July, 2025

Oracle Communications EAGLE Software Upgrade Guide, Release 47.1

CAUTION: Use only the guide downloaded from the Oracle Technology Network (OTN) (http://www.oracle.com/technetwork/indexes/documentation/oracle-comms-tekelec-2136003.html).
Before upgrading your system, access the My Oracle Support web portal (https://support.oracle.com) and review any Knowledge Alerts that may be related to the System Health Check or the Upgrade.

Before beginning this procedure, contact My Oracle Support and inform them of your upgrade plans.
Refer to Appendix I for instructions on accessing My Oracle Support.

List of Tables

List of Procedures

1. INTRODUCTION

1.1 Purpose and Scope

This document describes methods utilized and procedures executed to perform a software upgrade on any in-service EAGLE-based STP to EAGLE Software Release 45.0, 45.1, 46.0, 46.1, 46.2, 46.3, 46.5, or 46.6 as well as any future maintenance releases. The audience for this document includes Oracle customers as well as these Oracle Communications EAGLE groups: Software Development, Product Verification, Technical Communications, and Customer Service including the Upgrade Center and New Product Engineering. This document provides step-by-step instructions to execute any upgrade to Release 45.0 and beyond.

See appropriate upgrade kit instructions or references for the software upgrade of peripheral equipment.

Note: To see the list of cards supported by EAGLE Release 47.1, see *Hardware Reference Guide.*

1.2 References

1.2.1 External

[1] *EAGLE 45.0 and above Health Check Procedure*, E54339, latest revision

[2] *EAGLE 46.8 Maintenance Manual*, F11910, latest revision

[3] *EAGLE 46.8 Database Administration – System Management*, F11885, latest revision

1.2.2 Internal

The following are references internal to Oracle. They are provided here to capture the source material used to create this document. Internal references are only available to Oracle personnel.

[4] EAGLE Hardware Field Baseline, CGBU_ENG_24_1893, latest revision, Tekelec.

[5] *TEKELEC Acronym Guide*, CGBU_ENG_24_1732, current revision

[6] Tekelec Eagle - Eng Release Mapping web page, http://devtools.nc.tekelec.com/cgi-bin/eng_eag.cgi, Tekelec.

[8] Tekelec Tekpedia web page, http://tekpedia.ssz.tekelec.com/tekpedia/index.php/Methods_to_correct_distributed_network_database_(DDB)_inconsistencies, Tekelec.

[9] EAGLE 45.0 Product Functional Specification PF005994, latest version, GSS Product Management.

[10] EAGLE 45.1 Product Functional Specification PF006147, latest version, GSS Product Management.

[11] EAGLE 46.0 Product Functional Specification PF006165, latest version, GSS Product Management.

[12] EAGLE 46.6 Product Functional Specification CGBU_025773, latest version, GSS Product Management.

1.3 Software Release Numbering

To determine the correct GPL version numbers for the EAGLE® applications, refer to the appropriate internal release-mapping web tool or to the *Release Notice* located on **My Oracle Support** web portal. Appendix I describes how to access **My Oracle Support** web portal. For FOA releases or Engineering prototype releases, refer to internal references [6] in section 1.2.2.

Note: Verifying the correct GPL versions ensures that the system is being upgraded to the correct target software release.

1.4 Database Version Number

To determine the correct database version numbers for the EAGLE® release, refer to the appropriate internal release-mapping web tool. Appendix I describes how to access **My Oracle Support** web portal. For FOA releases or Engineering prototype releases, refer to internal references [6] in section 1.2.2.

1.5 Acronyms and Terminology

Table 1. Acronyms

AWA	Alternate Work Area
DDB	Dynamic Database
DDL	Dynamic Data Load
E5-MDAL	EAGLE Maintenance Disk and Alarm Card
E5-OAM	EAGLE Operation, Admission, & Maintenance.
FAK	Feature Access Key
FOA	First Office Application
GA	General Availability
GLS	Generic Loading Service
GPL	Generic Program Load
GPSM	Legacy General Purpose Service Module
IMT	Interprocessor Message Transport
IS-NR	In Service - Normal
IS-ANR	In Service - Abnormal
KSR	Keyboard Send & Receive
LA	Limited Availability
LIM	Link Interface Module
LNP	Local Number Portability
LSMS	Local Service Management System
MCPM	Measurement Collection and Polling Module
MPS	Multi Purpose Server
MSD	Media Software Delivery
OAM	Operations Administration and Maintenance
OAP	Operations, Administration and Maintenance Applications Processor
OOS-MT	Out Of Service - Maintenance
RMD	Removable Media Drive/Disk such as USB
SAK	Software Access Key
SATA	Serial ATA
SEAS	Signaling Engineering and Administration System
SLIC	Service and Link Interface Card
SSD	Server Software Delivery
STP	Signal Transfer Point
TDM	Terminal Disk Module
TPS	Transactions Per Second (feature)
UHC	Upgrade Health Check

For additional Acronyms; refer to internal references [5] in section 1.2.2

Table 2. Terminology

Backout (abort)	The process to take a system back to a Source Release prior to completion of upgrade and commitment to Target release. Includes restoration of source databases and system configuration.
DDay	Date of the start of the maintenance window of the upgrade execution.
E5-OAM system	An EAGLE running with E5-MCAP & E5-MDAL cards for front-end hardware.
Fixed disk based upgrade	An upgrade that uses the inactive partitions of the fixed disks as the workspaces to covert the data. With 9Gb and bigger hard drives, this is the expected method.
HHour	Hour at which the system enters upgrade phase 0 during upgrade execution.
Incremental upgrade	**EAGLE:** Upgrade to a maintenance release (external customers) or upgrade to a new build (internal test labs).
Intra-release upgrade	Any upgrade within a release; this includes incremental as well as full function upgrades where only the minor database version changes. Note: Intra-release upgrades are not covered by this document.
Intrusive Operation	Operation that impacts the redundancy of the system by isolation of the duplicate component.
Legacy system	An EAGLE running with GPSMII, TDM, & MDAL cards for front-end hardware. This hardware is obsolete beginning in Release 45.0.
Non-intrusive Operation	Operation that collects data and does not impact the redundancy of the system.
Non-preserving upgrade	"Upgrade" that does not adhere to the standard goals of software upgrade methodology. The outcome of the execution is that the system is running on the Target Release; however, the Source Release database was **not** preserved.
Rollback	The process to take a system from a Target Release back to a Source Release including preservation of databases and system configuration.
Session 0	This is a new set of tasks required in the Upgrade Health Check #2 timeframe. The work needs to be accomplished successfully prior to the execution of the upgrade.
Source release	Software release from which the system is upgraded.
Target release	Software release to which the system is upgraded.
Upgrade Media	The USB thumb drives for E5-MCAP systems.

Table 3. Generic VS. E5-OAM Terminology

Generic Term	E5-OAM Term
Drive Slot	Thumb Drive on the E5-MCAP
Fixed Disk	Sata Drive
MASP	E5-MCAP
Removable media	Removable media
RMD	USB Thumb Drive
Upgrade media	USB Thumb Drive

1.6 Recommendations

1. It is recommended that command input and command-line/scroll-area output be captured during the execution of an upgrade. The preferred method is the use of two serial terminals; one used to enter commands and to echo to the second, which is set to capture all output except for traffic-related unsolicited messages. These terminals should be configured as KSR type. Another acceptable method is the use of one serial terminal, which has a terminal-emulation application that supports input/output capture. This terminal should be set to the KSR type. It is unacceptable to use a telnet terminal since it does not support the echo capability. Serial terminals are designated ports 1 – 16 and telnet terminal are designed ports 17 and above.
2. It is recommended that measurement collection be retrieved prior to upgrade execution because, if the MCPM or Intergrated Measurements features are not enabled, the data collected will not be persistent across the upgrade. Inhibiting measurements does NOT stop collection that is already in progress. OAM-based measurements are inhibited on the next cycle. It is recommended that time should be given to allow the current cycle to complete. Those procedures that inhibit measurements manually contain steps to ensure that current collection is complete.
3. It is recommended that the OAP terminals be turned down for SEAS-enabled systems and others with high OAP traffic. If OAP terminals are not inhibited, any database updates successfully entered during the period between the last database backup and Upgrade Phase 0 are lost if it becomes necessary to fall back to the source release using the spare E5-MASP.
4. It is recommended that the Measurements Platform NOT be shut down and the Measurement Collection and Polling Module (MCPM) cards NOT be inhibited.
5. It is recommended to issue the command in Procedure 8**,** Step 1 with the threshold type assigned to SET (Card Set network conversion method.) In addition, it is recommended that the card sets be created with the number of service card sets assigned to 2 and the number of link card sets to 4. The following command is issued in Procedure 8**,** Step 1:

```
ACT-UPGRADE:ACTION=CONVERTSTP:SRC=FIXED
```

   Based on a system's configuration and customer objectives, the SRVSETS and LIMSETS parameters of the CHG-UPGRADE-CONFIG comand may be adjusted. Refer to Appendix B.2 for the procedure to configure the Card Set network conversion method. If the network conversion phase of the upgrade is pushing the execution of the upgrade outside the maintenance window the configuration can be altered to reduce the execution time. Please go to Appendix I to contact support to determine the recommended course of action.

6. Although an IP telnet terminal may be configured, the terminal is not recommended for use in the upgrade process because it does not support echo and capture mode. Any application connected via a Telnet session through an IPSM card, should be configured for interruption during the upgrade. That application's configuration procedure needs to be provided by the application's manufacturer.
7. The following commands obtain the current system status. It is recommended that the following commands be run in order to obtain the current system status in the following situations: 1) prior to and completion of executing the upgrade, 2) the upgrade terminates prior to successful completion and 3) before re-starting the upgrade. The commands should be issued in addition to the diagnosis of the any terminating condition. This status is not complete and inclusive, additional commands, which are deemed relevant, can be run at that time.

   ```
   REPT-STAT-SYS
   REPT-STAT-GPL:DISPLAY=ALL
   REPT-STAT-CARD
   REPT-STAT-SLK
   REPT-STAT-TRBL
   RTRV-TRBL:NUM=25:LOC=<1113|1115>
   RTRV-STP
   ACT-UPGRADE:ACTION=DBSTATUS
   ```

8. Remove all the non-provisioned cards from the system prior to upgrade.

2. GENERAL DESCRIPTION

This document defines the step-by-step actions performed to execute a software upgrade of an in-service EAGLE® STP from the source release to the target release.

Figure 1 - Upgrade Process shows the general steps for all processes of performing a software upgrade, from hardware inventory to final upgrade health check.

Figure 1 - Upgrade Process

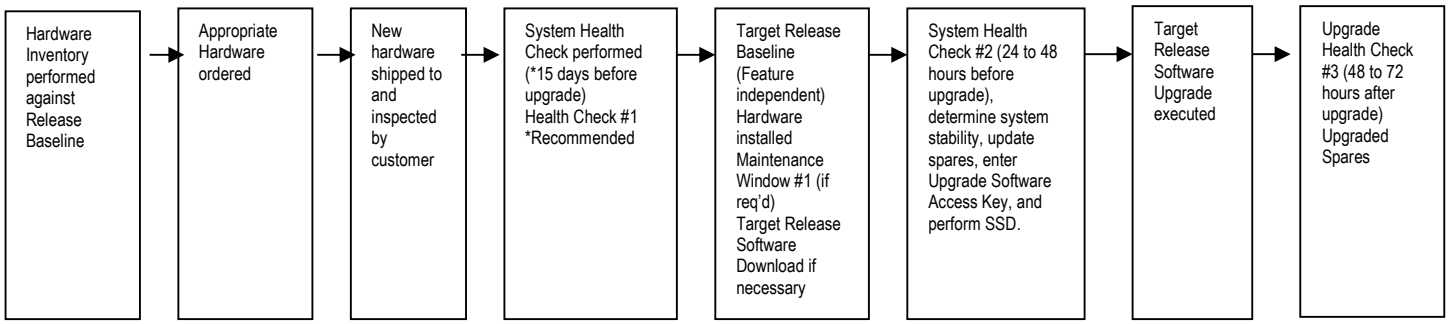

Table 4 contains a checklist of the steps required to successfully complete the upgrade process.

Upgrade Process Task	Date completed	Reference
Hardware Inventory		
Hardware Ordered		
New Hardware received		
System Health Check #1 performed.		[1]
System Health Check #1 output verified		
Target Release Baseline Hardware installed		
Target Software Release download (via Electronic Software Distribution or Upgrade Media).		[Appendix B.1.]
System Health Check #2 performed.		[1]
Enter Upgrade Software Access Key		[Appendix C]
Configure Network Conversion Method.		[Appendix B.2]
System Health Check #2 verified		
Software Upgrade Session 1 completed		
Health Check #3 performed.		[1]
Software Upgrade Session 2 completed		

Table 4. Upgrade Tasks to be completed

During the software upgrade execution, phase flags are displayed in the output messages to indicate upgrade progress. The output messages shown in this document are for example purposes only and do not display upgrade phase values unless a specific request to verify the phase is given, i.e., Procedure 6, step 15. The goal in doing this is to make this document describe the generic upgrade procedure.

Table 5. Phases of Upgrade Execution shows the phase flags displayed during the upgrade process. These flags are used to indicate the progress made by the upgrade function. The internal upgrade processing, which is initiated by the activate-upgrade command, controls these flags.

Table 5. Phases of Upgrade Execution

Release Displayed	Phase Indicator[1]	Conversion	Software Running	Database Configuration
Source			Source	Source
Source	Phase 0	Database	Target	Source
Target	Phase 2	Database	Target	Target
Target	Phase 3	Network	Target	Target
Target			Target	Target

[1] Over the evolution of the upgrade process, Phase 1 is considered an error state.

3. UPGRADE OVERVIEW

This section provides a brief overview of the recommended method for upgrading the source release software that is installed and running on an EAGLE® STP to the Target Release software. The basic upgrade process and approximate time frame is outlined in Table 6. Upgrade Readiness Activities, Table 7. Pre-Upgrade Execution Activities, Table 8. Upgrade Execution Overview and Table 9. Post Upgrade Overview with the backout procedure shown in Table 10. Backout Procedure Overview.

It is assumed that upgrade of peripheral(s) is coordinated with and executed in parallel with the EAGLE upgrade to ensure that all work is performed within the maintenance window. Note that several variables affect the upgrade times shown in the tables – the timing values shown are estimates only.

The EAGLE has no known restriction that would prevent the upgrading of any peripheral in parallel with it.

