
  - Default Recipient** - Used to specify the default recipient's email address. This is used when there are no users with the To Do role specified at the respective approval level of the deal approval profile.
  - Email Body Creation Algorithm** - Used to indicate the algorithm that you want to invoke to create the email body.
  - Send Email for New To Do Entries** - Used to indicate whether an email notification should be sent only when a new To Do is generated. The valid values are - **Y** and **N**. If you set the value to **N**, the system sends an email notification not only when a new To Do is generated, but also when an existing To Do is updated.
  - Email Subject Message Category Number** - Used to indicate the message category whose message you want to use as an email subject line.
  - Email Subject Message Number** - Used to indicate the message that you want to use an email subject line. Note that we support variables in the subject line to ensure that appropriate subject line is added in the email notification.

- **C1-DLEMAILBD** - This algorithm creates an email body for the email notification. You can invoke this algorithm from the **C1-EMAIL** algorithm by specifying it against the **Email Body Creation Algorithm** parameter. This algorithm is designed and developed for the deal pricing management module. It creates an email body for an email notification which is generated while sending a deal for approval and while approving or rejecting a deal. It contains the following parameters:
  - **Field 1, Field 2, ..., Field 20** - Used to specify the deal related field whose data you want to present in the email notification. Here, you must specify the field which is already defined and added in the deal related tables.
  - **Characteristic 1, Characteristic 2, ..., Characteristic 5** - Used to specify the deal related characteristic whose data you want to present in the email notification. Here, you must specify the characteristic type where the characteristic entity is set to **Deal**.
  - **Deal Information Required** - Used to indicate whether the deal information string should appear in the email notification. The valid values are **Y** and **N**. The deal information string will have a hyperlink. On clicking the hyperlink, you can quickly access the application.
  - **Deal Financial Summary Required** - Used to indicate whether you want to include the deal financial summary in the email notification. The valid values are **Y** and **N**.
  - **Email Header Message Category Number** - Used to indicate the message category whose message you want to use as an email header.
  - **Email Header Message Number** - Used to indicate the message that you want to use as an email header.
  - **Email Footer Message Category Number** - Used to indicate the message category whose message you want to use as an email footer.
  - **Email Footer Message Number** - Used to indicate the message that you want to use as an email footer.

**Note:**

The system does not generate a To Do while approving or rejecting a deal when the deal approver is the deal creator.

When a To Do is created through a batch process (i.e. **C1\_HRC**, **C1\_SMLD**, and **C1\_DLMTR**), the system will create e-mail notification only for the deal creator and not for all the users with the To Do role specified at Level 0 in the deal approval profile.

To implement this feature, you need to do the following:

- Create an algorithm using the **C1-EMAIL** algorithm type and attach it to the **To Do Post-Processing** algorithm spot of all the To Do types which are used in the deal approval profiles
- Create an algorithm using the **C1-DLEMAILBD** algorithm type and attach it against the **Email Body Creation Algorithm** parameter in the **C1-EMAIL** algorithm

## Incremental Commitments for SQIs in a Deal

Until now, you were able to specify absolute and default commitments for the SQIs in a deal. Now, in addition, you can specify incremental commitments for the SQIs in a deal. A new option type named **Service Quantity Update Type** is introduced in the **C1-DEAL** feature configuration.

It is used to indicate whether you want to specify absolute or incremental commitments for the SQIs in the **Pricing and Commitments** screen. The valid values are:

- **AB** - Used when you want to specify absolute commitments for the SQIs in a deal.
- **AR** - Used when you want to specify an incremental value with respect to the original volume for the SQIs in a deal. The system will then derive the commitments by adding the specified value to the original volume.
- **PR** - Used when you want to specify an incremental value with respect to the proposed commitments for the SQIs in a deal. The system will then derive the revised commitments by adding the specified value to the proposed commitments.

Let us understand this with the help of an example.

Action	Service Quantity Update Type	Original Service Quantity	Proposed Service Quantity	Specified Service Quantity	Revised Proposed Service Quantity
ADD	AB	100	100	150	150
UPD	AB	200	250	300	300
ADD	AR	100	100	100	100+100=200
UPD	AR	150	150	50	150+50=200
ADD	PR	125	125	100	125+100=225
UPD	PR	100	225	75	225+75=300

The above table lists various scenarios which indicate how the proposed commitments are calculated based on the value specified in the **Service Quantity Update Type** option type of the **C1-DEAL** feature configuration.

If you do not set this option type, the system, by default, sets it to **AB**. This option type is not only referred while adding commitments for a price item and parameters combination from the user interface, but is also referred when the value for the **sqiUpdateTypeFlg** tag is not received while adding or updating commitments through an inbound web service.

## Comparison using Standard Pricing in a Deal

Until now, you were able to compare the product level, division level, and deal level financial summary using the original (i.e. existing) and proposed pricing in a deal. Now, the system enables you to compare the product level, division level, and deal level financial summary using the original (i.e. existing), proposed, and standard pricing. The standard pricing for a price item and pricing parameters combination is derived from the standard price list. Until now, the standard price list of an entity was used to verify the average price ceil and floor limits for a price item. Now, the pricing from the standard price list can also be used during deal simulation to obtain an optimal pricing for a customer.

A new field named **Standard Pricing Comparison** is available while defining or editing a deal type. If the **Standard Pricing Comparison** field is set to **Yes**, the system checks whether an algorithm is attached to the **Standard Price List Search** system event in the respective deal type while creating a deal.

If an algorithm is attached to the **Standard Price List Search** system event in the respective deal type, the system fetches all price lists where the **Available for Deal Pricing** and **Standard for Deal Pricing** fields are set to **Yes**. The system then derives the standard price list (from the result set) which is eligible for each entity in the deal. While deriving an eligible standard price list, the system checks whether the entity meets the eligibility criteria defined in the standard price list. If so, the system stores the eligible standard price list for an entity in the deal. If there are multiple eligible standard price lists for an entity, the system maintains a list of all eligible standard price lists for the entity and assigns a unique sequence number to each eligible standard price list.

On selecting the price items in the **Price Item Selection** screen, the system fetches the standard pricing for each price item and pricing parameters combination from the standard price list. If the standard pricing is available for a price item and pricing parameters combination, the system considers the same for calculating the profit and revenue statistics during deal simulation. However, if the standard pricing is not available for a price item and pricing parameters combination, the system does not calculate the profit and revenue statistics using the standard pricing during deal simulation.

If there are multiple eligible standard price lists for an entity, the system first searches the standard pricing for a price item and pricing parameters combination in a standard price list with the highest sequence number. If the standard pricing for a price item and pricing parameters combination is not available in the standard price list with the highest sequence number, the system considers the standard price list with the subsequent sequence number. If the standard pricing for a price item and pricing parameters combination is available in a standard price list with the subsequent sequence number, the system fetches the standard pricing for the price item and pricing parameters combination from the standard price list. In this way, the system sequentially checks each standard price list until the standard pricing for a price item and pricing parameters combination is derived. If the standard pricing is available for a price item and pricing parameters combination, the system considers the same for calculating the profit and revenue statistics during deal simulation. If

the standard pricing for a price item and pricing parameters combination is not available in any of the eligible standard price lists of the entity, the system does not calculate the profit and revenue statistics for the respective price item and pricing parameters combination during deal simulation.

Until now, three rows appeared for a price item and pricing parameters combination in the **Pricing and Commitments** screen - one row for the original pricing and commitments, another row for the proposed pricing and commitments, and third row for the recommended pricing and commitments (if any). Now, four rows will appear for a price item and pricing parameters combination in the **Pricing and Commitments** screen - one row for the original pricing and commitments, another row for the proposed pricing and commitments, third row for the standard pricing and commitments, and fourth row for the recommended pricing and commitments (if any). Note that the system defaults the proposed commitments for calculating profit and revenue statistics for a price item and pricing parameters combination using the standard pricing. If no standard pricing is derived for a price item and pricing parameters combination, an empty row appears for the price item and pricing parameters combination in the **Pricing and Commitments** screen. Different color code is used to differentiate between different rows for a price item and pricing parameters combination.

Similarly, until now, three rows appeared for an entity in the **Customer Hierarchy** section - one row where the profit and revenue statistics are calculated using the original pricing and commitments of the entity, another row where the profit and revenue statistics are calculated using the proposed pricing and commitments of the entity, and third row where the profit and revenue statistics are calculated using the using the recommended pricing and commitments (if any) of the entity. Now, in addition, one more row will appear where the profit and revenue statistics are calculated using the standard pricing and commitments (if any) of the entity. If no standard price list is derived for an entity, an empty row appears for the entity in the **Customer Hierarchy** section.

If the **Standard Pricing Comparison** field is set to **No**, the system does not derive the standard pricing for a price item and pricing parameters combination. No additional row will appear for the standard pricing against the entity and the price item and pricing parameters combination in the respective screens.

Now, while simulating a deal, the system calculates the following when the **Standard Pricing Comparison** field is set to **Yes** in the respective deal type:

- Deal level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the original pricing
- Deal level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the proposed pricing
- Deal level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the standard pricing
- Product level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the original pricing
- Product level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the proposed pricing
- Product level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the standard pricing
- Division level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the original pricing
- Division level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the proposed pricing
- Division level revenue, profit, profitability(%), revenue variation(%), and profit variation(%) using the standard pricing
- Revenue, profit, profitability(%), revenue variation(%), and profit variation(%) for each entity in the customer hierarchy using the original pricing
- Revenue, profit, profitability(%), revenue variation(%), and profit variation(%) for each entity in the customer hierarchy using the proposed pricing
- Revenue, profit, profitability(%), revenue variation(%), and profit variation(%) for each entity in the customer hierarchy using the standard pricing
- Revenue, profit, profitability(%), revenue variation(%), and profit variation(%) for each price item and pricing parameters combination using the original pricing
- Revenue, profit, profitability(%), revenue variation(%), and profit variation(%) for each price item and pricing parameters combination using the proposed pricing
- Revenue, profit, profitability(%), revenue variation(%), and profit variation(%) for each price item and pricing parameters combination using the standard pricing

**Note:**

The product level financial summary is calculated only when the **Product Level Approval Required** field is set to **Yes**.  
The division level financial summary is calculated only when the **Division Level Approval Required** field is set to **Yes**.

If the **Preference To Assigned Pricelist for Ceil Floor Limit Check** option type of the **C1-DEAL** feature configuration is set to **Y** and the **Standard Pricing Comparison** field is set to **Yes** in the respective deal type, the system overrides the feature configuration and validates the average price against the ceil and floor limits defined in the standard pricing. However, if no standard pricing is available for a price item and pricing parameters combination, the system does not validate the average price of the price item and pricing parameters combination.

**Note:**

At present, you cannot do the following:

- Extract the standard pricing and simulation data calculated using the standard pricing in the **Excel** or **PDF** format from the user interface
- Simulate the data using the standard pricing through an inbound web service
- Extract the standard pricing and simulation data calculated using the standard pricing through an inbound web service
- View profitability variation at the entity, price item, and deal levels from the **Deal Profitability** screen

## Original, Proposed, and Standard Simulation Data

---

Until now, you were able to view the original and proposed simulation data in the **Deal Information** and **Pricing and Commitments** screens. Now, a new field named **Compare Type** is available in the following sections:

- The **Customer Hierarchy** section of the **Deal Information** screen
- The **Pricing and Commitments** section of the **Pricing and Commitments** screen

It is used to indicate the simulation data that you want to view in the respective section. If the **Standard Pricing Comparison** field is set to **Yes** in the respective deal type, the valid values are:

- **All** - Used when you want to view the simulation data which is calculated using the original, proposed, and standard pricing.
- **Proposed** - Used when you want to view the simulation data which is calculated using the proposed pricing.
- **Proposed and Original** - Used when you want to view the simulation data which is calculated using the original and proposed pricing.
- **Proposed and Standard** - Used when you want to view the simulation data which is calculated using the proposed and standard pricing.

However, if the **Standard Pricing Comparison** field is set to **No** in the respective deal type, the valid values are:

- **Proposed** - Used when you want to view the simulation data which is calculated using the proposed pricing.
- **Proposed and Original** - Used when you want to view the simulation data which is calculated using the original and proposed pricing.

While loading the data in the **Deal Information** and **Pricing and Commitments** screens, the system refers the **Default Simulation Data** field in the respective deal type. It is used to indicate the simulation data that should appear, by default, on loading the **Deal Information** and **Pricing and Commitments** screens. You can specify either of the following options in the **Default Simulation Data** field:

- All
- Proposed
- Proposed and Original
- Proposed and Standard

Note that the **Default Simulation Data** field appears only when the **Standard Pricing Comparison** field is set to **Yes**. If the **Standard Pricing Comparison** field is set to **No**, the system, by default, sets the default simulation data to **Proposed and Original**. While viewing the customer hierarchy or pricing and commitments of a deal, you can anytime change the option from the **Compare Type** list and view the simulation data of your choice.

## Configurable Fields for the Pricing and Commitments Screen

---

A huge number of columns are present in the **Pricing and Commitments** section of the **Pricing and Commitments** screen, and as a result, the user had to scroll from left to right to view the data in this section. To handle this horizontal scrolling issue, we have given a provision to list a set of columns which are configurable in the **Pricing and Commitments** section. A new section named **Pricing and Commitments - Configurable Columns** is available while defining or editing a deal type. It enables you to indicate the following:

- Sequence in which the column should appear in the **Pricing and Commitments** section
- Selection type of the column in the **Pricing and Commitments** section

You can configure the following columns of the **Pricing and Commitments** section in a deal type:

- Assignment Level
- Average Price
- Cost
- Price List
- Pricing Information
- Profit
- Profit Variation(%)
- Profitability(%)
- Revenue
- Revenue Variation(%)
- Volume

If the selection type flag of a column is set to **Mandatory**, the system, by default, renders the column in the **Pricing and Commitments** section and it cannot be removed from the **Pricing and Commitments** section. If the selection type flag of a column is set to **Standard**, the system, by default, renders the column in the **Pricing and Commitments** section and it can be removed from the **Pricing and Commitments** section (if not needed). However, if the selection type flag of a column is set to **Optional**, the system, by default, does not render the column in the **Pricing and Commitments** section and it can be added anytime to the **Pricing and Commitments** section (if needed).

On loading the **Pricing and Commitments** screen, the system refers the column configuration in the respective deal type and accordingly displays the columns in the **Pricing and Commitments** section. You can add or remove the columns from the **Pricing and Commitments** section where the selection type flag is set to either **Standard** or **Optional**.

## Updating Pricing and Commitments of a Deal in the Offline Mode

---

Oracle Revenue Management and Billing enables the relationship manager to download the pricing and commitments of a deal. A new button named **Download** is available in the **Deal Information** screen. It is enabled only for the relationship manager and not for any deal approver. On clicking the **Download** button, the system extracts the pricing and commitments of a deal version in the **Excel** format. Before clicking the **Download** button, you need to ensure that the report code using which you want to extract the data in the **Excel** format is specified in the **Deal Pricing Download** option type of the **C1-DEAL** feature configuration. The **DLDWLD** report code is already shipped with the release. You can specify the **DLDWLD** report code or a custom report code (based on the requirements) in the **Deal Pricing Download** option type of the **C1-DEAL** feature configuration.

Once the pricing and commitments details are extracted in the **Excel** format, you can edit the pricing and commitments of the required price item and pricing parameters combination in the **Excel** sheet. Once the sheet is updated, you can upload the changes in the system. A new button named **Upload** is available in the **Deal Information** screen. It is enabled only for the relationship manager and not for any deal approver. On clicking the **Upload** button, a screen appears which enables you to upload the file. Once the file is uploaded, the changes are reflected in the deal. The status of the deal is changed to **Pending Simulation**. You can then simulate the deal version and assign it to the next level for approval. Before simulating the deal, you can also edit the pricing and commitments (if required) from the user interface.

## Bill Factor Consideration During Deal Simulation

Earlier, a bill factor specified in a rate component was skipped and not considered for revenue calculation during deal simulation. As a result, the calculated revenue in the deal, product, and division level financial summary was incorrect. This was mainly because we do not maintain the contract details of the accounts in a deal whereas the same is required by the bill factor module. Now, a new session variable named **Simulation Switch** is introduced. If the **Simulation Switch** variable in the session is set to **Y**, the system will skip the contract ID validation so that bill factors are considered for revenue calculation during deal simulation.

While calculating a charge using a rate component whose value source is a bill factor, the system retrieves the characteristic which is mapped to the bill factor from the account or main customer of the account depending on the bill factor's characteristic source. Note that the system considers the characteristic which is effective on the bill segment start date. Depending on the characteristic value, the system derives the bill factor value which is effective on the date that is specified in the **Rate Selection Date Option** parameter of the **C1-BFRDATE** algorithm (attached to the bill factor). You can set either of the following values in the **Rate Selection Date Option** parameter:

- **A** - Used when you want to derive the bill factor value which is effective on the accounting date.
- **E** - Used when you want to derive the bill factor value which is effective on the bill segment end date.
- **S** - Used when you want to derive the bill factor value which is effective on the bill segment start date.

**Note:** If the **C1-BFRDATE** algorithm is not attached to the bill factor, the system derives the bill factor value on the pro-rated basis.

However, while calculating revenue in the deal using a rate component whose value source is a bill factor, the system retrieves the characteristic which is mapped to the bill factor from the account or main customer of the account depending on the bill factor's characteristic source. Note that the system considers the characteristic which is effective on the deal creation date. Depending on the characteristic value, the system derives the bill factor value in the following manner:

- If the **Rate Selection Date Option** parameter of the **C1-BFRDATE** algorithm is set to **A** or **S**, the system derives the bill factor value which is effective on the deal creation date.
- If the **Rate Selection Date Option** parameter of the **C1-BFRDATE** algorithm is set to **E**, the system derives the bill factor value which is effective on the deal creation date + deal frequency.

**Note:** The bill factors where the characteristic source is set to **Account**, **Characteristics Collection**, **Main Person**, or **N/A** are valid and considered during deal simulation.

While simulating a deal where the simulation type is set to **Deal**, the system will skip the bill factors where the characteristic source is set to **Account** (if any used in the rate component). An appropriate warning message will appear for the same in the application log. Ensure that you setup the rate components correctly.

## Deal Creation Using a Deal Template

The following changes are made to this feature:

- Earlier, while creating a deal using a deal template, the system did not copy the price item selection and terms and conditions selection from the deal template. Now, when you create a deal using a deal template, the system copies the following information along with the basic, pricing, and/or usage details from the deal template:

- **Price Item and Hierarchy Entity Selection** - For example, if you are creating a deal (i.e. DL10) using a deal template (i.e. DLT1) where the following price items are selected:

Price Item	Selection
PI1	N
PI2	Y
PI3	N
PI4	Y
PI5	Y

Then, the system copies the above price item selection from the DLT1 deal template to the DL10 deal.

- **General Terms and Conditions Selection at the Deal, Price Item, and Hierarchy Entity Levels** - For example, if you are creating a deal (i.e. DL10) using a deal template (i.e. DLT1) where the following terms and conditions are selected at the deal level:

Terms and Conditions	Selection
T1	N
T2	N
T3	Y
T4	Y

Then, the system copies the above terms and conditions selection from the DLT1 deal template to the DL10 deal. Similarly, the system copies the terms and conditions selection of each price item and hierarchy entity from the DLT1 deal template to the DL10 deal.

Note:

If a particular terms and conditions (for example, T11) selected at the deal, price item, or hierarchy entity level in a deal template is in the Inactive status while creating a deal using the deal template, the system will not display the T11 terms and conditions against the respective level in the new deal. Also, if a particular terms and conditions (for example, PIT12) selected at the price item or hierarchy entity level in a deal template is not effective while creating a deal using the deal template, the system will not display the T11 terms and conditions against the respective level in the new deal.

If a particular terms and conditions (for example, T10) is applicable to a deal, but was either not present or active while creating a deal template, the system will list the T10 terms and conditions in the new deal. Also, if a particular terms and conditions (for example, PIT10) is effective for a price item or hierarchy entity within the new deal start and end dates, but was not present, active, or effective while creating a deal template, the system will list the PIT10 terms and conditions against the price item or hierarchy entity in the new deal.

- **Overridden General Terms and Conditions at the Deal, Price Item, and Hierarchy Entity Levels** - For example, if you are creating a deal (i.e. DL10) using a deal template (i.e. DLT1) where the following terms and conditions are overridden at the deal level:

Terms and Conditions	Selection	Original Text	Overridden Text
T1	N	T&C 1	T&C 1; Additional Clause 1
T2	N	T&C 2	-
T3	Y	T&C 3	-

Terms and Conditions	Selection	Original Text	Overridden Text
T4	Y	T&C 4	T&C 4; Additional Clause 1

Then, the system copies the overridden terms and conditions from the DLT1 deal template to the DL10 deal. Similarly, the system copies the overridden terms and conditions of each price item and hierarchy entity from the DLT1 deal template to the DL10 deal.

- **Adhoc Terms and Conditions at the Deal, Price Item, and Hierarchy Entity Levels** - For example, if you are creating a deal (i.e. DL10) using a deal template (i.e. DLT1) where the following adhoc terms and conditions are defined at the price item level:

Price Item	Adhoc Terms and Conditions
PI1	Adhoc T&C for PI1
PI2	Adhoc T&C for PI2
PI3	Adhoc T&C for PI3
PI4	Adhoc T&C for PI4
PI5	Adhoc T&C for PI5

Then, the system copies the adhoc terms and conditions of each price item from the DLT1 deal template to the DL10 deal. Similarly, the system copies the adhoc terms and conditions of the deal and each hierarchy entity from the DLT1 deal template to the DL10 deal.

**Note:** While creating a deal using a deal template, the system does not refer the **Price Item Group List Filter**, **Price Item Selection Validation**, **Terms and Conditions Filter**, and **Terms and Conditions Selection Validation** system events in the respective deal type.

## Deal Dashboard Default View

A toggle button is available in the **Deal Metrics** zone of the **Deal Dashboard** screen. It enables you to switch or toggle between the following views:

- **User View** - In this view, the screen works in the traditional manner. The deal metrics and statistics are shown for the deals which are created by the logged in user (i.e. relationship manager). Also, the deals created by the relationship manager within the date range are listed in the **Search Deals** zone. By default, the **User View** is turned on in the **Deal Dashboard** screen.
- **User's Access Group View** - In this view, the data of all users, who belong to the logged in user's access group, is consolidated and shown in the **Deal Dashboard** screen. For example, U1, U2, and U3 belong to the same access group and U2 has logged in, the system displays the consolidated data of U1, U2, and U3 in the **Deal Dashboard** screen. The deal metrics and statistics are shown for the deals which are created by the users which belong to the logged in user's access group. Also, the deals created by all users of the logged in user's access group within the date range are listed in the **Search Deals** zone.

**Note:** The system, by default, derives the date range based on the value specified in the **Deal Limits** in months option type of the **C1-DEAL** feature configuration.

You can change the default view of the **Deal Dashboard** screen. A new option type named **Deal Dashboard Default View** is introduced in the **C1-DEAL** feature configuration. It is used to indicate whether the system should list information of the deals, which are created by the logged in user or which are created by a set of users who belong to the logged in user's access group, in the **Deal Dashboard** screen. The valid values are **U** and **UG**. If you do not set this option type, the system, by default, shows the data of the logged in user in the **Deal Dashboard** screen.

# Assign Deal to the Next Level for Approval Based on Revenue Variation

Until now, if the **Assign Only If In Range** field in the respective deal type was set to **Yes**, the system used to assign the deal to the next level in the approval hierarchy only if the profitability, profit variation, and/or revenue of the deal was within the specified range limit of the next level. Now, in addition, you can use the following two attributes while defining a criteria for each approval level in the approval hierarchy:

- Minimum Revenue Variation
- Maximum Revenue Variation

Note that you can specify the minimum and maximum revenue variation only in percentage and not in flat amount. Let us assume that the following criteria is defined for different levels in a deal approval profile:

Approval Level	Criteria Sequence	Minimum Profit Variation (%)	Maximum Profit Variation (%)	Minimum Revenue Variation (%)	Maximum Revenue Variation (%)	Operator
Level 0	10	11	30	11	30	AND
Level 1	10	31	60	31	60	AND
	20	0	10	0	10	AND
Level 2	10	-99999	0	-99999	0	OR
	20	61	99999	61	99999	OR

While simulating the deal, the system checks whether the criteria of Level 0 (i.e. relationship manager) is satisfied. It executes the criteria with sequence 10. As the criteria operator of the respective sequence is set to **AND**, the system checks the following:

- Whether the deal profit variation is within the 11-30 range
- Whether the deal revenue variation is within the 11-30 range

If both the above conditions are met, the deal is automatically approved by the relationship manager. However, if both the conditions are not met, the relationship manager (at Level 0) sends the deal to the next level for approval. The system checks whether the criteria of Level 1 is satisfied. It first executes the criteria with sequence 10. As the criteria operator of the respective sequence is set to **AND**, the system checks the following:

- Whether the deal profit variation is within the 31-60 range
- Whether the deal revenue variation is within the 31-60 range

If both the above conditions are met, the system assigns the deal to the users of Level 1 for approval. However, if both the conditions are not met, the system executes the criteria with the subsequent sequence. As the criteria operator of the subsequent sequence is set to **AND**, the system checks the following:

- Whether the deal profit variation is within the 0-10 range
- Whether the deal revenue variation is within the 0-10 range

If both the above conditions are met, the system assigns the deal to the users of Level 1 for approval. But, if both the above conditions are not met, the system checks whether the criteria of Level 2 is satisfied. It first executes the criteria with sequence 10. As the criteria operator of the respective sequence is set to **OR**, the system checks the following:

- Whether the deal profit variation is within the -99999-0 range
- Whether the deal revenue variation is within the -99999-0 range

If either of the above conditions is met, the system assigns the deal to the users of Level 2 for approval. However, if both the conditions are not met, the system executes the criteria with the subsequent sequence. As the criteria operator of the subsequent sequence is set to **OR**, the system checks the following:

- Whether the deal profit variation is within the 61-99999 range
- Whether the deal revenue variation is within the 61-99999 range

If either of the above conditions is met, the system assigns the deal to the users of Level 2 for approval. But, if both the above conditions are not met, the deal is not assigned to any level for approval.

**Note:**

If you do not specify any value in the **Minimum Profitability**, **Maximum Profitability**, **Minimum Profit Variation (%)**, **Maximum Profit Variation (%)**, **Minimum Revenue Amount**, **Maximum Revenue Amount**, **Minimum Revenue Variation (%)**, or **Maximum Revenue Variation (%)** field while defining a criteria for an approval level, the system will set its value to 0.

If both the minimum and maximum fields are set to zero, the system does not validate the financial summary against the respective minimum and maximum range and considers that the financial summary is within the minimum and maximum range.

## Customer Hierarchy Icons in Deal Pricing Management

Oracle Revenue Management and Billing provides the ability to distinguish the level in the customer hierarchy at which the deal is created. The following icons are newly introduced in this release:

Icon	Purpose
	Indicates that the person is an independent person and does not belong to any customer hierarchy.
	Indicates that the person is the parent person (i.e. the person at the highest level) in the customer hierarchy.
	Indicates that the person is at the middle layer (i.e. the person has a parent person and one or more child persons) in the customer hierarchy.
	Indicates that the person is the child person (i.e. the person at the lowest level) in the customer hierarchy.

These icons will help the relationship manager and the deal approvers to understand the level in the customer hierarchy at which the deal is created. The system displays the above hierarchy icons corresponding to the records when you search for an existing customer for whom you want to create a new deal. This helps to clearly relate at which level in the customer hierarchy the deal will be created. Note that these icons appear only when you search using the **Customer Details** option from the **Search By** list in the **Search Entity** zone.

In addition, the system displays the above hierarchy icons in the **Entity Hierarchy** section when you are viewing the details of a deal that is created for an existing customer.

## Copy the Price Item, Hierarchy Entity, and Terms and Conditions Selection from a Referred Deal

- Now, the system copies the following when you opt to refer a deal using the **Deal** option from the **Search By** list of the **Select Reference** zone:
- Hierarchy entity and price item selection from the referred deal
  - Terms and Conditions selection at the price item level from the referred deal
  - Terms and Conditions selection at the hierarchy entity level from the referred deal
  - Terms and Conditions selection at the deal level from the referred deal

- Default and edited versions of the terms and conditions at the deal, price item, and hierarchy entity levels
- Adhoc terms and conditions at the deal, price item, and hierarchy entity levels

For example, let us assume that the following hierarchy entities and price items are selected in the D1 deal:

Hierarchy Entity Level 1	Hierarchy Entity Level 2	Price Item	Check Box Selected (Y or N)
HE01	-	-	Y
	HE02	-	Y
		PI1	Y
		PI2	N
	HE03	-	Y
		PI4	Y
		PI5	N
	HE04	-	N
		PI6	N
		PI7	Y

Now, if you refer the D1 deal using the **Deal** option while creating the D2 deal, the system will copy all the hierarchy entities and price items with the above selections from the referred deal (i.e. D1).

Similarly, let us assume that the following terms and conditions are selected at different levels in the D1 deal:

Level	Terms and Conditions	Terms and Conditions Category	Check Box Selected (Y or N)
Deal	T1	Default	Y
	T2	Default	N
	T3	Overridden	N
	T4	Overridden	Y
	T5	Adhoc	Y
	T6	Adhoc	Y
Price Item	T4	Default	Y
	T5	Default	N
	T6	Overridden	N
	T7	Overridden	Y
	T8	Adhoc	Y
	T9	Adhoc	N
Hierarchy Entity	T10	Default	Y
	T11	Default	N
	T12	Overridden	N
	T13	Overridden	Y

Level	Terms and Conditions	Terms and Conditions Category	Check Box Selected (Y or N)
	T14	Adhoc	Y
	T15	Adhoc	N

Now, if you refer the D1 deal using the **Deal** option while creating the D2 deal, the system will copy all the default, overridden, and adhoc terms and conditions along with the selections from the referred deal (i.e. D1).

## Consider Only Prospect Accounts of a Customer During Deal Simulation

Until now, the system enabled you to add prospect accounts for an existing customer. Now, you can include only prospect accounts of a customer while creating a deal for an existing customer.

Earlier, the **Include Hierarchy** option was available while creating a deal for an existing customer. Now, instead, the **Accounts to include in Simulation** field is available while creating a deal for an existing customer. Note that the **Accounts to include in Simulation** field appears only when the simulation type of the deal is set to **Customer**. The **Accounts to include in Simulation** list contains the following options:

- **All Accounts in the Hierarchy** - Used when you want to consider all the accounts of the customer, its child persons, and the child persons' accounts in the deal.
- **Accounts of this Customer** - Used when you want to consider only the accounts (including the existing and prospect accounts) of the customer in the deal.
- **Only Prospect Accounts of this Customer** - Used when you want to consider only the prospect accounts of the customer in the deal.

The **Accounts to include in Simulation** field is not mandatory. If you do not specify the value for the **Accounts to include in Simulation** field, the system, by default, sets its value to **All Accounts in the Hierarchy**.

While creating a deal for a prospect person where the simulation type is set to **Customer**, the **Accounts to include in Simulation** field is not shown on the user interface. But, the system, by default, sets the value of the **Accounts to include in Simulation** field to **All Accounts in the Hierarchy**.

## Split the Deferred Deal Simulation Process

Until now, the **C1\_SMLD** batch considered all deals which are in the **Simulation Deferred** status and calculated the cost, profit, revenue, profitability (%), and profit variation (%) for the respective deal version. The way this batch was designed to work resulted in long batch processing time. To improve the batch performance, we have done the following:

- Introduced a new status named **Person Simulation Deferred** in the lifecycle of the **C1-DEAL** business object.
- Split the deferred deal simulation process into the following two batches:
  - **Simulation Batch For Account (SMLDA)**
  - **Simulation Batch For Person (SMLDP)**

Note that you need to execute the above two batches in the following sequence:

1. SMLDA
2. SMLDP

The **Simulation Batch For Account (SMLDA)** batch is used to monitor or check whether there is any deal in the **Simulation Deferred** status. It considers only those deals where the simulation type is set to **Account** or **Customer**. If there is a deal in the **Simulation Deferred** status, the system considers its deal version which is in the **Simulation Deferred** status. It then does the following:

- Calculates the average price for the selected price items in the price item hierarchy.
- Calculates the original, proposed, standard (if the **Standard Pricing Comparison** option in the respective deal type is set to **Y**), and recommended (if the deal approver has recommended a pricing or commitment) cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) for the accounts in the deal. Note that it calculates the above statistics for only those accounts where the **SIML\_REQD\_FLG** column is set to **Y**.
- If the simulation type of the deal is set to **Account**, the system calculates the original, proposed, and standard cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) at the deal level. If the division and/or product level approval is required, this batch calculates the original, proposed, and standard cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) at the division and/or product level, respectively. Finally, the status of the deal is changed to **Simulated**.

At the end, the **C1-DSAOPR** algorithm attached to the **Post-Processing** system event of the **SMLDA** batch is executed. If the simulation type of the deal is set to **Customer**, this algorithm checks whether all the accounts (where the simulation is required) of the person are successfully simulated. If so, it changes the status of the deal to **Person Simulation Deferred**.

This batch is a multi-threaded batch. The multi-threading is based on account ID and chunks for multi-threading are created based on numerical distribution of account ID. You can specify the following parameters while executing this batch:

Parameter Name	Mandatory (Yes or No)	Description
Deal ID	No	Used when you want to calculate the cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) of a particular deal.
Model ID	No	Used when you want to calculate the cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) of a particular deal version.
Division	No	Used when you want to calculate the cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) of the deals which belong to a particular division.
Thread Pool Name	No	Used to specify the thread pool on which you want to execute the batch.

The **Simulation Batch For Person (SMLDP)** batch is used to monitor or check the following:

- Whether there is any deal in the **Simulation Deferred** status where the simulation type is set to **Deal**
- Whether there is any deal in the **Person Simulation Deferred** status where the simulation type is set to **Customer**

If so, the batch considers its deal version which is in the **Simulation Deferred** or **Person Simulation Deferred** status. It then does the following:

- Calculates the original, proposed, standard (if the **Standard Pricing Comparison** option in the respective deal type is set to **Y**), and recommended (if the deal approver has recommended a pricing or commitment) cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) for the customer and its child persons in the deal. Note that it calculates the above statistics for only those persons where the **SIML\_REQD\_FLG** column is set to **Y**.
- If the simulation type of the deal is set to **Deal** and the person is successfully simulated, the system calculates the original, proposed, and standard cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) at the deal level. If the division and/or product level approval is required, this batch calculates the original, proposed, and standard cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) at the division and/or product level, respectively. Finally, the status of the deal is changed to **Simulated**.

At the end, the **C1-DSPOPR** algorithm attached to the **Post-Processing** system event of the **SMLDP** batch is executed. If the simulation type of the deal is set to **Customer**, this algorithm checks whether all the persons (where the simulation is required) of the deal are successfully simulated. If so, the system calculates the original, proposed, and standard cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) at the deal level. If the division and/or product level approval is required, this batch calculates the original, proposed, and standard cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) at the division and/or product level, respectively. Finally, the status of the deal is changed to **Simulated**.

This batch is a multi-threaded batch. The multi-threading is based on person ID and chunks for multi-threading are created based on numerical distribution of person ID. You can specify the following parameters while executing this batch:

Parameter Name	Mandatory (Yes or No)	Description
Deal ID	No	Used when you want to calculate the cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) of a particular deal.
Model ID	No	Used when you want to calculate the cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) of a particular deal version.
Division	No	Used when you want to calculate the cost, profit, revenue, profitability (%), profit variation (%), and revenue variation (%) of the deals which belong to a particular division.
Thread Pool Name	No	Used to specify the thread pool on which you want to execute the batch.

We recommend you use the above two batches instead of the **Deal Simulation (C1\_SMLD)** batch whenever you want to simulate the deals that are created for the customers with large hierarchies in the deferred mode.

## Deal Approval Profile

The **Deal Approval Profile** screen allows you to define the approval hierarchy levels with the required limits and rights for approving a deal. This profile is then associated to the deal type to specify whether it will be used for product level, division level, or deal level approval. It also allows you to edit, copy, and delete a deal approval profile. It contains the following zones:

- [Deal Approval Profile List](#) on page 2727
- [Deal Approval Profile](#) on page 2728

## Deal Approval Profile List

The **Deal Approval Profile List** zone lists the deal approval profiles that are already defined in the system. It contains the following columns:

Column Name	Column Description
Deal Approval Profile	Displays the deal approval profile.
Description	Displays the description of the deal approval profile.

Column Name	Column Description
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Deal Approval Profile</b> screen appears where you can edit the details of the deal approval profile.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Deal Approval Profile</b> screen appears where you can define a new deal approval profile using an existing deal approval profile.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the deal approval profile.
	<b>Note:</b> You can delete a deal approval profile only when the deal approval profile is not yet used for creating a deal type.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Deal Approval Profile**, **Status**, **Description**, **To Do Type**, **Approval Profile Currency**, and **To Do Role**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to a deal approval profile, the **Deal Approval Profile** zone appears where you can view the details of the respective deal approval profile.

## Deal Approval Profile

The **Deal Approval Profile** zone displays the details of the deal approval profile. It contains the following sections:

- **Main** - Displays basic information about the deal approval profile. It contains the following fields:

Field Name	Field Description
Deal Approval Profile	Indicates the deal approval profile.
Description	Displays the description of the deal approval profile.
Detailed Description	Displays additional information about the deal approval profile.
Approval Profile Currency	Indicates the currency in which the amounts are mentioned in the deal approval profile.
Status	Indicates the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"><li>• Active</li><li>• Inactive</li></ul>

- **Approval Hierarchy** - Displays the approval hierarchy levels with their required limits and rights defined for approving a deal. It contains the following columns:

Column Name	Column Description
Level	Indicates the approval level.
To Do Type	Indicates the To Do Type using which the To Do task is assigned to the approver/user group for approving the deal at the specified hierarchy level.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective <b>To Do Type</b> .
To Do Role	Indicates the approver/user group to whom the To Do task of the To Do Type is assigned for approving the deal at the specified hierarchy level.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective <b>To Do Role</b> .
Recommend Pricing	Indicates whether the approver/user (other than the relationship manager) at the specified hierarchy level is entitled to recommend a change in the proposed pricing of the price item. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Submit Price Item For Approval	Indicates whether the approver/user at the specified hierarchy level is entitled to submit one or more price items to the product manager for approval. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Approve Deal	Indicates whether the approver/user at the specified hierarchy level is entitled to approve the deal after all the discretion check is confirmed. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
View Only Eligible Price Items	Indicates whether the approver/user at the specified hierarchy level can view only those price items which meet the pricing limits as set in the approval hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Minimum Profitability (%)	Displays the minimum deal profitability percentage which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profitability (%)	Displays the maximum deal profitability percentage which is set for the approver/user at the specified hierarchy level for approving the deal.
Minimum Profit	Displays the minimum deal profitability amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profit	Displays the maximum deal profitability amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Minimum Profit Variation (%)	Displays the minimum deal profitability variation percentage which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profit Variation (%)	Displays the maximum deal profitability variation percentage which is set for the approver/user at the specified hierarchy level for approving the deal.

Column Name	Column Description
Minimum Profit Variation	Displays the minimum deal profitability variation amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Maximum Profit Variation	Displays the maximum deal profitability variation amount which is set for the approver/user at the specified hierarchy level for approving the deal.
Minimum Revenue	Displays the minimum deal revenue which can be approved by the approver/user at a specified hierarchy level.
Maximum Revenue	Displays the maximum deal revenue which can be approved by the approver/user at a specified hierarchy level.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the deal approval profile.
Delete	Used to delete the deal approval profile.
	<b>Note:</b> You can delete a deal approval profile only when the deal approval profile is not yet used for creating a deal type.
Duplicate	Used to create a new deal approval profile using an existing deal approval profile.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the deal approval profile is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Deal Approval Profile** zone does not appear in the **Deal Approval Profile** screen. It appears when you click the **Broadcast** (📢) icon corresponding to a deal approval profile in the **Deal Approval Profile List** zone.

## Defining a Deal Approval Profile

**Prerequisites**

To define a deal approval profile, you should have:

- Currencies defined in the application
- Approval hierarchy levels defined in the application
- To Do roles and To Do types defined in the application

**Procedure**

To define a deal approval profile:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
3. Click the **Add** option from the **Deal Approval Profile** sub-menu.

The **Deal Approval Profile** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal approval profile.
- **Approval Hierarchy** - Used to define the approval levels in the approval hierarchy with their required limits and rights for approving a deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Approval Profile	Used to specify the deal approval profile.	Yes
Description	Used to specify the description for the deal approval profile.	Yes
Detailed Description	Used to specify additional information about the deal approval profile.	Yes
Approval Profile Currency	Used to indicate the currency in which the amounts are mentioned in the deal approval profile.	Yes
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	
Status	Used to indicate the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"><li>• Active</li><li>• Inactive</li></ul>	Yes
	<b>Note:</b> Only the active deal approval profiles can be assigned to the deal type for approving the deal.	

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Deal Approval Profile** screen.

4. Enter the required details in the **Main** section.
5. Define approval levels in the approval hierarchy with the required limits and rights for approving the deal.
6. Click **Save**.  
The deal approval profile is defined.

**Related Topics**

<b>Deal Approval Profile</b> screen	<a href="#">Deal Approval Profile</a> on page 2727
How to define an approval level in the approval hierarchy	<a href="#">Defining an Approval Level in the Approval Hierarchy</a> on page 2732

## Defining an Approval Level in the Approval Hierarchy

### Prerequisites

To define an approval level in the approval hierarchy, you should have:

- Approval hierarchy levels defined in the application.
- To Do roles and To Do types defined in the application.

### Procedure

To define an approval level in the approval hierarchy:

1. Ensure that the **Approval Hierarchy** section is expanded in the **Deal Approval Profile** screen when you are defining, editing, or copying a deal approval profile.

The **Approval Hierarchy** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Level	Used to indicate the approval level.	Yes
	<b>Note:</b> The user who creates the deal i.e. the relationship manager (RM) should always belong to the first level (Level 0) in the deal approval hierarchy.  There cannot be a parallel level for the first level (Level 0) in the approval hierarchy. In other words, there can be only one relationship manager (RM) in the entire deal approval hierarchy.	
To Do Type	Used to specify the To Do task which is assigned to the approver/user group for approving the deal at the specified hierarchy level.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  On specifying the value for a predefined To Do type , the description of the To Do type appears corresponding to the <b>To Do Type</b> field.	
To Do Role	Used to indicate the approver/user group to whom the To Do task is assigned for approving the deal at the specified hierarchy level.	Yes
Propose Pricing	Used to indicate whether the approver/user (other than the relationship manager) at the specified hierarchy level is entitled to recommend a change in the proposed pricing of the price item. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>	Yes (Conditional)
		<b>Note:</b> This field is required while defining approval levels for the approving a deal.

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> By default, this field is read only and the value is set to <b>No</b> for the first level (Level 0) approver/user i.e. the relationship manager (RM) in the approval hierarchy.	
Submit Price Item for Approval	Used to indicate whether the approver/user at the specified hierarchy level is entitled to submit one or more price items to the respective product managers for approval. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
	<b>Note:</b> This field is required while defining approval levels for the approving a deal.	
	<b>Note:</b> The approver/user can submit the price items to the respective product managers for approval when the values for the <b>Price Item Manager To Do Type</b> and <b>Price Item Manager To Do Role</b> fields are defined in the respective <b>Price Item</b> screen.	
Approve Deal	Used to indicate whether the approver/user at the specified hierarchy level is entitled to approve the deal after all the discretion check is confirmed. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
	<b>Note:</b> This field is required while defining approval levels for the approving a deal.	
	<b>Note:</b> At least one approval hierarchy level must have the value of the <b>Approve Deal</b> field set to <b>Yes</b> . If the value of the <b>Approve Deal</b> field is set to <b>Yes</b> , then, the approver/user can change the status of the deal from <b>Draft</b> to <b>Ready for Approval</b> or <b>Approved</b> .	
View Only Eligible Price Items	Used to indicate whether the approver/user at the specified hierarchy level can approve only those price items which meet the pricing limits as set in the approval hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
	<b>Note:</b> This field is required while defining approval levels for the approving a deal.	
	<b>Note:</b> By default, this field is read only and the value is set to <b>No</b> for the first level (Level 0) approver/user i.e. the relationship manager (RM) in the approval hierarchy.	
Minimum Profitability (%)	Used to specify the minimum deal profitability percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Profitability (%)	Used to specify the maximum deal profitability percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Profitability Amount	Used to specify the minimum deal profitability amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Profitability Amount	Used to specify the maximum deal profitability amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Deviation (%)	Used to specify the minimum deal variation percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Deviation (%)	Used to specify the maximum deal variation percentage for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Minimum Deviation Amount	Used to specify the minimum deal variation amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Deviation Amount	Used to specify the maximum deal variation amount for the approver/user at the specified hierarchy level for approving the deal.	Yes (Conditional)
	<b>Note:</b> You can either specify the percentage or amount values for minimum and maximum limit.	<b>Note:</b> This field is required while defining approval levels for the approving a deal.

Field Name	Field Description	Mandatory (Yes or No)
Minimum Revenue Amount	Used to specify the minimum deal revenue which can be approved by the approver/user at a specified hierarchy level.	Yes (Conditional)
		<b>Note:</b> This field is required while defining approval levels for the approving a deal.
Maximum Revenue Amount	Used to specify the maximum deal revenue which can be approved by the approver/user at a specified hierarchy level.	Yes (Conditional)
		<b>Note:</b> This field is required while defining approval levels for the approving a deal.

- 2. Enter the required details in the **Approval Hierarchy** section.
- 3. If you want to define more than one approval level in the approval hierarchy, click the **Add (+)** icon and then repeat step 2.

**Note:**

However, if you want to remove an approval level from the approval hierarchy, click the **Delete (🗑)** icon corresponding to the approval hierarchy.

At present, you can add an approval level from 0 to 10. If required, you can add more approval levels in the system through the **C1\_DEALHIERARCHYLEVEL** lookup field.

- 4. Click **Save**.  
The approval level is defined in the approval hierarchy.

## Editing a Deal Approval Profile

**Prerequisites**

To edit a deal approval profile, you should have:

- Currencies defined in the application
- Approval hierarchy levels defined in the application.
- To Do roles and To Do types defined in the application.

**Procedure**

To edit a deal approval profile:

- 1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- 2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
- 3. Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
- 4. In the **Deal Approval Profile List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the deal approval profile whose details you want to edit.

The **Deal Approval Profile** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal approval profile.
- **Approval Hierarchy** - Used to define the approval levels in the approval hierarchy with the required limits and rights for approving a deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Approval Profile	Used to specify the deal approval profile.	Not applicable
Description	Used to specify the description for the deal approval profile.	Yes
Detailed Description	Used to specify additional information about the deal approval profile.	Yes
Approval Profile Currency	Used to indicate the currency in which the amounts are mentioned in the deal approval profile.	Yes
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	
Status	Used to indicate the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"><li>• Active</li><li>• Inactive</li></ul>	Yes
	<b>Note:</b> Only the active deal approval profiles can be assigned to the deal type for approving the deal.	

**Tip:** Alternatively, you can edit the details of a deal approval profile by clicking the **Edit** button in the **Deal Approval Profile** zone.

- 5. Modify the required details in the **Main** section.
- 6. Add, edit, or remove approval levels in the approval hierarchy, if required.
- 7. Click **Save**.  
The changes made to the deal approval profile are saved.

## Copying a Deal Approval Profile

Instead of creating a deal approval profile from scratch, you can create a new deal approval profile using an existing deal approval profile. This is possible through copying a deal approval profile. On copying a deal approval profile, the details including the approval levels in the approval hierarchy are copied to the new deal approval profile. You can then edit the details, if required.

### Prerequisites

To copy a deal approval profile, you should have:

- Deal approval profile (whose copy you want to create) defined in the application
- Currencies defined in the application
- Approval hierarchy levels defined in the application.
- To Do roles and To Do types defined in the application.

### Procedure

To copy a deal approval profile:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
4. In the **Deal Approval Profile List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the deal approval profile whose copy you want to create.

The **Deal Approval Profile** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal approval profile.
- **Approval Hierarchy** - Used to define the approval levels in the approval hierarchy with the required limits and rights for approving a deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Approval Profile	Used to specify the deal approval profile.	Yes
Description	Used to specify the description for the deal approval profile.	Yes
Detailed Description	Used to specify additional information about the deal approval profile.	Yes
Approval Profile Currency	Used to indicate the currency in which the amounts are mentioned in the deal approval profile.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	
Status	Used to indicate the status of the deal approval profile. The valid values are: <ul style="list-style-type: none"><li>Active</li><li>Inactive</li></ul> <b>Note:</b> Only the active deal approval profiles can be assigned to the deal type for approving the deal.	Yes

**Tip:** Alternatively, you can copy a deal approval profile by clicking the **Duplicate** button in the **Deal Approval Profile** zone.

- 5. Enter the required details in the **Main** section.
- 6. Add, edit, or remove approval levels in the approval hierarchy, if required.
- 7. Click **Save**.  
The new deal approval profile is defined.

**Deleting a Deal Approval Profile**

**Procedure**

To delete a deal approval:

- 1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
- 2. From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
- 3. Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
- 4. In the **Deal Approval Profile List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the *deal* approval profile that you want to delete.  
A message appears confirming whether you want to delete the deal approval profile.

**Note:** You can delete a deal approval profile only when the deal approval profile is not yet used for creating a deal type.

**Tip:** Alternatively, you can delete a deal approval profile by clicking the **Delete** button in the **Deal Approval Profile** zone.

5. Click **OK**.  
The deal approval profile is deleted.

## Viewing the Deal Approval Profile Details

**Procedure**

To view the details of a deal approval profile:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **D** and then click **Deal Approval Profile**.  
A sub-menu appears.
- Click the **Search** option from the **Deal Approval Profile** sub-menu.  
The **Deal Approval Profile** screen appears.
- In the **Deal Approval Profile List** zone, click the **Broadcast** (📡) icon corresponding to the deal approval profile whose details you want to view.  
The **Deal Approval Profile** zone appears.
- View the details of the deal approval profile in the **Deal Approval Profile** zone.

## Deal Type

A deal type helps the system to determine:

- Whether the pricing for each price item should be approved in the deal
- Whether the deal should be assigned to users for approval as per the limits defined in the deal approval profile
- Whether the pricing and financial summary should be approved at the product level
- Whether the pricing and financial summary should be approved at the division level
- Whether the highest level approval in the approval hierarchy is required for the deal
- Whether the existing pricing should be pre-approved in the deal
- The questionnaire template using which you want to find references for creating a deal
- Whether standard price item pricing comparison is required for the price item pricing in the deal

- The deal approval profile that should be used for a product level approval
- The deal approval profile that should be used for a division level approval
- The deal approval profile that should be used for the deal level approval based on the division, customer segment, and customer tier combination
- The customer characteristic for the deal approval profile
- The columns and their sequence in the **Pricing and Commitments** screen of the deal

The **Deal Type** screen allows you to define, view, edit, copy, and delete a deal type. It contains the following zones:

- [Deal Type List](#) on page 2740
- [Deal Type](#) on page 2741
- [Deal Approval Profiles](#) on page 2744
- [Customer Characteristics](#) on page 2745

## Deal Type List

The **Deal Type List** zone lists the deal types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Deal Type	Displays the deal type.
Description	Displays the description of the deal type.
Edit	On clicking the <b>Edit</b> (✎) icon corresponding to a deal type, the <b>Deal Type</b> screen appears where you can edit the details of the deal type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon corresponding to a deal type, the <b>Deal Type</b> screen appears where you can define a new deal type using an existing deal type.
Delete	On clicking the <b>Delete</b> (🗑) icon corresponding to a deal type, you can delete the deal type.
	<b>Note:</b> You can delete a deal type only when the deal type is not yet used for creating a deal.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Deal Type**, **Description**, **Division**, **Customer Segment**, **Effective Date**, **Customer Tier**, **Status**, **Approval Type**, and **Deal Approval Profile**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📢) icon corresponding to a deal type, the **Deal Type** and **Deal Approval Profiles** zones appear with the respective details.

## Deal Type

The **Deal Type** zone displays the details of the deal type. It contains the following sections:

- **Main** - Displays basic information about the deal type. It contains the following fields:

Field Name	Field Description
Deal Type	Displays the deal type.
Description	Displays the description of the deal type.
Detailed Description	Displays additional information about the deal type.
Deal Commitment Frequency	Indicates the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"><li>• Biannually</li><li>• Monthly</li><li>• Quarterly</li><li>• Yearly</li></ul>
Price Item Approval Required	Indicates whether discretion check of the individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>
Assign Only If In Range	Indicates whether the deal is assigned to the approver/user as per the limits set in the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>
Product Level Approval Required	Indicates whether discretion check of the price items at the product level is required for approving a deal. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>
Division Level Approval Required	Indicates whether discretion check of the price items at the division level is required for approving a deal. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>
Highest Level Approval Required	Indicates whether hierarchical approval of the deal is required for approving a deal. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>
Status	Indicates the status of the deal type. The valid values are:

Field Name	Field Description
	<ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Pre-Approve Existing Pricing	Indicates whether the existing price items pricing and commitments are approved for confirming the financial summary before approving a deal. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>
To Do Reminder Days	Indicates the number of days using which the system calculates the first To Do reminder date.
To Do High Priority Days	Indicates the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.
Days to Inactivate	<p>Displays the number of days prior to the last updated date of the deal after which you want to inactivate the deal.</p> <p><b>Note:</b></p> <p>The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field.</p> <p>The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.</p>
Reminder To Do Type	Indicates the To Do task that you want to send as a notification to the user for the priority days set for reviewing the deal.
Questionnaire Template	Indicates the questionnaire template that you want to associate with the deal type.

- **Algorithms** - Lists the algorithms associated with the deal type. It contains the following columns:

Column Name	Column Description
System Event	<p>Indicates the system event when the algorithm is executed. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Customer/Deal References Using Quest</b> - Indicates the algorithm that is triggered to search for deal references based on the questionnaire associated with the deal.</li> <li>• <b>Deal Inactivation</b> - Indicates the algorithm that is triggered to automatically inactivate the deals which are not updated in the system for a long time.</li> <li>• <b>Hierarchy Creation Completion</b> - Indicates the algorithm that is triggered for aggregating the service quantities of the customer, parent customers, grandparent customers, and sibling customers in the customer hierarchy of the deal.</li> <li>• <b>Post Processing Price Item Post Simulation</b> - Indicates the algorithm that is triggered after the price item with post processing price assignment type is simulated.</li> <li>• <b>Price Item Group List Filter</b> - Indicates the algorithm that is triggered to select the price items and the hierarchy entities of an entity automatically based on whether the selection characteristic type specified in the parameter is defined for the respective price item and hierarchy entity.</li> <li>• <b>Price Item Selection Validation</b> - Indicates the algorithm that is triggered to validate the price item and hierarchy entity selection of an entity in a deal.</li> </ul>

Column Name	Column Description
	<div><b>Note:</b> The algorithm attached to the <b>Price Item Selection Validation</b> system event is invoked when you click the <b>Save &amp; View Pricing &amp; Commitment</b> button in the <b>Price Item Group Selection</b> screen of the deal.</div> <ul style="list-style-type: none"><li>• <b>Price Item Approval</b> - Indicates the algorithm that is triggered for approving the price items assigned to the entities in the customer hierarchy of the deal.</li><li>• <b>Profitability Calculation</b> - Indicates the algorithm that is triggered for calculating the profitability of the proposed commitments defined for the price items while simulating the deal.</li><li>• <b>Recommended Products Using Questionnaire</b> - Indicates the algorithm that is triggered for searching the recommended products for the deal.</li><li>• <b>Regular Price Item Post Simulation</b> - Indicates the algorithm that is triggered after the price item with regular price assignment type is simulated.</li><li>• <b>Simulation Completion</b> - Indicates the algorithm that is triggered after the deal is simulated.</li><li>• <b>Standard Price List Search</b> - Indicates the algorithm that is triggered to derive the standard price list for the entity.</li><li>• <b>Terms and Conditions Filter</b> - Indicates the algorithm that is triggered for selecting the deal, price item, and hierarchy entity level terms and conditions automatically based on whether the selection characteristic type specified in the parameter is defined for the respective deal, price item, and hierarchy entity.</li><li>• <b>Terms and Conditions Search Validation</b> - Indicates the algorithm that is triggered to validate the terms and conditions selection of an entity at the deal, price item, and hierarchy entity level.</li></ul> <div><b>Note:</b> The algorithm attached to the <b>Terms and Conditions Search Validation</b> system event is invoked when you click the <b>Save</b> button in the <b>Terms and Conditions</b> screen.</div>
Sequence	Displays the order in which the algorithms with the same system event should be executed.
Algorithm	<div>Indicates the algorithm attached to the system event.</div> <div><b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</div>

- **Characteristics** - Lists the characteristics defined for the deal type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the deal type.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the deal type.
Delete	Used to delete the deal type.

Button Name	Button Description
	<b>Note:</b> You can delete a deal type only when the deal type is not yet used for creating a deal.
Duplicate	Used to create a new deal type using an existing deal type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the deal type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Deal Type** zone does not appear in the **Deal Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a deal type in the **Deal Type List** zone.

## Deal Approval Profiles

The **Deal Approval Profiles** zone lists the deal level, division level, or product level approval profiles associated with the deal type using which the deal is approved in the system. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the deal approval profile is effective for the deal type.
Effective End Date	Displays the date till when the deal approval profile is effective for the deal type.
Approval Type	Indicates whether the deal type is used for approving a deal in the product level approval workflow, deal level approval workflow, or division level approval workflow. The valid values are: <ul style="list-style-type: none"><li>• Deal</li><li>• Division</li><li>• Product</li></ul>
Division	Indicates the division for which the deal level approval, division level approval, or product level approval is required.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.
Customer Segment	Indicates the customer segment for which the deal approval profile is required.
Customer Tier	Indicates the customer tier for which the deal approval profile is required.
Product	Indicates the product for which the product level approval is required.
	<b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears where you can view the details of the respective product.
Deal Approval Profile	Indicates the approval profile used for approving the deal.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Approval Profile</b> screen appears where you can view the details of the respective deal approval profile.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Deal Approval Profiles** zone does not appear in the **Deal Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a deal type in the **Deal Type List** zone.

On clicking the **Broadcast** (📡) icon corresponding to a deal approval profile, the **Customer Characteristics** zone appears which lists the characteristics of the customers for whom the deal is defined using the deal type.

## Defining a Deal Type

**Prerequisites**

To define a deal type you should have:

- Business object defined for the deal type
- Values defined for the **FREQUENCY\_FLG** lookup field.
- Deal approval profiles defined in the application
- Algorithms defined in the system
- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**).
- Reminder To Do types defined in the application
- Questionnaire templates defined in the application

**Procedure**

To define a deal type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Deal Type** sub-menu.

The **Deal Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal type.
- **Deal Approval Profiles** - Used to associate deal level, division level, or product level approval profiles with the deal type for approving the deal.
- **Algorithms** - Used to associate algorithms with the system events defined for the deal type
- **Pricing And Commitment Columns Configuration** - Used to configure which column should appear in the **Pricing and Commitments** section of the **Pricing and Commitments** screen. It also enables you to render the columns using a specific selection type.
- **Characteristics** - Used to define a list of characteristics for the deal type

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Type	Used to specify the deal type.	Yes
Description	Used to specify the description for the deal type.	Yes
Detailed Description	Used to specify additional information about the deal type.	No

Field Name	Field Description	Mandatory (Yes or No)
Deal Commitment Frequency	Used to indicate the duration for the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"> <li>• Biannually</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	
Price Item Approval Required	Used to indicate whether the discretion check of an individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Assign Only If In Range	Used to indicate whether the deal is assigned to the approver/user as per the limits set in the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen.  For example, if the deal profitability % range of the approver/user is set as follows: <ul style="list-style-type: none"> <li>• <b>RM</b> (0% - 5%)</li> <li>• <b>PM</b> (6% - 15%)</li> <li>• <b>SPM</b> (16% - 50%)</li> </ul> Then, <ul style="list-style-type: none"> <li>• If the calculated deal profitability % is 4 %, then the deal will be assigned to the relationship manager (<b>RM</b>).</li> <li>• If the calculated deal profitability % is 11 %, then the deal will be assigned to the pricing manager (<b>PM</b>).</li> <li>• If the calculated deal profitability % is 25 %, then the deal will be assigned to the senior pricing manager (<b>SPM</b>).</li> </ul> The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes (Conditional)
	<b>Note:</b> This field is required for assigning the deal when the deal financial summary falls within the specified limits defined for the approver/user.	
	<b>Note:</b> This field is valid only for deal level approval profiles.	
Product Level Approval Required	Used to indicate whether the discretion check of the price items at the product level is required for approving a deal. The valid values are:	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving deal at product level.
Division Level Approval Required	Used to indicate whether the discretion check of the price items at the division level is required for approving a deal. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required for approving deal at division level.
Highest Level Approval Required	Used to indicate whether the hierarchical approval of the deal is required for approving a deal. For example, if the approval hierarchy has three levels <b>L0 (RM)</b> , <b>L1 (PM)</b> , and <b>L2 (SPM)</b> , then the deal will pass through all the three levels for approval respectively. <b>L0 (RM)</b> will not be able to finalize the deal without the approval of <b>L2 (SPM)</b> . The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required for approving a deal by each level in the approval hierarchy.
Status	Used to indicate the status of the deal type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul> <b>Note:</b> Only an <b>Active</b> deal type can be used for creating a deal.	Yes
Pre-Approve Existing Pricing	Used to indicate whether the existing price items pricing and commitments should be pre-approved to confirm the financial summary of the deal. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required for approving the existing price item pricing and commitments of the entity.
To Do Reminder Days	Used to specify the number of days using which the system calculates the first To Do reminder date.	Yes
To Do High Priority Days	Used to specify the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent. <b>Note:</b> You can set a maximum of <b>9</b> priority days for the To Do reminder days.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Days to Inactivate Deal	Used to specify the number of days prior to the last updated date of the deal after which you want to inactivate the deal.	Yes (Conditional)
	<b>Note:</b> You must specify a numeric value greater than zero in this field. Also, the numeric value should be greater than the values specified in the <b>To Do Reminder Days</b> and <b>To Do High Priority Days</b> fields.  The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field.  The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.	<b>Note:</b> This field is required for inactivating deals which are not updated in the system for a long time.
Deal Monitor To Do Type	Used to indicate the To Do task that you want to send as a notification to the user for monitoring the priority days set for reviewing the deal.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Monitor To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  On specifying the value for a To Do type, the description of the To Do type appears corresponding to the <b>To Do Type</b> field.	
Questionnaire Template	Used to indicate the questionnaire template that you want to associate with the deal type using which the system searches for a list of deals which can be used as references while creating a deal.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Questionnaire Template</b> field. On clicking the <b>Search</b> icon, the <b>Search Questionnaire Template</b> window appears.  On specifying the value for a questionnaire template, the description of the questionnaire template appears corresponding to the <b>Questionnaire Template</b> field.	<b>Note:</b> This field is required for associating a questionnaire template with the deal type.
Standard Pricing Comparison	Used to indicate whether you want to view the standard pricing of the price item compared with the proposed pricing of the price item in the <b>Pricing and Commitments</b> section of	No

Field Name	Field Description	Mandatory (Yes or No)
	the <b>Pricing and Commitments</b> screen or in the <b>Customer Hierarchy</b> section of the <b>Deal Information</b> screen. The valid values are: <ul style="list-style-type: none"><li>No</li><li>Yes</li></ul>	
	<b>Note:</b> If you do not select any option from the list, the system by default considers it as <b>No</b> .	
Default Simulation View	Used to indicate the default pricing comparison that you want to view for the deal level, division level, or product level financial summary in the <b>Deal Information</b> screen.	No
	<b>Note:</b> This field appears only when you select the <b>Yes</b> option from the Standard Pricing Comparison list.	

4. Enter the required details in the **Main** section.
5. Associate deal approval profiles with the deal type in the **Deal Approval Profiles** section, if required.
6. Associate algorithms with the deal type in the **Algorithms** section, if required.
7. Configure the pricing and commitments column for the deal in the **Pricing and Commitment Columns Configuration** section, if required.
8. Define characteristics for the deal type in the **Characteristics** section, if required.
9. Click **Save**.  
The deal type is defined.

## Associating an Algorithm with a Deal Type

**Prerequisites**

To associate an algorithm with a deal type, you should have:

- System events defined in the application
- Algorithms defined for the system events

**Procedure**

To associate an algorithm with a deal type:

- 1. Ensure that the **Algorithms** section is expanded in the **Deal Type** screen when you are defining, editing, or copying a deal type.

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event when the algorithm should be executed. The valid values are: <ul style="list-style-type: none"><li>Bespoke Price List Post Processing</li><li>Bespoke Price List Pre-Processing</li><li>Custom Approver Level Criteria</li><li>Customer/Deal References Using Quest</li><li>Deal Inactivation</li><li>Fetch Next Approver Level</li><li>Hierarchy Creation Completion</li><li>Post Processing Price Item Post Simulation</li><li>Price Item Group List Filter</li><li>Price Item Selection Validation</li><li>Price Item Approval</li><li>Profitability Calculation</li><li>Recommended Products Using Questionnaire</li><li>Regular Price Item Post Simulation</li><li>Simulation Completion</li><li>Standard Price List Search</li><li>Terms and Conditions Filter</li><li>Terms and Conditions Selection Validation</li></ul>	Yes
	<b>Note:</b> The list includes only those values which are specified in the <b>DEAL_TYPE_ALG_ENT_FLG</b> lookup field. For more information about the system events, see the below table.	
Sequence	Used to specify the order in which the algorithms attached to the same system event should be executed.	Yes
	<b>Note:</b> You can attach multiple algorithms on the same system event using a unique sequence number.	
Algorithm	Used to indicate the algorithm that you want to execute on the system event.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the value for an algorithm, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.</p> <p>You can either use the algorithms shipped with the product or create custom algorithms based on the business requirements.</p>	

The following table lists and describes the system events available while defining a deal type:

System Event	Description
Bespoke Price List Post Processing	Used to attach an algorithm that you want to invoke after creating a bespoke price list for an entity during deal orchestration.
	<p><b>Note:</b> At present, no algorithm type is shipped with the product for this system event. You can create a custom algorithm type based on your business requirements.</p>
Bespoke Price List Pre-Processing	Used to attach an algorithm that you want to invoke before creating a bespoke price list for an entity during deal orchestration.
	<p><b>Note:</b> At present, no algorithm type is shipped with the product for this system event. You can create a custom algorithm type based on your business requirements.</p>
Custom Approver Level Criteria	Used to attach an algorithm that you want to invoke for validating custom approval criteria in a deal. If the criteria are met, the system advances the deal to the next approval level; otherwise, it stops the progression in the approval hierarchy.
	<p><b>Note:</b> At present, no algorithm type is shipped with the product for this system event. You can create a custom algorithm type based on your business requirements.</p>
Customer/Deal References Using Quest	Used to attach an algorithm that you want to invoke for searching deal references based on the questionnaire associated with the deal.
	<p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1-CUDLREF</b></li> </ul>
Deal Inactivation	Used to attach an algorithm that you want to invoke for automatically inactivating the deals which are not updated in the system for a long time.

System Event	Description
	<p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1-INACDEAL</b> (For more information, see <a href="#">Deal Inactivation</a> on page 2691.)</li> </ul>
Fetch Next Approver Level	<p>Used to attach an algorithm that you want to invoke for determining the next approval level for a deal.</p> <p><b>Note:</b> At present, no algorithm type is shipped with the product for this system event. You can create a custom algorithm type based on your business requirements.</p>
Hierarchy Creation Completion	<p>Used to attach an algorithm that you want to invoke for aggregating the service quantities of the customer, parent customers, grandparent customers, and sibling customers in the customer hierarchy of the deal.</p> <p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1_STACKDEAL</b> (For more information, see <a href="#">Stacking Commitments in Deal</a> on page 2706.)</li> </ul>
Post Processing Price Item Post Simulation	<p>Used to attach an algorithm that you want to invoke for simulating a price item when a post-processing price assignment type is completed.</p> <p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1_ANNPOST</b></li> </ul>
Price Item Group List Filter	<p>Used to attach an algorithm that you want to invoke for automatically selecting the price items and the hierarchy entities of an entity based on whether the selection characteristic type specified in the parameter is defined for the respective price item and hierarchy entity.</p> <p><b>Note:</b></p> <p>The following algorithm types are shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1-DPIG-ELIG</b> (For more information, see <a href="#">Price Item and Hierarchy Entity Selection in a Deal Based on Characteristic Value</a> on page 2687.)</li> </ul>
Price Item Selection Validation	<p>Used to attach an algorithm that you want to invoke for validating the price item and hierarchy entity selection of an entity in a deal.</p>

System Event	Description
	<p><b>Note:</b></p> <p>At present, no algorithm type is shipped with the product for this system event. You need to create a custom algorithm based on your business requirement and attach it to the deal type.</p> <p>The algorithm attached to the <b>Price Item Selection Validation</b> system event is invoked when you click the <b>Save &amp; View Pricing &amp; Commitment</b> button in the <b>Price Item Group Selection</b> screen of the deal.</p>
Price Item Approval	<p>Used to attach an algorithm that you want to invoke for approving the price items assigned to the entities in the customer hierarchy of the deal.</p> <p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1-DLPRCAPPR</b></li> </ul>
Profitability Calculation	<p>Used to attach an algorithm that you want to invoke for calculating the profitability of the proposed commitments defined for the price items while simulating the deal.</p> <p><b>Note:</b> At present, no algorithm type is shipped with the product for this system event. You need to create a custom algorithm based on your business requirement and attach it to the deal type.</p>
Recommended Products Using Questionnaire	<p>Used to attach an algorithm that you want to invoke for searching the recommended products for the deal.</p> <p><b>Note:</b></p> <p>The following algorithm types are shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1-CUDLRF</b></li> <li>• <b>C1-PRDREC</b></li> </ul>
Regular Price Item Post Simulation	<p>Used to attach an algorithm that you want to invoke for simulating a price item with a regular price assignment type.</p> <p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1_RGLRPP</b></li> </ul>
Simulation Completion	<p>Used to attach an algorithm that you want to invoke for simulating a deal.</p>

System Event	Description
	<p><b>Note:</b> At present, no algorithm type is shipped with the product for this system event. You need to create a custom algorithm based on your business requirement and attach it to the deal type.</p>
Standard Price List Search	<p>Used to attach an algorithm that you want to invoke for deriving the standard price list for the entity.</p> <p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1_GET_STDPL</b> (For more information, see <a href="#">Comparison using Standard Pricing in a Deal</a> on page 2715.)</li> </ul>
Terms and Conditions Filter	<p>Used to attach an algorithm that you want to invoke for automatically selecting the deal, price item, and hierarchy entity level terms and conditions based on whether the selection characteristic type specified in the parameter is defined for the respective deal, price item, and hierarchy entity.</p> <p><b>Note:</b></p> <p>The following algorithm types are shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1-DEAL-TCFL</b> (For more information, see <a href="#">Terms and Conditions Selection in a Deal Based on Characteristic Value</a> on page 2706 and <a href="#">Terms and Conditions Grouping in a Deal Based on Characteristic Value</a> on page 2708.)</li> <li>• <b>CM-DEAL-TCFL</b></li> </ul>
Terms and Conditions Selection Validation	<p>Used to attach an algorithm that you want to invoke for validating the terms and conditions selection of an entity at the deal, price item, and hierarchy entity level.</p> <p><b>Note:</b></p> <p>The following algorithm type is shipped with the product for this system event:</p> <ul style="list-style-type: none"> <li>• <b>C1-DEAL-TCVL</b></li> </ul> <p>The algorithm attached to the <b>Terms and Conditions Selection Validation</b> system event is invoked when you click the <b>Save</b> button in the <b>Terms and Conditions</b> screen.</p>

2. Enter the required details in the **Algorithms** section.
3. If you want to associate more than one algorithm with the deal type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to disassociate an algorithm from the deal type, click the **Delete** (🗑️) icon corresponding to the algorithm.

