# 1 Preface

Oracle Financial Services Regulatory Reporting For Bank of England (OFS REG REP BOE) enables banks to automate risk reporting to central banks and regulators in a single integrated environment. It automates end-to-end processes from data capture through submission with industry-leading solutions, eliminating the need for further manual intervention. It is a standalone product that has pre-built integration with Regnology's Solution for Regulatory Reporting - AgileREPORTER. The solution ensures data integrity allowing banks to focus more time on analyzing and gaining new business insight from their growing stores of data instead of preparing data and reports with the sole objective of meeting submission deadlines. This is made possible by:

- Providing centralized data storage for risk data through relevant subject areas of the Financial Services Data Foundation (FSDF).
- Interfacing with a Regulatory Reporting tool – Regnology's AgileREPORTER to build necessary template reports to meet the regulatory expectations.
- Managing the accuracy of risk reporting through Data Governance Studio (DGS).

OFS Regulatory Reporting For Bank of England (OFS REG REP BOE) offers regulatory reporting solutions for the Financial Institutions (FIs) in Australia. The present scope of the release in v81000 includes 11 EFS reports which have undergone regulatory updates in recent past and mandatory to be submitted by all FIs in the region.

This document provides step-by-step instructions to install the Oracle Financial Services Regulatory Reporting For Bank of England (OFS REG REP BOE) Release 8.1.2.7.0.