3.1 Required Materials

1. One (1) source release system removable media.
2. One (1) target-release upgrade media for MSD or FTP server for remote download.
3. A valid EAGLE login ID and password with all user privileges enabled.
4. One (1) spare fixed disk at the source release: required in the event of recovery.
5. Capability to capture data via a printer, PC, or modem to allow remote access for **My Oracle Support** personnel.
6. List of GPLs from section 1.3 should be kept on hand for reference throughout the upgrade or refer to Appendix I to locate the Release Notice on **My Oracle Support** web portal.
7. The Software Access Key (SAK) must be available and entered (this activity should be done during the same maintenance window as the upgrade health check #2.)
8. The Rollback Source Release GPL RMD. For more information about downloading the rollback source release GPL, see Target Release Software Download

The following table lists the source release and the respective OAMHC69 GPL version to be used for the rollback to the source release:

Source Release	OAMHC69 GPL Version
46.6.0.0.0-73.18.0	45.18.0
46.6.2.0.0-73.26.0	45.26.0
46.6.3.0.0-73.28.1	45.28.0
46.6.4.0.0-73.30.0	45.30.0
46.6.5.0.0-73.31.1	45.31.0
46.7.0.0.0-75.27.0	45.27.0
46.7.1.0.0-75.29.0	45.29.0
46.7.2.0.0-75.30.0	45.30.0
46.7.4.0.0-75.32.1	45.32.0
46.7.5.0.0-75.36.0	45.36.0
46.7.5.1.0-75.36.33	45.36.33
46.7.6.0.0-75.37.0	45.37.0
46.7.7.0.0-75.38.0	45.38.0
46.8.0.0.0-75.18.17	45.18.17
46.8.1.0.0-75.18.18	45.18.18
46.8.2.0.0-75.18.19	45.18.19
46.9.0.0.0-76.28.0	45.28.0
46.9.1.0.0-76.39.0	45.39.0
46.9.2.0.0-76.41.0	45.41.0

46.9.3.0.0-76.45.0	45.45.0
46.9.4.0.0-76.47.0	45.47.0
46.9.5.0.0-76.48.0	45.48.0
46.9.1.20.0-77.5.11	45.5.11
47.0.0.0.0-79.13.0	45.13.0
47.0.0.1.0-79.13.19	45.13.19

Note: After upgrade completion, the DB level must not be changed on the destination release. If the DB level is changed, then the MTP cards will not be able to crossload the DDB from other network cards because of the difference in the DB level and the cards get stuck in the DDL_HUNT state. This causes the rollback failures.

3.2 Upgrade Preparation Overview

The activities listed in Table 6 need to be accomplished successfully prior to the maintenance window in which the upgrade is to be executed in. A day is equivalent to the period of time between scheduled maintenance windows.

Session / Phase	Time Frame	Activity	Impact
UHC #1	Dday – 7	Upgrade Health Check # 1	Non-intrusive
Session 0	Dday – 2	Target Release Software Download	Intrusive (format-disk, OAM boot)
UHC #2	Dday – 2	Upgrade Health Check # 2	Intrusive (H/W swap, IMT bus)
Session 0	Dday – 2	Configure Card-Set Network Conversion Method	Non-intrusive
Session 0	Dday – 2	Entering Upgrade Software Access Key	Non-intrusive

Table 6. Upgrade Readiness Activities

3.3 Pre-Upgrade Overview

The pre-upgrade procedures, shown in Table 7, may be optionally executed prior to entering the maintenance window. All of these activities are completed during Session 1.

Session / Phase	Time Frame	Activity	Impact
Pre-Phase 0	Hhour – 2	Verify Pre-Upgrade Requirements and Capturing Upgrade Data	Non-intrusive
Pre-Phase 0	Hhour – 2	Retrieve System's Node-Level Processing Option Indicators	Non-intrusive
Pre-Phase 0	Hhour – 2	Backing Up the Database	Non-intrusive
Pre-Phase 0	Hhour – 1	Updating the Source Release Spare E5-MASP	Non-intrusive
Pre-Phase 0	Hhour – 1	Verifying All Database	Non-intrusive
Pre-Phase 0	Hhour	Inserting Target Release System Removable Media.	Non-intrusive

Table 7. Pre-Upgrade Execution Activities

3.4 Upgrade Execution Overview

The procedures, shown in Table 8, are executed in the maintenance window.

Session / Phase	Time Frame	Activity	Impact
Pre-Phase 0	Hhour	Retrieve measurements data reports	Non-intrusive
Phase 0	Hhour	Initializing Front-End to Run in the Target Release.	Intrusive
Phase 0	Hhour	Verifying all Databases	Non-intrusive
Phase 0 & 2	Hhour	OAM Conversion	Intrusive
Phase 3	Hhour	Network Conversion	Intrusive

Table 8. Upgrade Execution Overview

The procedures, shown in Table 9. Post Upgrade Overview

, are executed in the maintenance window.

Session / Phase	Time Frame	Activity	Impact
Phase 3	Hhour + 3	Completing Upgrade/Return to Full Function Mode.	Non-intrusive
Post-upgrade	Hhour + 3	Backing Up Converted Database	Intrusive
Post-upgrade	Hhour + 3	Flashing Cards	Intrusive
Session 2	Dday + 2	Upgrading Removable Media	Non-intrusive
Session 2	Dday + 2	Backing Up Fixed Disk	Non-intrusive
Session 2	Dday + 2	Upgrade Spare Fixed Disk.	Intrusive
Session 2	Dday + 2	Verifying All Databases.	Non-intrusive

Table 9. Post Upgrade Overview

3.5 Backout Procedure Overview

The procedures, shown in Table 10. Backout Procedure Overview, are executed in the maintenance window.

Session / Phase	Time Frame	Activity	Impact
Phase 0 - 3	Hhour	Load and Run Source OAM	Non-intrusive
Phase 0 - 3	Hhour	Full fallback using Fixed Disk as OAM conversion workspace – Case 1 Or Full fallback using Fixed Disk as OAM conversion workspace – Case 2 Or Full fallback using Fixed Disk as OAM conversion workspace – Case 3	Intrusive
Phase 0 - 3	Hhour	Network Conversion to Source Release	Intrusive

Table 10. Backout Procedure Overview

4. UPGRADE PREPARATION

- Perform hardware inventory to identify any hardware not supported by the target release baseline.
- Bring all non-supported hardware up to baseline (to be coordinated with **My Oracle Support** personnel).
- Perform pre-upgrade system health checks to establish that the system is fit to upgrade.
- Download target release software if necessary (E5-MASP) or capability available.
- Configure network conversion to use Card-Set method.
- Enter upgrade Software Access Key (SAK).

4.1 Hardware Upgrade Preparation

Before the upgrade execution, the customer site should have three source-release fixed drives (E5-TDMs \ Sata fixed drives) and at least one source-release removable media (two if using SSD). If MSD, a target-release upgrade media drive (USB drives for E5-MASP systems) must be created as outlined in Target Release Software Download before the upgrade. Before the target release installation, the spare equipment inventory should be as shown in Table 11 and Table 12.

Table 11. Equipment Inventory before Upgrade if media software delivery (MSD)

Equipment	In-service	Spare	Upgrade	Totals
Source-release fixed drives	2	1	0	3
Source-release removable media	1	0	0	1
Target-release fixed drives	0	0	0	0
Target-release upgrade media	0	0	1	1

Table 12. Equipment Inventory before Upgrade if server software delivery (SSD)

Equipment	In-service	Spare	Upgrade	Totals
Source-release fixed drives	2	1	0	3
Source-release removable media	2	0	0	2
Target-release fixed drives	0	0	0	0
Target-release upgrade media	0	0	0	0

During the procedure, both the active and standby in-service source-release E5-TDMs are converted to the target release and the spare is reserved in case a fallback to the source release is required. Upon completion of the procedure, the spare equipment should be as shown in Table 13 and Table 14.

NOTE: the spare E5-TDM and source-release RMDs are upgraded to the target release in the second session. This allows a soak period for the target release and the possibility to fallback to the source release.

Table 13. Spare Equipment after Upgrade if media software delivery (MSD)

Equipment	In-service	Spare	Upgrade	Totals
Source-release fixed drives	0	0	1	1
Source-release removable media	0	0	1	1
Target-release fixed drives	2	0	0	2
Target-release upgrade media	1	0	0	1

Table 14. Spare Equipment after Upgrade if server software delivery (SSD)

Equipment	In-service	Spare	Upgrade	Totals
Source-release fixed drives	0	0	1	1
Source-release removable media	0	0	1	1
Target-release fixed drives	2	0	0	2
Target-release upgrade media	1	0	0	1

4.2 Software Upgrade Preparation

In releases 45.x and 46.0, it is necessary for the customer to obtain a Software access Key (SAK) from Oracle to perform the upgrade; the SAK should be entered during System Health Check #2 (see Appendix C). The SAK is used in the validation of the target release software. In release 46.1 and higher, it is not neccessay for the customer to obtain a SAK. Also, the target release software needs to be loaded onto the inactive partition of the E5-TDMs (see Appendix B). The release can either be downloaded from the E5-MASP upgrade media (USB drive) or via an FTP server. In order to utilize this software download capability via an FTP server, the EAGLE must have an IPSM Card installed in the system. See General Description section for general steps and timeline associated with the upgrade process.

Note: All upgrades from Eagle Release 46.9.0.0.0-76.28.0 to Release 46.9.1 or 46.9.2 would be intra-release upgrade due to addition of new GPLs.

5. Software Upgrade Procedure

Call the Oracle support hotlines [see Appendix I] prior to executing this upgrade to ensure that the proper media are available for use.

Before upgrade, users must perform the EAGLE system health check [1]. This check ensures that the system to be upgraded is in an upgrade-ready state. Performing the system health check determines which alarms are present in the system and if upgrade can proceed with these alarms.

****** WARNING *******

If there are cards in the system, which are not in IS-NR state, these cards should be brought to the IS-NR before the upgrade process is started. If it is not possible to bring the cards IS-NR, contact My Oracle Support [see Appendix I]. If any card cannot be brought in-service, the card should be inhibited after entering Phase 2 (during procedure 8). If any GLS card is in OOS-MT or IS-ANR state, none of the SCCP or LIM cards will load. The sequence of upgrade is such that cards providing support services to other cards will be upgraded first.

Note: EAGLE Release 47.0 does not support the DEIR feature. Therefore, do not upgrade to EAGLE 47.0 in case you are using this functionality. The DEIR support is going to be available in future releases.

****** WARNING *******

Do not start the upgrade process without the required spare equipment; without spare equipment, recovery procedures cannot be executed!

Please read the following notes on upgrade procedures:

1. Procedure completion times shown here are estimates. Times may vary due to differences in database size, user experience, and user preparation.
2. Command steps that require user entry are indicated with white-on-black step numbers.
3. The shaded area within response steps must be verified in order to successfully complete that step.
4. Where possible, EXACT command response outputs are shown. EXCEPTIONS are as follows:
   - Banner information is displayed in a format form only.
   - System-specific configuration information such as **card location**, **terminal port # assignments,** and **system features.**
   - ANY information marked with "XXXX" or "YYYY." Where appropriate, instructions are provided to determine what output should be expected in place of "XXXX or YYYY"
5. After completing each step and at each point where data is recorded from the screen, a check box should be provided.
6. Captured data is required for future support reference.
7. Each procedural step is numbered chronologically within each procedure.

5.1 Software Upgrade Execution – Session 1

Procedure 1: Verifying Pre-Upgrade Requirements and Capturing Upgrade Data

S T E P #	This procedure verifies that all pre-upgrade requirements have been met. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. Should THIS PROCEDURE FAIL, Contact the Oracle support hotlines [see Appendix I] AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Complete pre-upgrade tasks	`All tasks in Table 15 must be completed before continuing.`

Table 15. Pre-Upgrade Requirements

√	Tasks to be completed prior to upgrade execution
	Perform hardware inventory.
	Verify that all target-release baseline hardware has been installed. And any obsolete hardware has been replaced.
	Verify that a full complement of EAGLE® spares is available, including a source-release fixed disk. **Note**: This fixed disk's database should have been repaired in Upgrade Health Check [1].
	Verify that you have at least one source-release RMD with an up-to-date database. **Note**: This drive's database should have been backed up in Upgrade Health Check [1].
	Verify that you have one target-release upgrade media drives provided by Oracle for upgrade **Or** Target-Release software has been downloaded to the inactive disk partitions (see section 4.2)
	Verify that you have a copy of the Target Release's System Release Notes (see section 1.3.)
	Verify that an EAGLE system health check has been performed and the output capture file has been validated by My Oracle Support.
	Verify all the network cards are on latest bootloaders (see Procedure 19).
	Perform upgrade time calculations to ensure that the upgrade can be completed within the window.
	Collect all measurement reports.
	Verify that all required documentation is included in the upgrade kit. [See section 4.2]
	Collect the list of cards on VxWorks 6.4

2 ☐	Issue the command to display terminal status.	`rtrv-trm`

Procedure 1: Verifying Pre-Upgrade Requirements and Capturing Upgrade Data

3 ☐

Response to retrieve terminal command is displayed.

Record the terminals in the TRM column that have TYPE of PRINTER[2]. Also record the terminal being used to enter commands (the user terminal)[3] Or terminals used by external applications that issue commands to the EAGLE. In this example, terminal 12 is a printer, terminal 10 is the user terminal, and terminal 2 is KSR.

☐ Capture _____[2]

_____

☐ USER _____[3]

☐ Ext. Application: _____[4]

☐ **See recommendation #1 & #6 in section 1.6**

If **not** echoing to the printer or KSR, go to step 8.

☐ Record the initial output group configurations for the user's and capture terminals. Also, record the user's TMOUT value.

```
     eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y
     rtrv-trm
     Command entered at terminal #10.
;
     eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y
     TRM  TYPE     COMM         FC     TMOUT MXINV DURAL
     1    OAP     19200 -7-E-1 SW     30    5     00:01:00

USER      ___  ___  ___ ___ ___ ___

      TMOUT  ___

CAP       ___  ___  ___ ___ ___ ___
```

4 ☐

Echo command input to capture terminal.

If the capture terminal is the user terminal go to step 8.

`act-echo:trm=`***P***

(Where the value for ***P*** is one of the printer/KSR terminal port numbers recorded in Step 3)

5 ☐

Response to activate command is displayed.

```
     eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y
     act-echo:trm=P
     Command entered at terminal #10.
;
```

6 ☐

If capture terminal's output groups are not all set to YES, issue the change terminal command.

`chg-trm:trm=`***P***`:all=yes`[5]

(***P*** is the terminal port that is specified in step 4)

7 ☐

Response to change terminal command is displayed.

```
     eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y
     chg-trm:trm=P:all=yes
     Command entered at terminal #10.
;
```

[2] Terminals with type equal to KSR as well as type equal to printer, which are configured, need to be recorded. Terminal being used to capture cannot be a Telnet terminal, see recommendation #6 in section 1.6

[3] The user terminal cannot be a Telnet terminal, see recommendation #6 in section 1.6.

[4] If an external application is connected via a Telnet terminal on an IPSM card, see recommendation #6 in section 1.7.

[5] If the system displays continuous UAMs and the source of the UAMs are known issues, turn off the associated output groups to limit the information sent to printer\KSR terminal port.

Procedure 1: Verifying Pre-Upgrade Requirements and Capturing Upgrade Data

8 ☐	If the output group and timeout on the user terminal are not set correctly, issue the command to change terminal timeout and display groups.	**chg-trm:trm=USER:all=no:sa=yes:sys=yes:db=yes:dbg=yes:card=yes:tmout=0** (Where the value of *USER* is the user terminal number shown in Step3)

		`Command Completed.`
		`;`

[6] The spare E5-MASP should be the one verified by upgrade Health Check #2, see section 1.2.1 ref [1].