4. Click **Save**.  
The algorithm is associated with the deal type.

Configuring the Pricing and Commitments Column

Procedure

To configure the pricing and commitments column:

1. Ensure that the **Pricing and Commitment Columns Configuration** section is expanded in the **Deal Type** screen when you are defining, editing, or copying a deal type.

The **Pricing and Commitment Columns Configuration** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence of the configurable column	Yes (Conditional)
		<b>Note:</b> This field is required while configuring the columns the <b>Pricing and Commitments</b> section of the deal.
Deal Pricing and Commitment Column	Used to indicate the configurable column. The valid values are: <ul style="list-style-type: none"><li>• Approver</li><li>• Assignment Level</li><li>• Average Price</li><li>• Commitments</li><li>• Cost</li><li>• Price List</li><li>• Pricing Information</li><li>• Profit</li><li>• Profit Variation (%)</li><li>• Profitability (%)</li><li>• Revenue</li><li>• Status</li><li>• T&amp;C</li><li>• Variation (%)</li></ul>	Yes (Conditional)
		<b>Note:</b> This field is required while configuring the columns the <b>Pricing and Commitments</b> section of the deal.
Selection Type Flag	Used to indicate the selection type of the configurable column. The valid values are:	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li>• <b>Mandatory</b> - Used to indicate that the configured column is mandatory and cannot be removed from the <b>Pricing and Commitments</b> screen.</li><li>• <b>Optional</b> - Used to indicate that the configured column is optional and can be removed from the <b>Pricing and Commitments</b> screen if not required.</li><li>• <b>Standard</b> - Used to indicate that the configured column is standard and can be added in the <b>Pricing and Commitments</b> screen whenever required.</li></ul>	<b>Note:</b> This field is required while configuring the columns the <b>Pricing and Commitments</b> section of the deal.

- 2. Enter the required details in the **Pricing and Commitment Columns Configuration** section.
- 3. If you want to configure more than one column for the **Pricing and Commitments** section, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a column from the **Pricing and Commitments** section, click the **Delete** (🗑) icon corresponding to the column.

- 4. Click **Save**.  
The pricing and commitments column is configured.

**Associating a Deal Approval Profile with a Deal Type**

**Prerequisites**

To associate a deal approval profile with a deal type, you should have:

- Approval types defined in the application
- Divisions defined in the application
- Customer segments and customer tiers defined in the application
- Products defined in the application
- Deal approval profiles defined in the application

**Procedure**

To associate a deal approval profile with a deal type:

- 1. Ensure that the **Deal Approval Profiles** section is expanded in the **Deal Type** screen when you are defining, editing, or copying a deal type.  
The **Deal Approval Profiles** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to indicate the date from when the deal approval profile is effective for the deal type.	Yes
	<b>Note:</b> The effective start date cannot be later than the effective end date.  You can either manually specify the date or select it using the <b>Date Picker</b> (📅) icon corresponding to the field.	
Effective End Date	Used to indicate the date till when the deal approval profile is effective for the deal type.	No
	<b>Note:</b> The effective end date cannot be earlier than the effective start date.  You can either manually specify the date or select it using the <b>Date Picker</b> (📅) icon corresponding to the field.	
Approval Type	Used to indicate whether the deal type is used for approving a deal in the product level approval workflow, deal level approval workflow, or division level approval workflow. The valid values are: <ul style="list-style-type: none"> <li>• Deal</li> <li>• Division</li> <li>• Product</li> </ul>	Yes
Division	Used to indicate the division for which the deal level approval, division level approval, or product level approval is required.	Yes
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Customer Segment	Used to indicate the customer segment to which the deal type is associated.	Yes
	<b>Note:</b> This field is disabled when you select the <b>Division</b> or the <b>Product</b> option from the <b>Approval Type</b> field.	
Customer Tier	Used to indicate the customer tier to which the deal type is associated.	Yes
	<b>Note:</b> This field is disabled when you select the <b>Division</b> or the <b>Product</b> option from the <b>Approval Type</b> field.	

Field Name	Field Description	Mandatory (Yes or No)
Product	Used t to indicate the product for which the product level approval is required.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Product Search</b> window appears.  On specifying a product, the description of the product appears corresponding to the <b>Product</b> field.  This field is enabled only when you select the <b>Product</b> option from the <b>Approval Type</b> field.	<b>Note:</b> This field is required for approving a deal in the product level approval workflow.
Customer Characteristics	On clicking the <b>Add</b> (+) icon, you can define a customer characteristic for the respective deal approval profile.	No
	<b>Note:</b> The <b>Add</b> icon appears in the <b>Customer Characteristics</b> column only when the <b>Approval Type</b> is selected as <b>Deal</b> and the division is selected from the <b>Division</b> column for the respective deal approval profile.	
Deal Approval Profile	Used to indicate the approval profile which you want to use for approving the deal.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Approval Profile</b> field. On clicking the <b>Search</b> icon, the <b>Deal Approval Profile Search</b> window appears.  On specifying the value for a deal approval profile, the description of the deal approval profile appears corresponding to the <b>Deal Approval Profile</b> field.	

2. Enter the required details in the **Deal Approval Profiles** section.
3. If you want to associate more than one deal approval profile with the deal type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to disassociate a deal approval profile from the deal type, click the **Delete** (🗑) icon corresponding to the deal approval profile.

4. Click **Save**.  
The deal approval profile is associated with the deal type.

How to define a customer characteristic for a deal approval profile	<a href="#">Defining a Customer Characteristic for a Deal Approval Profile</a> on page 2760

## Defining a Customer Characteristic for a Deal Approval Profile

### Prerequisites

To define a customer characteristic for a deal approval profile, you should have:

- Deal approval profile associated with the deal type
- Characteristic types defined in the application (where the characteristic entity is set to **Deal Approval Profile**)

### Procedure

To define a customer characteristic for a deal approval profile:

1. Ensure that the **Deal Approval Profiles** section is expanded in the **Deal Type** screen when you are defining, editing, or copying deal type.
2. Click the **Add**  icon in the **Customer Characteristics** column corresponding to the deal approval profile for which you want to define a customer characteristic.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deal Approval Profile</b> .	<b>Note:</b> This field is required while defining a customer characteristic for the deal approval profile.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b>  icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a customer characteristic for the deal approval profile.

**Note:** The **Add** icon appears in the **Customer Characteristics** column only when the **Approval Type** is selected as **Deal** and the division is selected from the **Division** column for the respective deal approval profile.

- 3. Enter the required details in the **Customer Characteristics** column.
- 4. If you want to define more than one customer characteristic for the deal approval profile, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove a customer characteristic from the deal approval profile, click the **Delete** (■) icon corresponding to the characteristic.

- 5. Click **Save**.  
The customer characteristic is defined for the deal approval profile.

**Defining a Characteristic for a Deal Type**

**Prerequisites**

To define a characteristic for a deal type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**)

**Procedure**

To define a characteristic for a deal type:

- 1. Ensure that the **Characteristics** section is expanded in the **Deal Type** screen when you are defining, editing, or copying a deal type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deal type.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the deal type.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deal Type</b> .	<b>Note:</b> This field is required while defining a characteristic for the deal type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a characteristic for the deal type.

- 2. Enter the required details in the **Characteristics** section.
- 3. If you want to define more than one characteristic for the deal type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the deal type, click the **Delete** (🗑) icon corresponding to the characteristic.

- 4. Click **Save**.  
The characteristic is defined for the deal type.

## Editing a Deal Type

**Prerequisites**

To edit a deal type you should have:

- Deal approval profiles defined in the application
- Values defined for the **FREQUENCY\_FLG** lookup field.
- Deal approval profiles defined in the application
- Algorithms defined in the system
- Algorithms associated with the system events
- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**).
- Reminder To Do types defined in the application
- Questionnaire templates defined in the application

**Procedure**

To edit a deal type:

- 1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
- 2. From the **Admin** menu, select **D** and then click **Deal Type**.

A sub-menu appears.

- 3. Click the **Search** option from the **Deal Type** sub-menu.  
The **Deal Type** screen appears.
- 4. In the **Deal Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the deal type whose *details* you want to edit.

The **Deal Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal type.
- **Deal Approval Profiles** - Used to associate deal level, division level, or product level approval profiles with the deal type for approving the deal.
- **Algorithms** - Used to associate algorithms with the system events defined for the deal type
- **Pricing And Commitment Columns Configuration** - Used to configure which column should appear in the **Pricing and Commitments** section of the **Pricing and Commitments** screen. It also enables you to render the columns using a specific selection type.
- **Characteristics** - Used to define the characteristics for the deal type

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Type	Used to specify the deal type.	Not Applicable
Description	Used to specify the description for the deal type.	Yes
Detailed Description	Used to specify additional information about the deal type.	No
Deal Commitment Frequency	Used to indicate the duration for the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"><li>• Biannually</li><li>• Monthly</li><li>• Quarterly</li><li>• Yearly</li></ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	
Price Item Approval Required	Used to indicate whether the discretion check of an individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>	Yes
Assign Only If In Range	Used to indicate whether the deal is assigned to the approver/user as per the limits set in the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen.  For example, if the deal profitability % range of the approver/user is set as follows: <ul style="list-style-type: none"><li>• <b>RM</b> (0% - 5%)</li><li>• <b>PM</b> (6% - 15%)</li></ul>	Yes (Conditional)
		<b>Note:</b> This field is required for assigning the deal when the deal financial summary falls within the specified limits defined for the approver/user.

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li><b>SPM</b> (16% - 50%)</li> </ul> <p>Then,</p> <ul style="list-style-type: none"> <li>If the calculated deal profitability % is 4 %, then the deal will be assigned to the relationship manager (<b>RM</b>).</li> <li>If the calculated deal profitability % is 11 %, then the deal will be assigned to the pricing manager (<b>PM</b>).</li> <li>If the calculated deal profitability % is 25 %, then the deal will be assigned to the senior pricing manager (<b>SPM</b>).</li> </ul> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul> <p><b>Note:</b> This field is valid only for deal level approval profiles.</p>	
Product Level Approval Required	Used to indicate whether the discretion check of the price items at the product level is required for approving a deal. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving deal at product level.
Division Level Approval Required	Used to indicate whether the discretion check of the price items at the division level is required for approving a deal. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving deal at division level.
Highest Level Approval Required	Used to indicate whether the hierarchical approval of the deal is required for approving a deal.	Yes (Conditional)
	<p>For example, if the approval hierarchy has three levels <b>L0 (RM)</b>, <b>L1 (PM)</b>, and <b>L2 (SPM)</b>, then the deal will pass through all the three levels for approval respectively. <b>L0 (RM)</b> will not be able to finalize the deal without the approval of <b>L2 (SPM)</b>.</p> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving a deal by each level in the approval hierarchy.
Status	Used to indicate the status of the deal type. The valid values are:	Yes
	<ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> Only an <b>Active</b> deal type can be used for creating a deal.	
Pre-Approve Existing Pricing	Used to indicate whether the existing price items pricing and commitments should be pre-approved to confirm the financial summary of the deal. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	<b>Note:</b> This field is required for approving the existing price item pricing and commitments of the entity.
To Do Reminder Days	Used to specify the number of days using which the system calculates the first To Do reminder date.	Yes
To Do High Priority Days	Used to specify the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.	Yes
	<b>Note:</b> You can set a maximum of <b>9</b> priority days for the To Do reminder days.	
Days to Inactivate	Used to specify the number of days prior to the last updated date of the deal after which you want to inactivate the deal.	Yes (Conditional)
	<b>Note:</b> You must specify a numeric value greater than zero in this field. Also, the numeric value should be greater than the values specified in the <b>To Do Reminder Days</b> and <b>To Do High Priority Days</b> fields.  The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field.  The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.	<b>Note:</b> This field is required for inactivating deals which are not updated in the system for a long time.
Deal Monitor To Do Type	Used to indicate the To Do task that you want to send as a notification to the user for monitoring the priority days set for reviewing the deal.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Monitor To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the value for a To Do type, the description of the To Do type appears corresponding to the <b>To Do Type</b> field.</p>	
Questionnaire Template	Used to indicate the questionnaire template that you want to associate with the deal type using which the system searches for a list of deals which can be used as references while creating a deal.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Questionnaire Template</b> field. On clicking the <b>Search</b> icon, the <b>Search Questionnaire Template</b> window appears.</p> <p>On specifying the value for a questionnaire template, the description of the questionnaire template appears corresponding to the <b>Questionnaire Template</b> field.</p>	<p><b>Note:</b> This field is required for associating a questionnaire template with the deal type.</p>
Standard Pricing Comparison	Used to indicate whether you want to view the standard pricing of the price item compared with the proposed pricing of the price item in the <b>Pricing and Commitments</b> section of the <b>Pricing and Commitments</b> screen or in the <b>Customer Hierarchy</b> section of the <b>Deal Information</b> screen. The valid values are:	No
	<ul style="list-style-type: none"> <li>• No</li> <li>• Yes</li> </ul> <p><b>Note:</b> If you do not select any option from the list, the system by default considers it as <b>No</b>.</p>	
Default Simulation View	Used to indicate the default pricing comparison that you want to view for the deal level, division level, or product level financial summary in the <b>Deal Information</b> screen.	No
	<p><b>Note:</b> This field appears only when you select the <b>Yes</b> option from the Standard Pricing Comparison list.</p>	

5. Modify the required details in the **Main** section.

**Note:** You cannot edit the fields from the **Main** section when a deal is already created using the deal type.

6. Associate or disassociate deal approval profiles from the deal type, if required.

- 7. Associate or disassociate algorithms from the deal type, if required.
- 8. Configure, edit, or delete pricing and commitment columns, if required.
- 9. Define, edit, or remove characteristics from the deal type, if required.
- 10. Click **Save**.

The changes made to the deal type are saved.

**Tip:** Alternatively, you can edit the details of a deal type by clicking the **Edit** button in the **Deal Type** zone.

## Copying a Deal Type

Instead of creating a deal type from scratch, you can create a new deal type using an existing deal type. This is possible through copying a deal type. On copying a deal type, the details including the deal approval profiles, algorithms, and characteristics are copied to the new deal type. You can then edit the details, if required.

**Prerequisites**

To copy a deal type you should have:

- Deal type (whose copy you want to create) defined in the application
- Values defined for the **FREQUENCY\_FLG** lookup field.
- Deal approval profiles defined in the application
- Algorithms defined in the system
- Algorithms associated with the system events
- Characteristic types defined in the application (where the characteristic entity is set to **Deal Type**).
- Deal monitor To Do types defined in the application
- Questionnaire templates defined in the application

**Procedure**

To copy a deal type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Type** sub-menu.  
The **Deal Type** screen appears.
4. In the **Deal Type List** zone, click the **Duplicate** (🔗) icon in the **Duplicate** column corresponding to the deal type whose copy you want to create.

The **Deal Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal type.
- **Deal Approval Profiles** - Used to associate deal level, division level, or product level approval profiles with the deal type for approving the deal.
- **Algorithms** - Used to associate algorithms with the system events defined for the deal type
- **Pricing And Commitment Columns Configuration** - Used to configure which column should appear in the **Pricing and Commitments** section of the **Pricing and Commitments** screen. It also enables you to render the columns using a specific selection type.
- **Characteristics** - Used to define the characteristics for the deal type

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Type	Used to specify the deal type.	Yes
Description	Used to specify the description for the deal type.	Yes
Detailed Description	Used to specify additional information about the deal type.	No
Deal Commitment Frequency	Used to indicate the duration for the periodic analysis of deal usage as per the commitments made by the customer for calculating the deal financial summary. The valid values are: <ul style="list-style-type: none"><li>• Biannually</li><li>• Monthly</li><li>• Quarterly</li><li>• Yearly</li></ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	
Price Item Approval Required	Used to indicate whether the discretion check of an individual price item is required by the approver/user for approving the deal. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>	Yes
Assign Only If In Range	Used to indicate whether the deal is assigned to the approver/user as per the limits set in the <b>Approval Hierarchy</b> section of the <b>Deal Approval Profile</b> screen.  For example, if the deal profitability % range of the approver/user is set as follows: <ul style="list-style-type: none"><li>• <b>RM</b> (0% - 5%)</li><li>• <b>PM</b> (6% - 15%)</li><li>• <b>SPM</b> (16% - 50%)</li></ul> Then,	Yes (Conditional)
		<b>Note:</b> This field is required for assigning the deal when the deal financial summary falls within the specified limits defined for the approver/user.

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>If the calculated deal profitability % is 4 %, then the deal will be assigned to the relationship manager (<b>RM</b>).</li> <li>If the calculated deal profitability % is 11 %, then the deal will be assigned to the pricing manager (<b>PM</b>).</li> <li>If the calculated deal profitability % is 25 %, then the deal will be assigned to the senior pricing manager (<b>SPM</b>).</li> </ul> <p>The valid values are:</p> <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	
	<b>Note:</b> This field is valid only for deal level approval profiles.	
Product Level Approval Required	Used to indicate whether the discretion check of the price items at the product level is required for approving a deal. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving deal at product level.
Division Level Approval Required	Used to indicate whether the discretion check of the price items at the division level is required for approving a deal. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	<b>Note:</b> This field is required for approving deal at division level.
Highest Level Approval Required	Used to indicate whether the hierarchical approval of the deal is required for approving a deal.	Yes (Conditional)
	For example, if the approval hierarchy has three levels <b>L0 (RM)</b> , <b>L1 (PM)</b> , and <b>L2 (SPM)</b> , then the deal will pass through all the three levels for approval respectively. <b>L0 (RM)</b> will not be able to finalize the deal without the approval of <b>L2 (SPM)</b> .	<b>Note:</b> This field is required for approving a deal by each level in the approval hierarchy.
	The valid values are:	
	<ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	
Status	Used to indicate the status of the deal type. The valid values are:	Yes
	<ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	
	<b>Note:</b> Only an <b>Active</b> deal type can be used for creating a deal.	

Field Name	Field Description	Mandatory (Yes or No)
Pre-Approve Existing Pricing	Used to indicate whether the existing price items pricing and commitments should be pre-approved to confirm the financial summary of the deal. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for approving the existing price item pricing and commitments of the entity.
To Do Reminder Days	Used to specify the number of days using which the system calculates the first To Do reminder date.	Yes
To Do High Priority Days	Used to specify the number of days using which the system calculates the date when the To Do reminder of highest priority should be sent.	Yes
	<b>Note:</b> You can set a maximum of <b>9</b> priority days for the To Do reminder days.	
Days to Inactivate	Used to specify the number of days prior to the last updated date of the deal after which you want to inactivate the deal.	Yes (Conditional)
	<b>Note:</b> You must specify a numeric value greater than zero in this field. Also, the numeric value should be greater than the values specified in the <b>To Do Reminder Days</b> and <b>To Do High Priority Days</b> fields.  The deal is automatically inactivated if no action is performed on the deal within the specified number of days in this field.  The status of the deal is changed to <b>Inactive</b> when the deal inactivation date is equal to the system date.	<b>Note:</b> This field is required for inactivating deals which are not updated in the system for a long time.
Deal Monitor To Do Type	Used to indicate the To Do task that you want to send as a notification to the user for monitoring the priority days set for reviewing the deal.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Monitor To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  On specifying the value for a To Do type, the description of the To Do type appears corresponding to the <b>To Do Type</b> field.	
Questionnaire Template	Used to indicate the questionnaire template that you want to associate with the deal type using	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	which the system searches for a list of deals which can be used as references while creating a deal.	<b>Note:</b> This field is required for associating a questionnaire template with the deal type.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Questionnaire Template</b> field. On clicking the <b>Search</b> icon, the <b>Search Questionnaire Template</b> window appears.  On specifying the value for a questionnaire template, the description of the questionnaire template appears corresponding to the <b>Questionnaire Template</b> field.	
Standard Pricing Comparison	Used to indicate whether you want to view the standard pricing of the price item compared with the proposed pricing of the price item in the <b>Pricing and Commitments</b> section of the <b>Pricing and Commitments</b> screen or in the <b>Customer Hierarchy</b> section of the <b>Deal Information</b> screen. The valid values are: <ul style="list-style-type: none"><li>• No</li><li>• Yes</li></ul>	No
	<b>Note:</b> If you do not select any option from the list, the system by default considers it as <b>No</b> .	
Default Simulation View	Used to indicate the default pricing comparison that you want to view for the deal level, division level, or product level financial summary in the <b>Deal Information</b> screen.	No
	<b>Note:</b> This field appears only when you select the <b>Yes</b> option from the Standard Pricing Comparison list.	

- 5. Enter the required details in the **Main** section.
- 6. Associate or disassociate deal approval profiles from the deal type, if required.
- 7. Associate or disassociate algorithms from the deal type, if required.
- 8. Configure, edit, or delete pricing and commitment columns, if required.
- 9. Define, edit, or remove characteristics of the deal type, if required.
- 10. Click **Save**.  
The new deal type is defined.

**Tip:** Alternatively, you can copy a deal type by clicking the **Duplicate** button in the **Deal Type** zone.

## Deleting a Deal Type

### Procedure

To delete a deal type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Type** sub-menu.  
The **Deal Type** screen appears.
4. In the **Deal Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the deal type that you want to delete.  
A message appears confirming whether you want to delete the deal type.
5. Click **OK**.  
The deal type is deleted.

**Note:** You can delete a deal type only when the deal type is not yet used for creating a deal.

**Tip:** Alternatively, you can delete a deal type by clicking the **Delete** button in the **Deal Type** zone.

## Viewing the Details of a Deal Type

### Procedure

To view the details of type details:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deal Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Deal Type** sub-menu.  
The **Deal Type** screen appears.

- 4. In the **Deal Type List** zone, click the **Broadcast** (📢) icon corresponding to the deal type whose details you want to view.  
The **Deal Type** zone appears.
- 5. View the details of the deal type in the **Deal Type** zone.

## Questionnaire Template (Used for Searching)

The **Questionnaire Template** screen allows you to search for a questionnaire template using various search criteria. It also allows you to define, edit, copy, delete, and preview a questionnaire template. It contains the following zone:

- [Search Questionnaire Template](#) on page 2773

Through this screen, you can navigate to the following screen:

- [Questionnaire Template \(Used for Viewing\)](#) on page 2790

## Search Questionnaire Template

The **Search Questionnaire Template** zone allows you to search for a questionnaire template using various search criteria. It also allows you to edit, copy, delete, and preview an existing questionnaire template. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to search a particular questionnaire template.	No
Description	Used to search questionnaire templates having a particular description.	No
Start Date	Used to search questionnaire templates which are effective from a particular date onwards.	No
End Date	Used to search questionnaire templates which are effective till a particular date.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Questionnaire Template Information	Displays the concatenated string of information about the questionnaire template separated by a comma (,).

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Questionnaire Template</b> screen appears where you can view the details of the respective questionnaire template.
Description	Displays the description of the questionnaire template.
Start Date	Displays the date from when the questionnaire template is effective.
End Date	Displays the date till when the questionnaire template is effective.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Questionnaire Template</b> screen appears where you can edit the questionnaire template details.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Questionnaire Template</b> screen appears where you can define a questionnaire template using an existing questionnaire template.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the questionnaire template.
Preview	On clicking the <b>Preview</b> (🔍) icon, <b>Preview Questionnaire Template</b> screen appears where you can preview the questions of a questionnaire template.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Defining a Questionnaire Template

**Prerequisites**

To define a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.
- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

**Procedure**

To define a questionnaire template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **Q** and then click **Questionnaire Template**.  
A sub-menu appears.
3. Click the **Add** option from the **Questionnaire Template** sub-menu.

The **Questionnaire Template** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to specify the questionnaire template.	Yes
Description	Used to specify the description for the questionnaire template.	Yes
Start Date	Used to specify the date from when the questionnaire template is effective.	Yes
End Date	Used to specify the date till when the questionnaire template is effective.	No
Question Display Order	Used to indicate the order in which the questions of the questionnaire template should appear in the <b>Questionnaire Template</b> screen. The valid values are: <ul style="list-style-type: none"><li>• Rule based</li><li>• Sequence based</li></ul>	Yes

- **Questions** - Used to associate the rule based or sequence based questions with the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.	
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	Used to indicate the type in which you want to select the answer for the question. The valid values are: <ul style="list-style-type: none"> <li>• Date</li> <li>• Decimal Value</li> <li>• Multi Selection Check Box List</li> <li>• Multi Selection from Drop Down List</li> <li>• Numeric Value</li> <li>• Percentage</li> <li>• Radio Button List</li> <li>• Single Selection Drop Down List</li> <li>• Text</li> </ul>	Yes
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are: <ul style="list-style-type: none"> <li>• <b>Reference Data</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a specific reference table given in the system.</li> </ul> </li> </ul>	Yes (Conditional)
	<b>Note:</b> This field is disabled when you select the <b>Date</b> , <b>Decimal Value</b> , <b>Numeric Value</b> , <b>Percentage</b> , or <b>Text</b> option from the <b>Answer Type</b> list.	<b>Note:</b> This field is required for searching answers from a given reference.
	<ul style="list-style-type: none"> <li>• <b>Predefined List</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a predefined list defined in the system.</li> </ul> </li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)
	<div>Note: This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</div>	
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)
	<div>Note:</div> <div>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears.</div> <div>On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field.</div> <div>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</div>	<div>Note: This field is required for searching the answer from a reference table.</div>
Reference Column	Used to indicate the column in the reference table from where you want to search for the answer of the question.	Yes (Conditional)
	<div>Note:</div> <div>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears.</div> <div>On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field.</div> <div>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</div>	<div>Note: This field is required for searching the answer from a reference table.</div>
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No
Validation Algorithm	Used to indicate the algorithm that you want to use for validating the answer of the question.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.</p>	
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	<p>Used to indicate whether the question is mandatory or not.</p> <p><b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.</p>	No
Reference Parameter	<p>Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears. On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.</p>	No
Rule Type	<p>Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears. On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field. This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.</p>
Question Applicability	Used to indicate the question applicability based on which the references are derived. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li>Customer and Deal References</li><li>Package and Product References</li><li>Others</li></ul>	
Predefined Value	Used to specify the predefined list from where you want the system to search the answer for a question.	Yes (Conditional).
	<b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a predefined list.
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

- 4. Enter the required details in the **Main** section.
- 5. Define questions for the questionnaire template in the **Questions** section.
- 6. If you want to define more than one question for the questionnaire template, click the **Add (+)** icon in the **Questions** section.

**Note:** However, if you want to remove a question from the questionnaire template, click the **Delete (🗑)** icon in the **Questions** section.

- 7. Click **Save**.  
The questionnaire template is defined.

## Editing a Questionnaire Template

**Prerequisites**

To edit a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.
- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

**Procedure**

To edit a questionnaire template:

- 1. Search for the questionnaire template in the **Questionnaire Template** screen.

2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the questionnaire template whose details you want to edit.

The **Questionnaire Template** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to specify the questionnaire template.	Not applicable
Description	Used to specify the description for the questionnaire template.	No
Start Date	Used to specify the date from when the questionnaire template is effective.	Yes
End Date	Used to specify the date till when the questionnaire template is effective.	No
Question Display Order	Used to indicate the order in which the questions of the questionnaire template should appear in the <b>Questionnaire Template</b> screen. The valid values are: <ul style="list-style-type: none"><li>• Rule based</li><li>• Sequence based</li></ul>	Yes

- **Questions** - Used to associate the rule based or sequence based questions with the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.	
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	Used to indicate the type in which you want to select the answer for the question. The valid values are: <ul style="list-style-type: none"><li>• Date</li><li>• Decimal Value</li><li>• Multi Selection Check Box List</li><li>• Multi Selection from Drop Down List</li><li>• Numeric Value</li><li>• Percentage</li><li>• Radio Button List</li><li>• Single Selection Drop Down List</li></ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Text</li> </ul>	
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li><b>Reference Data</b> <ul style="list-style-type: none"> <li>Used to indicate that you want to search for the answer from a specific reference table given in the system.</li> </ul> </li> </ul>	<b>Note:</b> This field is required for searching answers from a given reference.
	<b>Note:</b> This field is disabled when you select the <b>Date</b> , <b>Decimal Value</b> , <b>Numeric Value</b> , <b>Percentage</b> , or <b>Text</b> option from the <b>Answer Type</b> list.	
	<ul style="list-style-type: none"> <li><b>Predefined List</b> <ul style="list-style-type: none"> <li>Used to indicate that you want to search for the answer from a predefined list defined in the system.</li> </ul> </li> </ul>	
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears.  On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field.  This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a reference table.
Reference Column	Used to indicate the column in the reference table from where you want to search for the answer of the question.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears.</p> <p>On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p><b>Note:</b> This field is required for searching the answer from a reference table.</p>
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No
Validation Algorithm	<p>Used to indicate the algorithm that you want to use for validating the answer of the question.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.</p>	Yes
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	<p>Used to indicate whether the question is mandatory or not.</p> <p><b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.</p>	No
Reference Parameter	Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> <p>On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.</p>	
Rule Type	Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears.</p> <p>On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field.</p> <p>This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b>.</p>	<p><b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.</p>
Question Applicability	<p>Used to indicate the question applicability based on which the references are derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Customer and Deal References</li> <li>• Package and Product References</li> <li>• Others</li> </ul>	Yes
Predefined Value	Used to specify the predefined list from where you want the system to search the answer for a question.	Yes (Conditional).
	<b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a predefined list.
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

3. Modify the required details in the **Main** section.

4. Add, edit, or remove questions from the questionnaire template, if required.

**Note:** Click the **Previous** (↶) or **Next** (↷) icons in the **Questions** section to navigate through the existing questions of the questionnaire template which you want to edit or delete.

5. Click **Save**.  
The changes made to the questionnaire template are saved.

**Tip:** Alternatively, you can edit the details of a questionnaire template by clicking the **Edit** button in the **Questionnaire Template** zone of the **Questionnaire Template** screen.

## Copying a Questionnaire Template

Instead of creating a questionnaire template from scratch, you can create a new questionnaire template using an existing questionnaire template. This is possible through copying a questionnaire template. On copying a questionnaire template, the details including the questions are copied to the new questionnaire template. You can then edit the details, if required.

**Prerequisites**

To copy a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.
- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

**Procedure**

To copy a questionnaire template:

1. Search for the questionnaire template in the **Questionnaire Template** screen.
2. In the **Search Results** section, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the questionnaire template whose copy you want to create.

The **Questionnaire Template** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Questionnaire Template	Used to specify the questionnaire template.	Yes
Description	Used to specify the description for the questionnaire template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the questionnaire template is effective.	Yes
End Date	Used to specify the date till when the questionnaire template is effective.	No
Question Display Order	Used to indicate the order in which the questions of the questionnaire template should appear in the <b>Questionnaire Template</b> screen. The valid values are: <ul style="list-style-type: none"> <li>• Rule based</li> <li>• Sequence based</li> </ul>	Yes

- **Questions** - Used to associate the rule based or sequence based questions with the questionnaire template. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.	
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	Used to indicate the type in which you want to select the answer for the question. The valid values are: <ul style="list-style-type: none"> <li>• Date</li> <li>• Decimal Value</li> <li>• Multi Selection Check Box List</li> <li>• Multi Selection from Drop Down List</li> <li>• Numeric Value</li> <li>• Percentage</li> <li>• Radio Button List</li> <li>• Single Selection Drop Down List</li> <li>• Text</li> </ul>	Yes
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are: <ul style="list-style-type: none"> <li>• <b>Reference Data</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a specific reference table given in the system.</li> </ul> </li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required for searching answers from a given reference.

Field Name	Field Description	Mandatory (Yes or No)
	<div><div><b>Note:</b> This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</div><div><ul style="list-style-type: none"><li><b>Predefined List</b><ul style="list-style-type: none"><li>- Used to indicate that you want to search for the answer from a predefined list defined in the system.</li></ul></li></ul></div><div><div><b>Note:</b> This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list.</div></div></div>	
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)
	<div><div><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears.  On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field.  This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</div></div>	<div><b>Note:</b> This field is required for searching the answer from a reference table.</div>
Reference Column	Used to indicate the column in the reference table from where you want to search for the answer of the question.	Yes (Conditional)
	<div><div><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears.  On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field.  This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</div></div>	<div><b>Note:</b> This field is required for searching the answer from a reference table.</div>

Field Name	Field Description	Mandatory (Yes or No)
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No
Validation Algorithm	Used to indicate the algorithm that you want to use for validating the answer of the question.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.	
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	Used to indicate whether the question is mandatory or not.	No
	<b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.	
Reference Parameter	Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.  On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.	
Rule Type	Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears.  On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field.  This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b> .	<b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.
Question Applicability	Used to indicate the question applicability based on which the references are derived. The valid values are: <ul style="list-style-type: none"><li>• Customer and Deal References</li><li>• Package and Product References</li><li>• Others</li></ul>	Yes
Predefined Value	Used to specify the predefined list from where you want the system to search the answer for a question.	Yes (Conditional).
	<b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a predefined list.
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

- 3. Enter the required details in the **Main** section.
- 4. Add, edit, or remove questions from the questionnaire template, if required.

**Note:** Click the **Previous** (⏮) or **Next** (⏭) icons in the **Questions** section to navigate through the existing questions of the questionnaire template which you want to edit or delete.

- 5. Click **Save**.  
The new questionnaire template is defined.

**Editing a Question**

**Prerequisites**

To edit a question of a questionnaire template you should have:

- Questions defined in the application.
- Reference tables and reference columns defined in the application.
- Validation algorithms defined in the application.
- Reference parameter defined in the application.
- Rule types defined in the application.
- Values defined for the **DEAL\_QUE\_DISP\_FLG**, **ANS\_DISPLAY\_FLG** and **APPLICABLE\_FOR\_FLG** lookup fields.

**Procedure**

To edit a question:

- 1. Search for the questionnaire template in the **Questionnaire Template** screen.
- 2. In the **Search Results** section, click the link in the **Questionnaire Template Information** column corresponding to the questionnaire template whose question you want to edit.  
The **Questionnaire Template** screen appears.
- 3. Ensure that the **Questions** zone is expanded in the **Questionnaire Template** screen.
- 4. Click the **Edit** (✎) icon in the **Edit** column corresponding to the question that you want to edit.

The **Question** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Question	Used to specify the question that you want to associate with the questionnaire template.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Question Search</b> window appears where you can search for a question.	

Field Name	Field Description	Mandatory (Yes or No)
Question Text	Used to specify the question statement.	Yes
Sequence	Used to specify the sequence number of the question.	Yes
Answer Type	Used to indicate the type in which you want to select the answer for the question. The valid values are: <ul style="list-style-type: none"> <li>• Date</li> <li>• Decimal Value</li> <li>• Multi Selection Check Box List</li> <li>• Multi Selection from Drop Down List</li> <li>• Numeric Value</li> <li>• Percentage</li> <li>• Radio Button List</li> <li>• Single Selection Drop Down List</li> <li>• Text</li> </ul>	Yes
Answer Value Set	Indicates the references from where you want to search for the answer of the question. The valid values are: <ul style="list-style-type: none"> <li>• <b>Reference Data</b> <ul style="list-style-type: none"> <li>- Used to indicate that you want to search for the answer from a specific reference table given in the system.</li> </ul> </li> </ul> <div> <b>Note:</b> This field is disabled when you select the <b>Date</b>, <b>Decimal Value</b>, <b>Numeric Value</b>, <b>Percentage</b>, or <b>Text</b> option from the <b>Answer Type</b> list. </div>	Yes (Conditional)
		<b>Note:</b> This field is required for searching answers from a given reference.
Reference Table	Used to indicate a specific table that you want to set as a source for searching the answer of the question.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Table Search</b> window appears.</p> <p>On specifying the table, the description of the table appears corresponding to the <b>Reference Table</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p><b>Note:</b> This field is required for searching the answer from a reference table.</p>
Reference Column	<p>Used to indicate the column in the reference table from where you want to search for the answer of the question.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Column Search</b> window appears.</p> <p>On specifying the column, the description of the column appears corresponding to the <b>Reference Column</b> field.</p> <p>This field is enabled only when the <b>Reference Data</b> option radio button is selected from the <b>Answer Value Set</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for searching the answer from a reference table.</p>
Reference Criteria	Used to specify the criteria based on which you want to search for the answer from the given reference.	No
Validation Algorithm	<p>Used to indicate the algorithm that you want to use for validating the answer of the question.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears where you can search for an algorithm.</p>	Yes
Default Answer	Used to specify the answer that you want to set as default for the question.	No
Mandatory	<p>Used to indicate whether the question is mandatory or not.</p> <p><b>Note:</b> On selecting the check box of the <b>Mandatory</b> field, the question appears with an asterisk (*) sign in the questionnaire template.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Reference Parameter	Used to indicate the parameter which is used to check the eligibility while recommending the reference customers / products / packages.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.  On specifying the parameter, the description of the parameter appears corresponding to the <b>Reference Parameter</b> field.	
Rule Type	Used to indicate the rule type using which the next question appears in the <b>Questionnaire Template</b> screen.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rule Type Search</b> window appears.  On specifying the rule type, the description of the rule type appears corresponding to the <b>Rule Type</b> field.  This field is used when the <b>Question Display Order</b> is selected as <b>Rule Based</b> .	<b>Note:</b> This field is used for displaying the next question based on the answer provided for the previous question in the questionnaire template.
Question Applicability	Used to indicate the question applicability based on which the references are derived. The valid values are: <ul style="list-style-type: none"> <li>• Customer and Deal References</li> <li>• Package and Product References</li> <li>• Others</li> </ul>	Yes
Predefined Value	Used to specify the predefined list from where you want the system to search the answer for a question.	Yes (Conditional).
	<b>Note:</b> This field is enabled when the <b>Predefined List</b> option radio button is selected from the <b>Answer Value Set</b> field.	<b>Note:</b> This field is required for searching the answer from a predefined list.
Description	Used to specify the description of the predefined list.	Yes (Conditional)
		<b>Note:</b> This field is required for searching the answer from a predefined list.

5. Click **Save**.

The changes made to the question are saved.

# Prospect

The **Prospect** screen allows you to search for a prospect using various search criteria. It also allows you to define and edit a prospect. It contains the following zone:

- [Prospect](#) on page 2796

# Prospect

The **Prospect** zone allows you to search for a prospect using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search prospects which are associated with a particular division.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Prospect Person Name	Used to search for a particular prospect person.	No
Customer Segment	Used to search prospects which are associated to a particular business component.	No
	<b>Note:</b> This field appears when you click the <b>Advanced Search</b> link in the top right corner of this zone.	
Prospect Person ID	Used to search for a particular prospect.	No
Prospect Person Identifier Type	Used to indicate the identifier type based on which you want to search for a prospect.	Yes (Conditional)
		<b>Note:</b> If you specify the prospect person identifier as a search criteria, you have to select the prospect person identifier type.

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person Identifier	Used to specify the identifier based on which you want to search for a prospect person.	Yes (Conditional)
		<b>Note:</b> If you indicate the prospect person identifier type as a search criteria, you have to enter the prospect person identifier.

**Note:** You must specify at least one search criterion while searching for a prospect.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Prospect Person Information	Displays the concatenated string of information about the prospect separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Prospect Person</b> screen appears where you can view or edit the details of the respective prospect.
Prospect Person Identifier Type	Indicates the identifier type of the prospect.
Prospect Person Identifier	Displays the value of the prospect person identifier type.
Division	Displays the division to which the prospect belongs.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (☰) icon in the upper right corner of this zone.

# Searching for a Prospect

**Prerequisites**

To search for a prospect, you should have:

- Divisions defined in the application
- Prospects associated with the division
- Customer segments defined in the application

- Prospects associated with the respective customer segment
- Prospect customer identifier types defined in the application

**Procedure**

To search for a prospect:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Prospect**.  
A sub-menu appears.
3. Click the **Search** option from the **Prospect** sub-menu.  
The **Prospect** screen appears.
4. Enter the search criteria in the **Prospect** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of prospects that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Editing a Prospect Person

**Prerequisites**

To edit a prospect person, you should have:

- Prospect (which you want to edit) defined in the application
- Customer segments and customer tiers defined in the application
- Access groups defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)
- Person identifier types defined in the application
- Relationship types defined in the application

**Procedure**

To edit a prospect person:

1. Search for the prospect person in the **Prospect** screen.
2. In the **Search Results** section, click the link in the **Prospect Person Information** column corresponding to the prospect whose details you want to edit.

The **Prospect Person** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the prospect person.

- **Prospect Person Address** - Used to define or edit the address of the prospect person.
- **Prospect Person Characteristics** - Used to define, edit, or remove characteristics of the prospect person.
- **Prospect Person Identifiers** - Used to associate or disassociate identifiers from the prospect person.
- **Prospect Person Relationships** - Used to associate or disassociate child persons with the prospect person.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Indicates the prospect person ID for which you want to edit the prospect person details.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Person ID</b> field is in the read-only mode.	
Prospect Person Name	Used to specify the name for the prospect person.	No
Division	Used to indicate the division to which the prospect person is associated.	No
	<b>Note:</b> This field cannot be edited when an account is defined for the prospect person. You can only view those divisions to which you have access in the <b>Division</b> list.	
Customer Segment	Used to indicate the business component to which you want to associate the prospect person.	No
	<b>Note:</b> The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field.	
Customer Tier	Used to indicate the customer tier.	No
	<b>Note:</b> The list includes only those values which are present in the <b>CUST_TIER_FLG</b> lookup field.	
Access Group	Used to indicate the users who can view and edit the details of the prospect person.	Yes
Email Address	Used to specify the email address of the prospect person.	No
Date Of Birth	Used to specify the date of birth of the prospect person.	No

3. Modify the required details in the **Main** section.
4. Define or edit address of the prospect person, if required.
5. Define, edit, or remove characteristics of the prospect person, if required.
6. Associate or disassociate identifiers from the prospect person, if required.
7. Associate or disassociate child persons from the prospect person, if required.
8. Click **Save**.

The changes made to the prospect person are saved.

## Editing a Prospect Account

**Prerequisites**

To edit a prospect account, you should have:

- Prospect (whose account details you want to edit) defined in the application
- Customer class defined in the application
- Currencies defined in the application
- Bill Cycles defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Account identifier types defined in the application

**Procedure**

To edit a prospect account:

1. Search for the prospect person whose account details you want to edit in the **Prospect** screen.
2. Modify the required details in the **Prospect Person** screen, if required.
3. Click **Save**.  
The changes made to the prospect person are saved.
4. Click **Next**.

The **Prospect Account** screen appears. It contains the following sections:

- **Prospect Account List** - Lists the accounts which are associated with the prospect person.

**Note:** By default, the **Prospect Account List** section does not appear. It appears only when an account is defined for a prospect person.

- **Main** - Used to specify basic details about the prospect account.
- **Prospect Account Characteristics** - Used to define, edit, or remove characteristics of the prospect account.
- **Prospect Account Identifiers** - Used to add, edit, or remove identifiers from the prospect account.

The **Prospect Account List** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Prospect Person ID	Displays the prospect person to which the account is associated.	Not applicable
Prospect Account Information	Displays information about the prospect account.	Yes

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> It has a link. On clicking the link, the details of the prospect account is accessible for editing in the <b>Main, Prospect Account Characteristics</b> , and <b>Prospect Account Identifiers</b> sections.	
Division	Indicates the division to which the prospect account is associated.	Not applicable
Set Up Date	Displays the date from when the prospect account is available for calculating the financial summary of the deal.	Not applicable

5. Click the link in the **Prospect Account Information** column corresponding to the account whose details you want to edit.

The details of the account is accessible for editing in the **Main, Prospect Account Characteristics** , and **Prospect Account Identifiers** sections.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Displays the prospect person to which the account is associated.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Person ID</b> field is in the read-only mode.	
Prospect Account ID	Displays the account associated with the prospect person.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Account ID</b> field is in the read-only mode.	
Customer Class	Used to indicate the customer class to which the prospect account belongs.	Yes
Division	Indicates the division to which the prospect account is associated.	Not applicable
	<b>Note:</b> By default, the <b>Division</b> field is in the read-only mode.	
Set Up Date	Used to specify the date from when the prospect account is available for calculating the financial summary of the deal.	Yes
Invoice Currency	Used to indicate the currency in which you want the financial summary of the prospect account to be calculated for the deal.	Yes
Bill Cycle	Used to indicate the time interval in which you want to create the financial summary of the account for the deal.	No
Access Group	Indicates the users who can view or edit the details of the account.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> By default, the <b>Access Group</b> field is in the read-only mode.	

- 6. Modify the required details in the **Main** section.
- 7. Define, edit, or remove characteristics of the **Prospect Account Characteristics** section, if required.
- 8. Add, edit, or remove identifier details from the **Prospect Account Identifiers** section, if required.
- 9. Click **Save**.  
The changes made to the prospect account are saved.

## Defining a Characteristic for a Prospect Person

**Prerequisites**

To define a characteristic for a prospect person, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Person**)

**Procedure**

To define a characteristic for a prospect person:

1. Ensure that the **Prospect Person Characteristics** section is expanded when you are defining or editing a prospect person.

The **Prospect Person Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the prospect person.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for a prospect person.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Prospect Person</b> .	<b>Note:</b> This field is required while defining a characteristic for a prospect person.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a characteristic for a prospect person.

2. Enter the required details in the **Prospect Person Characteristics** section.
3. If you want to define more than one characteristic for the prospect, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the prospect, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.  
The characteristic is defined for the prospect person.

## Defining an Account for a Prospect Person

### Prerequisites

To define an account for a prospect person, you should have:

- Customer classes defined in the application
- Bill cycles defined in the application
- Currencies defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Account identifier types defined in the application

### Procedure

To define an account for a prospect person:

1. Ensure that the **Prospect Account** screen is open when you are defining or editing a prospect person.

The **Prospect Account** screen contains the following sections:

- **Prospect Account List** - Lists the accounts which are defined for the prospect person.

**Note:** By default, the **Prospect Account List** section does not appear. It appears when you define an account for a prospect person.

- **Main** - Used to specify basic details about the prospect account.
- **Prospect Account Characteristics** - Used to define a list of characteristics for the prospect account.
- **Prospect Account Identifiers** - Used to associate identifiers with the prospect account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Prospect Person ID	Indicates the prospect person for whom you want to define the account.	Not applicable
Prospect Account ID	Indicates the account identification value that is generated for the prospect person.	Not applicable
	<b>Note:</b> By default, the <b>Prospect Account ID</b> field is in the read-only mode. The account identification value is created automatically when you click the <b>Save</b> button on the <b>Prospect Account</b> screen.	
Customer Class	Used to indicate the customer class to which the account is associated.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining an account for a prospect person.
Division	Indicates the division to which the prospect person is associated for whom you want to define the account.	Not applicable
Set Up Date	Used to specify the date from when the prospect account is available for calculating the financial summary of the deal.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		<b>Note:</b> This field is required when you are defining an account for a prospect person.
Invoice Currency	Used to indicate the currency in which you want the financial summary of the prospect account to be calculated for the deal.	Yes (Conditional) <b>Note:</b> This field is required when you are defining an account for a prospect person.
Bill Cycle	Used to indicate the time interval in which you want to create the financial summary of the account for the deal.	Yes (Conditional) <b>Note:</b> This field is required when you are defining an account for a prospect person.
Access Group	Indicates the users who can view and edit the details of the prospect account. <b>Note:</b> By default, the <b>Access Group</b> field is in the read-only mode.	Not applicable

- 2. Enter the required details in the **Main** section.
- 3. Define characteristics for the prospect account, if required.
- 4. Associate identifiers with the prospect account, if required.
- 5. Click **Save**.  
The account is defined for the prospect person.

**Defining a Characteristic for a Prospect Account**

**Prerequisites**

To define a characteristic for a prospect account, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

**Procedure**

To define a characteristic for a prospect account:

1. Ensure that the **Prospect Account Characteristics** section is expanded when you are defining or editing a prospect account.

The **Prospect Account Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the prospect account.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for a prospect account.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Account</b> .	<b>Note:</b> This field is required while defining a characteristic for a prospect account.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a characteristic for a prospect account.

2. Enter the required details in the **Prospect Account Characteristics** section.
3. If you want to define more than one characteristic for the prospect account, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the prospect account, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.  
The characteristic is defined for the prospect account.

## Associating an Identifier with a Prospect Account

### Prerequisites

To associate an identifier with a prospect account, you should have:

- Prospect account identifier types defined in the application

### Procedure

To associate an identifier with a prospect account:

1. Ensure that the **Prospect Account Identifiers** section is expanded when you are defining or editing a prospect account.

The **Prospect Account Identifiers** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Primary ID	Used to specify whether the prospect account identifier is primary or not.	Yes (Conditional)
		<b>Note:</b> This field is required while associating an identifier with a prospect account.
Account Identifier Type	Used to indicate the identifier type based on which you want to define the prospect account.	Yes (Conditional)
		<b>Note:</b> This field is required while associating an identifier with a prospect account.
Primary Account Identifier	Used to specify the value for the account identifier type.	Yes (Conditional)
		<b>Note:</b> This field is required while associating an identifier with a prospect account.

2. Enter the required details in the **Prospect Account Identifiers** section.
3. If you want to associate more than one identifier with the prospect account, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to disassociate an identifier from the prospect account, click the **Delete (■)** icon corresponding to the identifier.

4. Click **Save**.  
The identifier is associated with the prospect account.

# Deal Dashboard

The **Deal Dashboard** screen allows you to define a deal. It also enables you to do the following:

- View the metrics of the deals through a tiles chart, bar chart, or line chart
- View the details of a tile from the metrics in a pie chart
- View the To Do's assigned to the user
- Compare two deals versions

The **Deal Dashboard** screen contains the following zones:

- [Deal Metrics](#) on page 2813
- [Deal Statistics](#) on page 2814
- [Deal To Do](#) on page 2815
- [Search Deal](#) on page 2815
- [Deal Versions](#) on page 2827
- [Deal Comparison](#) on page 2828

## Deal Metrics

The **Deal Metrics** zone enables you to view the following information:

- Number of deals created by the logged in user
- Number of deals created by the users who belong to the logged in user's access group
- Number of deals in the **Pending for Approval** status
- Number of deals yet to be finalized
- Number of deals yet to be accepted by the customer
- Number of deals accepted by the customer
- Number of deals rejected by the customer

**Note:**

By default, the above information is shown for the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

The **Deal Metrics** zone contains the following fields:

Field Name	Field Description
Period From	Used to specify the month and year from when you want to view the information of deals created by the logged in user or created by a set of users who belong to the logged in user's access group.
	<b>Note:</b> The default value is derived using the <b>Deal Limits in Months</b> option type of the <b>C1-DEAL</b> feature configuration.
Period To	Used to specify the month and year till when you want to view the information of deals created by the logged in user or created by a set of users who belong to the logged in user's access group.
	<b>Note:</b> The default value is derived using the <b>Deal Limits in Months</b> option type of the <b>C1-DEAL</b> feature configuration.

Field Name	Field Description
Division	Used when you want to view the information of deals which belong to a particular division.
Customer Tier	Used when you want to view the information of deals which are created for a particular customer tier.
Customer Segment	Used when you want to view the information of deals which are created for a particular customer segment.

In addition, the **Deal Metrics** zone contains the following toggle buttons:

Toggle Button Name	Toggle Button Description
User/User Access Group	Used to view the metrics and statistics of deals which are created by the logged in user or by a set of users who belong to the logged in user's access group.
	<b>Note:</b> You can set the default view for the <b>Deal Dashboard</b> screen using the <b>Deal Dashboard Default View</b> option type of the <b>C1-DEAL</b> feature configuration. If you do not set the <b>Deal Dashboard Default View</b> option type of the <b>C1-DEAL</b> feature configuration, the system, by default, shows the data of the logged in user in the <b>Deal Dashboard</b> screen.
Tiles/Chart	Used to view the deal metrics through a graphical representation in the tiles or chart format.
	<b>Note:</b> The Bar chart indicates the number of deals in different statuses for an existing customer, existing account, and prospect. Whereas, the Line chart indicates the deal revenue from an existing customer, existing account, and prospect.

**Deal Statistics**

The **Deal Statistics** zone allows you to view information through a pie chart about a particular tile from the tiles chart available in the **Deal Metrics** zone. On clicking a tile in the tiles chart, the pie chart graphically represents the number of deals in percentage of an existing customer, existing account, and prospect in the respective status.

**Note:**

By default, the deal statistics is shown for the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required in the **Deal Metrics** zone.

**Deal To Do**

The **Deal To Do** zone lists all the To Do's generated for the approving the deal. It contains the following columns:

Column name	Column Description
To Do	On clicking the <b>To Do</b> icon (📌), the <b>To Do Entry</b> screen appears where you can view the details of the respective To Do assigned to the user.
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,) for which the To Do is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can perform the required action.

**Note:** By default, the system lists the To Do's that are created in the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the list using various criteria (such as, **To Do Type**, **Priority**, **Start Date**, and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

**Search Deal**

The **Search Deal** zone allows you to search for deals using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a deal using the deal, customer, account, or deal characteristic details. The valid values are: <ul style="list-style-type: none"> <li>Deal Details</li> <li>Customer Details</li> <li>Account Details</li> <li>Deal Characteristics</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Deal Details</b> option is selected.	
Deal ID	Used to search for a particular deal.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	
Deal Identifier	Used to search deals which are created using a particular deal identifier.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	
Division	Used to search deals which are associated with a particular division to which the user belongs.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Deal Type	Used to search deals which are created using a particular deal type.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Deal Type Search</b> window appears. On specifying the deal type, the description of the deal type appears corresponding to the <b>Deal Type</b> field. This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	
Start Date	Used to search deals which are effective from a particular date onwards.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list. The start date cannot be later than the end date.	

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search deals which are effective till a particular date.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list. The end date cannot be earlier than the start date.	
Status	Used to search deals with a particular status. The valid values are: <ul style="list-style-type: none"><li>• Applied/Processed</li><li>• Approved</li><li>• Closed</li><li>• Customer Accepted</li><li>• Discarded</li><li>• Draft</li><li>• Error</li><li>• Finalized</li><li>• Fully Orchestrated</li><li>• Hierarchy Creation Deferred</li><li>• Inactive</li><li>• Partially Orchestrated</li><li>• Pending for Approval</li><li>• Pending for Review</li><li>• Pending Simulation</li><li>• Pending for Orchestration</li><li>• Ready for Approval</li><li>• Rejected</li><li>• Simulated</li><li>• Simulation Deferred</li></ul>	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	
Deal Entity	Used to search deals which are created for a particular entity. The valid values are: <ul style="list-style-type: none"><li>• <b>Account</b> - Used to search deals which are created for the existing accounts in the system.</li></ul>	Yes (Conditional)
	<b>Note:</b> This option appears when you select the <b>Deal Details</b> or <b>Account Details</b> option from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching deals created for the respective entities.
	<ul style="list-style-type: none"><li>• <b>Customer</b> - Used to search deals which are created for the existing customers in the system.</li></ul>	

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> This option appears when you select the <b>Deal Details</b> or <b>Customer Details</b> option from the <b>Search By</b> list.</p> <ul style="list-style-type: none"> <li><b>Prospect</b> - Used to search deals which are created for the existing prospects in the system.</li> </ul> <p><b>Note:</b> This option appears when you select the <b>Deal Details</b> or <b>Customer Details</b> option from the <b>Search By</b> list.</p> <p><b>Note:</b> By default, the <b>Customer</b> or <b>Account</b> option is selected when you search deals using the <b>Customer Details</b> or <b>Account Details</b> options respectively from the <b>Search By</b> field.</p>	
Deal Creation From Date	<p>Used to search deals which are created from a particular date onwards.</p> <p><b>Note:</b> By default, the system displays the date which is specified in the <b>Deal Limits in Months</b> option type of the <b>C1-DEAL</b> feature configuration. You can change the date if required.</p>	No
Deal Creation To Date	<p>Used to search deals which are created till a particular date.</p> <p><b>Note:</b> By default, the system displays the date which is specified in the <b>Deal Limits in Months</b> option type of the <b>C1-DEAL</b> feature configuration. You can change the date if required.</p>	No
Created By	<p>Used to search deals which are created by a particular user.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>User Search</b> screen appears.</p> <p>On specifying the creator, the description of the creator appears corresponding to the <b>Created By</b> field.</p> <p>This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.</p>	No
Deal Effective Start date	Used to search for deals whose proposed price list is effective from a particular date onwards.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link at the upper right corner of the <b>Search Deal</b> zone is clicked.	
Deal Effective End Date	Used to search for deals whose proposed price list is effective till a particular date.  <b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link at the upper right corner of the <b>Search Deal</b> zone is clicked.	No
Proposed Revenue Filters	Used to search for deals by specifying the proposed revenue amount in the deal level financial summary. The valid values are:  <ul style="list-style-type: none"> <li>• <b>Between</b> - Used to search for deals whose proposed revenue amount falls between the specified range.</li> <li>• <b>Greater Than</b> - Used to search for deals whose proposed revenue amount in the deal level financial summary is greater than the specified revenue amount.</li> <li>• <b>Less Than</b> - Used to search for deals whose proposed revenue amount in the deal level financial summary is lesser than the specified revenue amount.</li> </ul> <b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link at the upper right corner of the <b>Search Deal</b> zone is clicked.	No
Minimum Revenue Amount	Used to search for deals by specifying the lower limit of the revenue amount in the deal level financial summary.  <b>Note:</b>  This field appears when the <b>Between</b> option is selected from the <b>Proposed Revenue Filters</b> list.  If you specify the <b>Maximum Revenue Amount</b> , you must specify the <b>Minimum Revenue Amount</b> .	No
Maximum Revenue Amount	Used to search for deals by specifying the upper limit of the revenue amount in the deal level financial summary.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field appears when the <b>Between</b> option is selected from the <b>Proposed Revenue Filters</b> list.</p> <p>If you specify the <b>Minimum Revenue Amount</b>, you must specify the <b>Maximum Revenue Amount</b>.</p>	
Revenue Amount	<p>Used to search for deals by specifying the proposed revenue amount in the deal level financial summary.</p> <p><b>Note:</b> This field appears when the <b>Greater Than</b> or the <b>Less Than</b> option is selected from the <b>Proposed Revenue Filters</b> list.</p>	No
Template Deal	<p>Used to search for deals which are used as a template for creating new deals in the system. The valid values are:</p> <ul style="list-style-type: none"> <li>• No</li> <li>• Yes</li> </ul> <p><b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link at the upper right corner of the <b>Search Deal</b> zone is clicked.</p>	No
Contracted Deal	<p>Used to search for contracted deals defined in the system. The valid values are:</p> <ul style="list-style-type: none"> <li>• No</li> <li>• Yes</li> </ul> <p><b>Note:</b></p> <p>A contracted deal is a deal whose price item pricing offered in the deal does not get affected if the price item pricing from the price list is changed in the system.</p> <p>This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link at the upper right corner of the <b>Search Deal</b> zone is clicked.</p>	No
Person ID	<p>Used to search deals which are created for a particular customer.</p> <p><b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Customer Name	Used to search deals which are created for customers having a particular name.	No
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	
Person Identifier Type	Used to search deals which are created for persons using a particular identifier type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the value for the person identifier type for searching deals created for the persons.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter person identifier type as a search criteria, you have to specify the person identifier.
Customer Segment	Used to search deals which are created for customers associated to a particular business component.	No
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	
Customer Tier	Used to search deals created for customers which belong to a particular tier of the customer segment.	No
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	
Relationship Manager	Used to search for deals which belong to a particular relationship manager in the system.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Relationship Manager</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Relationship Manager</b> window appears where you can search for a particular relationship manager.</p> <p>On specifying the relationship manager, the description of the relationship manager appears corresponding to the <b>Relationship Manager</b> field.</p> <p>This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.</p>	
Account ID	<p>Used to search deal which is created for a particular account.</p> <p><b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.</p>	No

Apply Back	<p>On clicking the <b>Apply Back</b> (  ) icon, a message appears confirming whether you want to fully orchestrate the deal.</p>

Column Name	Column Description
	<p><b>Note:</b></p> <p>The <b>Apply Back</b> icon appears when a deal or its deal versions are in the <b>Customer Accepted</b> status.</p> <p>The <b>Apply Back</b> (  ) icon does not appear if the deal is in the <b>Inactive</b> status.</p>
Print Deal	On clicking the <b>Print</b> (  ) icon, the <b>Deal Extraction</b> screen appears where you can filter the options as per your requirement and extract the deal information in the PDF or Excel format.
Review Deal	<p>On clicking the <b>Review Deal</b> (  ) icon, the <b>Deal Review</b> screen appears where you can add details about the deal at regular intervals for monitoring the deal.</p> <p><b>Note:</b> You can review a deal when it is in the <b>Pending for Review</b> status.</p>
Profitability Details	<p>On clicking the <b>Profitability Details</b> (  ) icon, the <b>Deal Profitability</b> screen appears where you can view the deal level, division level, and price item level profitability details about the deal.</p> <p><b>Note:</b></p> <p>You can view the profitability details of a deal when it is in the <b>Simulated</b> status.</p> <p>Also, the <b>Profitability Details</b> (  ) icon appears in the <b>Profitability Details</b> column corresponding to a deal in the <b>Search Results</b> section when a single version of the deal is created in the system. For multiple deal versions, the <b>Profitability Details</b> (  ) icon appears in the <b>Profitability Details</b> column corresponding to a deal version in the <b>Deal Versions</b> zone.</p>

**Note:**

By default, the **Search Results** section lists all the deals which are created by the user for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

The system, by default, lists the deals which are created by the logged in user or by a set of users who belong to the logged in user's access group depending on whether the **Deal Dashboard Default View** option type in the **C1-DEAL** feature configuration is set to **U** or **UG**. If the **Deal Dashboard Default View** option type is not defined in the **C1-DEAL** feature configuration, the system, by default, lists the deals which are created by the logged in user.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

On clicking the **Broadcast** (  ) icon corresponding to a deal, the **Deal Versions** zone appears where you can view a list of deal versions created for the respective deal.

Also, you can select two deal versions for comparison by clicking the check box corresponding to the deals in the **Search Results** section or the **Deal Versions** zone.

**Note:** You cannot compare deal versions which are in the **Pending Simulation** status.

On clicking the **Add to Compare** link after selecting two deal versions, the **Deal Comparison** zone appears where you can compare the deal versions.

**Note:** At a time, you can select only two deal versions for comparison.

**Deal Versions**

The **Deal Versions** zone allows you to view a list of deal versions created for a particular deal. It contains the following columns:

Column Name	Column Description
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal version.
Status	Indicates the current status of the deal version.
Creation Date	Displays the date when the deal version is created in the system.
Created By	Displays the user who has created the deal version in the system.
Proposed Revenue	Displays the revenue generated from the deal version.

Column Name	Column Description
Print Deal	On clicking the <b>Print</b> (🖨) icon, the <b>Deal Extraction</b> screen appears where you can select the options as per your requirement and extract the deal version information in the PDF or Excel format for printing.
Profitability Details	On clicking the <b>Profitability Details</b> icon, the <b>Deal Profitability</b> screen appears where you can view the deal level, division level, and price item level profitability details about the deal version.
	<b>Note:</b> You can view the profitability details of a deal version when it is in the <b>Simulated</b> status.

By default, the **Deal Versions** zone does not appear in the **Deal Dashboard** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a deal in the **Search Results** section of the **Search Deals** zone.

Also, you can select two deal versions for comparison by clicking the check box corresponding to the deal versions in the **Deal Versions** zone.

**Deal Comparison**

The **Deal Comparison** zone lists the deal versions which you have selected for comparison. It contains the following columns:

Column Name	Column Description
Deal Information	Displays the concatenated string of information about the deal for which the deal version is created in the system separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal version.
Customer Information	Displays the concatenated string of information about the main person for whom the deal is created in the system.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Customer 360° Information</b> or the <b>Prospect Person</b> screen appears where you can view the details of the respective person.  The <b>Customer 360° Information</b> screen appears when you select the deal version of a deal having the entity type as <b>Account</b> or <b>Customer</b> . Whereas, the <b>Prospect Person</b> screen appears when you select the deal version of a deal having the entity type as <b>Account</b> .
Deal version	Displays the concatenated string of information about the deal version.
Deal Status	Indicates the current status of the deal for which the deal version is created.
Deal Revenue	Displays the revenue generated from the deal version.
Deal Creator ID	Displays the user who has created the deal in the system.

By default, the **Deal Comparison** zone does not appear in the **Deal Dashboard** screen. It appears when you select a deal or a deal version from the **Search Results** section or the **Deal Versions** zone respectively and click the **Add to Compare** link.

You can delete a deal version from the comparison list by clicking the **Delete** (🗑) icon corresponding to the respective deal version.

On clicking the **Compare** link, the **Deal Compare** screen appears with the comparison results.

**Note:**  
At a time, you can select only two deal versions for comparison.  
You cannot compare a deal version which is in the **Draft**, **Pending Simulation** or **Discarded** status.  
You cannot compare a deal version of a deal which is in the **Draft**, **Pending Simulation** or **Discarded** status.  
You cannot compare two deal versions having different currency codes.

## Searching for a Deal

**Prerequisites**

To search for a deal, you should have:

- Divisions defined in the application
- Deals or deal versions defined in the application
- Deals or deal versions associated with the division to which the user belongs
- Deal types defined in the application

- Deal entities defined in the application
- Customer segments and customer tiers defined in the application
- Person identifier types and person identifiers defined in the application
- Account identifier types and account identifiers defined in the application

**Procedure**

To search for a deal:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
3. Enter the search criteria in the **Search Deal** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of deals that meet the search criteria appears in the **Search Results** section.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Search Results** section lists all the deals which are created by the user for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

You must specify at least one search criterion while searching for a deal. One more search criterion is required when you are searching for a deal using the deal entity or customer tier.

You must specify one more search criterion when you are searching for a deal using the division with the **Deal Details** option selected from the **Search By** list.

## Viewing the Versions of a Deal

**Procedure**

To view the versions of a deal:

1. Search for the deal whose versions you want to view in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the deal whose deal versions you want to view.  
The **Deal Versions** zone appears.
3. View the versions of the deal in the **Deal Versions** zone.

## Viewing the Approval Workflow Details of a Deal

### Procedure

To view the approval workflow details of a deal:

1. Search for the deal whose approval workflow details you want to view in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the **View Approval Workflow** (🔍) icon in the **View Approval Workflow** column corresponding to the deal whose approval workflow details you want to view.  
The **Deal Approval Workflow** screen appears.
3. View the approval workflow details of the deal in the **Deal Approval Workflow** screen.

**Note:** You cannot view the approval workflow status of a deal which is in the **Draft**, **Pending Simulation**, **Simulation Deferred**, **Simulated**, **Hierarchy Creation Deferred**, or **Discarded** status.

## Finalizing a Deal

### Procedure

To finalize a deal:

1. Do either of the following:

If you want to...	Then...
<b>Finalize a deal from the Deal Dashboard screen</b>	<ol style="list-style-type: none"><li>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li><li>b. In the <b>Search Results</b> section, click the <b>Finalize</b> (✅) icon in the <b>Finalize Deal</b> column corresponding to the deal which you want to finalize.</li></ol>
<b>Finalize a deal from the Deal Information screen</b>	<ol style="list-style-type: none"><li>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li></ol>

If you want to...	Then...
	<p><b>b.</b> In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to finalize.</p> <p>The <b>Deal Information</b> screen appears.</p> <p><b>c.</b> In the <b>Deal Information</b> zone, click the <b>Finalize Deal</b> button.</p>

A message appears confirming whether you want to finalize the deal.

2. Click **OK**.  
The deal is finalized.

**Note:**

You can finalize a deal when it is in the **Approved** status.

After finalizing a deal, the status of the deal changes to **Finalized**.

# Accepting a Deal

**Procedure**

To accept a deal:

1. Do either of the following:

If you want to...	Then...
Accept a deal from the Deal Dashboard screen	<p><b>a.</b> Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p><b>b.</b> In the <b>Search Results</b> section, click the <b>Accept</b> (  ) icon in the <b>Accept Deal</b> column corresponding to the deal which you want to accept.</p>
Accept a deal from the Deal Information screen	<p><b>a.</b> Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p><b>b.</b> In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to accept.</p> <p>The <b>Deal Information</b> screen appears.</p> <p><b>c.</b> In the <b>Deal Information</b> zone, click the <b>Accept Deal</b> button.</p>

The **Deal Acceptance** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status	Displays the status of the deal. The valid value is: <ul style="list-style-type: none"><li>Customer Accepted</li></ul>	Not applicable
Effective Start Date	Used to specify the date from when the deal is effective for the customer.	Yes
	<b>Note:</b> Earlier, the <b>Effective Start Date</b> was defaulted to the <b>Deal Start Date</b> . Now, while accepting a deal, the system defaults either of the following date: <ul style="list-style-type: none"><li>Deal start date when the deal start date is equal to or later than the system date</li><li>System date when the deal start date is earlier than the system date</li></ul> You can then edit the <b>Effective Start Date</b> , if required.	
Effective End Date	Used to specify the date till when the deal is effective for the customer.	No
Comments	Used to specify information about accepting the deal.	No

- 2. Enter the required details in the **Deal Acceptance** screen.
- 3. Click **Save**.  
The deal is accepted.