Procedure 3: Updating the Source-Release Spare Fixed Disk

6 ☐	Issue the command to retrieve GPL versions.	`rtrv-gpl`
7 ☐ ☐	Response from the retrieve command is displayed. Verify correct source release levels. If any of the standby E5-MASP GPLs indicate ALM, it is possible that the fixed disk has not gone through session 2 of the previous upgrade. **Stop** the procedure and contact My Oracle Support.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RELEASE APPROVED TRIAL REMOVE TRIAL *GGGGGG1* 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG1* 1116 XXX-XXX-XXX XXX-XXX-XXX ALM XXX-XXX-XXX ---------- *GGGGGG1* 1113 ---------- ---------- ---------- ---------- *GGGGGG2* 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG2* 1116 XXX-XXX-XXX XXX-XXX-XXX ALM XXX-XXX-XXX ---------- *GGGGGG2* 1113 ---------- ---------- ---------- ---------- *GGGGGG3* 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG3* 1116 XXX-XXX-XXX XXX-XXX-XXX ALM XXX-XXX-XXX ---------- *GGGGGG3* 1113 ---------- ---------- ---------- ---------- OAMHC 1114 XXX-XXX-XXX XXX-XXX-XXX ---------- ---------- OAMHC 1116 XXX-XXX-XXX XXX-XXX-XXX ---------- ---------- OAMHC 1113 ---------- ---------- ---------- ---------- *GGGGGG4* 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG4* 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG4* 1113 ---------- ---------- ---------- ---------- *GGGGGG5* 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG5* 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG5* 1113 ---------- ---------- ---------- ---------- *GGGGGG6* 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG6* 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- *GGGGGG6* 1113 ---------- ---------- ---------- ---------- ;
8 ☐	Issue the command to repair the standby TDM's database.	`chg-db:action=repair` **NOTE:** The system will need approximately 2 minutes after step 5 to acquire duplex mode. As a result, the system will reject the chg-db command until it is back in duplex mode.
9 ☐ ☐	Response to the repair command is displayed. Wait for the 'repair complete' message to display and the MASP returns to in-service.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y chg-db:action=repair Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y REPAIR: MASP A - Repair starts on standby MASP. ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y REPAIR: MASP A - Repair from fixed disk complete. ;
10 ☐	Place original standby E5-MASP in system.	☐ Slide the MASP H/S switch (SW3) on the standby MASP up to the unlocked position (Wait for all drive LEDs to transition to a steady blue). ☐ Remove the standby E5-MASP card determined in step 2. ☐ Insert the original standby E5-MASP card. ☐ Slide the MASP H/S switch (SW3) on the original standby MASP down to the locked position (Wait for the MASP H/S LED to transition from blinking blue to off and the MASP to come up in standby mode). Note: UAMs are generated during this step. An audible alarm is generated. Wait for the original standby E5-MASP to come up in standby mode and system returns to duplex mode.

Procedure 4: Verifying All Databases

S T E P #	This procedure verifies that all databases are coherent and at the same level, which includes current and backup partitions on both fixed disks. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**

1 ☐ Issue the command to display database information.

```
rept-stat-db:display=all
```

2 ☐ Response to the command is displayed.

Look in the columns labeled 'C,' 'T', and 'LEVEL' output by this command.

☐ Verify entries in column 'C' show 'Y', which indicates coherence.

☐ Verify entries in column 'T' show 'N' (backup and RMD may show a dash), which indicates that the database is not in transition.

☐ Verify all entries in the database LEVEL column are the same.
LEVEL is a value, which varies depending on the system.

☐ If the STDBY databases are not coherent or not at the correct level, repeat Procedure 3, step 8.

☐ Verify that the MPS databases are coherent.

```
   eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y

Procedure 5: Initializing MASPs to Run on Target-Release GPLs

S T E P #	This procedure loads the target-release GPL to both MASPs. This procedure requires that both MASPs be rebooted (one at a time) and verified as running the target-release GPLs. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	Remove the USB flash drives from E5-MASPs.	Note: the target-release is assumed to have been downloaded to the inactive partition prior to the execution of this procedure (see section 4.2.)
2 ☐	Inhibit the standby MASP	**INH-CARD:LOC=XXXX** (Where ***XXXX*** is the location of the standby MASP slot recorded in Procedure 3, Step 2)
3 ☐ ☐	Response to the inhibit command is displayed Verify UAM 514 is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Card is inhibited. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y ** 5045.0514 ** CARD XXXX OAMHC Standby MASP is inhibited ; **Note**: Wait for the card to boot and return to the IMT bus.
4 ☐	Issue the report card status command.	rept-stat-card:appl=oam
5 ☐ ☐	Response to the card status command is displayed. Verify that standby MASP is OSS-MT-DSBLD. For this sample output, 1113 is standby and 1115 is Active.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1113 ----------- E5MCAP OAMHC OOS-MT-DSBLD Manual ----- 1115 XXX-XXX-XXX E5MCAP OAMHC IS-NR Active -----
6 ☐	Download target-release flash to the standby MASP.	**INIT-FLASH:LOC=XXXX:CODE=TRIAL** (Where ***XXXX*** is the location used in the previous command)
7 ☐ ☐	Response to flash initialization is shown. Verify UAM 0004 is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx started. ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx completed. ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y * 8003.0004 * GPL SYSTEM BLMCAP Card is running non-activated GPL ; **Note:** Wait for card to boot and return to the IMT bus.
8 ☐	Retrieve the GPLs running on the card location.	**REPT-STAT-GPL:LOC=XXXX** (Where ***XXXX*** is the location used in the previous command)

Procedure 5: Initializing MASPs to Run on Target-Release GPLs

9 ☐	Response to the card status command is displayed. The card should be running the trial version of the GPL. If the approved and trial versions are the same no ALM will be present.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL CARD RUNNING APPROVED TRIAL OAMHC 1113 ---------- ---------- ---------- BLMCAP YYY-YYY-YYY ALM+ XXX-XXX-XXX YYY-YYY-YYY Command Completed. ;
10 ☐	Run the target-release GPL on the standby MASP	**ALW-CARD:LOC=XXXX:CODE=INACTIVEPRTN** (target release on the inactive partition) (Where *XXXX* is the location of the standby MASP used in the previous command)
11 ☐	Response to allow-card command is shown.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Card has been allowed. ;
12 ☐	Retrieve status of the MASPs	**REPT-STAT-GPL:GPL=OAMHC69**
13 ☐	Verify standby MASP running target release GPL. The standby MASP will display ALM to indicate that the card is not running the approved version GPL. Note: Standby MASP will not be displayed here if Eagle is getting upgraded from R46.4 or earlier to R46.5 or later. If so, run step 14 verify the GPL on standby MASP.Otherwise go to step 16.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RUNNING APPROVED TRIAL OAMHC 1113 XXX-XXX-XXX XXX-XXX-XXX OAMHC 1115 YYY-YYY-YYY XXX-XXX-XXX Command Completed. ;
14 ■	Retrieve GPL status of the standby MASP.	**REPT-STAT-GPL:LOC=XXXX** (Where ***XXXX*** is the location of the standby MASP slot recorded in Procedure 3, Step 2)
15 ☐	Verify standby MASP running target release GPLs. Here the standby MASP will display GPL as EOAM (instead of OAMHC) if Eagle is getting upgraded from R46.4 or earlier to R46.5 or later.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RUNNING APPROVED TRIAL EOAM 1115 140-030-000 ---------- ---------- BLMCAP 140-030-000 ALM+ 138-029-000 140-030-000 Command Completed.
16 ☐	Perform an OAM role change by booting the active MASP.	**INIT-CARD:LOC=XXXX** (Where ***XXXX*** is the location of the active MASP recorded in Procedure 3, Step 2)
17 ☐	Response to card initialization is shown.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Init Card command issued to card xxxx ;
18 ☐	Issue the command to log back in to the system.	**LOGIN:UID=*XXXXXX*** (Where ***XXXXXX*** is a valid login ID)

Procedure 5: Initializing MASPs to Run on Target-Release GPLs

19 ☐ ☐	Response to login command is displayed. Ignore any login failure message. Verify the Upgrade Phase in Banner[7].	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Upg Phase 0 User logged in on terminal *UU*. ; ? Login failures since last successful LOGIN Last successful LOGIN was on port ? on ??-??-?? @ ??:??:??
20 ☐	Echo command input to capture terminal.	**ACT-ECHO:TRM=*P*** (Where ***P*** is the terminal port number specified in Procedure 1, Step 3)
21 ☐	Response to print capture command is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Upg Phase x Scroll Area Output will be echoed to Port *P*. ;
22 ☐	Issue the card status to verify the location of the active MASP slot	**REPT-STAT-CARD:APPL=OAM**
23 ☐ ☐	Response to the card status command is displayed. Circle the status of both E5-MASPs: **1113:** Active or Standby **1115:** Active or Standby For this sample output, 1113 is active and 1115 is standby. Note: GPL & PST display for the standby MASP can be ignored.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1113 XXX-XXX-XXX E5MCAP OAMHC IS-NR Active ----- 1115 XXX-XXX-XXX E5MCAP OAMHC IS-NR Standby ----- Command Completed. ;
24 ☐	Inhibit the standby MASP	**INH-CARD:LOC=XXXX** (Where ***XXXX*** is the location of the standby MASP identified in the previous command)
25 ☐ ☐	Response to the inhibit command is displayed Verify UAM 514 is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Card is inhibited. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase x ** 5045.0514 ** CARD XXXX OAMHC Standby MASP is inhibited ; **Note**: Wait for the card to boot and return to the IMT bus.
26 ☐	Download target release flash to the standby MASP.	**INIT-FLASH:LOC=XXXX:CODE=TRIAL** (Where ***XXXX*** is the location of the standby MASP used in the previous command)

[7] Phase number is not displayed at this point for incremental upgrades. See section 1.5 for a definition of incremental upgrade and section 1.4 for a definition of database versioning. Database versioning between releases is determined in Procedure 7, step 2.

Procedure 5: Initializing MASPs to Run on Target-Release GPLs

27 ☐	Response to flash initialization is shown.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx started. ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx completed. ; **Note:** Wait for card to boot and return to the IMT bus.
28 ☐	Retrieve the GPLs running on the card location.	**REPT-STAT-GPL:LOC=XXXX** (Where ***XXXX*** is the location of the standby MASP slot used in the previous command)
29 ☐	Response to the card status command is displayed. The card should be running the trial version of the GPL. If the approved and trial versions are the same no ALM will be present.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLEEAGLE XX.x.x-YY.yy.y GPL CARD RUNNING APPROVED TRIAL OAMHC 1115 ---------- ---------- ---------- BLMCAP **YYY-YYY-YYY** ALM+ XXX-XXX-XXX **YYY-YYY-YYY** Command Completed. ;
30 ☐	Run the target release GPL on the standby MASP	**ALW-CARD:LOC=XXXX:CODE=INACTIVEPRTN** (target release on the inactive partition) (Where *XXXX* is the location of the standby MASP used in the previous command)
31 ☐	Response to allow card command is shown.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Card has been allowed. ;
32 ☐	Issue the command to display the status of the MASPs' GPL	**REPT-STAT-GPL:GPL=OAMHC69**
33 ☐ ☐	Response from the retrieve command is displayed. Verify that the GPL versions that are displayed in the "RUNNING" column are correct; see section 1.3	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON APPL CARD RUNNING APPROVED TRIAL OAMHC69 1113 XXX-XXX-XXX ALM YYY-YYY-YYY XXX-XXX-XXX * OAMHC69 1115 XXX-XXX-XXX ALM YYY-YYY-YYY XXX-XXX-XXX * Command Completed. ; Note: If no cards are displayed, repeat this step where gpl=oamhc.
34 ☐	If GPLs are not correct, do the following:	1. Repeat Step 2 - 33. 2. Contact My Oracle Support.

Procedure 5: Initializing MASPs to Run on Target-Release GPLs

35 ☐	Issue the command to display the version of the Flash GPL running on card 1113.	`REPT-STAT-CARD:LOC=1113:MODE=FULL`
36 ☐ ☐	Response from the retrieve command is displayed. Record version of BLMCAP running on E5-MASP. GPL Version: _____ GPL Version: _____ Note: For upgrade to release 46.6 & later, UAM 0225, "CARD running outdated Flash GPL" is displayed in Alarm Status.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1113 XXX-XXX-XXX E5MCAP OAMHC IS-NR Standby ----- ALARM STATUS = No Alarms. 37 ☐	Repeat steps 35 – 36, for location 1115.	

Procedure 6: Verifying the Target Release and Software Access Key

S T E P #	This procedure verifies that the Upgrade Software Access Key has been entered. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Validate the Software Access Key with the upgrade target release.	**ACT-UPGRADE:ACTION=CHKREL:SRC=FIXED**
2 ☐ ☐	Response from the software validation. Verify the Upgrade target release is correct. For pre-46.1 release, verify the Software Access Key is valid. SAK is not used from release 46.1 forward. If either the upgrade target release is incorrect or the Software Access Key is invalid **STOP** the upgrade and contact My Oracle Support.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y act-upgrade:action=chkrel:src=zzzz Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Upgrade target: EAGLE XX.x.x.x.x-YY.y.y Software Access Key valid for target release Copy Release data to ramdisk. Validate Release data on ramdisk. Eagle Release successfully validated. Command Complete : Upgrade action completed successfully ;

5.2 OAM Conversion

Procedure 7: Verifying all Databases

S T E P #	This procedure verifies that all of the fixed disk's database partitions have not been converted and are still coherent and at the same level. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. NOTE: Refer to Section B.2 to configure the Card Set network conversion method for target release 46.0 and higher. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.

1 ☐ Issue the command to display database status during upgrades.

```
ACT-UPGRADE:ACTION=DBSTATUS
```

2 ☐ Response to the command is displayed.

☐ Look in the columns labeled 'C', 'T', and 'LEVEL' output by this command.

☐ Verify entries in column 'C' show 'Y', which indicates coherence or '-'.

☐ Verify column 'T' shows 'N' for both CRNT databases, which indicates that those databases are not in transition

☐ Or if target release is on the inactive partition, the database level is "1".

☐ Verify all entries in the database 'Level' column marked as 'XXX' are the same.

☐ Verify that the version numbers displayed are correct.[8]

```

```
rtrv-upgrade-config
```

4 ☐ Response to the command is displayed.

☐ If target rlease is 46.0 or 45.x, verify that SAK is set. .

☐ The Threshold Type will be GROUP or SET.

```
    eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x-YY.yy.y Upg Phase x
    Software Access Key entered on system : vbsevhcea7vy5

    Configured Upgrade Threshold Type: SET
      Number of SERVICE Sets: X
      Number of LINK Sets: Y

    Command Completed.
;
```

Note: Refer to B.2 to configure the Card Set network conversion method.

[8] See section 1.4 to verify the database versions. If the database versions are the same for the TDMs as well as the RMD, the phase indicator is not displayed until after Procedure 8, step 1.

Procedure 8: STP Conversion

S T E P #	This begins the actual STP conversion process. This procedure begins during Upgrade Phase 0 and ends as part of Upgrade Phase 3. **See recommendation #5 in section 1.6 before executing this procedure.** Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. **If the upgrade execution terminates before successfully completing, see recommendation #7 in 1.6** SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	

1 ☐	Issue the command to begin database conversion.
	
	Note that the duration of this command is dependent on the size of the database and the size of the network configuration. The duration can be from about two hours when using threshold type SET to up to 8-10 hours in large systems using threshold type GROUP.
	
	Table 18. Act Upgrade Command Actions lists the actions completed by the command.
	
	Appendix D contains messages illustrative of the output of upgrade during this series of operations.
		If the threshold type is set to SET in Procedure 7, Step 4 issue the following command:
		
		`ACT-UPGRADE:ACTION=CONVERTSTP:SRC=FIXED`
		
		Note: While upgrading from Release 46.9 to Release 46.9.1 or later releases, change `PURGEPERIOD` to `0` using the `CHG-ATTR-SECULOG:PURGEPERIOD=0` command.
		
		If the threshold type is set to GROUP in Procedure 7, Step 4, issue the following command:
		
		`ACT-UPGRADE:ACTION=CONVERTSTP:SRC=FIXED:THRES=75`
		
		Note: Threshold type GROUP is not a valid option for 46.9 or later releases, and therefore, the Act-upgrade:action=convertstp:src=fixed:thres=75 command is not valid for Release 46.9 and later.

Table 18. Act Upgrade Command Actions

Fixed workspace	
A	OAM based measurements are inhibited.
B	N/A
C	The standby disk is formatted based on the target release configuration table.
D	The target release GPLs are copied onto the standby TDM.
E	The existing database is converted onto the standby disk, upgrading the existing EAGLE source-release tables to target-release tables.
F	The standby MASP boots automatically.
G	The active MASP then boots allowing the standby to resume the active role.[9]
H	The standby disk is formatted based on the target release configuration table.
I	The target release GPLs are copied onto the standby TDM.
J	The existing database is converted onto the standby disk, upgrading the existing EAGLE source-release tables to target-release tables.
K	The standby MASP boots automatically.
L	Initialization of Network cards.

[9] Proceed to step 3 to log back into the system and restart output capture.

Procedure 8: STP Conversion

2 ☐	Command is displayed. Note the banners transitions from Phase 0 to Phase 3. For incremental upgrade, see footnote [10] Completion notice of successful upgrade. If upgrade does not complete successfully, see recommendation # 7 in section 1.6	eaglestp YY-MM-DD hh:mm:ss EST Rel XX.x.x-XX.x.x Upg Phase 0 act-upgrade:action=convertstp:thres=*XX* Command entered at terminal #10. ; **NOTICE:** One of the following messages will be output at the start of the upgrade process to indicate which workspace (fixed or removable) has been selected by the system for OAM conversion: eaglestp YY-MM-DD hh:mm:ss EST Rel XX.x.x-XX.x.x Upg Phase 0 Using inactive standby partitions for OAM conversion (disk=*dddd*) ; (Where ***dddd*** defines conversion workspace) **NOTICE:** See Appendix D (D.1) for samples of output messages. eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase 3 Command Complete : Upgrade action completed successfully ; **NOTE: If upgrade terminates abnormally in phase 3 due to cards being in IS-ANR|DDL Hunt, contact My Oracle Support for assistance in executing Appendix D (D.2).**
3 ☐	After item G in step 1, issue the command to log back in to the system.	**LOGIN:UID=*XXXXXX*** (Where ***XXXXXX*** is a valid login ID)
4 ☐	Response to login command is displayed. Ignore any login failure message.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase x User logged in on terminal 10. ; ? Login failures since last successful LOGIN Last successful LOGIN was on port ? on ??-??-?? @ ??:??:??
5 ☐	Issue the command to reactivate printer capture of upgrade process.	**ACT-ECHO:TRM=*P*** (Where ***P*** is the terminal port number specified in Procedure 1, Step 3)
6 ☐	Response to print capture command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase x Scroll Area Output will be echoed to Port P. ;

[10] Software troubles from the DMS_LOCK.C module may be generated, for incremental upgrade only, while GPLs are being copied. These software troubles are not expected but, if they occur in this circumstance, they are not service affecting.

Procedure 8: STP Conversion

7 ☐ Issue the command to display database status during upgrades.

```
ACT-UPGRADE:ACTION=DBSTATUS
```

8 ☐ Response from the command is displayed.

Look in the columns labeled 'C', 'LEVEL' and 'VERSION STATUS' output by this command.

☐ Verify entries in column 'C' show 'Y' which indicates coherence or '-'.

☐ Verify both 'FD CRNT' Levels are equal.