**Note:**  
You can accept a deal only when it is in the **Finalized** status.  
After accepting a deal, the status of the deal changes to **Customer Accepted**.

## Rejecting a Deal

### Prerequisites

To reject a deal you should have:

- Reasons defined in the **Approval Workflow Reason** screen where the **Reason Category** is set to **Deal Reject**

### Procedure

To reject a deal:

- Do either of the following:

If you want to...	Then...
Reject a deal from the Deal Dashboard screen	<ol style="list-style-type: none"><li>Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li><li>In the <b>Search Results</b> section, click the <b>Reject</b> (✖) icon in the <b>Reject Deal</b> column corresponding to the deal which you want to reject.</li></ol>
Reject a deal from the Deal Information screen	<ol style="list-style-type: none"><li>Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</li><li>In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to reject.  The <b>Deal Information</b> screen appears.</li><li>In the <b>Deal Information</b> zone, click the <b>Reject Deal</b> button.</li></ol>

The **Deal Rejection** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status	Displays the status of the deal. The valid value is: <ul style="list-style-type: none"><li>Rejected</li></ul>	Not applicable
Reason	Lists the reasons why you want to reject the deal.	Yes
	<b>Note:</b> This list includes only those values which are defined in the <b>Approval Workflow Reason</b> screen where the <b>Reason Category</b> is set to <b>Deal Reject</b> .	
Comments	Used to specify information about rejecting the deal.	Yes

- Enter the required details in the **Deal Rejection** screen
- Click **Save**.  
A message appears confirming whether you want to reject the deal.
- Click **OK**.  
The deal is rejected.

**Note:**

You can reject a deal only when it is in the **Finalized** status.  
After rejecting a deal, the status of the deal changes to **Rejected**.

## Orchestrating a Deal

**Procedure**

To orchestrate a deal:

1. Do either of the following:

If you want to...	Then...
<b>Orchestrate a deal from the Deal Dashboard screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Apply Back</b> (↺) icon in the <b>Apply Back</b> column corresponding to the deal which you want to orchestrate.</p>
<b>Orchestrate a deal from the Deal Information screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to orchestrate.</p> <p>The <b>Deal Information</b> screen appears.</p> <p>c. In the <b>Simulation Details</b> zone, click the <b>Apply Back</b> button.</p>

A message appears confirming whether you want to apply back the deal.

2. Click **OK**.  
The deal is orchestrated.

**Note:**

You can orchestrate a deal when it is in the **Customer Accepted** status.  
After orchestrating a deal, the status of the deal changes to **Fully Orchestrated**.

## Extracting a Deal in the PDF or Excel Format

### Procedure

To extract a deal in the pdf or excel format:

1. Do either of the following:

If you want to...	Then...
<b>Extract a deal in the PDF or Excel format from the Deal Dashboard screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>
	<p><b>Note:</b> If the deal has multiple versions, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal version in the <b>Deal Versions</b> zone.</p>
<b>Extract a deal in the PDF or Excel format from the Deal Information screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>
	<div><p><b>Note:</b> If you want to extract the deal version in the pdf of excel format, click the link in the <b>Deal Version Information</b> column corresponding to the deal version from the <b>Deal Versions</b> zone.</p></div> <p>The <b>Deal Information</b> screen appears.</p> <p>c. In the <b>Deal Information</b> zone, click the <b>Print Deal</b> button.</p>
<b>Extract a deal in the PDF or Excel format from the Deal Approver Dashboard screen</b>	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Approver Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>

The **Deal Extraction** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	Used to specify the format in which you want to extract the deal information. The valid values are: <ul style="list-style-type: none"> <li>Excel</li> <li>PDF</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while extracting a deal in the pdf or excel format.
Extract Type	Used to indicate the type of deal information that you want to extract for publishing. The valid values are: <ul style="list-style-type: none"> <li><b>External</b> - Used to extract deal information which is published to the customer for approval. It contains the following details:               <ol style="list-style-type: none"> <li>Extraction information i.e. the extraction date-time and the user who has done the extraction.</li> <li>Details of the filters selected for extraction.</li> <li>Deal details such as the deal creator user ID, deal creation date and time, deal ID, deal type, prospect/customer, currency, deal status etc.</li> <li>Customer hierarchy, accounts and price item details as per the filter option selected in the <b>Deal Extraction</b> screen.</li> <li>Price item details such as the original price with assignment level, commitments, negotiated price with assignment level, approval status, etc.</li> <li>Terms and conditions.</li> </ol> </li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while extracting a deal in the pdf or excel format.
	<ul style="list-style-type: none"> <li><b>Internal</b> - Used to extract deal information which is published for internal reviews and validations. It contains the following details:               <ol style="list-style-type: none"> <li>Deal summary details and Division summary details with the applicable cost, profitability, revenue and other calculations.</li> <li>Price item details such as the cost and revenue details etc.</li> <li>Adhoc revenue and cost entries.</li> </ol> </li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)
	<div><b>Note:</b> By default, the <b>Internal</b> option is selected from the <b>Extract Type</b> list for deals which are not in the <b>Finalized, Customer Accepted, Rejected, Fully Orchestrated, Pending for Review, or Closed</b> status.  The list includes only those values which are present in the <b>DEAL_EXTRACT_TYPE_FLG</b> lookup field.</div>	
Extract Filter	Used to indicate the price item information that you want to extract in the pdf or excel format. The valid values are: <ul style="list-style-type: none"><li>• Account</li><li>• Additional Filter Criteria</li><li>• All</li><li>• Customer</li><li>• Division</li><li>• Only Hierarchy</li><li>• Price Assignment Level</li><li>• Price Item</li><li>• Price Item Group</li></ul>	Yes (Conditional)
	<div><b>Note:</b> The list includes only those values which are present in the <b>DEAL_EXTRACT_FILTER_FLG</b> lookup field.</div>	<div><b>Note:</b> This field is required while extracting a deal in the pdf or excel format.</div>

In addition, the **Deal Extraction** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the persons or prospects account for which you want to extract the price item pricing details.	Yes (Conditional)
	<div><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Prospect Account Search</b> window appears where you can search for the respective account.  This field appears when you select the <b>Account</b> option from the <b>Extract Filter</b> list.</div>	<div><b>Note:</b> This field is required while extracting the proposed price item pricing details of an account.</div>
Price Item	Used to specify the price item for which you want to extract the pricing details.	No

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears where you can search for the respective price item.</p> <p>This field appears when you select the <b>Account</b>, <b>Customer</b>, and <b>Price Item</b> options from the <b>Extract Filter</b> list.</p>	
Price Item Group Code	<p>Used to specify the root level hierarchy entity for which you want to extract the price item pricing details.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Hierarchy Entity Search</b> window appears where you can search for the respective root level hierarchy entity.</p> <p>This field appears when you select the <b>Account</b>, <b>Customer</b>, and <b>Price Item Group</b> options from the <b>Extract Filter</b> list.</p>	No
Proposed Price Assignment Level	<p>Used to extract the proposed price item pricing details for a particular assignment level.</p> <p><b>Note:</b></p> <p>The list includes only those values which are present in the <b>PA_LVL_FLG</b> lookup field.</p> <p>This field appears when you select the <b>Account</b>, <b>Customer</b>, <b>Price Assignment Level</b>, <b>Price Item</b>, and <b>Price Item Group</b> options from the <b>Extract Filter</b> list.</p> <p>This field is disabled when you select the <b>Show Price Assignment for Child Entities</b> field check box.</p>	No
Show Price Assignment for Child Entities	<p>Used to indicate whether you want to extract the proposed price item price assignment details of the non-root level hierarchy entity.</p> <p><b>Note:</b> This field appears when you select the <b>Account</b>, <b>Customer</b>, <b>Price Assignment Level</b>, <b>Price Item</b>, and <b>Price Item Group</b> options from the <b>Extract Filter</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Current Approval User ID	Used to extract the details of the proposed price item pricing which is approved by a particular user.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the respective root user.  This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.  This field is disabled when you specify the <b>Price Item Manager To Do Role</b> or <b>Price Approval Status</b> .	<b>Note:</b> This field is required while extracting the proposed price item pricing details approved by a particular user.
Price Item Manager To Do Role	Used to extract the details of the proposed price item pricing which is assigned using a particular price item manager To Do role.	Yes (Conditional)
	<b>Note:</b> This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.  This field is disabled when you specify the <b>Current Approval User ID</b> or <b>Price Approval Status</b> .	<b>Note:</b> This field is required while extracting the proposed price item pricing details assigned to a particular price item manager To Do role.
Price Approval Status	Used to extract the details of the proposed price item pricing which are in a particular status. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• Approved</li> <li>• Approved-Existing</li> <li>• Approved-Recommended</li> <li>• Error</li> <li>• Initial</li> <li>• Unapproved</li> </ul>	<b>Note:</b> This field is required while extracting the details of the proposed price item pricing in a particular status.
	<b>Note:</b> This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.  This field is disabled when you specify the <b>Current Approval User ID</b> or <b>Price Item Manager To Do Role</b> .	
Person ID	Used to extract the details of the proposed price items pricing of a particular person.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Prospect Person Search</b> window appears where you can search for the respective person.  This field appears when you select the <b>Additional Filter Criteria</b> option from the <b>Extract Filter</b> list.	<b>Note:</b> This field is required while extracting the details of the proposed price item pricing of a particular person.
Division	Used to extract the details of the proposed price items pricing from a particular division.	Yes (Conditional)
	<b>Note:</b> This field appears when you select the <b>Customer</b> option from the <b>Extract Filter</b> list.	<b>Note:</b> This field is required while extracting the details of the proposed price item pricing from a particular division.

- 2. Enter the required details in the **Deal Extraction** screen.
- 3. Click **Extract**.  
The deal is extracted in the pdf or excel format.

**Note:** You cannot extract a deal which is in the **Discarded** status.

# Viewing the Deal Metrics in the Tiles Format

**Procedure**

To view the deal metrics in the Tiles format:

- 1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
- 2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
- 3. Enter the search criteria in the **Deal Metrics** zone.

**Note:** By default, the deal metrics appears for the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

- 4. Click **Apply**.
- 5. Ensure that the toggle switch is towards the **Tiles** option.
- 6. View the following information in the **Deal Metrics** zone:
  - Number of deals which are created by the logged in user or by a set of users which belong to the logged in user's access group within the specified period
  - Number of deals which are pending for approval
  - Number of deals which are yet to be finalized
  - Number of deals which are yet to be accepted by the customer
  - Number of deals which are accepted by the customer
  - Number of deals which are rejected

## Defining a Deal

### Prerequisites

To define a deal, you should have:

- Entities (i.e. customers, accounts, and prospects) defined in the application
- Deal identifiers defined in the application
- Deal types defined in the application
- Currencies defined in the application
- Values defined for **Review Frequency**, **Deal Frequency**, and **Usage Period** in the **REVIEW\_FREQUENCY\_FLG**, **FREQUENCY\_FLG**, and **USAGE\_PRIOD\_FLG** lookup fields respectively
- Products defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Deal**)

### Procedure

To define a deal:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
3. In the **Deal Dashboard** screen, click the **Create Deal** button.

The **Deal Information - Deal** page appears. It contains the following zones:

- [Search Entity](#) on page 2871
- [Deal](#) on page 2877

**Note:** By default, the **Deal** zone does not appear in the **Deal Information - Deal** page. It appears when you click the **Broadcast** (📡) icon corresponding to an entity (i.e. customer, account, or prospect) in the **Search Results** section of the **Search Entity** zone.

4. Search for the entity (i.e. customer, account, or prospect person) in the **Search Entity** zone for which you want to define a deal.
5. Click the **Broadcast** (📡) icon corresponding to the entity (i.e. customer, account, or prospect) in the **Search Results** section for which you want to define a deal.

The **Deal** zone appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal.
- **Product** - Used to associate reference products which you want the accounts of the deal entity to be enrolled.
- **Characteristics** - Used to define the characteristics for the deal.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Entity Information	Displays information about the entity (i.e. the customer, account, or prospect person) for which you want to define a deal.	Not applicable
Deal ID	Displays the deal ID.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The deal ID is generated automatically when you click the <b>Save</b> button in the <b>Deal</b> zone.	
Contracted Deal	Used to indicate that the change in the price item pricing from the price list does not affect the price item pricing offered in the deal created for an existing customer, account, or prospect.	No
Copy Template	Used to indicate the deal template which you want to use for creating the deal.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Copy Template</b> field. On clicking the <b>Search</b> icon, the <b>Copy From</b> window appears where you can select the respective details from the template.	No
Deal Entity	Indicates the entity (i.e. the customer, account, or prospect person) for which you want to create a deal. The valid values are: <ul style="list-style-type: none"><li>• Account</li><li>• Customer</li><li>• Prospect</li></ul> <b>Note:</b> This field cannot be edited. The list includes only those values which are present in the <b>DEAL_ENTITY_TYPE_FLG</b> lookup field.	Not applicable
Status	Indicates the current status of the deal.  <b>Note:</b> This field cannot be edited. The value of this field is automatically populated when you enter all the details for creating a deal and press the <b>Save</b> button. The list includes only those values which are present in the <b>DEAL_STATUS</b> lookup field.	Not applicable
Customer Segment	Indicates the business component to which the entity (i.e. the customer, account, or prospect person) belongs.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p> <p>The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field.</p>	
Customer Tier	<p>Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.</p> <p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p> <p>The list includes only those values which are present in the <b>CUST_TIER_FLG</b> lookup field.</p>	Not applicable
Access Group	<p>Indicates the user group who can view and edit the details of the entity (i.e. the customer, account, or prospect person).</p> <p><b>Note:</b> The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>	Not applicable
Division	<p>Indicates the division with which the entity (i.e. the customer, account, or prospect person) is associated.</p> <p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>	Not applicable
Deal Identifier	<p>Used to specify the primary identifier using which you want to create a deal for the entity in the system.</p> <p><b>Note:</b></p> <p>You should ensure that every deal has a unique deal identifier.</p> <p>An error message appears when you save a deal with a deal identifier which is already used for creating a deal.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Deal Type	Used to indicate the deal type using which you want to create a deal in the system.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Type</b> field. On clicking the <b>Search</b> icon, the <b>Deal Type Search</b> window appears.  On specifying the deal type, the description of the deal type appears corresponding to the <b>Deal Type</b> field.  The <b>Deal Type Search</b> window lists only those deal types having the <b>Division</b> , <b>Customer Segment</b> , and <b>Customer Tier</b> combination which best fits with the <b>Division</b> , <b>Customer Segment</b> , and <b>Customer Tier</b> combination as specified in the <b>Person</b> screen of the entity (i.e. the customer, account, or prospect person).	
Deal Currency	Used to specify the currency in which you want to calculate the deal level, division level, and the product level financial summary and profitability of the deal.	Yes
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	
Simulation Type	Used to indicate the level at which you want to analyze the cost, revenue, and profitability of the deal. The valid values are: <ul style="list-style-type: none"> <li>• <b>Account</b> - Used to indicate that you want to analyze the cost, revenue, and profitability at the account level.</li> <li>• <b>Customer</b> - Used to indicate that you want to analyze the cost, revenue, and profitability at the customer level.</li> <li>• <b>Deal</b> - Used to indicate that you want to analyze the cost, revenue, and profitability at the deal level.</li> </ul>	Yes
Accounts to Include in Simulation	Used to indicate the accounts that you want to consider for analyzing the cost, revenue, and profitability of the deal. The valid values are: <ul style="list-style-type: none"> <li>• <b>Accounts of this Customer</b> - Used to indicate that you want to consider only the accounts (including the existing and prospect accounts) of the customer in the deal.</li> <li>• <b>All Accounts in the Hierarchy</b> - Used to indicate that you want to consider all the accounts of the customer, its child persons, and the child persons' accounts in the deal.</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li><b>Only Prospect Accounts of this Customer</b> - Used to indicate that you want to consider only the prospect accounts of the customer in the deal.</li> </ul>	
	<b>Note:</b> This option appears only when the <b>Deal Entity</b> is set to <b>Customer</b> and the <b>Simulation Type</b> is set to <b>Customer</b> .  If you do not specify a value in the <b>Accounts to Include in Simulation</b> field, the system, by default, sets its value to <b>All Accounts in the Hierarchy</b> .	
Start Date	Used to specify the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).  <b>Note:</b> This date is also used as the <b>Effective Start Date</b> for the proposed price list assignment, price assignment and <b>Start Date</b> for proposed product enrollment.	Yes
Price Selection Date	Used to specify the date from when the price lists, pricing assignments, and product enrollments are effective for simulation.	Yes
End Date	Used to specify the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).	No
Review Frequency	Used to indicate the timely monitoring of the deal usage as per the commitments made by the customer.  <b>Note:</b> The list includes only those values which are present in the <b>REVIEW_FREQUENCY_FLG</b> lookup field.	No
Deal Frequency	Used to indicate the duration for which you want to simulate the deal for calculating the financial summary and profitability of the deal.  <b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.	Yes
Usage Period	Used to indicate the period for which you want to aggregate the deal data to determine the scope of the deal.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those values which are present in the <b>USAGE_PERIOD_FLG</b> lookup field.	
Deal Description	Used to specify the description for the deal.	Yes
Deal Version Description	Used to specify the description for the deal version.	Yes (conditional)
		<b>Note:</b> This field is required while creating a deal version.
Skip Reference	Used to indicate whether you want to use a deal which is already created in the system as a reference for copying the pricing and commitments while creating a deal for the existing customer, account, or prospect person..	No
	<b>Note:</b>  If you select the check box corresponding to the <b>Skip Reference</b> field and click <b>Save</b> , the system will direct you to the <b>Deal Information - Pricing/Commitments</b> page in the <b>Pending Simulation</b> status to define the price list assignments, price assignments, and product enrollments for the deal.  If you do not select the check box corresponding to the <b>Skip Reference</b> field and click <b>Save</b> , the system will direct you to the <b>Deal Information - Reference</b> page in the <b>Draft</b> status to select reference whose price item pricing, price list assignments, and product enrollments you want to use for the deal	
Skip Questionnaire	Used to indicate whether you want to derive reference customers and deals during a deal creation using a questionnaire.	No
	<b>Note:</b> If a questionnaire template is not specified in the respective deal type or if the questionnaire template is not effective on the deal start date or if the <b>Skip Questionnaire</b> option is selected during the deal creation, the system derives the reference customers for the deal using the division, customer segment, and customer tier combination.	

In addition, the **Deal** zone contains the following buttons:

Button Name	Button Description
Save as Template	Used to save the deal as a template for defining other deals in the system.

Button Name	Button Description
	By default, the <b>Save as Template</b> button does not appear in the <b>Deal</b> zone. It appears only when the <b>Change</b> access mode is provided for the <b>C1-DEALTEMPLATE</b> application service to a user group. Users who belong to such user group can only view the <b>Save as Template</b> button in the <b>Deal</b> zone while creating a deal. If the user belongs to the user group which does not have the <b>Change</b> access mode provided for the <b>C1-DEALTEMPLATE</b> application service, the <b>Save as Template</b> button is disabled while creating a deal.
	<b>Note:</b> On clicking the <b>Save as Template</b> button, the system, by default, sets the <b>Template Deal</b> field to <b>Y</b> while saving the deal information.
Save	Used to save the deal in the system.
	<b>Note:</b> On clicking the <b>Save</b> button, the system sets the <b>Template Deal</b> field to <b>N</b> while saving the deal information.
Next	Used to navigate to the next page.

- 6. Enter the required details in the **Main** section.
- 7. Recommend products to which the accounts in the customer hierarchy can be enrolled, if required.
- 8. Define characteristics for the deal, if required.
- 9. Click the **Save** button.  
The deal is defined.

How to define a characteristic for a deal	<a href="#">Defining a Characteristic for a Deal</a> on page 2915

**Creating a Deal using a Deal Template**

**Prerequisites**

To create a deal using a deal template, you should have:

- Deal templates defined in the application
- Deal identifiers defined in the application
- Deal types defined in the application
- Currencies defined in the application
- Values defined for **Review Frequency**, **Deal Frequency**, and **Usage Period** in the **REVIEW\_FREQUENCY\_FLG**, **FREQUENCY\_FLG**, and **USAGE\_PRIOD\_FLG** lookup fields respectively
- Terms and conditions defined in the application
- Products defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Deal**)

**Procedure**

To create a deal from a deal template:

- 1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
- 2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
- 3. In the **Deal Dashboard** screen, click the **Create Deal** button.

The **Deal Information - Deal** page appears. It contains the following zones:

- [Search Entity](#) on page 2871
- [Deal](#) on page 2877

**Note:** By default, the **Deal** zone does not appear in the **Deal Information - Deal** page. It appears when you click the **Broadcast** (📡) icon corresponding to an entity (i.e. customer, account, or prospect) in the **Search Results** section of the **Search Entity** zone.

- 4. Search for the entity (i.e. customer, account, or prospect person) in the **Search Entity** zone for which you want to define a deal.
- 5. Click the **Broadcast** (📡) icon corresponding to the entity (i.e. customer, account, or prospect) in the **Search Results** section for which you want to define a deal.

The **Deal** zone appears. It contains the following sections:

- **Main** - Used to specify basic details about the deal.
- **Terms and Conditions** - Used to associate terms and conditions with the deal.
- **Product** - Used to associate reference products which you want the accounts of the deal entity to be enrolled.
- **Characteristics** - Used to define the characteristics for the deal.

**Note:** For more information about the fields available in the **Main** section, refer the [Defining a Deal](#) on page 2846 topic.

- 6. Click the **Search** (🔍) icon corresponding to the **Copy Template** field.

The **Copy From** window appears which contains a list of deal templates that you can use for creating the deal. The **Copy From** window contains the following columns:

Column Name	Column Description
Basic Details	Used to indicate that you want to copy only the basic details of the deal template for creating the deal.
Pricing	Used to indicate that you want to copy only the price item pricing details of the deal template for creating the deal.
Usage	Used to indicate that you want to copy only the SQI details of the price items from the deal template for creating the deal.
Deal Information	Displays the concatenated string of information about the deal template separated by a comma (,).

- 7. Select the required option and/or options from the **Copy From** window.
- 8. Click **OK**.  
The deal template data corresponding to the selected option and/or options from the **Copy From** window is copied to the new deal.
- 9. Modify the details in the **Main** section, if required.
- 10. Recommend products to which the accounts in the customer hierarchy can be enrolled, if required.
- 11. Define characteristics for the deal, if required.
- 12. Click the **Save** button.

The deal is created using the deal template.

**Note:**

Earlier, while creating a deal using a deal template, the system copied only the basic, pricing, and/or usage details from the deal template. Now, when you create a deal using a deal template, the system copies the following information along with the basic, pricing, and/or usage details from the deal template:

- Price item and hierarchy entity selection
- General terms and conditions selection at the deal, price item, and hierarchy entity levels
- Overridden general terms and conditions at the deal, price item, and hierarchy entity levels
- Adhoc terms and conditions at the deal, price item, and hierarchy entity levels

For more information, refer to the [Deal Creation Using a Deal Template](#) on page 2719 topic.

# Deal Compare

The **Deal Compare** screen enables you to compare two deals or two deal versions. It also enables you to extract the summary and detailed report in the excel format. It contains the following sections:

- **Main** - Used to specify basic information based on which you want to generate the comparison report for the selected deals or deal versions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Highlight Differences	Used to indicate whether you want to highlight the differences in the comparison report of two deals or deal versions.	No
	<b>Note:</b> By default the <b>Highlight Differences</b> check box is selected.	
Deal Compare Type	Used to indicate the comparison type using which you want to generate the comparison report of two deals or deal versions. The valid values are: <ul style="list-style-type: none"><li>• <b>Detailed</b> - Used to display the following:<ol style="list-style-type: none"><li>1. Overall cost, proposed revenue, and profitability of two deals or deal versions</li><li>2. Proposed revenue for each division</li><li>3. Proposed revenue for each price item, root level hierarchy entity, non-root level hierarchy entity, and product.</li><li>4. Average price for each price item.</li></ol></li></ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li><b>Summary</b> - Used to display the following:<ol style="list-style-type: none"><li>Overall cost, proposed revenue, and profitability of two deals or deal versions</li><li>Proposed revenue for each division</li></ol></li></ul>	
	<b>Note:</b> By default, the <b>Summary</b> option is selected from the <b>Deal Compare Type</b> field.	
Show Only Differences	Used to indicate whether you want to view only the difference for the revenue and average price of each price item in the customer hierarchy of the selected deals or deal versions while comparison.	No
	<b>Note:</b> This field is enabled when the <b>Highlight Differences</b> option check box is selected.	
Deal Compare Based On	Used to compare the revenue and average price of each price item in the customer hierarchy of the selected deals or deal versions. The valid values are: <ul style="list-style-type: none"><li>Average Price</li><li>Revenue</li></ul>	No
	<b>Note:</b> By default, the <b>Deal Compare Based On</b> field is disabled with the <b>Revenue</b> option selected.  The <b>Deal Compare Based On</b> field is enabled when you select the <b>Detailed</b> option from the <b>Deal Compare Type</b> list.	

- Summary Report** - Used to display the following information:
  - Overall cost, proposed revenue, and profitability of two deals or deal versions.
  - Proposed revenue for each division.

The following table lists the data that appears in the **Summary Report** section:

Row name	Row Description
Deal Information	Displays the concatenated string of information about the deal which you want to compare separated by a comma (,).
Model ID	Displays the deal version ID for which you want to generate the comparison report.
Deal Identifier	Indicates the identifier using which the deal is created in the system.
Review Frequency	Indicates the period for which the deal usage is monitored as per the commitments made by the customer.
<b>Summary Level</b>	
Overall Proposed Revenue	Displays the total revenue generated through the proposed price item pricing and commitments.
Overall Profitability %	Displays the total profit in percentage that is generated from the proposed price item pricing and commitments.

Row name	Row Description
Overall Cost	Displays the total cost of the price items based on the proposed usage.
Deal Status	Indicates the current status of the deal.
Start Date	Displays the date from when the deal is effective.
End Date	Displays the date till when the deal is effective.
Currency Code	Indicates the currency using which the deal is defined in the system.
<b>Division Level Summary (Revenue)</b>	
Displays the proposed revenue for each division.	

- **Detailed Report** - Used to display the following information:
  1. Overall cost, proposed revenue, and profitability of two deals or deal versions.
  2. Proposed revenue for each division.
  3. Proposed revenue for each price item, root level hierarchy entity, non-root level hierarchy entity, and product if the deal comparison is based on revenue.
  4. Average price for each price item if the deal comparison is based on average price.

The **Detailed Report** screen contains the following fields based on which you can view the detailed comparison of the revenue and average price of the price items in the customer hierarchy and the division of the selected deals or deal versions:

Field Name	Field Description	Mandatory (Yes or No)
Filter Type	Used to indicate the assignment level for which you want to compare the revenue or the average price of the price items in the customer hierarchy and the division. The valid values are: <ul style="list-style-type: none"><li>• Non-Root Level Hierarchy Entity</li><li>• Price Item</li><li>• Root Level Hierarchy Entity</li><li>• Product</li></ul>	No
Division	Used to indicate the division for which you want to compare the revenue or the average price of the product for which the accounts are enrolled.	No
	<b>Note:</b> This field appears when you select the <b>Product</b> option from the <b>Filter Type</b> list.	
Product	Used to specify the product whose revenue or the average price you want to compare.	No
	<b>Note:</b> This field appears when you select the <b>Product</b> option from the <b>Filter Type</b> list.	
Price Item	Used to specify the price item whose revenue or the average price you want to compare.	No

## Comparing Cost, Revenue, and Profitability of Two Deal Versions

Procedure

To compare cost, revenue, and profitability of two deal versions:

- 1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
- 2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the deal whose deal version you want to compare.  
The **Deal Versions** zone appears.
- 3. Select the check box corresponding to the deal version that you want to compare.

**Note:** Select the check box corresponding to the deal in the **Search Results** section of the **Search Deal** zone if only one deal version is created for the deal.

- 4. Click the **Add to Compare** link available in the **Deal Versions** zone.  
The **Deal Comparison** zone appears enlisting the selected deal version.

**Note:** Click the **Add to Compare** link available in the **Search Deal** zone if you are selecting a deal from the **Search Results** section of the **Search Deal** zone for comparison.

- 5. Repeat steps 1 to 4 for selecting the other deal version which you want to use for comparison.
- 6. Click the **Compare** link available in the **Deal Comparison** zone.  
The **Deal Compare** screen appears.
- 7. View the cost, revenue, and profitability comparison of two deals or deal versions in the **Summary Report** section.

**Note:** You can compare two deals or deal versions when they are in the **Simulated** status and are defined using the same currency.

# Deal Profitability Report

Oracle Revenue Management and Billing enables you to view the profitability report of a deal which is in the **Simulated** status. If a deal has one deal version, you can click the icon in the **Profitability Details** column corresponding to the deal in the **Deal Dashboard** screen. However, if a deal has two or more deal versions, you can click the icon in the **Profitability Details** column corresponding to the deal version in the **Deal Dashboard** screen. This is because the profitability details are shown for a particular deal version and not for all versions of a deal.

A new screen named **Deal Profitability** is introduced in this release. It appears when you click the icon in the **Profitability Details** column. This screen enables you to view the following:

- **Deal Level Profitability Report** - Displays the profitability details (such as, proposed revenue, proposed cost, profit, original revenue, and revenue deviation) of each person in the customer hierarchy.
- **Division Level Profitability Report** - Displays the profitability details (such as, proposed revenue, proposed cost, profit, original revenue, and revenue deviation) of each division. If required, you can filter the profitability details of a particular division.
- **Price Item Level Profitability Report** - Displays the profitability details (such as, proposed commitment, proposed revenue, proposed cost, profit, original revenue, original commitment, and revenue deviation) of each price item. Here, you can also view the profitability details at the hierarchy entity level.
- **All** - Displays all the profitability details in the respective zones at once.

## Deal Profitability

The **Deal Profitability** screen allows you to view the deal level, division level, and price item level profitability report of a simulated deal. It contains the following zones:

- [Search Profitability Report](#) on page 2859
- [Division Level Profitability](#) on page 2864
- [Price Item Level Profitability](#) on page 2865

## Search Profitability Report

The **Search Profitability Report** zone allows you to search for the deal level, division level, or price item level the profitability report of the deal version. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to view deal level, division level, or price item level profitability report of the deal version. The valid values are: <ul style="list-style-type: none"><li>• <b>All</b> - Used to indicate whether you want to view all the profitability report of the deal version at once.</li></ul>	Yes
	<b>Note:</b> On selecting this option from the <b>Search By</b> list, the <b>Division Level Profitability</b> and <b>Price Item Level Profitability</b> zones appear with the respective information in the <b>Deal Profitability</b> screen. Whereas, the <b>Deal Level Profitability</b> report appears in the <b>Search Results</b> section.	
	<ul style="list-style-type: none"><li>• <b>Deal Level Profitability Report</b> - Used to indicate whether you want view the deal level profitability report.</li><li>• <b>Division Level Profitability Report</b> - Used to indicate whether you want view the division level profitability report.</li><li>• <b>Price Item Level Profitability Report</b> - Used to indicate whether you want view the profitability report at the price item level or hierarchy entity level.</li></ul>	
	<b>Note:</b> By default, the <b>All</b> option is selected.	
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).	Not Applicable
Deal Version Information	Displays the concatenated string of information about the deal version whose profitability report you want to view separated by a comma (,).	Not Applicable
Division	Used to indicate the division for which you want to view the profitability report of the deal version.	Yes (Conditional)
	<b>Note:</b> This field appears when you select the <b>Division Level Profitability Report</b> option from the <b>Search By</b> list.	<b>Note:</b> This field is required for viewing the profitability report of a particular division.
Report Format	Used to indicate the format in which you want to view the price item profitability report. The valid values are: <ul style="list-style-type: none"><li>• <b>Detailed Report</b> - Used to indicate whether you want to view the profitability report at the price item level in the hierarchy.</li></ul>	Yes (Conditional)
		<b>Note:</b> This field is required for viewing the profitability report of a price item.

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li><b>Summary Report</b> - Used to indicate whether you want to view the profitability report at the hierarchy entity level.</li></ul>	
	<b>Note:</b> By default, the <b>Detailed Report</b> option is selected.  This field appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.	
Price Item	Used to search a particular price item whose profitability report you want to view for the deal version.	Yes (Conditional)
	<b>Note:</b>  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears where you can search for the respective price item.  This field appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.	<b>Note:</b> This field is required for viewing the profitability report of a particular price item.

- **Search Results** - On clicking the **Search** button, the profitability report appears based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays the concatenated string of information about the customer for whom the deal is created in the system separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the Person screen appears where you can view the details of the respective person.  This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Primary Identifier	Indicates the primary identifier using which the customer is defined in the system.
	<b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Division	Indicates the division for which you want to view the profitability report.
	<b>Note:</b> This column appears when you select the <b>Division Level Profitability Report</b> option from the <b>Search By</b> list.

Column Name	Column Description
Root Level Hierarchy Entity	Indicates the root level hierarchy entity of the price item for which you want to view the profitability report.
	<b>Note:</b> This column appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.
Non-Root Level Hierarchy Entity	Indicates the non-root level hierarchy entity of the price item for which you want to view the profitability report.
	<b>Note:</b> This column appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.
Price Item Information	Displays the concatenated string of information about the price item for which you want to view the profitability report separated by a comma (,).
	<b>Note:</b> This column appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.
Proposed Commitment	Displays the proposed usage of the price item.
	<b>Note:</b> This column appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.
Proposed Revenue	Displays the revenue generated from the proposed price item pricing and commitments.
Proposed Cost	Displays the overall cost of the proposed price item based on the usage.
Profit	Displays the overall profit generated from the proposed price assignments of price items. It is represented by the following formula:  Proposed Profit = Proposed Revenue - Proposed Cost
Profitability (%)	Displays the overall profit in percentage generated by the proposed price assignments of price items.
	<b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Original Revenue	Displays the revenue generated through the original price item pricing and commitments.
Original Commitment	Displays the original usage of the price item.
	<b>Note:</b> This column appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.
Profit Variation (%)	Displays the difference between the original profit and proposed profit in percentage.

Column Name	Column Description
	<b>Note:</b> This column appears when you select the <b>Deal Level Profitability Report</b> or <b>Division Level Profitability Report</b> option from the <b>Search By</b> list. On selecting the <b>All</b> option from the <b>Search By</b> list in the <b>Search Profitability Report</b> zone, the <b>Search Results</b> displays the <b>Deal Level Profitability Report</b> by default.
Status	Indicates the current status of the deal. <b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Created By	Indicates the user who has created the deal. <b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person). <b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person). <b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Next Review Date	Displays the date which is scheduled to review the deal usage as per the commitments made by the customer. <b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Deal Currency	Displays the currency using which the deal is defined in the system. <b>Note:</b> This column appears when you select the <b>All</b> or <b>Deal Level Profitability Report</b> option from the <b>Search By</b> list.
Revenue Variation (%)	Displays the average revenue generated from the price item pricing and commitments. It is represented by the following formula:  Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100 / Original Revenue  <b>Note:</b> This column appears when you select the <b>Price Item Level Profitability Report</b> option from the <b>Search By</b> list.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

**Viewing the Hierarchy Entity Level Profitability Report**

**Procedure**

To view the hierarchy entity level profitability report:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the deal whose deal versions profitability report you want to view.  
The **Deal Versions** zone appears.
3. In the **Deal Versions** zone, click the **Profitability Details** (📊) icon from the **Profitability Details** column corresponding to the deal version whose hierarchy entity level profitability report you want to view.  
The **Deal Profitability** screen appears.

**Note:** The **Profitability Details** (📊) icon for deals which do not have multiple versions appears in the **Profitability Details** column corresponding to the deal in the **Search Results** section of the **Search Deal** zone as well as in the **Deal Versions** zone. Whereas, the **Profitability Details** (📊) icon for deals which have multiple deal versions appear only in the **Profitability Details** column corresponding to the deal version in the **Deal Versions** zone.

- 4. Select the **Price Item Level Profitability Report** option from the **Search By** list in the **Search Profitability Report** zone.
- 5. Ensure that the **Filter** area is visible.
- 6. Select the **Summary Report** option from the **Report Format** list.
- 7. Click **Search**.  
The search results appear in the **Search Results** section of the **Search Profitability Report** zone.
- 8. View the hierarchy entity level profitability report of the deal version in the **Search Results** section of the **Search Profitability Report** zone.

**Note:**

You can view the profitability report of a deal or a deal version when it is in the **Simulated** status.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Deal Approval Workflow

The **Deal Approval Workflow** screen enables you to view the price item approval hierarchy and the product approval hierarchy details. It also enables you to view the approval history of the deal. It contains the following sections:

- **Main** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Deal Type	Indicates the deal type using which the deal is created in the system.
Status	Indicates the current status of the deal.
Division	Indicates the division of the entity for which the deal is created in the system.

- **Approval Workflow Tracker** - Displays the price item approval hierarchy and the product level approval hierarchy of the deal. It also enables you to track the current approval status of the deal. It contains the following legends:

Legend	Legend Description
 Awaiting Action	Indicates the approver in the approval hierarchy has received the deal for approval and is yet to perform his/her actions.
 Acted On	Indicates the approver in the approval hierarchy has already performed his/her actions on the deal.
 Unassigned	Indicates the deal is not assigned to the approver in the approval hierarchy to perform his/her actions on the deal.
	<b>Note:</b> This indicates that the deal is already approved by the previous approver in the approval hierarchy.
 Returned	Indicates the approver has returned the deal to the submitter for approval.
 Awaiting Product Manager Approval	Indicates the approver needs the product manager's approval to perform his/her actions on the deal.
 Owner Action	Indicates the deal is not yet assigned to the approver in the approval hierarchy to perform his/her actions on the deal.
 Division Approval	Indicates the division level approval hierarchy.
 Product Approval	Indicates the product level approval hierarchy.

- **Approval History** - Displays the complete trail of actions performed on the deal. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence in which the action is performed on the deal.
Process	Indicates the action that is performed on the deal.
Approval Type	Indicates the approval type using which the action is performed on the deal.
Division	Indicates the division for which the action is performed on the deal.
Product	Displays the product for which the action is performed on the deal.
Approval Level	Indicates the level in the approval hierarchy where the action is performed on the deal.
To Do Role	Indicates the To Do Role using which the To Do task is assigned for performing the action on the deal.
User Name	Displays the user who has performed the action on the deal.
Action Taken	Displays the action performed by the user on the deal with respect to the process.
Create Date Time	Displays the date and time when the action is performed by the user.
Update Date Time	Displays the date and time when the status of the deal is updated in the system due to the action performed.

**Note:** The deal approval workflow does not appear for deals which are in the **Draft, Pending Simulation, Simulation Deferred, Simulated, Hierarchy Creation Deferred,** and **Discarded** status.

For more information on how the approval workflow appears, refer [Deal Approval Scenarios](#) on page 2661

# Deal Information

The **Deal Information** screen enables you to do the following:

- Define a deal for the entities (i.e. customers, accounts, and prospect persons) which are already available in the system
- Define a new prospect for which you want to create a deal
- Derive reference customers and deals during deal creation using a questionnaire
- Search for a customer or a deal whose price item pricing, price list assignments, and product enrollments you want to use as a reference for creating a deal

The **Deal Information** screen contains the following zones:

- [Search Entity](#) on page 2871

**Note:** The **Search Entity** zone appears in the **Deal Information** screen only when you are defining a deal for an entity (i.e. customer, account, or prospect person).

- [Deal](#) on page 2877

**Note:** By default, the **Deal** zone does not appear in the **Deal Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to an entity (i.e. customer, account, or prospect person) in the **Search Results** section of the **Search Entity** zone while defining a deal.

- [Questionnaire](#) on page 2883

**Note:** By default, the **Questionnaire** zone does not appear in the **Deal Information** screen. It appears when the **Skip Questionnaire** check box is unchecked in the **Deal** zone while defining a deal and when the **Questionnaire Template** is associated with the **Deal Type** using which you are defining the deal.

- [Select Reference](#) on page 2884

**Note:** By default, the **Select Reference** zone does not appear in the **Deal Information** screen. It appears when the **Skip Reference** check box is unchecked in the **Deal** zone while defining a deal.

- [Reference Details](#) on page 2889

**Note:** By default, the **Reference Details** zone does not appear in the **Deal Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a reference in the **Search Results** section of the **Select Reference** zone.

- [Deal Information](#) on page 2890

**Note:** You can navigate to the **Deal Information** screen by using the following methods:

- Click the **Create Deal** button in the **Deal Dashboard** screen for creating a new deal.
- Click the link in the **Deal Information** column of the **Search Deal** zone in the **Deal Dashboard** screen for viewing or editing the deal information.

## Search Entity

The **Search Entity** zone allows you to search for an existing customer, account, or prospect person for whom you want to define a deal. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an existing customer, account, or prospect person for whom you want to define a deal. The valid values are: <ul style="list-style-type: none"> <li>• Customer Details</li> <li>• Account Details</li> <li>• Prospect Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Customer Details</b> option is selected.	
Division	Used to search for customers, accounts, or prospect persons associated with a particular division.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Person Name	Used to search for customers or accounts which belong to persons with a particular name.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> , and <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing customer or account for which you want to define a deal.
Customer Segment	Used to search for customers or prospect persons which belong to a particular segment.	Yes (Conditional)
	<b>Note:</b> The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field. This field appears when the <b>Customer Details</b> or <b>Prospect Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing customer or prospect person for whom you want to define a deal.
City	Used to search for customers from a particular city.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing customer for whom you want to define a deal.
Address	Used to search for a customer residing at a particular address.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing customer for whom you want to define a deal.

Field Name	Field Description	Mandatory (Yes or No)
Phone Number	Used to search for a customer having a specific phone number.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing customer for whom you want to define a deal.
Person ID	Used to search for a particular customer.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing customer for whom you want to define a deal.
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for a customer or account.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list.  This field also appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing customer or account for which you want to define a deal.
Person Identifier	Used to specify the value for the person identifier type based on which you want to search for a customer or account.	Yes (Conditional)
	<b>Note:</b> This field appears when you select a person identifier type from the <b>Person Identifier Type</b> list.	<b>Note:</b> This field is required while searching for an existing customer or account for which you want to define a deal.  If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Customer Class	Used to search for accounts which belong to a particular customer class.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
Account ID	Used to search for a particular account.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
Account Identifier Type	Used to indicate the identifier type based on which you want to search for the accounts.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
Account Identifier	Used to specify the value for the account identifier type based on which you want to search for the accounts.	Yes (Conditional)
	<b>Note:</b> This field appears when you select an account identifier type from the <b>Account Identifier Type</b> list.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
		If you specify the account identifier type as a search criteria, you have to specify the account identifier.
Account Category	Used to search accounts which are associated with a particular category. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Account</li> <li>• Settlement Account</li> <li>• Usage Account</li> </ul>	Yes (Conditional)
	<b>Note:</b> The list includes only those values which are present in the <b>ACCT_USAGE_FLG</b> lookup field.	<b>Note:</b> This field is required while searching for an existing account for which you want to define a deal.
	This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of the <b>Search Criteria</b> section.	
Prospect Person Name	Used to search prospect persons with a particular name.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.
Prospect Person ID	Used to search for a particular prospect person.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.
Prospect Person Identifier Type	Used to indicate the identifier type based on which you want to search for the prospect persons.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.
Prospect Person Identifier	Used to specify the value for the prospect identifier type based on which you want to search for the prospect persons.	Yes (Conditional)
	<b>Note:</b> This field appears when you select a prospect identifier type from the <b>Prospect Identifier Type</b> list.	<b>Note:</b> This field is required while searching for an existing prospect person for whom you want to define a deal.  If you specify the prospect person identifier type as a search criteria, you have to specify the prospect person identifier.

- **Search Results** - On clicking the **Search** button, a list of entities appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays the concatenated string of customer information separated by a comma (,). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective customer.  This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Person Name	Displays the name of the customer.
	<b>Note:</b> This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Primary Person Identifier Type	Indicates the identifier type using which the customer is defined in the system.

Column Name	Column Description
	<b>Note:</b> This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Primary Person Identifier	Displays the value for the primary person identifier type using which the customer is defined in the system.
	<b>Note:</b> This column appears when the <b>Customer Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Division	Indicates the division to which the customer, account, or prospect person belongs.
Account Information	Displays the concatenated string of account information separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account. This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Main Customer	Displays the name of the main customer to whom the account belongs.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Primary Account Identifier Type	Indicates the identifier type using which the account is defined in the system.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Primary Account Identifier	Displays the value for the primary account identifier type using which the account is defined in the system.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Customer Class	Indicates the customer class to which the account belongs.
	<b>Note:</b> This column appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Prospect Person Information	Displays the concatenated string of prospect person information separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Prospect Person</b> screen appears where you can view the details of the respective prospect person.  This column appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Prospect Person Identifier Type	Indicates the identifier type using which the prospect person is defined in the system.  <b>Note:</b> This column appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Prospect Person Identifier	Displays the value for the prospect person identifier type using which the prospect person is defined in the system.  <b>Note:</b> This column appears when the <b>Prospect Details</b> option is selected from the <b>Search By</b> list in the <b>Search Criteria</b> section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (∇) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📢) icon corresponding to an entity, the **Deal** zone appears where you can define a deal for the respective entity.

<b>Deal</b> zone	<a href="#">Deal</a> on page 2877
How to define a deal	<a href="#">Defining a Deal</a> on page 2846

**Deal**

The **Deal** zone allows you to define a deal for an entity (i.e. the customer, account, or prospect person) which is already available in the system. It contains the following sections:

- **Main** - Used to specify basic details about the deal. It contains the following fields:

Field Name	Field Description
Deal Entity Information	Displays information about the entity (i.e. the customer, account, or prospect person) for which you want to define a deal.
Deal ID	Displays the deal ID.

Field Name	Field Description
	<p><b>Note:</b> The deal ID is generated automatically when you click the <b>Save</b> button in the <b>Deal</b> zone.</p>
Contracted Deal	Used to indicate that the change in the price item pricing from the price list does not affect the price item pricing offered in the deal created for an existing customer, account, or prospect.
Copy Template	<p>Used to indicate the deal template which you want to use for creating the deal.</p> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Copy Template</b> field. On clicking the <b>Search</b> icon, the <b>Copy From</b> window appears where you can select the respective details from the template.</p>
Deal Entity	<p>Indicates the entity (i.e. the customer, account, or prospect person) for which you want to create a deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Customer</li> <li>• Prospect</li> </ul> <p><b>Note:</b> This field cannot be edited. The list includes only those values which are present in the <b>DEAL_ENTITY_TYPE_FLG</b> lookup field.</p>
Status	<p>Indicates the current status of the deal.</p> <p><b>Note:</b> This field cannot be edited. The value of this field is automatically populated when you enter all the details for creating a deal and press the <b>Save</b> button. The list includes only those values which are present in the <b>DEAL_STATUS</b> lookup field.</p>
Customer Segment	<p>Indicates the business component to which the entity (i.e. the customer, account, or prospect person) belongs.</p> <p><b>Note:</b> This field cannot be edited. The value of this field is set to the value that is specified in the <b>Person</b> screen. The list includes only those values which are present in the <b>CUST_SEG_FLG</b> lookup field.</p>
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.

Field Name	Field Description
	<p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p> <p>The list includes only those values which are present in the <b>CUST_TIER_FLG</b> lookup field.</p>
Access Group	<p>Indicates the user group who can view and edit the details of the entity (i.e. the customer, account, or prospect person).</p> <p><b>Note:</b> The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>
Division	<p>Indicates the division with which the entity (i.e. the customer, account, or prospect person) is associated.</p> <p><b>Note:</b></p> <p>This field cannot be edited.</p> <p>The value of this field is set to the value that is specified in the <b>Person</b> screen.</p>
Deal Identifier	<p>Used to specify the primary identifier using which you want to create a deal for the entity in the system.</p> <p><b>Note:</b></p> <p>You should ensure that every deal has a unique deal identifier.</p> <p>An error message appears when you save a deal with a deal identifier which is already used for creating a deal.</p>
Deal Type	<p>Used to indicate the deal type using which you want to create a deal in the system.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Type</b> field. On clicking the <b>Search</b> icon, the <b>Deal Type Search</b> window appears.</p> <p>On specifying the deal type, the description of the deal type appears corresponding to the <b>Deal Type</b> field.</p> <p>The <b>Deal Type Search</b> window lists only those deal types having the <b>Division</b>, <b>Customer Segment</b>, and <b>Customer Tier</b> combination which best fits with the <b>Division</b>, <b>Customer Segment</b>, and <b>Customer Tier</b> combination as specified in the <b>Person</b> screen of the entity (i.e. the customer, account, or prospect person).</p>
Deal Currency	<p>Used to specify the currency in which you want to calculate the deal level, division level, and the product level financial summary and profitability of the deal.</p>

Field Name	Field Description
	<p><b>Note:</b> The list includes only those currencies which are already defined in the system.</p>
Simulation Type	<p>Used to indicate the level at which you want to analyze the cost, revenue, and profitability of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account</b> - Used to indicate that you want to analyze the cost, revenue, and profitability at the account level.</li> <li>• <b>Customer</b> - Used to indicate that you want to analyze the cost, revenue, and profitability at the customer level.</li> <li>• <b>Deal</b> - Used to indicate that you want to analyze the cost, revenue, and profitability at the deal level.</li> </ul>
Accounts to Include in Simulation	<p>Used to indicate the accounts that you want to consider for analyzing the cost, revenue, and profitability of the deal. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Accounts of this Customer</b> - Used to indicate that you want to consider only the accounts (including the existing and prospect accounts) of the customer in the deal.</li> <li>• <b>All Accounts in the Hierarchy</b> - Used to indicate that you want to consider all the accounts of the customer, its child persons, and the child persons' accounts in the deal.</li> <li>• <b>Only Prospect Accounts of this Customer</b> - Used to indicate that you want to consider only the prospect accounts of the customer in the deal.</li> </ul> <p><b>Note:</b></p> <p>This option appears only when the <b>Deal Entity</b> is set to <b>Customer</b> and the <b>Simulation Type</b> is set to <b>Customer</b>.</p> <p>If you do not specify a value in the <b>Accounts to Include in Simulation</b> field, the system, by default, sets its value to <b>All Accounts in the Hierarchy</b>.</p>
Start Date	<p>Used to specify the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).</p> <p><b>Note:</b> This date is also used as the <b>Effective Start Date</b> for the proposed price list assignment, price assignment and <b>Start Date</b> for proposed product enrollment.</p>
Price Selection Date	Used to specify the starting date from when the price lists, pricing assignments, and product enrollments are considered for calculating the original pricing in the deal.
End Date	Used to specify the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).
Review Frequency	<p>Used to indicate the timely monitoring of the deal usage as per the commitments made by the customer.</p> <p><b>Note:</b> The list includes only those values which are present in the <b>REVIEW_FREQUENCY_FLG</b> lookup field.</p>

Field Name	Field Description
Deal Frequency	Used to indicate the duration for which you want to simulate the deal for calculating the financial summary and profitability of the deal.
	<b>Note:</b> The list includes only those values which are present in the <b>FREQUENCY_FLG</b> lookup field.
Usage Period	Used to indicate the period for which you want to aggregate the deal data to determine the scope of the deal.
	<b>Note:</b> The list includes only those values which are present in the <b>USAGE_PERIOD_FLG</b> lookup field.
Deal Description	Used to specify the description for the deal.
Deal Version Description	Used to specify the description for the deal version.
Skip Reference	Used to indicate whether you want to use a deal which is already created in the system as a reference for copying the pricing and commitments while creating a deal for the existing customer, account, or prospect person..
	<b>Note:</b> If you select the check box corresponding to the <b>Skip Reference</b> field and click <b>Save</b> , the system will direct you to the <b>Deal Information - Pricing/Commitments</b> page in the <b>Pending Simulation</b> status to define the price list assignments, price assignments, and product enrollments for the deal.  If you do not select the check box corresponding to the <b>Skip Reference</b> field and click <b>Save</b> , the system will direct you to the <b>Deal Information - Reference</b> page in the <b>Draft</b> status to select reference whose price item pricing, price list assignments, and product enrollments you want to use for the deal
Skip Questionnaire	Used to indicate whether you want to derive reference customers and deals during a deal creation using a questionnaire.
	<b>Note:</b> If a questionnaire template is not specified in the respective deal type or if the questionnaire template is not effective on the deal start date or if the <b>Skip Questionnaire</b> option is selected during the deal creation, the system derives the reference customers for the deal using the division, customer segment, and customer tier combination.

- **Product** - Used to recommend a list of products to which the accounts in the customer hierarchy can be enrolled. It contains the following field in a grid:

Field Name	Field Description
Product	Used to indicate the product that you want to recommend for the deal.

Field Name	Field Description
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Product Search</b> window appears.  On specifying the product, the description of the product appears corresponding to the <b>Product</b> field. The <b>Product Search</b> window lists only those products which are effective on the deal start date.

<b>Note:</b> The system automatically derives recommended products for the deal when the questionnaire contains questions where the question applicability is set to <b>Package and Product Reference</b> .  The system derives the recommended products from the reference deals. It only considers automatically recommended products of the reference deals and not manually recommended products of the reference deals.
---

- **Characteristics** - Used to define a list of characteristics for the deal. It contains the following fields in a grid:

Field Name	Field Description
Effective Date	Used to specify the date from when the characteristic is effective for the deal.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deal</b> .
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.

In addition, the **Deal** zone contains the following buttons:

Button Name	Button Description
Save as Template	Used to save the deal as a template for defining other deals in the system.  By default, the <b>Save as Template</b> button does not appear in the <b>Deal</b> zone. It appears only when the <b>Change</b> access mode is provided for the <b>C1-DEALTEMPLATE</b> application service to a user group. Users who belong to such user group can only view the <b>Save as Template</b> button in the <b>Deal</b> zone while creating a deal. If the user belongs to the user group which does not have the <b>Change</b> access mode provided for the <b>C1-DEALTEMPLATE</b> application service, the <b>Save as Template</b> button is disabled while creating a deal.

Button Name	Button Description
	<b>Note:</b> On clicking the <b>Save as Template</b> button, the system, by default, sets the <b>Template Deal</b> field to <b>Y</b> while saving the deal information.
Save	Used to save the deal in the system. <b>Note:</b> On clicking the <b>Save</b> button, the system sets the <b>Template Deal</b> field to <b>N</b> while saving the deal information.
Next	Used to navigate to the next screen for defining the deal.

**Questionnaire**

The **Questionnaire** zone allows you to answer the questions of the questionnaire template associated with the deal type using which the deal is created in the system.

The system enables you to derive reference customers and deals based on the answer provided in the **Questionnaire** zone.

The display order of the questions in the **Questionnaire** zone depends on the value set for the **Question Display Order** field in the **Questionnaire Template** screen associated with the deal type.

If the question display order is rule based, then the questions appear in the **Questionnaire** zone based on the answer provided for the previous question.

**Note:** Click the **Previous** (↶) or **Next** (↷) icons to navigate through the questions of a rule based questionnaire.

If the question display order is sequence based, then a list of questions appear in the **Questionnaire** zone.

**Note:** Click the **Previous** (↶) or **Next** (↷) icons to navigate through the questions set of a sequence based questionnaire.

The mandatory questions in both rule based and sequence based question display orders are indicated by an asterisk (\*) sign.

On clicking the **Skip Questionnaire** button on the top right corner of this zone, you can skip the questionnaire for deriving reference customers or deals based on the answers provided in the questionnaire.

In addition, the **Questionnaire** zone contains the following buttons:

Button Name	Button Description
Previous	Used to navigate to the previous screen for defining the deal.
Next	Used to navigate to the next screen for defining the deal.

## Select Reference

The **Select Reference** zone allows you to search for a customer, account, or a deal whose price item pricing, price list assignments, and product enrollments you want to use as a reference for creating a deal.

Note:  
By default, the **Select Reference** zone lists the reference customers for the deal based on the division, customer segment, and customer tier combination.  
  
If a questionnaire template is specified in the respective deal type and if the questionnaire template is effective on the deal start date and if the **Skip Questionnaire** option is not selected during the deal creation, the **Select Reference** zone lists the reference customers based on the answers provided in the **Questionnaire** zone of the **Deal Information - Questionnaire** page.

The **Select Reference** zone contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to search for customers or deals whose price item pricing, price list assignments, and product enrollments you want to use as a reference to create a deal. The valid values are: <ul style="list-style-type: none"><li>• <b>Reference Customers</b><ul style="list-style-type: none"><li>- Lists the reference customers based on the division, customer segment, and customer tier combination or the answers provided in the <b>Questionnaire</b> zone of the <b>Deal Information - Questionnaire</b> page.</li></ul></li><li>• <b>Customer</b><ul style="list-style-type: none"><li>- Used to specify whether you want to search for a customer whose price item pricing, price list assignments, and product enrollments you want to use as a reference to create a deal.</li></ul></li><li>• <b>Deal</b><ul style="list-style-type: none"><li>- Used to specify whether you want to search for a deal whose price item pricing, price list assignments, and product enrollments you want to use as a reference to create a deal.</li></ul></li><li>• <b>Reference Deals</b> - Lists the reference deals based on the answers provided in the <b>Questionnaire</b> zone of the <b>Deal Information - Questionnaire</b> page.</li></ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b> The reference deals are not derived when the <b>Skip Questionnaire</b> option is selected during the deal creation or a questionnaire template is not specified in the respective deal type or if the questionnaire template is not effective on the deal start date.</p>	
Division	<p>Used to search for reference customers or deals which belongs to a particular division.</p> <p><b>Note:</b> This field appears when you select the <b>Customer</b> or <b>Deal</b> option from the <b>Search By</b> list. You can view only those divisions to which you have access in the <b>Division</b> list.</p>	No
Person Name	<p>Used to search for reference customers or deals whose primary person has a particular name.</p> <p><b>Note:</b> This field appears when you select the <b>Customer</b> or <b>Deal</b> option from the <b>Search By</b> list.</p>	No
Customer Segment	<p>Used to search for reference customers or deals which belong to a particular business component.</p> <p><b>Note:</b> This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone. This field also appears when the <b>Deal</b> option is selected from the <b>Search By</b> list . The list includes only those values which are specified in the <b>CUST_SEG_FLG</b> lookup field.</p>	No
City	<p>Used to search for reference customers from a particular city.</p> <p><b>Note:</b> This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone.</p>	No
Address	Used to search for reference customer residing at a particular address.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone.	
Phone Number	Used to search for reference customer having a particular phone number.	No
	<b>Note:</b> This field appears when the <b>Customer</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link is clicked in the top right corner of this zone.	
Person ID	Used to search for a particular person whose price item pricing, price list assignments, and product enrollments you want to use as a reference.	No
	<b>Note:</b> This field appears when you select the <b>Customer</b> option from the <b>Search By</b> list.	
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for reference customers or deals.	No
	<b>Note:</b> This field appears when the <b>Customer</b> or <b>Deal</b> option is selected from the <b>Search By</b> list.	
Person Identifier	Used to specify the value for the person identifier type based on which you want to search for search for reference customers or deals.	Yes (Conditional)
	<b>Note:</b> This field appears when you select a person identifier type from the <b>Person Identifier Type</b> list.	<b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Prospect Person	Used to indicate whether you want to search for reference deals created for a prospect person. The valid values are: <ul style="list-style-type: none"><li>• Yes</li><li>• No</li></ul>	No
	<b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.	
Deal ID	Used to search for a particular deal whose price item pricing, price list assignments, and product enrollments you want to use as a reference.	No
	<b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Template Deal	Used to indicate whether you want to search for template deals whose price item pricing, price list assignments, and product enrollments you want to use as a reference. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.	
Deal Status	Used to search for reference deals with a particular status.	No
	<b>Note:</b> This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list. The list includes only those values which are specified in the <b>DEAL_STATUS</b> lookup field.	
Deal Type	Used to search for reference deals to which a particular deal type is associated.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Deal Type</b> field. On clicking the <b>Search</b> icon, the <b>Deal Type Search</b> window appears where you can search for the respective deal type. This field appears when the <b>Deal</b> option is selected from the <b>Search By</b> list.	

**Note:** You must specify at least one search criterion while searching for reference customer or deal. One more search criterion is required when you are searching for reference customers using the division.

- **Search Results** - On clicking the **Search** button, a list of reference customers or deals appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays the concatenated string of person information separated by a comma (.). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person. This column appears when you select the <b>Reference Customers</b> or <b>Customer</b> option from the <b>Search By</b> list.
Person Name	Displays the name of the primary customer.

Column Name	Column Description
	<p><b>Note:</b> This column appears when you select the <b>Customer</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Primary Person Identifier Type	Indicates the primary identifier type using which the customer or deal is defined in the system.
Primary Person Identifier	Indicates the value for the primary identifier type using which the customer or deal is defined in the system.
Division	Indicates the division to which the customer or deal is associated.
Customer Segment	Indicates the business component using which the customer or deal is defined in the system.
Customer Tier	Indicates the customer tier of the customer segment to which the customer or the deal belongs.
Deal Information	<p>Displays the concatenated string of deal information separated by a comma (,).</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal.</p> <p>This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Deal Status	<p>Indicates the current status of the deal.</p> <p><b>Note:</b> This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Deal Version Information	<p>Displays the concatenated string of deal version information separated by a comma (,).</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal version.</p> <p>This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Deal Version Status	<p>Indicates the current status of the deal version.</p> <p><b>Note:</b> This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.</p>
Prospect Person Information	Displays the concatenated string of prospect person information for whom the deal is created in the system separated by a comma (,).

Column Name	Column Description
	<b>Note:</b> It has a link. On clicking the link, the <b>Prospect Person</b> screen appears where you can view the details of the respective prospect person.  This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.
Deal ID	Indicates the identification value of the deal.  <b>Note:</b> This column appears when you select the <b>Deal</b> or <b>Reference Deals</b> option from the <b>Search By</b> list in the <b>Search Criteria</b> section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (∇) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📢) icon corresponding to a customer or deal the **Reference Details** zone appears where you can select the references for the deal.

## Deal Information

The **Deal Information** zone allows you to do the following:

- View the details of the deal
- Associate, disassociate, view, or edit the terms and conditions of the deal
- View and add log entries for the deal or the deal version
- View, delete, and add adhoc revenue charges for the deal or the deal version
- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy

The **Deal Information** zone contains the following sections:

- [Deal Information](#) on page 2896
- [Deal Financial Summary](#) on page 2898
- [Division Financial Summary](#) on page 2900

**Note:** The **Division Financial Summary** section appears in the **Deal Information** zone only when the **Division Level Approval Required** field is set to **Yes** in the deal type used for creating the deal.

- [Product Financial Summary](#) on page 2903

**Note:** The **Product Financial Summary** section appears **Deal Information** zone only when the **Product Level Approval Required** field is set to **Yes** in the deal type used for creating the deal.

The **Deal Information** zone contains the following symbol legends:

Symbol Name	Symbol Description
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 Standard	Indicates the revenue, cost, and profit generated from the standard price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 CHANGED	Indicates the changed revenue, cost, and profit generated from the simulation process.
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
	<b>Note:</b> This symbol appears in the header area of the <b>Deal Financial Summary</b> section when the deal level financial summary is in the <b>Approved</b> status. This symbol appears in the <b>Approval Status</b> column of the <b>Division Financial Summary</b> and <b>Product Financial Summary</b> sections when the division level financial summary and the product level financial summary is in the <b>Approved</b> status respectively. This symbol appears in the <b>Status</b> column of the <b>Customer Hierarchy</b> section when all the price item pricing and/or price assignments of the respective entity is approved by the approver.
	<b>Note:</b> This symbol appears upon simulation only when the ceil & floor limit is in range of the approver or the deal creator.
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

Symbol Name	Symbol Description
	<b>Note:</b>  This symbol appears in the header area of the <b>Deal Financial Summary</b> section when the deal level financial summary is in the <b>Pending for Approval</b> status.  This symbol appears in the <b>Approval Status</b> column of the <b>Division Financial Summary</b> and <b>Product Financial Summary</b> sections when the division level financial summary and the product level financial summary is in the <b>Pending for Approval</b> status respectively.  This symbol appears in the <b>Status</b> column of the <b>Customer Hierarchy</b> section when the price item pricing and/or price assignments of the respective entity is yet to be approved by the approver.
	<b>Note:</b> This symbol appears upon simulation only when the ceil & floor limit is in range of the approver or the deal creator.
 <b>Error</b>	Indicates that the deal level, division level, or product level financial summary is in the error status.
	<b>Note:</b> This symbol appears in the header area of the deal level, division level, or product level financial summary sections.  This symbol appears in the header area of the <b>Deal Financial Summary</b> section when the deal level financial summary is in the <b>Error</b> status.  This symbol appears in the <b>Approval Status</b> column of the <b>Division Financial Summary</b> and <b>Product Financial Summary</b> sections when the division level financial summary and the product level financial summary is in the <b>Error</b> status respectively.  This symbol appears in the <b>Status</b> column of the <b>Customer Hierarchy</b> section when the approval of the price item pricing and/or price assignments of the respective entity generated an error.
	<b>Note:</b> This symbol appears upon simulation only when the ceil & floor limit is not in the range of the approver or the deal creator.

The **Deal Information** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.

Button Name	Button Description
	<p><b>Note:</b></p> <p>The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed.</p> <p>The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.</p>
Send Deal for Approval	<p>Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.</p> <p><b>Note:</b></p> <p>On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p> <p>This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p> <p><b>Note:</b> An email notification is sent to the users in the approval hierarchy for approving the deal once the deal is in the <b>Ready for Approval</b> status</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p>

Button Name	Button Description
	<p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the deal creator to indicate that the ownership of the deal has changed.</p>
Finalize Deal	<p>Used to finalize the deal so that it is ready to be presented to the customer for approval.</p> <p><b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.</p> <p><b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (☑) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Accept Deal	<p>Used to accept the deal in the system after receiving confirmation of acceptance from the customer.</p> <p><b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.</p> <p><b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (✕) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Reject Deal	<p>Used to reject the deal in the system after receiving confirmation of rejection from the customer.</p> <p><b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.</p> <p><b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (✕) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Create Deal Version	<p>Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.</p> <p><b>Note:</b> You can add a new deal version to a deal even if the version of any deal version of a deal is in the <b>Finalized</b> status and the status of the deal is <b>Pending for Approval</b> or <b>Approved</b>.</p>
Discard Deal	<p>Used to discard the deal.</p> <p><b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.</p>
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.

Button Name	Button Description
Download	Used to download the consolidated pricing and commitments of the entities in a deal.
	<b>Note:</b> This button is enabled only when the user has access to the <b>C1_DEALDWLDUPLD</b> application service.
Upload	Used to upload the consolidated pricing and commitments of the entities in a deal.
	<b>Note:</b> This button is enabled only when the user has access to the <b>C1_DEALDWLDUPLD</b> application service.
Previous	Used to view information about the previous status of the deal.

In addition, the **Deal Information** zone header area contains the following links:

Link Name	Link Description
Terms and Conditions	Used to associate, disassociate, edit, or view the deal terms and conditions. It is also used to add adhoc terms and conditions for the deal.
Deal Log	Used to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal.
Deal Version Log	Used to view the complete trail of actions performed on the deal version. It also allows you to manually add a log entry for the deal version.
Adhoc Revenue and Cost	Used to add, edit, delete, or view additional charges that are applicable for the deal while deal creation.

Deal Information

The **Deal Information** section allows you to view the details of the deal or the deal version. It contains the following fields:

Field Name	Field Description
Division	Indicates the division with which the deal is associated.
Deal Type	Indicates the deal type using which the deal is created in the system.
Review Date	Displays the date which is scheduled for calculating the deal usage as per the commitments made by the customer.
	<b>Note:</b> This field is populated when the deal has reached the <b>Full Orchestrated</b> status.
Deal Version Information	Displays the concatenated string of information about the deal version separated by a comma (,).
Access Group	Indicates the group of users who can view and edit the details of the entity (i.e. the customer, account, or prospect person) for which the deal is created.
Review Frequency	Indicates the duration for which the deal is monitored to calculate the usage of the deal as per the commitments made by the customer.
Effective Start Date	Displays the date from when the deal is effective for the entity (i.e. the customer, account, or prospect person).
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Deal Description	Displays the description of the deal.
Customer Segment	Displays the business component to which the entity (i.e. the customer, account, or prospect person) belongs.
Creation Date	Displays the date when the deal is created in the system.
Effective End Date	Displays the date till when the deal is effective for the entity (i.e. the customer, account, or prospect person).
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Customer Tier	Indicates the customer tier of the customer segment to which the entity (i.e. the customer, account, or prospect person) belongs.

Field Name	Field Description
Start Date	Displays the date from when the price list, price assignment, and price item pricing is available for the deal.
Acceptance Date	Displays the date when the customer has reviewed and accepted the deal.
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
	If the <b>Deal Status</b> is <b>Rejected</b> then the <b>Acceptance Date</b> specifies the date when the deal is rejected by the customer.
Deal Currency	Indicates the currency in which the financial summary and profitability is calculated for the deal.
End Date	Displays the date till when the price list and price assignment is available for the deal.
Finalized Date	Displays the date when the deal is finalized in the system.
	<b>Note:</b> This field is populated when the deal has reached the <b>Customer Accepted</b> status.
Simulation Type	Indicates the simulation type using which the financial summary and profitability is calculated for the deal. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Customer</li> <li>Deal</li> </ul>
Usage Period	Indicates the period for which you want to aggregate the deal data to determine the scope of the deal. The valid values are: <ul style="list-style-type: none"> <li>Biannually</li> <li>Monthly</li> <li>Quarterly</li> <li>Yearly</li> </ul>
Deal Frequency	Indicates the duration in which you want to simulate the deal for calculating the financial summary and deal profitability. The valid values are: <ul style="list-style-type: none"> <li>Biannually</li> <li>Monthly</li> <li>Quarterly</li> <li>Yearly</li> </ul>

In addition, the **Deal Information** section header area contains the following fields:

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
Deal Status	Indicates the current status of the deal. The valid values are: <ul style="list-style-type: none"> <li>Applied/Processed</li> <li>Approved</li> </ul>

Field Name	Field Description
	<ul style="list-style-type: none"><li>• Closed</li><li>• Customer Accepted</li><li>• Discarded</li><li>• Draft</li><li>• Error</li><li>• Finalized</li><li>• Fully Orchestrated</li><li>• Hierarchy Creation Deferred</li><li>• Inactive</li><li>• Orchestration Deferred</li><li>• Partially Orchestrated</li><li>• Pending for Approval</li><li>• Pending for Review</li><li>• Pending Simulation</li><li>• Pending for Orchestration</li><li>• Person Simulation Deferred</li><li>• Ready for Approval</li><li>• Rejected</li><li>• Simulated</li><li>• Simulation Deferred</li></ul>
Deal Version Status	Indicates the status of the deal version.