☐ Verify 'VERSION STATUS' shows NORMAL in the active partition group. NOTE: this will not occur until step 2 above is completed.

```

Procedure 8: STP Conversion

11 ☐	Issue the command to display GPL status.	**RTRV-GPL**
12 ☐ ☐	Response from the retrieve command is displayed. Verify that the GPL versions that are displayed in the "RELEASE" column are correct; see Section 1.3	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RELEASE APPROVED TRIAL REMOVE TRIAL GGGGGG1 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG1 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG1 1113 ---------- ---------- ---------- ---------- GGGGGG2 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG2 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG2 1113 ---------- ---------- ---------- ---------- GGGGGG3 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG3 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG3 1113 ---------- ---------- ---------- ---------- OAMHC 1114 XXX-XXX-XXX XXX-XXX-XXX ---------- ---------- OAMHC 1116 XXX-XXX-XXX XXX-XXX-XXX ---------- ---------- OAMHC 1113 ---------- ---------- ---------- ---------- GGGGGG4 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG4 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG4 1113 ---------- ---------- ---------- ---------- GGGGGG5 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG5 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG5 1113 ---------- ---------- ---------- ---------- GGGGGG6 1114 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG6 1116 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX ---------- GGGGGG6 1113 ---------- ---------- ---------- ---------- ;
13 ■	Execute Procedure64 to come out of the upgrade.	

5.3 Completion of Session 1

Note:

- Migration to VxWorks6.9 would be done automatically during the upgrade. If any card is not migrated automatically to VxWorks6.9, then follow the procedure mentioned in Appendix G.
- If you are upgrading from Release 46.9.3 to Release 47.0 and LNP capacity is greater than 504M, then corresponding part numbers should be enabled via the enable-ctrl-feat command; otherwise, SCCP cards would go into the IS-ANR state.

→ This concludes SESSION ONE ←

5.4 Upgrade Session 2

Procedure 9. Verifying Upgrade Session 2 Requirements

S T E P #	This procedure verifies that all upgrade session 2 requirements have been met. This procedure assumes an acceptable amount of soak time has occurred since the end of session #1. The expected norm for soak time is 48 hours. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Complete pre-upgrade session 2 tasks	All tasks in Table 19 must be completed before continuing.

Table 19. Upgrade Session 2 Requirements

√	Tasks to be completed prior to upgrade session 2 execution
	Verify that an EAGLE system health check 3 has been performed.

Procedure 10: Upgrading Removable medias

S T E P #	This procedure describes how to update source-release removable media to the target release. See recommendation #2 in section 1.6. This procedure is optional following the upgrade and can be completed the following day after a new database audit has been completed following the upgrade. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Echo command input to capture terminal. See recommendation #1 & #6 in section 1.6	**act-echo:trm=*P*** (Where the value for ***P*** is one of the printer/KSR terminal port numbers recorded in Procedure 1, Step 3)

6. RECOVERY PROCEDURES

Before executing any of these procedures, contact My Oracle Support at Oracle Support Contacts Global Directory [see Appendix I.] In the event that other platforms are being upgraded in parallel, a determination whether recovery action is required on those platforms is required. Persons performing the upgrade should be familiar with these upgrade documents.

6.1 Backout Setup Procedures

Execute this section only if there is a problem and it is desired to revert back to the pre-upgrade version of the software.

Warning

Do not attempt to perform these backout procedures without first contacting the My Oracle Support at Oracle Support Contacts Global Directory

6.2 Revert MASP, MCPM and IPSM to VxWorks6.4

Execute this section only if there is a problem and it is desired to revert to the pre-upgrade version of the software for the MASP, MCPM and IPSM cards.

If the source release is 46.5 or prior and the target release is 46.6 or later, then execute Procedure 30 through Procedure 34.

If system is running on VxWorks6.9 but pre-upgrade version is on VxWorks6.4 then following are the steps to revert the system to former state:

- First revert the cards to VxWorks6.4 (Section 6.2 procedure 30 through procedure 34)
- Follow the normal recovery procedure A, B or C

Procedure 24: Revert IPS (ENET-B) cards on VxWorks6.4

S T E P #	This procedure is to revert the IPSM cards to VxWorks6.4. Execute the below procedure for every IPSM card present in the system. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	If source release is 46.5 or prior, issue the card status command.	`REPT-STAT-CARD:APPL=IPS`

2 ☐	Response to the card status command is displayed.	`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`CARD VERSION TYPE GPL PST SST AST`
		`XXXX XXX-XXX-XXX IPSM IPSHC IS-NR Active ----`
		`XXXX XXX-XXX-XXX IPSM IPSHC IS-NR Active ----`
		
		`Command Completed.`
		`;`

3 ☐	For each card listed above, issue the GPL status commend.	`REPT-STAT-GPL:LOC=`***`XXXX`*** (Where ***XXXX*** is the location of the IPSM card)

4 ☐
 	
☐
	Response to the GPL status command is displayed.
	
	If card is running BLDC32, go to next step.
	Otherwise repeat Step 3 for
		`eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x-YY.yy.y`
		`GPL CARD RUNNING APPROVED TRIAL`
		`IPSHC69 XXXX XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX`
		`BLDC32 YYY-YYY-YYY YYY-YYY-YYY YYY-YYY-YYY`
		
		`Command Completed.`
		`;`

	next IPSM card listed in Step 2.	
5 ☐	Issue command to inhibit the card.	**INH-CARD:LOC=*XXXX*** (Where ***XXXX*** is the location of the IPSM card use in previous command.)
6 ☐	Response to the inhibit command is displayed	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Card has been inhibited. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ; **Note**: Wait for the card to boot and return to the IMT bus.
7 ☐	Download target-release flash to the IPSM card.	**INIT-FLASH:LOC=XXXX:CODE=APPR:GPL=BLMCAP** (Where ***XXXX*** is the location used in the previous command)
8 ☐ ☐	Response to flash initialization is shown. Verify UAM 0004 is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx started. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx completed. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y * 8003.0004 * GPL SYSTEM **BLMCAP** Card is running non-activated GPL ; **Note:** Wait for card to boot and return to the IMT bus.
9 ☐	Issue command to activate the flash image,	**ACT-FLASH:loc=*XXXX*** (Where XXXX is the location of the IPSM card used in the previous command)
10 ☐	Response to the activate command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Memory Activation for card XXXX Started. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Activation for card XXXX Completed. ;
11 ☐	Issue the allow command to reload the IPSM card	**ALW-CARD:LOC=*XXXX*** (Where *XXXX* is the location of the IPSM card used in the previous command)
12 ☐	Response to allow-card command is shown.	eaglestp YY-MM-DD hh:mm:ssc TTTT EAGLE XX.x.x.x.x-YY.y.y Card has been allowed. ;
13 ☐	Issue command to report the GPLs running on the IPSM card.	**REPT-STAT-GPL:LOC=*XXXX*** (Where *XXXX* is the location of the IPSM card used in the previous command)
14 ☐ ☐	Response to GPL status command. Verify that IPSM card is running BLMCAP flash GPL.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RUNNING APPROVED TRIAL IPSHC XXXX XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX **BLMCAP** YYY-YYY-YYY YYY-YYY-YYY YYY-YYY-YYY Command Completed. ;
15 ■	If this is the last card listed in Step 2, continue to next procedure. Otherwise, repeat Steps 3 - 14 for the next card listed in Step 2.	**Note:** Wait till this flashed IPSM card to complete reloading before proceeding to next step.

Procedure 25: Revert IPSM application running on SLIC to VxWorks6.4

S T E P #	This procedure reverts the SLIC card running the IPS application to VxWorks6.4. Execute the below procedure for every SLIC card with IPS application present in the system. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	If source release is 46.5 or prior, issue the card status command.	`REPT-STAT-CARD:APPL=IPS`

2 ☐	Response to the card status command is displayed.	`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`CARD VERSION TYPE GPL PST SST AST`
		`XXXX XXX-XXX-XXX SLIC IPSHC IS-NR Active ----`
		`XXXX XXX-XXX-XXX SLIC IPSHC IS-NR Active ----`
		
		`Command Completed.`
		`;`

3 ☐	For each card with type equal to SLIC listed above, issue the GPL status commend.	`REPT-STAT-GPL:LOC=`***`XXXX`*** (Where ***XXXX*** is the location of the IPSM/SLIC card slot listed in previous step.)

4 ☐
☐
	Response to the card status command is displayed.
	
	If card is running BLSL932, go to next step
	Otherwise repeat Step 3 for next SLIC card listed in Step 2.
		`eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x-YY.yy.y`
		`GPL CARD RUNNING APPROVED TRIAL`
		`IPSHC69 XXXX XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX`
		`BLSL932 YYY-YYY-YYY YYY-YYY-YYY YYY-YYY-YYY`
		
		`Command Completed.`
		`;`

5 ☐	Issue command to inhibit the card.	`INH-CARD:LOC=`***`XXXX`*** (Where ***XXXX*** is the location of the IPSM/SLIC card)

6 ☐	Response to the inhibit command is displayed	`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`Card has been inhibited.`
		`;`
		
		`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`Command Completed.`
		
		`;`
		
		Note: Wait for the card to boot and return to the IMT bus.

7 ☐	Issue flash command to download target-release flash to the IPSM/SLIC card.	`INIT-FLASH:LOC=`***`XXXX`***`:CODE=APPR:GPL=BLSLC32` (Where ***XXXX*** is the location used in the previous command)

8 ☐
☐
	Response to flash initialization is shown.
	
	Verify UAM 0004 is displayed.
		`eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y`
		`FLASH Memory Download for card xxxx started.`
		`;`
		`eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y`
		`FLASH Memory Download for card xxxx completed.`
		`;`
		`eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y`
		`* 8003.0004 * GPL SYSTEM BLSLC32 Card is running non-activated GPL`
		`;`
		
		Note: Wait for card to boot and return to the IMT bus.

Procedure 25: Revert IPSM application running on SLIC to VxWorks6.4

9 ☐	Issue command to activate the flash image.	**ACT-FLASH:loc=*XXXX*** (Where XXXX is the location of the IPSM/SLIC card used in the previous command.)
10 ☐	Response to the activate command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Memory Activation for card XXXX Started. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Activation for card XXXX Completed. ;
11 ☐	Issue the allow command to reload the IPSM/SLIC card.	**ALW-CARD:LOC=*XXXX*** (Where *XXXX* is the location of the IPSM/SLIC card used in the previous command.)
12 ☐	Response to allow-card command is shown.	eaglestp YY-MM-DD hh:mm:ssc TTTT EAGLE XX.x.x.x.x-YY.y.y Card has been allowed. ;
13 ☐	Issue command to report GPL status.	**REPT-STAT-GPL:LOC=*XXXX*** (Where *XXXX* is the location of the IPSM/SLIC card used in the previous command.)
14 ☐ ☐	Response to GPL status command. Verify that IPSM/SLIC card is running BLSLC32 flash GPL.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RUNNING APPROVED TRIAL IPSHC XXXX XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX **BLSLC32** YYY-YYY-YYY XXX-XXX-XXX YYY-YYY-YYY Command Completed. ;
15 ☐	If this is last card listed in Step 2, continue to next procedure. Otherwise, repeat Steps 3-Step 14 for the next card listed in Step2.	**Note:** Wait till this flashed IPSM/SLIC card to complete reloading before proceeding to next step.

Procedure 26: Revert MCPM cards on VxWorks6.4

S T E P #	This procedure is to revert the MCPM cards to VxWorks6.4. Execute the below procedure for every MCPM card present in the system. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	If source release is 46.5 or prior, issue the card status command.	**REPT-STAT-CARD:APPL=MCP**
2 ☐ ☐	Response to the card status command is displayed. .	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST XXXX XXX-XXX-XXX MCPM MCPHC IS-NR Active ---- XXXX XXX-XXX-XXX MCPM MCPHC IS-NR Active ---- Command Completed. ;
3 ☐	For each card listed above, issue the GPL status commend.	**REPT-STAT-GPL:LOC=XXXX** (Where ***XXXX*** is the location of the MCPM card)
4 ☐ ☐	Response to the card status command is displayed. If card is running BLDC32, go to next step. Otherwise repeat Step 3 for next MCPM card listed in step 2.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x-YY.yy.y GPL CARD RUNNING APPROVED TRIAL MCPHC69 XXXX XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX BLDC32 YYY-YYY-YYY YYY-YYY-YYY YYY-YYY-YYY Command Completed. ;
5 ☐	Issue command to inhibit the card.	**INH-CARD:LOC=*XXXX*** (Where ***XXXX*** is the location of the MCP card use in previous command.)
6 ☐	Response to the inhibit command is displayed	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Card has been inhibited. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ; **Note**: Wait for the card to boot and return to the IMT bus.
7 ☐	Download target-release flash to the MCPM card.	**INIT-FLASH:LOC=*XXXX*:CODE=APPR:GPL=BLMCAP** (Where ***XXXX*** is the location used in the previous command)
8 ☐ ☐	Response to flash initialization is shown. Verify UAM 0004 is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx started. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx completed. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y * 8003.0004 * GPL SYSTEM **BLMCAP** Card is running non-activated GPL ; **Note:** Wait for card to boot and return to the IMT bus.
9 ☐	Issue command to activate the flash image.	**ACT-FLASH:loc=*XXXX*** (Where *XXXX* is the location of the MCPM card used in the previous command)

Procedure 26: Revert MCPM cards on VxWorks6.4

10 ☐	Response to the activate command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Memory Activation for card XXXX Started. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Activation for card XXXX Completed. ;
11 ☐	Run the target-release GPL on the MCPM card	**ALW-CARD:LOC=*XXXX*** (Where *XXXX* is the location of the MCP card used in the previous command)
12 ☐	Response to allow-card command is shown.	eaglestp YY-MM-DD hh:mm:ssc TTTT EAGLE XX.x.x.x.x-YY.y.y Card has been allowed. ;
13 ☐	Issue command to report the GPLs running on the MCPM card.	**REPT-STAT-GPL:LOC=*XXXX*** (Where *XXXX* is the location of the MCP card used in the previous command)
14 ☐ ☐	Response to GPL status command. Verify that MCPM card is running BLMCAP flash GPL.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RUNNING APPROVED TRIAL MCPHC XXXX XXX-XXX-XXX XXX-XXX-XXX ---------- BLMCAP YYY-YYY-YYY XXX-XXX-XXX YYY-YYY-YYY Command Completed. ;
15 ☐	If this is the last card listed in Step 2, continue to next procedure. Otherwise, repeat Steps 3 - 14 for the next card listed in Step 2.	**Note:** Wait till this flashed MCPM card to complete reloading before proceeding to next step.

Procedure 27: Revert MCPM application running on SLIC card to VxWorks6.4

S T E P #	This procedure is to revert the SLIC card with MCPM application to VxWorks6.4. Execute the below procedure for every SLIC card running the MCP application present in the system. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	If source release is 46.5 or prior, issue the card status command.	**REPT-STAT-CARD:APPL=MCP**
2 ☐	Response to the card status command is displayed. .	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST XXXX XXX-XXX-XXX SLIC MCPHC IS-NR Active ---- XXXX XXX-XXX-XXX SLIC MCPHC IS-NR Active ---- Command Completed. ;
3 ☐	For each MCPM/SLIC card listed above, issue the GPL status commend.	**REPT-STAT-GPL:LOC=*XXXX*** (Where ***XXXX*** is the location of the MCPM/SLIC card slot listed in previous step.)card)
4 ☐ ☐	Response to the card status command is displayed. If card is running BLSL932, go to next step Otherwise repeat Step 3 for next card in above list in step 2.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x-YY.yy.y GPL CARD RUNNING APPROVED TRIAL MCPHC69 XXXX XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX **BLSL932** YYY-YYY-YYY YYY-YYY-YYY YYY-YYY-YYY Command Completed. ;
5 ☐	Issue command to inhibit the card.	**INH-CARD:LOC=XXXX** (Where ***XXXX*** is the location of the MCPM/SLIC card used in the previous command).
6 ☐	Response to the inhibit command is displayed	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Card has been inhibited. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ; **Note**: Wait for the card to boot and return to the IMT bus.
7 ☐	Issue flash command to download target-release flash to the MCPM card.	**INIT-FLASH:LOC=XXXX:CODE=APPR:GPL=BLSLC32** (Where ***XXXX*** is the location used in the previous command.)
8 ☐ ☐	Response to flash initialization is shown. 13 ☐	Download target-release flash to the standby MASP card.	**INIT-FLASH:LOC=*XXXX*:CODE=APPR:GPL=BLMCAP** (Where ***XXXX*** is the location used in the previous command)
14 ☐ ☐	Response to flash initialization is shown. Verify UAM 0004 is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx started. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y FLASH Memory Download for card xxxx completed. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y * 8003.0004 * GPL SYSTEM **BLMCAP** Card is running non-activated GPL ; **Note:** Wait for card to boot and return to the IMT bus.
15 ☐	Retrieve the GPLs running on the card location.	**REPT-STAT-GPL:LOC=*XXXX*** (Where ***XXXX*** is the location of the standby MASP slot used in the previous command)
16 ☐ ☐	Response to the GPL status command is displayed. Verify that card is running BLMCAP GPL.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y GPL CARD RUNNING APPROVED TRIAL OAMHC XXXX ---------- ---------- ---------- **BLMCAP** YYY-YYY-YYY+ YYY-YYY-YYY YYY-YYY-YYY Command Completed. ;
17 ☐	Issue command to activate the flash on standby MASP.	**ACT-FLASH:LOC=*XXXX*** (Where XXXX is the location of the standby MASP used in the previous command)
18 ☐	Response to the activate command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Memory Activation for card XXXX Started. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Activation for card XXXX Completed. ;
19 ☐	Issue command to allow the standby MASP to load.	**ALW-CARD:LOC=*XXXX*** (Where *XXXX* is the location of the standby MASP used in the previous command)
20 ☐	Response to allow-card command is shown.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Card has been allowed. ;
21 ☐	Issue command to report the status of the Standby MASP.	**REPT-STAT-CARD:lOC=*XXXX***

Procedure 28: Revert the MASP card to VxWorks6.4

22 ☐ ☐	Response from the retrieve command is displayed. Verify that Standby MASP card running is running BLMCAP flash GPL.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST XXXX XXX-XXX-XXX E5MCAP OAMHC IS-NR Standby ----- ALARM STATUS = No Alarms. BLMCAP GPL version = YYY-YYY-YYY IMT BUS A = Conn IMT BUS B = Conn CURRENT TEMPERATURE = 33C (92F) PEAK TEMPERATURE: = 33C (92F) [17-10-14 00:30] Command Completed. ;
23 ☐	If this is the first pass through this procedure, issue command to boot the active MASP. Otherwise, go to Step 29.	**INIT-CARD:LOC=*YYYY*** (Where ***YYYY*** is the location of the active MASP.)
24 ☐	Response to card initialization is shown.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Init Card command issued to card YYYYY ;
25 ☐	Issue the command to log back in to the system.	**LOGIN:UID=*XXXXXX*** (Where ***XXXXXX*** is a valid login ID)
26 ☐	Response to login command is displayed. Ignore any login failure message.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y User logged in on terminal *UU*. ; ? Login failures since last successful LOGIN Last successful LOGIN was on port ? on ??-??-?? @ ??:??:??
27 ☐	Echo command input to capture terminal.	**ACT-ECHO:TRM=*P*** (Where ***P*** is the terminal port number specified in Procedure 1, Step 3)
28 ☐	Response to print capture command is displayed. Repeat Steps 1 – 22 for the formerly active MASP.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Scroll Area Output will be echoed to Port *P*. ;
29 ☐	Issue the command to display the cards running with BLDC32 flash GPL	**REPT-STAT-GPL:GPL=BLDC32**
30 ☐ ☐	Response from the GPL status command is displayed. Verify that no cards are displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RUNNING APPROVED TRIAL Command Completed. ;

6.3 Recovery Procedure A

Procedure 29: Load and Run Source OAM

S T E P #	Perform this Recovery Procedure in order to copy the BLMCAP GPLs from the source after performing procedures 29, 30, 31, or 32 when upgrading with the fixed workspace. NOTE: If the source release is 46.5 or prior, perform this procedure only when the MASPs are running the BLMCAP flash image. Otherwise Procedures 30 - 34 must be performed before this procedure. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**
	When directed to by My Oracle Support, execute this procedure: After the completion of Procedure 30, Procedure 31, Procedure 32, Procedure 33(but not Procedure 34).

1 ☐	If a USB drive is present in the system, remove it.	
2 ☐	If recovering from release 46.3 or later back to a release of 46.2 or earlier, go to step 16, else continue to next step.	
3 ☐	Insert pre-upgrade source release media into the active MASP.	Once inserted, allow time for the source-release RMD to be detected by the system.
4 ☐	Issue the command to retrieve BLMCAP application data.	`rtrv-gpl:gpl=blmcap`

5 ☐	Response to rtrv-gpl command is displayed.
	
	Record the "REMOVE TRIAL" version:
	
	_____
		`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y`
		`GPL Auditing ON`
		
		`GPL CARD RELEASE APPROVED TRIAL REMOVE TRIAL`
		`BLMCAP 1114 xxx-xxx-xxx xxx-xxx-xxx yyy-yyy-yyy ----------`
		`BLMCAP 1116 xxx-xxx-xxx xxx-xxx-xxx yyy-yyy-yyy xxx-xxx-xxx`
		`;`

6 ☐	Issue the command to change the gpl.	`chg-gpl:gpl=blmcap:ver=xxx-xxx-xxx` *(Where xxx-xxx-xxx is the GPL version recorded in the previous step)*

7 ☐	Response to chg-gpl command is displayed.	`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y`
		`BLMCAP upload to 1116 completed`
		`BLMCAP upload to 1114 completed`
		`System Release ID table upload to 1116 completed`
		`System Release ID table upload to 1114 completed`
		`;`

8 ☐	Issue the report card status command.	`rept-stat-card:appl=oam`

Procedure 29: Load and Run Source OAM

9 ☐ ☐	Response to the card status command is displayed. Record which MASP is Active and Standby. Record the card locations of the MASPs: Act MASP _____ Stby MASP _____[12]	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1113 XXX-XXX-XXX E5MCAP OAMHC IS-NR Active ----- 1115 XXX-XXX-XXX E5MCAP OAMHC IS-NR Standby ----- Command Completed. ;
10 ☐	Remove the source-release RMD from the drive slot.	Store RMD in a safe place.
11 ☐	Repeat step 8 until the standby location is IS-NR in step 9	
12 ☐	Force a switchover by issuing initialize-card command.	**init-card:loc=*YYYY*** **Where *YYYY* is the active MASP location recorded in step 9.**
13 ☐	Issue the command to log in to the system.	**login:uid=*XXXXXX*** (Where *XXXXXX* is a valid login ID)
15 ☐	Response to login command is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y User logged in on terminal X
16 ☐	Issue the command to initialize both MASP cards.	**init-card:appl=oam**
17 ☐ ☐	Response to initialize command is displayed. Ensure that the release shown in the banner is the source release after the MASP becomes active again.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y * 0261.0013 * CARD 111X OAMHC Card is isolated from the system ASSY SN: xxxxxxxx ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y 5001.0009 CARD 111X OAMHC MASP became active ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y 5038.0014 CARD XXXX OAMHC Card is present ASSY SN: xxxxxxxx ;
18 ☐	Continue to procedure C if directed by the My Oracle Support. Otherwise verify the system with the EAGLE health check [1]. [13]	

[12] The Standby MASP may report IS-ANR (and the Standby TDM may report 00S-MT|Isolated.) If so, check LEDs on the card.

[13] Command REPT-STAT-GPL:DISPLAY=ALL can be used to verify this step.

6.4 Recovery Procedure B

Procedure 30: Full Fallback using Spare E5-MASP

S T E P #	Perform the recovery procedure if directed to do so by My Oracle Support when failure occurs in Procedure 8, Step 1, Item C throughProcedure 10. This procedure is a full fallback to the source-release on the spare E5-MASP. NOTE: If the source release is 46.5 or prior, perform this procedure only when the MASPs are running the BLMCAP flash image. Otherwise Procedures 30 - 34 must be performed before this procedure. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**
	When directed to by My Oracle Support, execute this procedure.

1 ☐	If upgrade using the fixed disk method, use Procedure 31.	Only perform this procedure if directed by My Oracle Support.	
2 ☐	Issue the report card status command.	`rept-stat-card:appl=oam`	

3 ☐ ☐	Response to the card status command is displayed.
	
	Determine MASP activity. Record which MASP is Active and Standby.
	
	Record the card locations of both sets of MASPs:
	
	Act MASP _____
	
	Stby MASP _____
	
	For this sample output, 1113 is active and 1115 is standby.
		`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y`
		`CARD VERSION TYPE GPL PST SST AST`
		`1113 XXX-XXX-XXX E5MCAP OAMHC IS-NR Active -----`
		`1115 XXX-XXX-XXX E5MCAP OAMHC IS-NR Standby -----`
		`;`	

4 ☐	Remove USB drive from system if present.		
5 ☐	Place spare E5-MASP in system.	☐	Slide the MASP H/S switch (SW3) on the standby MASP up to the unlocked position (Wait for all drive LEDs to transition to a steady blue).
		☐	Remove the standby E5-MASP card determined in step 2.
		☐	Insert the spare E5-MASP card.
		☐	Slide the MASP H/S switch (SW3) on the new standby MASP down to the locked position (Wait for the MASP H/S LED to transition from blinking blue to off and the MASP to come up in standby mode). Note: UAMs are generated during this step. An audible alarm is generated. Wait for the new standby E5-MASP to come up in standby mode and system returns to duplex mode.
6 ☐	Insert the source-release media into the system.	A source-release USB drive in the active E5-MASP. Once inserted, allow time for the source-release RMD to be detected by the system	

Procedure 30: Full Fallback using Spare E5-MASP

7 ☐	After the standby MASP is available, issue the command to initialize the *active* MASP.	`init-card:loc=XXXX` (Where ***XXXX*** is the location of the ACTIVE MASP slot)

8 ☐	Response to command is displayed.	`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`init-card:loc=XXXX`
		`Command entered at terminal #10.`
		`;`
		`eaglestp 99-01-02 08:28:34 EST Rel XX.x.x-XX.x.x`
		`*  0261.0013  * CARD XXXX OAMHC  Card is isolated from the system`
		`ASSY SN: xxxxxxxx`
		`;`
		`5038.0014  CARD XXXX OAMHC  Card is present`
		`ASSY SN: xxxxxxxx`
		`;`

9 ☐	Issue the command to log in to the system.	`login:uid=XXXXXX` (Where *XXXXXX* is a valid login ID)
10 ☐	Response to login command is displayed.	`eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y` `User logged in on terminal X`
11 ☐	Inhibit the standby MASP.	`INH-CARD:LOC=XXXX` (Where *XXXX* is location of standby MASP)

12 ☐	Response to the command is displayed.	`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`Card has been inhibited.`
		`;`
		
		`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`Command Completed.`
		`;`

13 ☐	Put the E5-MASP system in simplex mode.	☐ Slide the MASP H/S switch (SW3) on the standby MASP up to the unlocked position (Wait for all drive LEDs to transition to a steady blue). ☐ Init-card:loc=XXXX (Where XXXX is the location of the ACTIVE MASP slot) ☐ Wait for the active OAM to return to service and enter simplex mode.
14 ☐	Issue the retrieve GPL command to verify source-release GPLs.	`rtrv-gpl`

15 ☐ ☐	Response to the retrieve command is displayed.
	
	Verify that the GPL versions in REMOVE TRIAL column and RELEASE column match those in Section 1.3 for "Source- Release GPLs."
	
	Example here has location 1114 as the Active MASP slot.
		`eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y`
		`GPL Auditing  OFF`
		
		`APPL  CARD  RELEASE  APPROVED  TRIAL  REMOVE TRIAL`

    Command Completed.
;
```