**Deal Financial Summary**

The **Deal Financial Summary** section displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Revenue	Displays the revenue generated from the proposed, original, standard, and recommended price item pricing and commitments at the deal level.
	<b>Note:</b>  The revenue generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The revenue generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.  If division level approval is required, then, the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, original, standard, and recommended cost calculated at the deal level.

Column Name	Column Description
	<p><b>Note:</b></p> <p>The cost calculated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The cost calculated from the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The cost includes the total price item cost and the adhoc cost.</p> <p>If division level approval is required, then, the cost includes the sum of costs calculated at each division level.</p>
Profit	<p>Displays the profit generated from the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula:</p> $\text{Profit} = \text{Revenue} - \text{Cost}$ <p><b>Note:</b></p> <p>The profit generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The profit generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>If division level approval is required, then, the profit includes the sum of profits calculated at each division level.</p>
Profitability (%)	<p>Displays the profit percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula:</p> $\text{Profitability \%} = (\text{Revenue} - \text{Cost}) * 100 / \text{Revenue}$ <p><b>Note:</b></p> <p>The profitability calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The profitability calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p>
Revenue Variation (%)	<p>Displays the difference of revenue variation percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula:</p> $\text{Revenue Variation (\%)} = (\text{Proposed Revenue} - \text{Original Revenue}) * 100 / \text{Original Revenue}$

Column Name	Column Description
	<p><b>Note:</b></p> <p>The revenue variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The revenue variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The <b>Green Arrow</b> () or the <b>Red Arrow</b> () corresponding to the revenue variation (%) indicates whether there is an increase or decrease in the revenue variation (%) respectively.</p>
Profit Variation (%)	<p>Displays the difference of profit variation percentage calculated from the proposed, original, standard, and recommended price item pricing and commitments at the deal level. It is calculated using the following formula:</p> <p>Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit</p> <p><b>Note:</b></p> <p>The profit variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system. It is calculated using the following formula:</p> <p>Standard Pricing Profit Variation (%) = (Standard Profit - Original Profit)*100/ Original Profit</p> <p>The profit variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The <b>Green Arrow</b> () or the <b>Red Arrow</b> () corresponding to the profit variation (%) indicates whether there is an increase or decrease in the profit variation (%) respectively.</p>

**Note:**

Alternatively, you can also view the proposed statistic of the deal financial summary in the header area of this section.

The system highlights the cells of the deal financial summary in green color if the proposed statistic is within the range of the deal creator or the approver. Whereas, the system highlights the cells of the deal financial summary in red color if the proposed statistic is not within the range of the deal creator or the approver.

The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

**Division Financial Summary**

The **Division Financial Summary** section displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the revenue generated from the proposed, original, standard, and recommended price item pricing and commitments at the division level.
	<b>Note:</b>  The revenue generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The revenue generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.
Cost	Displays the proposed, original, standard, and recommended cost calculated at the division level.
	<b>Note:</b>  The cost calculated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The cost calculated from the recommended pricing appears only when there is a recommended pricing defined for the price item.  The cost includes the total price item cost and the adhoc cost.
Profit	Displays the profit generated from the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula:  Profit = Revenue - Cost
	<b>Note:</b>  The profit generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The profit generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.
Profitability (%)	Displays the profit percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula:  Profitability % = ( Revenue - Cost)*100/ Revenue

Column Name	Column Description
	<p><b>Note:</b></p> <p>The profitability calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The profitability calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p>
Revenue Variation (%)	<p>Displays the difference of revenue variation percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula:</p> <p>Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue</p> <p><b>Note:</b></p> <p>The revenue variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The revenue variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The <b>Green Arrow</b> () or the <b>Red Arrow</b> () corresponding to the revenue variation (%) indicates whether there is an increase or decrease in the revenue variation (%) respectively.</p>
Profit Variation (%)	<p>Displays the difference of profit variation percentage calculated from the proposed, original, standard, and recommended price item pricing and commitments at the division level. It is calculated using the following formula:</p> <p>Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit</p> <p><b>Note:</b></p> <p>The profit variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system. It is calculated using the following formula:</p> <p>Standard Pricing Profit Variation (%) = (Standard Profit - Original Profit)*100/ Original Profit</p> <p>The profit variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The <b>Green Arrow</b> () or the <b>Red Arrow</b> () corresponding to the profit variation (%) indicates whether there is an increase or decrease in the profit variation (%) respectively.</p>

**Note:**

The system highlights the cells of the division financial summary in green color if the proposed statistic is within the range of the deal creator or the approver. Whereas, the system highlights the cells of the division financial summary in red color if the proposed statistic is not within the range of the deal creator or the approver.

The **Division Financial Summary** section appears in the **Deal Information** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** using which the deal is created in the system.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available in the header area of this section.

**Product Financial Summary**

The **Product Financial Summary** section displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the revenue generated from the proposed, original, standard, and recommended price item pricing and commitments at the product level.
	<b>Note:</b> <p>The revenue generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The revenue generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.</p>
Cost	Displays the proposed, original, standard, and recommended cost calculated at the product level.
	<b>Note:</b> <p>The cost calculated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The cost calculated from the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The cost includes the total price item cost and the adhoc cost.</p>

Column Name	Column Description
Profit	Displays the profit generated from the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:  Profit = Revenue - Cost
	<b>Note:</b>  The profit generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The profit generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.
Profitability (%)	Displays the profit percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:  Profitability % = ( Revenue - Cost)*100/ Revenue
	<b>Note:</b>  The profitability calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The profitability calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.
Revenue Variation (%)	Displays the difference of revenue variation percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:  Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue
	<b>Note:</b>  The revenue variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The revenue variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.  The <b>Green Arrow</b> (  ) or the <b>Red Arrow</b> (  ) corresponding to the revenue variation (%) indicates whether there is an increase or decrease in the revenue variation (%) respectively.
Profit Variation (%)	Displays the difference of profit variation percentage calculated from the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

Column Name	Column Description
	<p><b>Note:</b></p> <p>The profit variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system. It is calculated using the following formula:</p> <p>Standard Pricing Profit Variation (%) = (Standard Profit - Original Profit)*100/Original Profit</p> <p>The profit variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The <b>Green Arrow</b> () or the <b>Red Arrow</b> () corresponding to the profit variation (%) indicates whether there is an increase or decrease in the profit variation (%) respectively.</p>

<p><b>Note:</b></p> <p>The system highlights the cells of the product financial summary in green color if the proposed statistic is within the range of the deal creator or the approver. **Entity Hierarchy**

The **Entity Hierarchy** section allows you to do the following:

- View the deal financial summary
- View the division financial summary
- View the product financial summary
- View the customer hierarchy
- View the assigned price lists of a person or account
- View the proposed price list assignments of a person or account
- View the enrolled products for an account
- View the proposed product enrollments for an account
- View the pricing and commitment details of a person or account
- View the division financial summary in the division currency
- View the product financial summary in the division currency
- View the revenue and cost in the division or account currency

The **Simulation Details** zone contains the following sections:

- **Symbol Legends** - Indicates the symbols used to identify the current status of the deal level, division level, and product level financial summary. It also differentiates the existing, proposed and recommended pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is within the limits defined for the user for approval.
 NOT IN APPROVER RANGE	Indicates that the deal level, division level, or product level financial summary is not within the limits defined for the user for approval.
 PROJECTED	Indicates the revenue, cost, and profit generated from the proposed price item pricing and price assignments.
 RECOMMENDED	Indicates the revenue, cost, and profit generated from the recommended price item pricing and price assignments.
 ORIGINAL	Indicates the revenue, cost, and profit generated from the existing price item pricing and price assignments.
 APPROVED	Indicates whether the deal level, division level, or product level financial summary is approved or not.
 PENDING FOR APPROVAL	Indicates that the approval for deal level, division level, or product level financial summary is pending.

- **Deal Financial Summary** - Displays the financial summary at the deal level. It contains the following columns:

Column Name	Column Description
Approval Status	Indicates the current approval status of the financial summary at the deal level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the deal level.
	<b>Note:</b> If division level approval is required, then the revenue includes the sum of revenues calculated at each division level.
Cost	Displays the proposed, recommended, and original cost calculated at the deal level.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost. If division level approval is required, then the cost includes the sum of costs calculated at each division level.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the deal level. It is calculated using the following formula:  Profit = Revenue - Cost
	<b>Note:</b> If division level approval is required, then the profit includes the sum of profits calculated at each division level.

Column Name	Column Description
Profitability (%)	Displays the proposed, recommended, and original profit created in percentage at the deal level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue - Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the deal level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

**Note:** The data in the **Deal Financial Summary** sections appears when the deal has reached the **Simulated** status.

- **Division Financial Summary** - Displays the financial summary at the division level. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the financial summary is displayed.
Approval Status	Indicates the current approval status of the financial summary at the division level.
Revenue	Displays the proposed, recommended, and original revenue generated from the price item pricing and price assignments at the division level.
Cost	Displays the proposed, recommended, and original cost calculated at the division level.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the division level. It is calculated using the following formula:  Profit = Revenue - Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage at the division level from the price item pricing and price assignments. It is calculated using the following formula:  Profitability % = ( Revenue - Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the division level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

**Note:**

The **Division Financial Summary** sections appears in the **Simulation Details** zone when the **Division Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Division Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the division financial summary is displayed in the deal currency. You can view the division financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Product Financial Summary** - Displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the proposed, recommended, and original revenue generated from the product.
Cost	Displays the proposed, recommended, and original cost calculated for the product.
	<b>Note:</b> The cost includes the total price item cost and the adhoc cost.
Profit	Displays the proposed, recommended, and original profit in deal currency generated from the price item pricing and price assignments at the product level. It is calculated using the following formula:  Profit = Revenue - Cost
Profitability (%)	Displays the proposed, recommended, and original profit generated in percentage from the price item pricing and price assignments at the product level . It is calculated using the following formula:  Profitability % = ( Revenue - Cost)*100/ Revenue
Profit Variation (%)	Displays the difference of profit in percentage generated from the original and the proposed price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit

**Note:**

The **Product Financial Summary** sections appears in the **Simulation Details** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** used for defining the deal.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available above the financial summary table.

- **Customer Hierarchy** - Indicates the main customer and its associated accounts as well as the child persons and its accounts that are associated with the main customer. It also enables you to do the following:

- View and edit the pricing and commitments at the person and account level
- View the revenue variation from the proposed and original pricing and commitments
- View the proposed price lists of a person or account
- Assign proposed price list to a person or account
- View the enrolled products of an account
- Enroll accounts for a product
- View the original price list of a person or account
- View the original enrolled products for an account
- View the proposed or the original revenue and cost generated at the person an account level.

The **Customer Hierarchy** section contains the following columns:

Column Name	Column Description
Person Name	Indicates the main customer and its related persons and accounts.
Division	Indicates the division to which the main customer and it related persons and accounts are associated.
Pricing and Commitments	On clicking the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to a person or account in the hierarchy, the <b>Pricing and Commitments</b> screen appears where you can view and edit the pricing and commitments of the price items for the respective person or account.
	<b>Note:</b> You cannot edit the pricing or commitments of the price items if the deal has reached the <b>Finalized</b> status.
Status	Indicates the approval status of the price item pricing and price assignments for the respective person or account.
Revenue Variation (%)	Displays the average revenue generated from a customer or account in percentage. It is calculated using the following formula:  Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/Original Revenue.
Price List Assignment	On clicking the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to a person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view and assign proposed price list to the respective person or account.
	<b>Note:</b> You cannot assign proposed price list to the person or account if the deal has reached the <b>Finalized</b> status.
Product Enrollment	On clicking the <b>Edit</b> (✎) icon in the <b>Product Enrollment</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view or enroll the respective account or accounts of the customer for a product. You can also view a list of recommended products for which you want to enroll the account or accounts of the customer. The recommended products appear in the <b>Product Enrollment</b> screen when you add products in the <b>Recommended Products</b> section while defining a deal.
	<b>Note:</b> You cannot enroll an account for a product if the deal has reached the <b>Finalized</b> status.
Price Item Group Selection	On clicking the <b>Edit</b> (✎) icon in the <b>Price Item Group Selection</b> column corresponding to the main person in the hierarchy, the <b>Select Price Item Group</b>

Column Name	Column Description
	screen appears where you can select and/or deselect the price items and/or hierarchy entities based on which you want to simulate the deal.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the proposed price item pricing and commitments.
Cost	Indicates the sum of the proposed costs from all accounts under the customer.
	<b>Note:</b> If the person is a parent customer, then the sum of the proposed costs of all the child customers is considered.
Pricelist	On clicking the <b>View</b> (  ) icon in the <b>Price List</b> column corresponding to the person or account in the hierarchy, the <b>Price List Assignment</b> screen appears where you can view the original price list assigned to the respective person or account.
Product	On clicking the <b>Edit</b> (  ) icon in the <b>Product</b> column corresponding to the person or account in the hierarchy, the <b>Product Enrollment</b> screen appears where you can view the products to which the account is already enrolled.
Revenue	Indicates the revenue generated by the corresponding person or account in the hierarchy through the original price item pricing and commitments.
Cost	Indicates the sum of the original costs from all accounts under the customer.
	<b>Note:</b> If the person is a parent customer, then the sum of the original costs of all the child customers is considered.

**Note:** The system also considers the prospect persons and prospect accounts associated with the main customer along with the child and grandchild persons and their accounts in the customer hierarchy.

In addition, the **Simulation Details** zone contains the following buttons:

Button Name	Button Description
Deal Pricing and Commitments	Used to define the consolidated pricing and commitments for the customers or accounts in a deal.
Simulate Deal	Used to perform different types of simulation based on the pricing and commitments of the price item to determine the best price that can be offered to the clients as per their requirements.
Check Limits	Used to execute the price item ceil and floor validation for an approver as per the limits set on the price item screen.
	<b>Note:</b> The <b>Check Limits</b> is run only for the price items which are in the <b>Pending for Approval</b> or <b>Error</b> status after the <b>Pricing Simulation</b> is executed. The <b>Check Limits</b> button is activated when the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> using which the deal is created.
Send Deal for Approval	Used to move the deal from the current role to the next role of the next level in the approval hierarchy for approval.

Button Name	Button Description
	<p><b>Note:</b></p> <p>On clicking the <b>Send Deal for Approval</b> button, a To Do notification is created for the users of the next level to indicate that approval of the deal is required.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p> <p>This button is activated after <b>Pricing Simulation</b> is completed for the deal and if the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Approve Deal	<p>Used to approve the deal. To approve a deal the following conditions should be met:</p> <ul style="list-style-type: none"> <li>• All the price items should be in the <b>Approved</b> status if the <b>Price Item Approval Required</b> option is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the division level approvals must be completed if the <b>Division Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• All the product level approvals must be completed if the <b>Product Level Approval Required</b> field is set to <b>Yes</b> in the <b>Deal Type</b> used for creating the deal.</li> <li>• The deal should be in the <b>Ready for Approval</b> status for the approver to initiate the deal approval process.</li> </ul> <p><b>Note:</b></p> <p>The <b>Approve Deal</b> button is activated only when the deal is in the <b>Ready for Approval</b> status and the <b>Approve Deal</b> option is set to <b>Yes</b> for the approver in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b>.</p>
Return to Submitter	<p>Used to move the deal from the current role to the previous role of the previous level in the approval hierarchy for approval. It is also used to send the deal to the relationship manager for approval if you have recommended a new pricing for the price item.</p> <p><b>Note:</b></p> <p>On clicking the <b>Return to Submitter</b> button, a To Do notification is created for the users of the previous level to indicate that the deal is returned for approval.</p> <p>A To Do is also created for the creator (i.e. the Relationship Manager) of the deal to indicate that the ownership of the deal has changed.</p>
Finalize Deal	<p>Used to finalize the deal so that it is ready to be presented to the customer for approval.</p> <p><b>Note:</b> This button is activated when the deal is in the <b>Approved</b> status.</p> <p><b>Tip:</b> You can also finalize a deal by clicking the <b>Finalize</b> (  ) icon in the <b>Finalize Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p>
Accept Deal	Used to accept the deal in the system after receiving confirmation of acceptance from the customer.

Button Name	Button Description
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also accept a deal by clicking the <b>Accept</b> (✓) icon in the <b>Accept Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Reject Deal	Used to reject the deal in the system after receiving confirmation of rejection from the customer.
	<b>Note:</b> This button is activated only when the deal is in the <b>Finalized</b> status.
	<b>Tip:</b> You can also reject a deal by clicking the <b>Reject</b> (✗) icon in the <b>Reject Deal</b> column corresponding to the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.
Create Deal Version	Used to create a deal version for the existing deal to optimize the deal pricing process and to make better pricing decisions.
	<b>Note:</b> You can add a new deal version to a deal even if the version of any deal version of a deal is in the <b>Finalized</b> status and the status of the deal is <b>Pending for Approval</b> or <b>Approved</b> .
Discard Deal	Used to discard the deal.
	<b>Note:</b> You cannot discard a deal if it has reached the <b>Finalized</b> status.
Print Deal	Used to extract relevant information about the deal in the pdf or excel format which is published either to the customer for receiving approvals or for internal reviews and validations.
Apply Back	Used to activate the proposed pricelist assignments, overridden pricing, and product enrollments for the existing customer or account in the system.
Previous	Used to view information about the previous status of the deal.

## Searching for an Entity

### Prerequisites

To search for an entity, you should have:

- Entities (i.e. customers, accounts, and prospect persons) defined in the application

### Procedure

To search for an entity:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Dashboard**.  
The **Deal Dashboard** screen appears.
3. Click the **Create Deal** button in the page title area of the **Deal Dashboard** screen.  
The **Deal Information** screen appears.
4. Enter the search criteria in the **Search Entity** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of entities (i.e. customers, accounts, or prospect persons) that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Recommending a Product for a Deal

**Prerequisites**

To recommend a product for a deal, you should have:

- Products defined in the application

**Procedure**

To recommend a product for a deal:

1. Ensure that the **Product** section is expanded in the **Deal** zone when you are defining a *deal*.

The **Product** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to indicate the product that you want to recommend for the deal.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Product Search</b> window appears.  On specifying the product, the description of the product appears corresponding to the <b>Product</b> field.	

**Note:**

The system automatically derives recommended products for the deal when the questionnaire contains questions where the question applicability is set to **Package and Product Reference**.

The system derives the recommended products from the reference deals. It only considers automatically recommended products of the reference deals and not manually recommended products of the reference deals.

- 2. Enter the required details in the **Product** section.
- 3. If you want to recommend more than one product for the deal, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a recommended product from the deal, click the **Delete (🗑)** icon corresponding to the product.

- 4. Click **Save**.  
The products is recommended for the deal.

**Defining a Characteristic for a Deal**

**Prerequisites**

To define a characteristic for a deal, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deal**)

**Procedure**

To define a characteristic for a deal:

- 1. Ensure that the **Characteristics** section is expanded in the **Deal** zone when you are defining a deal.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deal.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the deal.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deal</b> .	<b>Note:</b> This field is required while defining a characteristic for the deal.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a characteristic for the deal.

- 2. Enter the required details in the **Characteristics** section.
- 3. If you want to define more than one characteristic for the deal, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a characteristic from the deal, click the **Delete** (🗑) icon corresponding to the characteristic.

- 4. Click **Save**.  
The characteristic is defined for the deal.

**Answering a Questionnaire for a Deal**

**Procedure**

To answer a questionnaire for a deal:

- 1. Ensure that the **Questionnaire** zone is expanded in the **Deal Information** screen.  
A list of questions appear in the **Questionnaire** zone if the **Question Display Order** is set to **Sequence Based** in the **Questionnaire Template** associated with the deal type. Whereas, if the **Question Display Order** is set to **Rule Based** in the **Questionnaire Template** associated with the deal type, the questions appear based on the answer provided for the previous question.
- 2. Click the **Previous** (⏮) or **Next** (⏭) icons to navigate through the questions or question sets of a rule based or sequence based questionnaire respectively.
- 3. Answer the questions as per the **Answer Type** set for the questions in the **Questionnaire Template**.
- 4. Click the **Next** button.  
A list of reference customers appear based on the answers provided in the questionnaire.

# Skiping Questionnaire for a Deal

**Procedure**

To skip questionnaire for a deal:

- 1. Ensure that the **Questionnaire** zone is expanded in the **Deal Information** screen.
- 2. Click the **Skip Questionnaire** button in the top right corner of the **Questionnaire** zone.  
A message appears confirming whether you want to skip the questionnaire.
- 3. Click **OK**.  
The questionnaire is skipped.

**Tip:** Alternatively, you can skip a questionnaire by clicking the check box corresponding to the **Skip Questionnaire** field in the **Deal** zone of the **Deal Information** screen while defining a deal.

# Searching for a Reference

**Prerequisites**

To search for a reference, you should have:

- Reference customers and reference deals defined in the application
- Pricing and commitments defined for the references

**Procedure**

To search for a reference:

- 1. Ensure that the **Select Reference** zone is expanded in the **Deal Information** screen when you are searching a reference for a deal.

**Note:** The **Select Reference** zone appears when you do not select the check box corresponding to the **Skip Reference** option in the **Deal** zone of the **Deal Information** screen while defining a deal.

- 2. Enter the search criteria in the **Select Reference** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- 3. Click **Search**.  
A list of reference customers or reference deals that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Selecting a Reference for a Deal

### Prerequisites

To select a reference for a deal, you should have:

- Reference customers and reference deals defined in the application
- Pricing and commitments defined for the references

### Procedure

To select a reference for a deal:

1. Search for the reference in the **Select Reference** zone of the **Deal Information** screen.
2. Click the **Broadcast** (📡) icon corresponding to the deal in the **Search Results** section of the **Select Reference** zone whose pricing and commitments you want to use as a reference for defining the deal.  
The **Reference Details** zone appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Displays the name of the primary person for whom the customer or deal is defined in the system whose pricing or commitments you want to use as a reference for defining the deal.	Not applicable
Reference Deal	Displays the concatenated string of deal information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal.	Not applicable
	<b>Note:</b> This field appears when you select a deal as a reference.	
Reference Deal Version	Displays the concatenated string of deal version information separated by a comma (,) whose pricing or commitments you want to use as a reference for defining the deal.	Not applicable
	<b>Note:</b> This field appears when you are copying reference from a deal which is created for a prospect person.	
Division	Indicates the division to which the reference customer or deal belongs.	Not applicable
Customer Segment	Indicates the business component using which the reference customer or deal is defined in the system.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Customer Tier	Indicates the customer tier of the customer segment using which the reference customer or deal is defined in the system.	Not applicable
Refer Usage	Used to indicate whether you want to copy commitments from the SQI-based billable charges of the reference customer or deal.	Yes
Refer Pricing	Used to indicate whether you want to copy the price list assignments and price assignments of the reference customer or deal.	Yes

- 3. Enter the required details in the **Reference Details** zone.
- 4. Click **Save**.  
The reference is selected for the deal.

## Simulating a Deal

### Procedure

To simulate a deal:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal that you want to simulate.  
The **Deal Information** screen appears.
3. Click the **Simulate Deal** button in the **Deal Information** zone.  
A message appears confirming the simulation of the deal.
4. Click **OK**.  
The deal is simulated.

**Note:**

A deal can be simulated only when it is in the **Pending Simulation** status.

## Submitting a Deal for an Approval

**Procedure**

To submit a deal for an approval:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal that you want to send for an approval.  
The **Deal Information** screen appears.
3. Click the **Send Deal for Approval** button in the **Deal Information** zone.  
A message appears confirming that the deal is successfully submitted for approval to the next approval level.
4. Click **OK**.  
The deal is submitted for an approval.

**Note:**

A deal can be submitted for an approval only when it is in the **Simulated** status.

Only the creator (i.e. the relationship manager) can submit a deal for an approval.

## Approving a Deal

**Procedure**

To approve a deal:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.

**Tip:** You can also click the link in the **Deal Information** column for the deal that is assigned to you for an approval in the **Deal To Do** zone.

- 2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal that you want to approve.  
The **Deal Information** screen appears.
- 3. Click the **Approve Deal** button in the **Deal Information** zone.  
A message appears confirming the deal is approved successfully.
- 4. Click **OK**.  
The deal is approved.

**Note:**  
A deal can be approved only when it is in the **Pending For Approval** or **Simulated** status.  
A user can approve a deal when the **Approve Deal** field is set to **Yes** for the user in the **Approval Hierarchy** section of the **Deal Approval Profile** zone.

**Requesting the Submitter to Resubmit the Deal for Approval**

Prerequisites

To request the submitter to resubmit the deal for approval you should have:

- Reasons defined in the **Approval Workflow Reason** screen where the **Reason Category** is set to **Deal Return**

Procedure

To request the submitter to resubmit the deal for approval:

- 1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.

**Tip:** You can also click the link in the **Deal Information** column for the deal that is assigned to you for an approval in the **Deal To Do** zone.

- 2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal that you want to resubmit to the submitter for approval.  
The **Deal Information** screen appears.
- 3. Click the **Return to Submitter** button in the **Deal Information** zone.  
The **Deal Approval Return To Submitter** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal ID	Displays the deal that you want to request the submitter to resubmit for approval.	Not applicable
Model ID	Displays the deal version that you want to request the submitter to resubmit for approval.	Not applicable
Deal Return Reason	Lists the reasons why you want the submitter to resubmit the deal for approval.	Yes
	<b>Note:</b> This list includes only those values which are defined in the <b>Approval Workflow Reason</b> screen where the <b>Reason Category</b> is set to <b>Deal Return</b> .	
Send Deal Back with Approvals	Used to indicate whether you want to send the deal or the deal version to the submitter with the already approved pricing and commitments or not. The valid values are: <ul style="list-style-type: none"><li>No</li><li>Yes</li></ul>	Yes
Comments	Used to specify additional information about sending the deal to the submitter for resubmitting the deal for an approval.	Yes

4. Enter the required details in the **Deal Approval Return To Submitter** window.
5. Click **Save**.  
A message appears confirming that the deal is sent to the submitter for resubmitting the deal for approval.
6. Click **OK**.  
The deal is sent to the submitter to resubmit the deal for approval.

## Extracting a Deal in the PDF or Excel Format

### Procedure

To extract a deal in the pdf or excel format:

1. Do either of the following:

If you want to...	Then...
Extract a deal in the PDF or Excel format from the Deal Dashboard screen	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>
	<p><b>Note:</b> If the deal has multiple versions, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal version in the <b>Deal Versions</b> zone.</p>
Extract a deal in the PDF or Excel format from the Deal Information screen	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the link in the <b>Deal Information</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>
	<div><p><b>Note:</b> If you want to extract the deal version in the pdf of excel format, click the link in the <b>Deal Version Information</b> column corresponding to the deal version from the <b>Deal Versions</b> zone.</p></div> <p>The <b>Deal Information</b> screen appears.</p> <p>c. In the <b>Deal Information</b> zone, click the <b>Print Deal</b> button.</p>
Extract a deal in the PDF or Excel format from the Deal Approver Dashboard screen	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Approver Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Print</b> (  ) icon in the <b>Print Deal</b> column corresponding to the deal which you want to extract in the pdf or excel format.</p>

The **Deal Extraction** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	Used to specify the format in which you want to extract the deal information. The valid values are: <ul style="list-style-type: none"><li>Excel</li></ul>	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>PDF</li> </ul>	<b>Note:</b> This field is required while extracting a deal in the pdf or excel format.
Extract Type	<p>Used to indicate the type of deal information that you want to extract for publishing. The valid values are:</p> <ul style="list-style-type: none"> <li><b>External</b> - Used to extract deal information which is published to the customer for approval. It contains the following details:             <ol style="list-style-type: none"> <li>Extraction information i.e. the extraction date-time and the user who has done the extraction.</li> <li>Details of the filters selected for extraction.</li> <li>Deal details such as the deal creator user ID, deal creation date and time, deal ID, deal type, prospect/customer, currency, deal status etc.</li> <li>Customer hierarchy, accounts and price item details as per the filter option selected in the <b>Deal Extraction</b> screen.</li> <li>Price item details such as the original price with assignment level, commitments, negotiated price with assignment level, approval status, etc.</li> <li>Terms and conditions.</li> </ol> </li> </ul> <div> <b>Note:</b>            The <b>External</b> extract type controls the extraction of certain data which may or may not be published to the customer.             You can select the <b>External</b> option from the <b>Extract Type</b> list when the deal is in the <b>Finalized, Customer Accepted, Rejected, Fully Orchestrated, Pending for Review, or Closed</b> status.         </div>	Yes (Conditional)  <b>Note:</b> This field is required while extracting a deal in the pdf or excel format.
	<ul style="list-style-type: none"> <li><b>Internal</b> - Used to extract deal information which is published for internal reviews and validations. It contains the following details:             <ol style="list-style-type: none"> <li>Deal summary details and Division summary details with the applicable cost, profitability, revenue and other calculations.</li> <li>Price item details such as the cost and revenue details etc.</li> <li>Adhoc revenue and cost entries.</li> </ol> </li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)
	<div><b>Note:</b> By default, the <b>Internal</b> option is selected from the <b>Extract Type</b> list for deals which are not in the <b>Finalized, Customer Accepted, Rejected, Fully Orchestrated, Pending for Review, or Closed</b> status.  The list includes only those values which are present in the <b>DEAL_EXTRACT_TYPE_FLG</b> lookup field.</div>	
Extract Filter	Used to indicate the price item information that you want to extract in the pdf or excel format. The valid values are: <ul style="list-style-type: none"><li>• Account</li><li>• Additional Filter Criteria</li><li>• All</li><li>• Customer</li><li>• Division</li><li>• Only Hierarchy</li><li>• Price Assignment Level</li><li>• Price Item</li><li>• Price Item Group</li></ul>	Yes (Conditional)
	<div><b>Note:</b> The list includes only those values which are present in the <b>DEAL_EXTRACT_FILTER_FLG</b> lookup field.</div>	<div><b>Note:</b> This field is required while extracting a deal in the pdf or excel format.</div>

In addition, the **Deal Extraction** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the persons or prospects account for which you want to extract the price item pricing details.	Yes (Conditional)
	<div><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. **Defining a Deal Version**

Prerequisites

To define a deal version, you should have:

- Deal for which you want to define a deal version defined in the application

Procedure

To define a deal version:

- 1. Search for the deal for which you want to define a deal version in the **Deal Dashboard** screen.
- 2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal for which you want to define a deal version.  
The **Deal Information** screen appears.

3. In the **Deal Information** zone, click the **Create Deal Version** button.

The **Deal Version** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deal Information	Displays a concatenated string of information about the deal separated by a comma (,) for which you want to define a deal version.	Not applicable
Deal Version Description	Used to specify the description for the deal version	Yes
Deal Version Creation Method	<div>Used to indicate the method using which you want to create the deal version. The valid values are:<ul style="list-style-type: none"><li><b>Copy From Current Version With Changes</b> - Used to indicate that you want to copy the customer hierarchy and pricing and commitment details from the current deal version to the new deal version.</li><li><b>Fetch Latest Hierarchy</b> - Used to indicate that you want to derive the latest customer hierarchy from the system.</li></ul></div> <div><b>Note:</b>  In this case, you will have to select the price items, assign the required price lists to the entities, override or edit the required proposed pricing, and add commitments from scratch in the new deal version.  Also, the system will include all the prospect persons and accounts associated with the customer in the entity hierarchy of the deal version.</div>	Yes

4. Enter the required details in the **Deal Version** screen.

5. Click **Save**.

The deal version is created and the **Deal Information** screen appears with the details of the deal version updated in the **Deal Information** zone.

**Note:** Earlier, when any deal version of a deal was in the **Finalized** status and deal was in the **Pending for Approval** or **Approved** status, you were not able to add a new deal version to the deal. Now, in such scenarios, you can add a new deal version to the deal. In addition, after adding a new deal version to the deal, the deal status would be set to the highest deal version status.

## Downloading the Pricing and Commitments of a Deal Version

### Prerequisites

To download the pricing and commitments of a deal version, you should have:

- The report code using which you want to extract the data in the **Excel** format specified in the **Deal Pricing Download** option type of the **C1-Deal** feature configuration
- Required access to the **C1\_DEALDWLDUPLD** application service

### Procedure

To download the pricing and commitments of a deal version:

1. Search for the deal version whose pricing and commitments you want to download in the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal version whose pricing and commitments you want to download.  
The **Deal Information** screen appears.
3. Click the **Download** button in the **Deal Information** zone.

The system extracts the pricing and commitments of the deal version in the Excel format and the web browser screen appears where the downloading process takes place.

4. Navigate to the path where the downloaded content is saved on your local machine.  
The pricing and commitments of the deal is downloaded in the Excel format on your local machine.

**Note:** The **Download** button is enabled for the user groups who have access to the **C1\_DEALDWLDUPLD** application service and where the **Access Mode** is set to **Change**.

## Uploading the Pricing and Commitments of a Deal Version

### Prerequisites

To upload the pricing and commitments of a deal version, you should have:

- The report code using which you want to extract the data in the **Excel** format specified in the **Deal Pricing Download** option type of the **C1-Deal** feature configuration
- Required access to the **C1\_DEALDWLDUPLD** application service

### Procedure

To upload the pricing and commitments of a deal version:

1. Search for the deal version in the **Deal Dashboard** screen whose pricing and commitments you want to upload in the system.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal version whose pricing and commitments you want to upload in the system.

The **Deal Information** screen appears.

3. Click the **Upload** button in the **Deal Information** zone.

The **Upload Deal Data File** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to upload the Excel format of the pricing and commitments data file in the system.	Yes
	<b>Note:</b> On clicking the <b>Choose File</b> button corresponding to this field, you can navigate to locate the file on your local machine.	

4. Select the required pricing and commitments file.

5. Click **Upload**.

The pricing and commitments of the deal version is uploaded in the system and the status of the deal is changed to **Pending Simulation**.

**Note:** The **Upload** button is enabled for the user groups who have access to the **C1\_DEALDWLDUPLD** application service and where the **Access Mode** is set to **Change**.

# Price Item Selection

The **Price Item Selection** screen enables you to select the price items which you want to offer in a deal. It contains the following zones:

- [Filters](#) on page 2942
- [Price Item Hierarchy](#) on page 2943
- [Additional Price Items](#) on page 2946

In addition, the **Price Item Selection** screen contains the following buttons:

Button Name	Button Description
Save	On clicking the <b>Save</b> button, the price item selection made in the price item hierarchy is saved.
Save and View Pricing and Commitments	On clicking the <b>Save and View Pricing and Commitments</b> button, the price item selection made in the price item hierarchy is saved and the <b>Pricing and Commitments</b> screen appears.
Back	Used to access the previous screen.

## Filters

The **Filters** zone enables you to search for price items in the customer hierarchy using various filter criteria. It contains the following fields:

Field Name	Field Description
Hierarchy Entity	Used to search for price items which are associated with a hierarchy entity in an entity hierarchy relationship.
	<b>Note:</b> It is a multi-combo box field which enables you to select one or more hierarchy entities from the list. The list includes all those hierarchy entities to which the price items assigned in the customer's hierarchy are associated.
Price Item	Used to search for a particular price item.
	<b>Note:</b> It is a multi-combo box field which enables you to select one or more price items from the list. If you select a hierarchy entity from the <b>Hierarchy Entity</b> field, the list includes all those price items which are associated the selected hierarchy entity. However, if you do not select a hierarchy entity from the <b>Hierarchy Entity</b> field, the list includes all price items which are assigned in the customer's hierarchy.
Pricing Parameters	Used to search for price items for which the pricing is defined using a particular parameter and parameter value combination.
	<b>Note:</b> It is a multi-combo box field which enables you to select one or more pricing parameters from the list. If you select a price item from the <b>Price Item</b> field, the list includes all the pricing parameters using which the pricing is defined for the selected price item.
Assignment Level	Used to search for price items whose price assignment is defined at a particular level. The valid values are:
	<ul style="list-style-type: none"><li>• <b>Account Agreed</b> - Used to indicate whether the price item pricing is agreed for the account.</li><li>• <b>Account Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li><li>• <b>Account Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the account.</li><li>• <b>Bundle Pricing</b> - Used to indicate whether the price item pricing is defined for the bundle which is available for the retail banking.</li><li>• <b>Customer Agreed</b> - Used to indicate whether the price item pricing is agreed for the customer in the customer hierarchy.</li></ul>

Field Name	Field Description
	<ul style="list-style-type: none"><li>• <b>Customer Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li><li>• <b>Customer Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the customer.</li><li>• <b>Default Price List</b> - Used to indicate whether the price item pricing defined in the price list is available in the default price list.</li><li>• <b>Global Price List</b> - Used to indicate whether the price item pricing defined in the price list is available in the global price list.</li><li>• <b>Market Product Pricing</b> - Used to indicate whether the price item pricing is defined for the market product which is available for the retail banking.</li><li>• <b>Offer Pricing</b> - Used to indicate whether the price item pricing is defined for the offer which is available for the retail banking.</li><li>• <b>Parent Customer Agreed</b> - Used to indicate whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li><li>• <b>Parent Customer Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li><li>• <b>Parent Customer Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the parent customer.</li><li>• <b>Price List</b> - Used to indicate whether the price item pricing is defined in the price list.</li><li>• <b>Product Pricing</b> - Used to indicate whether the price item pricing defined in the price list is available for the product pricing.</li></ul>
Advanced Filter	Used to search for price items based on the following two options: <ul style="list-style-type: none"><li>• <b>Selected Price Items</b> - Used to search for price items which are selected for the simulation in the deal.</li><li>• <b>Price Items with Usage</b> - Used to search for price items for which charges exist for the entity.</li></ul>

In addition, the **Filters** zone contains the following buttons:

Button Name	Button Description
Clear All	Used to clear all the filter criteria.
Apply	Used to filter the data based on the specified criteria.

## Price Item Hierarchy

The **Price Item Hierarchy** zone displays the price items and the entity hierarchies to which they are associated. It contains the following columns:

Column Name	Column Description
Hierarchy Entity/Price Item	Displays the price items, root level hierarchy entities, and non-root level hierarchy entities in the price item hierarchy which you can offer in the deal.

Column Name	Column Description
	<p><b>Note:</b></p> <p>A check box appears corresponding to the price items and the hierarchy entities which you can select or deselect to include or exclude the price items or the hierarchy entities respectively from the deal.</p> <p>If the deal is created for an existing customer, the system, by default, selects the following price items:</p> <ul style="list-style-type: none"> <li>• Whose pricing is directly assigned to the customer</li> <li>• Whose pricing is inherited by the customer</li> </ul> <p>If the deal is created for an account, the system, by default, considers the following price items:</p> <ul style="list-style-type: none"> <li>• Whose pricing is directly assigned to the account</li> <li>• Whose pricing is inherited by the account</li> </ul> <p>If required, you can select or deselect the price item by clicking the check box corresponding to the price item in the price item hierarchy.</p> <p>Only the selected price items are considered in the deal for simulation.</p> <p>The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence. If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string.</p> <p>Similarly, the system sorts the hierarchy entities and price items in the price item hierarchy when the deal information is extracted in the Excel or PDF format for internal or external use.</p>
Pricing Parameters	<p>Displays the concatenated string of information about the parameters using which the pricing is defined for the price item.</p> <p><b>Note:</b> All price assignments of the price item are sorted in the alphabetical order of the pricing information in the <b>Pricing Parameter</b> column.</p>
Assignment Level	<p>Displays the level at which the pricing is defined for the price item. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"> <li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li> <li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li> <li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li> <li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li> <li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li> <li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li> </ul>

In addition, the header area of the **Price Item Hierarchy** zone contains the following buttons:

Button Name	Button Description
Previous	On clicking the <b>Previous</b> button, the previous page appears in the <b>Price Item Hierarchy</b> zone.
	<b>Note:</b> The <b>Previous</b> button appears only when the <b>C1-DPIG-ELIG</b> algorithm is attached to the <b>Price Item Group List Filter</b> system event in the deal type used for creating the deal.
Next	On clicking the <b>Next</b> button, the next page appears in the <b>Price Item Hierarchy</b> zone.
	<b>Note:</b> The <b>Next</b> button appears only when the <b>C1-DPIG-ELIG</b> algorithm is attached to the <b>Price Item Group List Filter</b> system event in the deal type used for creating the deal.
Clear Filter	On clicking the <b>Clear Filter</b> button, the filter criteria for selecting the price item is cleared and the entire price item hierarchy appears in the <b>Price Item Hierarchy</b> column.
Expand All	On clicking the <b>Expand All</b> button, all nodes in the price item hierarchy are expanded at once.
Collapse All	On clicking the <b>Collapse All</b> button, all nodes in the price item hierarchy are collapsed at once.
Select All	On clicking the <b>Select All</b> button, all the price items and the hierarchy entities in the price item hierarchy are selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is selected.

Button Name	Button Description
De-Select All	On clicking the <b>De-Select All</b> button, all the price items and the hierarchy entities in the price item hierarchy are de-selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is unchecked.

**Note:** The width of the columns in the **Price Item Hierarchy** zone can now be resized and adjusted based on the requirement.

## Additional Price Items

The **Additional Price Items** zone lists the additional price items that are associated to the entity for which the deal is created. It contains the following columns:

Column Name	Column Description
Hierarchy Entity/Price Item	Displays the additional price items with their root level and non-root level hierarchy entities which you can offer in the deal.
	<b>Note:</b> A check box appears corresponding to the price items and the hierarchy entities which you can select or deselect to include or exclude the additional price items respectively from the deal.  Only the selected price items are considered in the deal for simulation.
Pricing Parameters	Displays the concatenated string of information about the parameters using which the pricing is defined for the price item.
	<b>Note:</b> All price assignments of the price item are sorted in the alphabetical order of the pricing information in the <b>Pricing Parameter</b> column.
Assignment Level	Displays the level at which the pricing is defined for the price item. The valid values are: <ul style="list-style-type: none"><li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li><li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li></ul>

**Note:** The width of the columns in the **Additional Price Items** zone can be resized and adjusted based on the requirement.

## Pricing and Commitments

The **Pricing and Commitments** screen allows you to view the existing and proposed price items pricing and commitments for the person or account in the customer hierarchy of a deal. It also allows you to do the following:

- View the pass through charge information of an account
- View the product financial summary of a person or an account
- Filter the pricing of a person or an account

The **Pricing and Commitments** screen contains the following sections:

- [Pass Through Charge Information](#) on page 2947
- [Product Financial Summary](#) on page 2903
- [Filters](#) on page 2950
- [Pricing and Commitments](#) on page 2950
-

## Pass Through Charge Information

The **Pass Through Charge Information** section allows you to view the pass through billable charges of an account while calculating the original revenue of the account and customer in a deal. It contains the following columns:

Field Name	Field Description
Price Item	Displays the price item for which you want to view the pass through billable charge for an account in the customer hierarchy.
Amount in Deal Currency	Displays the pass through billable charge in the deal currency.
Amount in Account Currency	Displays the pass through billable charge in the account's invoice currency.

## Product Financial Summary

The **Product Financial Summary** section displays the financial summary at the product level. It contains the following columns:

Column Name	Column Description
Product	Indicates the product whose financial summary is displayed.
Division	Indicates the division to which the product belongs.
Approval Status	Indicates the current approval status of the financial summary at the product level.
Revenue	Displays the revenue generated from the proposed, original, standard, and recommended price item pricing and commitments at the product level.

Column Name	Column Description
	<p><b>Note:</b></p> <p>The revenue generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The revenue generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.</p>
Cost	<p>Displays the proposed, original, standard, and recommended cost calculated at the product level.</p> <p><b>Note:</b></p> <p>The cost calculated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The cost calculated from the recommended pricing appears only when there is a recommended pricing defined for the price item.</p> <p>The cost includes the total price item cost and the adhoc cost.</p>
Profit	<p>Displays the profit generated from the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:</p> $\text{Profit} = \text{Revenue} - \text{Cost}$ <p><b>Note:</b></p> <p>The profit generated from the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The profit generated from the recommended pricing appears only when there is a recommended pricing defined for the price item.</p>
Profitability (%)	<p>Displays the profit percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:</p> $\text{Profitability \%} = (\text{Revenue} - \text{Cost}) * 100 / \text{Revenue}$ <p><b>Note:</b></p> <p>The profitability calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.</p> <p>The profitability calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.</p>
Revenue Variation (%)	<p>Displays the difference of revenue variation percentage calculated for the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:</p>

Column Name	Column Description
	Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100/ Original Revenue
	<b>Note:</b>  The revenue variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system.  The revenue variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.  The <b>Green Arrow</b> (  ) or the <b>Red Arrow</b> (  ) corresponding to the revenue variation (%) indicates whether there is an increase or decrease in the revenue variation (%) respectively.
Profit Variation (%)	Displays the difference of profit variation percentage calculated from the proposed, original, standard, and recommended price item pricing and commitments at the product level. It is calculated using the following formula:  Profit Variation (%) = (Proposed Profit - Original Profit)*100/ Original Profit
	<b>Note:</b>  The profit variation calculated for the standard pricing appears only when the <b>Standard Pricing Comparison</b> field is set to <b>Yes</b> in the deal type using which the deal is created in the system. It is calculated using the following formula:  Standard Pricing Profit Variation (%) = (Standard Profit - Original Profit)*100/ Original Profit  The profit variation calculated for the recommended pricing appears only when there is a recommended pricing defined for the price item.  The <b>Green Arrow</b> (  ) or the <b>Red Arrow</b> (  ) corresponding to the profit variation (%) indicates whether there is an increase or decrease in the profit variation (%) respectively.

**Note:**

The system highlights the cells of the product financial summary in green color if the proposed statistic is within the range of the deal creator or the approver. Whereas, the system highlights the cells of the product financial summary in red color if the proposed statistic is not within the range of the deal creator or the approver.

The **Product Financial Summary** sections appears in the **Deal Information** zone when the **Product Level Approval Required** field is set to **Yes** in the **Deal Type** using which the deal is created in the system.

The data in the **Product Financial Summary** sections appears when the deal has reached the **Simulated** status.

By default, the product financial summary is displayed in the deal currency. You can view the product financial summary in the division currency by clicking the toggle switch towards **Division Currency** available in the header area of this section.

Deal Information zone	<a href="#">Deal Information</a> on page 2890

## Filters

The **Filters** section allows you to filter the pricing and commitments of a person or account in the customer hierarchy using various criteria. It contains the following fields in a grid:

Field Name	Field Description
Search	Used to search for the pricing and commitments of a price item associated with a person or account using a specific search criteria.
Effective Date	Used to search for price items pricing whose effective date is later than the deal start date.

In addition, the **Filters** section contains the following buttons:

Button Name	Button Description
Search	Used to search for price item pricing as per the criteria specified in the <b>Search</b> or <b>Effective Date</b> fields.
Show All Pricing	Used to show all the pricing and commitments of the price items associated with the person or account in the customer hierarchy.
Show Customer or Account Level Pricing	Used to filter customer agreed or account agreed price item pricing for the person or account in the customer hierarchy.
Show Changed Data	Used to display the following for the existing customer, account, or prospect: <ul style="list-style-type: none"><li>• Agreed pricing of a price item assigned to the customer, account, or prospect in the deal</li><li>• Seasonal pricing of a price item assigned to the customer, account, or prospect in the deal</li><li>• Proposed pricing of a price item from the price list with higher priority when the pricing is inherited from two or more price lists assigned to the customer, account, or prospect</li><li>• Proposed pricing of a price item which is edited in the deal</li><li>• Price item pricing whose default or reference commitments are edited in the deal</li><li>• Price item pricing for which commitments are added in the deal from the Pricing and Commitments screen</li><li>• Price item pricing where there is difference between original and proposed cost</li><li>• Price item pricing where there is difference between original and proposed average price</li><li>• Price item pricing where there is difference between original and proposed revenue</li></ul>

### Related Topics

Pricing and Commitments screen	<a href="#">Pricing and Commitments</a> on page 2946

## Pricing and Commitments

The **Pricing and Commitments** section allows you to do the following:

- View the original and proposed commitments of a price item
- View the original and proposed pricing of a price item
- Viewing the original pricing and commitments of a person or an account
- View the pricing and commitments of a person in the division currency
- View the pricing and commitments of an account in the account's invoice currency
- Approve pricing of a price item
- Submit a price item for approval
- Recommend a new pricing for a price item
- View the deal-specific terms and conditions of a price item or a hierarchy entity
- Edit the deal-specific terms and conditions of a price item or a hierarchy entity

The **Pricing and Commitments** section contains the following sub-sections:

- **Symbol Legends** - Used to differentiate between the original, proposed, recommended, and changed pricing and commitments of the price item. It contains the following color codes:

Symbol Name	Symbol Description
 PROJECTED	Indicates the proposed price item pricing and commitments.
 RECOMMENDED	Indicates the recommended price item pricing and commitments.
 ORIGINAL	Indicates the original price item pricing and commitments.
 CHANGED	Indicates the changed price item pricing and commitments.

- **Price Item Hierarchy** - Lists the price items and its pricing and commitments information along with the price item hierarchy associated with the person or account. It contains the following columns:

Column Name	Column Description
Price Item Hierarchy	Displays the price item, non-root level hierarchy entity, and root level hierarchy entity associated with the person or account.
	<b>Note:</b> The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence.  If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string.  Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string.
Parameters	Indicates the parameters using which the pricing for the price item is defined.
Start Date	Displays the date from when the price item pricing is effective.

Column Name	Column Description
	<p><b>Note:</b></p> <p>This column appears only when you define a seasonal pricing for the price item.</p> <p>The <b>Expand or Collapse</b> (▸) icon appears in the <b>Start Date</b> column corresponding to the proposed pricing of the price item.</p> <p>On clicking the <b>Expand or Collapse</b> icon, you can view the row for seasonal pricing of the price item.</p>
End Date	<p>Displays the date till when the price item pricing is effective.</p> <p><b>Note:</b> This column appears only when you define a seasonal pricing for the price item.</p>
Pricing Information	<p>Displays the concatenated string of information about the proposed, original, recommended, and changed price item pricing separated by a comma (,).</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Pricing and Commitments</b> screen appears where you can view the details of the original and proposed price item pricing.</p> <p>The <b>Delete</b> (🗑) icon appears in the <b>Pricing Information</b> column corresponding to the proposed, seasonal, and recommended pricing of the price item. On clicking the <b>Delete</b> icon, you can delete the proposed, seasonal, and recommended pricing of the price item.</p> <p>The <b>Delete</b> icon appears corresponding to the proposed pricing only when its price assignment level is different from the price assignment level of the original pricing.</p> <p>The recommended pricing of the price item can only be deleted by the approver who has recommended the new price for the price item.</p> <p>The <b>Expand or Collapse</b> (▸) icon appears in the <b>Pricing Information</b> column corresponding to the proposed pricing of the price item.</p> <p>On clicking the <b>Expand or Collapse</b> icon, you can view the row for original pricing of the price item.</p> <p>You can also edit or override the proposed pricing of the price item through this screen.</p> <p>You can directly change the rate of a price item from this screen when there is only one price component in the pricing and the pricing is negotiable for the price item.</p>
Average Price	<p>Displays the average proposed, original, and recommended cost of the price item as per the proposed, original, and recommended commitments respectively. It is calculated using the following formula:</p> <p>Avg. Price = Proposed Revenue/Proposed Usage</p> <p>Avg. Price = Original Revenue/Original Usage</p>

Column Name	Column Description
	Avg. Price = Recommended Revenue/Recommended Usage
Volume	<p>On clicking the <b>Edit</b> (✎) icon corresponding to a price item, the <b>Pricing and Commitments</b> screen appears where you can view the original and proposed commitments of the price item. Whereas, on clicking the <b>View</b> icon (👁) corresponding to a hierarchy entity, the <b>Pricing and Commitments</b> screen appears where you can view the original and proposed commitments of the price item at the hierarchy entity level.</p> <p><b>Note:</b> You can directly change the proposed commitment of a price item when there is only one SQI used in the SQI-based billable charges.</p>
Revenue	Displays the proposed, original, and recommended revenue generated from the proposed, original, and recommended price item pricing and commitments respectively.
Revenue Variation (%)	<p>Displays the variation between the original, proposed, and recommended revenue in percentage generated from the original, proposed, and recommended pricing of the price item. It is calculated using the following formula:</p> $\text{Revenue Variation (\%)} = (\text{Proposed Revenue} - \text{Original Revenue}) * 100 / \text{Original Revenue}.$
Cost	Displays the proposed, original, and recommended cost of the price item based on the proposed, original, and recommended usage.
Price List Information	Indicates the price list from where the proposed and original pricing of the price item is derived for the person or account in the customer hierarchy.
Assignment Level	<p>Indicates the level at which the proposed and original pricing of the price item is defined in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> <li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"><li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li><li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li><li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li><li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li><li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li><li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li></ul>
Status	Indicates the current approval status of the price item pricing and commitments.
Approver	Indicates the user who has approved the price item pricing and commitments.
Terms and Conditions	On clicking the <b>Edit</b>  icon, the <b>Mapping Terms and Conditions</b> screen appears where you can view or delete the deal-specific terms and conditions associated with the price item.

**Note:**

In addition, a check box appears corresponding to the price item which is assigned to the user for approval.

By default, you can view the proposed and recommended pricing details of the price item in the price item hierarchy table. To view or hide the original pricing details of the price item, click the **Original Data** toggle switch available in the **Pricing and Commitments** section.

By default, the price item pricing details are displayed in the deal currency. You can view the price item pricing details in the division currency by clicking the **Currency** toggle switch available in the **Pricing and Commitments** section.

In addition, the **Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Send Price Items for Approval	On clicking the <b>Send Price Items for Approval</b> button, the status of the price item is changed to <b>Assigned to Price Item Manager</b> .
	<p><b>Note:</b> An approver can send a price item for approval when the following conditions are met:</p> <ul style="list-style-type: none"><li>• The price item is assigned to the approver for approval</li><li>• The <b>Propose Pricing</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li><li>• The <b>Submit Price Item for Approval</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li></ul>
Check Limits	On clicking the <b>Check Limits</b> button the system verifies whether the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.

Button Name	Button Description
	<p><b>Note:</b></p> <p>If the average price falls within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Approved</b>.</p> <p>If the average price does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Pending For Approval</b>.</p>

## Filtering the Pricing of a Person or an Account

**Procedure**

To filter the pricing of a person or an account:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.

- 2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose persons or accounts pricing you want to filter.  
The **Deal Information** screen appears.
- 3. Ensure that the **Customer Hierarchy** section is expanded in the **Simulation Details** zone.
- 4. Click the **Edit** (🔗) icon in the **Pricing and Commitments** column corresponding to the person or account whose pricing you want to filter.  
The **Pricing and Commitments** screen appears.
- 5. Ensure that the **Filters** section is expanded in the **Pricing and Commitments** screen.

The **Filters** section contains the following fields:

Field Name	Field Description
Search	Used to search for the pricing and commitments of a price item associated with a person or account using a specific search criteria.
Effective Date	Used to search for price items pricing whose effective date is later than the deal start date.

In addition, the **Filters** section contains the following buttons:

Button Name	Button Description
Search	Used to search for price item pricing as per the criteria specified in the <b>Search</b> or <b>Effective Date</b> fields.
Show All Pricing	Used to show all the pricing and commitments of the price items associated with the person or account in the customer hierarchy.
Show Customer or Account Level Pricing	Used to filter customer agreed or account agreed price item pricing for the person or account in the customer hierarchy.
Show Changed Data	Used to display the following for the existing customer, account, or prospect: <ul style="list-style-type: none"><li>• Agreed pricing of a price item assigned to the customer, account, or prospect in the deal</li><li>• Seasonal pricing of a price item assigned to the customer, account, or prospect in the deal</li><li>• Proposed pricing of a price item from the price list with higher priority when the pricing is inherited from two or more price lists assigned to the customer, account, or prospect</li><li>• Proposed pricing of a price item which is edited in the deal</li><li>• Price item pricing whose default or reference commitments are edited in the deal</li><li>• Price item pricing for which commitments are added in the deal from the Pricing and Commitments screen</li><li>• Price item pricing where there is difference between original and proposed cost</li><li>• Price item pricing where there is difference between original and proposed average price</li><li>• Price item pricing where there is difference between original and proposed revenue</li></ul>

- 6. Enter the required details in the **Filters** section.
- 7. Click **Search**.  
The pricing of the person or the account is filtered in the **Pricing and Commitments** section.

## Approving Pricing of a Price Item

### Procedure

To approve a price item in a deal:

1. In the **Simulation Details** zone, click the **Edit** (✎) icon in the **Pricing and Commitments** column corresponding to the person or account whose price item pricing you want to approve.  
The **Pricing and Commitments** screen appears.
2. In the **Pricing and Commitments** section, ensure that the **Price Item Hierarchy** sub-section is expanded when you are approving the pricing of a price item.
3. Click the check box corresponding to the price item that you want to approve for the deal.

#### Note:

The check box appears when the price item is assigned to the user for approval.  
You can select multiple price items at a time for approving.

The **Check Limits** button is activated.

- 4. Click the **Check Limits** button.  
A message appears confirming the approval status of the price item.
- 5. Click **OK**  
The price item is approved for the deal.

**Note:**

The price item can be approved by the approver when the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.

If the average price of the price item falls within the floor and ceil values defined for the approver, then the status of the price item is changed to **Approved**.

If the average price of the price item does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to **Pending For Approval**.

## Selecting a Price Item or Hierarchy Entity

### Procedure

To select a price item or hierarchy entity:

1. Do either of the following:

If you want to...	Then...
Select a price item or hierarchy entity from the <b>Deal Information</b> screen	<p>a. Search for the deal in the <b>Search Deal</b> zone of the <b>Deal Dashboard</b> screen.</p> <p>b. In the <b>Search Results</b> section, click the <b>Broadcast</b> (📡) icon corresponding to the deal for which you want to select the price item or hierarchy entity.</p> <p>The <b>Deal Versions</b> zone appears.</p> <p>c. In the <b>Deal Versions</b> zone, click the deal version in the <b>Deal Version Information</b> column for which you want to select the price item or hierarchy entity.</p> <p>The <b>Deal Information</b> screen appears.</p> <p>d. Ensure that the customer hierarchy is expanded in the <b>Simulation Details</b> zone.</p> <p>e. Click the <b>Edit</b> (✎) icon in the <b>Price Item Selection</b> column corresponding to the main person of the customer hierarchy.</p>
Select a price item or hierarchy entity from the <b>Pricing and Commitments</b> screen	<p>a. Ensure that the customer hierarchy is expanded in the <b>Simulation Details</b> zone.</p> <p>b. Click the <b>Edit</b> (✎) icon in the <b>Pricing and Commitments</b> column corresponding to the person or account for which you want to select the price item or hierarchy entity.</p> <p>The <b>Pricing and Commitments</b> screen appears.</p> <p>c. Click the <b>Select Price Item Group</b> button available in the header area of the <b>Pricing and Commitments</b> screen.</p>
Select a price item or hierarchy entity from the <b>Price List Assignment</b> screen	<p>a. Ensure that the customer hierarchy is expanded in the <b>Simulation Details</b> zone.</p> <p>b. Click the <b>Edit</b> (✎) icon in the <b>Price List Assignment</b> column corresponding to the person or account for whose price list you want to select the price item or hierarchy entity.</p>

If you want to...	Then...
	<p>The <b>Price List Assignment</b> screen appears.</p> <p>c. In the <b>Proposed Price Lists</b> zone, click the link in the <b>Price List Information</b> column corresponding to price list whose price item or hierarchy entity you want to select.</p> <div><p><b>Note:</b> You can also search for a price list that you want to assign to the person or account in the <b>Assign Price List</b> zone of the <b>Price List Assignment</b> screen and then select the required price item or hierarchy entity.</p></div> <p>d. Click the <b>Save and Select Price Item Group</b> button.</p>

The **Select Price Item Group** screen appears. It contains the following sections:

- **Filters** - Used to filter the price assignment in the price item hierarchy which you want to consider while simulating the deal. It contains the following fields:

Field Name	Field Description	
Search	Used to search for a particular price item, root level hierarchy entity, or non-root level hierarchy entity in the customer hierarchy.	
Assignment Level	<p>Used to search for price items in the price item hierarchy whose price assignment is defined at a particular level. The valid values are:</p> <ul style="list-style-type: none"><li>• <b>Account Agreed</b> - Used to indicate whether the price item pricing is agreed for the account.</li><li>• <b>Account Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li><li>• <b>Account Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the account.</li><li>• <b>Bundle Pricing</b> - Used to indicate whether the price item pricing is defined for the bundle which is available for the retail banking.</li><li>• <b>Customer Agreed</b> - Used to indicate whether the price item pricing is agreed for the customer in the customer hierarchy.</li><li>• <b>Customer Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li><li>• <b>Customer Price List</b> - Used to indicate whether the price item pricing is defined</li></ul>	

Field Name	Field Description	
	<p>in the price list which is assigned to the customer.</p> <ul style="list-style-type: none"><li>• <b>Default Price List</b> - Used to indicate whether the price item pricing defined in the price list is available in the default price list.</li><li>• <b>Global Price List</b> - Used to indicate whether the price item pricing defined in the price list is available in the global price list.</li><li>• <b>Market Product Pricing</b> - Used to indicate whether the price item pricing is defined for the market product which is available for the retail banking.</li><li>• <b>Offer Pricing</b> - Used to indicate whether the price item pricing is defined for the offer which is available for the retail banking.</li><li>• <b>Parent Customer Agreed</b> - Used to indicate whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li><li>• <b>Parent Customer Inherited Price List</b> - Used to indicate whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li><li>• <b>Parent Customer Price List</b> - Used to indicate whether the price item pricing is defined in the price list which is assigned to the parent customer.</li><li>• <b>Price List</b> - Used to indicate whether the price item pricing is defined in the price list.</li><li>• <b>Product Pricing</b> - Used to indicate whether the price item pricing defined in the price list is available for the product pricing.</li></ul>	

- **Price Item Group** - Displays the price item hierarchy. It contains the following columns:

Column Name	Column Description	
Price Item Hierarchy	Displays the price items, root level hierarchy entities, and non-root level hierarchy entities in the price item hierarchy which you can select for simulating the deal.	

Column Name	Column Description	
	<p><b>Note:</b></p> <p>A check box appears corresponding to the price items and the hierarchy entities which you can select to include the respective price assignments for deal simulation.</p> <p>The hierarchy entities and price items are sorted in the price item hierarchy based on their respective sort sequence. If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string.</p> <p>Similarly, the system sorts the hierarchy entities and price items in the price item hierarchy when the deal information is extracted in the Excel or PDF format for internal or external use.</p>	
Parameter	<p>Displays the comma separated parameters using which the pricing of the price item is determined.</p> <p><b>Note:</b> All price assignments of a price item are sorted in the alphabetical order of the pricing information in the <b>Parameter</b> column.</p>	
Assignment Level	<p>Displays the level at which the price assignment is defined for the price item. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited</li> </ul>	

Column Name	Column Description	
	<p>from the parent price list hierarchy defined for the price list which is assigned to the customer.</p> <ul style="list-style-type: none"><li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li><li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li><li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li><li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li><li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li><li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li><li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li><li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li><li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li><li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li></ul>	

**Note:** The width of the columns in the **Price Item Selection** section of the **Select Price Item Group** screen can now be resized and adjusted based on the requirement.

In addition, the **Price Item Selection** section contains the following buttons:

Button Name	Button Description
Expand All	On clicking the <b>Expand All</b> button, all nodes in the price item hierarchy are expanded at once.
Collapse All	On clicking the <b>Collapse All</b> button, all nodes in the price item hierarchy are collapsed at once.
Select All	On clicking the <b>Select All</b> button, all the price items and the hierarchy entities in the price item hierarchy are selected i.e. the check box

Button Name	Button Description
	corresponding to each price item and hierarchy entity in the price item hierarchy is selected.
De-Select All	On clicking the <b>De-Select All</b> button, all the price items and the hierarchy entities in the price item hierarchy are de-selected i.e. the check box corresponding to each price item and hierarchy entity in the price item hierarchy is unchecked.
Save	On clicking the <b>Save</b> button, the price item selection made in the price item hierarchy is saved.
Save & View Pricing & Commitment	On clicking the <b>Save &amp; View Pricing &amp; Commitment</b> button, the price item selection made in the price item hierarchy is saved and the <b>Pricing and Commitments</b> screen appears.
Back	Used to access the previous screen.

2. Ensure that the price item hierarchy is expanded in the **Price Item Group** section.

**Note:**

The system, by default, selects the price items and hierarchy entities in the **Select Price Item Group** screen when the following conditions are met:

- Deal is created for an existing customer or account
- Default commitments are not defined in the respective deal type

However, if the deal is created for a proposed customer or if the default commitments are defined in the respective deal type, the system does not select the price items and hierarchy entities, by default, in the **Select Price Item Group** screen. You have to manually select the required price items and hierarchy entities in the **Select Price Item Group** screen. Only then, the system considers the pricing and commitments of the selected price items in the deal.

3. Select the check box corresponding to the price item or the hierarchy entity that you want to consider while simulating the deal.

**Note:** If you select a hierarchy entity, then all its corresponding non-root level hierarchy entities and price items are selected for the deal simulation.

4. Click **Save**.  
The price item or hierarchy entity is selected.

**Recommending a New Pricing for a Price Item**

**Procedure**

To recommend a new pricing for a price item:

- 1. Ensure that the price item hierarchy is expanded in the **Pricing and Commitments** section of the **Pricing and Commitments** screen when you are recommending a new pricing for a price item of a person or account in a deal.
- 2. Click the **Recommend** link in the **Pricing Information** column corresponding to the price item for which you want to recommend a new pricing.  
The **Pricing and Commitments** screen appears.

**Note:** The **Recommend** link appears in the **Pricing Information** column only when the **Propose Pricing** option is set to **Yes** for the user in the **Deal Approval Profile** associated with the **Deal Type** using which the deal is created in the system.

- 3. Ensure that the **Recommend Pricing** zone is expanded in the **Pricing and Commitments** screen.  
The **Recommend Pricing** zone contains the following sections:
  - **Main** - Used to specify basic details about the recommended price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited. A new price assignment ID is created automatically by the system when you recommend a new pricing for a price item.	
Price Item	Displays the price item whose pricing you want to edit.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Start Date	Displays the date from when the pricing of the price item is effective for the deal.	Not Applicable
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: <ul style="list-style-type: none"><li>• <b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li><li>• <b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li></ul>	No
	<b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b> .	
	<ul style="list-style-type: none"><li>• <b>Post Processing - Invoice Based</b> - Used to indicate that the pricing is used to generate</li></ul>	

Field Name	Field Description	Mandatory (Yes or No)
	<p>post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</p> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing - Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <p><b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p>	
End Date	Displays the date till when the pricing of the price item is effective for the deal.	Not Applicable
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	No
Pricing Eligibility	<p>Used to define the pricing eligibility criteria for the price item pricing.</p> <p><b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.</p>	No
Print Zero	<p>Used to indicate whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Rate Schedule	<p>Used to specify the rate schedule that you want to use while defining price item pricing.</p> <p><b>Note:</b></p> <p>Rate schedules control how the bills for the price item will be calculated.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.</p>	No

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"><li>Aggregate Transactions and Then Rate Aggregated SQs</li><li>Do Not Rate Transactions</li><li>Rate Transaction and Aggregate Calc Lines Across Transaction</li><li>Rate Transactions</li></ul>	No
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"><li>Daily</li><li>Weekly</li><li>Monthly</li><li>Quarterly</li><li>Yearly</li></ul>	No
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"><li>Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li><li>No - Used to Indicate aggregation is required while rating the transactions before billing.</li></ul>	No
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"><li>Yes</li><li>No</li></ul>	No

- Parameters** - Used to associate the parameters based on which you want to recommend the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears.  The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.	
Parameter Value	Used to specify the value of the parameter.	No

- **Characteristics** - Used to define a list of characteristics for the recommended price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	No
Characteristic Type	Used to indicate the characteristic type.	No
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b> .	
Characteristic Value	Used to specify the value for the characteristic type.	No
	<b>Note:</b>  If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the recommended price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).	Not applicable
	<b>Note:</b>  It is a read-only field and cannot be edited.  This ID is generated automatically when you define the tiering setup of the rate component.	
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	No
Description	Used to specify the description of the price component.	No
Show Price Component	Used to indicate whether you want to display the price component in the bill.	No
Rate	Used to specify the rate defined for the price component.	Yes

Column Name	Column Description	Mandatory (Yes or No)										
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	No										
Tier Details	<div>On clicking the <b>Add</b>  icon, you can view and edit the <b>Tiering Criteria</b> of the price component for the price item pricing. It contains the following columns:</div> <table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the sequence of the tiering criteria.</td></tr><tr><td>Tiering Criterion</td><td>Used to indicate the tiering criteria.</td></tr><tr><td>Lower Limit</td><td>Used to specify the lower limit of the tiering range.</td></tr><tr><td>Upper Limit</td><td>Used to specify the upper limit of the tiering range.</td></tr></table> <div><b>Note:</b> You can edit the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b>.</div>	Column Name	Column Description	Display Sequence	Used to specify the sequence of the tiering criteria.	Tiering Criterion	Used to indicate the tiering criteria.	Lower Limit	Used to specify the lower limit of the tiering range.	Upper Limit	Used to specify the upper limit of the tiering range.	No
Column Name	Column Description											
Display Sequence	Used to specify the sequence of the tiering criteria.											
Tiering Criterion	Used to indicate the tiering criteria.											
Lower Limit	Used to specify the lower limit of the tiering range.											
Upper Limit	Used to specify the upper limit of the tiering range.											
Eligibility Details	<div>On clicking the <b>Add</b>  icon, you can view and edit the eligibility criteria of the price component for the price item pricing. It contains the following columns:</div> <table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the order in which the eligibility criteria should be executed in the rule.</td></tr><tr><td>Parameter</td><td><div>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</div><div><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</div></td></tr><tr><td>Operator</td><td>Used to specify the relational operator to</td></tr></table>	Column Name	Column Description	Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.	Parameter	<div>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</div> <div><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</div>	Operator	Used to specify the relational operator to	No		
Column Name	Column Description											
Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.											
Parameter	<div>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</div> <div><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</div>											
Operator	Used to specify the relational operator to											

Column Name	Column Description		Mandatory (Yes or No)
	Column Name	Column Description	
		define the relation between the left hand side and right hand side parameters.	
	Parameter Value Type	Used to indicate the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"><li>• <b>Parameter</b> - Used to indicate the type of parameter.</li><li>• <b>Value</b> - Used to indicate the type of value.</li></ul>	
	Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.	
		<b>Note:</b> If you select the <b>Parameter Value Type</b> as <b>Parameter</b> , the <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.  If you select the <b>Parameter Value Type</b> as <b>Value</b> then you can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon (;) in the <b>Parameter</b> field.	
	Is True	Used to indicate what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that</li></ul>	

Column Name	Column Description		Mandatory (Yes or No)
	Column Name	Column Description	
		<p>the condition with the consecutive sequence number is executed.</p> <ul style="list-style-type: none"><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	
	Is False	<p>Used to indicate what happens when the condition is false (not satisfied). The valid values are:</p> <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	
	Is Insufficient	<p>Used to indicate what happens when the data is insufficient. The valid values are:</p> <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action</li></ul>	

Column Name	Column Description		Mandatory (Yes or No)
	Column Name	Column Description	
		specified in the <b>Rule True Action</b> field is executed.	
	<b>Note:</b> You can edit the eligibility criteria of a price component only when the <b>Pricing Eligibility</b> check box is selected.		

- 4. Enter the required details in the **Main** section.
- 5. Map the transaction details in the **TFM Information** section, if required.
- 6. Associate or disassociate parameters with the price item pricing in the **Pricing Parameter Information** section, if required.
- 7. Add, edit, or delete characteristics from the price item pricing in the **Characteristics** section, if required.
- 8. Define price component for the rate component associated with the price item pricing in the **Price Component** section, if required.
- 9. Click **Recommend**.  
A new pricing is recommended for the price item.

**Note:** On recommending a new pricing for a price item, the **Delete** (🗑) icon appears corresponding to the recommended pricing of the respective price item in the **Pricing and Commitments** zone of the **Pricing and Commitments** screen.

**Associating Deal-Specific Terms and Conditions with a Price Item**

**Prerequisites**

To associate deal-specific terms and conditions with a price item you should have:

- Terms and conditions defined in the application
- Terms and conditions mapped to the price item

**Procedure**

To associate deal-specific terms and conditions with a price item:

- 1. Ensure that the **Pricing and Commitments** zone is expanded when you are associating deal-specific terms and conditions with a price item of a prospect person or a prospect account in the **Pricing and Commitments** screen.
- 2. In the **Pricing and Commitments** zone, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price item to which you want to associate deal-specific terms and conditions.  
The **Terms and Conditions** screen appears. It contains the following field:

Field Name	Field Description
Price Item Information	Indicates the price item to which you want to associate deal-specific terms and conditions.

In addition, the **Terms and Conditions** screen contains the following sections:

- **Terms and Conditions Section** - Lists the terms and conditions that are mapped to the price item. It contains the following buttons:

Button Name	Button Description
Select All	Used to select all the available terms and conditions for the price item from the list.
De-select All	Used to de-select all the terms and conditions from the list.
Refresh Terms and Conditions	Used to de-select the terms and conditions that are selected for the price item from the list.

**Note:** You can also select or de-select the terms and conditions by clicking the check box corresponding to the respective terms and conditions.

On clicking the **Edit** (✎) icon corresponding to the terms and conditions in the **Terms and Conditions Section** section, you can view and edit the terms and conditions of the price item.

- **Adhoc Terms and Conditions** - Used to add deal-specific adhoc terms and conditions for the price item.
3. Select the required terms and conditions for the price item from the **Terms and Conditions Section** section.
  4. Click **Save**.

The deal-specific terms and conditions are associated with the price item.

**Note:** You can associate deal-specific terms and conditions with a price item until the deal is in the **Customer Accepted** or **Rejected** status.

## Associating Deal-Specific Terms and Conditions with a Hierarchy Entity

**Prerequisites**

To associate deal-specific terms and conditions with a hierarchy entity you should have:

- Terms and conditions defined in the application
- Terms and conditions mapped to the hierarchy entity

**Procedure**

To associate deal-specific terms and conditions with a hierarchy entity:

1. Ensure that the **Pricing and Commitments** zone is expanded when you are associating deal-specific terms and conditions with a hierarchy entity of a prospect person or a prospect account in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** zone, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the hierarchy entity to which you want to associate deal-specific terms and conditions.  
The **Terms and Conditions** screen appears. It contains the following field:

Field Name	Field Description
Hierarchy Entity Information	Indicates the hierarchy entity to which you want to associate deal-specific terms and conditions.

In addition, the **Terms and Conditions** screen contains the following sections:

- **Terms and Conditions Section** - Lists the terms and conditions that are mapped to the hierarchy entity. It contains the following buttons:

Button Name	Button Description
Select All	Used to select all the available terms and conditions for the hierarchy entity from the list.
De-select All	Used to de-select all the terms and conditions from the list.
Refresh Terms and Conditions	Used to de-select the terms and conditions that are selected for the hierarchy entity from the list.

**Note:** You can also select or de-select the terms and conditions by clicking the check box corresponding to the respective terms and conditions.

On clicking the **Edit** (✎) icon corresponding to the terms and conditions in the **Terms and Conditions Section** section, you can view and edit the terms and conditions of the price item.

- **Adhoc Terms and Conditions** - Used to add deal-specific adhoc terms and conditions for the hierarchy entity.
3. Select the required terms and conditions for the hierarchy entity from the **Terms and Conditions Section** section.
  4. Click **Save**.  
The deal-specific terms and conditions are associated with the hierarchy entity.

**Note:** You can associate deal-specific terms and conditions with a hierarchy entity until the deal is in the **Customer Accepted** or **Rejected** status.

## Editing the Deal-Specific Terms and Conditions of a Price Item or a Hierarchy Entity

**Prerequisites**

To edit the deal-specific terms and conditions of a price item or a hierarchy entity, you should have:

- Terms and conditions associated with the price item
- Terms and conditions associated with the hierarchy entity.

**Procedure**

To edit the deal-specific terms and conditions of a price item or a hierarchy entity:

1. Ensure that the **Pricing and Commitments** section is expanded in the **Pricing and Commitments** screen.
2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Terms and Conditions** column corresponding to the price item or the hierarchy entity whose deal-specific terms and conditions you want to edit. The **Terms and Conditions** screen appears.
3. Ensure that the **Terms and Conditions Section** section is expanded in the **Terms and Conditions** screen.
4. Click the **Edit** (✎) icon corresponding to the terms and conditions which you want to edit. The **Terms and Conditions** window appears. It contains the following fields:

Field Name	Field Description
Terms and Conditions	Indicates the terms and conditions associated with the price item or the hierarchy entity.
Description	Displays the description of the terms and conditions.
Attached File Name	Indicates the terms and conditions document name.
Terms and Conditions Text	Displays the terms and conditions.

5. Click **Edit**.  
The **Terms and Conditions Text** field is enabled.
6. Modify the required information from the terms and conditions in the **Terms and Conditions Text** field.
7. Click **Save**.  
The changes made to the terms and conditions are saved.

**Note:** You can edit the terms and conditions of a price item or a hierarchy entity until the deal is in the **Customer Accepted** or **Rejected** status.

## Deal Pricing and Commitments

The **Deal Pricing and Commitments** screen allows you to view the original and proposed price item pricing and commitments along with the price item hierarchy and the hierarchy entity. It also allows you to edit the proposed pricing and commitments of the price items. It contains the following sections:

- **Deal Information** - Displays information about the deal version. It contains the following field:

Field Name	Field Description
Deal Version Information	Displays the concatenated string consisting of deal ID, deal version ID and deal description separated by a comma (,).

- **Search Pricing and Commitments** - Used to search pricing and commitments of a price item using various criteria. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate the criteria using which you want to search for the pricing and commitments of a price item. The valid values are: <ul style="list-style-type: none"><li>• <b>Account</b> - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular account.</li><li>• <b>All</b> - Used to indicate whether you want to view the pricing and commitments of all the price items in the deal.</li><li>• <b>Customer</b> - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular person.</li><li>• <b>Price Item</b> - Used to indicate whether you want to search for the pricing and commitments of a particular price item.</li><li>• <b>Root Level Hierarchy Entity</b> - Used to indicate whether you want to search for the pricing and commitments of price items which belong to a particular hierarchy entity.</li></ul>	Yes
Account ID	Used to search for the pricing and commitments of a price item which belongs to a particular account in the customer hierarchy.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (Q) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Prospect Account Search</b> window appears where you can search for the respective account.	<b>Note:</b> This field is required for searching the price item pricing and commitments of a particular account.
Price Item	Used to search for the price item pricing and commitments of a particular person, account, or hierarchy entity.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (Q) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears where you can search for the respective price item.  You can specify a list of price items whose pricing and commitments you want to view when you select the <b>Price Item</b> option from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching the pricing and commitments of a particular price item.
Price Item Approval Status	Used to search for the pricing and commitments of price items which are in a particular approval status. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Approved-Existing</li> <li>• Approver-Recommended</li> <li>• Error</li> <li>• Unapproved</li> </ul>	No
Assignment Level	Used to search for the pricing and commitments of price items which are defined at a particular level in the customer hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li><li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li><li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li><li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li><li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li><li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li><li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li><li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li><li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li><li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li><li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li><li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li></ul>	
Person ID	Used to search for the pricing and commitments of a price item which belongs to a particular person in the customer hierarchy.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Prospect Account Search</b> window appears where you can search for the respective account.	<b>Note:</b> This field is required for searching the price item pricing and commitments of a particular person.

Field Name	Field Description	Mandatory (Yes or No)
Root Level Hierarchy Entity	Used to search for the pricing and commitments of price items which belongs to a particular hierarchy entity.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Root Level Hierarchy Entity</b> field. On clicking the <b>Search</b> icon, the <b>Root Level Hierarchy Entity Search</b> window appears where you can search for the respective hierarchy entity.	<b>Note:</b> This field is required for searching the price item pricing and commitments of a particular hierarchy entity.

In addition, the **Search Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Show All Pricing	Used to display all the price item pricing and commitments available for the specified search criteria.
Show Customer or Account Level Pricing	Used to show only the customer agreed and account agreed price item pricing and commitments available for the specified search criteria.

- **Symbol Legends** - Used to indicate the current status of the price item pricing and commitments. It also differentiates between the proposed and the original price item pricing statistics. It contains the following symbols:

Symbol Name	Symbol Description
 PROJECTED	Indicates the proposed price item pricing statistics.
 ORIGINAL	Indicates the existing price item pricing statistics.
 APPROVED	Indicates whether the pricing of the price item is approved.
 PENDING FOR APPROVAL	Indicates whether the pricing of the price item is pending for approval.
 Pre-Approved	Indicates whether the original pricing of the price item is approved for the deal.
 APPROVER-RECOMMENDED	Indicates whether a new pricing for the price item is recommended by the approver.
 Error	Indicates whether an error occurred while validating the price item pricing during pricing simulation.

Symbol Name	Symbol Description
	<p><b>Note:</b></p> <p>If the approver clicks the <b>Check Limits</b> button in the <b>Pricing And Commitment Details</b> screen and if the price item floor and ceil value falls within the approvers limit, then the status of the price item is changed to <b>Approved</b>.</p> <p>If the approver clicks the <b>Check Limits</b> button in the <b>Pricing And Commitment Details</b> screen and if the price item floor and ceil value does not fall within the approvers limit, then the status of the price item is changed to <b>Pending For Approval</b>.</p> <p>If the approver clicks the <b>Send Price Items for Approval</b> button in the <b>Pricing And Commitment Details</b> screen, the status of the price item is changed to <b>Assigned to Price Item Manager</b>.</p>
 Assigned to Price Item Manager	Indicates whether the price item pricing is sent to the price item manager for approval.

- **Pricing and Commitments** - Lists the price items as specified in the search criteria whose proposed and original pricing and commitment details you want to view. It contains the following columns:

Column Name	Column Description
Entity Information	Displays the concatenated string of information about the person or account in the customer hierarchy whose price item pricing and commitment details you want to view separated by a comma (,).
	<p><b>Note:</b></p> <p>The hierarchy entity is sorted in the price item hierarchy based on its respective sort sequence.</p> <p>If two or more hierarchy entities have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string.</p> <p>Also, if the sort sequence is not defined for the hierarchy entities, then the system sorts them in the ascending alphabetical order of the information string.</p>
Price Item	Displays the price item whose pricing and commitment details you want to view.
	<p><b>Note:</b></p> <p>The price item is sorted in the price item hierarchy based on its respective sort sequence.</p> <p>If two or more price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string.</p> <p>Also, if the sort sequence is not defined for the price items, then the system sorts them in the ascending alphabetical order of the information string.</p>
Price Item Hierarchy	Displays the concatenated string consisting of the root level and non-root level hierarchy entity of the price item separated by a comma (,).

Column Name	Column Description
Pricing Parameters	Indicates the parameters using which the pricing of the price item is defined.
Revenue Variation (%)	<p>Displays the variation between the original, proposed, and recommended revenue in percentage generated from the original, proposed, and recommended pricing of the price item. It is calculated using the following formula:</p> $\text{Revenue Variation (\%)} = (\text{Proposed Revenue} - \text{Original Revenue}) * 100 / \text{Original Revenue}.$
Status	Indicates the current approval status of the price item pricing and commitments.
Approver	Indicates the user who has approved the price item pricing and commitments.
Pricing Information	<p>Displays the concatenated string of information about the proposed and original price item pricing separated by a comma (,).</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Deal Pricing</b> screen appears where you can view the details of the original and proposed price item pricing. You can also edit or override the proposed pricing of the price item through this screen.</p>
Price List Information	Indicates the price list from where the proposed and original pricing of the price item is derived for the person or account in the customer hierarchy.
Assignment Level	<p>Indicates the level at which the proposed and original pricing of the price item is defined in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> - Indicates whether the price item pricing is agreed for the account.</li> <li>• <b>Account Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Account Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Bundle Pricing</b> - Indicates whether the price item pricing is defined for the bundle which is available for the retail banking.</li> <li>• <b>Customer Agreed</b> - Indicates whether the price item pricing is agreed for the customer in the customer hierarchy.</li> <li>• <b>Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the customer.</li> <li>• <b>Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the customer.</li> <li>• <b>Default Price List</b> - Indicates whether the price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> - Indicates whether the price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Market Product Pricing</b> - Indicates whether the price item pricing is defined for the market product which is available for the retail banking.</li> <li>• <b>Offer Pricing</b> - Indicates whether the price item pricing is defined for the offer which is available for the retail banking.</li> </ul>

Column Name	Column Description
	<ul style="list-style-type: none"><li>• <b>Parent Customer Agreed</b> - Indicates whether the price item pricing is agreed for the parent customer in the customer hierarchy.</li><li>• <b>Parent Customer Inherited Price List</b> - Indicates whether the price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li><li>• <b>Parent Customer Price List</b> - Indicates whether the price item pricing is defined in the price list which is assigned to the parent customer.</li><li>• <b>Price List</b> - Indicates whether the price item pricing is defined in the price list.</li><li>• <b>Product Pricing</b> - Indicates whether the price item pricing defined in the price list is available for the product pricing.</li></ul>
Average Price	Displays the average proposed and original cost of the price item as per the proposed and original commitments. It is calculated using the following formula:  Avg. Price = Proposed Revenue/Proposed Usage
Volume and Commitments	On clicking the <b>Edit</b> (✎) icon, the <b>Pricing and Commitments</b> screen appears where you can view the original and proposed commitments of the price item.
Revenue	Displays the proposed and original revenue generated from the proposed and original price item pricing and commitments.
Cost	Displays the proposed and original cost of the price item based on the proposed and original usage.
Terms and Conditions	On clicking the <b>Edit</b> (✎) icon, the <b>Mapping Terms and Conditions</b> screen appears where you can view or delete the deal-specific terms and conditions associated with the price item.

In addition, the **Pricing and Commitments** section contains the following buttons:

Button Name	Button Description
Send Price Items for Approval	On clicking the <b>Send Price Items for Approval</b> button, the status of the price item is changed to <b>Assigned to Price Item Manager</b> .
	<b>Note:</b> An approver can send a price item for approval when the following conditions are met: <ul style="list-style-type: none"><li>• The price item is assigned to the approver for approval</li><li>• The <b>Propose Pricing</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li><li>• The <b>Submit Price Item for Approval</b> option is set to <b>Yes</b> in the <b>Deal Approval Profile</b> for the approver</li></ul>
Check Limits	On clicking the <b>Check Limits</b> button the system verifies whether the average price of the price item falls within the floor and ceil values defined for the approver in the price item screen.

Button Name	Button Description
	<b>Note:</b> If the average price falls within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Approved</b> .  If the average price does not fall within the floor and ceil values defined for the approver, then the status of the price item is changed to <b>Pending For Approval</b> .

**Note:** A check box appears corresponding to the price item if the price item is assigned to the approver for approval.

## Price List Assignment

The **Price List Assignment** screen enables you to view the existing and proposed price lists of the person or account in a deal. It also enables you to edit or assign proposed price list to the person or account in a deal. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Person ID	Displays the person whose price list assignment details you want to view or edit.

Field Name	Field Description
	<b>Note:</b> This field appears in the following scenarios: <ul style="list-style-type: none"><li>• If you are viewing the existing price lists of a person.</li><li>• If you are editing the proposed price list of a person.</li><li>• If you are assigning a proposed price list to a person.</li></ul> This field appears when you are viewing, editing, or assigning a price list to a person in the customer hierarchy.
Person Information	Displays the concatenated string of information about the person separated by a comma (.).
	<b>Note:</b> This field appears when you are viewing, editing, or assigning a price list to a person in the customer hierarchy.
Account ID	Displays the account whose price list assignment details you want to view or edit.
	<b>Note:</b> This field appears in the following scenarios: <ul style="list-style-type: none"><li>• If you are viewing the existing price lists of an account.</li><li>• If you are editing the proposed price list of an account.</li><li>• If you are assigning a proposed price list to an account</li></ul> This field appears when you are viewing, editing, or assigning a price list to an account in the customer hierarchy.
Account Information	Displays the concatenated string of information about the account separated by a comma (.).
	<b>Note:</b> This field appears when you are viewing, editing, or assigning a price list to an account in the customer hierarchy.

- **Existing Price Lists** - Lists the price lists that are already assigned to the person or account of the customer hierarchy in a deal. It contains the following columns:

Column Name	Column Description
Price List ID	Displays the existing price list of the person or account of the customer hierarchy.
Price List Information	Displays the description of the price list.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.
Effective Start Date	Displays the date from when the price list is effective for the deal.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
Effective End Date	Displays the date till when the price list is effective for the deal.

Column Name	Column Description
	<b>Note:</b> The <b>Effective End Date</b> cannot be earlier than the <b>Effective Start Date</b> .
Price List Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy.
Assignment Status	Indicates the current status of the price list. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Priority	Indicates the order in which the price list must be considered while determining the price item pricing for the person or account.

**Note:** The **Existing Price Lists** section appears in the **Price List Assignment** screen when you are viewing the original pricelist assignment of the person or account from the customer hierarchy.

**Proposed Price Lists** - Lists the price lists that are proposed for the person or account in the customer hierarchy of a deal. It contains the following columns:

Column Name	Column Description
Price List ID	Displays the price list that is proposed for the person or account of the customer hierarchy.
Price List Information	Displays the description of the price list. <p><b>Note:</b></p> <p>It has a link. On clicking the link, the details of the respective price list appears in the <b>Assign Price List</b> section for editing.</p> <p>You can activate or deactivate a proposed price list by editing its <b>Effective End Date</b> in the <b>Assign Price List</b> section.</p>
Effective Start Date	Displays the date from when the proposed price list is effective for the deal. <p><b>Note:</b> By default, this date is set to the deal start date and cannot be edited.</p>
Effective End Date	Displays the date till when the proposed price list is effective for the deal. <p><b>Note:</b> The <b>Effective End Date</b> cannot be earlier than the <b>Effective Start Date</b>.</p>
Price List Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy.
Assignment Status	Indicates the current status of the proposed price list. The valid value is: <ul style="list-style-type: none"> <li>Proposed</li> </ul>
Priority	Indicates the order in which the price list must be considered while determining the price item pricing for the person or account.

**Note:**

The **Proposed Price List** section appears in the **Price List Assignment** screen when you are viewing, editing, or assigning a proposed price list to a person or an account of the customer hierarchy.

You can delete a proposed price list by clicking the **Delete** (🗑️) icon corresponding to the respective proposed price list.

The **Delete** icon appears corresponding to only those price lists which are newly assigned to the customer or account in the deal.

You cannot delete a proposed price list assignment which is created using the original price list assignments.

If you delete a proposed price list, the price item pricing inherited from the price list is also deleted from the **Pricing and Commitments** screen. But, if you have created the customer or account agreed pricing using the price list pricing, then such customer or account agreed pricing is not deleted from the **Pricing and Commitments** screen.

**Assign Price List** - Enables you to assign a proposed price list to a person or an account of the customer hierarchy in a deal. It contains the following fields:

Field Name	Field Description
Price List ID	Used to indicate a particular price list that you want to assign to the proposed price list of a person or account.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price List ID</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Eligible Price Lists</b> window appears. On indicating the price list, the price list information appears corresponding to the <b>Price List ID</b> field separated by a comma (,).
Effective Start Date	Displays the date from when the price list assignment is effective for the person or account.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
Effective End Date	Used to specify the date till when the price list assignment is effective for the person or account.
Priority	Used to specify the order in which the assigned price list must be considered while determining the price item pricing for the person or account.
Price list Inheritance	Indicates whether the person or account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the person or account can inherit the price item pricing from the price list hierarchy. The valid values are: <ul style="list-style-type: none"><li><b>Yes</b> - Used to indicate that the person can inherit the price item pricing from the price list hierarchy.</li><li><b>No</b> -Used to indicate that the person cannot inherit the price item pricing from the price list hierarchy.</li></ul>

**Note:** You cannot assign a proposed price list to a person or account if a deal has reached the **Finalized** status.

In addition, the **Price List Assignment** screen contains the following button:

Button Name	Button Description
Save and Select Price Item Group	On clicking the <b>Save and Select Price Item Group</b> button, the assigned price list is saved as the proposed price list and the <b>Select Price Item Group</b> screen appears where you can select and/or deselect the price items and/or hierarchy entities from the respective price list.

## Assigning a Proposed Price List to an Account

### Procedure

To assign a proposed price list to an account:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal in which you want to assign a proposed price lists to an account.  
The **Deal Information** screen appears.
3. In the **Simulation Details** zone, ensure that the customer hierarchy section is expanded when you are assigning a proposed price list to an account.
4. Click the **Edit** (🔗) icon in the **Price List Assignment** column corresponding to the account to which you want to assign a proposed price list.  
The **Price List Assignment** screen appears. It contains the following sections:
  - **Deal** - Displays information about the deal or the deal version.
  - **Proposed Price Lists** - Lists the price lists which are already proposed for the account.
  - **Assign Price List** - Used to assign a proposed price list to the account.

The **Assign Price List** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List ID	Used to indicate a particular price list that you want to assign to a proposed price list of an account.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price List ID</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Eligible Price Lists</b> window appears. On indicating the price list, the price list information appears corresponding to the <b>Price List ID</b> field separated by a comma (,).	
Effective Start Date	Displays the date from when the price list assignment is effective for the account.	Not applicable
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.	
Effective End Date	Used to specify the date till when the price list assignment is effective for the account.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Effective End Date</b> cannot be earlier than the <b>Effective Start Date</b> .	
Priority	Used to specify the order in which the assigned price list must be considered while determining the price item pricing for the account.	Yes
Price list Inheritance	Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the account can inherit the price item pricing from the price list hierarchy. The valid values are: <ul style="list-style-type: none"><li>• <b>Yes</b> - Used to indicate that the account can inherit the price item pricing from the price list hierarchy.</li><li>• <b>No</b> -Used to indicate that the account cannot inherit the price item pricing from the price list hierarchy.</li></ul>	Yes

- 5. Enter the required details in the **Assign Price List** section.
- 6. Click the **Save and Select Price Item Group** button.  
The **Select Price Item Group** screen appears.
- 7. Select the price items whose pricing you want to inherit from the price list.

**Note:** Only price list pricing of the selected price items is listed in the **Pricing and Commitments** screen.

The proposed price list is assigned to the person.

## Product Enrollment

The **Product Enrollment** screen enables you to view the existing and proposed products to which the account is enrolled. It also enables you to edit or enroll an account or accounts of a person for a product. It contains the following sections:

- **Deal** - Displays basic information about the deal. It contains the following fields:

Field Name	Field Description
Deal Version Information	Displays the deal version to which the person or account belongs.
Person ID	Displays the person whose accounts you want to enroll for a product.. <b>Note:</b> This field appears when you want to enroll all the accounts of the person for a product.
Person Information	Displays the concatenated string of information about the person separated by a comma (.). <b>Note:</b> This field appears when you want to enroll all the accounts of the person for a product.
Account ID	Displays the account whose product enrollment details you want to view. <b>Note:</b> This field appears in the following scenarios: <ul style="list-style-type: none"><li>• If you are viewing the existing products enrolled for an account.</li><li>• If you are editing the existing products enrolled for an account.</li><li>• If you are enrolling an account for a product.</li></ul>
Account Information	Displays the concatenated string of information about the account separated by a comma (.). <b>Note:</b> This field appears when you are viewing, editing, or enrolling an account for a product.

- **Enrolled Products** - Lists the products to which the account is enrolled. It contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product.
Product Code	Displays the code of the enrolled product.

Column Name	Column Description
	<b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Product Description	Displays the description of the enrolled product. <b>Note:</b> It has a link. On clicking the link while viewing the existing product to which the account is enrolled, the <b>Product</b> screen appears where you can view the details of the respective product.
Version Description	Displays the version of the enrolled product. <b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Product Type	Displays the type of product which is enrolled for the account. <b>Note:</b> Whereas, if you click the link while editing the proposed products to which the account is enrolled, the details of the product and its services appears in the <b>Products and Services</b> section of the <b>Product Enrollment</b> screen where you can edit the respective product. You cannot edit an enrolled product if the deal version has reached the <b>Finalized</b> status.
Product Category	Indicates the category to which the product belongs. <b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Priority	Displays the priority in which the enrolled product is considered for the account. <b>Note:</b> This column appears only when you are viewing the proposed product enrollment details of an account.
Start Date	Displays the date from when the enrolled product is effective for the account. <b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account. <b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

- **Proposed Products** - Lists the products that are proposed for the account for enrollment. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the enrolled product.

Column Name	Column Description
Product Description	Displays the description of the enrolled product.
Version Description	Displays the version of the enrolled product.
Product Type	Displays the type of product which is enrolled for the account.
Product Category	Indicates the category to which the product belongs.
Priority	Displays the priority in which the enrolled product is considered for the account.
Start Date	Displays the date from when the enrolled product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the enrolled product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

**Note:**  
On clicking the **Broadcast** (📡) icon corresponding to a proposed enrolled product, the details of the product appears in the **Enroll Product** and **Product and Services** sections for editing.

**Note:** You cannot edit an enrolled product if the deal or deal version has reached the **Finalized** status.

You can delete the proposed product to which the account is enrolled by clicking the **Delete** (🗑️) icon corresponding to a proposed enrolled product.

- **System Recommended Products & Packages** - Lists the products that you have recommended for enrollment while creating the deal. It contains the following columns:

Column Name	Column Description
Product Code	Displays the code of the recommended product.
Product Description	Displays the description of the recommended product.
Version Description	Displays the version of the recommended product.
Product Type	Displays the type of product which is recommended for the account.
Product Category	Indicates the category to which the recommended product belongs.
Start Date	Displays the date from when the recommended product is effective for the account.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be edited.
End Date	Displays the date till when the recommended product is effective for the account.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .

- **Enroll Product** - The **Enroll Product** section contains the following fields:

Field Name	Field Description
Enrollment ID	Used to specify the enrollment ID once the product is defined for an enrollment.
	<b>Note:</b> Enrollment ID is displayed when the product is added for enrollment.
Start Date	Displays the date from when the product enrollment is effective.
	<b>Note:</b> By default, this date is set to the deal start date and cannot be changed.
End Date	Displays the date till when the product enrollment is effective.

**Note:**

The **Enroll Product** section appears in the **Product Enrollment** screen only when you are enrolling an account or accounts of a person for a product.

- **Products and Services** - Used to define products and services for a product. It contains the following fields in a grid:

Field Name	Field Description
Product	Used to indicate the product to which you want to enroll an account or accounts of a person.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Fetch Eligible Products</b> window appears. On indicating the product, the description of the product appears in the <b>Product</b> field. Also, when you select a product, the <b>Standard Product</b> , <b>Product Services</b> , and the <b>Add-On Product Services</b> that are eligible for the product appears corresponding to the product.
Start Date	Used to specify the date from when the product is effective for the account or accounts of a person.
	<b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the product is effective for the account or accounts of a person.
	<b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Priority	Used to specify the priority in which you want the product to be considered while calculating the financial summary of the deal.
Inclusion	Used to indicate whether you want to include the services of the product for the account.

Field Name	Field Description
	<b>Note:</b> By default, all the check boxes of the services provided by the product are selected. You can exclude a service by deselecting the check box corresponding to the respective service.
Standard Product	Displays the standard product which is included within the main product.
Start Date	Used to specify the date from when the standard product is effective. <b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the standard product is effective. <b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the standard product is used for enrollment.
Product Services	Displays the service that is a part of the standard product.
Start Date	Used to specify the date from when the service is effective. <b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the service is effective. <b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the service is used for enrollment.
Add on Services	Displays the add-on service which is a part of the packaged product.
Start Date	Used to specify the date from when the add-on service is effective. <b>Note:</b> By default this field is set to the deal start date and cannot be changed.
End Date	Used to specify the date till when the add-on service is effective. <b>Note:</b> The <b>End Date</b> cannot be earlier than the <b>Start Date</b> .
Inclusion	Used to indicate whether the add-on service is used for enrollment.

## Pricing and Commitments

The **Pricing and Commitments** screen allows you to do the following:

- View the original and proposed pricing of the price item
- Edit the proposed pricing of the price item
- Override the proposed pricing of the price item
- View the original and proposed commitments of the price item
- Edit the proposed commitments of the price item

The **Pricing and Commitments** screen contains the following sections:

- **Pricing** - Used to view the original and proposed pricing of the price item. It also allows you to edit or override the proposed pricing of the price item. It contains the following zones:
  - [Projected Pricing](#) on page 3013
  - [Original Pricing](#) on page 3019
- **Commitments** - Used to view the original and proposed commitments of the price item. It also allows you to edit the proposed commitments of the price item. It contains the following zones:
  - [Proposed Commitments](#) on page 3023
  - [Original Volume](#) on page 3024

## Projected Pricing

The **Projected Pricing** zone allows to view, edit, or override the proposed pricing of the price item. It contains the following field:

Field Name	Field Description
Override	Used to indicate whether you want to override the price item pricing.

In addition, the **Projected Pricing** zone contains the following sections:

- **Main** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Price Assignment ID	Displays the price assignment ID.
	<b>Note:</b> It is a read-only field and cannot be edited. A new <b>Price Assignment ID</b> is generated if you override the proposed pricing of the price item.
Price Item	Displays the price item for which the proposed pricing is defined.

Field Name	Field Description
	<b>Note:</b> It is a read-only field and cannot be edited.
Start Date	<p>Use to specify the date from when the pricing of the price item is effective for the deal.</p> <p><b>Note:</b></p> <p>By default the deal start date appears in this field.</p> <p>You can define a seasonal pricing for the price item by overriding the price item pricing with a price assignment start date greater than the deal start date.</p>
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li><b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li> <li><b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</p> <ul style="list-style-type: none"> <li><b>Post Processing - Invoice Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> <ul style="list-style-type: none"> <li><b>Post Processing - Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <p><b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p>
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.
Pricing Eligibility	<p>Used to select the pricing eligibility criteria for the price item pricing.</p> <p><b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.</p>
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are:

Field Name	Field Description
	<ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Rate Schedule	<p>Used to specify the rate schedule that you want to use while defining price item pricing.</p> <p><b>Note:</b></p> <p>Rate schedules control how the bills for the price item will be calculated.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.</p>

- **TFM Information** - Displays the transaction information mapped with the price item. It contains the following fields:

Field Name	Field Description
Transaction Rating Criteria	<p>Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are:</p> <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>
Aggregation Schedule	<p>Used to indicate the transaction aggregation cycle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Do Not Aggregate Switch	<p>Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li> <li>• No - Used to Indicate aggregation is required while rating the transactions before billing.</li> </ul>
Ignore Transaction	<p>Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

- **Pricing Parameter Information** - Displays the parameters based on which the price item pricing is defined. It contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.

Column Name	Column Description
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears.</p> <p>The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.</p>
Parameter Value	Displays the value of the parameter.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Used to indicate the characteristic type.
	<p><b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b>.</p>
Characteristic Value	Used to specify the value for the characteristic type.
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).
	<p><b>Note:</b></p> <p>It is a read-only field and cannot be edited.</p> <p>This ID is generated automatically when you define the tiering setup of the rate component.</p>
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.
Description	Used to specify the description of the price component.
Show Price Component	Used to indicate whether you want to display the price component in the bill.
Rate	Used to specify the rate defined for the price component.

Column Name	Column Description												
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.												
Tier Details	<div>On clicking the <b>Add</b> (+) icon, you can define the <b>Tiering Criteria</b> of the price component for the price item pricing. It contains the following columns:</div> <table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the sequence of the tiering criteria.</td></tr><tr><td>Tiering Criterion</td><td>Used to indicate the tiering criteria.</td></tr><tr><td>Lower Limit</td><td>Used to specify the lower limit of the tiering range.</td></tr><tr><td>Upper Limit</td><td>Used to specify the upper limit of the tiering range.</td></tr></table> <div><b>Note:</b> You can define the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b>.</div>	Column Name	Column Description	Display Sequence	Used to specify the sequence of the tiering criteria.	Tiering Criterion	Used to indicate the tiering criteria.	Lower Limit	Used to specify the lower limit of the tiering range.	Upper Limit	Used to specify the upper limit of the tiering range.		
Column Name	Column Description												
Display Sequence	Used to specify the sequence of the tiering criteria.												
Tiering Criterion	Used to indicate the tiering criteria.												
Lower Limit	Used to specify the lower limit of the tiering range.												
Upper Limit	Used to specify the upper limit of the tiering range.												
Eligibility Details	<div>On clicking the <b>Add</b> (+) icon, you can define the eligibility criteria of the price component for the price item pricing. It contains the following columns:</div> <table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the order in which the eligibility criteria should be executed in the rule.</td></tr><tr><td>Parameter</td><td><div>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</div><div><b>Note:</b> The <b>Search</b> (Q) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</div></td></tr><tr><td>Operator</td><td>Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.</td></tr><tr><td>Parameter Value Type</td><td><div>Used to indicate the type of pricing eligibility. The valid values are:</div><ul style="list-style-type: none"><li><b>Parameter</b> - Used to indicate the type of parameter.</li><li><b>Value</b> - Used to indicate the type of value.</li></ul></td></tr><tr><td>Parameter</td><td>Used to specify the value for the <b>Parameter Value Type</b> as the right</td></tr></table>	Column Name	Column Description	Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.	Parameter	<div>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</div> <div><b>Note:</b> The <b>Search</b> (Q) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</div>	Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.	Parameter Value Type	<div>Used to indicate the type of pricing eligibility. The valid values are:</div> <ul style="list-style-type: none"><li><b>Parameter</b> - Used to indicate the type of parameter.</li><li><b>Value</b> - Used to indicate the type of value.</li></ul>	Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right
Column Name	Column Description												
Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.												
Parameter	<div>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</div> <div><b>Note:</b> The <b>Search</b> (Q) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</div>												
Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.												
Parameter Value Type	<div>Used to indicate the type of pricing eligibility. The valid values are:</div> <ul style="list-style-type: none"><li><b>Parameter</b> - Used to indicate the type of parameter.</li><li><b>Value</b> - Used to indicate the type of value.</li></ul>												
Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right												

Column Name	Column Description	
	Column Name	Column Description
		hand side parameter which you want to use along with the price item for price determination.
		<b>Note:</b> If you select the <b>Parameter Value Type</b> as <b>Parameter</b> , the <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.  If you select the <b>Parameter Value Type</b> as <b>Value</b> then you can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon (;) in the <b>Parameter</b> field.
	Is True	Used to indicate what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>
	Is False	Used to indicate what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>
	Is Insufficient	Used to indicate what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with</li></ul>

Column Name	Column Description	
	Column Name	Column Description
		the consecutive sequence number is executed. <ul style="list-style-type: none"><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>
	<b>Note:</b> You can define the eligibility criteria of a price component only when the <b>Pricing Eligibility</b> check box is selected.	

In addition, the **Projected Pricing** zone contains the following sections:

Pricing and Commitments screen	<a href="#">Pricing and Commitments</a> on page 3013

## Original Pricing

The **Original Pricing** zone allows you to view the details of the existing pricing of the price item. It contains the following sections:

- **Main** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Price Assignment ID	Displays the price assignment ID.
Price Item	Displays the price item for which the original pricing is defined.
Start Date	Displays the date from when the pricing of the price item is effective for the deal.
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"><li>• <b>Regular</b> - Indicates that the pricing is used to generate regular bill segment.</li><li>• <b>Post Processing</b> - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li></ul> <div><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</div> <ul style="list-style-type: none"><li>• <b>Post Processing - Invoice Based</b> - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can</li></ul>

Field Name	Field Description
	<p>be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</p> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing - Price Item Based</b> - Indicates that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p>
End Date	Displays the date till when the pricing of the price item is effective for the deal.
Pricing Currency	Indicates the currency in which you want to define the pricing of the price item.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item pricing in the <b>Price Component</b> section.
Print Zero	<p>Indicates whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Rate Schedule	<p>Displays the rate schedule that you want to use while defining price item pricing.</p> <p><b>Note:</b> Rate schedules control how the bills for the price item is calculated.</p>

- **TFM Information** - Displays the transaction information mapped with the price item. It contains the following fields:

Field Name	Field Description
Transaction Rating Criteria	<p>Indicates how and when the transaction legs mapped to the price item are rated. The valid values are:</p> <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>
Do Not Aggregate Switch	<p>Indicates whether aggregation is required while rating the transactions before billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> - Indicates aggregation is not required while rating the transactions before billing.</li> <li>• <b>No</b> - Indicates aggregation is required while rating the transactions before billing.</li> </ul>
Ignore Transaction	<p>Indicates whether the transactions mapped to the price item is considered for billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> </ul>

Field Name	Field Description
	<ul style="list-style-type: none"><li>No</li></ul>
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"><li>Daily</li><li>Weekly</li><li>Monthly</li><li>Quarterly</li><li>Yearly</li></ul>

- Pricing Parameter Information** - Displays the parameters based on which the price item pricing is defined. It contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
Parameter Value	Displays the value of the parameter.

- Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

- Price Component** - Lists the price components of the rate component that is mapped with the price item pricing. It contains the following columns:

Column Name	Column Description	
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).	
Display Sequence	Displays the sequence of price component whose rate is used for calculating the pricing of the price item.	
Description	Displays the description of the price component.	
Show Price Component	Indicates whether you want to display the price component in the bill.	
Rate	Displays the rate defined for the price component.	
Eligibility and Tier Details	Displays the tiering criteria and eligibility criteria for the price item pricing.	
Tier Details	Displays information about the tiering criteria of the price component for the price item pricing. It contains the following columns:	
	Column Name	Column Description
	Display Sequence	Displays the sequence of the tiering criteria.
	Tiering Criterion	Indicates the tiering criteria.
	Lower Limit	Displays the lower limit of the tiering range.

Column Name	Column Description	
	<b>Column Name</b>	<b>Column Description</b>
	Upper Limit	Displays the upper limit of the tiering range.
	<b>Note:</b> You can define the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b> .	
Eligibility Details	Displays information about the eligibility criteria of the price component for the price item pricing. It contains the following columns:	
	<b>Column Name</b>	<b>Column Description</b>
	Display Sequence	Displays the order in which the eligibility criteria is executed in the rule.
	Parameter	Indicates the left hand side parameter which is used along with the price item for price determination.
	Operator	Indicates the relational operator that is used to define the relation between the left hand side and the right hand side parameters.
	Parameter Value Type	Indicates the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"><li>• <b>Parameter</b> - Indicates the type of parameter.</li><li>• <b>Value</b> - Indicates the type of value.</li></ul>
	Parameter	Displays the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.
	Is True	Indicates what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Indicates that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Indicates that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>
	Is False	Indicates what happens when the condition is false (not satisfied). The valid values are:

Column Name	Column Description	
	Column Name	Column Description
		<ul style="list-style-type: none"><li>• <b>Check next condition</b> - Indicates that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Indicates that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>
	Is Insufficient	Indicates what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Indicates that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Indicates that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>
	<b>Note:</b> You can define the eligibility criteria of a price component only when the <b>Pricing Eligibility</b> check box is selected.

**Proposed Commitments**

The **Proposed Commitments** zone allows to view or edit the proposed commitments of the price item for a person or account based on which the revenue is calculated for the deal. It contains the following columns:

Column Name	Column Description
Price Item	Displays the price item.
Pricing Parameters	Indicates the parameter based on which the pricing is defined for the price item.
SQI	Indicates the service quantity identifier that is associated with the price item.
Service Quantity	Used to specify the proposed SQI value using which the rates engine calculates the price item pricing.

## Editing a Proposed Price Item Pricing

### Prerequisites

To edit a proposed price item pricing, you should have:

- Values defined for the **Price Assignment Type** in the **PA\_TYPE\_FLAG** lookup field
- Currencies defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Values defined for **Transaction Rating Criteria** in the **TXN\_RATING\_CRITERIA** lookup field
- Values defined for **Pricing Rule Type** in the **PRC\_RULE\_TYPE\_FLG** lookup field
- Aggregation schedules defined in the application
- Parameters defined in the application (where the **Price Item** option is selected in the **Parameter Usage** section)
- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Pricing**)
- Transactions mapped to the price item defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application

### Procedure

To edit a proposed price item pricing:

1. Ensure that the **Projected Pricing** zone is expanded in the **Pricing and Commitments** screen when you are editing the proposed pricing of a price item.

The **Projected Pricing** zone contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Override	Used to indicate whether you want to override the price item pricing.	No
		<b>Note:</b> This field is required only while overriding the price item pricing.

In addition, the **Projected Pricing** zone contains the following sections:

- **Main** - Used to specify basic details about the price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Price Item	Displays the price item whose pricing you want to edit.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Start Date	Use to specify the date from when the pricing of the price item is effective for the deal.	Yes
	<b>Note:</b> By default the deal start date appears in this field.	
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: <ul style="list-style-type: none"><li>• <b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li><li>• <b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li></ul>	Yes
	<b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b> .	
	<ul style="list-style-type: none"><li>• <b>Post Processing - Invoice Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li></ul>	
	<b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b> .	

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li><b>Post Processing - Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div> <b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.         </div>	
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.	No
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	Yes
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing.  <b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.	No
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.  <b>Note:</b> Rate schedules control how the bills for the price item will be calculated.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.	Yes

- TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>Aggregate Transactions and Then Rate Aggregated SQs</li> <li>Do Not Rate Transactions</li> <li>Rate Transaction and Aggregate Calc Lines Across Transaction</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li>Rate Transactions</li></ul>	
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"><li>Daily</li><li>Weekly</li><li>Monthly</li><li>Quarterly</li><li>Yearly</li></ul>	Yes
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"><li>Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li><li>No - Used to Indicate aggregation is required while rating the transactions before billing.</li></ul>	Yes
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"><li>Yes</li><li>No</li></ul>	Yes

- Parameters** - Used to associate the parameters based on which you want to define the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears.	<b>Note:</b> This field is required while associating parameters with the price item pricing.
	The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.	
Parameter Value	Used to specify the value of the parameter.	Yes (Conditional)
		<b>Note:</b> This field is required while associating parameters with the price item pricing.

- Characteristics** - Used to define a list of characteristics for the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b> .	<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining characteristics for the price item pricing

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).	Not applicable
	<b>Note:</b> It is a read-only field and cannot be edited.  This ID is generated automatically when you define the tiering setup of the rate component.	
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	Yes
Description	Used to specify the description of the price component.	Yes
Show Price Component	Used to indicate whether you want to display the price component in the bill.	Yes (Conditional)
		<b>Note:</b> This field is required for displaying the price component in the bill.

Column Name	Column Description	Mandatory (Yes or No)										
Rate	Used to specify the rate defined for the price component.	Yes										
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	Yes (Conditional)										
		<b>Note:</b> This field is required for specifying the tiering criteria and eligibility criteria of the price component for the price item pricing.										
Tier Details	On clicking the <b>Add</b> (⊕) icon, you can view and edit the <b>Tiering Criteria</b> of the price component for the price item pricing. It contains the following columns:	Yes (Conditional)										
	<table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the sequence of the tiering criteria.</td></tr><tr><td>Tiering Criterion</td><td>Used to indicate the tiering criteria.</td></tr><tr><td>Lower Limit</td><td>Used to specify the lower limit of the tiering range.</td></tr><tr><td>Upper Limit</td><td>Used to specify the upper limit of the tiering range.</td></tr></table>	Column Name	Column Description	Display Sequence	Used to specify the sequence of the tiering criteria.	Tiering Criterion	Used to indicate the tiering criteria.	Lower Limit	Used to specify the lower limit of the tiering range.	Upper Limit	Used to specify the upper limit of the tiering range.	<b>Note:</b> This field is required for specifying the tiering criteria of the price component for the price item pricing.
	Column Name	Column Description										
	Display Sequence	Used to specify the sequence of the tiering criteria.										
	Tiering Criterion	Used to indicate the tiering criteria.										
	Lower Limit	Used to specify the lower limit of the tiering range.										
	Upper Limit	Used to specify the upper limit of the tiering range.										
<b>Note:</b> You can edit the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b> .												
Eligibility Details	On clicking the <b>Add</b> (⊕) icon, you can view and edit the eligibility criteria of the price component for the price item pricing. It contains the following columns:	Yes (Conditional)										
	<table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the order in which the eligibility criteria should be executed in the rule.</td></tr><tr><td rowspan="3">Parameter</td><td>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</td></tr><tr><td><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</td></tr><tr><td></td></tr></table>	Column Name	Column Description	Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.	Parameter	Used to indicate the left hand side parameter which you want to use along with the price item for price determination.	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.		<b>Note:</b> This field is required for specifying the eligibility criteria of the price component for the price item pricing.		
	Column Name	Column Description										
	Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.										
	Parameter	Used to indicate the left hand side parameter which you want to use along with the price item for price determination.										
		<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.										

Column Name	Column Description		Mandatory (Yes or No)
	<b>Column Name</b>	<b>Column Description</b>	
	Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.	
	Parameter Value Type	Used to indicate the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"><li>• <b>Parameter</b> - Used to indicate the type of parameter.</li><li>• <b>Value</b> - Used to indicate the type of value.</li></ul>	
	Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.	
		<b>Note:</b> If you select the <b>Parameter Value Type</b> as <b>Parameter</b> , the <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.  If you select the <b>Parameter Value Type</b> as <b>Value</b> then you can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon (;) in the <b>Parameter</b> field.	
	Is True	Used to indicate what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	

Column Name	Column Description		Mandatory (Yes or No)
	Column Name	Column Description	
	Is False	Used to indicate what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	
	Is Insufficient	Used to indicate what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	
	<b>Note:</b> You can edit the eligibility criteria of a price component only when the <b>Pricing Eligibility</b> check box is selected.		

2. Modify the required details in the **Projected Pricing** zone.
3. Click **Save**  
The changes made to the proposed price item pricing are saved.

# Overriding a Proposed Price Item Pricing

### Prerequisites

To override a proposed price item pricing, you should have:

- Values defined for the **Price Assignment Type** in the **PA\_TYPE\_FLAG** lookup field
- Currencies defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Values defined for **Transaction Rating Criteria** in the **TXN\_RATING\_CRITERIA** lookup field
- Values defined for **Pricing Rule Type** in the **PRC\_RULE\_TYPE\_FLG** lookup field
- Aggregation schedules defined in the application
- Parameters defined in the application (where the **Price Item** option is selected in the **Parameter Usage** section)
- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Pricing**)
- Transactions mapped to the price item defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application

### Procedure

To override a proposed price item pricing:

1. Ensure that the **Projected Pricing** zone is expanded in the **Pricing and Commitments** screen when you are overriding the *proposed pricing* of a price item.

The **Projected Pricing** zone contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Override	Used to indicate whether you want to override the price item pricing.	Yes

**Note:**

A new price assignment ID is created when you override a proposed price item pricing.

While overriding a price item pricing, you can define a seasonal pricing for a price item by changing the pricing effective date to a date greater than the deal start date.

In addition, the **Projected Pricing** zone contains the following sections:

- **Main** - Used to specify basic details about the price item pricing. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment ID	Displays the price assignment ID.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Price Item	Displays the price item whose pricing you want to edit.	Not Applicable
	<b>Note:</b> It is a read-only field and cannot be edited.	
Start Date	Use to specify the date from when the pricing of the price item is effective for the deal.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> By default the deal start date appears in this field.	
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> - Used to indicate that the pricing is used to generate regular bill segment.</li> <li>• <b>Post Processing</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item Relationship Type</b>.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing - Invoice Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <p><b>Note:</b> This is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing - Price Item Based</b> - Used to indicate that the pricing is used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <p><b>Note:</b> This field is not applicable for price items whose <b>Price Item Usage</b> field is set to <b>Pricing</b>.</p>	Yes
End Date	Used to specify the date till when the pricing of the price item is effective for the deal.	No
Pricing Currency	Used to indicate the currency in which you want to define the pricing of the price item.	Yes
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item pricing.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> If you select the check box you can define the pricing eligibility of the price item in the <b>Price Component</b> section of this zone.	
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. <p><b>Note:</b></p> Rate schedules control how the bills for the price item will be calculated. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> window appears where you can search for the respective rate schedule.	Yes

- **TFM Information** - Used to map the transaction details with the price item. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> <li>• Rate Transactions</li> </ul>	Yes
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>	Yes
Do Not Aggregate Switch	Used to Indicate whether aggregation is required while rating the transactions before billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes - Used to Indicate aggregation is not required while rating the transactions before billing.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li>No - Used to Indicate aggregation is required while rating the transactions before billing.</li></ul>	
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"><li>Yes</li><li>No</li></ul>	Yes

- Parameters** - Used to associate the parameters based on which you want to define the pricing of the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears.  The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.	<b>Note:</b> This field is required while associating parameters with the price item pricing.
Parameter Value	Used to specify the value of the parameter.	Yes (Conditional)
		<b>Note:</b> This field is required while associating parameters with the price item pricing.

- Characteristics** - Used to define a list of characteristics for the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for price item pricing.	Yes (Conditional)
		<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Projected Pricing</b> .	<b>Note:</b> This field is required while defining characteristics for the price item pricing
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining characteristics for the price item pricing

- **Price Component** - Used to define a list of price components of the rate component that you want to map with the price item pricing. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Rate Component	Displays the concatenated string of information about the rate component separated by comma (,).	Not applicable
	<b>Note:</b> It is a read-only field and cannot be edited.  This ID is generated automatically when you define the tiering setup of the rate component.	
Display Sequence	Used to specify the sequence of price component whose rate is used for calculating the pricing of the price item.	Yes
Description	Used to specify the description of the price component.	Yes
Show Price Component	Used to indicate whether you want to display the price component in the bill.	Yes (Conditional)
		<b>Note:</b> This field is required for displaying the price component in the bill.
Rate	Used to specify the rate defined for the price component.	Yes
Eligibility and Tier Details	Used to specify the tiering criteria and eligibility criteria of the price component for the price item pricing.	Yes (Conditional)
		<b>Note:</b> This field is required for specifying the tiering criteria and eligibility criteria of the price component for the price item pricing.
Tier Details	On clicking the <b>Add</b> (➕) icon, you can view and edit the <b>Tiering Criteria</b> of the price component	Yes (Conditional)

Column Name	Column Description	Mandatory (Yes or No)									
	for the price item pricing. It contains the following columns:	<b>Note:</b> This field is required for specifying the tiering criteria of the price component for the price item pricing.									
	<table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the sequence of the tiering criteria.</td></tr><tr><td>Tiering Criterion</td><td>Used to indicate the tiering criteria.</td></tr><tr><td>Lower Limit</td><td>Used to specify the lower limit of the tiering range.</td></tr><tr><td>Upper Limit</td><td>Used to specify the upper limit of the tiering range.</td></tr></table>		Column Name	Column Description	Display Sequence	Used to specify the sequence of the tiering criteria.	Tiering Criterion	Used to indicate the tiering criteria.	Lower Limit	Used to specify the lower limit of the tiering range.	Upper Limit
	Column Name	Column Description									
	Display Sequence	Used to specify the sequence of the tiering criteria.									
	Tiering Criterion	Used to indicate the tiering criteria.									
	Lower Limit	Used to specify the lower limit of the tiering range.									
	Upper Limit	Used to specify the upper limit of the tiering range.									
<b>Note:</b> You can edit the tiering criteria of a price component only when the <b>Tiering Type</b> of its rate component is <b>STEP</b> or <b>THRESHOLD</b> .											
Eligibility Details	On clicking the <b>Add</b> (⊕) icon, you can view and edit the eligibility criteria of the price component for the price item pricing. It contains the following columns:	Yes (Conditional)									
	<table><tr><th>Column Name</th><th>Column Description</th></tr><tr><td>Display Sequence</td><td>Used to specify the order in which the eligibility criteria should be executed in the rule.</td></tr><tr><td rowspan="2">Parameter</td><td>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</td></tr><tr><td><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</td></tr><tr><td>Operator</td><td>Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.</td></tr></table>	Column Name	Column Description	Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.	Parameter	Used to indicate the left hand side parameter which you want to use along with the price item for price determination.	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.	Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.	
	Column Name	Column Description									
	Display Sequence	Used to specify the order in which the eligibility criteria should be executed in the rule.									
	Parameter	Used to indicate the left hand side parameter which you want to use along with the price item for price determination.									
		<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.									
Operator	Used to specify the relational operator to define the relation between the left hand side and right hand side parameters.										

Column Name	Column Description		Mandatory (Yes or No)
	<b>Column Name</b>	<b>Column Description</b>	
	Parameter Value Type	Used to indicate the type of pricing eligibility. The valid values are: <ul style="list-style-type: none"><li>• <b>Parameter</b> - Used to indicate the type of parameter.</li><li>• <b>Value</b> - Used to indicate the type of value.</li></ul>	
	Parameter	Used to specify the value for the <b>Parameter Value Type</b> as the right hand side parameter which you want to use along with the price item for price determination.	
		<b>Note:</b> If you select the <b>Parameter Value Type</b> as <b>Parameter</b> , the <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.  If you select the <b>Parameter Value Type</b> as <b>Value</b> then you can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon (;) in the <b>Parameter</b> field.	
	Is True	Used to indicate what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li></ul>	

Column Name	Column Description		Mandatory (Yes or No)
	Column Name	Column Description	
		<ul style="list-style-type: none"><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	
	Is False	Used to indicate what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	
	Is Insufficient	Used to indicate what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"><li>• <b>Check next condition</b> - Used to indicate that the condition with the consecutive sequence number is executed.</li><li>• <b>Rule is false</b> - Used to indicate that the action specified in the <b>Rule False Action</b> field is executed.</li><li>• <b>Rule is true</b> - Used to indicate that the action specified in the <b>Rule True Action</b> field is executed.</li></ul>	

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> You can edit the eligibility criteria of a price component only when the <b>Pricing Eligibility</b> check box is selected.	

- 2. Enter the required details in the **Projected Pricing** zone.
- 3. Click **Override**.  
The proposed price item pricing is overridden.

<b>Pricing and Commitments</b> screen	<a href="#">Pricing and Commitments</a> on page 3013

**Editing a Proposed Commitment**

**Prerequisites**

To edit a proposed commitment you should have:

- Proposed commitments defined for a price item

**Procedure**

To edit a proposed commitment:

- 1. Ensure that price item hierarchy is expanded in the **Pricing and Commitments** section of the **Pricing and Commitments** screen.
- 2. In the **Pricing and Commitments** section, click the **Edit** (✎) icon in the **Volume and Commitments** column corresponding to the price item whose proposed commitment you want to edit.

The **Pricing and Commitments** screen appears. It contains the following sections:

- **Proposed Commitments** - Used to view or edit the proposed commitments of the price item for a customer or an account in a deal.
- **Original Volume** - Displays information about the existing commitments of the price item.

The **Proposed Commitments** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Price Item	Displays the price item.	Not applicable
Pricing Parameters	Indicates the price item parameters which are used along with the price item for determining the price item pricing.	Not applicable
SQI	Indicates the service quantity identifier.	Not applicable
Service Quantity	Used to specify the SQI value using which the rates engine calculates the price item pricing.	Yes

- 3. Modify the required details in the **Proposed Commitments** section.

**Note:** You cannot edit a proposed commitment of a price item if the deal or deal version is in the **Finalized** status.

- 4. Click **Save**.

The changes made to the proposed commitment is saved.

# Mapping Terms and Conditions

The **Mapping Terms and Conditions** screen enables you to associate deal-specific terms and conditions with a price item or hierarchy entity of a person or account from the customer hierarchy in a deal. It contains the following sections:

- **Main** - The **Main** section indicates the price item or hierarchy entity with which you want to associate deal-specific terms and conditions. It contains the following fields:

Field Name	Field Description
Price Item	Indicates the price item of the person or account from the customer hierarchy in a deal with which you want to associate deal-specific terms and conditions.
	<b>Note:</b> This field appears when you are associating deal-specific terms and conditions with a price item.
Hierarchy Entity	Indicates the hierarchy entity of the person or account from the customer hierarchy in a deal with which you want to associate deal-specific terms and conditions.
	<b>Note:</b> This field appears when you are associating deal-specific terms and conditions with a hierarchy entity.

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section allows you to associate or disassociate deal-specific terms and conditions from the price item or hierarchy entity of a person or account from the customer hierarchy in a deal. It contains the following columns:

Column Name	Column Description
Terms and Conditions	Used to indicate a deal-specific term and condition which you want to associate with the price item or the hierarchy entity of the person or account.
Default	Used to indicate whether the term and condition is default or not.

## Editing Deal-Specific Terms and Conditions

### Prerequisites

To edit deal-specific terms and conditions you should have:

- Terms and conditions associated with the deal

### Procedure

To edit deal-specific terms and conditions:

1. Search for the deal in the **Deal Dashboard** screen.
2. In the **Search Results** section, click the link in the **Deal Information** column corresponding to the deal whose terms and conditions you want to edit.  
The **Deal Information** screen appears.
3. Ensure that the customer hierarchy is expanded in the **Simulation Details** zone.
4. Click the **Edit** (🔗) icon in the **Pricing and Commitments** column corresponding to the person or account whose terms and conditions you want to edit.  
The **Pricing and Commitments** screen appears.
5. Ensure that the **Price Item Hierarchy** sub-section is expanded in the **Pricing and Commitments** section when you are editing the deal-specific terms and conditions.
6. Click the **Edit** (🔗) icon in the **Terms and Conditions** column corresponding to the price item, root level hierarchy entity, or non-level hierarchy entity whose terms and conditions you want to edit.

The **Mapping Terms and Conditions** screen appears. It contains the following sections:

- **Main** - The **Main** section displays the hierarchy entity to which the deal-specific terms and conditions are associated. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Indicates the price item whose deal-specific terms and conditions you want to edit.	Not applicable
	<b>Note:</b> This field appears when you are editing the deal-specific terms and conditions of a price item.	
Root Level Hierarchy Entity	Indicates the root level hierarchy entity whose deal-specific terms and conditions you want to edit.	Not applicable
	<b>Note:</b> This field appears only when you are editing the deal-specific terms and conditions of a root level hierarchy entity.	
Non-Root Level Hierarchy Entity	Indicates the non-root level hierarchy entity whose deal-specific terms and conditions you want to edit.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears only when you are editing the deal-specific terms and conditions of a non-root level hierarchy entity.	

- **Deal-Specific Terms and Conditions** - The **Deal-Specific Terms and Conditions** section lists the deal-specific terms and conditions associated with the hierarchy entity. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Terms and Conditions	Indicates the deal-specific terms and conditions associated with the price item, root level hierarchy entity, or non-root level hierarchy entity.	Not applicable
Default	Indicates whether the term and condition is default or not.	Not applicable

7. Edit the required term and condition in the **Deal-Specific Terms and Conditions** section.

**Note:** You can only disassociate a deal-specific term and condition from the **Deal-Specific Terms and Conditions** section.

8. Click the **Delete** (🗑️) icon corresponding to the term and condition that you want to disassociate from the deal.

**Note:** You cannot delete a term and condition which is set as default for the hierarchy entity.

9. Click **Save**.  
The changes are made to the deal-specific terms and conditions.

# Terms and Conditions

The **Terms and Conditions** screen allows you to associate, disassociate, edit, or view the terms and conditions of the deal. It also allows you to add adhoc terms and conditions for the deal. It contains the following field:

Field Name	Field Description
Deal Information	Displays the concatenated string of information about the deal.

In addition, the **Terms and Conditions** screen contains the following sections:

- **Terms and Conditions Section** - Lists the terms and conditions that are mapped to the deal. It contains the following buttons:

Button Name	Button Description
Select All	Used to select all the available terms and conditions for the deal from the list.
De-select All	Used to de-select all the terms and conditions from the list.
Refresh Terms and Conditions	Used to de-select the terms and conditions that are selected for the deal from the list.

**Note:** You can also select or de-select the terms and conditions by clicking the check box corresponding to the respective terms and conditions.

On clicking the **Edit** (🔗) icon corresponding to the terms and conditions in the **Terms and Conditions Section** section, you can view and edit the terms and conditions of the deal.

- **Adhoc Terms and Conditions** - Used to add adhoc terms and conditions for the deal.

## Associating the Terms and Conditions with a Deal

### Prerequisites

To associate terms and conditions with a deal you should have:

- Terms and conditions defined in the application

### Procedure

To associate terms and conditions with a deal:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen to which you want to associate the terms and conditions.
2. Click the **Deal Terms and Conditions** link at the top right corner of the **Deal Information** zone.  
The **Terms and Conditions** screen appears.
3. Ensure that the **Terms and Conditions** section is expanded in the **Terms and Conditions** screen.
4. Select the required terms and conditions by clicking the check box corresponding to the terms and conditions in the **Terms and Conditions** section.
5. Click **Save**.  
The terms and conditions are associated with the deal.

**Note:** You can associate terms and conditions with a deal until the deal is in the **Customer Accepted** or **Rejected** status.

## Editing the Terms and Conditions of a Deal

### Prerequisites

To edit the terms and conditions of a deal you should have:

- Terms and conditions associated with the deal

### Procedure

To edit the terms and conditions of a deal:

1. Search for the deal in the **Search Deal** zone of the **Deal Dashboard** screen.
2. Click the **Deal Terms and Conditions** link at the top right corner of the **Deal Information** zone.  
The **Terms and Conditions** screen appears.
3. Ensure that the **Terms and Conditions Section** section is expanded in the **Terms and Conditions** screen.
4. Click the **Edit** (✎) icon corresponding to the terms and conditions which you want to edit.  
The **Terms and Conditions** window appears. It contains the following fields:

Field Name	Field Description
Terms and Conditions	Indicates the terms and conditions associated with the deal.
Description	Displays the description of the terms and conditions.
Attached File Name	Indicates the terms and conditions document name.
Terms and Conditions Text	Displays the terms and conditions.

5. Click **Edit**.  
The **Terms and Conditions Text** field is enabled.
6. Modify the required information from the terms and conditions in the **Terms and Conditions Text** field.
7. Click **Save**.  
The changes made to the terms and conditions are saved.

**Note:** You can edit the terms and conditions of a deal until the deal is in the **Customer Accepted** or **Rejected** status.

## Deal Log and Comments

The **Deal Log and Comments** screen allows you to view the complete trail of actions performed on the deal. It also allows you to manually add a log entry for the deal. It contains the following sections:

- **Log** - The **Log** section contains the following fields:

Field Name	Field Description
Deal ID	Displays the deal ID.
Deal Information	Displays the concatenated string of deal information separated by a comma (,).

In addition, the **Log** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the deal due to which the log is created in the system.
Details	Displays the details of the actions performed on the deal.
User	Indicates the user who has performed the action on the deal.
Log Type	Indicates the type of log using which the action is performed on the deal.

Column Name	Column Description
Related Object	Indicates the object or entity which is created when the action is performed on the deal.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the action is performed on the deal.

- **Comments** - The **Comments** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the log entry is created for the deal in the system.
User	Indicates the user who has created the log entry for the deal in the system.
Comments	Displays additional information about the log entry created for the deal.
Reason	Displays the reason why the log entry is created for the deal.

In addition, the **Comments** section contains the following fields:

Field Name	Field Description
Reason	Used to specify the reason why the log entry is created for the deal.
	<b>Note:</b> This list includes only those values which are defined in the <b>Approval Workflow Reason</b> screen where the <b>Reason Category</b> is set to <b>Deal General</b> .
Comment	Used to specify the reason for creating a new log entry for the deal.

## Adhoc Revenue and Cost

The **Adhoc Revenue and Cost** screen allows you to add, edit, or view the additional charges applicable for the deal while deal creation. It also allows you to add price item level adhoc charges for the deal. It contains the following fields in a grid:

Field Name	Field Description
Sequence	Used to specify the sequence number of the adhoc revenue or cost for the deal.
Currency	Used to indicate the currency in which you want to specify the adhoc charge for the deal. <b>Note:</b> The list includes only those currencies which are defined in the system.
Amount	Used to specify the amount for the adhoc revenue or cost. <b>Note:</b> You can also specify negative value in this field.
Division	Used to indicate the division for which the adhoc charge is applicable.

Field Name	Field Description
	<b>Note:</b> You can view only those divisions to which you have access in the <b>Division</b> list.
Price Item	Used to indicate the price item for which you want to add the adhoc charge.  <b>Note:</b> By default, this field is inactive. This field appears when the <b>Price Item Level</b> option is selected from the <b>Revenue/Cost Type</b> list. The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears. On indicating the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.
Revenue/Cost Type	Used to indicate the group to which the adhoc charge belong. The valid values are: <ul style="list-style-type: none"><li>• Adhoc Revenue</li><li>• Courier Cost</li><li>• Deal Commission</li><li>• Price Item Level</li><li>• Travel Cost</li></ul> <b>Note:</b> The list includes only those values which are present in the <b>REVENUE_COST_GRP_FLG</b> lookup field.
Amount Type	Used to indicate the type of amount using which you want to add an adhoc charge for the deal. The valid values are: <ul style="list-style-type: none"><li>• Cost</li><li>• Revenue</li></ul> <b>Note:</b> The list includes only those values which are present in the <b>REV_TYPE_FLG</b> lookup field.

How to add an adhoc revenue or cost for a deal	<a href="#">Adding Adhoc Revenue and Cost for a Deal</a> on page 3053

## Adding Adhoc Revenue and Cost for a Deal

**Prerequisites**

To add an adhoc revenue and cost for a deal, you should have:

- Currencies defined in the application

- Values defined for the **Revenue/Cost Type** and **Revenue Type** in the **REVENUE\_COST\_GRP\_FLG** and **REV\_TYPE\_FLG** lookup fields respectively.

### Procedure

To add an adhoc revenue and cost for a deal:

- Search for the deal or deal version in the **Search Deal** zone of the **Deal Dashboard** screen for which you want to add an adhoc revenue and cost.
- Click the **Adhoc Revenue and Cost** link at the top right corner of the **Deal Information** zone.  
The **Adhoc Revenue And Cost** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence number of the adhoc revenue or cost for the deal.	Yes
Currency	Used to indicate the currency in which you want to specify the adhoc charge for the deal.	Yes
	<b>Note:</b> The list includes only those currencies which are defined in the system.	
Amount	Used to specify the amount for the adhoc revenue or cost.	Yes
	<b>Note:</b> You can also specify negative value in this field.	
Division	Used to indicate the division for which the adhoc charge is applicable.	Yes
	<b>Note:</b> You can view only those divisions to which you have access in the <b>Division</b> list.	
Price Item	Used to indicate the price item for which you want to add the adhoc charge.	Yes (Conditional)
	<b>Note:</b> By default, this field is inactive. This field appears when the <b>Price Item Level</b> option is selected from the <b>Revenue/Cost Type</b> list.  The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.  On indicating the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.	<b>Note:</b> This field is required while adding adhoc revenue and cost for price items.
Revenue/Cost Type	Used to indicate the group to which the adhoc charge belongs. The valid values are: <ul style="list-style-type: none"> <li>Adhoc Revenue</li> <li>Courier Cost</li> <li>Deal Commission</li> <li>Price Item Level</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li>Travel Cost</li></ul>	
	<b>Note:</b> The list includes only those values which are present in the <b>REVENU_COST_GRP_FLG</b> lookup field.	
Amount Type	Used to indicate the type of revenue using which you want to add an adhoc charge for the deal. The valid values are: <ul style="list-style-type: none"><li>Cost</li><li>Revenue</li></ul>	Yes
	<b>Note:</b> The list includes only those values which are present in the <b>REV_TYPE_FLG</b> lookup field.	

- 3. Enter the required details in the **Adhoc Revenue And Cost** screen.
- 4. If you want to associate more than one adhoc revenue and cost for the deal, click the **Add (+)** icon corresponding to the adhoc revenue and cost and then repeat step 3.

**Note:** However, if you want to remove an adhoc revenue and cost from the deal, click the **Delete (🗑)** icon corresponding to the adhoc revenue and cost.

- 5. Click **Save**.  
The adhoc revenue and cost is added for the deal.

**Note:** You cannot add or edit an adhoc revenue and cost if the deal has reached the **Finalized** status.

## Terms and Conditions Mapping List

The **Terms and Conditions Mapping List** zone lists the terms and conditions that are already mapped to a price item, root-level hierarchy entity, or a non-root level hierarchy entity in the system. It contains the following columns:

Column Name	Column Description
Mapping Information	Displays the concatenated string of information about the mapped terms and conditions.
	<b>Note:</b> It has a link. On clicking the link, the <b>Terms and Conditions Mapping Details</b> zone appears where you can view the mapping details of the respective terms and conditions.
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are mapped in the system. The valid values are: <ul style="list-style-type: none"><li>• Price Item</li><li>• Non-Root Level Hierarchy Entity</li><li>• Root Level Hierarchy Entity</li></ul>
Mapping Entity	Displays the entity to which the terms and conditions are mapped.