☐ Verify that the GPL versions that are displayed in the "VERSION" column are correct; see Section 1.3.

☐ Record the location of the Standby MASP:

MASP _____

44 ☐ Inhibit the standby MASP.

inh-card:loc=*XXXX*

(Where *XXXX* is location of standby MASP)

45 ☐ Response to the command is displayed.

```
    eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y
    Card has been inhibited.
;
    eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y
    Command Completed.
;
```

46 ☐ Replace the standby E5-MASP with the E5-MASP removed in step 5.

☐ Slide the MASP H/S switch (SW3) on the standby MASP up to the unlocked position (Wait for all drive LEDs to transition to a steady blue).

☐ Remove the standby E5-MASP card.

☐ Insert the spare E5-MASP card.

☐ Slide the MASP H/S switch (SW3) on the new standby MASP down to the locked position (Wait for the MASP H/S LED to transition from blinking blue to off and the MASP to come up in standby mode).

Note: UAMs are generated during this step. An audible alarm is generated.
Wait for the new standby E5-MASP to come up in standby mode and system returns to duplex mode.

Procedure 30: Full Fallback using Spare E5-MASP

47 ☐	Insert the source-release media into the system.	Insert an USB drive in the standby E5-MCAPs. Once inserted, allow time for the source-release RMD to be detected by the system
48 ☐	Repeat steps 23 - 41.	After completing Step 41 the second time, continue to Step 49.
49 ☐	If steps 18 & 19 were executed, issue the command to turn the measurements collection on.	`chg-meas:collect=on`

50 ☐	Response to change measurement command is displayed.	`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y`
		`chg-meas:collect=on`
		`Command entered at terminal #10.`
		`;`
		
		`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y`
		`CHG-MEAS: MASP A - COMPLTD`
		`;`

51 ☐	Execute Procedure 28.	
52 ☐	If this completes the recovery as directed by My Oracle Support, verify the system with the EAGLE health check [1]. Otherwise continue with Recovery Procedure C	**If failure occurred prior to entering Phase 3, recovery is complete.**

Procedure 31: Full Fallback using Fixed Disk as OAM conversion workspace – Case 1

S T E P #	Perform the recovery procedure if directed to do so by My Oracle Support when failure occurs in Procedure 6 through Procedure 8, Step 1. Note, this procedure is done in lieu of Procedure 18 for the case where a removable disk was NOT used as the workspace for the OAM conversion. NOTE: If the source release is 46.5 or prior, perform this procedure only when the MASPs are running the BLMCAP flash image. Otherwise Procedures 30 - 34 must be performed before this procedure. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**
	When directed to by My Oracle Support, execute this procedure: If failure occurred between Procedure 6 and Procedure 8, Step 1, Table 18, Item E.

1 ☐	Only perform this procedure if directed by My Oracle Support.	
2 ☐	If present, remove the target-release media from the system.	
3 ☐	Issue the command to initialize both MASP cards.	`init-card:appl=oam`

4 ☐	Response to initialize command is displayed.	`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`* 0261.0013 * CARD 111X OAMHC Card is isolated from the system`
		`ASSY SN: xxxxxxxx`
		`;`

☐	Ensure that the release shown in the banner is the source release after the MASP becomes active again.	`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y`
		`5001.0009 CARD 111X OAMHC MASP became active`
		`;`
		`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y`
		`5038.0014 CARD XXXX OAMHC Card is present`
		`ASSY SN: xxxxxxxx`
		`;`

5 ☐	**Execute Procedure 28.**	

Procedure 32: Full Fallback using Fixed Disk as OAM conversion workspace – Case 2

S T E P #	Perform the recovery procedure if directed to do so by My Oracle Support when failure occurs in Procedure 8, Step 1, Item F through Item I. This procedure makes the partition with the source GPLs active on the Standby TDM. NOTE: If the source release is 46.5 or prior, perform this procedure only when the MASPs are running the BLMCAP flash image. Otherwise Procedures 30 - 34 must be performed before this procedure. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**
	When directed to by My Oracle Support, execute this procedure: If failure occurred between Procedure 8, Step 1, Table 18, Item F and Procedure 8, Step 1, Table 18, Item I.

1 ☐	Remove USB drive from system if present.	
2 ☐	Issue the command to display database status during upgrades.	`act-upgrade:action=dbstatus`

3 ☐	Response to the command is displayed.
	
	Look at the status field and determine the loc of the TDM marked "UPG 2".
		`eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Upg Phase X`

Procedure 33: Full Fallback using Fixed Disk as OAM conversion workspace – Case 3

S T E P #	Perform this recovery procedure if directed to do so by My Oracle Support when failure occurred between Procedure 8, Step 1, Table 18, Item J and Procedure 14 [End of Session 1] This procedure makes the partition with the source GPLs active on both TDMs. NOTE: If the database level in the target release is different from the last database level of the source release, this procedure CANNOT BE USED; contact My Oracle Support. NOTE: If the source release is 46.5 or prior, perform this procedure only when the MASPs are running the BLMCAP flash image. Otherwise Procedures 30 - 34 must be performed before this procedure. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**
	When directed to by My Oracle Support, execute this procedure: If failure occurred between Procedure 8, Step 1, Table 18, Item J and Procedure 10 [End of Session 1].

1 ☐	***** ATTENTION ***** **If this is an incremental upgrade (i.e. the SOURCE release equals the TARGET release, go to Procedure 4, Step 1**. ************************	Complete all steps from Procedure 4 to the end of Session 1 (Procedure 10). Note: When executing Procedure 4 through Procedure 10 in the recovery scenario, the terminology of source and target are reversed. Target release becomes the software load that is being recovered to (45.0.0) and the source release becomes the software load that was upgraded to (45.0.1).
2 ☐	Remove USB drive from system if present.	
3 ☐	Issue the command to display active/inactive disk partitions.	**send-msg:ds=1:da=h'5d:f=h'47:loc=*YYYY*** **(Where *YYYY* is location of active MASP)**

32 ☐	Response to the command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Card has been allowed. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ;
33 ☐	Determine the status of the GPLs running on the card location.	**rept-stat-gpl:loc=*XXXX*** (**Where *XXXX* is the location for the Standby MASP**.)
34 ☐ ☐	Response from the retrieve command is displayed. Verify that the both MASP are running the upgrade source release GPLs. Verify that no "ALM" indicator is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RUNNING APPROVED TRIAL OAMHC69 *XXXX* XXX-XXX-XXX ---------- ---------- BLDC32 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX Command Completed. ;
35 ☐	Insert the Rollback source release GPL media into the active MASP.	Once inserted, allow time for the Rollback source-release GPL RMD to be detected by the system.
36 ☐	Issue the command to retrieve OAMHC69 application data.	**rtrv-gpl:gpl=oamhc69**
37 ☐	Response to rtrv-gpl command is displayed. Record the "REMOVE TRIAL" version: _____	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RELEASE APPROVED TRIAL REMOVE TRIAL OAMHC69 1114 **xxx-xxx-xxx** xxx-xxx-xxx yyy-yyy-yyy ------- OAMHC69 1116 **xxx-xxx-xxx** xxx-xxx-xxx yyy-yyy-yyy **xxx-xxx-xxx** ;
38 ☐	Issue the command to change the gpl.	**chg-gpl:gpl=oamhc69:ver=xxx-xxx-xxx** (Where xxx-xxx-xxx is the GPL version recorded in the previous step)
39 ☐	Response to chg-gpl command is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y OAMHC69 upload to 1116 completed OAMHC69 upload to 1114 completed System Release ID table upload to 1116 completed System Release ID table upload to 1114 completed ;
40 ☐	Issue the command to initialize both MASP cards.	**init-card:appl=oam**
41 ☐	Issue the command to log in to the system.	**Login:uid=xxxxxx** (Where XXXXXX is a valid login ID)
42 ☐	Issue the report card status command.	**rept-stat-card:appl=oam**

Procedure 33: Full Fallback using Fixed Disk as OAM conversion workspace – Case 3

43 ☐	Response to the card status command is displayed. Record which MASP is Active and Standby. Record the card locations of the MASPs: Act MASP _____ Stby MASP _____[16]	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1113 XXX-XXX-XXX E5MCAP OAMHC69 IS-NR Active ----- 1115 XXX-XXX-XXX E5MCAP OAMHC69 IS-NR Standby ----- Command Completed. ;
44 ☐	Remove the Rollback source release GPL media from the active MASP.	**Store RMD in a safe place.**
45 ☐	Wait for DUPLEX mode and repeat step 42 until the standby location is IS-NR in step 43.	
46 ☐	Issue the upgrade activation command.	**ACT-UPGRADE:ACTION=CONVERTSTP:SRC=FIXED**
47 ☐	Load standard TOAMHC69 GPL. Insert Source release media into the active MASP. **Note**: Insert backup USB into PC and rename source release rollback patch GPL OAMHC69.elf to TOAMHC69.elf, and then insert the backup USB into Active MASP card.	Once inserted, allow time for the Rollback source-release GPL RMD to be detected by the system.
48 ☐	Issue the command to retrieve OAMHC69 application data.	**rtrv-gpl:gpl=oamhc69**
49 ☐ ☐	Response to rtrv-gpl command is displayed. Record the "REMOVE TRIAL" version: _____	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y GPL Auditing ON GPL CARD RELEASE APPROVED TRIAL REMOVE TRIAL OAMHC69 1114 **xxx-xxx-xxx** xxx-xxx-xxx yyy-yyy-yyy ------- OAMHC69 1116 **xxx-xxx-xxx** xxx-xxx-xxx yyy-yyy-yyy **xxx-xxx-xxx** ;
50 ☐	Issue the command to change the gpl.	**chg-gpl:gpl=oamhc69:ver=xxx-xxx-xxx** (where xxx-xxx-xxx is the standard source GPL version)
51 ☐	Verify patch GPL is in APPROVED column	**RTRV-GPL:GPL=OAMHC69**
52 ☐	Response to chg-gpl command is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y OAMHC69 upload to 1116 completed OAMHC69 upload to 1114 completed System Release ID table upload to 1116 completed System Release ID table upload to 1114 completed ;

Procedure 33: Full Fallback using Fixed Disk as OAM conversion workspace – Case 3

53 ☐	Issue the command to initialize both MASP cards.	`init-card:appl=oam`
53 ☐	Issue the command to log in to the system.	`Login:uid=xxxxxx` (Where XXXXXX is a valid login ID)
54 ☐	Issue the report card status command.	`rept-stat-card:appl=oam`
55 ☐ ☐	Response from the retrieve command is displayed. Verify that the both MASP are running the upgrade source release GPLs. Verify that no "ALM" indicator is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1113 XXX-XXX-XXX E5MCAP OAMHC69 IS-NR Active ----- 1115 XXX-XXX-XXX E5MCAP OAMHC69 IS-NR Standby ----- Command Completed. ;
56 ☐	Continue to procedure C if directed by the My Oracle Support. Otherwise, verify the system with the EAGLE health check[17]	

[17] Command REPT-STAT-GPL:DISPLAY=ALL can be used to verify this step.