You can filter the list using various search criteria (such as, **Mapping ID**, **Terms and Conditions**, and **Mapping Entity Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📢) icon corresponding to the terms and conditions mapping information, the **Terms and Conditions Mapping Details** zone appears with the mapping details of the respective terms and conditions.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Terms and Conditions Mapping Details

The **Terms and Conditions Mapping Details** zone displays the mapping details of the terms and conditions. It contains the following sections:

- **Main** - Displays the basic mapping information about the terms and conditions. It contains the following fields:

Field Name	Field Description
Mapping ID	Displays the mapping ID of the terms and conditions.
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are mapped in the system. The valid values are: <ul style="list-style-type: none"><li>• Price Item</li><li>• Non-Root Level Hierarchy Entity</li><li>• Root Level Hierarchy Entity</li></ul>
Mapping Entity	Indicates the entity to which the terms and conditions are mapped.
Price Item	Indicates the price item to which the terms and conditions are mapped.
	<b>Note:</b> This field appears when the terms and conditions are mapped using the <b>Mapping Entity Type</b> as <b>Price Item</b> .
Non-Root Level Hierarchy Entity	Indicates the non-root level hierarchy entity to which the terms and conditions are mapped.
	<b>Note:</b> This field appears when the terms and conditions are mapped using the <b>Mapping Entity Type</b> as <b>Non-Root Level Hierarchy Entity</b> .
Root Level Hierarchy Entity	Indicates the root level hierarchy entity to which the terms and conditions are mapped.
	<b>Note:</b> This field appears when the terms and conditions are mapped using the <b>Mapping Entity Type</b> as <b>Root Level Hierarchy Entity</b> .

- **Record Actions** - This section contains the following button:

Button Name	Button Description
Edit	Used to edit the mapping details of the terms and conditions.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the terms and conditions are mapped to the entity. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Terms and Conditions** - Lists the terms and conditions which are mapped to the entity. It contains the following columns:

Column Name	Column Description
Terms and Conditions	Displays the terms and conditions which are mapped to the entity.
	<b>Note:</b> It has a link. On clicking the link, the <b>Terms and Conditions</b> screen appears where you can view the details of the respective terms and conditions.
Start Date	Displays the date from when the terms and conditions are effective for the entity.
	<b>Note:</b> The start date cannot be later than the end date.
End Date	Displays the date till when the terms and conditions are effective for the entity.
	<b>Note:</b> The end date cannot be earlier than the start date.
Default	Indicates whether the mapped term and condition is default or not.

By default, the **Terms and Conditions Mapping Details** zone does not appear in the **Terms and Conditions Mapping** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the terms and conditions mapping information in the **Terms and Conditions Mapping List** zone.

## Associating the Terms and Conditions with a Price Item

**Prerequisites**

To associate the terms and conditions with a price item, you should have:

- Price item with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

**Procedure**

To associate the terms and conditions with a price item:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Terms and Conditions Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

The **Terms and Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity Type	<p>Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Price Item</b> - Used to indicate that you want to associate the terms and conditions with a price item.</li> <li>• <b>Non-Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity.</li> <li>• <b>Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.</li> </ul>	Yes
Mapping Entity	<p>Used to indicate the entity with which you want to associate the terms and conditions.</p>	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Mapping Entity</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Mapping Search</b>, <b>Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search</b>, or <b>Root Level Hierarchy Entity Terms and Conditions Mapping Search</b> window appears depending upon whether you select the <b>Price Item</b>, <b>Non-Root Level Hierarchy Entity</b>, or <b>Root-Level Hierarchy Entity</b> option from the <b>Mapping Entity Type</b> field respectively.</p> <p>On indicating the mapping entity, the description of the mapping entity appears corresponding to the <b>Mapping Entity</b> field.</p> <p>This field appears when you select the mapping entity type from the <b>Mapping Entity Type</b> field.</p>	

- **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions that you want to associate with the entity.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.</p> <p>On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.</p> <p>You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b>.</p>	
Start Date	<p>Used to specify the date from when the terms and conditions are associated with the entity.</p> <p><b>Note:</b> The start date cannot be later than the end date.</p>	Yes
End Date	<p>Used to specify the date till when the terms and conditions are associated with the entity.</p> <p><b>Note:</b> The end date cannot be earlier than the start date.</p>	No
Default	<p>Used to indicate whether the terms and conditions should be defaulted for the entity.</p> <p><b>Note:</b> You must specify atleast one default terms and conditions for an entity.</p>	No

4. Select the **Price Item** option from the **Mapping Entity Type** field in the **Main** section.  
The **Mapping Entity** field appears.
5. Search for the price item with which you want to associate the terms and conditions in the **Mapping Entity** field.
6. Associate terms and conditions with the price item in the **Terms and Conditions** section.

**Note:** The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.

7. If you want to associate more than one terms and conditions with the price item, click the **Add** (+) icon.

**Note:** However, if you want to disassociate the terms and conditions from the price item, click the **Delete** (🗑) icon corresponding to the respective terms and conditions.

8. Click **Save**.  
The terms and conditions are associated with the price item.

# Associating the Terms and Conditions with a Root Level Hierarchy Entity

**Prerequisites**

To associate the terms and conditions with a root level hierarchy entity, you should have:

- Hierarchy entity with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

**Procedure**

To associate the terms and conditions with a root level hierarchy entity:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Terms and Conditions Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

The **Terms and Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity Type	Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are: <ul style="list-style-type: none"><li>• <b>Price Item</b> - Used to indicate that you want to associate the terms and conditions with a price item.</li><li>• <b>Non-Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity.</li><li>• <b>Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.</li></ul>	Yes
Mapping Entity	Used to indicate the entity with which you want to associate the terms and conditions.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Mapping Entity</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Mapping Search, Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search, or Root Level Hierarchy Entity Terms and Conditions Mapping Search</b> window appears depending upon whether you select the <b>Price Item, Non-Root Level Hierarchy Entity, or Root-Level Hierarchy Entity</b> option from the <b>Mapping Entity Type</b> field respectively.</p> <p>On indicating the mapping entity, the description of the mapping entity appears corresponding to the <b>Mapping Entity</b> field.</p> <p>This field appears when you select the mapping entity type from the <b>Mapping Entity Type</b> field.</p>	

- **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions that you want to associate with the entity.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.</p> <p>On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.</p> <p>You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b>.</p>	
Start Date	Used to specify the date from when the terms and conditions are associated with the entity.	Yes
	<p><b>Note:</b> The start date cannot be later than the end date.</p>	
End Date	Used to specify the date till when the terms and conditions are associated with the entity.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the entity. <b>Note:</b> You must specify atleast one default terms and conditions for an entity.	No

- 4. Select the **Root Level Hierarchy Entity** option from the **Mapping Entity Type** field in the **Main** section. The **Mapping Entity** field appears.
- 5. Search for the root level hierarchy entity with which you want to associate the terms and conditions in the **Mapping Entity** field.
- 6. Associate terms and conditions with the root level hierarchy entity in the **Terms and Conditions** section.

**Note:** The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.

- 7. If you want to associate more than one terms and conditions with the root level hierarchy entity, click the **Add (+)** icon.

**Note:** However, if you want to disassociate the terms and conditions from the root level hierarchy entity, click the **Delete (■)** icon corresponding to the respective terms and conditions.

- 8. Click **Save**.  
The terms and conditions are associated with the root level hierarchy entity.

## Associating the Terms and Conditions with a Non-Root Level Hierarchy Entity

**Prerequisites**

To associate the terms and conditions with a non-root level hierarchy entity, you should have:

- Hierarchy entity with which you want to associate the terms and conditions defined in the application
- Terms and conditions defined in the application

**Procedure**

To associate the terms and conditions with a non-root level hierarchy entity:

- 1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
- 2. From the **Main** menu, select **Deal Pricing Management** and then click **Terms and Conditions Mapping**.  
A sub-menu appears.
- 3. Click the **Add** option from the **Terms and Conditions Mapping** sub-menu.

The **Terms and Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity) with which you want to associate the terms and conditions. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping Entity Type	<p>Used to indicate the type of entity using which you want to associate the terms and conditions. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Price Item</b> - Used to indicate that you want to associate the terms and conditions with a price item.</li> <li>• <b>Non-Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a non-root level hierarchy entity.</li> <li>• <b>Root Level Hierarchy Entity</b> - Used to indicate that you want to associate the terms and conditions with a root level hierarchy entity.</li> </ul>	Yes
Mapping Entity	<p>Used to indicate the entity with which you want to associate the terms and conditions.</p>	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Mapping Entity</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Mapping Search</b>, <b>Non-Root Level Hierarchy Entity Terms and Conditions Mapping Search</b>, or <b>Root Level Hierarchy Entity Terms and Conditions Mapping Search</b> window appears depending upon whether you select the <b>Price Item</b>, <b>Non-Root Level Hierarchy Entity</b>, or <b>Root-Level Hierarchy Entity</b> option from the <b>Mapping Entity Type</b> field respectively.</p> <p>On indicating the mapping entity, the description of the mapping entity appears corresponding to the <b>Mapping Entity</b> field.</p> <p>This field appears when you select the mapping entity type from the <b>Mapping Entity Type</b> field.</p>	

- **Terms and Conditions** - Used to associate the terms and conditions with the entity (i.e. price item, non-root level hierarchy entity, or root level hierarchy entity). It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions that you want to associate with the entity.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search</b> window appears.  On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.  You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b> .	
Start Date	Used to specify the date from when the terms and conditions are associated with the entity.	Yes
	<b>Note:</b> The start date cannot be later than the end date.	
End Date	Used to specify the date till when the terms and conditions are associated with the entity.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the entity.	No
	<b>Note:</b> You must specify atleast one default terms and conditions for an entity.	

- 4. Select the **Non-Root Level Hierarchy Entity** option from the **Mapping Entity Type** field in the **Main** section. The **Mapping Entity** field appears.
- 5. Search for the non-root level hierarchy entity with which you want to associate the terms and conditions in the **Mapping Entity** field.
- 6. Associate terms and conditions with the non-root level hierarchy entity in the **Terms and Conditions** section.

**Note:** The valid file extensions for associating terms and conditions are doc, xls, pdf, jpg, txt, avi, bmp, mp3 and rtf.

- 7. If you want to associate more than one terms and conditions with the non-root level hierarchy entity, click the **Add** (+) icon.

**Note:** However, if you want to disassociate the terms and conditions from the non-root level hierarchy entity, click the **Delete** (🗑) icon corresponding to the respective terms and conditions.

- 8. Click **Save**.  
The terms and conditions are associated with the non-root level hierarchy entity.

## Editing the Terms and Conditions of a Price Item

### Prerequisites

To edit the terms and conditions of a price item, you should have:

- Terms and conditions associated with the price item.

### Procedure

To edit the terms and conditions of a price item:

1. Search for the price item in the **Terms and Conditions Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the price item whose terms and conditions you want to edit.  
The **Terms And Conditions Mapping Details** zone appears.
3. Click the **Edit** button in the **Terms And Conditions Mapping Details** zone.

The **Terms And Conditions Mapping** screen appears. It contains the following sections:

- **Main** - Displays the basic information about the price item whose terms and conditions you want to edit. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Mapping ID	Displays the terms and conditions mapping ID for the price item.	Not applicable
Mapping Entity Type	Indicates the type of entity using which the terms and conditions are associated with the price item. The valid value is: <ul style="list-style-type: none"><li>• Price Item</li></ul>	Not applicable
Mapping Entity	Indicates the price item with which the terms and conditions are associated.	Not applicable

- **Terms and Conditions** - Lists the terms and conditions that are associated with the price item. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Terms and Conditions	Used to indicate the terms and conditions that you want to associate with the price item.	Yes (Conditional)

Column Name	Column Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Terms and Conditions Search</b> window appears.  On indicating the terms and conditions, the description of the terms and conditions appear corresponding to the <b>Terms and Conditions</b> field.  You can search for only those terms and conditions whose <b>Terms and Conditions Usage</b> is set to <b>Deal</b> or <b>Invoice and Deal</b> and the <b>Terms and Conditions Applicability</b> is set to <b>Price Item</b> .	<b>Note:</b> This field is required while editing the terms and conditions of the price item.
Start Date	Used to specify the date from when the terms and conditions are associated with the price item.	Yes (Conditional)
	<b>Note:</b> The start date cannot be later than the end date.	<b>Note:</b> This field is required while editing the terms and conditions of the price item.
End Date	Used to specify the date till when the terms and conditions are associated with the price item.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	
Default	Used to indicate whether the terms and conditions should be defaulted for the price item.	Yes
	<b>Note:</b> You must specify atleast one default terms and conditions for a price item.	

- 4. Modify the required details in the **Terms and Conditions** section, if required.
- 5. Associate or disassociate the terms and conditions from the price item, if required.
- 6. Click **Save**.

The changes made to the terms and conditions of the price item are saved.

## Viewing the Terms and Conditions Mapping Details

### Prerequisites

To view the terms and conditions mapping details, you should have:

- Terms and conditions mapped with the entity (i.e. price item, root level hierarchy entity, or non-root level hierarchy entity).

### Procedure

To view the terms and conditions mapping details:

1. Search for the entity in the **Terms and Conditions Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (📢) icon corresponding to the entity whose terms and conditions mapping details you want to view.  
The **Terms And Conditions Mapping Details** zone appears.
3. View the terms and conditions mapping details in the **Terms And Conditions Mapping Details** zone.

### Related Topics

## Deal Approver Dashboard

The **Deal Approver Dashboard** screen allows you to view the To Do tasks assigned to the user that belongs to the access group as defined in the approval hierarchy of the **Deal Approval Profile** screen. It also allows you to search for deals which are assigned to the user for approval. It contains the following zones:

- [Deal Metrics](#) on page 3072
- [Deal To Do](#) on page 3073
- [Search Deal](#) on page 3073

## Deal Metrics

The **Deal Metrics** zone enables you to view the following information through a tiles chart for deals which are assigned to the user for approval:

- Number of deals created by the user
- Number of deals in the **Pending for Approval** status
- Number of deals yet to be finalized
- Number of deals yet to be accepted by the customer
- Number of deals accepted by the customer
- Number of deals rejected by the customer

In addition, you can view the above information through a bar and line chart by toggling the **Tiles/Chart** switch available in the **Deal Metrics** zone.

The bar chart indicates the number of deals in different statuses for an existing customer, existing account, and prospect. Whereas, the line chart indicates the deal revenue from an existing customer, existing account, and prospect.

**Note:** By default, the above information is shown for the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the information using various criteria (such as, **Period From**, **Period To**, **Division**, **Customer Tier**, and **Customer Segment**) available in the **Deal Metrics** zone.

**Related Topics**

**Deal To Do**

The **Deal To Do** zone lists the deal approval To Do's assigned to the user that belongs to the access group as defined in the approval hierarchy of the **Deal Approval Profile** screen. It also lists the deal information for which the deal approval To Do is generated. It contains the following columns:

Column name	Column Description
To Do	On clicking the <b>To Do</b> icon (🔔), the <b>To Do Entry</b> screen appears where you can view the details of the respective To Do assigned to the user.
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,) for which the To Do is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can perform the required action.

**Note:** By default, the system lists the To Do's for the user that are created in the period which is specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration. You can change the period if required.

You can filter the list using various criteria (such as, **To Do Type**, **Priority**, **Start Date**, and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

**Search Deal**

The **Search Deal** zone allows you to search deals for which the next required action has to be performed by the user as per the deal approval workflow. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a deal using the deal, customer, or account details. The valid values are: <ul style="list-style-type: none"><li>• Deal Details</li><li>• Customer Details</li></ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>Account Details</li> </ul>	
	<b>Note:</b> By default, the <b>Deal Details</b> option is selected.	
Division	Used to search deals which are associated with a particular division to which the user belongs.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Deal ID	Used to search for a particular deal.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	
Start Date	Used to search deals which are effective from a particular date onwards.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list. The start date cannot be later than the end date.	
End Date	Used to search deals which are effective till a particular date.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list. The end date cannot be earlier than the start date.	
Status	Used to search deals with a particular status.	No
	<b>Note:</b> This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	
Created By	Used to search deals which are created by a particular user.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears. On specifying the creator, the description of the creator appears corresponding to the <b>Created By</b> field. This field appears when the <b>Deal Details</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)

	<b>Note:</b> On clicking the check box you can search for deals as per the access group defined in the <b>Approval Hierarchy</b> of the <b>Deal Approval Profile</b> to which the user belongs.	<b>Note:</b> This field is required while searching deals which are assigned to the user for approval.

- **Search Results** - On clicking the **Search** button, a list of deals appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deal Information	Displays the concatenated string of information about the deal separated by a comma (,).
	<b>Note:</b> It has a link. On clicking the link, the <b>Deal Information</b> screen appears where you can view the details of the respective deal.
Person Information	Displays the concatenated string of information about the main person for whom the deal is created in the system.
	<b>Note:</b> It has a link. On clicking the link, the <b>Customer 360° Information</b> or the <b>Prospect Person</b> screen appears where you can view the details of the respective person.  The <b>Customer 360° Information</b> screen appears when you select the <b>Account</b> or <b>Customer</b> option from the <b>Deal Entity</b> list in the <b>Search Criteria</b> while searching for a deal. Whereas, the <b>Prospect Person</b> screen appears when you select the <b>Prospect</b> option from the <b>Deal Entity</b> list in the <b>Search Criteria</b> while searching for a deal.
Deal Entity	Indicates the entity for which the deal is created in the system. The valid values are: <ul style="list-style-type: none"><li>• Account</li><li>• Customer</li><li>• Prospect</li></ul>

Column Name	Column Description
Start Date	Displays the date from when the deal is effective for the deal entity.
End Date	Displays the date till when the deal is effective for the deal entity.
Status	Indicates the current status of the deal.
Created By	Displays the user who has created the deal in the system.
View Approval Workflow	On clicking the <b>View Approval Workflow</b> (🔍) icon, the <b>Deal Approval Workflow</b> screen appears where you can view the details of the approval workflow of the respective deal.
Print Deal	On clicking the <b>Print</b> (🖨) icon, the <b>Deal Extraction</b> screen appears where you can filter the options as per your requirement and extract the deal information in the PDF or Excel format.

**Note:**

By default, the **Search Results** section lists all the deals which are assigned to the user for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Searching for a Deal

### Prerequisites

To search for a deal, you should have:

- Divisions defined in the application
- Deals or deal versions associated with the division to which the user belongs
- Deal types defined in the application
- Deal entities defined in the application

### Procedure

To search for a deal:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deal Pricing Management** and then click **Deal Approver Dashboard**.  
The **Deal Approver Dashboard** screen appears.
3. Enter the search criteria in the **Search Deal** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of deals that meet the search criteria appears in the **Search Results** section.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Search Results** section lists all the deals which are assigned to user and are in the **Pending for Approval** status for the period as specified in the **Deal Limits in Months** option type of the **C1-DEAL** feature configuration.

You must specify at least one search criterion while searching for a deal. One more search criterion is required when you are searching for a deal using the deal entity.

You must specify one more search criterion when you are searching for a deal using the division with the **Deal Details** option selected from the **Search By** list.

Deal Information screen	<a href="#">Deal Information</a> on page 2871

## Viewing the Person Information

**Procedure**

To view the person information:

1. Search for the deal whose person information you want to view in the **Search Deal** zone of the **Deal Approver Dashboard** screen.
2. In the **Search Results** section, click the link in the **Person Information** column corresponding to the deal whose person information you want to view.

The **Customer 360° Information** or the **Prospect Person** screen appears.

**Note:** The **Customer 360° Information** screen appears when you select the **Account** or **Customer** option from the **Deal Entity** list in the **Search Criteria** while searching for a deal. Whereas, the **Prospect Person** screen appears when you select the **Prospect** option from the **Deal Entity** list in the **Search Criteria** while searching for a deal.

3. View the person information of the deal in the **Customer 360° Information - Person** tab or the **Prospect Person** screen.

## Relationship Manager Workbench

---

### Topics:

- [Relationship Manager Workbench](#)
- [Unpaid Invoices Page](#)
- [Inactive Customer Details](#)
- [Revenue Dashboard](#)

Oracle Revenue Management and Billing provides you one-point-destination for all the relationship/account managers an unified view of all customers under a single relationship manager on a screen named **Relationship Manager Workbench**. This data can then be easily used for analysis, such as:

- Cumulated revenue, average revenue, and unpaid revenue details of the customers
- Cumulated details, active, inactive, and newly added customers under the relationship manager based on number of months that customer has done the transaction from any account
- Number of deals in difference status

In other words, this feature allows you to drill down to see or act on all current and historical revenue management and billing details. This allows you professionally and efficiently to drive the customer engagement effectively and elevate customer relationships.

# Relationship Manager Workbench

The **Relationship Manager Workbench** screen is designed for a relationship manager wherein the relationship manager can obtain a holistic view of all its customers. It is designed to provide the following statistics to a relationship manager:

- [Revenue Metrics](#) on page 3089
- [Customer Metrics](#) on page 3090
- [Customer Hierarchy](#) on page 3090
- [Deal Snapshot](#) on page 3093
- [Top 10 Customers by Revenue](#) on page 3095
- [Top 10 Product By Revenue](#) on page 3096
- [Top 10 Price Items by Revenue](#) on page 3095
- [Top 10 Customers Revenue Variations](#) on page 3095

In addition, a relationship manager can also view all the assigned To Dos from the **Relationship Manager Workbench** screen.

For more information on...	See...
RM Workbench To Do Notification zone	<a href="#">RM Workbench To Do Notification</a> on page 3094

## RM Workbench

The **RM Workbench** zone allows you to search for a customer using various search criteria. It contains the following fields:

- **Search Criteria-** The **Search Criteria** contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Period From	Used to indicate the period from when the customer is active.	Yes
	<b>Note:</b> By default, month and year is selected.	
Period To	Used to indicate the period till when the customer is active.	Yes
	<b>Note:</b> By default, month and year is selected.	
Relationship Manager	Used to search customers which belong to a particular relationship manager.	Yes
	<b>Note:</b> The list includes only those users where the <b>Supervisor Role Flag (C1SUPFLG)</b> characteristic is set to <b>Y</b> .	
Division	Used to search customers which belong to a particular division.	No
Customer Segment	Used to search for a customers which belong to a particular customer segment.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those values which are defined in the <b>CUST_SEG_FLG</b> lookup field.	
Customer Tier	Used to search for a customers which belong to a particular customer tier.	No
	<b>Note:</b> The list includes only those values which are defined in the <b>CUST_TIER_FLG</b> lookup field.	

**Note:**

You must specify at least one search criterion while searching for customers. One more search criterion is required when you are searching for customers using the division and/or customer segment.

If you have specified any other search criterion along with the system ignores the additional search criterion and searches using the respectively.

## Revenue Metrics

---

The **Revenue Metrics** zone enables you to view the following information through a tiles chart:

- Total revenue from all the customers under the relationship manager
- Average revenue under the relationship manager
- Total bill amount from all invoices that are unpaid for all the customers under relationship manager

In addition, you can view the above information through a trend by selecting the **Trend** option available in the **Revenue Metrics** zone.

**Note:** By default, the above information is shown for the period which is specified in the **RM Workbench** zone. You can change the period if required.

You can filter the information using various criteria (such as, **Period From**, **Period To**, **Division**, **Customer Tier**, and **Customer Segment**) available in the **Deal Metrics** zone.

# Searching for a Customer

**Procedure**

To search for a customer:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Relationship Manager Workbench**.  
The **Relationship Manager Workbench** screen appears.
3. Enter the search criteria in the **Customer Hierarchy** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of customers that meet the search criteria appears in the **Search Results** section.

Oracle Revenue Management and Billing enables you to create, edit, and release a hold request through an inbound web service. It also enables you to view the details of a hold request through an inbound web service. You can send the hold creation, update, view, or release request from an external system through an inbound web service.

The following business services are shipped with the product to support different hold request operations:

- **C1-CreateHoldRequest** – Used to create a hold request for a single entity (i.e., for a particular person, account, or bill). For more information, see [C1-CreateHoldRequest Business Service](#) on page 3106.
- **C1-UpdateHoldRequest** – Used to edit an active hold request. For more information, see [C1-UpdateHoldRequest Business Service](#) on page 3128.
- **C1-GetHoldRequestHistory** – Used to fetch the details of the active hold requests for a single entity (i.e. person, account, or bill). For more information, see [C1-GetHoldRequestHistory Business Service](#) on page 3144.
- **C1-ReleaseHoldRequest** – Used to release an active hold request with a single entity (i.e. person, account, or bill). For more information, see [C1-ReleaseHoldRequest Business Service](#) on page 3159.

You can create one inbound web service which supports all four operations - hold creation request, hold update request, hold release request, and hold view request. Alternatively, you can create four different inbound web services - one for hold creation request, another for hold update request, third for hold release request, and fourth for hold view request.

You can create a SOAP or REST based inbound web service. If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service.

# C1-CreateHoldRequest Business Service

The **Create Hold Request (C1-CreateHoldRequest)** business service enables you to create a hold request for a single entity (i.e., for a particular person, account, or bill). In other words, you cannot include multiple entities in the same hold request. You can call this business service from an external system through an inbound web service. If you want to send the hold creation request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold creation request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold creation request, you need to specify the following details:

- Hold request type, hold request start date, and hold request end date or hold days (which is used to calculate hold request end date if not specified).
- Entity (i.e., Person, Account, or Bill) for which you want to create the hold request.
- Hold reason and comments, if any.
- Entity identifiers or entity ID when the entity is an account or a person, and the entity ID when the entity is a bill.
- Hold entity and hold process end dates.
- Business processes (i.e., Auto Pay, Bill Generation, Delinquency, Funding, Overdue, Refund) which you want to hold for the entity for the given duration.
- Characteristics for the hold request, if required.

**Note:**

You must specify an active hold request type where the approval process is not configured for activation and release. If you do not specify the hold request type, the system, by default, considers the hold request type specified in the **Default Hold Request Type for IWS** option type of the **C1-HOLDSRCH** feature configuration.

This business service allows you to create a future dated hold request but not a past dated hold request.

Even if you explicitly specify a value for the defer processing count in the hold request type, it is not considered by this business service while creating a hold request. The system will always create the hold request in the **Active** status.

On creating a hold request, the status of the hold request is set to **Active**. The start date of the hold entity and hold process is set to the hold request start date. If you do not specify the hold entity and/or hold process end dates, the system, by default, sets it to the hold request end date. While creating a hold request through an inbound web service, the system sets the creation mode of the hold request to **Automatic**.

Once the hold request is created through an inbound web service, the hold request ID is sent in the response along with its status. If an error occurs while creating the hold request, the system sends the error message in the response. The system enables you to track the hold creation response sent to the external system using the **Inbound Web Service History** feature.

For more information, see the **Inbound Web Service History** section in the *Oracle Revenue Management and Billing Administrative Guide*.

## Prerequisites

To create a hold request through an inbound web service, you need to do the following:

- Define a REST or SOAP based inbound web service to call the **C1-CreateHoldRequest** business service where **HTTP Method** is set to **Post** and **URI Component** is set to **/createHold**.
- Authorize the ORMB user to access the required application service.
- Define the required active hold request type where the **Activation Approval** option is not selected.
- Define the required source systems in the **C1-SourceSystemLookup** extendable lookup.
- Define the required person or account identifier types in the system.
- Ensure that the entities (i.e., person, account, or bill) that you want to keep on hold through a hold request should exist in the system.
- Define the required values for the **HOLD\_REASON\_FLG**, **HOLD\_ENTITY\_LVL\_FLG**, and **HOLD\_PROCESS\_FLG** lookup fields.
- Define the required characteristic types where the characteristic entity is set to **Hold Request**.
- Set the **Default Hold Request Type for IWS** option type of the **C1-HOLDSRCH** feature configuration.

## Hold Creation Request in the XML Format

The following code snippet illustrates how the tags should be nested while receiving the hold creation request in the XML format:

```
<C1-CreateHoldRequest>
  <holdRequest>
    <sourceSystem></sourceSystem>
    <externalTransactionId></externalTransactionId>
    <externalSourceId></externalSourceId>
    <holdStartDate></holdStartDate>
    <holdEndDate></holdEndDate>
    <holdDays></holdDays>
    <holdRequestType></holdRequestType>
```

```
<holdEntity></holdEntity>
<holdReason></holdReason>
<holdComments></holdComments>
<entityIdentifierType></entityIdentifierType>
<entityIdentifierValue></entityIdentifierValue>
<entityId></entityId>
<holdEntityEndDate></holdEntityEndDate>
<hierarchySwitch></hierarchySwitch>
<holdProcessData>
  <holdProcess></holdProcess>
  <holdProcessEndDate></holdProcessEndDate>
</holdProcessData>
<characteristics>
  <characteristicType></characteristicType>
  <characteristicValue></characteristicValue>
  <effectiveDate></effectiveDate>
</characteristics>
</holdRequest>
</C1-CreateHoldRequest>
```

**Note:** Here, the **C1-CreateHoldRequest** tag represents the operation in the inbound web service which is used to call the **C1-CreateHoldRequest** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **CreateHoldRequest**, then you need to specify the **CreateHoldRequest** tag instead of the **C1-CreateHoldRequest** tag in the above request.

## Hold Creation Response in the XML Format

The following code snippet illustrates how the tags are nested while sending the hold creation response in the XML format:

```
<C1-CreateHoldRequest>
  <holdRequest>
    <statusCd></statusCd>
    <holdRequestId></holdRequestId>
    <holdStatus></holdStatus>
    <messageText></messageText>
    <sourceSystem></sourceSystem>
    <externalTransactionId></externalTransactionId>
    <externalSourceId></externalSourceId>
    <holdStartDate></holdStartDate>
    <holdEndDate></holdEndDate>
    <holdDays></holdDays>
    <holdRequestType></holdRequestType>
    <holdEntity></holdEntity>
    <holdReason></holdReason>
    <holdComments></holdComments>
    <entityIdentifierType></entityIdentifierType>
```

```
<entityIdentifierValue></entityIdentifierValue>
<entityId></entityId>
<holdEntityEndDate></holdEntityEndDate>
<hierarchySwitch></hierarchySwitch>
<holdProcessData>
  <holdProcess></holdProcess>
  <holdProcessEndDate></holdProcessEndDate>
</holdProcessData>
<characteristics>
  <characteristicType></characteristicType>
  <characteristicValue></characteristicValue>
  <effectiveDate></effectiveDate>
</characteristics>
</holdRequest>
</C1-CreateHoldRequest>
```

**Note:** Here, the **C1-CreateHoldRequest** tag represents the operation in the inbound web service which is used to call the **C1-CreateHoldRequest** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **CreateHoldRequest**, then the **CreateHoldRequest** tag appears instead of the **C1-CreateHoldRequest** tag in the above response.

**Hold Creation Request and Response - Tags in XML Format**

**Note:** We recommend you to refer the [Hold Creation Request in the XML Format](#) on page 3107 and [Hold Creation Response in the XML Format](#) on page 3108 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-CreateHoldRequest** business service through an inbound web service, you need to ensure that the hold creation request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-CreateHoldRequest	Used to indicate that you want to invoke the <b>C1-CreateHoldRequest</b> business service.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
	<p><b>Note:</b> Here, the <b>C1-CreateHoldRequest</b> tag represents the operation in the inbound web service which is used to call the <b>C1-CreateHoldRequest</b> business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to <b>CreateHoldRequest</b>, then you need to specify the <b>CreateHoldRequest</b> tag instead of the <b>C1-CreateHoldRequest</b> tag in the hold creation request.</p>	
holdRequest	Used to specify the details of the hold request.	Yes
sourceSystem	<p>Used to indicate the external system from where the hold creation request is received.</p> <p><b>Note:</b></p> <p>You must specify an external system which is already defined in the system.</p> <p>If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>If the external system is not specified in the hold creation request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i>.</p>	No
externalTransactionId	<p>Used to indicate the transaction in the external system through which the hold creation request is received.</p> <p><b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.</p>	No
externalSourceId	Used to specify the external source system ID.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
holdStartDate	<p>Used to specify the date from when the hold request is effective.</p> <p><b>Note:</b></p> <p>The hold request start date cannot be later than the hold request end date.</p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p> <p>Here, you can specify the current or any future date but not a past date.</p>	Yes
holdEndDate	<p>Used to specify the date till when the hold request is effective.</p> <p><b>Note:</b></p> <p>The hold request end date cannot be earlier than the hold request start date.</p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the value is not specified in the <b>holdDays</b> tag.</p>
holdDays	<p>Used to indicate the number of days for which an entity should be kept on hold through the hold request. The system then calculates the hold request end date using the hold days (i.e., hold request end date = hold request start date + hold days). For example, if the hold request start date is 01-Jan-2025 and hold days is 20, then the system sets the hold request end date to 20-Jan-2025.</p> <p><b>Note:</b> You must specify a positive integer value in this tag.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the value is not specified in the <b>holdEndDate</b> tag.</p>
holdRequestType	Used to indicate a hold request type using which you want to create the hold request.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>You must specify a hold request type which is already defined in the system. It should be in the <b>Active</b> status. Also, ensure that the <b>Activation Approval</b> option is not selected in the specified hold request type.</p> <p>If you do not specify a hold request type, the system, by default, considers the hold request type specified in the <b>Default Hold Request Type for IWS</b> option type of the <b>C1-HOLDSRCH</b> feature configuration.</p>	
holdEntity	<p>Used to indicate the type of entity for which you want to create the hold request. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Used when you want to create a hold request for an account.</li> <li>• <b>BILL</b> - Used when you want to create a hold request for a bill.</li> <li>• <b>PERS</b> - Used when you want to create a hold request for a person.</li> </ul> <p><b>Note:</b></p> <p>You must specify a value which is already defined in the <b>HOLD_ENTITY_LVL_FLG</b> lookup field. It must be in the <b>Active</b> status.</p>	Yes
holdReason	<p>Used to indicate the reason why you want to hold the entity.</p> <p><b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field. It must be in the <b>Active</b> status.</p>	Yes
holdComments	Used to specify additional information about the hold request.	No
entityIdentifierType	Used to specify the person or account identifier type.	Yes (Conditional)
	<p><b>Note:</b> You must specify a person or account identifier type which is already defined in the system. It should be a primary identifier type for the respective entity.</p>	<p><b>Note:</b> This data is required when:</p> <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>holdEntity</b> tag.</li> <li>• The value is not specified in the <b>entityId</b> tag.</li> </ul>

Tag Name	Tag Description	Mandatory (Yes or No)
entityIdentifierValue	Used to specify the entity identifier (i.e., person or account identifier). It should be the primary identifier of the respective entity.	Yes (Conditional)
	<b>Note:</b> The system then derives the person or account ID using the given primary entity identifier details, and accordingly creates a hold request for the respective entity.	<b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>holdEntity</b> tag.</li> <li>• The value is not specified in the <b>entityId</b> tag.</li> </ul>
entityId	Used to specify the entity ID (i.e., person, account, or bill ID).	Yes (Conditional)
	<b>Note:</b> If you have specified the bill ID, the system checks whether a bill exists in the system with the given ID. If so, the system creates a hold request for the respective bill. However, if the system could not derive the bill using the bill ID, the system considers the given value as the alternate bill ID and then checks whether any bill exists in the system with the alternate bill ID. If so, the system creates a hold request for the respective bill. However, if the system could not derive the bill using the alternate bill ID, the system does not allow you to create a hold request.	<b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>holdEntity</b> tag and the values are not specified in the <b>entityIdentifierType</b> and <b>entityIdentifierValue</b> tags.</li> <li>• <b>BILL</b> is specified in the <b>holdEntity</b> tag.</li> </ul>
holdEntityEndDate	Used to specify the date till when you want to hold the entity.	No
	<b>Note:</b> You must specify the date in the <b>YYYY-MM-DD</b> format.  The hold entity end date must be between hold request start and end dates and between at least one process's start and end dates.  The hold entity end date cannot be earlier than the hold entity start date. Note that, by default, the system sets the hold entity start date to the hold request start date.  If you do not specify the hold entity end date, the system, by default, sets it to the hold request end date.	
hierarchySwitch	Used to indicate whether all the accounts in the person's hierarchy or only the persons' immediate accounts should be kept on hold. Note that the system considers only the child persons and not the grand child persons from the person's hierarchy and then derives the accounts where the child person is the main customer. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<b>Note:</b> This tag is applicable only when <b>PERS</b> is specified in the <b>holdEntity</b> tag.	
holdProcessData	Used to specify information about the process that you want to hold for the entity.	Yes
holdProcess	<p>Used to specify the process that you want to keep on hold for the entity. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ATPY</b> - Used when you want to hold the auto pay process of the entity. It is valid only when <b>ACCT</b> is specified in the <b>holdEntity</b> tag.</li> <li>• <b>BILL</b> - Used when you want to hold the bill generation process of the entity. It is valid only when <b>ACCT</b> or <b>PERS</b> is specified in the <b>holdEntity</b> tag.</li> <li>• <b>DELQ</b> - Used when you want to hold the delinquency process of the entity. It is valid only when <b>ACCT</b> or <b>PERS</b> is specified in the <b>holdEntity</b> tag.</li> <li>• <b>FNDG</b> - Used when you want to hold the funding process of the entity. It is valid when <b>ACCT</b>, <b>PERS</b>, or <b>BILL</b> is specified in the <b>holdEntity</b> tag.</li> <li>• <b>OVDU</b> - Used when you want to hold the overdue process of the entity. It is valid only when <b>ACCT</b> is specified in the <b>holdEntity</b> tag.</li> <li>• <b>REFD</b> - Used when you want to hold the refund process of the entity. It is valid only when <b>ACCT</b> is specified in the <b>holdEntity</b> tag.</li> </ul> <p><b>Note:</b></p> <p>You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.</p> <p>You cannot specify both the <b>OVDU</b> and <b>DELQ</b> processes at a time in the hold creation request.</p> <p>The <b>Overdue</b> process is valid for the financial services and health insurance domains but the <b>Delinquency</b> process is valid only for the health insurance domain.</p>	Yes
holdProcessEndDate	Used to specify the date till when you want to hold the process of the entity.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify the date in the <b>YYYY-MM-DD</b> format.  The hold process end date must be between the hold request start and end dates.  The hold process end date cannot be earlier than the hold process start date. Note that, by default, the system sets the hold process start date to the hold request start date.  If you do not specify the hold process end date, the system, by default, sets it to the hold request end date.	
characteristics	Used to specify a characteristic for the hold request.	No
characteristicType	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> .	<b>Note:</b> This data is required while defining a characteristic for the hold request.
characteristicValue	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required while defining a characteristic for the hold request.
effectiveDate	Used to specify the date from when the characteristic is effective for the hold request.	Yes (Conditional)
		<b>Note:</b> This data is required while defining a characteristic for the hold request.

The following table lists and describes additional tags that are included in the hold creation response:

Tag Name	Tag Description
statusCd	Indicates whether the hold creation request is successfully processed or not. The valid values are: <ul style="list-style-type: none"><li>• Success</li><li>• Failure</li></ul>
holdRequestId	Displays the hold request ID.
	<b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Success</b> .
holdStatus	Indicates the status of the hold request. The valid value is: <ul style="list-style-type: none"><li>• Active</li></ul>

Tag Name	Tag Description
	<b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Success</b> .
messageText	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Failure</b> .

## Sample Hold Creation Request and Response in the XML Format

Using the below example, you can create a hold request for an account where the bill generation and auto pay processes are kept on hold.

**Sample Hold Creation Request in the XML Format**

```
<C1-CreateHoldRequest>
  <holdRequest>
    <sourceSystem>SMALL_PRIME</sourceSystem>
    <externalTransactionId>567888876666</externalTransactionId>
    <externalSourceId>656565</externalSourceId>
    <holdStartDate>2024-12-01</holdStartDate>
    <holdEndDate>2024-12-31</holdEndDate>
    <holdDays></holdDays>
    <holdRequestType>HOLD_WITHOUT_APPROVAL</holdRequestType>
    <holdEntity>ACCT</holdEntity>
    <holdReason>DSRE</holdReason>
    <holdComments>Disaster Recovery</holdComments>
    <entityIdentifierType>IBAN</entityIdentifierType>
    <entityIdentifierValue>XX00XXX111111</entityIdentifierValue>
    <entityId></entityId>
    <holdEntityEndDate>2024-12-30</holdEntityEndDate>
    <hierarchySwitch></hierarchySwitch>
    <holdProcessData>
      <holdProcess>BILL</holdProcess>
      <holdProcessEndDate>2024-12-20</holdProcessEndDate>
    </holdProcessData>
    <holdProcessData>
      <holdProcess>ATPY</holdProcess>
      <holdProcessEndDate>2024-12-31</holdProcessEndDate>
    </holdProcessData>
    <characteristics>
      <characteristicType>HOLD_TYPE</characteristicType>
      <characteristicValue>P</characteristicValue>
      <effectiveDate>2024-12-01</effectiveDate>
    </characteristics>
    <characteristics>
      <characteristicType>ESC_PATH</characteristicType>
      <characteristicValue>01</characteristicValue>
      <effectiveDate>2024-12-01</effectiveDate>
    </characteristics>
  </holdRequest>
</C1-CreateHoldRequest>
```

```
</C1-CreateHoldRequest>
```

**Sample Hold Creation Response in the XML Format**

```
<C1-CreateHoldRequest>
  <holdRequest>
    <statusCd>Success</statusCd>
    <holdRequestId>790420762398</holdRequestId>
    <holdStatus>Active</holdStatus>
    <sourceSystem>SMALL_PRIME</sourceSystem>
    <externalTransactionId>567888876666</externalTransactionId>
    <externalSourceId>656565</externalSourceId>
    <holdStartDate>2024-12-01</holdStartDate>
    <holdEndDate>2024-12-31</holdEndDate>
    <holdDays></holdDays>
    <holdRequestType>HOLD_WITHOUT_APPROVAL</holdRequestType>
    <holdEntity>ACCT</holdEntity>
    <holdReason>DSRE</holdReason>
    <holdComments>Disaster Recovery</holdComments>
    <entityIdentifierType>IBAN</entityIdentifierType>
    <entityIdentifierValue>XX00XXX111111</entityIdentifierValue>
    <entityId></entityId>
    <holdEntityEndDate>2024-12-30</holdEntityEndDate>
    <hierarchySwitch></hierarchySwitch>
    <holdProcessData>
      <holdProcess>BILL</holdProcess>
      <holdProcessEndDate>2024-12-20</holdProcessEndDate>
    </holdProcessData>
    <holdProcessData>
      <holdProcess>ATPY</holdProcess>
      <holdProcessEndDate>2024-12-31</holdProcessEndDate>
    </holdProcessData>
    <characteristics>
      <characteristicType>HOLD_TYPE</characteristicType>
      <characteristicValue>P</characteristicValue>
      <effectiveDate>2024-12-01</effectiveDate>
    </characteristics>
    <characteristics>
      <characteristicType>ESC_PATH</characteristicType>
      <characteristicValue>01</characteristicValue>
      <effectiveDate>2024-12-01</effectiveDate>
    </characteristics>
  </holdRequest>
</C1-CreateAdjustment>
```

**Note:** We have given the above request sample to illustrate how the tags should be nested while receiving a hold creation request from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

## Hold Creation Request in the JSON Format

The following code snippet illustrates how the attribute/value pairs should be structured while receiving the hold creation request in the JSON format:

```
{
  -"C1-CreateHoldRequest": {
    -"holdRequest": {
      -"sourceSystem": -"",
      -"externalTransactionId": -"",
      -"externalSourceId": -"",
      -"holdStartDate": -"",
      -"holdEndDate": -"",
      -"holdDays": -"",
      -"holdRequestType": -"",
      -"holdEntity": -"",
      -"holdReason": -"",
      -"holdComments": -"",
      -"entityIdentifierType": -"",
      -"entityIdentifierValue": -"",
      -"entityId": -"",
      -"holdEntityEndDate": -"",
      -"hierarchySwitch": -"",
      -"holdProcessData": {
        -"holdProcess": -"",
        -"holdProcessEndDate": -""
      },
      -"characteristics": {
        -"characteristicType": -"",
        -"characteristicValue": -"",
        -"effectiveDate": -""
      }
    }
  }
}
```

**Note:** Here, the **C1-CreateHoldRequest** attribute represents the operation in the inbound web service which is used to call the **C1-CreateHoldRequest** business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to **CreateHoldRequest**, then you need to specify the **CreateHoldRequest** attribute instead of the **C1-CreateHoldRequest** attribute in the above request.

## Hold Creation Response in the JSON Format

The following code snippet illustrates how the attribute/value pairs are structured while sending the hold creation response in the JSON format:

```
{
  -"C1-CreateHoldRequest": {
    -"holdRequest": {
      -"statusCd": -"",
      -"holdRequestId": -"",
      -"holdStatus": -"",
      -"messageText": -"",
      -"sourceSystem": -"",
      -"externalTransactionId": -"",
      -"externalSourceId": -"",
      -"holdStartDate": -"",
      -"holdEndDate": -"",
      -"holdDays": -"",
      -"holdRequestType": -"",
      -"holdEntity": -"",
      -"holdReason": -"",
      -"holdComments": -"",
      -"entityIdentifierType": -"",
      -"entityIdentifierValue": -"",
      -"entityId": -"",
      -"holdEntityEndDate": -"",
      -"hierarchySwitch": -"",
      -"holdProcessData": {
        -"holdProcess": -"",
        -"holdProcessEndDate": -""
      },
      -"characteristics": {
        -"characteristicType": -"",
        -"characteristicValue": -"",
        -"effectiveDate": -""
      }
    }
  }
}
```

**Note:** Here, the **C1-CreateHoldRequest** attribute represents the operation in the inbound web service which is used to call the **C1-CreateHoldRequest** business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to **CreateHoldRequest**, then the **CreateHoldRequest** attribute appears instead of the **C1-CreateHoldRequest** attribute in the above response.

# Hold Creation Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the [Hold Creation Request in the JSON Format](#) on page 3118 and [Hold Creation Response in the JSON Format](#) on page 3119 topics in parallel while understanding the below mentioned attributes. This will help you to understand how the attribute/value pairs are structured in the JSON format.

Before calling the **C1-CreateHoldRequest** business service through an inbound web service, you need to ensure that the hold creation request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
C1-CreateHoldRequest	Used to indicate that you want to invoke the <b>C1-CreateHoldRequest</b> business service.	Yes
	<b>Note:</b> Here, the <b>C1-CreateHoldRequest</b> attribute represents the operation in the inbound web service which is used to call the <b>C1-CreateHoldRequest</b> business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to <b>CreateHoldRequest</b> , then you need to specify the <b>CreateHoldRequest</b> attribute instead of the <b>C1-CreateHoldRequest</b> attribute in the hold creation request.	
holdRequest	Used to specify the details of the hold request.	Yes
sourceSystem	Used to indicate the external system from where the hold creation request is received.	No
	<b>Note:</b>  You must specify an external system which is already defined in the system.  If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.  If the external system is not specified in the hold creation request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.  For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i> .	

Attribute Name	Attribute Description	Mandatory (Yes or No)
externalTransactionId	Used to indicate the transaction in the external system through which the hold creation request is received.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
externalSourceId	Used to specify the external source system ID.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
holdStartDate	Used to specify the date from when the hold request is effective.	Yes
	<b>Note:</b> The hold request start date cannot be later than the hold request end date. You must specify the date in the <b>YYYY-MM-DD</b> format. Here, you can specify the current or any future date but not a past date.	
holdEndDate	Used to specify the date till when the hold request is effective.	Yes (Conditional)
	<b>Note:</b> The hold request end date cannot be earlier than the hold request start date. You must specify the date in the <b>YYYY-MM-DD</b> format.	<b>Note:</b> This data is required when the value is not specified for the <b>holdDays</b> attribute.
holdDays	Used to indicate the number of days for which an entity should be kept on hold through the hold request. The system then calculates the hold request end date using the hold days (i.e., hold request end date = hold request start date + hold days). For example, if the hold request start date is 01-Jan-2025 and hold days is 20, then the system sets the hold request end date to 20-Jan-2025.	Yes (Conditional)
	<b>Note:</b> You must specify a positive integer value in this attribute.	<b>Note:</b> This data is required when the value is not specified for the <b>holdEndDate</b> attribute.
holdRequestType	Used to indicate a hold request type using which you want to create the hold request.	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>You must specify a hold request type which is already defined in the system. It should be in the <b>Active</b> status. Also, ensure that the <b>Activation Approval</b> option is not selected in the specified hold request type.</p> <p>If you do not specify a hold request type, the system, by default, considers the hold request type specified in the <b>Default Hold Request Type for IWS</b> option type of the <b>C1-HOLDSRCH</b> feature configuration.</p>	
holdEntity	<p>Used to indicate the type of entity for which you want to create the hold request. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Used when you want to create a hold request for an account.</li> <li>• <b>BILL</b> - Used when you want to create a hold request for a bill.</li> <li>• <b>PERS</b> - Used when you want to create a hold request for a person.</li> </ul> <p><b>Note:</b></p> <p>You must specify a value which is already defined in the <b>HOLD_ENTITY_LVL_FLG</b> lookup field. It must be in the <b>Active</b> status.</p>	Yes
holdReason	<p>Used to indicate the reason why you want to hold the entity.</p> <p><b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field. It must be in the <b>Active</b> status.</p>	Yes
holdComments	Used to specify additional information about the hold request.	No
entityIdentifierType	Used to specify the person or account identifier type.	Yes (Conditional)
	<p><b>Note:</b> You must specify a person or account identifier type which is already defined in the system. It should be a primary identifier type for the respective entity.</p>	<p><b>Note:</b> This data is required when:</p> <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified for the <b>holdEntity</b> attribute.</li> <li>• The value is not specified for the <b>entityId</b> attribute.</li> </ul>

Attribute Name	Attribute Description	Mandatory (Yes or No)
entityIdentifierValue	Used to specify the entity identifier (i.e., person or account identifier). It should be the primary identifier of the respective entity.	Yes (Conditional)
	<b>Note:</b> The system then derives the person or account ID using the given primary entity identifier details, and accordingly creates a hold request for the respective entity.	<b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified for the <b>holdEntity</b> attribute.</li> <li>• The value is not specified for the <b>entityId</b> attribute.</li> </ul>
entityId	Used to specify the entity ID (i.e., person, account, or bill ID).	Yes (Conditional)
	<b>Note:</b> If you have specified the bill ID, the system checks whether a bill exists in the system with the given ID. If so, the system creates a hold request for the respective bill. However, if the system could not derive the bill using the bill ID, the system considers the given value as the alternate bill ID and then checks whether any bill exists in the system with the alternate bill ID. If so, the system creates a hold request for the respective bill. However, if the system could not derive the bill using the alternate bill ID, the system does not allow you to create a hold request.	<b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified for the <b>holdEntity</b> attribute and the values are not specified for the <b>entityIdentifierType</b> and <b>entityIdentifierValue</b> attributes.</li> <li>• <b>BILL</b> is specified for the <b>holdEntity</b> attribute.</li> </ul>
holdEntityEndDate	Used to specify the date till when you want to hold the entity.	No
	<b>Note:</b> You must specify the date in the <b>YYYY-MM-DD</b> format.  The hold entity end date must be between hold request start and end dates and between at least one process's start and end dates.  The hold entity end date cannot be earlier than the hold entity start date. Note that, by default, the system sets the hold entity start date to the hold request start date.  If you do not specify the hold entity end date, the system, by default, sets it to the hold request end date.	
hierarchySwitch	Used to indicate whether all the accounts in the person's hierarchy or only the persons' immediate accounts should be kept on hold. Note that the system considers only the child persons and not the grand child persons from the person's hierarchy and then derives the accounts where the child person is the main customer. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
	<b>Note:</b> This attribute is applicable only when <b>PERS</b> is specified for the <b>holdEntity</b> attribute.	
holdProcessData	Used to specify information about the process that you want to hold for the entity.	Yes
holdProcess	<p>Used to specify the process that you want to keep on hold for the entity. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ATPY</b> - Used when you want to hold the auto pay process of the entity. It is valid only when <b>ACCT</b> is specified for the <b>holdEntity</b> attribute.</li> <li>• <b>BILL</b> - Used when you want to hold the bill generation process of the entity. It is valid only when <b>ACCT</b> or <b>PERS</b> is specified for the <b>holdEntity</b> attribute.</li> <li>• <b>DELQ</b> - Used when you want to hold the delinquency process of the entity. It is valid only when <b>ACCT</b> or <b>PERS</b> is specified for the <b>holdEntity</b> attribute.</li> <li>• <b>FNDG</b> - Used when you want to hold the funding process of the entity. It is valid when <b>ACCT</b>, <b>PERS</b>, or <b>BILL</b> is specified for the <b>holdEntity</b> attribute.</li> <li>• <b>OVDU</b> - Used when you want to hold the overdue process of the entity. It is valid only when <b>ACCT</b> is specified for the <b>holdEntity</b> attribute.</li> <li>• <b>REFD</b> - Used when you want to hold the refund process of the entity. It is valid only when <b>ACCT</b> is specified for the <b>holdEntity</b> attribute.</li> </ul> <p><b>Note:</b></p> <p>You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.</p> <p>You cannot specify both the <b>OVDU</b> and <b>DELQ</b> processes at a time in the hold creation request.</p> <p>The <b>Overdue</b> process is valid for the financial services and health insurance domains but the <b>Delinquency</b> process is valid only for the health insurance domain.</p>	Yes
holdProcessEndDate	Used to specify the date till when you want to hold the process of the entity.	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify the date in the <b>YYYY-MM-DD</b> format.  The hold process end date must be between the hold request start and end dates.  The hold process end date cannot be earlier than the hold process start date. Note that, by default, the system sets the hold process start date to the hold request start date.  If you do not specify the hold process end date, the system, by default, sets it to the hold request end date.	
characteristics	Used to specify a characteristic for the hold request.	No
characteristicType	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> .	<b>Note:</b> This data is required while defining a characteristic for the hold request.
characteristicValue	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required while defining a characteristic for the hold request.
effectiveDate	Used to specify the date from when the characteristic is effective for the hold request.	Yes (Conditional)
		<b>Note:</b> This data is required while defining a characteristic for the hold request.

The following table lists and describes additional attributes that are included in the hold creation response:

Attribute Name	Attribute Description
statusCd	Indicates whether the hold creation request is successfully processed or not. The valid values are: <ul style="list-style-type: none"><li>Success</li><li>Failure</li></ul>
holdRequestId	Displays the hold request ID.
	<b>Note:</b> This attribute appears when the value of the <b>statusCd</b> attribute is set to <b>Success</b> .
holdStatus	Indicates the status of the hold request. The valid value is: <ul style="list-style-type: none"><li>Active</li></ul>

Attribute Name	Attribute Description
	<b>Note:</b> This attribute appears when the value of the <b>statusCd</b> attribute is set to <b>Success</b> .
messageText	Indicates the error that occurred while creating the hold request.
	<b>Note:</b> This attribute appears when the value of the <b>statusCd</b> attribute is set to <b>Failure</b> .

      {
        -"characteristicType": -"HOLD_TYPE",
        -"characteristicValue": -"P",
        -"effectiveDate": -"2024-12-01"
      },
      {
        -"characteristicType": -"ESC_PATH",
        -"characteristicValue": -"01",
        -"effectiveDate": -"2024-12-01"
      }
    ]
  }
}
```

**Note:** We have given the above request sample to illustrate how the attribute/value pairs should be structured while receiving a hold creation request from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

# C1-UpdateHoldRequest Business Service

The **Update Hold Request (C1-UpdateHoldRequest)** business service enables you to edit an existing hold request which is in the **Active** status. You can call this business service from an external system through an inbound web service. If you want to send the hold update request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold update request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold update request, you need to specify the following details:

- Hold Request ID
- Hold Entity ID (i.e. person ID, account ID, or bill ID)

Through this service, you can edit the following details of an active hold request:

- End date, comments, and characteristics of the hold request
- End date of a single hold entity in the hold request
- End date of multiple hold processes in the hold request

**Note:** At present, you can only update the end date of a single entity through a hold update request. If two or more entities are kept on hold through a hold request, you need to initiate a separate hold update request for each entity in order to update their respective end dates.

In addition, this service enables you to:

- **Add a New Hold Process to an Existing Hold Request** - While adding a new process to an existing hold request, the system does the following:
  - Sets the hold process start date to the hold request start date.
  - If you do not specify the hold process end date, the system, by default, sets it to the hold request end date.
- **Define, Edit, or Remove a Characteristic from an Existing Hold Request** - The system enables you to perform the following actions for a hold request characteristic:
  - **UPDATE** - Used when you want to add a new characteristic to the hold request or update the details of an existing characteristic of the hold request. The system first checks whether a characteristic with the given characteristic type and effective date combination exists for the hold request. If so, the system updates the existing characteristic of the hold request. However, if a characteristic does not exist with the given characteristic type and effective date combination for the hold request, the system creates a new characteristic for the hold request.
  - **DELETE** - Used when you want to delete an existing characteristic from the hold request.

Once the hold request is edited through an inbound web service, the hold request ID is sent in the response. If an error occurs while updating the hold request, the system sends the error message in the response. The system enables you to track the hold update response sent to the external system using the **Inbound Web Service History** feature.

For more information, see the **Inbound Web Service History** section in the *Oracle Revenue Management and Billing Administrative Guide*.

**Note:** After updating the end date of a hold entity, you need to execute the **Hold Request Monitor (C1-HLMON)** batch. On executing the batch, the system will accordingly update the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date, if required, for the respective entity.

Sample Hold Update Release Request and Response in the JSON Format	<a href="#">Sample Hold Update Request and Response in the JSON Format</a> on page 3143

## Prerequisites

To update a hold request through an inbound web service, you need to do the following:

- Define a REST or SOAP based inbound web service to call the **C1-UpdateHoldRequest** business service where **HTTP Method** is set to **Post** and **URI Component** is set to **/updateHold**.
- Authorize the ORMB user to access the required application service.
- Define the required source systems in the **C1-SourceSystemLookup** extendable lookup.
- Ensure that the entities (i.e., person, account, or bill) are already included in the hold request.
- Define the required values for the **HOLD\_PROCESS\_FLG** lookup field.
- Define the required characteristic types where the characteristic entity is set to **Hold Request**.

## Hold Update Request in the XML Format

The following code snippet illustrates how the tags should be nested while receiving the hold update request in the XML format:

```
<C1-UpdateHoldRequest>
  <sourceSystem></sourceSystem>
  <externalTransactionId></externalTransactionId>
  <externalSourceId></externalSourceId>
  <holdRequestId></holdRequestId>
  <holdComments></holdComments>
  <holdEndDate></holdEndDate>
  <entityId></entityId>
  <entityEndDate></entityEndDate>
  <holdProcessData>
    <holdProcess></holdProcess>
    <holdProcessEndDate></holdProcessEndDate>
  </holdProcessData>
  <characteristics>
    <action></action>
    <characteristicType></characteristicType>
    <characteristicValue></characteristicValue>
    <effectiveDate></effectiveDate>
```

```
</characteristics>
</C1-UpdateHoldRequest>
```

**Note:** Here, the **C1-UpdateHoldRequest** tag represents the operation in the inbound web service which is used to call the **C1-UpdateHoldRequest** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **UpdateHoldRequest**, then you need to specify the **UpdateHoldRequest** tag instead of the **C1-UpdateHoldRequest** tag in the above request.

## Hold Update Response in the XML Format

The following code snippet illustrates how the tags are nested while sending the hold update response in the XML format:

```
<C1-UpdateHoldRequest>
  <requestProcessStatus></requestProcessStatus>
  <sourceSystem></sourceSystem>
  <externalTransactionId></externalTransactionId>
  <externalSourceId></externalSourceId>
  <holdRequestId></holdRequestId>
  <holdComments></holdComments>
  <holdEndDate></holdEndDate>
  <entityId></entityId>
  <entityEndDate></entityEndDate>
  <holdProcessData>
    <holdProcess></holdProcess>
    <holdProcessEndDate></holdProcessEndDate>
  </holdProcessData>
  <characteristics>
    <action></action>
    <characteristicType></characteristicType>
    <characteristicValue></characteristicValue>
    <effectiveDate></effectiveDate>
  </characteristics>
  </errormsg><errormsg>
</C1-UpdateHoldRequest>
```

**Note:** Here, the **C1-UpdateHoldRequest** tag represents the operation in the inbound web service which is used to call the **C1-UpdateHoldRequest** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **UpdateHoldRequest**, then the **UpdateHoldRequest** tag appears instead of the **C1-UpdateHoldRequest** tag in the above response.

Sample Hold Update Request and Response in the XML Format	<a href="#">Sample Hold Update Request and Response in the XML Format</a> on page 3135

## Hold Update Request and Response - Tags in XML Format

**Note:** We recommend you to refer the [Hold Update Request in the XML Format](#) on page 3129 and [Hold Update Response in the XML Format](#) on page 3130 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-UpdateHoldRequest** business service through an inbound web service, you need to ensure that the hold update request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-UpdateHoldRequest	Used to indicate that you want to invoke the <b>C1-UpdateHoldRequest</b> business service.	Yes
	<b>Note:</b> Here, the <b>C1-UpdateHoldRequest</b> tag represents the operation in the inbound web service which is used to call the <b>C1-UpdateHoldRequest</b> business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to <b>UpdateHoldRequest</b> , then you need to specify the <b>UpdateHoldRequest</b> tag instead of the <b>C1-UpdateHoldRequest</b> tag in the hold update request.	
sourceSystem	Used to indicate the external system from where the hold update request is received.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>You must specify an external system which is already defined in the system.</p> <p>If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>If the external system is not specified in the hold update request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i>.</p>	
externalTransactionId	<p>Used to indicate the transaction in the external system through which the hold update request is received.</p> <p><b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.</p>	No
externalSourceId	<p>Used to specify the external source system ID.</p> <p><b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.</p>	No
holdRequestId	<p>Used to indicate the hold request whose details you want to update.</p> <p><b>Note:</b> You can only update a hold request which is in the <b>Active</b> status through an inbound web service.</p>	Yes
holdComments	Used to specify additional information about the hold request.	No
holdEndDate	Used to specify the date till when the hold request is effective.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The hold request end date cannot be earlier than the hold request start date.</p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p>	
entityId	Used to specify the entity ID (i.e., person, account, or bill ID).	Yes
entityEndDate	<p>Used to specify the date till when you want to hold the entity.</p> <p><b>Note:</b></p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p> <p>The hold entity end date must be between hold request start and end dates and between at least one process's start and end dates.</p> <p>The hold entity end date cannot be earlier than the hold entity start date.</p> <p>At present, you can only update the end date of a single entity through a hold update request. If two or more entities are kept on hold through a hold request, you need to initiate a separate hold update request for each entity in order to update their respective end date.</p>	Yes
holdProcessData	Used to add a new hold process or update the details of an existing hold process in the hold request.	No
holdProcess	<p>Used to specify the process that you want to add or update in the hold request. The valid values are:</p> <ul style="list-style-type: none"> <li><b>ATPY</b> - Used when you want to hold the auto pay process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>.</li> <li><b>BILL</b> - Used when you want to hold the bill generation process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b> or <b>PERS</b>.</li> <li><b>DELQ</b> - Used when you want to hold the delinquency process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b> or <b>PERS</b>.</li> <li><b>FNDG</b> - Used when you want to hold the funding process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>, <b>PERS</b>, or <b>BILL</b>.</li> <li><b>OVDU</b> - Used when you want to hold the overdue process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when:</p> <ul style="list-style-type: none"> <li>You want to update the end date of a hold process.</li> <li>You want to add a new hold process to the hold request.</li> </ul>

Tag Name	Tag Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li><b>REFD</b> - Used when you want to hold the refund process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>.</li> </ul> <p><b>Note:</b></p> <p>You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.</p> <p>You cannot specify both the <b>OVDU</b> and <b>DELQ</b> processes at a time in the hold update request.</p> <p>The <b>Overdue</b> process is valid for the financial services and health insurance domains but the <b>Delinquency</b> process is valid only for the health insurance domain.</p>	
holdProcessEndDate	<p>Used to specify the date till when you want to hold the process of the entity.</p> <p><b>Note:</b></p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p> <p>The hold process end date must be between the hold request start and end dates.</p> <p>The hold process end date cannot be earlier than the hold process start date.</p> <p>While adding a new process to the hold request, the system does the following:</p> <ul style="list-style-type: none"> <li>Sets the hold process start date to the hold request start date.</li> <li>If you do not specify the hold process end date, the system, by default, sets it to the hold request end date.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when:</p> <ul style="list-style-type: none"> <li>You want to update the end date of a hold process.</li> </ul>
characteristics	Used to add, update, or delete a characteristic from the hold request.	No
action	<p>Used to indicate whether you want to add, update, or delete a characteristic from the hold request. The valid values are:</p> <ul style="list-style-type: none"> <li><b>UPDATE</b> - Used when you want to add a new characteristic to the hold request or update the details of an existing characteristic of the hold request. The system first checks whether a characteristic with the given characteristic type and effective date combination exists for the hold request. If so, the system updates the existing characteristic of the hold request. However, if a characteristic does not exist with the given characteristic type and effective date combination for the hold request, the system creates a new characteristic for the hold request.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.</p>

Tag Name	Tag Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li><b>DELETE</b> - Used when you want to delete an existing characteristic from the hold request.</li></ul>	
characteristicType	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> .	<b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.
characteristicValue	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.
effectiveDate	Used to specify the date from when the characteristic is effective for the hold request.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.

The following table lists and describes additional tags that are included in the hold update response:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold update request is successfully processed or not. The valid values are: <ul style="list-style-type: none"><li>Success</li><li>Failure</li></ul>
errormsg	Indicates the error that occurred while updating the hold request.
	<b>Note:</b> This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Failure</b> .

    <characteristicValue>T</characteristicValue>
    <effectiveDate>2025-12-24</effectiveDate>
  </characteristics>
  <characteristics>
    <action>UPDATE</action>
    <characteristicType>ESC_PATH</characteristicType>
    <characteristicValue>01</characteristicValue>
    <effectiveDate>2025-12-24</effectiveDate>
  </characteristics>
</C1-UpdateHoldRequest>

```

**Note:** We have given the above request sample to illustrate how the tags should be nested while receiving a hold update request from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Hold Update Request and Response - Tags in XML Format	<a href="#">Hold Update Request and Response - Tags in XML Format</a> on page 3131

## Hold Update Request in the JSON Format

The following code snippet illustrates how the attribute/value pairs should be structured while receiving the hold update request in the JSON format:

```
{
  -"C1-UpdateHoldRequest": {
    -"sourceSystem": -"",
    -"externalTransactionId": -"",
    -"externalSourceId": -"",
    -"holdRequestId": -"",
    -"holdComments": -"",
    -"holdEndDate": -"",
    -"entityId": -"",
    -"entityEndDate": -"",
    -"holdProcessData": {
      -"holdProcess": -"",
      -"holdProcessEndDate": -""
    },
    -"characteristics": {
      -"action": -"",
      -"characteristicType": -"",
      -"characteristicValue": -"",
      -"effectiveDate": -""
    }
  }
}
```

**Note:** Here, the **C1-UpdateHoldRequest** attribute represents the operation in the inbound web service which is used to call the **C1-UpdateHoldRequest** business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to **UpdateHoldRequest**, then you need to specify the **UpdateHoldRequest** attribute instead of the **C1-UpdateHoldRequest** attribute in the above request.

## Hold Update Response in the JSON Format

The following code snippet illustrates how the attribute/value pairs are structured while sending the hold update response in the JSON format:

```
{
  -"C1-UpdateHoldRequest": {
    -"requestProcessStatus": -"",
    -"sourceSystem": -"",
    -"externalTransactionId": -"",
    -"externalSourceId": -"",
    -"holdRequestId": -"",
    -"holdComments": -"",
    -"holdEndDate": -"",
    -"entityId": -"",
    -"entityEndDate": -"",
    -"holdProcessData": {
      -"holdProcess": -"",
      -"holdProcessEndDate": -""
    },
    -"characteristics": {
      -"action": -"",
      -"characteristicType": -"",
      -"characteristicValue": -"",
      -"effectiveDate": -""
    },
    -"errormsg": -""
  },
  -"error": -""
}
```

**Note:** Here, the **C1-UpdateHoldRequest** attribute represents the operation in the inbound web service which is used to call the **C1-UpdateHoldRequest** business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to **UpdateHoldRequest**, then the **UpdateHoldRequest** attribute appears instead of the **C1-UpdateHoldRequest** attribute in the above response.

## Hold Update Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the [Hold Update Request in the JSON Format](#) on page 3137 and [Hold Update Response in the JSON Format](#) on page 3138 topics in parallel while understanding the below mentioned attributes. This will help you to understand how the attribute/value pairs are structured in the JSON format.