6.5 Recovery Procedure C

Procedure 34: Fall Back Procedure for Network Cards

STEP #		
	This procedure captures the card and link status data required when performing a manual fallback of the network cards back to the source-release GPLs.	
1 ☐	Issue the command to report card status.	`rept-stat-card`
2 ☐	Response to the card status command is displayed. Record all network card applications present for future reference within the procedure. X`	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1101 XXX-XXX-XXX DSM SCCPHC IS-NR Active ----- 1102 XXX-XXX-XXX DCM IPLHC IS-NR Active ----- 1103 XXX-XXX-XXX TSM GLSHC IS-NR Fault ----- 1105 XXX-XXX-XXX DCM IPGHC IS-NR Active ----- 1109 XXX-XXX-XXX HIPR HIPR IS-NR Active ----- 1110 XXX-XXX-XXX HIPR HIPR IS-NR Active ----- 1111 XXX-XXX-XXX MCPM MCPHC IS-ANR Active ----- 1113 XXX-XXX-XXX E5MCAP OAMHC IS-NR Active ----- 1114 ---------- E5TDM ------- IS-NR Active ----- 1115 XXX-XXX-XXX E5MCAP OAMHC IS-NR Standby ----- 1116 ---------- E5TDM ------- IS-NR Active ----- 1117 ---------- E5MDAL ------- IS-NR Active ----- 1201 XXX-XXX-XXX LIMT1 SS7HC IS-NR Active ----- 1202 XXX-XXX-XXX LIMT1 SS7HC IS-NR Active ----- 1209 XXX-XXX-XXX HIPR2 HIPR2 IS-NR Active ----- 1210 XXX-XXX-XXX HIPR2 HIPR2 IS-NR Active ----- 1211 XXX-XXX-XXX DCM IPGHC IS-NR Active ----- 1217 XXX-XXX-XXX TSM GLSHC IS-NR Active ----- 1218 XXX-XXX-XXX IPSM IPSHC IS-NR Active ----- Command Completed. ;
3 ☐	Issue the card status command.	`rept-stat-card:appl=mcp`
4 ☐	Response to the card status command is displayed. If any MCPM cards are displayed, continue to next step. Otherwise, go to Step 7.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1111 134-064-000 MCPM MCPHC IS-NR Active ----- 1112 134-064-000 MCPM MCPHC IS-NR Active ----- Command Completed. ;
5 ☐	Issue the send message command. Repeat for each MCPM card.	**NOTE: This command causes the MCPM card to boot with an OBIT indicating a "USER INITIATED COLD RESTART". All Measurements data not sent to an FTP server is lost. Waiting for the next scheduled Measurement FTP transfer and use of the rept-ftp-meas command to save desired measurements can minimize these losses before proceeding with this step.** `send-msg:ds=8:da=h'17:f=22:loc=`*XXXX* **(Where *XXXX* is location of the MCPM cards display in previous step.)**
6 ☐	Response to the send message command is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y System Buffer sent has following attributes : Msg Length = H'0010 Dest Card = H'00f7 Orig Subsys = H'0001 Dest Subsys = H'0001 Orig Appl ID = H'004d Dest Appl ID = H'001d Func ID = H'0016 Bus/Ret/Sut = H'0002 Violation Ind = H'0000 User Message sent to location XXXX. Command Completed. ;

Procedure 34: Fall Back Procedure for Network Cards

7 ☐	Issue the upgrade activation command.	If the threshold type is set to SET in Procedure 7, Step 4 and the source release is 46.0 or higher, issue the following command: **ACT-UPGRADE:ACTION=CONVERTSTP:SRC=FIXED** Otherwise, issue the following command: **ACT-UPGRADE:ACTION=CONVERTSTP:SRC=FIXED:THRES=75** (If another thres value is to be used see recommendation #5 in section 1.6)
8 ☐ ☐	Response to the upgrade command is displayed. Completion notice of successful upgrade. If upgrade does not complete successfully, see recommendation # 7 in section 1.6	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase 3 Hardware Validation Test Started [ASM Obsolescence Test for all applications.] [DSM Obsolescence Test for MCP application.] Hardware Validation Test Completed Successfully. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase 3 Starting network conversion... ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase 3 Upgrading MUX card 1109 ; Output continues until the following is displayed: eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase 3 Command Complete : Upgrade action completed successfully ;
9 ☐	Go to Procedure 8, Step 7.	Complete all steps from Procedure 8, Step 7 to the end of Procedure 8. Then perform Procedure 14 to complete the roll-back.

7. Procedures for cards that failed to complete successful flash during the database conversion

Procedure 35: Restoring Flash-Based Service Cards

S T E P #	This procedure restores Service Cards that are flash based. This group includes IPSHC, MCPHC, DEIRHC[18], ENUMHC, SCCPHCand SIPHC cards. This procedure updates service cards that may have failed during the execution of the upgrade script to the target release GPL's.	
1 ☐	Issue the command to display the GPL status.	**rept-stat-gpl:gpl=*YYYY*** (Where ***YYYY*** is one of the Flash-Based service card types listed above.)
2 ☐	Response to the command is displayed. Record the CARD locations for all cards that have alarms:	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y rept-stat-gpl:gpl=YYYY Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y GPL Auditing ON APPL CARD RUNNING APPROVED TRIAL YYYYY 1101 XXX-XXX-XXX ALM XXX-XXX-XXX XXX-XXX-XXX YYYYY 1103 XXX-XXX-XXX ALM XXX-XXX-XXX XXX-XXX-XXX Command Completed. ;
3 ☐	Issue the command to inhibit the card if the card is provisioned.	**inh-card:loc=*XXXX*** (Where ***XXXX*** is the card location of the cards determined in Step 2)
4 ☐	Response to the inhibit command is displayed. Wait for the "Command completed" response before proceeding.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Card has been inhibited. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ;
5 ☐	Issue the command to initialize the flash memory.	**flash-card:code=appr:force=yes:loc=*XXXX*** NOTE: this command causes the card to boot.
6 ☐ ☐	Response to the flash card command is displayed. Wait for command complete to indicate that the card is finished loading before proceeding.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y flash-card:code=appr:force=yes:loc=XXXX Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ;
7 ☐	Issue the command to allow the card[19] if the card is provisioned.	**alw-card:loc=*XXXX*** (Where ***XXXX*** is the card location of the cards determined in Step2) OR **alw-card:loc=*XXXX*:data=persist** (Where *XXXX* is the location of an SCCP card determined in Step2)

[18] EAGLE 47.0 does not support DEIR.

[19] Specifying the DATA=PERSIST parameter for SCCP application cards allows for warm restart if possible.

Procedure 35: Restoring Flash-Based Service Cards

8 ☐

Response to the allow command is displayed.[20]

Wait for the card to finish loading before proceeding (approximately 30 seconds).

```
    eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y
    alw-card:loc=1201
    Command entered at terminal #10.
;
    eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y
    Card has been allowed.
;
    eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y
    Command Completed.
;
```

9 ☐

Repeat Steps 3 – 8 for each card in the current group that has an alarm.

10 ☐

Repeat steps 1-9 for each group of cards (VSCCP, ISP, MCP, EROUTE, SCCPHC, IPSHC, ERTHC, and SIPHC)

11 ☐

Issue the command to display the card status.

```
rept-stat-card
```

12 ☐

Response to the command is displayed.

☐

Verify that all Flash-Based Service cards are IS-NR and are running the Source-Release GPL versions, as per your reference list of GPLs

☐

For any such card that is not IS-NR or running the correct GPL, repeat Steps 3-4.

```
    eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y
    rept-stat-card
    Command entered at terminal #10.
;
    eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y
    CARD   VERSION      TYPE      GPL        PST            SST        AST
    1101   XXX-XXX-XXX  DSM       VSCCP      IS-NR          Active     -----

```

☐

Verify that all Flash-Based Link cards are IS-NR and are running the Source-Release GPL versions, as per your reference list of GPLs

☐

For any card that is not IS-NR or running the correct GPL, repeat Steps 3-8.

Procedure 37: Restoring Mux Cards

S T E P #	This procedure updates each card with the source release GPLs. Mux cards include HIPR, and HIPR2 cards, which run HIPR, and HIPR2 GPLs respectively.
1 ☐	Issue the card status command to identify the MUX cards in the system.	**rept-stat-gpl:gpl=*YYYY*** (Where ***YYYY*** is one of the Flash-Based Mux card types listed above.)
2 ☐	Response to the command is displayed. Record the CARD locations for all cards in the system: _____ _____ _____ _____ _____ _____ _____	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y rept-stat-gpl:gpl=YYYY Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y GPL Auditing ON APPL CARD RUNNING APPROVED TRIAL YYYY XX09 XXX-XXX-XXX ALM XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX09 XXX-XXX-XXX ALM XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX09 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX09 XXX-XXX-XXX ALM XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX Command Completed. ;
3 ☐	Enter the command to initialize the FLASH on the next Mux card on the current bus.	**init-flash:loc=*XXZZ*:code=appr** (Where *XX* = is a shelf number and, *ZZ* depends on which bus is being flashed. 09 is bus A; 10 is bus B.)
4 ☐	Response to the flash initialization is shown.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y init-flash:loc=XX09:code=appr Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Memory Download for card XXZZ Started. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Memory Download for card XXZZ Completed. ;
5 ☐	Repeat steps 1-4 for each Mux card type on the current bus.	**NOTE**: Steps 1-4 must be performed for all MUX card types on one bus before performing these steps for any MUX card types on the other bus.
6 ☐	Enter the command to initialize the current bus.	**init-mux:bus=*x*[21]** (Where *x* = A or B, depending on current bus: xx09 is bus A; xx10 is bus B.)
7 ☐	Response to the initialization command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y init-mux:bus=a Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y 5080.0014 CARD XXZZ YYYY Card is present ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y 5081.0014 CARD XXZZ YYYY Card is present ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y * 5082.0004 * GPL SYSTEM YYYY Card is running non-activated GPL

[21] Warning: Do not use the FORCE= parameter. Use of this parameter may result in network outage. Analysis of the alternate bus is required.

Procedure 37: Restoring Mux Cards

8 ☐	Issue the command to activate the flash on the next MUX card on the current bus.	**act-flash:loc=*XXZZ*** (Where *XX* = is a shelf number and, *ZZ* depends on which bus is being flashed. 09 is bus A; 10 is bus B.)
9 ☐	Response to the activate command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y act-flash:loc=XXZZ Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Memory Activation for card XXZZ Started. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y FLASH Activation for card XXZZ Completed. ;
10 ☐	Repeat steps 8-9 for each MUX card on the current bus (A or B.)	
11 ☐	Repeat steps 3-10 for the second bus (A or B.)	
12 ☐	Issue the command to display the MUX card GPL status.	**rept-stat-gpl:gpl=**YYYY (Where ***YYYY*** is hipr for HIPR cards, or hipr2 for HIPR2 cards.)
13 ☐	Verify that all MUX card types are running the approved GPL.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y rept-stat-gpl:gpl=Y Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y GPL Auditing ON APPL CARD RUNNING APPROVED TRIAL YYYY XX09 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX09 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX09 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX09 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX YYYY XX10 XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX Command Completed. ;
14 ☐	Repeat steps 12-13 for all MUX card types.	

APPENDIX A. UPGRADING FLASH-BASED GPL ON NON-IN-SERVICE AND UNPROVISIONED NETWORK CARDS

Procedure 38: Flashing Inactive Cards

S T E P #	This procedure determines any BLIXP, BLMCAP, BLDC64, BLSLC32, or BLSLC64 cards that are inhibited, and updates each card with its target release GPLs. (See section 1.3 for complete list of flash GPLs.)	
1 ☐	Issue the command to display the GPL status.	**rept-stat-gpl:gpl=*XXXX*** (Where ***XXXX*** is the GPL listed in the header of the procedure,)
2 ☐ ☐	Response to the command is displayed. Record any card which shows an alarm: _____ _____ _____	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y rept-stat-gpl:gpl=xxxx Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y GPL Auditing ON APPL CARD RUNNING APPROVED TRIAL XXXXXX 1101 xxx-xxx-xxx xxx-xxx-xxx xxx-xxx-xxx XXXXXX 1103 xxx-xxx-xxx xxx-xxx-xxx xxx-xxx-xxx XXXXXX 1111 xxx-xxx-xxx ALM xxx-xxx-xxx xxx-xxx-xxx Command Completed. ;
3 ☐	Issue the status command for specific card	**rept-stat-card:loc=*XXXX*** (Where ***XXXX*** is the card location recorded in the previous step.)
4 ☐	Response to the command is displayed. If the PST for the card is OOS-MT-DSBLD or the command is rejected with MTT error E2144[22], go to step 7.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y CARD VERSION TYPE APPL PST SST AST 1111 ---------- DSM VSCCP OOS-MT-DSBLD Manual --- ALARM STATUS = No Alarms. BPDCM GPL version = 002-115-000 IMT BUS A = ----- IMT BUS B = ----- SCCP % OCCUP = 0% Command Completed.
5 ☐	Issue the command to inhibit card.	**inh-card:loc=*XXXX***
6 ☐	Response to the command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Card has been inhibited. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ;
7 ☐	Issue the command to flash all GPLs on the card.	**flash-card:code=appr:loc=*XXXX*** **NOTE**: this command causes the card to boot.
8 ☐	Response to the flash command is displayed. Wait for the card to finish loading before proceeding.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y flash-card:code=appr:loc=XXXX Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Command Completed. ;

[22] E2144 Cmd Rej: Location invalid for hardware configuration

Procedure 38: Flashing Inactive Cards

9 ☐	If steps 5 & 6 were executed, issue the command to allow card.	`alw-card:loc=XXXX`

10 ☐	Response to the command is displayed.	`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`Card has been allowed.`
		`;`
		
		`eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y`
		`Command Completed.`
		`;`

11 ☐	Repeat Steps 3 – 10 for all cards recorded in step 2.	
12 ☐	Repeat Steps 1 – 11 for each group of Flash-Based cards (see section 1.3.)	

Procedure 39: Flashing the E5-MASP to BLDC32 for Release 47.0.0.0

STEP #	**These steps must be performed before building the E5-MASP SSD media to the Release that is on the Sales Order . This procedure flashes the E5-MASP to BLDC32 for Release 47.0.0.x.** Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Install the Customer E5-MASP	Install the Customer E5-MASP in location 1113/1114 or 1115/1116 and verify that the initialization is successful.
2 ☐	System Log In	Make sure the Terminal Interface cable has been installed on J25 (MMI 1) on the Control Shelf and is terminated into the COM port on a PC. Launch the ProComm terminal emulation program from the PC. Make sure the baud rate is set to 9600; the parity-databits-stopbit is set to E-7-1, and the direct connect-Com1 is selected. Download the vt320.kbd file using the Keyboard Editor under the Options tab in ProComm. When the system is powered up, the Terminal display should indicate that Terminal 2 is enabled. Log in to the system by clicking on the login button located at the bottom of the ProComm screen, or by entering the command: `login:uid=eagle password: eagle` The user will be prompted to enter a new password. Enter the new password syst3m**9 and press Enter. The user will be prompted to verify the new password. Re-enter the new password syst3m**9 and press Enter. Verify that a successful login was executed. Set up terminal access using the following commands: • Issue the command chg-secu-trm:trm=1:all=yes • Issue the command logout to log out of Terminal 2. • Move the serial cable on the backplane to Terminal 1. • Log in using the new password (syst3m**9)

Procedure 39: Flashing the E5-MASP to BLDC32 for Release 47.0.0.0

3 ☐	Identify the Standby E5-MASP	Issue the command **rept-stat-db <Enter>** to identify the Standby E5-MASP
		
		`tekelecstp 19-01-16 12:03:36 EST  EAGLE 46.7.0.0.0-75.27.0`
		`DATABASE STATUS: >> OK <<`
		`TDM 1114 ( STDBY)  TDM 1116 ( ACTV )`
		`C  LEVEL  TIME LAST BACKUP  C  LEVEL  TIME LAST BACKUP`

4 ☐	Flash the Customer E5-MASP to GPL BLDC32 using these commands:	• Issue the command **inh-card:loc=xxxx <Enter>** xxxx is the slot location in the Eagle Control Shelf for the Standby E5-MASP. If TDM (1114) is the Standby E5-MASP, inhibit loc=1113. If TDM (1116) is the Standby E5-MASP, inhibit loc=1115. Standby E5-MASP is inhibited. • Issue the command **init-flash:loc=xxxx: mode=rplcebl:bits=32** BOOTLOADER change request sent to card xxxx. BOOTLOADER change for card xxxx SUCCESSFUL. • Issue the command **init-flash:loc=xxxx:code=appr:gpl=bldc32 <Enter>** Flash memory download for card xxxx completed. E5-MASP will reboot when the flash download has completed. The card will reboot to load the new Approved GPL version • After card has rebooted, issue the command **act-flash:loc=xxxx <Enter>** Flash Activation for card xxxx completed. Issue the command **rept-stat-gpl:loc=xxxx <Enter>** and verify card is flashed to version 140-033-000. tekelecstp 22-11-08 15:41:56 EST EAGLE 46.5.0.0.0-70.37.1 GPL CARD RUNNING APPROVED TRIAL bldc32 xxxx 140-033-000 140-033-000 140-033-000 The Running GPL version is the same as the Approved GPL version, and there is no ALM or + indication displayed on the Standby E5-MASP.
5 ☐	Initialize the Standby E5-MASP	Enter the command **alw-card:loc=xxxx** to initialize the Standby E5-MASP. The Standby E5-MASP will initialize and no longer be inhibited. Card has been allowed.