Before calling the **C1-UpdateHoldRequest** business service through an inbound web service, you need to ensure that the hold update request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
C1-UpdateHoldRequest	Used to indicate that you want to invoke the <b>C1-UpdateHoldRequest</b> business service.	Yes
	<b>Note:</b> Here, the <b>C1-UpdateHoldRequest</b> attribute represents the operation in the inbound web service which is used to call the <b>C1-UpdateHoldRequest</b> business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to <b>UpdateHoldRequest</b> , then you need to specify the <b>UpdateHoldRequest</b> attribute instead of the <b>C1-UpdateHoldRequest</b> attribute in the hold update request.	
sourceSystem	Used to indicate the external system from where the hold update request is received.	No
	<b>Note:</b> You must specify an external system which is already defined in the system.  If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.  If the external system is not specified in the hold update request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.  For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i> .	
externalTransactionId	Used to indicate the transaction in the external system through which the hold update request is received.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
externalSourceId	Used to specify the external source system ID.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	

Attribute Name	Attribute Description	Mandatory (Yes or No)
holdRequestId	Used to indicate hold request whose details you want to update.	Yes
	<b>Note:</b> You can only update a hold request which is in the <b>Active</b> status through an inbound web service.	
holdComments	Used to specify additional information about the hold request.	No
holdEndDate	Used to specify the date till when the hold request is effective.	No
	<b>Note:</b> The hold request end date cannot be earlier than the hold request start date. You must specify the date in the <b>YYYY-MM-DD</b> format.	
entityId	Used to specify the entity ID (i.e., person, account, or bill ID).	Yes
entityEndDate	Used to specify the date till when you want to hold the entity.	Yes
	<b>Note:</b> You must specify the date in the <b>YYYY-MM-DD</b> format. The hold entity end date must be between hold request start and end dates and between at least one process's start and end dates. The hold entity end date cannot be earlier than the hold entity start date. At present, you can only update the end date of a single entity through a hold update request. If two or more entities are kept on hold through a hold request, you need to initiate a separate hold update request for each entity in order to update their respective end date.	
holdProcessData	Used to add a new hold process or update the details of an existing hold process in the hold request.	No
holdProcess	Used to specify the process that you want to add or update in the hold request. The valid values are: <ul style="list-style-type: none"><li><b>ATPY</b> - Used when you want to hold the auto pay process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>.</li><li><b>BILL</b> - Used when you want to hold the bill generation process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b> or <b>PERS</b>.</li><li><b>DELQ</b> - Used when you want to hold the delinquency process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b> or <b>PERS</b>.</li></ul>	Yes (Conditional)
		<b>Note:</b> This data is required when: <ul style="list-style-type: none"><li>You want to update the end date of a hold process.</li><li>You want to add a new hold process to the hold request.</li></ul>

Attribute Name	Attribute Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li><b>FNDG</b> - Used when you want to hold the funding process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>, <b>PERS</b>, or <b>BILL</b>.</li> <li><b>OVDU</b> - Used when you want to hold the overdue process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>.</li> <li><b>REFD</b> - Used when you want to hold the refund process of the entity. It is valid only when the entity level of the hold request is set to <b>ACCT</b>.</li> </ul> <p><b>Note:</b></p> <p>You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.</p> <p>You cannot specify both the <b>OVDU</b> and <b>DELQ</b> processes at a time in the hold update request.</p> <p>The <b>Overdue</b> process is valid for the financial services and health insurance domains but the <b>Delinquency</b> process is valid only for the health insurance domain.</p>	
holdProcessEndDate	Used to specify the date till when you want to hold the process of the entity.	Yes (Conditional)
	<p><b>Note:</b></p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p> <p>The hold process end date must be between the hold request start and end dates.</p> <p>The hold process end date cannot be earlier than the hold process start date.</p> <p>While adding a new process to the hold request, the system does the following:</p> <ul style="list-style-type: none"> <li>Sets the hold process start date to the hold request start date.</li> <li>If you do not specify the hold process end date, the system, by default, sets it to the hold request end date.</li> </ul>	<p><b>Note:</b> This data is required when:</p> <ul style="list-style-type: none"> <li>You want to update the end date of a hold process.</li> </ul>
characteristics	Used to add, update, or delete a characteristic from the hold request.	No
action	Used to indicate whether you want to add, update, or delete a characteristic from the hold request. The valid values are:	Yes (Conditional)
	<ul style="list-style-type: none"> <li><b>UPDATE</b> - Used when you want to add a new characteristic to the hold request or update the details of an existing characteristic of the hold request. The system first checks whether a characteristic with the given characteristic type and effective date combination exists for the hold request. If so, the system updates the existing characteristic of the hold</li> </ul>	<p><b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.</p>

Attribute Name	Attribute Description	Mandatory (Yes or No)
	request. However, if a characteristic does not exist with the given characteristic type and effective date combination for the hold request, the system creates a new characteristic for the hold request. <ul style="list-style-type: none"><li>• <b>DELETE</b> - Used when you want to delete an existing characteristic from the hold request.</li></ul>	
characteristicType	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b> .	<b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.
characteristicValue	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.
effectiveDate	Used to specify the date from when the characteristic is effective for the hold request.	Yes (Conditional)
		<b>Note:</b> This data is required when you want to add, update, or delete a characteristic from the hold request.

The following table lists and describes additional attributes that are included in the hold update response:

Attribute Name	Attribute Description
requestProcessStatus	Indicates whether the hold update request is successfully processed or not. The valid values are: <ul style="list-style-type: none"><li>• Success</li><li>• Failure</li></ul>
errorMsg	Indicates the error that occurred while updating the hold request.
	<b>Note:</b> This attribute appears when the value in the <b>requestProcessStatus</b> attribute is set to <b>Failure</b> .

# C1-GetHoldRequestHistory Business Service

The **Inquire Hold Request Details (C1-GetHoldRequestHistory)** business service enables you to view the details of an existing hold request which is in the **Active** status. At a time, you can view the hold request details of a single entity (i.e., for a particular person, account, or bill). You can call this business service from an external system through an inbound web service. If you want to send the hold view request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold view request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold view request, you need to specify the following details:

- Entity (i.e., Person, Account, or Bill) whose hold requests you want to view.
- Entity identifiers or entity ID when the entity is an account or a person, and the entity ID when the entity is a bill.

In addition, you can specify the following filter criteria – Hold Request Start Date, Hold Request End Date, Hold Reason, and Hold Process. On specifying the hold process, the system fetches one or more active hold requests of the entity with the given hold process. This hold request may have one or more hold processes including the given hold process.

Once the hold view request is processed through an inbound web service, the system displays the details of one or more active hold requests that meet the search criteria. If an error occurs while retrieving the hold requests for the entity, the

system sends the error message in the response. The system enables you to track the hold view response sent to the external system using the **Inbound Web Service History** feature.

For more information, see the **Inbound Web Service History** section in the *Oracle Revenue Management and Billing Administrative Guide*.

Sample Hold View Request and Response in the JSON Format	<a href="#">Sample Hold View Request and Response in the JSON Format</a> on page 3158

**Prerequisites**

To view the hold requests of an entity through an inbound web service, you need to do the following:

- Define a REST or SOAP based inbound web service to call the **C1-GetHoldRequestHistory** business service where **HTTP Method** is set to **Post** and **URI Component** is set to **/inquire**.
- Authorize the ORMB user to access the required application service.
- Define the required source systems in the **C1-SourceSystemLookup** extendable lookup.
- Define the required person or account identifier types in the system.
- Define the required values for the **HOLD\_REASON\_FLG**, **HOLD\_ENTITY\_LVL\_FLG**, and **HOLD\_PROCESS\_FLG** lookup fields.

**Hold View Request in the XML Format**

The following code snippet illustrates how the tags should be nested while receiving the hold view request in the XML format:

```
<C1-GetHoldRequestHistory>
  <getHoldReqHistRequest>
    <sourceSystem></sourceSystem>
    <externalSourceId></externalSourceId>
    <c1ExternalTransactionId></c1ExternalTransactionId>
    <getHoldReqStartDt></getHoldReqStartDt>
```

```
<getHoldReqEndDt></getHoldReqEndDt>
<getHoldReqEntity></getHoldReqEntity>
<getHoldReqReason></getHoldReqReason>
<getHoldReqEntIdentType></getHoldReqEntIdentType>
<getHoldReqEntIdentValue></getHoldReqEntIdentValue>
<getHoldReqEntityId></getHoldReqEntityId>
<getHoldReqProcess></getHoldReqProcess>
</getHoldReqHistRequest>
</C1-GetHoldRequestHistory>
```

**Note:** Here, the **C1-GetHoldRequestHistory** tag represents the operation in the inbound web service which is used to call the **C1-GetHoldRequestHistory** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **GetHoldRequestHistory**, then you need to specify the **GetHoldRequestHistory** tag instead of the **C1-GetHoldRequestHistory** tag in the above request.

## Hold View Response in the XML Format

The following code snippet illustrates how the tags are nested while sending the hold view response in the XML format:

```
<C1-GetHoldRequestHistory>
  <getHoldReqHistRequest>
    <sourceSystem></sourceSystem>
    <externalSourceId></externalSourceId>
    <c1ExternalTransactionId></c1ExternalTransactionId>
    <getHoldReqStartDt></getHoldReqStartDt>
    <getHoldReqEndDt></getHoldReqEndDt>
    <getHoldReqEntity></getHoldReqEntity>
    <getHoldReqReason></getHoldReqReason>
    <getHoldReqEntIdentType></getHoldReqEntIdentType>
    <getHoldReqEntIdentValue></getHoldReqEntIdentValue>
    <getHoldReqEntityId></getHoldReqEntityId>
    <getHoldReqProcess></getHoldReqProcess>
  </getHoldReqHistRequest>
  <holdReqHistResponse>
    <statusCd></statusCd>
    <messageText></messageText>
    <holdReqHistList>
      <holdReqId></holdReqId>
      <holdReqStartDt></holdReqStartDt>
      <holdReqEndDt></holdReqEndDt>
      <holdReqStatus></holdReqStatus>
      <holdReqType></holdReqType>
      <holdReqReason></holdReqReason>
      <holdReqEntity></holdReqEntity>
      <holdReqProcesses></holdReqProcesses>
    </holdReqHistList>
  </holdReqHistResponse>
</C1-GetHoldRequestHistory>
```

```
</holdReqHistResponse>
</C1-GetHoldRequestHistory>
```

**Note:** Here, the **C1-GetHoldRequestHistory** tag represents the operation in the inbound web service which is used to call the **C1-GetHoldRequestHistory** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **GetHoldRequestHistory**, then the **GetHoldRequestHistory** tag appears instead of the **C1-GetHoldRequestHistory** tag in the above response.

**Hold View Request and Response - Tags in XML Format**

**Note:** We recommend you to refer the [Hold View Request in the XML Format](#) on page 3145 and [Hold View Response in the XML Format](#) on page 3146 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-GetHoldRequestHistory** business service through an inbound web service, you need to ensure that the hold view request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-GetHoldRequestHistory	Used to indicate that you want to invoke the <b>C1-GetHoldRequestHistory</b> business service.	Yes
	<b>Note:</b> Here, the <b>C1-GetHoldRequestHistory</b> tag represents the operation in the inbound web service which is used to call the <b>C1-GetHoldRequestHistory</b> business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to <b>GetHoldRequestHistory</b> , then you need to specify the <b>GetHoldRequestHistory</b> tag instead of the <b>C1-GetHoldRequestHistory</b> tag in the hold view request.	
getHoldReqHistRequest	Used to specify additional criteria along with the details of the entity whose hold requests you want to view.	Yes
sourceSystem	Used to indicate the external system from where the hold view request is received.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>You must specify an external system which is already defined in the system.</p> <p>If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>If the external system is not specified in the hold view request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i>.</p>	
c1ExternalTransactionId	<p>Used to indicate the transaction in the external system through which the hold view request is received.</p> <p><b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.</p>	No
externalSourceId	<p>Used to specify the external source system ID.</p> <p><b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.</p>	No
getHoldReqStartDt	<p>Used when you want to view hold requests which are effective from a particular date onwards.</p> <p><b>Note:</b></p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p> <p>The date should be earlier than the date specified in the <b>getHoldReqEndDt</b> tag.</p>	No
getHoldReqEndDt	Used when you want to view hold requests which are effective till a particular date.	No

Tag Name	Tag Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify the date in the <b>YYYY-MM-DD</b> format. The date should be later than the date specified in the <b>getHoldReqStartDt</b> tag.	
getHoldReqEntity	Used to indicate the type of entity whose hold requests you want to view. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Used when you want to view hold requests through which an account is kept on hold.</li> <li>• <b>BILL</b> - Used when you want to view hold requests through which a bill is kept on hold.</li> <li>• <b>PERS</b> - Used when you want to view hold requests through which a person is kept on hold.</li> </ul> <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_ENTITY_LVL_FLG</b> lookup field. It must be in the <b>Active</b> status.	Yes
getHoldReqReason	Used when you want to view hold requests which are created for a particular reason. <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field. It must be in the <b>Active</b> status.	No
getHoldReqEntIdentType	Used to specify the person or account identifier type. <b>Note:</b> You must specify a person or account identifier type which is already defined in the system. It should be a primary identifier type for the respective entity.	Yes (Conditional) <b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>getHoldReqEntity</b> tag.</li> <li>• The value is not specified in the <b>getHoldReqEntityId</b> tag.</li> </ul>
getHoldReqEntIdentValue	Used to specify the entity identifier (i.e., person or account identifier). It should be the primary identifier of the respective entity. <b>Note:</b> The system then derives the person or account ID using the given primary entity identifier details, and accordingly fetches the hold requests of the respective entity.	Yes (Conditional) <b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>getHoldReqEntity</b> tag.</li> <li>• The value is not specified in the <b>getHoldReqEntityId</b> tag.</li> </ul>
getHoldReqEntityId	Used to specify the entity ID (i.e., person, account, or bill ID).	Yes (Conditional)

Tag Name	Tag Description	Mandatory (Yes or No)
		<b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>getHoldReqEntity</b> tag and the values are not specified in the <b>getHoldReqEntIdentType</b> and <b>getHoldReqEntIdentValue</b> tags.</li> <li>• <b>BILL</b> is specified in the <b>getHoldReqEntity</b> tag.</li> </ul>
getHoldReqProcess	Used when you want to view hold requests where the given processes are kept on hold. The valid values are: <ul style="list-style-type: none"> <li>• ATPY</li> <li>• BILL</li> <li>• DELQ</li> <li>• FNDG</li> <li>• OVDU</li> <li>• REFD</li> </ul> <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.	No

The following table lists and describes additional tags that are included in the hold view response:

Tag Name	Tag Description
holdReqHistResponse	Displays the response received for the hold view request.
statusCd	Indicates whether the hold view request is successfully processed or not. The valid values are: <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
messageText	Indicates the error that occurred while retrieving the hold requests for the entity. <b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Failure</b> .
holdReqHistList	Displays the details of a hold request. <b>Note:</b> This tag appears when the value in the <b>statusCd</b> tag is set to <b>Success</b> .
holdRequestId	Displays the hold request ID.
holdReqStartDt	Displays the date from when the hold request is effective.
holdReqEndDt	Displays the date till when the hold request is effective.
holdStatus	Indicates the status of the hold request. The valid value is: <ul style="list-style-type: none"> <li>• Active</li> </ul>

Tag Name	Tag Description
holdReqType	Indicates the hold request type using which the hold request is created.
holdReqReason	Indicates the reason why the entity is kept on hold.
holdReqEntity	Indicates the entity for which the hold request is created.
holdReqProcesses	Indicates the process which is kept on hold. The valid values are: <ul style="list-style-type: none"><li>• Auto Pay</li><li>• Bill Generation</li><li>• Delinquency</li><li>• Funding</li><li>• Overdue</li><li>• Refund</li></ul> <div>Note: If multiple processes are kept on hold for an entity through the hold request, a comma-separated list of hold processes appears in the tag.</div>

Sample Hold View Request and Response in the XML Format	<a href="#">Sample Hold View Request and Response in the XML Format</a> on page 3151

Sample Hold View Request and Response in the XML Format

Using the below example, you can view hold requests which are created for an account with the specified hold reason.

Sample Hold View Request in the XML Format

```
<C1-GetHoldRequestHistory>
  <getHoldReqHistRequest>
    <sourceSystem>SMALL_PRIME</sourceSystem>
    <externalSourceId>656565</externalSourceId>
    <c1ExternalTransactionId>567888876611</c1ExternalTransactionId>
    <getHoldReqStartDt></getHoldReqStartDt>
    <getHoldReqEndDt></getHoldReqEndDt>
    <getHoldReqEntity>ACCT</getHoldReqEntity>
    <getHoldReqReason>DSRE</getHoldReqReason>
    <getHoldReqEntIdentType>IBAN</getHoldReqEntIdentType>
    <getHoldReqEntIdentValue>XX00XXX111111</getHoldReqEntIdentValue>
    <getHoldReqEntityId></getHoldReqEntityId>
    <getHoldReqProcess></getHoldReqProcess>
  </getHoldReqHistRequest>
</C1-GetHoldRequestHistory>
```

Sample Hold View Response in the XML Format

```
<C1-GetHoldRequestHistory>
  <getHoldReqHistRequest>
    <sourceSystem>SMALL_PRIME</sourceSystem>
    <externalSourceId>656565</externalSourceId>
    <c1ExternalTransactionId>567888876611</c1ExternalTransactionId>
    <getHoldReqStartDt></getHoldReqStartDt>
    <getHoldReqEndDt></getHoldReqEndDt>
    <getHoldReqEntity>ACCT</getHoldReqEntity>
```

```
<getHoldReqReason>DSRE</getHoldReqReason>
<getHoldReqEntIdentType>IBAN</getHoldReqEntIdentType>
<getHoldReqEntIdentValue>XX00XXXX111111</getHoldReqEntIdentValue>
<getHoldReqEntityId></getHoldReqEntityId>
<getHoldReqProcess></getHoldReqProcess>
</getHoldReqHistRequest>
<holdReqHistResponse>
  <statusCd>Success</statusCd>
  <holdReqHistList>
    <holdReqId>110060465751</holdReqId>
    <holdReqStartDt>2025-01-01</holdReqStartDt>
    <holdReqEndDt>2025-01-31</holdReqEndDt>
    <holdReqStatus>Active</holdReqStatus>
    <holdReqType>HOLD_WITHOUT_APPROVAL</holdReqType>
    <holdReqReason>Disaster Recovery</holdReqReason>
    <holdReqEntity>9571248085</holdReqEntity>
    <holdReqProcesses>Auto Pay</holdReqProcesses>
  </holdReqHistList>
</holdReqHistResponse>
</C1-GetHoldRequestHistory>
```

**Note:** We have given the above request sample to illustrate how the tags should be nested while receiving a hold view request from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

**Related Topics**

Hold View Request and Response - Tags in XML Format	<a href="#">Hold View Request and Response - Tags in XML Format</a> on page 3147

## Hold View Request in the JSON Format

The following code snippet illustrates how the attribute/value pairs should be structured while receiving the hold view request in the JSON format:

```
{
  -"C1-GetHoldRequestHistory": {
    -"getHoldReqHistRequest": {
      -"sourceSystem": -"",
      -"externalSourceId": -"",
      -"clExternalTransactionId": -"",
      -"getHoldReqStartDt": -"",
      -"getHoldReqEndDt": -"",
      -"getHoldReqEntity": -"",
      -"getHoldReqReason": -"",
      -"getHoldReqEntIdentType": -"",
      -"getHoldReqEntIdentValue": -"",
      -"getHoldReqEntityId": -"",
      -"getHoldReqProcess": -""
    }
  }
}
```

**Note:** Here, the **C1-GetHoldRequestHistory** attribute represents the operation in the inbound web service which is used to call the **C1-GetHoldRequestHistory** business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to **GetHoldRequestHistory**, then you need to specify the **GetHoldRequestHistory** attribute instead of the **C1-GetHoldRequestHistory** attribute in the above request.

## Hold View Response in the JSON Format

The following code snippet illustrates how the attribute/value pairs are structured while sending the hold view response in the JSON format:

```
{
  -"C1-GetHoldRequestHistory": {
    -"getHoldReqHistRequest": {
      -"sourceSystem": -"",
      -"externalSourceId": -"",
      -"clExternalTransactionId": -"",
      -"getHoldReqStartDt": -"",
      -"getHoldReqEndDt": -"",
      -"getHoldReqEntity": -"",
      -"getHoldReqReason": -"",
      -"getHoldReqEntIdentType": -"",
      -"getHoldReqEntIdentValue": -"",
      -"getHoldReqEntityId": -"",
      -"getHoldReqProcess": -""
    },
    -"holdReqHistResponse": {
      -"statusCd": -"",
      -"messageText": -"",
      -"holdReqHistList": {
        -"holdReqId": -"",
        -"holdReqStartDt": -"",
        -"holdReqEndDt": -"",
        -"holdReqStatus": -"",
        -"holdReqType": -"",
        -"holdReqReason": -"",
        -"holdReqEntity": -"",
        -"holdReqProcesses": -""
      }
    }
  }
}
```

**Note:** Here, the **C1-GetHoldRequestHistory** attribute represents the operation in the inbound web service which is used to call the **C1-GetHoldRequestHistory** business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to **GetHoldRequestHistory**, then the **GetHoldRequestHistory** attribute appears instead of the **C1-GetHoldRequestHistory** attribute in the above response.

**Hold View Request and Response - Attribute/Value Pairs in JSON Format**

**Note:** We recommend you to refer the [Hold View Request in the JSON Format](#) on page 3152 and [Hold View Response in the JSON Format](#) on page 3153 topics in parallel while understanding the below mentioned attributes. This will help you to understand how the attribute/value pairs are structured in the JSON format.

Before calling the **C1-GetHoldRequestHistory** business service through an inbound web service, you need to ensure that the hold view request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
C1-GetHoldRequestHistory	Used to indicate that you want to invoke the <b>C1-GetHoldRequestHistory</b> business service.	Yes
	<b>Note:</b> Here, the <b>C1-GetHoldRequestHistory</b> attribute represents the operation in the inbound web service which is used to call the <b>C1-GetHoldRequestHistory</b> business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to <b>GetHoldRequestHistory</b> , then you need to specify the <b>GetHoldRequestHistory</b> attribute instead of the <b>C1-GetHoldRequestHistory</b> attribute in the hold view request.	
getHoldReqHistRequest	Used to specify additional criteria along with the details of the entity whose hold requests you want to view.	Yes
sourceSystem	Used to indicate the external system from where the hold view request is received.	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>You must specify an external system which is already defined in the system.</p> <p>If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>If the external system is not specified in the hold view request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.</p> <p>For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i>.</p>	
c1ExternalTransactionId	<p>Used to indicate the transaction in the external system through which the hold view request is received.</p> <p><b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.</p>	No
externalSourceId	<p>Used to specify the external source system ID.</p> <p><b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.</p>	No
getHoldReqStartDt	<p>Used when you want to view hold requests which are effective from a particular date onwards.</p> <p><b>Note:</b></p> <p>You must specify the date in the <b>YYYY-MM-DD</b> format.</p> <p>The date should be earlier than the date specified in the <b>getHoldReqEndDt</b> attribute.</p>	No
getHoldReqEndDt	Used when you want to view hold requests which are effective till a particular date.	No

Attribute Name	Attribute Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify the date in the <b>YYYY-MM-DD</b> format. The date should be later than the date specified in the <b>getHoldReqStartDt</b> attribute.	
getHoldReqEntity	Used to indicate the type of entity whose hold requests you want to view. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Used when you want to view hold requests through which an account is kept on hold.</li> <li>• <b>BILL</b> - Used when you want to view hold requests through which a bill is kept on hold.</li> <li>• <b>PERS</b> - Used when you want to view hold requests through which a person is kept on hold.</li> </ul> <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_ENTITY_LVL_FLG</b> lookup field. It must be in the <b>Active</b> status.	Yes
getHoldReqReason	Used when you want to view hold requests which are created for a particular reason. <b>Note:</b> You must specify a value which is already defined in the <b>HOLD_REASON_FLG</b> lookup field. It must be in the <b>Active</b> status.	No
getHoldReqEntIdentType	Used to specify the person or account identifier type. <b>Note:</b> You must specify a person or account identifier type which is already defined in the system. It should be a primary identifier type for the respective entity.	Yes (Conditional) <b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>getHoldReqEntity</b> attribute.</li> <li>• The value is not specified in the <b>getHoldReqEntityId</b> attribute.</li> </ul>
getHoldReqEntIdentValue	Used to specify the entity identifier (i.e., person or account identifier). It should be the primary identifier of the respective entity. <b>Note:</b> The system then derives the person or account ID using the given primary entity identifier details, and accordingly fetches the hold requests of the respective entity.	Yes (Conditional) <b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>getHoldReqEntity</b> attribute.</li> <li>• The value is not specified in the <b>getHoldReqEntityId</b> attribute.</li> </ul>
getHoldReqEntityId	Used to specify the entity ID (i.e., person, account, or bill ID).	Yes (Conditional)

Attribute Name	Attribute Description	Mandatory (Yes or No)
		<b>Note:</b> This data is required when: <ul style="list-style-type: none"> <li>• <b>ACCT</b> or <b>PERS</b> is specified in the <b>getHoldReqEntity</b> attribute and the values are not specified in the <b>getHoldReqEntIdentType</b> and <b>getHoldReqEntIdentValue</b> attributes.</li> <li>• <b>BILL</b> is specified in the <b>getHoldReqEntity</b> attribute.</li> </ul>
getHoldReqProcess	<p>Used when you want to view hold requests where the given processes are kept on hold. The valid values are:</p> <ul style="list-style-type: none"> <li>• ATPY</li> <li>• BILL</li> <li>• DELQ</li> <li>• FNDG</li> <li>• OVDU</li> <li>• REFD</li> </ul> <p><b>Note:</b> You must specify a value which is already defined in the <b>HOLD_PROCESS_FLG</b> lookup field. It must be in the <b>Active</b> status.</p>	No

The following table lists and describes additional attributes that are included in the hold view response:

Attribute Name	Attribute Description
holdReqHistResponse	Displays the response received for the hold view request.
statusCd	<p>Indicates whether the hold view request is successfully processed or not. The valid values are:</p> <ul style="list-style-type: none"> <li>• Success</li> <li>• Failure</li> </ul>
messageText	<p>Indicates the error that occurred while retrieving the hold requests for the entity.</p> <p><b>Note:</b> This attribute appears when the value in the <b>statusCd</b> attribute is set to <b>Failure</b>.</p>
holdReqHistList	<p>Displays the details of a hold request.</p> <p><b>Note:</b> This attribute appears when the value in the <b>statusCd</b> attribute is set to <b>Success</b>.</p>
holdRequestId	Displays the hold request ID.
holdReqStartDt	Displays the date from when the hold request is effective.
holdReqEndDt	Displays the date till when the hold request is effective.
holdStatus	<p>Indicates the status of the hold request. The valid value is:</p> <ul style="list-style-type: none"> <li>• Active</li> </ul>

Attribute Name	Attribute Description
holdReqType	Indicates the hold request type using which the hold request is created.
holdReqReason	Indicates the reason why the entity is kept on hold.
holdReqEntity	Indicates the entity for which the hold request is created.
holdReqProcesses	Indicates the process which is kept on hold. The valid values are: <ul style="list-style-type: none"><li>• Auto Pay</li><li>• Bill Generation</li><li>• Delinquency</li><li>• Funding</li><li>• Overdue</li><li>• Refund</li></ul> <div>Note: If multiple processes are kept on hold for an entity through the hold request, a comma-separated list of hold processes appears in the attribute.</div>

Sample Hold View Request and Response in the JSON Format

Using the below example, you can view hold requests which are created for a bill and are effective from a particular date.

Sample Hold View Request in the JSON Format

```
{
  -"C1-GetHoldRequestHistory": {
    -"getHoldReqHistRequest": {
      -"sourceSystem": -"SMALL PRIME",
      -"externalSourceId": -"656565",
      -"clExternalTransactionId": -"567888876600",
      -"getHoldReqStartDt": -"2025-01-01",
      -"getHoldReqEndDt": -"",
      -"getHoldReqEntity": -"BILL",
      -"getHoldReqReason": -"",
      -"getHoldReqEntIdentType": -"",
      -"getHoldReqEntIdentValue": -"",
      -"getHoldReqEntityId": -"2339633684",
      -"getHoldReqProcess": -""
    }
  }
}
```

Sample Hold View Response in the JSON Format

```
{
  -"C1-GetHoldRequestHistory": {
    -"getHoldReqHistRequest": {
      -"sourceSystem": -"SMALL PRIME",
      -"externalSourceId": -"656565",
      -"clExternalTransactionId": -"567888876600",
```

```
- "getHoldReqStartDt": - "2025-01-01",
- "getHoldReqEndDt": - "",
- "getHoldReqEntity": - "BILL",
- "getHoldReqReason": - "",
- "getHoldReqEntIdentType": - "",
- "getHoldReqEntIdentValue": - "",
- "getHoldReqEntityId": - "2339633684",
- "getHoldReqProcess": - ""
- }
- "holdReqHistResponse": {
  - "statusCd": - "Success",
  - "holdReqHistList": [
    {
      - "holdReqId": - "588586064410",
      - "holdReqStartDt": - "2025-01-01",
      - "holdReqEndDt": - "2025-01-31",
      - "holdReqStatus": - "Active",
      - "holdReqType": - "HOLD WITHOUT APPROVAL",
      - "holdReqReason": - "Disaster Recovery",
      - "holdReqEntity": - "2339633684",
      - "holdReqProcesses": - "Funding"
    },
    {
      - "holdReqId": - "588586064411",
      - "holdReqStartDt": - "2025-03-01",
      - "holdReqEndDt": - "2025-03-31",
      - "holdReqStatus": - "Active",
      - "holdReqType": - "HOLD WITHOUT APPROVAL",
      - "holdReqReason": - "Disaster Recovery",
      - "holdReqEntity": - "2339633684",
      - "holdReqProcesses": - "Funding"
    }
  ]
- }
- }
```

**Note:** We have given the above request sample to illustrate how the attribute/value pairs should be structured while receiving a hold view request from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

# C1-ReleaseHoldRequest Business Service

The **Release Hold Request (C1-ReleaseHoldRequest)** business service enables you to release an existing hold request which is in the **Active** status. You can call this business service from an external system through an inbound web service. At present, you can release a hold request through an inbound web service only when it has a single entity (i.e., a particular person, account, or bill) in the hold request. If you want to send the hold release request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the hold release request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

While sending the hold release request, you need to specify the following details:

- Hold Request ID
- Hold release reason and comments, if any

Note:

You must specify a reason which is already defined for the **Released** status of the **C1-HoldRequest** business object through the **Status Reason** screen.

You can release a hold request through an inbound web service only when the release approval process is not configured on the respective hold request type.

You cannot release a hold request through an inbound web service when the hold request start date is later than the system date or when the system date is later than the hold request end date.

If you want to release a hold request with multiple entities, you can opt to update the end date of each entity in the hold request through **C1-UpdateHoldRequest** business service by calling it separately for each entity of the hold request. Once the end date of all the entities in the hold request is updated through an inbound web service, you can then execute the **C1-HLMON** batch for necessary updates. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*. Alternatively, you can release a hold request with multiple entities from the user interface.

Once the hold request is released through an inbound web service, the status of the hold request is set to **Released**. In addition, the hold request end date is set to the system date. If an error occurs while releasing the hold request, the system sends the error message in the response. The system enables you to track the hold release response sent to the external system using the **Inbound Web Service History** feature.

For more information, see the **Inbound Web Service History** section in the *Oracle Revenue Management and Billing Administrative Guide*.

Sample Hold Release Request and Response in the JSON Format	<a href="#">Sample Hold Release Request and Response in the JSON Format</a> on page 3168

## Prerequisites

To release a hold request through an inbound web service, you need to do the following:

- Define a REST or SOAP based inbound web service to call the **C1-ReleaseHoldRequest** business service where the **HTTP Method** is set to **Post** and the **URI Component** is set to **/releaseHold**.
- Authorize the ORMB user to access the required application service
- Define the required hold request type where the **Release Approval** option is not selected and the status is set to **Active**.
- Define the required values for the **HOLD\_REASON\_FLG** lookup field.
- Define the required values for the **HOLD\_ENTITY\_LVL\_FLG** lookup field.
- Define the required values for the **HOLD\_PROCESS\_FLG** lookup field.
- Define the required characteristic types where the characteristic entity is set to **Hold Request**
- Reasons defined for the **Released** status of the **C1-HoldRequest** business object in the **Status Reason** screen

## Hold Release Request in the XML Format

The following code snippet illustrates how the tags should be nested while receiving the hold release request in the XML format:

```
<C1-ReleaseHoldRequest>
  <sourceSystem></sourceSystem>
  <externalTransactionId></externalTransactionId>
  <externalSourceId></externalSourceId>
  <holdRequestId></holdRequestId>
  <holdReleaseReason></holdReleaseReason>
  <holdComments></holdComments>
</C1-ReleaseHoldRequest>
```

**Note:** Here, the **C1-ReleaseHoldRequest** tag represents the operation in the inbound web service which is used to call the **C1-ReleaseHoldRequest** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **ReleaseHoldRequest**, then you need to specify the **ReleaseHoldRequest** tag instead of the **C1-ReleaseHoldRequest** tag in the above request.

## Hold Release Response in the XML Format

The following code snippet illustrates how the tags are nested while sending the hold release response in the XML format:

```
<C1-ReleaseHoldRequest>
  <requestProcessStatus></requestProcessStatus>
  <sourceSystem></sourceSystem>
  <externalTransactionId></externalTransactionId>
  <externalSourceId></externalSourceId>
  <holdRequestId></holdRequestId>
  <holdReleaseReason></holdReleaseReason>
  <holdComments></holdComments>
  <holdEndDate></holdEndDate>
  <holdRequestStatus></holdRequestStatus>
  <errorMsg></errorMsg>
</C1-ReleaseHoldRequest>
```

**Note:** Here, the **C1-ReleaseHoldRequest** tag represents the operation in the inbound web service which is used to call the **C1-ReleaseHoldRequest** business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to **ReleaseHoldRequest**, then the **ReleaseHoldRequest** tag appears instead of the **C1-ReleaseHoldRequest** tag in the above response.

Hold Release Request and Response - Tags in XML Format	<a href="#">Hold Release Request and Response - Tags in XML Format</a> on page 3162
Sample Hold Release Request and Response in the XML Format	<a href="#">Sample Hold Release Request and Response in the XML Format</a> on page 3164

## Hold Release Request and Response - Tags in XML Format

**Note:** We recommend you to refer the [Hold Release Request in the XML Format](#) on page 3161 and [Hold Release Response in the XML Format](#) on page 3162 topics in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1-ReleaseHoldRequest** business service through an inbound web service, you need to ensure that the hold release request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-ReleaseHoldRequest	Used to indicate that you want to invoke the <b>C1-ReleaseHoldRequest</b> business service.	Yes
	<b>Note:</b> Here, the <b>C1-ReleaseHoldRequest</b> tag represents the operation in the inbound web service which is used to call the <b>C1-ReleaseHoldRequest</b> business service. This tag would change depending on the operation name specified in your SOAP or REST based inbound web service. For example, if you have set the operation name to <b>ReleaseHoldRequest</b> , then you need to specify the <b>ReleaseHoldRequest</b> tag instead of the <b>C1-ReleaseHoldRequest</b> tag in the hold release request.	
sourceSystem	Used to indicate the external system from where the hold release request is received.	No
	<b>Note:</b> You must specify an external system which is already defined in the system.  If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.  If the external system is not specified in the hold creation request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.  For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i> .	
externalTransactionId	Used to indicate the transaction in the external system through which the hold release request is received.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
externalSourceId	Used to specify the external source system ID.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
holdRequestId	Used to indicate the hold request that you want to release.	Yes
holdReleaseReason	Used to specify the reason why you want to release the hold request.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify a reason which is defined for the <b>Released</b> status of the <b>C1-HoldRequest</b> business object through the <b>Status Reason</b> screen.	
holdComments	Used to specify additional information while releasing the hold request.	No

The following table lists and describes additional tags that are included in the hold release response:

Tag Name	Tag Description
requestProcessStatus	Indicates whether the hold release request is successfully processed or not. The valid values are: <ul style="list-style-type: none"><li>Success</li><li>Failure</li></ul>
errormsg	Indicates the error that occurred while releasing the hold request. <b>Note:</b> This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Failure</b> .
holdEndDate	Displays the date till when the hold request is effective. <b>Note:</b> The system sets the hold end date to the system date (i.e., when the hold request is released through the inbound web service). This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Success</b> .
holdRequestStatus	Indicates the status of the hold request. The valid value is: <ul style="list-style-type: none"><li>Release</li></ul> <b>Note:</b> This tag appears when the value in the <b>requestProcessStatus</b> tag is set to <b>Success</b> .

**Related Topics**

Sample Hold Release Request and Response in the XML Format	<a href="#">Sample Hold Release Request and Response in the XML Format</a> on page 3164

**Sample Hold Release Request and Response in the XML Format**

Using the below example, you can release a hold request.

**Sample Hold Release Request in the XML Format**

```
<C1-ReleaseHoldRequest>
  <sourceSystem>SMALL_PRIME</sourceSystem>
  <externalTransactionId>567800876666</externalTransactionId>
  <externalSourceId>656565</externalSourceId>
  <holdRequestId>220419105258</holdRequestId>
  <holdReleaseReason>SUFF</holdReleaseReason>
```

```
<holdComments>Sufficient Funds Available</holdComments>
</C1-ReleaseHoldRequest>
```

Sample Hold Release Response in the XML Format

```
<C1-ReleaseHoldRequest>
  <requestProcessStatus>Success</requestProcessStatus>
  <sourceSystem>SMALL_PRIME</sourceSystem>
  <externalTransactionId>567800876666</externalTransactionId>
  <externalSourceId>656565</externalSourceId>
  <holdRequestId>220419105258</holdRequestId>
  <holdReleaseReason>SUFF</holdReleaseReason>
  <holdComments>Sufficient Funds Available</holdComments>
  <holdEndDate>2025-01-31</holdEndDate>
  <holdRequestStatus>Release</holdRequestStatus>
</C1-ReleaseHoldRequest>
```

**Note:** We have given the above request sample to illustrate how the tags should be nested while receiving a hold release request from the external system. However, you should not seamlessly use this sample in your environment because the required pre-requisite data may not be available in your environment. In such case, the system will give erroneous results.

Hold Release Request and Response - Attribute/Value Pairs in JSON Format	<a href="#">Hold Release Request and Response - Attribute/Value Pairs in JSON Format</a> on page 3166
Sample Hold Release Request and Response in the JSON Format	<a href="#">Sample Hold Release Request and Response in the JSON Format</a> on page 3168

## Hold Release Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the [Hold Release Request in the JSON Format](#) on page 3165 and [Hold Release Response in the JSON Format](#) on page 3166 topics in parallel while understanding the below mentioned attributes. This will help you to understand how the attribute/value pairs are structured in the JSON format.

Before calling the **C1-ReleaseHoldRequest** business service through an inbound web service, you need to ensure that the hold release request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
C1-ReleaseHoldRequest	Used to indicate that you want to invoke the <b>C1-ReleaseHoldRequest</b> business service.	Yes
	<b>Note:</b> Here, the <b>C1-ReleaseHoldRequest</b> attribute represents the operation in the inbound web service which is used to call the <b>C1-ReleaseHoldRequest</b> business service. This attribute would change depending on the operation name specified in your REST based inbound web service. For example, if you have set the operation name to <b>ReleaseHoldRequest</b> , then you need to specify the <b>ReleaseHoldRequest</b> attribute instead of the <b>C1-ReleaseHoldRequest</b> attribute in the hold release request.	
sourceSystem	Used to indicate the external system from where the hold release request is received.	No
	<b>Note:</b> You must specify an external system which is already defined in the system.  If the <b>Inbound Web Service History</b> feature is enabled, the system validates whether the specified external system matches the external system that is associated with the outbound message type specified in the <b>C1-IWSHIST</b> algorithm. If so, the system stamps the specified external system corresponding to the record in the <b>C1_IWS_HIST</b> table.  If the external system is not specified in the hold creation request, the system, by default, stamps the external system associated with the outbound message type (specified in the <b>C1-IWSHIST</b> algorithm) corresponding to the record in the <b>C1_IWS_HIST</b> table.  For more information, see the <b>Inbound Web Service History</b> section in the <i>Oracle Revenue Management and Billing Administrative Guide</i> .	
externalTransactionId	Used to indicate the transaction in the external system through which the hold release request is received.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external transaction ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
externalSourceId	Used to specify the external source system ID.	No
	<b>Note:</b> If the <b>Inbound Web Service History</b> feature is enabled, the system stores the external source system ID corresponding to the record in the <b>C1_IWS_HIST</b> table.	
holdRequestId	Used to indicate the hold request that you want to release.	Yes
holdReleaseReason	Used to specify the reason why you want to release the hold request.	Yes

Attribute Name	Attribute Description	Mandatory (Yes or No)
	<b>Note:</b> You must specify a reason which is defined for the <b>Released</b> status of the <b>C1-HoldRequest</b> business object through the <b>Status Reason</b> screen.	
holdComments	Used to specify additional information while releasing the hold request.	No

The following table lists and describes additional attributes that are included in the hold release response:

Attribute Name	Attribute Description
requestProcessStatus	Indicates whether the hold release request is successfully processed or not. The valid values are: <ul style="list-style-type: none"><li>Success</li><li>Failure</li></ul>
errormsg	Indicates the error that occurred while releasing the hold request. <b>Note:</b> This attribute appears when the value in the <b>requestProcessStatus</b> attribute is set to <b>Failure</b> .
holdEndDate	Displays the date till when the hold request is effective. <b>Note:</b> The system sets the hold end date to the system date (i.e., when the hold request is released through the inbound web service). This attribute appears when the value in the <b>requestProcessStatus</b> attribute is set to <b>Success</b> .
holdRequestStatus	Indicates the status of the hold request. The valid value is: <ul style="list-style-type: none"><li>Release</li></ul> <b>Note:</b> This attribute appears when the value in the <b>requestProcessStatus</b> attribute is set to <b>Success</b> .

**Related Topics**

# Chapter

# 46

---

## Hold Direct Debit Instruction

---

### Topics:

- [Prerequisites](#)
- [Algorithms Used in C1-AutoPayRequest](#)
- [Auto Pay Request Status Transition without Approval](#)
- [Auto Pay Request Status Transition with Approval](#)
- [Auto Pay Request Type](#)
- [Auto Pay Request \(Used for Searching\)](#)
- [Auto Pay Request \(Used for Viewing\)](#)

In the financial services and health insurance domains, there might be scenarios wherein the customers would like to review their invoices before the charges are directly debited from their accounts. In such scenarios, there is a need to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer.

Oracle Revenue Management and Billing provides the ability to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer. A new field named **Auto Pay Review Required** is added in the **Auto Pay** tab of the **Account** screen. On completing a bill for an account, the system creates the automatic payment records in the **CI\_BILL\_ACH** table as per the auto pay instructions defined for the account. If the **Auto Pay Review Required** option is selected, the system sets the **EXTRACT\_ELIG\_SW** column corresponding to the automatic payment records in the **CI\_BILL\_ACH** table to N. However, if the **Auto Pay Review Required** option is not selected, the system sets the **EXTRACT\_ELIG\_SW** column corresponding to the automatic payment records in the **CI\_BILL\_ACH** table to Y. The **EXTRACT\_ELIG\_SW** column indicates whether the automatic payment record is eligible for the extraction. If the **EXTRACT\_ELIG\_SW** column is set to N, the **APAYCRET** batch does not consider the automatic payment record in the **CI\_BILL\_ACH** table for automatic payment creation.

Once the confirmation is received for one or more bills, the system enables you to create an automatic payment request for the bills. While creating an automatic payment request, you need to specify an automatic payment request type using which you want to create the automatic payment request. It is the automatic payment request type which helps the system to determine:

- The business object using which the automatic payment request should be created in the system
- Whether the approval is required for the automatic payment request

Once you specify the automatic payment request type, the system creates the automatic payment request in the **Draft** status. You can then include the bills for which invoice confirmation is received from the customers in the automatic payment request. At least one bill should be included in the automatic payment request. Before submitting an automatic payment request, you need to do the following:

- Edit the Schedule Extract Date (if required) of each bill
- Set the **Eligible for Extraction** field of each bill to Y

You can also delete a bill from an automatic payment request when it is in the **Draft** status. Once you edit the required details of the bills in an automatic payment request, you can submit the automatic payment request. If the approval process is not configured in the respective automatic payment request type, the system does the following:

- Updates the **ELIG\_EXTRACT\_SW** and **APAY\_CRE\_DT** columns corresponding to the automatic payment records in the **CI\_BILL\_ACH** table
- Changes the status of the automatic payment request to **Processed**

If the approval process is configured in the respective automatic payment request type, the system changes the status of the automatic payment request to **Approval In Progress**. A To Do notification is created for the approver using the approval To Do type (specified in the respective automatic payment request type) and assigned to the users with the approval To Do role (specified in the respective automatic payment request type). Once the approver reviews an automatic payment request, the approver can approve, reject, or resubmit the automatic payment request based on the observations. If the approver approves the automatic payment request, the system does the following:

- Updates the **ELIG\_EXTRACT\_SW** and **APAY\_CRE\_DT** columns corresponding to the automatic payment records in the **CI\_BILL\_ACH** table
- Changes the status of the automatic payment request to **Processed**

If the approver rejects an automatic payment request, the status of the automatic payment request is changed to **Rejected**. However, if the approver requests the submitter to resubmit an automatic payment request, the status of the automatic payment request is changed to **Draft**. A To Do notification is created for the submitter using the submitter To Do type (specified in the respective automatic payment request type) and assigned to the users with the submitter To Do role (specified in the respective automatic payment request type). While rejecting or resubmitting an automatic payment request, the approver needs to specify the reason for rejection or resubmission.

To implement the hold direct debit feature, the following new screens are introduced in this release:

- **Auto Pay Request Type** - Enables you to create, edit, delete, and copy an automatic payment request type.
- **Auto Pay Request (Used for Searching)** - Enables you to search for an automatic payment request. It also enables you to create an automatic payment request.
- **Auto Pay Request (Used for Viewing)** - Enables you to edit, delete, submit, approve, reject, and resubmit the automatic payment request. It also enables you to add, edit, and delete bills from the automatic payment request.

In addition, the following changes are made to the system:

- **Auto Pay Review Required** - This field is added in the **Auto Pay** tab of the **Account** screen. It indicates whether you want to hold direct debit (i.e. automatic payment) for the bills of the account until the confirmation is received from the customer.
- **Eligible for Extraction** - This column is added in the **Auto Pay** tab of the **Bill** screen. It indicates whether the automatic payment record for the bill is eligible for extraction.

# Prerequisites

To setup the auto pay request feature, you need to do the following:

- Auto pay request type business object defined in the application
- Auto pay request types defined in the system.
- Approval To Do types and To Do roles defined in the application
- Submitter To Do types and To Do roles defined in the application
- Characteristic types defined in the application

# Algorithms Used in C1-AutoPayRequest

The following table lists the algorithm which is attached to the **C1-AutoPayRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-APAYRQINF	C1-APAYRQINF	Refer to <a href="#">C1-APAYRQINF</a> on page 3173

The following table lists the algorithms which are used in the lifecycle of the **C1-AutoPayRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to <a href="#">F1-TODOCOMPL</a> on page 1364
Submitted	Enter	C1-APAYSUB	C1-APAYSUB	Refer to <a href="#">C1-APAYSUB</a> on page 3174
Approval Progress	Enter	C1-APAYAPP	C1-APAYAPP	Refer to <a href="#">C1-APAYAPP</a> on page 3174
	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to <a href="#">F1-TODOCOMPL</a> on page 1364
Update Auto Pay Record	Enter	C1-UPDAPAY	C1-UPDAPAY	Refer to <a href="#">C1-UPDAPAY</a> on page 3174
Approved	Enter	C1-APAYAPRVD	C1-APAYAPRVD	Refer to <a href="#">C1-APAYAPRVD</a> on page 3175
Return to Submitter	Enter	C1-APAYRESUB	C1-APAYRESUB	Refer to <a href="#">C1-APAYRESUB</a> on page 3175
Processed	-	-	-	-
Rejected	-	-	-	-

# C1-APAYRQINF

The **C1-APAYRQINF** algorithm generates the auto pay request information string and is plugged in at **System Event: Information** of business object: **C1-AutoPayRequest**.

It concatenates the following fields:

- Auto Pay Request Type Description

- Auto Pay Request Status Description
- Auto Pay Request ID

## F1-TODOCOMPL

---

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion (F1-EXLTD)** characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

**Note:** The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

## C1-APAYSUB

---

The **C1-APAYSUB** algorithm will be plugged at the **"Enter" System event** of the business object (**C1-AutoPayRequest**) life cycle status: **SUBMITTED**.

This algorithm checks the following:

1. Whether the approval is required for the auto pay request based on the configuration in auto pay request type (**IS\_APPR\_REQ = Y**).
  - a. If the approval is required for the auto pay request, the status of the auto pay request is changed to **Approval In Progress**.
  - b. If the approval is not required for the auto pay request, the status of the auto pay request is changed to **UPDATEAPAY**.
2. At least one auto pay record is selected in the auto pay request.
3. Updated scheduled extraction date cannot be less than system date.
4. **Auto Pay Request** cannot be created for any auto pay record if the same auto pay record is selected in another request which is in the **Approval In Progress** status.

## C1-APAYAPP

---

The **C1-APAYAPP** algorithm creates the following:

1. A To Do using the To Do type specified in the approval profile which is attached to the **Auto Pay Request Type**. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.
2. A log entry is added when a To Do is created using the To Do type. It will create To Do Entry when **Auto Pay Request** enters in the **Approval in Progress** status from **Submit** status.

## C1-UPDAPAY

---

The **C1-UPDAPAY** algorithm will be plugged in at **"Enter" System event** of the business object (**C1-AutoPayRequest**) life cycle status: **UPDATEAPAY**.

1. The **Extract Eligible Switch** and **Auto Pay Creation Date** are updated in the **CI\_BILL\_ACH** table with the latest values present in **Auto Pay Request Details** table. The auto pay request status is then changed to **PROCESSED**.

2. If the bill which is present in the **Auto Pay Request** is cancelled then the latest details of **Extract Eligible Switch** and **Auto Pay Creation Date** are not updated in the **CI\_BILL\_ACH** table and the auto pay request status is changed to **PROCESSED**.

## C1-APAYAPRVD

---

The **C1-APAYAPRVD** algorithm is the **Enter** status algorithm. This algorithm is invoked when you approve an **Auto Pay Request**. It confirms whether the approval flag is true and the status of the **Auto Pay request** is **APPROVED** to transit it to the next level.

## C1-APAYRESUB

---

The **C1-APAYRESUB** algorithm is invoked on the **Re-Submit** button. It moves the status of the **Auto Pay Request** to **Draft**.

A To Do is generated for the user as submitter whose To Do type and To Do role are fetched from the **Auto Pay Request Type**. This algorithm creates the To Do entry when the **Auto Pay Request** enters into the **Return to Submitter** status from the **Approval In Progress** status.

## Auto Pay Request Status Transition without Approval

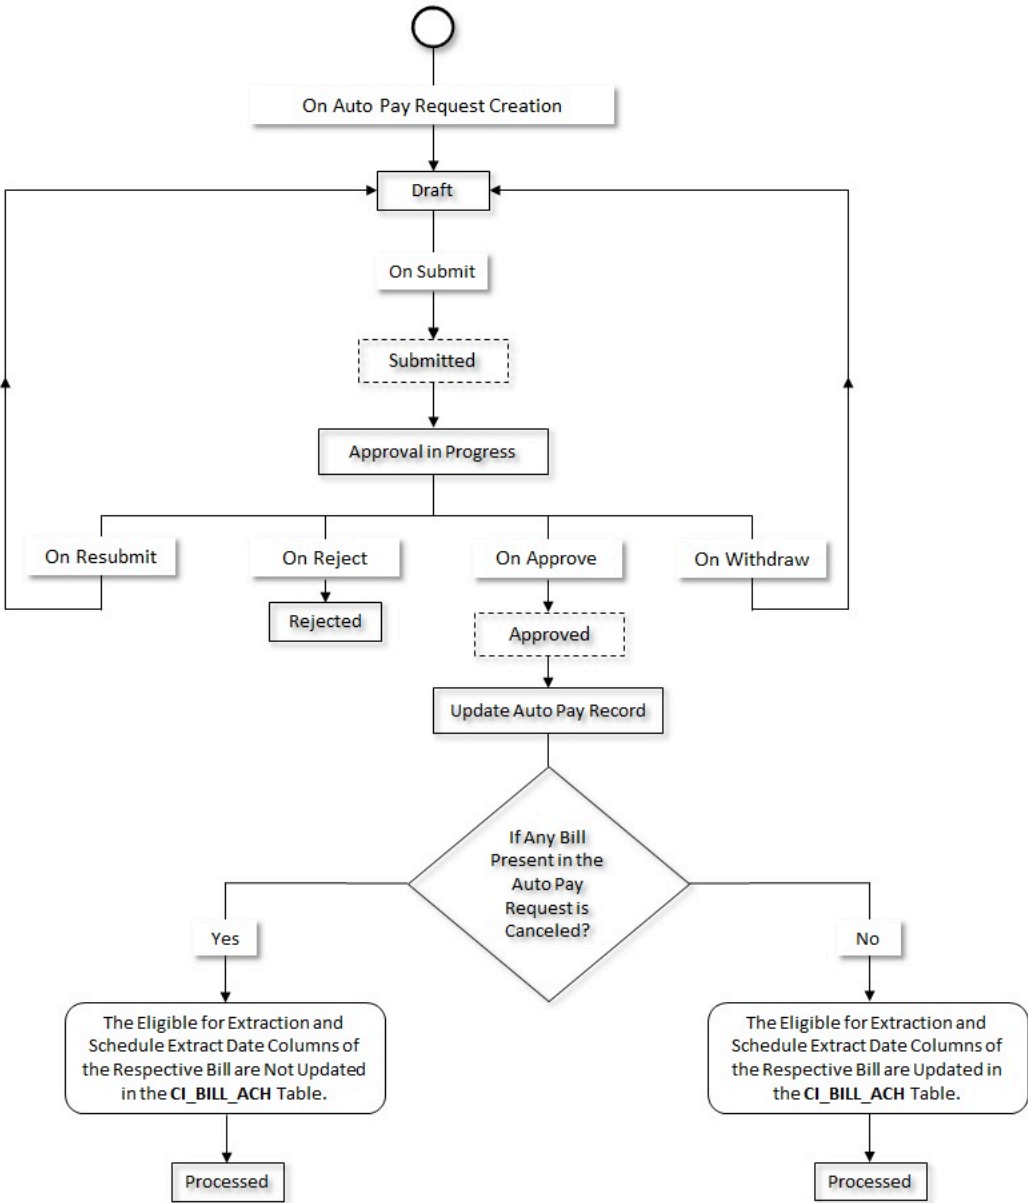

---

The following figure graphically indicates how an auto pay request moves from one status to another when the approval process is not configured in the auto pay request type:

## Auto Pay Request Status Transition with Approval

The following figure graphically indicates how an auto pay request moves from one status to another when the approval process is configured in the auto pay request type:

# Auto Pay Request Type

The **Auto Pay Request Type** screen allows you to define, edit, copy, and delete an auto pay request type. It also allows you to view the details of an auto pay request type. It contains the following zones:

- [Auto Pay Request Type List](#) on page 3177
- [Auto Pay Request Type](#) on page 3178

## Auto Pay Request Type List

The **Auto Pay Request Type List** zone lists the auto pay request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Auto Pay Request Type	Displays the auto pay request type.
Description	Displays the description of the auto pay request type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Auto Pay Request Type</b> screen appears where you can edit the details of the auto pay request type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Auto Pay Request Type</b> screen appears where you can define an auto pay request type using an existing auto pay request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the auto pay request type.
	<b>Note:</b> You can delete an auto pay request type only when an auto pay request is not yet created using the auto pay request type.

On clicking the **Broadcast** (📡) icon corresponding to an auto pay request type, the **Auto Pay Request Type** zone appears with the details of the respective auto pay request type.

<b>Auto Pay Request Type</b> zone	<a href="#">Auto Pay Request Type</a> on page 3178

# Auto Pay Request Type

The **Auto Pay Request Type** zone displays the details of the auto pay request type. It contains the following sections:

- **Main** - Displays basic information about the auto pay request type. It contains the following fields:

Field Name	Field Description
Auto Pay Request Type	Displays the auto pay request type.
Description	Displays the description of the auto pay request type.
Related Transaction BO	Indicates the business object using which the auto pay transaction is performed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the auto pay request type.
Auto Pay Request Action	Indicates the action which is performed on the auto pay request using the auto pay request type.

Field Name	Field Description
Status	Indicates the current status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Approval Required	Indicates whether approval is required for the auto pay request which is created using the auto pay request type.
Approval To Do Type	Indicates that the To Do entry of the specified To Do Type is created when you submit the auto pay request for an approval.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type. This field appears only when the <b>Approval Required</b> option is selected.
Approval To Do Role	Indicates that the users which belong to the specified To Do role can only approve the auto pay request when it is submitted for an approval.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role. This field appears only when the <b>Approval Required</b> option is selected.
Submitter To Do Type	Indicates that the To Do entry of the specified To Do task is created when an auto pay request is resubmitted by an approver.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates that the approvers which belong to the specified To Do role can only resubmit the auto pay request.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.

- **Characteristic** - Lists the characteristics defined for the auto pay request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the auto pay request type.
Delete	Used to delete the auto pay request type.
	<b>Note:</b> You can delete an auto pay request type only when an auto pay request is not yet created using the auto pay request type.

Button Name	Button Description
Duplicate	Used to create a new auto pay request type using an existing auto pay request type.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the auto pay request type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Auto Pay Request Type** zone does not appear in the **Auto Pay Request Type** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to an auto pay request type in the **Auto Pay Request Type List** zone.

## Defining an Auto Pay Request Type

**Prerequisites**

To define an auto pay request type, you should have:

- Auto pay request type business objects defined in the application
- Approval To Do Types and To Do roles defined in the application
- Submitter To Do Types and To Do roles defined in the application

**Procedure**

To define an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Auto Pay Request Type** sub-menu.

**Tip:** Alternatively, you can access the **Auto Pay Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Auto Pay Request Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple auto pay request type business objects defined in the application. If there is only one auto pay request type business object defined in the application, the **Auto Pay Request Type** screen appears.

4. Select the required auto pay request type business object from the respective field.
5. Click **OK**.

The **Auto Pay Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the auto pay request type.
- **Characteristics** - Used to define the characteristics for the auto pay request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to specify the auto pay request type.	Yes
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed. The valid value is: <ul style="list-style-type: none"> <li>• Auto Pay Request</li> </ul>	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Auto Pay Request Action	Indicates the action which is performed on the auto pay request using the auto pay request type. The valid value is: <ul style="list-style-type: none"> <li>• Update</li> </ul>	Not applicable
	<b>Note:</b> By default, the <b>Update</b> option is selected and cannot be edited.	
Status	Used to indicate the current status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of an auto pay request type to <b>Inactive</b> when an auto pay request created using the auto pay request type is in the <b>Draft</b> or <b>Rejected</b> status.	
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	Used to specify the To Do entry of the specified To Do Type that is created when you submit the auto pay request for an approval.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p><b>Note:</b> This field is required while approving an auto pay request which is created using the auto pay request type.</p>
Approval To Do Role	Used to indicate the users which belong to the specified To Do role who can approve the auto pay request when it is submitted for an approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the specified <b>Approval To Do Type</b>.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p><b>Note:</b> This field is required while approving an auto pay request which is created using the auto pay request type.</p>
Submitter To Do Type	Used to indicate the To Do entry of the specified To Do Type that is created when an auto pay request is resubmitted by an approver.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p><b>Note:</b> This field is required while resubmitting an auto pay request which is created using the auto pay request type.</p>
Submitter To Do Role	Used to indicate the users which belong to the specified To Do role who can resubmit the auto pay request when it is submitted for an approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the specified <b>Submitter To Do Type</b>.</p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p><b>Note:</b> This field is required while resubmitting an auto pay request which is created using the auto pay request type.</p>

6. Enter the required details in the **Main** section.

- 7. Define a list of characteristics for the auto pay request type, if required.
- 8. Click **Save**.  
The auto pay request type is defined.

**Related Topics**

For more information on...	See...
<b>Auto Pay Request Type</b> screen	<a href="#">Auto Pay Request Type</a> on page 3177
How to define a characteristic for an auto pay request type	<a href="#">Defining a Characteristic for an Auto Pay Request Type</a> on page 3183

**Defining a Characteristic for an Auto Pay Request Type**

**Prerequisites**

To define a characteristic for an auto pay request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Auto Pay Request Type**)

**Procedure**

To define a characteristic for an auto pay request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an auto pay request type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Auto Pay Request Type</b> .	<b>Note:</b> This field is required while defining a characteristic for the auto pay request type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for the respective characteristic value.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required while defining a characteristic for the auto pay request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the auto pay request type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the auto pay request type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Editing an Auto Pay Request Type

**Prerequisites**

To edit an auto pay request type, you should have:

- Auto pay request type that you want to edit defined in the application

**Procedure**

To edit an auto pay request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Auto Pay Request Type** sub-menu.  
The **Auto Pay Request Type** screen appears.
4. In the **Auto Pay Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the auto pay request type whose details you want to edit.

The **Auto Pay Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the auto pay request type.
- **Characteristics** - Used to define the characteristics for the auto pay request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Displays the auto pay request type.	Not applicable
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed.	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Auto Pay Request Action	Displays the action which is performed on the auto pay request using the auto pay request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	Used to indicate the To Do task which is performed by the approver while approving the auto pay request. <div> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> (🔍) icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> </div>	Yes
Approval To Do Role	Used to indicate the users with the specified To Do role who can approve the auto pay request. <div> <p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the approval To Do type.</p> <p>This field appears when the <b>Approval Required</b> option is selected.</p> </div>	Yes
Submitter To Do Type	Used to indicate the To Do task created when an auto pay request is submitted by an approver. <div> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> </div>	Yes
Submitter To Do Role	Used to indicate the users with the specified To Do role who can submit the auto pay request for approval.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.	

**Tip:** Alternatively, you can access this screen by clicking the **Edit** button in the **Auto Pay Request Type** zone.

- 5. Modify the required details in the **Main** section.
- 6. Define, edit, or remove characteristics of the auto pay request type, if required.
- 7. Click **Save**.  
The changes made to the auto pay request type are saved.

## Copying an Auto Pay Request Type

Instead of creating an auto pay request type from scratch, you can create a new auto pay request type using an existing auto pay request type. This is possible through copying an auto pay request type. On copying an auto pay request type, the details including the characteristics are copied to the new auto pay request type. You can then edit the details, if required.

**Prerequisites**

To copy an auto pay request type, you should have:

- Auto pay request type (whose copy you want to create) defined in the application
- Auto pay request business objects defined in the application

**Procedure**

To copy an auto pay request type:

- 1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
- 2. From the **Admin** menu, select **A** and then click **Auto Pay Request Type**.  
A sub-menu appears.
- 3. Click the **Search** option from the **Auto Pay Request Type** sub-menu.  
The **Auto Pay Request Type** screen appears.
- 4. In the **Auto Pay Request Type List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the auto pay request type whose copy you want to create.

The **Auto Pay Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the auto pay request type.
- **Characteristics** - Used to define the characteristics for the auto pay request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to specify the auto pay request type.	Yes
Business Object	Indicates the business object using which the auto pay request type is defined in the system.	Not applicable
Description	Used to specify the description for the auto pay request type.	Yes
Related Transaction BO	Used to indicate the business object using which the auto pay transaction is performed.	Yes
Detailed Description	Used to specify additional information about the auto pay request type.	No
Status	Used to indicate the status of the auto pay request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Approval Required	Used to indicate whether approval is required for the auto pay request which is created using the auto pay request type.	No
Approval To Do Type	Used to indicate the To Do task which is performed by the approver while approving the auto pay request.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field. This field appears when the <b>Approval Required</b> option is selected.	
Approval To Do Role	Used to indicate the users with the specified To Do role who can approve the auto pay request.	Yes
	<b>Note:</b> The list includes only those To Do roles which are associated with the approval To Do type. This field appears when the <b>Approval Required</b> option is selected.	
Submitter To Do Type	Used to indicate the To Do task created when an auto pay request is submitted by an approver.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.  On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.	
Submitter To Do Role	Used to indicate the users with the specified To Do role who can submit the auto pay request for approval.  <b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.	Yes

**Tip:** Alternatively, you can copy an auto pay request type by clicking the **Duplicate** button in the **Auto Pay Request Type** zone.

- 5. Enter the required details in the **Main** section.
- 6. Define, edit, or remove characteristics of the auto pay request type, if required.
- 7. Click **Save**.  
The new auto pay request type is defined.

## Auto Pay Request (Used for Searching)

The **Auto Pay Request** screen allows you to search for an auto pay request using various search criteria. It contains the following zone:

- [Search Auto Pay Request](#) on page 3190

Through this screen, you can navigate to the following screen:

- [Auto Pay Request \(Used for Viewing\)](#) on page 3195

## Search Auto Pay Request

The **Search Auto Pay Request** zone allows you to search for an auto pay request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an auto pay request using the auto pay request or person, account or bill details. The valid values are: <ul style="list-style-type: none"><li>• Request Details</li><li>• Person, Account or Bill Details</li></ul>	Yes
	<b>Note:</b> By default, the <b>Request Details</b> option is selected.	
Auto Pay Request Type	Used to search auto pay requests which are created using a particular auto pay request type.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Status	Used to search auto pay requests with a particular status. The valid values are: <ul style="list-style-type: none"><li>• Approved</li><li>• Approval in Progress</li><li>• Draft</li><li>• Processed</li><li>• Rejected</li><li>• Update Auto Pay Record</li></ul>	Yes
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Created From	Used to search auto pay requests which are created from a particular date onwards.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
User ID	Used to search auto pay requests which are created by a particular user.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Created Until	Used to search auto pay requests which are created till a particular date.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Auto Pay Request ID	Used to search a particular auto pay request.	No
	<b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	
Person ID	Used to search auto pay requests which include bills of a particular person.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears. This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
Account ID	Used to search auto pay requests which include bills of a particular account.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears. This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
Bill ID	Used to search auto pay requests which include a particular bill.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Bill ID</b> field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears. This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
From Bill Date	Used to search auto pay requests which include bills created from a particular date onwards.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	
Auto Pay ID	Used to search auto pay requests which include bills of a particular auto pay ID. <b>Note:</b> This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	No
To Bill Date	Used to search auto pay requests which include bills created till a particular date. <b>Note:</b> This field appears when the <b>Person, Account or Bill Details</b> option is selected from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for an auto pay request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the auto pay request is created.
Auto Pay Request Information	Displays the concatenated string of information about the auto pay request. <b>Note:</b> It has a link. On clicking the link, the <b>Auto Pay Request</b> screen appears where you can view the details of the respective auto pay request.
Status	Indicates the status of the auto pay request. The valid values are: <ul style="list-style-type: none"><li>• Approved</li><li>• Approval in Progress</li><li>• Draft</li><li>• Processed</li><li>• Rejected</li><li>• Update Auto Pay Record</li></ul>
Auto Pay Request Type	Indicates the type of the auto pay request.
Created By	Indicates the concatenated string of the user information who has created the auto pay request.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for an Auto Pay Request

### Prerequisites

To search for an auto pay request, you should have:

- Auto pay request types defined in the application

### Procedure

To search for an auto pay request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Auto Pay Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Auto Pay Request** sub-menu.  
The **Auto Pay Request** screen appears.
4. Enter the search criteria in the **Search Auto Pay Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of auto pay requests that meet the search criteria appears in the **Search Results** section.

## Creating an Auto Pay Request

### Prerequisites

To create an auto pay request, you should have:

- Auto pay request types defined in the application

### Procedure

To create an auto pay request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Auto Pay Request**.  
A sub-menu appears.

3. Click the **Add** option from the **Auto Pay Request** sub-menu.

The **Add Auto Pay Request** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request Type	Used to indicate the auto pay request type using which you want to create the auto pay request for the bills.	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Auto Pay Request** screen.

4. Select the required auto pay request type from the **Add Auto Pay Request** screen.  
5. Click **OK**.

The **Auto Pay Request** screen appears with the auto pay request details in the **Draft** status.

6. Add the auto pay line items of the bills by searching for the bills in the **Search Bills** zone of the **Auto Pay Request - Bills** tab.  
7. Define characteristics for the auto pay request by editing the auto pay request, if required.  
8. Add logs for the auto pay request in the **Auto Pay Request Log** zone of the **Auto Pay Request - Log** tab, if required.

## Defining a Characteristic for an Auto Pay Request

### Prerequisites

To define a characteristic for an auto pay request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Auto Pay Request**)

### Procedure

To define a characteristic for an auto pay request:

1. Click **Edit** button, on the **Auto Pay Request** zone in the Main tab of the **Auto Pay Request** screen.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the auto pay request.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the auto pay request.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Auto Pay Request</b> .
		<b>Note:</b> This field is required while defining a characteristic for the auto pay request.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the auto pay request.
	<b>Note:</b>  If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the auto pay request, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the auto pay request, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.  
The characteristics are defined for the auto pay request.

## Submitting an Auto Pay Request

### Prerequisites

To submit an auto pay request, you should have:

- At least one bill added to the auto pay request
- Automatic payment amount of each bill not equal to zero

### Procedure

To submit an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request which you want to submit.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click **Submit** button in the **Auto Pay Request** zone.  
A message appears confirming whether you want to submit the auto pay request.
5. Click **OK**.  
The auto pay request is submitted.

**Note:**

At least one auto pay record is required for submitting the auto pay request.  
The **Submit** button appears only when the auto pay request is in the **Draft** status.

**Related Topics**

## Approving an Auto Pay Request

**Prerequisites**

To approve an auto pay request, you should have:

- At least one bill added to the auto pay request

**Procedure**

To approve an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone **Auto Pay Request** screen.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request which you want to approve.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Approve** button in the **Auto Pay Request** zone.  
A message appears confirming whether you want to approve the auto pay request.
5. Click **OK**.  
The auto pay request is approved.

**Note:**

You can approve the auto pay request only in the **Approval In Progress** status.  
You can approve the auto pay request only when the auto pay request is assigned to you for an approval.  
The **Approve** button appears only when the auto pay request is in the **Approval In Progress** status.

## Rejecting an Auto Pay Request

**Prerequisites**

To reject an auto pay request, you should have:

- At least one bill added to the auto pay request

**Procedure**

To reject an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request which you want to reject.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Reject** button in the **Auto Pay Request** zone.  
A message appears confirming whether you want to reject the auto pay request.
5. Click **OK**.  
The auto pay request is rejected.

**Note:**

You can reject the auto pay request only in the **Approval In Progress** status.

You can reject the auto pay request only when the auto pay request is assigned to you for an approval.

The **Reject** button appears only when the auto pay request is in the **Approval In Progress** status.

## Resubmitting an Auto Pay Request for Approval

**Prerequisites**

To resubmit an auto pay request, you should have:

- At least one bill added to the auto pay request

**Procedure**

To resubmit an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request which you want to resubmit.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Resubmit** button in the **Auto Pay Request** zone.  
A message appears confirming whether you want to resubmit the auto pay request.
5. Click **OK**.  
The auto pay request is resubmitted.

**Note:**

At least one auto pay record is required for resubmitting the auto pay request.

The **Resubmit** button appears only when the auto pay request is in the **Approval In Progress** status.

## Searching for a Bill

**Prerequisites**

To search for a bill in the search bills zone, you should have:

- Persons, Accounts, and Bills defined in the application

**Procedure**

To search for a bill in the search bills zone:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.  
A list of auto pay requests that meet the search criteria appears in the **Search Results** section.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request whose details you want to view.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Bills** tab is selected.
4. Search for the bills in the **Search Bills** zone of the **Auto Pay Request** screen.  
A list of bills that meet the search criteria appears in the **Search Results** section.

## Adding an Auto Pay Line Item in an Auto Pay Request

**Prerequisites**

To add an auto pay line item in an auto pay request, you should have:

- Bills defined in the application

**Procedure**

To add an auto pay line item in an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.

A list of auto pay requests that meet the search criteria appears in the **Search Results** section.

2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request whose details you want to view.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Bills** tab is selected.
4. Search for the bills in the **Search Bills** zone of the **Auto Pay Request** screen.
5. Click **Search**.  
A list of bills that meet the search criteria appears in the **Search Results** section.
6. Click the **Broadcast** (📡) icon corresponding to the bill that you want to add in an auto pay request.  
The **Auto Pay Line Items** zone appears.
7. Select the check box corresponding to the bill that you want to add in an auto pay request.
8. Click the **Add** button in the **Auto Pay Line Items** zone, to add the auto pay line item in an auto pay request.

**Note:**

The **Add** button appears only when the auto pay request is in the **Draft** status.

**Deleting an Auto Pay Line Item from an Auto Pay Request**

**Prerequisites**

To delete an auto pay line item from an auto pay request, you should have:

- Bills added in the auto pay request

**Procedure**

To delete an auto pay line item from an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.  
A list of auto pay requests that meet the search criteria appears in the **Search Results** section.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request whose auto pay line items you want to delete.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Auto Pay Details** zone in the **Main** tab of **Auto Pay Request** screen is expanded.  
A list of auto pay line appears in the **Auto Pay Details** zone.
4. Select the check box corresponding to the auto pay line item which you want to delete from the auto pay request.
5. Click the **Delete** button in the **Auto Pay Details** zone, to delete the auto pay line item from an auto pay request.  
A message appears confirming whether you want to delete the auto pay line items from an auto pay request.
6. Click **OK**.  
The auto pay line items is deleted.

**Note:**

At least one auto pay record is required for deleting the auto pay request.

The **Delete** button appears only when the auto pay request is in the **Draft** status.

**Editing the Auto Pay Line Item Details in an Auto Pay Request**

**Prerequisites**

To edit an auto pay line item in an auto pay request, you should have:

- Bills added in the auto pay request

**Procedure**

To edit an auto pay line item from an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.  
A list of auto pay requests that meet the search criteria appears in the **Search Results** section.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request whose auto pay line items you want to delete.  
The **Auto Pay Request** screen appears.
3. Ensure that the **Auto Pay Details** zone in the **Main** tab of **Auto Pay Request** screen is expanded.  
A list of auto pay line appears in the **Auto Pay Details** zone.
4. Select the Check box corresponding to the auto pay line item which you want to edit.
5. Click the **Edit** button in the **Auto Pay Delete** zone, to edit the auto pay line item from an auto pay request.

On clicking **Edit** button, the **Edit Auto Pay Request Details** screen appears. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Auto Pay ID	Displays the auto pay ID.	Not applicable
Account Number	Displays the account number.	Not applicable
Account ID	Displays the account ID.	Not applicable
Bill ID	Displays the bill ID.	Not applicable
Auto Pay Amount	Displays the amount of the automatic payment.	Not applicable
Schedule Extract Date	Used to specify date when you want to schedule the auto pay request for the auto pay line item.	Yes
Eligible For Extraction	Used to indicate whether the auto pay amount is debited from the account on a specified and scheduled extract date. The valid values are: <ul style="list-style-type: none"><li>• Yes</li></ul>	Yes

Column Name	Column Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"><li>No</li></ul>	

6. Enter the required details in the **Edit Auto Pay Request Details** screen.
7. Click **Save**.  
The auto pay line item is modified.

**Note:**  
At east one auto pay record is required for deleting the auto pay request.  
The **Edit** button appears only when the auto pay request is in the **Draft** status.

## Adding a Log Entry for an Auto Pay Request

**Procedure**

To add a log entry for an auto pay request:

1. Search for the auto pay request in the **Search Auto Pay Request** zone of the **Auto Pay Request** screen.
2. In the **Search Results** section, click the link in the **Auto Pay Request Information** column corresponding to the auto pay request for which you want to add a log entry.  
The **Auto Pay Request** screen appears.
3. Click the **Log** tab.  
The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Auto Pay Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Request ID	Displays the auto pay request ID.	Not applicable
Log Details	Used to specify additional comments for the auto pay request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.  
The log entry is added in the **Auto Pay Request Log** zone.

---

## Garbling Customer Information

---

Oracle Revenue Management and Billing enables you to garble the personal information of a customer, such as the customer name, address, email ID, social security number or any other identifier, birth date, gender, and so on. On receiving the data erasure request from a customer, the data controller will garble the personal information of the customer by masking the data with random characters and then cease the access to the customer records.

To garble the information of one or more persons, you need to do the following:

1. Define the **Garble Data (C1-GRBL)** characteristic for each person whose data needs to be garbled and set its value to **Y**.
2. Execute the **Garble Person Information (C1-GRBPI)** batch. For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

On executing the **Garble Person Information (C1-GRBPI)** batch, the system identifies the persons where the **Garble Data (C1-GRBL)** characteristic is set to **Y** and the **Garbling Completed (C1-GBCM)** characteristic is either not defined or set to **N**. Note that the system considers the **Garble Data (C1-GRBL)** characteristic value which is effective on the batch business date.

Once the persons are identified, the data in the following fields is masked with random characters across all records in the system:

- ACCOUNT\_NBR
- ACCT\_NBR
- ADDRESS1
- ADDRESS1\_UPR
- ADDRESS2
- ADDRESS3
- ADDRESS4
- BIRTH\_DT
- BROKER\_NAME
- CITY
- COUNTRY
- COUNTY
- CUSTOMER\_NAME
- EMAILID
- ENTITY\_NAME
- ENTITY\_NAME1
- ENTITY\_NAME2
- ENTITY\_NAME3
- GEO\_CODE
- HOUSE\_TYPE

- IN\_CITY\_LIMIT
- NAME1
- OVRD\_MAIL\_NAME1
- OVRD\_MAIL\_NAME2
- OVRD\_MAIL\_NAME3
- PER\_ID\_NBR
- PHONE
- POSTAL
- POSTAL\_UPR
- STATE

In other words, the personal and account related information of a customer is garbled across the system. In addition, this batch allows you to garble the required characteristics and identifiers of a person and account.

**Note:** An account may have one or more persons linked to it. The information of an account is garbled when the data erasure request is received for the main customer of the account.

Once the personal and account related information of a customer is garbled, the access group of the person is changed to **C1GB** (which does not have any data access role). This ensures that the data of the person and his or her accounts cannot be accessed from any screens in the system. If an approval transaction contains personal and account related information of a customer, you cannot even view the approval transaction in the system.

**Note:** The access is forbidden for performing any transaction for the person and account only from the user interface and web services and not through the background process.

You can also garble the data of a person using the **C1-GRBPI** inbound web service. However, you can garble the data of only one person at a time using this inbound web service.

# 48

---

## Deleting Inactive Customer or Closed Account Information

---

Oracle Revenue Management and Billing enables you to delete all records of a person or account from the system. A new batch named **C1-GDPR** is introduced in this release. It enables you to delete all records of a person or account from the system. You can either delete the records of a particular person or account using its ID or delete the records of a set of persons or accounts at once using its characteristic. A new characteristic type named **C1-GDPRE** is shipped with the product. While executing the batch, the system first checks whether the person or account ID is specified in the batch. If so, the batch deletes the records of the respective person or account from the system. You cannot specify both the person and account ID at the same time while executing the batch.

If the person or account ID is not specified while executing the batch, the system checks whether the **Delete Characteristic Type** parameter is defined in the **C1-GDPR** batch. You can define the **C1-GDPRE** characteristic for the persons or accounts whose records you want to delete from the system. If you set the **Delete Characteristic Type** parameter in the **C1-GDPR** batch to **C1-GDPRE**, the batch considers those person or accounts for deletion where the **C1-GDPRE** characteristic is set to **Y**.

The system deletes all records of a particular account only when the following conditions are met:

- account's closing date is earlier than or equal to system date
- All contracts of the account should either be in the **Closed** or **Canceled** status

The system deletes all records of a particular person only when the following conditions are met:

- The closing date of all its accounts is earlier than or equal to system date
- All contracts of all its accounts should either be in the **Closed** or **Canceled** status

The **C1-GDPR** batch contains the following parameters:

- **Account ID** - Used to indicate the account whose records you want to delete from the system.
- **Person ID** - Used to indicate the person whose records you want to delete from the system.
- **Delete Characteristic Type** - Used to specify the characteristic type. Here, you must specify the **C1-GDPRE** characteristic type. The system then considers those person or accounts for deletion where the **C1-GDPRE** characteristic is set to **Y**.
- **Clear CLOB Data** - Used to indicate whether you want to delete the references of the persons or accounts considered for deletion from the CLOB data. The valid values are **Y** and **N**. Note that if you set the value for this

parameter to **Y**, the performance of the batch would be impacted when there is voluminous data.

- **Thread Pool Name** - Used to specify the thread pool on which you want to execute the batch.

The **C1-GDPR** batch is a multi-threaded batch. The multi-threading is based on the person or account ID and chunks for multi-threading are created based on numerical distribution of person or account ID.

- [Bundle \(Used for Adding\)](#)

Oracle Revenue Management and Billing facilitates you to maintain and bill a variety of products and services for the retail banking domain. You can define the following types of products in the system:

- Product
- Product Group

As the name indicates, a product group is a group of products. A product group are maintained in the system mainly for the reporting purposes. You can define a product and product group which may belong to different product categories, such as Checking, Loans, Savings, etc. A product or product group must be associated with at least one division. You can associate a product or product group with more than one division.

The system enables you to add one or more product services in a product. A product service may include one or more services which are defined as price items in the system. You can define, edit, delete, and copy a product service using an existing screen named **Product Service**. You can add multiple product services in a product. The system enables you to indicate whether the product service is a mandatory or optional service offered with the product. A product must have at least one mandatory product service.

A product consists of one or more market products. For example, the Loan product can include different market products, such as Personal Loan, Auto Loan, Home Equity Loan, Education Loan, etc. An account can enroll for a market product. While creating a market product for a product, the system inherits the list of divisions and product services from the product. You can associate a market product with only those divisions to which the product belongs. By default, the market product includes the mandatory services of the product. You may or may not include the optional services of the product in the market product. You can define eligibility rules for a market product. The system executes the eligibility rule which is effective while enrolling an account for a market product. If the eligibility rule is met, the system enrolls the account for the market product. However, if the eligibility rule is not met, the system does not enroll the account for the market product. A market product must be associated with at least one price list. You can associate multiple price lists with a market product.

The system enables you to define an offer which can be included in more than one market product. For example, the Car Loan and Two-Wheeler Loan market products may provide same offers, such as No Processing Cost, No Collateral, etc. An account can enroll for an offer. While creating an offer, the system inherits the list of divisions and product services from all market products in which it is included. By default, the offer includes the mandatory services of the product. You may or may not include the optional services of the market product in the offer. You can define eligibility rules for an offer.

The system executes the eligibility rule which is effective while enrolling an account for an offer. If the eligibility rule is met, the system enrolls the account for the offer. However, if the eligibility rule is not met, the system does not enroll the account for the offer. An offer must be associated with at least one price list. You can associate multiple price lists with an offer.

The system enables you to define a bundle which can be included in more than one market product. For example, you can define a bundle of services, such as Car Loan, Loan Insurance, etc. in the Car Loan market product. An account can enroll for a bundle. While creating a bundle, the system derives the divisions which are common in all market products in which it is included. It also inherits the list of product services from all market products. By default, the bundle includes the mandatory services of the product. You may or may not include the optional services of the market product in the bundle. Here, you can include additional services which are not included in the product or market product. You can define eligibility rules for a bundle. The system executes the eligibility rule which is effective while enrolling an account for a bundle. If the eligibility rule is met, the system enrolls the account for the bundle. However, if the eligibility rule is not met, the system does not enroll the account for the bundle. A bundle must be associated with at least one price list. You can associate multiple price lists with a bundle.

A product, market product, offer, and bundle goes through a lifecycle in the system. On creating a product, market product, offer, and bundle, their status is set to **Draft**. On submitting a product, market product, offer, and bundle, their status is set to **Active**. A new batch named **C1-PDTRN** is introduced in this release. It transitions the status of a product, market product, offer, and bundle to **Retired** when its end date is earlier than the batch business date.

To implement this new feature, the following new screens are introduced in this release:

- Product
- Product Information
- Market Product
- Market Product Information
- Offer
- Offer Information
- Bundle
- Bundle Information

You can access these screens from the **Retail Banking** menu.

## Prerequisites

---

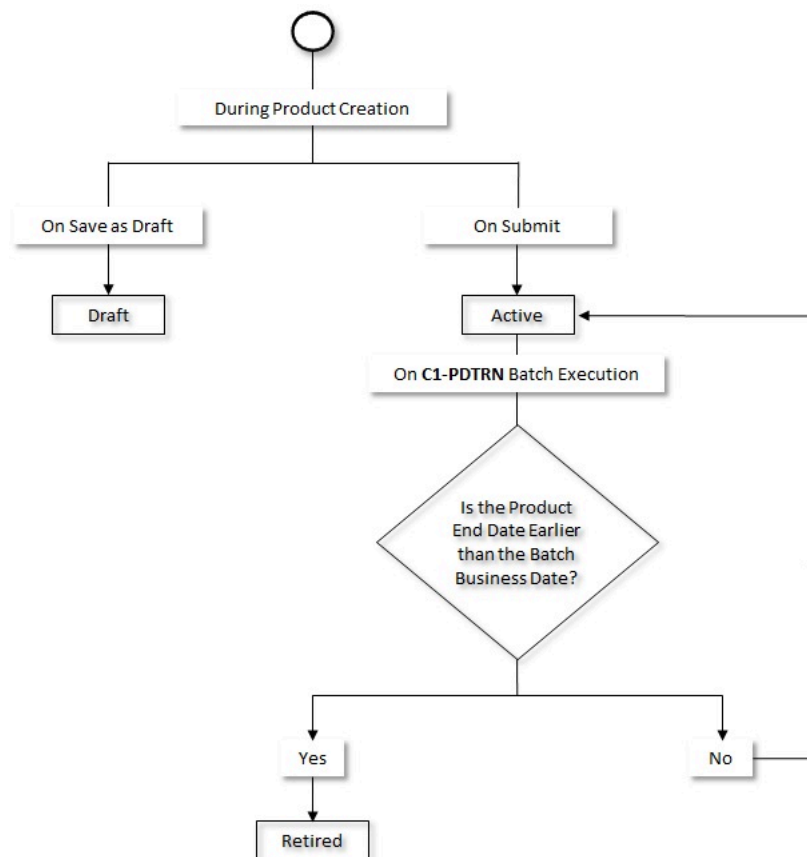

To setup the retail banking feature, you need to do the following:

- Product Categories and Product Types define in the application.
- Define the Terms and Conditions in the application.
- Product Manager's To Do Roles define in the application.
- Divisions associated with the access group to which the user belongs.
- Characteristics Types defined in the application(where the characteristic entity is set to the product, market product, offer or bundle.
- Parent Groups define in the application.
- Product Services define in the application.
- Parameters and Parameter Value Types (based on which you want to define eligibility criteria of the market product) define in the application.
- Price Lists define in the application.

## Product Status Transition

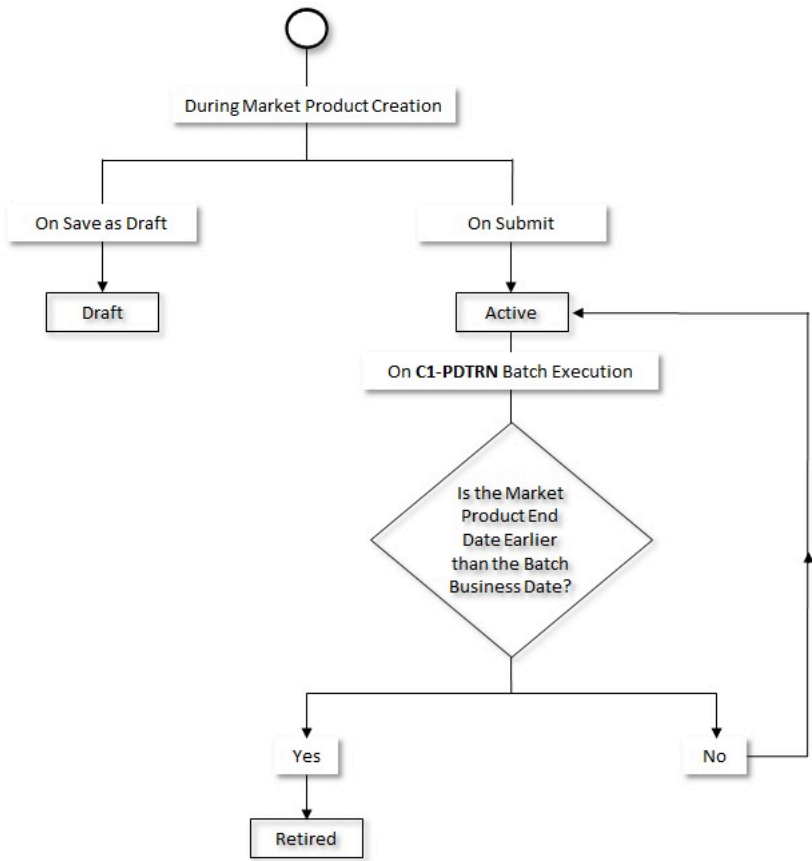

---

The following figure graphically indicates how the product moves from one status to another when the approval process is configured in the product:

# Market Product Status Transition

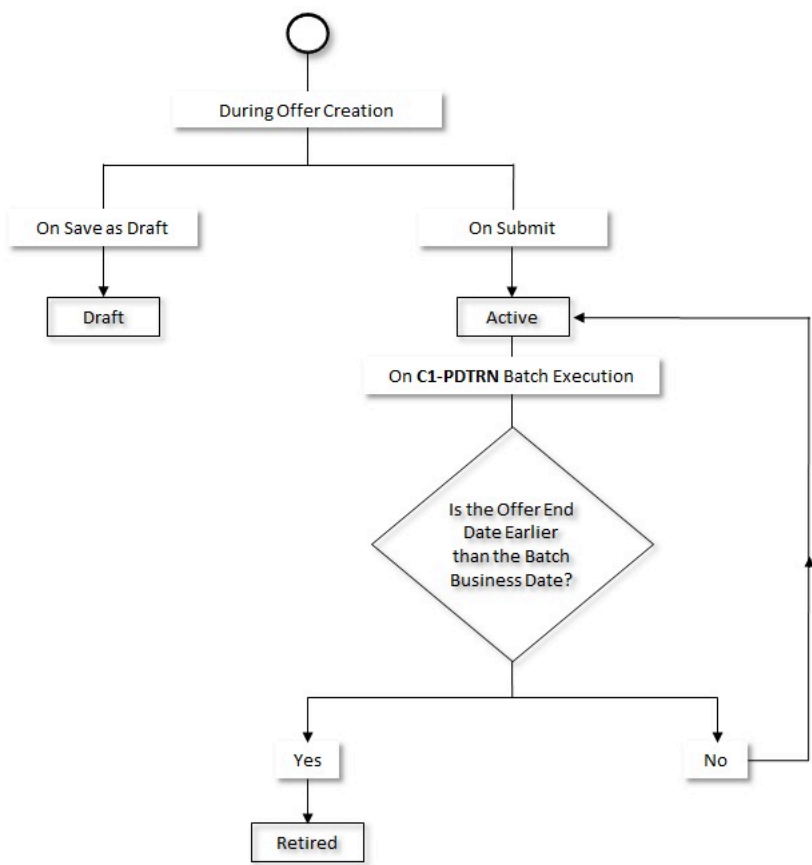

The following figure graphically indicates how the market product moves from one status to another when the approval process is configured in the market product:

# Offer Status Transition

The following figure graphically indicates how the offer moves from one status to another when the approval process is configured in the offer:

## Bundle Status Transition

The following figure graphically indicates how the bundle moves from one status to another when the approval process is configured in the bundle:

## Algorithms Used in C1\_PRODUCT

Retired	-	-	-	-

## Algorithms Used in C1\_OFFER

The following table lists the algorithm which is attached to the **C1\_OFFER** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-OFFRINFO	C1-PDINFO	Refer to <a href="#">C1-OFFRINFO</a> on page 3224
Validation	C1-OFFER-VAL	C1-OFFER-VAL	Refer to <a href="#">C1-OFFER-VAL</a> on page 3224

The following table lists the algorithms which are used in the lifecycle of the **C1\_OFFER** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Active	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1474
Retired	-	-	-	-

## Algorithms Used in C1\_BUNDLE

The following table lists the algorithms which are attached to the **C1\_BUNDLE** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-BNDLINFO	C1-PDINFO	Refer to <a href="#">C1-BNDLINFO</a> on page 3224
Validation	C1-BUNDL-VAL	C1-BUNDL-VAL	Refer to <a href="#">C1-BUNDL-VAL</a> on page 3224

The following table lists the algorithms which are used in the lifecycle of the **C1\_BUNDLE** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Active	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1474
Retired	-	-	-	-

## C1-APPTXNBAS

The **C1-APPTXNBAS** is the standard audit algorithm used by approval workflow responsible for creating approval transactions. This algorithm is to be specified on the business object audit algorithm spot, for the business objects that are part of approval workflow groups.

**Parameters: Approval Request Generation (Y/N)** - Used to indicate whether the approval workflow request must be created when no changes are made while editing the object. If you set the value to **N**, the approval workflow request is not created when no changes are made while editing the object. However, if you leave this field blank or set the value to **Y**, the approval workflow request is created irrespective of whether any changes are made or not in the object.

## C1-PRDINFO

The **C1-PRDINFO** algorithm generates the product information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order. The eligible field parameters are listed below:

- PRODUCT\_CD
- DESCR
- PROD\_TYP\_FLG
- PRODUCT\_CAT\_FLG
- BO\_STATUS\_CD
- START\_DT
- END\_DT
- PROD\_MNGR
- PROD\_MNGR\_TD\_ROLE
- TC\_TYPE\_CD

## C1-PRDPSPR

---

Product Post Processing Algorithm.

## C1-PRDCT-VAL

---

The **C1-PRDCT-VAL** algorithm validates the product before saving it to the database.

## C1-PRD-TRN

---

The **C1-PRD-TRN** algorithm is responsible for monitoring the product end date. It transitions the status of a product, market product, offer, and bundle to **Retired** when its end date is earlier than the batch business date.

## C1-MPINFO

---

The **C1-MPINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY\_CODE
- ENTITY\_TYPE
- DESCR
- DESCRLONG
- START\_DT
- END\_DT
- TC\_TYPE\_CD
- BO\_STATUS\_CD
- PRODUCT\_CD

## C1-MP-VAL

---

The **C1-MP-VAL** algorithm validates the market product before saving it to the database.

## F1-AT-RQJ

---

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-OFFRINFO

---

The **C1-OFFRINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY\_CODE
- ENTITY\_TYPE
- DESCR
- DESCRLONG
- START\_DT
- END\_DT
- TC\_TYPE\_CD
- BO\_STATUS\_CD PRODUCT\_CD

## C1-OFFER-VAL

---

The **C1-OFFER-VAL** algorithm validates the offer before saving it to the database.

## C1-BNDLINFO

---

The **C1-BNDLINFO** algorithm generates the market product, offer, and bundle information string. It concatenates the provided fields in the parameters, separated by the provided separator in the specified order: The eligible field parameters are listed below:

- ENTITY\_CODE
- ENTITY\_TYPE
- DESCR
- DESCRLONG
- START\_DT
- END\_DT
- TC\_TYPE\_CD
- BO\_STATUS\_CD PRODUCT\_CD

## C1-BUNDL-VAL

---

The **C1-BUNDL-VAL** algorithm validates the bundle before saving it to the database.

## Product (Used for Searching)

---

The **Product** screen allows you to search for a product using various search criteria. It also allows you to add, edit, or copy an existing product. It contains the following zone:

- [Search Product](#) on page 3225

### Related Topics

How to copy a product	<a href="#">Copying a Product</a> on page 3229

## Search Product

The **Search Product** zone allows you to search for a product using various search criteria. It contains the two following sections:

- Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search products which are added by you or search all the products available in the system. The valid values are: <ul style="list-style-type: none"><li>My Products</li><li>All Products</li></ul>	No
	<b>Note:</b> By default, the <b>My Products</b> option is selected.	
Product Code	Used to search for a particular product.	No
Product Type	Used to search products of a particular type.	No
Product Category	Used to search products which belong to a particular category.	No
Status	Used to search products having a particular status. The valid values are: <ul style="list-style-type: none"><li>Active</li><li>Draft</li><li>Retired</li></ul>	No
Start Date	Used to search products which are effective from a particular date onwards.	No
End Date	Used to search products which are effective till a particular date.	No

- Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Product Information	Displays the concatenated string of information about the product separated by a comma (,).
Status	Indicates the current status of the product. The valid values are: <ul style="list-style-type: none"><li>Active</li></ul>

Column Name	Column Description
	<ul style="list-style-type: none"><li>Draft</li><li>Retired</li></ul>
	<b>Note:</b> If the product is in the active status, it is indicated by the <b>Active</b> (  Active) icon. If the product is in the draft status, it is indicated by the <b>Draft</b> (  Draft) icon. If the product is in the retried status, it is indicated by the <b>Retried</b> (  Retire) icon.
Product Type	Indicates the type of the product.
Product Category	Indicates the category to which the product belongs.
Start Date	Displays the date from when the product is effective in the system.
End Date	Displays the date till when the product is effective in the system.
Copy	On clicking the <b>Copy</b> (  ) icon, the <b>Product Information</b> screen appears where you can add a new product using an existing product.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Product Information</b> screen appears where you can edit the details of the existing product.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, **Search Results** section lists all the products added by the user.

**Related Topics**

## Searching for a Product

**Prerequisites**

To search a product, you should have:

- Product defined in the application.

**Procedure**

To search a product:

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- From the **Main** menu, select **Retail Banking** and then click the **Product** sub-menu.  
A sub-menu appears.

- 3. Click the **Search** option from the **Product** sub-menu.  
The **Product** screen appears.
- 4. Enter the search criteria in the **Search Product** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- 5. Click **Search** button.  
A list of product that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

**Related Topics**

How to edit the product	<a href="#">Editing a Product</a> on page 3227

**Editing a Product**

**Procedure**

To edit a product:

- 1. Search for the product in the **Product** screen whose details you want to edit.
- 2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the product whose details you want to edit.

The **Product Information** screen appears. It contains the following pages:

- [Product Information - Basic Details](#) on page 3231
- [Product Information - Other Details](#) on page 3232
- [Product Information - Services](#) on page 3233

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3231

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Displays the category of the product.	Not applicable
Product Code	Displays the product code.	Not applicable
Product Name	Used to specify the product.	Not applicable
Description	Used to specify the description of the product.	Yes
Product Type	Displays the product type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Displays the date from when the product is effective in the system.	Not applicable
End Date	Used to specify the date till when the product is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	
Product Manager	Used to assign the product to the product manager for the approval process.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager</b> field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the user.	
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears where you can search for the To Do role.	

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the product in the **Other Details** page, if required.
6. Associate or disassociate the product from the parent group in the **Other Details** page, if required.
7. Add, edit, or remove services from the product in the **Services** page, if required.
8. Click **Submit**.  
A window appears confirming the product is submitted in the system.
9. Click the **Close** button in the confirmation window.  
The product is modified.

## Copying a Product

Instead of creating a product from scratch, you can create a new product using an existing product. This is possible through copying a product. On copying a product, the details including the associated divisions, characteristics, associated parent groups, and the services are copied to the new product. You can then edit the details, if required.

### Prerequisites

To copy a product, you should have:

- Product (whose copy you want to create) defined in the application

### Procedure

To copy a product:

1. Search for the product in the **Product** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the product whose copy you want to create.

The **Product Information** screen appears. It contains the following pages:

- [Product Information - Basic Details](#) on page 3231
- [Product Information - Other Details](#) on page 3232
- [Product Information - Services](#) on page 3233

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3231

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Used to indicate the category of the product.	Yes
Product Code	Used to specify the product code.	Yes
Product Name	Used to specify the product.	Yes
Description	Used to specify the description for the product.	Yes
Product Type	Used to indicate the type of the product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the product.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	
Product Manager	Used to assign the product to the product manager for the approval process.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager</b> field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the user.	No
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears where you can search for the To Do role.	No

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the product in the **Other Details** page, if required.
6. Associate or disassociate the product from the parent group in the **Other Details** page, if required.
7. Add, edit, or remove services from the product in the **Services** page, if required.
8. Click **Submit**.  
A window appears confirming the product is submitted in the system.
9. Click the **Close** button in the confirmation window.  
The new product is added.

## Adding a Product

**Prerequisites**

To add a product, you should have:

- Product categories defined in the application.
- Product types defined in the application.
- Terms and conditions defined in the application.
- Product manager's To Do roles defined in the application.

**Procedure**

To add a product:

- 1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
- 2. From the **Main** menu, select **Retail Banking** and then click the **Product** sub-menu.  
A sub-menu appears.
- 3. Click the **Add** option from the **Product** sub-menu.

The **Product Information** screen appears. It contains the following pages:

- [Product Information - Basic Details](#) on page 3231
- [Product Information - Other Details](#) on page 3232
- [Product Information - Services](#) on page 3233

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3231

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Category	Used to indicate the category of the product.	Yes
Product Code	Used to specify the product code.	Yes
Product Name	Used to specify the product.	Yes
Description	Used to specify the description for the product.	Yes
Product Type	Used to indicate the type of the product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	
Product Manager	Used to assign the product to the product manager for the approval process.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager</b> field. On clicking the <b>Search</b> icon, the <b>User Search</b> window appears where you can search for the user.	
Product Manager To Do Role	Used to specify the To Do role for the To Do task which is performed by the product manager.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Product Manager To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears where you can search for the To Do role.	

- 4. Enter the required details in the **Basic Details** page.
- 5. Associate the product with divisions in the **Other Details** page, if required.
- 6. Define characteristics for the product in the **Other Details** page, if required.
- 7. Associate the product to a parent group in the **Other Details** page, if required.
- 8. Add a service for the product in the **Services** page, if required.
- 9. Click **Submit**.  
A window appears confirming the product is submitted in the system.
- 10. Click the **Close** button in the confirmation window.  
The product is added.

**Tip:** Alternatively, you can access the **Product Information** screen by clicking the **Add Product** button in the **Page Title** area of the **Product** screen.

**Associating the Product with a Division**

**Prerequisites**

To associate the product with a division, you should have:

- Product defined in the application.
- Divisions defined in the application.

**Procedure**

To associate the product with a division:

- 1. Ensure that the **Division** section is expanded in the **Other Details** zone of **Other Details** page when you are associating the product with a division.  
The **Division** section contains various divisions.
- 2. Select the required divisions in the **Division** section, to associate with the product.
- 3. Click **Back** button, to go back to **Basic Details** page
- 4. Click **Save as Draft**, to save the product in the draft.
- 5. Click **Next**, to go to **Services** page.  
The product is saved as draft in the application.

## Defining a Characteristic for the Product

---

**Prerequisites**

To define a characteristic to the product, you should have:

- Product defined in the application.
- Characteristic type defined in the application.

**Procedure**

To define a characteristic type to the product:

1. Ensure that the **Additional Attributes** section is expanded in the **Other Details** zone of **Basic Details** page when you are defining the characteristic type to the product.

The **Additional Attributes** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when a characteristics type and characteristics value is effective.	Yes
Characteristics Type	Used to indicate the characteristic type.	Yes
Characteristics Value	Used to specify the value for the characteristic type.	Yes

2. Enter the required details in the **Additional Attributes** section.
3. Click **Save as Draft**, to save the product in the draft.
4. Click **Next**, to go to **Other Details** page.  
The product is saved as draft in the application.

## Associating the Product to a Parent Group

---

**Prerequisites**

To associate the product with a parent group, you should have:

- Product group defined in the application.

**Procedure**

To associate the product with a parent group:

1. Ensure that the **Parent Relationship** section is expanded in the **Other Details** zone of **Other Details** page when you are associating the product with a parent group.

The **Parent Relationship** section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Group	Used to associate a product group to the product.	No
Start Date	Used to specify the date from when the product is associated with product group.	No
End Date	Used to specify the date till when the product is associated with product group.	No

2. Select the required field in the **Parent Relationship** section, to associate the product with a parent group.
3. Click **Back** button, to go back to **Basic Details** page
4. Click **Save as Draft**, to save the product in the draft.
5. Click **Next**, to go to **Services** page.
- The product is saved as draft in the application.

## Searching for a Market Product

**Prerequisites**

To search a market product, you should have:

- Market Product defined in the application.
- Product defined in the application.
- Product Group defined in the application.

**Procedure**

To search a market product:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Market Product** sub-menu.  
A sub-menu appears.
3. Click the **Search** option from the **Market Product** sub-menu.  
The **Market Product** screen appears.
4. Enter the search criteria in the **Search Market Product** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.  
A list of market product that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Editing a Market Product

**Procedure**

To edit a market product:

1. Search for the market product in the **Market Product** screen whose details you want to edit.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the market product whose details you want to edit.

The **Market Product** screen appears. It contains the following pages:

- [Market Product Information - Basic Details](#) on page 3244
- [Market Product Information - Other Details](#) on page 3246
- [Market Product Information - Eligibility](#) on page 3247
- [Market Product Information - Services](#) on page 3249
- [Market Product Information - Price List](#) on page 3249

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3245

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Code	Displays the market product code.	Not applicable
Market Product Name	Displays the market product.	Not applicable
Description	Used to specify the description of the market product.	No
Start Date	Displays the date from when the market product is effective in the system.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date till when the market product is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the market product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the market product.	

- 3. Modify the required details in the **Basic Details** page.
- 4. Associate or disassociate the market product from a division in the **Other Details** page, if required.
- 5. Add, edit, or remove the characteristics from the market product in the **Other Details** page, if required.
- 6. Add, edit, or remove the eligibility rule from the market product in the **Eligibility** page, if required.
- 7. Add, edit, or remove the price list from the market product in the **Price List** page, if required.
- 8. Click **Submit**.  
A window appears confirming the market product is submitted in the system.
- 9. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The market product is modified.

**Copying a Market Product**

Instead of creating a market product from scratch, you can create a new market product using an existing market product. This is possible through copying a market product. On copying a market product, the details including the associated divisions, characteristics, services, and the price list are copied to the new market product. You can then edit the details, if required.

**Prerequisites**

To copy a market product, you should have:

- Market Product (whose copy you want to create) defined in the application

**Procedure**

To copy a market product:

1. Search for the market product in the **Market Product** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the market product whose copy you want to create.

The **Market Product** screen appears. It contains the following pages:

- [Market Product Information - Basic Details](#) on page 3244
- [Market Product Information - Other Details](#) on page 3246
- [Market Product Information - Eligibility](#) on page 3247
- [Market Product Information - Services](#) on page 3249
- [Market Product Information - Price List](#) on page 3249

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3245

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Code	Used to specify the market product code.	Yes
Market Product Name	Used to specify the market product.	Yes
Description	Used to specify the description for the market product.	No
Start Date	Used to specify the date from when the market product is effective.	Yes
End Date	Used to specify the date till when the market product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the market product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the market product.	

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the market product from a division in the **Other Details** page, if required.
5. Add, edit, or remove the characteristics from the market product in the **Other Details** page, if required.
6. Add, edit, or remove the eligibility rule from the market product in the **Eligibility** page, if required
7. Add, edit, or remove the price list from the market product in the **Price List** page, if required
8. Click **Submit**.  
A window appears confirming the market product is submitted in the system.
9. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The new market product is added.

## Adding a Market Product

### Prerequisites

To add a market product, you should have:

- Product defined in the application.

### Procedure

To add a market product:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Market Product** sub-menu.  
A sub-menu appears.
3. Click the **Add** option from the **Market Product** sub-menu.

The **Market Product Information** screen appears. It contains the following pages:

- [Market Product Information - Basic Details](#) on page 3244
- [Market Product Information - Other Details](#) on page 3246
- [Market Product Information - Eligibility](#) on page 3247
- [Market Product Information - Services](#) on page 3249
- [Market Product Information - Price List](#) on page 3249

The **Basic Details** page contains the following zone:

- [Search Product](#) on page 3245
- [Basic Details](#) on page 3245

The **Search Product** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for product using product details. The valid value is:	Yes
	<b>Note:</b> The default value is <b>Product Details</b> .	
Product Name	Used to specify the product.	No
Description	Used to specify the description for the product.	No
Product Category	Used to indicate the category of the product.	No
Product Type	Used to indicate the type of the product.	No

On clicking **Search** button, the search results appear based on the specified search criteria. The search results include product code, description, product category, product type, effective start date and effective end date that are associated with the product.

The **Search Results** section contains the following columns:

Column Name	Column Description
Product Code	Used to specify the product code.
Description	Used to specify the description for the product.
Product Category	Used to indicate the category of the product.
Product Type	Used to indicate the type of the product.
Start Date	Used to specify the date from when the product is effective.
End Date	Used to specify the date till when the product is effective.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

4. Select the required product from the search result.

**Note:** You cannot add more than one product to the market product.

5. On clicking **Select and Proceed** button, the **Basic Details** page of **Market Product Information** screen appears.  
The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Code	Used to specify the market product code.	Yes
Market Product Name	Used to specify the market product.	Yes
Description	Used to specify the description for the market product.	No
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Terms and Conditions	Used to associate terms and conditions with the product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	

6. Enter the required details in the **Basic Details** page.
7. Associate the market product with divisions in the **Other Details** page, if required.
8. Define characteristics for the market product in the **Other Details** page, if required.
9. Define and add eligibility rule and parameter for the market product in the **Eligibility** page, if required.
10. Add a service for the market product in the **Services** page, if required.
11. Search and select the price list for the market product in the **Price List** page, if required..
12. Click **Submit**.  
A window appears confirming the market product is submitted in the system.

13. Click the **Close** button in the confirmation window.  
The market product is added.

**Tip:** Alternatively, you can access the **Market Product Information** screen by clicking the **Add Market Product** button in the **Page Title** area of the **Market Product** screen.

## Searching for an Offer

### Prerequisites

To search an offer, you should have:

- Offer defined in the application.

### Procedure

To search an offer:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Offer** sub-menu.  
A sub-menu appears.
3. Click the **Search** option from the **Offer** sub-menu.  
The **Offer** screen appears.
4. Enter the search criteria in the **Search Offer** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.  
A list of offer that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Editing an Offer

### Procedure

To edit an offer:

1. Search for an offer in the **Offer** screen whose details you want to edit.

2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to an offer whose details you want to edit.

The **Offer Information** screen appears. It contains the following pages:

- [Offer Information - Basic Details](#) on page 3265
- [Offer Information - Other Details](#) on page 3266
- [Offer Information - Eligibility](#) on page 3267
- [Offer Information - Services](#) on page 3269
- [Offer Information - Price List](#) on page 3270

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3266

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offer Code	Displays the offer code.	Not applicable
Offer Name	Used to specify the offer.	Not applicable
Description	Used to specify the description of the offer.	No
Start Date	Displays the date from when the market product is effective in the system.	Not applicable
End Date	Displays the date till when the market product is effective in the system.	Not applicable
Terms and Conditions	Used to associate terms and conditions with the offer.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	
Market Product Name	Used to specify the market product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the <b>Search Market Product to Offer</b> window appears where you can associate the market product with the offer.	
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (.).	Not applicable

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the offer with a market product in the **Basic Details** page.
5. Associate or disassociate the offer from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the offer in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the offer in the **Eligibility** page, if required.

- 8. Add, edit, or remove the services from the offer in the **Eligibility** page, if required.
- 9. Add, edit, or remove the price list from the offer in the **Price List** page, if required.
- 10. Click **Submit**.  
A window appears confirming the offer is submitted in the system.
- 11. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to an offer.

The offer is modified.

## Copying an Offer

Instead of creating an offer from scratch, you can create a new offer using an existing offer. This is possible through copying an offer. On copying an offer, the details including the associated divisions, characteristics, services, and the price list are copied to the new offer. You can then edit the details, if required.

**Prerequisites**

To copy an offer, you should have:

- Offer(whose copy you want to create) defined in the application

**Procedure**

To copy an offer:

1. Search for an offer in the **Offer** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the offer whose copy you want to create.

The **Offer Information** screen appears. It contains the following pages:

- [Offer Information - Basic Details](#) on page 3265
- [Offer Information - Other Details](#) on page 3266
- [Offer Information - Eligibility](#) on page 3267
- [Offer Information - Services](#) on page 3269
- [Offer Information - Price List](#) on page 3270

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3266

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offer Code	Used to specify the offer code.	Yes
Offer Name	Used to specify the offer.	Yes
Description	Used to specify the description for the offer.	No
Start Date	Used to specify the date from when the offer is effective.	Yes
End Date	Used to specify the date till when the offer is effective.	Yes
Terms and Conditions	Used to associate terms and conditions with the offer.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the offer.	

The **Basic Details** zone contains the **Add Market Products** section. This section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Name	Used to indicate the search value of the market product name.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the window appears where you can associate the terms and conditions with the product.	
Product Category	Displays the product category associated with the selected market product.	Not applicable
Product Type	Displays the product type associated with the selected market product.	Not applicable
Product Name	Displays the product associated with the selected market product.	Not applicable

3. Enter the required details in the **Basic Details** page.
4. Associate or disassociate the offer with a market product in the **Basic Details** page.
5. Associate or disassociate the offer from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the offer in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the offer in the **Eligibility** page, if required
8. Add, edit, or remove the services from the offer in the **Eligibility** page, if required
9. Add, edit, or remove the price list from the offer in the **Price List** page, if required
10. Click **Submit**.  
A window appears confirming the offer is submitted in the system.
11. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The new offer is added.

## Adding an Offer

**Prerequisites**

To add an offer, you should have:

- Market product defined in the application.

**Procedure**

To add an offer:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Offer** sub-menu.  
A sub-menu appears.
3. Click the **Add** option from the **Offer** sub-menu.

The **Offer Information** screen appears. It contains the following pages:

- [Offer Information - Basic Details](#) on page 3265
- [Offer Information - Other Details](#) on page 3266
- [Offer Information - Eligibility](#) on page 3267
- [Offer Information - Services](#) on page 3269
- [Offer Information - Price List](#) on page 3270

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3266

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offer Code	Used to specify the offer code.	Yes
Offer Name	Used to specify the offer.	Yes
Description	Used to specify the description for the offer.	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the offer is effective.	Yes
End Date	Used to specify the date till when the offer is effective.	Yes
Terms and Conditions	Used to associate terms and conditions with the offer.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the product.	

The **Basic Details** zone contains the **Add Market Products** section. This section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Market Product Name	Used to indicate the search value of the market product name.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the window appears where you can associate the terms and conditions with the product.	
Product Category	Displays the product category associated with the selected product.	Not applicable
Product Type	Displays the product type associated with the selected product.	Not applicable
Product Name	Displays the particular product.	Not applicable

4. Select and add the required market product from the search result.
5. Enter the required details in the **Basic Details** page.
6. Associate the offer with divisions in the **Other Details** page, if required.
7. Define characteristics for the offer in the **Other Details** page, if required.
8. Define and add eligibility rule and parameter for the offer in the **Eligibility** page, if required.

# Searching for a Bundle

**Prerequisites**

To search a bundle, you should have:

- Bundle defined in the application.
- Market Product defined in the application.
- Product defined in the application.

**Procedure**

To search a bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Retail Banking** and then click the **Bundle** sub-menu.  
A sub-menu appears.
3. Click the **Search** option from the **Bundle** sub-menu.  
The **Bundle** screen appears.

4. Enter the search criteria in the **Search Bundle** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search** button.

A list of bundle that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Editing a Bundle

**Procedure**

To edit a bundle:

1. Search for the bundle in the **Bundle** screen whose details you want to edit.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the bundle whose details you want to edit.

The **Bundle Information** screen appears. It contains the following pages:

- [Bundle Information - Basic Details](#) on page 3286
- [Bundle Information - Other Details](#) on page 3287
- [Bundle Information - Eligibility](#) on page 3288
- [Bundle Information - Services](#) on page 3290
- [Bundle Information - Price List](#) on page 3290

The **Basic Details** page contains the following zone:

- [Basic Details](#)

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bundle Code	Displays the bundle code.	Not applicable
Bundle Name	Used to specify the bundle.	Yes
Description	Used to specify the description of the bundle.	No
Start Date	Displays the date from when the bundle is effective in the system.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date till when the bundle is effective in the system.	No
Terms and Conditions	Used to associate terms and conditions with the bundle.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the bundle.	
Market Product Name	Used to specify the market product.	No
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the <b>Search Market Product to Offer</b> window appears where you can associate the market product with the offer.	
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (.).	Not applicable

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the bundle with a market product in the **Basic Details** page.
5. Associate or disassociate the bundle from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the bundle in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the bundle in the **Eligibility** page, if required.
8. Add, edit, or remove the price list from the bundle in the **Price List** page, if required.
9. Click **Submit**.  
A window appears confirming the bundle is submitted in the system.
10. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The bundle is modified.

## Copying a Bundle

Instead of creating a bundle from scratch, you can create a new bundle using an existing bundle. This is possible through copying a bundle. On copying a bundle, the details including the associated divisions, characteristics, services and the price list are copied to the new bundle. You can then edit the details, if required.

### Prerequisites

To copy a bundle, you should have:

- Bundle(whose copy you want to create) defined in the application

### Procedure

To copy a bundle:

1. Search for a bundle in the **Bundle** screen whose copy you want to create.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the bundle whose copy you want to create.

The **Bundle Information** screen appears. It contains the following pages:

- [Bundle Information - Basic Details](#) on page 3286
- [Bundle Information - Other Details](#) on page 3287
- [Bundle Information - Eligibility](#) on page 3288
- [Bundle Information - Services](#) on page 3290
- [Bundle Information - Price List](#) on page 3290

The **Basic Details** page contains the following zone:

- [Basic Details](#) on page 3286

The **Basic Details** zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bundle Code	Used to specify the bundle code.	Yes
Bundle Name	Used to specify the bundle.	Yes
Description	Used to specify the description for the bundle.	No
Start Date	Used to specify the date from when the bundle is effective.	Yes
End Date	Used to specify the date till when the bundle is effective.	No
Terms and Conditions	Used to associate terms and conditions with the bundle.	No

Field Name	Field Description	Mandatory (Yes or No)
	<b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, the <b>Terms and Conditions Search for Product</b> window appears where you can associate the terms and conditions with the bundle.	
Market Product Name	Used to specify the market product.  <b>Note:</b> The <b>Search</b> (🔍) appears corresponding to the <b>Market Product Name</b> field. On clicking the <b>Search</b> icon, the <b>Search Market Product to Offer</b> window appears where you can associate the market product with the offer.	Yes
Product Category	Displays the product category.	Not applicable
Product Type	Displays the product type.	Not applicable
Product Name	Displays the concatenated string of information about the product separated by a comma (,).	Not applicable

3. Modify the required details in the **Basic Details** page.
4. Associate or disassociate the bundle with a market product in the **Basic Details** page
5. Associate or disassociate the bundle from a division in the **Other Details** page, if required.
6. Add, edit, or remove the characteristics from the bundle in the **Other Details** page, if required.
7. Add, edit, or remove the eligibility rule from the bundle in the **Eligibility** page, if required.
8. Add, edit, or remove the price list from the bundle in the **Price List** page, if required.
9. Click **Submit**.  
A window appears confirming the bundle is submitted in the system.
10. Click the **Close** button in the confirmation window.

**Note:** You cannot edit fields from the **Services** page when a service is already associated to the product.

The new bundle is added.

Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	Yes
Start Date	Used to specify the date from when the price list of the product is effective.	Yes
End Date	Used to specify the date till when the price list of the product is effective.	No

The **Search Results** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Select	Used to indicate whether the price list is selected or not.	Yes
Price List ID and Description	Displays the price list id and name.	Not applicable
Start Date	Displays the date from when the price list of the product is effective.	Not applicable
End Date	Displays the date till when the price list of the product is effective.	Not applicable

2. Select the required price list in the grid, to associate with the bundle.
3. Click **Back** button, to go back to **Services** page.
4. Click **Save as Draft**, to save the bundle in the draft.
5. Click **Select and Proceed**, to go to **Price List Added** section. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the bundle.	Yes
Price List ID or Description	Used to indicate whether you want to search for a price list using the price list details.	Not applicable
Validity Period	Used to specify the period date range or number of days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to the bundle. The valid values are: <ul style="list-style-type: none"> <li>• Date Range</li> <li>• Number of Days</li> </ul>	Not applicable

6. Add, edit or delete the required price list in the grid, to associate with the bundle.
7. Click **Add More** button, to go back to previous section to add and associate the price list with the bundle.
8. Click **Back** button, to go back to **Services** page.
9. Click **Save as Draft**, to save the bundle in the draft.  
The bundle is saved as draft in the application.
10. Click **Submit**.  
A window appears confirming the bundle is submitted in the system.
11. Click the **Close** button in the confirmation window.  
The bundle is added.

**Tip:** Alternatively, you can access the **Bundle Information** screen by clicking the **Add Bundle** button in the **Page Title** area of the **Bundle** screen.

## Retail Banking Product Inbound Web Services

---

### Topics:

- [Prerequisites](#)
- [C1\\_GETELIGIBLEPROD Business Service](#)
- [C1-GetProdDetail Business Service](#)
- [C1PRDCTENRL Business Service](#)

Oracle Revenue Management and Billing provides the ability to do the following through an inbound web service:

- View the details of a retail banking product, market product, offer, and bundle
- Derive the eligible market product, offer, and bundle for a person or an account

The following inbound web services are shipped with the product:

- **C1-GetEligibleProduct** - This is a SOAP based inbound web service. It supports the XML format. It enables you to derive eligible active market products, offers, and bundles for the person or account on the processing date. You can specify the eligibility parameters along with the person or account details when you want to simulate the response. It also enables you to view the details of an active product, market product, offer, and/or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, and/or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, and/or bundle with pricing.
- **C1-GetEligibleProductRest** - This is a REST based inbound web service. It supports the JSON and XML formats. It enables you to derive eligible active market products, offers, and bundles for the person or account on the processing date. You can specify the eligibility parameters along with the person or account details when you want to simulate the response. It also enables you to view the details of an active product, market product, offer, and/or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, and/or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, and/or bundle with pricing.
- **C1-GetProdDetail** - This is a SOAP based inbound web service. It supports the XML format. It enables you to view the details of an active market product, offer, or bundle which is effective on the processing date. You can extract the data in the following templates:
  - **Summary** - Used when you want to extract the details of the market product, offer, or bundle without pricing.
  - **Detail** - Used when you want to extract the details of the market product, offer, or bundle with pricing.
- **C1-GetProdDetailRest** - This is a REST based inbound web service. It supports the JSON and XML formats. It enables you to view the details of an

active market product, offer, or bundle which is effective on the processing date. You can extract the data in the following templates:

- **Summary** - Used when you want to extract the details of the market product, offer, or bundle without pricing.
- **Detail** - Used when you want to extract the details of the market product, offer, or bundle with pricing.

## Prerequisites

The following table lists the prerequisites for eligible derivation of the active market products, offers, or bundles, to view the details of the active market products, offers, or bundles, and to enroll the account to market products, offers, or bundles through an inbound web service:

If you want to...	Then...
Drive eligible market products, offers, or bundles through an inbound web service	<p>You need to do the following:</p> <ul style="list-style-type: none"> <li>• Retail banking product catalog definitions are created in the system.</li> <li>• Price item pricing defined for all the retail banking product catalog definition in the system</li> <li>• Define a REST or SOAP based inbound web service to call the <b>C1_GETELIGIBLEPROD</b> business service.</li> <li>• Active market products, offers, or bundles are required in the system.</li> <li>• Provide the required input parameters, such as, <ul style="list-style-type: none"> <li>• Product Category</li> <li>• Product Code</li> <li>• Product Type</li> <li>• Entity Code</li> <li>• Entity Type</li> <li>• Person account</li> <li>• Process Date</li> </ul> </li> </ul>
View the details of the active market product, offer, or bundle through an inbound web service	<p>You need to do the following:</p> <ul style="list-style-type: none"> <li>• Retail banking product catalog definitions are created in the system.</li> <li>• Price item pricing defined for all the retail banking product catalog definition in the system</li> <li>• Define a REST or SOAP based inbound web service to call the <b>C1-GetProdDetail</b> business service.</li> <li>• Active market products, offers, or bundles are required in the system.</li> <li>• Provide the required input parameters, such as, <ul style="list-style-type: none"> <li>• Entity Code</li> <li>• Entity Type</li> <li>• Person account</li> </ul> </li> </ul>
Enroll the account to market products, offers, or bundles through an inbound web service	<p>You need to do the following:</p> <ul style="list-style-type: none"> <li>• Division, Contract Type, Customer Class, and Customer details setup defined in the application to enroll the account to market products, offers, or bundles.</li> <li>• Definition of market products, offers, or bundles should be created in the system before sending enrollment request.</li> </ul>

# C1\_GETELIGIBLEPROD Business Service

The **C1\_GETELIGIBLEPROD** business service enables you to derive the eligible active market products, offers, or bundles for the person or an account on the processing date. It also enables you to view the details of an eligible active market products, offers, or bundles which are effective on the processing date. You can call this business service from an external system through an inbound web service. If you want to send the request in the XML and/or JSON format, you need to ensure that you create a REST based inbound web service in Oracle Revenue Management and Billing. However, if you want to send the request in the XML format, you can create a SOAP or REST based inbound web service in Oracle Revenue Management and Billing.

You can extract the data in the following template:

- **Summary:** Used to derive the details of the eligible active market products, offers, and/or bundles without pricing.
- **Detail:** Used to derive the details of the eligible active market products, offers, and/or bundles with pricing.

To drive for an eligible active market products, offers, or bundles for the person or account, provide the following input parameters:

- Product Category
- Product Code
- Product Type
- Entity Type
- Entity Code
- Person account
- Process Date

**Note:** Entity is referred to market product, offer or bundle.

Eligible Market Products, Offers, or Bundles Derivation Request and Response - Tags in XML Format

**Note:** We recommend you to refer the topics [Eligible Market Products, Offers, or Bundles Derivation Request in the XML Format](#) on page 3305 and [Eligible Market Products, Offers, or Bundles Derivation Response in the XML Format](#) on page 3306 in parallel while understanding the below mentioned tags. This will help you to understand how the tags are nested in the XML format.

Before calling the **C1\_GETELIGIBLEPROD** business service through an inbound web service, you need to ensure that the eligible active market products, offers, or bundles derivation request contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
productCode	Used to specify the product code to derive the details of the eligible active entities.	Yes(Conditional)
	<b>Note:</b> Entity is referred to market product, offer or bundle.	<b>Note:</b> This field is required if the product category, entity type, or entity code are not entered.
productCategoryFlg	Used to specify the product category flag to derive the details of the eligible active entities.	No
	<b>Note:</b> Entity is referred to market product, offer or bundle.	
division	Used to specify the division to derive the details of the eligible active entities which are associated with a particular division.	Yes(Conditional)
		<b>Note:</b> This field is required with product code, product category, entity type or entity code to derive the entities of the specific division.
entityType	Used to indicate the entity type to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the entity code is entered.

Tag Name	Tag Description	Mandatory (Yes or No)
		<b>Note:</b> This field is required if the product code, or product category are not entered.
entityCode	Used to specify the entity code to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the product code or product category are not entered.
processDate	Used to specify the date to derive the details of effective market products, offers, or bundles for that date.	Yes(Conditional)
		<b>Note:</b> If the date is not entered then it will display the default date from the system on which the enquiry is made.
accountId	Used to indicate the account for which you want to derive the details of the active entities.	Yes(Conditional)
		<b>Note:</b> If this field is not entered then all active entities will be extract.
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
acctIdtype	Used to indicate the type of account identifier type for which you to derive the details of the eligible active entity.	No
acctIdentifierValue	Used to specify the value for the account identifier type for which you to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
personId	Used to specify the person account for which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
custIdTypeCd	Used to indicate the customer ID type for which you want to derive the details of eligible active market products, offers, or bundles.	No
perIdentifireVal	Used to specify the value of person identifier for which you want to derive the details of eligible active market products, offers, or bundles.	No

Tag Name	Tag Description	Mandatory (Yes or No)
productLinkedEntity	Used to specify product linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	No
linkedEntityCode	Used to specify code of the linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	Yes(Conditional) <b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.
linkedEntityType	Used to indicate type of the linked entity(market product code) for which you want to derive the details of eligible active offer or bundle linked with that particular code.	Yes(Conditional) <b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.
eligibleParameter	Used to specify the eligibility parameter based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmCode	Used to specify the eligibility parameter code based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmVal	Used to specify the eligibility parameter value based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.

The following table lists and describes the tags which appear in the eligible active market products, offers, or bundles derivation response XML format:

Tag Name	Tag Description
entityList	Displays the list of eligible market products, offers, or bundles.
entityCode	Displays the entity code.
entityType	Displays the entity type.
entityName	Displays the entity name.
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.

Tag Name	Tag Description
entityCodeDescr	Displays the description of the entity code.
termsAndCondition	Displays the terms and condition of the entity.
termAndConditionDescr	Displays the description of the terms and conditions of the entity.
status	Displays the status of the entity.
productList	Displays the list of the eligible products to which the requested entity belongs.
productCode	Displays the code of the eligible product to which the requested entity belongs.
productDescription	Displays the description of the eligible product to which the requested entity belongs.
productTypFlgDesc	Displays the description of the eligible product type flag to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market products, offers, and bundles.
linkedEntityStartDate	Displays the date from when the linked entity is effective.
linkedEntityEndDate	Displays the date till when the linked entity is effective.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityType	Displays the linked entity type for the requested entity code.
	<b>Note:</b> It is applicable in case of offer and bundle.
EntityDivision	Displays the division to which the requested entity belongs.
divisionCode	Displays the division code to which the requested entity belongs.
eligibilityDetails	Indicates the name of group tag.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityRule	Indicates the name of group tag.
sequenceNumber	Indicates the sequence number of eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
operator	Indicates the operator to evaluate the condition.
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd1	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true eligibility condition.
falseFlag	Indicates the false eligibility condition.
insufficientFlag	Indicates the insufficient eligibility condition.
services	Indicates the name of group tag.

Tag Name	Tag Description
serviceName	Displays the service configured to the requested entity code.
mandatoryFlag	Indicates the mandatory or optional type of the services.
pricing	Indicates the name of group tag.
priority	Displays the priority in sequence of the price list of the entities.
priceListId	Displays the Price List ID.
priceListDescription	Displays the description of the price list.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.
validityFlag	Indicates the validity of the price item.
sourceEntityType	Displays the source entity type.
sourceEntityCode	Displays the source entity code.
priceListInfo	Displays the information of the price list.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.
pricecomptier	Indicates the name of group tag.
priceCompSequenceNo	Displays the sequence number of the price component.
priceItemParmGroupId	Displays the parameter group ID of the price item.
toVal	Indicates the tiering to value of the price item.
fromVal	Indicates the tiering from value of the price item.
timeOfUse	Indicates the tiering time of use.
priceItemCode	Displays the price item code.
priceCriteria	Displays the price criteria of the price item.
priceCompId	Displays the price component ID.
tieSeqNum	Indicates the tiering sequence number.
version	Displays the version number.
priceComponentDescription	Displays the description of the price component.
valueAmt	Displays the value amount of the price component.
priceComponentDisplay	Displays the price component.
reMapId	Displays the rate component map ID.
tieredFlag	Indicates the tire flag.

Tag Name	Tag Description
priceCompSequenceNo	Displays the sequence of the price component.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
inquiryTypeFlag	Displays the inquiry type flag.
	<b>Note:</b> If the inquiry type flag value is <b>SMRY</b> then service will provide details of eligible entities without price component and if the inquiry type flag value is <b>DETL</b> then service will provide details of eligible entities with price component

# Sample Eligible Market Product Derivation Request and Response in the XML Format

Using the below example, you can derive eligible market products for the **2406432705** account which are processed on **2022-01-11**.

**Sample Eligible Market Product Request in the XML Format**

```
<C1_GETELIGIBLEPROD>
  <productCode>LOAN_001</productCode>
  <productCategoryFlg></productCategoryFlg>
  <division>IND</division>
  <entityType>MP</entityType>
  <entityCode>CHECKMP_001</entityCode>
  <processDate>2022-01-11</processDate>
  <accountId>2406432705</accountId>
  <acctIdtype></acctIdtype>
  <acctIdentifierValue></acctIdentifierValue>
  <personId></personId>
  <custIdTypeCd></custIdTypeCd>
  <perIdentifireVal></perIdentifireVal>
  <productLinkedEntity>
    <linkedEntityCode>CHECKMP_001</linkedEntityCode>
    <linkedEntityType>MP</linkedEntityType>
  </productLinkedEntity>
  <productLinkedEntity>
    <linkedEntityCode>CHECKMP_002</linkedEntityCode>
    <linkedEntityType>MP</linkedEntityType>
  </productLinkedEntity>
```

```

    <eligibleParameter>
      <priceParmCode>ACC_DIVISION</priceParmCode>
      <priceParmVal>IND</priceParmVal>
    </eligibleParameter>
    <eligibleParameter>
      <priceParmCode>PERSON_STATE</priceParmCode>
      <priceParmVal>MH</priceParmVal>

## Eligible Market Products, Offers, or Bundles Derivation Request and Response - Attribute/Value Pairs in JSON Format

**Note:** We recommend you to refer the topics [Eligible Market Products, Offers, or Bundles Derivation Request in the JSON Format](#) on page 3393 and [Eligible Market Products, Offers, or Bundles Derivation Response in the JSON Format](#) on page 3394 in parallel while understanding the below mentioned attributes. This will help you to understand how the attributes/values are structured in the JSON format.

Before calling the **C1\_GETELIGIBLEPROD** business service through an inbound web service, you need to ensure that the eligible active market products, offers, or bundles derivation request contains the following attributes:

Attribute Name	Attribute Description	Mandatory (Yes or No)
productCode	Used to specify the product code to derive the details of the eligible active entities.	Yes(Conditional)
	<b>Note:</b> Entity is referred to market product, offer or bundle.	<b>Note:</b> This field is required if the product category, entity type, or entity code are not entered.
productCategoryFlg	Used to specify the product category flag to derive the details of the eligible active entities.	No
	<b>Note:</b> Entity is referred to market product, offer or bundle.	
division	Used to specify the division to derive the details of the eligible active entities which are associated with a particular division.	Yes(Conditional)
		<b>Note:</b> This field is required with product code, product category, entity type or entity code to extract the entities of the specific division.
entityType	Used to indicate the entity type to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the entity code is entered.
		<b>Note:</b> This field is required if the product code, or product category are not entered.
entityCode	Used to specify the entity code to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> This field is required if the product code or product category are not entered.
processDate	Used to specify the date to derive the details of effective market products, offers, or bundles for that date.	Yes(Conditional)
		<b>Note:</b> If the date is not entered then it will display the default date from the system on which the enquiry is made.

Attribute Name	Attribute Description	Mandatory (Yes or No)
accountId	Used to indicate the account for which you want to derive the details of the eligible active entities.	Yes(Conditional)
		<b>Note:</b> If this field is not entered then all active entity will be extract.
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
acctIdtype	Used to indicate the type of account identifier type for which you to derive the details of the eligible active entities.	No
acctIdentifierValue	Used to specify the value for the account identifier type for which you to derive the details of the eligible active entity.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
personId	Used to specify the person account for which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional)
		<b>Note:</b> This field is required if you want to derive the details of eligible active entities for specific person or account.
custIdTypeCd	Used to indicate the customer ID type for which you want to derive the details of eligible active market products, offers, or bundles.	No
perIdentifireVal	Used to specify the value of person identifier for which you want to derive the details of eligible active market products, offers, or bundles.	No
productLinkedEntity	Used to specify product linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	No
linkedEntityCode	Used to specify code of the linked entity(market product code) for which you want to derive the details of eligible active offers or bundles linked with that particular code.	Yes(Conditional)
		<b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.
linkedEntityType	Used to indicate type of the linked entity(market product code) for which you want to derive the details of eligible active offer or bundle linked with that particular code.	Yes(Conditional)
		<b>Note:</b> This field is required when you want to derive offer or bundle linked with the particular market product.

Attribute Name	Attribute Description	Mandatory (Yes or No)
eligibleParameter	Used to specify the eligibility parameter based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmCode	Used to specify the eligibility parameter code based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.
priceParmVal	Used to specify the eligibility parameter value based on which you want to derive the details of eligible active market products, offers, or bundles.	Yes(Conditional) <b>Note:</b> If this field is not entered then system will take the eligibility details from the person or account.

The following table lists and describes the attributes which appear in the eligible active market products, offers, or bundles derivation response JSON format:

Attribute Name	Attribute Description
entityList	Displays the list of eligible market products, offers, or bundles.
entityCode	Displays the entity code.
entityType	Displays the entity type.
entityName	Displays the entity name.
entityStartDate	Displays the date from when the entity is effective.
entityEndDate	Displays the date till when the entity is effective.
entityCodeDescr	Displays the description of the entity.
termsAndCondition	Displays the terms and condition of the entity.
termAndConditionDescr	Displays the description of the terms and conditions of the entity.
status	Displays the status of the entity.
productList	Displays the list of the eligible products to which the requested entity belongs.
productCode	Displays the code of the eligible product to which the requested entity belongs.
productDescription	Displays the description of the eligible product to which the requested entity belongs.
productTypFlgDesc	Displays the description of the eligible product type flag to which the requested entity belongs.
productCategoryFlgDesc	Displays the description of the eligible product category flag to which the requested entity belongs.
productLinkedEntity	Displays the list of eligible market products, offers, and bundles.
linkedEntityStartDate	Displays the date from when the linked entity is effective.

Attribute Name	Attribute Description
linkedEntityEndDate	Displays the date till when the linked entity is effective.
linkedEntityCode	Displays the linked entity code for the requested entity code.
linkedEntityType	Displays the linked entity for the requested entity code.
	<b>Note:</b> It is applicable in case of offer and bundle.
EntityDivision	Displays the division to which the requested entity belongs.
divisionCode	Displays the division code to which the requested entity belongs.
eligibilityDetails	Indicates the name of group tag.
eligibilityStartDate	Displays the date from when the eligibility of the entity is effective.
eligibilityEndDate	Displays the date till when the eligibility of the entity is effective.
eligibilityDescription	Displays the description of the eligibility to which the requested entity belongs.
eligibilityRule	Indicates the name of group tag.
sequenceNumber	Indicates the sequence number of eligibility condition.
lhsPriceParmCd	Indicates the left side parameter code of the eligibility condition.
operator	Indicates the operator to evaluate the condition
rhsPriceParmCd	Indicates the right side parameter code of the eligibility condition.
rhsPriceParmVal	Indicates the right side parameter value of the eligibility condition.
lhsPriceParmCd1	Indicates the left side parameter code of the eligibility condition.
rhsPriceParmTypeFlg	Indicates the value of the right side flag.
trueFlag	Indicates the true condition.
falseFlag	Indicates the false condition.
insufficientFlag	Indicates the insufficient condition.
services	Indicates the name of group tag.
serviceName	Displays the service configured at the requested entity code.
mandatoryFlag	Indicates the mandatory or optional type of the services.
pricing	Indicates the name of group tag.
priority	Displays the priority in sequence of the price list of the entities.
priceListId	Displays the Price List ID.
priceListDescription	Displays the description of the price list.
priceListStartDate	Displays the date from when the price list of the entity is effective.
priceListEndDate	Displays the date till when the price list of the entity is effective.
noOfDays	Displays the validity of price list in number of days.
priceItemCode	Displays the price item code.
priceitemDescr	Displays the description of the price item.
priceAsgnId	Displays the price assignment ID.

Attribute Name	Attribute Description
validityFlag	Indicates the validity of the price item.
sourceEntityType	Displays the source entity type.
sourceEntityCode	Displays the source entity code.
priceListInfo	Displays the information of the price list.
priceComponent	Indicates the name of group tag.
priceCompId	Displays the price component ID.
pricecomptier	Indicates the name of group tag.
priceCompSequenceNo	Displays the sequence number of the price component.
priceItemParmGroupId	Displays the parameter group ID of the price item.
toVal	Indicates the tiering to value of the price item.
fromVal	Indicates the tiering from value of the price item.
timeOfUse	Indicates the tiering time of use.
priceItemCode	Displays the price item code.
priceCriteria	Displays the price criteria of the price item.
priceCompId	Displays the price component ID.
tieSeqNum	Indicates the tiering sequence number.
version	Displays the version number.
priceComponentDescription	Displays the description of the price component.
valueAmt	Displays the value amount of the price component.
priceComponentDisplay	Displays the price component.
reMapId	Displays the rate component map ID.
tieredFlag	Indicates the tire flag.
priceCompSequenceNo	Displays the sequence of the price component.
messageCategory	Indicates the category of the message.
messageNumber	Indicates the number of the message.
messageText	Displays the message.
longDescription	Displays the long description.
inquiryTypeFlag	Displays the inquiry type flag.
	<b>Note:</b> If the inquiry type flag value is <b>SMRY</b> then service will provide details of eligible entities without price component and if the inquiry type flag value is <b>DETL</b> then service will provide details of eligible entities with price component

# Sample Eligible Offer Derivation Request and Response in the JSON Format

Using the below example, you can derive eligible offers for the **2406432705** account which are processed on **2022-01-11**.

**Sample Eligible Offer Request in the JSON Format**

```
{
  -"C1_GETELIGIBLEPROD": '
  {
    -"productCode": -"LOAN_001",
    -"productCategoryFlg": -"",
    -"division": -"IND",
    -"entityType": -"OFFR",

## Sample Eligible Bundle Derivation Request and Response in the JSON Format

---

Using the below example, you can derive eligible bundles of the **2406432705** account which is processed on date 2022-01-11.

### Sample Eligible Bundle Request in the JSON Format

```
{
  -"C1_GETELIGIBLEPROD": '
  {
    -"productCode": -"LOAN_001",
    -"productCategoryFlg": -"",
    -"division": -"IND",
    -"entityType": -"BNDL",
    -"entityCode": -"CHECKBUND_003",
    -"processDate": -"2022-01-11",
    -"accountId": -"",
    -"acctIdtype": -"",
    -"acctIdentifierValue": -"",
    -"personId": -"",
    -"custIdTypeCd": -"",
    -"perIdentifireVal": -"",
    -"productLinkedEntity": '
    {
      -"linkedEntityCode": -"CHECKMP_001",
      -"linkedEntityType": -"MP",
    }
    -"eligibleParameter":
    {
      -"priceParmCode": -"",
      -"priceParmVal": -"",
    }
  }
}
```

### Sample Eligible Bundle Response in the JSON Format

```
{
  -"C1_GETELIGIBLEPROD": '
  {
    -"productCode": -"LOAN_001",
    -"productCategoryFlg": -"",
    -"division": -"IND",
    -"entityType": -"BNDL",
    -"entityCode": -"CHECKBUND_003",
    -"processDate": -"2022-01-11",
    -"accountId": -"",
    -"acctIdtype": -"",
    -"acctIdentifierValue": -"",
    -"personId": -"",
    -"custIdTypeCd": -"",
    -"perIdentifireVal": -"",