6 ☐	Identify the ACTIVE E5-MASP.	Issue the command **rept-stat-db <Enter>** to identify the ACTIVE E5-MASP.
		
		`tekelecstp 19-01-16 12:03:36 EST  EAGLE 46.7.0.0.0-75.27.0`
		`DATABASE STATUS: >> OK <<`
		`TDM 1114 ( STDBY)  TDM 1116 ( ACTV )`
		`C  LEVEL  TIME LAST BACKUP  C  LEVEL  TIME LAST BACKUP`

Procedure 39: Flashing the E5-MASP to BLDC32 for Release 47.0.0.0

7 ☐		Enter the command `init-card:loc=xxxx.` xxxx is now the location of the Active E5-MASP. The Active E5-MASP will reboot and the Standby E5-MASP will now become the Active E5-MASP.
8 ☐	Log in to the new Active E5-MASP.	Use login:uid=eagle, password = syst3m**9.
9 ☐		Repeat Step 4 to flash the E5-MASP to the Approved version of bldc32. Repeat Step 5 to initialize the E5-MASP. The Standby E5-MASP will initialize and no longer be inhibited. Both E5-MASPs should be flashed with BLDC32 GPL.
10 ☐		Unseat the Customer E5-MASP from slots 1113/1114 or 1115/1116.
11 ☐		Remove the SSD from each E5-MASP and install the SW release using the Media Builder.
12 ☐		Re-install the SSD on the E5-MASP and reseat the E5-MASP in slots 1113/1114 or 1115/1116. The E5-MASP will initialize and boot to the Recovery Console mode.
13 ☐		• Select Option #4 (FLASH BLDC32 FROM APPROVED TDM FIXED DISK) <Enter> to flash the E5-MASP. The E5-MASP will reboot to load the new flash image. When the E5-MASP reboots, it will switch over to the mate E5-MASP, which has booted to Recovery Console mode. • Select Option #4 (FLASH BLDC32 FROM APPROVED TDM FIXED DISK) <Enter> to flash the mate E5-MASP. The E5-MASP will reboot to load the new flash image. When the E5-MASP initializes, wait 12 minutes before logging in.
14 ☐	Login to the Customer E5-MASP	Login to the Customer E5-MASP using the following commands: uid=eagle – password = eagle Enter the new password – syst3m**9 Enter the new password again to confirm.
15 ☐	Set up terminal access.	Set up terminal access using the following commands: Issue the command `chg-secu-trm:trm=1:all=yes` Issue the command logout to log out of Terminal 2. Move the serial cable on the backplane to Terminal 1. Log in using the new password (syst3m**9)

Procedure 39: Flashing the E5-MASP to BLDC32 for Release 47.0.0.0

16 ☐	Activate the new flash	After login, issue the command **act-flash:loc=1115 <Enter>** to activate the new flash on the first E5-MASP. Issue the command **act-flash:loc=1113 <Enter>** to activate the flash on the second E5-MASP. Flash Activation for card xxxx completed.

17 ☐	Verify each E5-MASP is flashed to approved version	Issue the command **rept-stat-gpl:gpl=bldc32 <Enter>** and verify each E5-MASP is flashed to version 149-004-000.
		
		If both E5-MASPs are flashed to the Approved version, then flash process is complete.
		`tekelecstp 22-11-19 13:18:55 MST EAGLE 47.0.0.0.0-79.13.0`
		`GPL Auditing ON`
		`GPL CARD RUNNING APPROVED TRIAL`
		`BLDC32 1113 149-004-000 149-004-000 149-004-000`
		`BLDC32 1115 149-004-000 149-004-000 149-004-000`

APPENDIX B. PREPARATIONS FOR UPGRADE EXECUTION

B.1 Target Release Software Download

The following procedure is a reference for the commands that will download an EAGLE software release to the inactive partition group of the TDM from either a remote FTP server or from the thumb drive containing the upgrade target release for the E5-MASP.

The following items are required before the release can be downloaded to the EAGLE from a FTP server:

- E5-IPSM or E5-ENET-B card running IPS application defined, configured, and IS-NR
- DIST application FTP server provisioned

Procedure 40: Download Target Software Release and Create USB Upgrade Media

S T E P #	This procedure downloads the target software release and creates the USB upgrade media using a Windows PC. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	Using a PC running Windows 7 or later, download the target EAGLE Release from the Oracle Software Delivery Cloud (OSDC) to a local directory. Step 2 only needs to be executed if the target EAGLE Release is 47.0 or later.	• Go to http://edelivery.oracle.com • Sign In • Search for the target EAGLE software release • Accept the Oracle Standard Terms and Restrictions • Click on the link to the zip file for the target EAGLE software release • Save the zip file to a local directory, for example C:\Users\Admin\Desktop\uusb_media • Unzip the Vxxxxxx-01.zip file that was downloaded to the same local directory. • This will produce a <eagle target software release number>.exe file.
2	Using a PC running Windows 7 or later, download the rollback source release GPL from the Oracle Software Delivery Cloud (OSDC) to a local directory.	• Search for the Oracle Communications EAGLE Rollback Releases 4X.X.X.X.X download package • Accept the Oracle Standard Terms and Restrictions • Click on the link to the zip file for the rollback source release GPL • Save the zip file to a local directory, for example C:\Users\Admin\Desktop\uusb_media • Unzip the Vxxxxxx-01.zip file that was downloaded to the same local directory. • This will produce an oamhc69.elf file

Procedure 40: Download Target Software Release and Create USB Upgrade Media

3 ■	Open a command window as Administrator: on Window 7 go to Start -> All Programs -> Accessories, right click on 'Command Prompt' and select 'Run as Administrator'; on Windows 8/10, go to Start, type cmd.exe in the search box, right click on 'Command Prompt' and select 'Run as Administrator'; then Change Directory to the path of the local directory.	**C:\Users\Admin>cd Desktop/uusb_media** C:\Users\Admin\Desktop\uusb_media>
4 ■	Extract the downloaded release in the local directory by entering the name of the .exe file as seen in step 1 and verify that the directory contains the following files: The target release file 46.xx.xx.xx.xx-6X.yy.yy.tar.gz, uusb.clf, mkdosfs.exe, pvu.exe, uusb.exe.	**C:\Users\Admin\Desktop\uusb_media><eagle target software release number>** 7-Zip SFX 9.20 Copyright (c) 1999-2010 Igor Pavlov 2010-11-18 Processing archive: C:\Users\Admin\Desktop\uusb_media\46.3.0.0.0-68.12.0.e Extracting 46.3.0.0.0-68.12.0.tar.gz Extracting uusb.clf Extracting mkdosfs.exe Extracting pvu.exe Extracting uusb.exe Everything is Ok
5 ☐	If the target release is 46.3.0.0.0 or later and you need to create USB Upgrade Media, continue with the next step; otherwise stop.	
6 ☐	Insert EAGLE USB media into a PC USB port.	
7 ☐	Goto Start -> Computer and wait for USB drive to be detected. Note its drive letter.	

Procedure 40: Download Target Software Release and Create USB Upgrade Media

8 ☐	Enter uusb command with the release filename and drive of the USB media, where 46.xx.xx.xx.xx-68.yy.yy.tar.gz is the name of the release file in the directory from step 3 and E: is the USB media drive letter from above step 6.	C:\Users\Admin\Desktop\uusb_media>uusb.exe 46.xx.xx.xx.xx-68.yy.yy.tar.gz e: Copyright (c) 1993, 2014, Oracle and/or its affiliates. All rights reserved. 9 ☐	Close the Command window and directory folder, properly eject the USB media and remove it from the PC. The USB media is now ready to use for EAGLE upgrade. Steps 10-13 only need to be executed if the target release is EAGLE 47.0 or later.	
10 ☐	Prepare the EAGLE USB media to the source release.	Follow steps 1 to 19 of the Procedure 10 from the Upgrade Session 2 section.

Procedure 40: Download Target Software Release and Create USB Upgrade Media

11 ☐	Insert EAGLE USB media into a PC USB port.	
12 ☐	Go to Start > Computer and wait for the USB drive to be detected. Note its drive letter.	
13 ☐	Open a command window as Administrator.	1. On Windows 7, go to Start > All Programs > Accessories 2. Right click on Command Prompt and select Run as Administrator 3. On Windows 8 or 10, go to Start menu 4. Type cmd.exe in the search box 5. Right click on the Command Prompt and select Run as Administrator 6. Change Directory to the path used in step 2
14 ☐	Enter the copy command with the rollback release GPL filename and drive of the USB media, where oamhc69.elf is the name of the rollback release GPL file in the directory from step 2 and E: is the USB media drive letter from above step 12 and toamhc69.elf is the destination file name. Confirm that it is ok to overwrite existing file.	`C:\Users\Admin\Desktop\uusb_media\copy oamhc69.elf e:\toamhc69.elf` Press Y to overwrite existing file.
15 ☐	Close the Command window and directory folder, properly eject the USB media and remove it from the PC. The USB media is now ready to use for rollback to the target release should a rollback be required.	

Procedure 41: Download Target Release to Inactive Partition

S T E P #	This procedure downloads the target release to inactive partition of the TDMs. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Remove the thumb drives from the E5-MASPs.	
2 ☐	If downloading the upgrade target release from an FTP server, continue, otherwise go to step 5.	
3 ☐	Issue the command to display the status of the IPSM cards.	`rept-stat-card:appl=ips`

4 ☐
 	
☐
	Response from the command is displayed.
	
	Verify there is an IPSM card running the IPSHC gpl and that the card is IS-NR. If no such card present in the system this procedure cannot be executed.
		`eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y`
		`CARD  VERSION  TYPE  GPL  PST  SST  AST`
		`1101  XXX-XXX-XXX IPSM  IPSHC  IS-NR  Active  -----`
		`;`

5 ☐	Issue the command to display database status of both TDM partitions.	`act-upgrade:action=dbstatus`

Procedure 41: Download Target Release to Inactive Partition

6 ☐

Response to the command is displayed.

Record the card locations of the MASPs:

Act MASP _____

Stby MASP ____

☐ Verify if either of the inactive partitions has not been formatted. Mark below. Example shows that inactive partition of 1116 not formatted.

If a database LEVEL, VERSION or STATUS is displayed the inactive partition has been formatted.

☐ Disk formatted.

1114 _____

1116 _____

```
   eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase x

;
```

7 ☐

If either of the inactive partitions has not been formatted continue.
If the target release is 46.2 or higher, continue.
Otherwise go to Step 30.

8 ☐

Issue the command to retrieve measurement setup.

```
rtrv-meas-sched
```

9 ☐

Response to retrieve command is displayed.

Record if collection is on or off:

_____

☐ If COLLECT=ON, continue to next step. Otherwise, go to Step 12.

```
    eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y
    COLLECT        = off
    SYSTOT-STP     = (off)
    SYSTOT-TT      = (off)
    COMP-LNKSET    = (off)
    COMP-LINK      = (off)
    MTCD-STP       = (on)
    MTCD-LINK      = (on)
    MTCD-LNKSET    = (on)
;
```

10 ☐

Issue the command to turn off measurement collection.[23]

```
chg-meas:collect=off
```

11 ☐

Response to the change command is displayed.

☐

```
    eaglestp YY-MM-DD hh:mm:ss TTTT PPP  XX.x.x.x.x-YY.y.y
    CHG-MEAS: MASP A - COMPLTD
;
```

12 ☐

Issue the command to display security log status.

```
rept-stat-seculog
```

[23] If executed, this step causes the database level to increment.

Procedure 41: Download Target Release to Inactive Partition

13 ☐ ☐	Response to the command is displayed. If the ENTRIES column displays any value other than 0 for the Standby ROLE, proceed to the next step. Otherwise, go to step 20	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y rept-stat-seculog Command entered at terminal #10. ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y -- SINCE LAST UPLOAD -- OLDEST NEWEST LAST LOC ROLE ENTRIES %FULL OFLO FAIL RECORD RECORD UPLOAD 1114 Active 19 1 No No 99-01-01 99-01-01 00-00-00 13:43:37 14:08:12 00:00:00 1116 Standby 0 0 No No 99-01-01 99-01-01 99-01-01 13:39:39 13:43:10 14:07:59 ;
14 ☐	Issue the command to copy the security log from the standby disk.	**copy-seculog:slog=stb:dfile=upg.appB**
15 ☐ ☐	Response to the copy security log command is displayed. If this command fails, proceed to next step. Otherwise, go to Step 20.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Security log on TDM 111X copied to file upg.appB on TDM 111Y ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y 0468.0177 SECULOG 111X Security log exception cleared ;

B.2 Configuring Card-Set Network Conversion Method.

Procedure 42: Preparation for Upgrade to use the Card-Set Network Conversion Method.

S T E P #	This procedure provides the steps to configure the system to use the card-set method during the network conversion portion (Phase 3) of the upgrade. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	The system should be running the target release on MASPs of 46.0 or higher.	This procedure should be run AfterProcedure 30, Step 40 in E54339 OR Before Procedure 8 in this document.
2 ☐	Issue the card status command to verify the target release GPL is running.	`rept-stat-gpl:gpl=oamhc`

3 ☐
☐
	Response from the status command is displayed.
	
	Verify that the version of OAMHC GPL running is 46.0 or later.
		`eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x-YY.yy.y Upg Phase 0`
		`GPL Auditing ON`
		
		`APPL CARD RUNNING APPROVED TRIAL`
		`OAMHC 1113 XXX-XXX-XXX ALM YYY-YYY-YYY ----------` [24]
		`OAMHC 1115 XXX-XXX-XXX ALM YYY-YYY-YYY ----------`
		`Command Completed.`
		`;`

4 ☐	Issue the command to retrieve the upgrade configuration	`rtrv-upgrade-config`

5 ☐
☐
	Response to the retrieve command is displayed.
	
	If the Threshold Type has not already been changed to SET, it will be either GROUP or SYSTEM.
	
	If the SAK is not set, perform Appendix C.
	
	Note: GROUP is no longer valid option for Release 46.9 and later, SET is the only option.

18 ☐	Repeat steps 14 – 17 as cards need to be moved.	

APPENDIX C. ENTERING UPGRADE SOFTWARE ACCESS KEY

Procedure 43: Validate Upgrade Software Access Key

S T E P #	This procedure will validate the Upgrade Software Access Key against the upgrade target release. The Upgrade Software Access Key is used for releases 45.x and 46.0. It is no longer used for release 46.1 and later. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	If a USB drive is present, remove it.	**If server software delivery (SSD): no RMD should be inserted in drive slot.**
2 ☐	For release 45.x through 46.0, issue the command to validate the Upgrade Software Access Key.[26] Skip this command for releases 46.1 and later.	**chg-upgrade-config:sak=*XXXXXXXXXXXXX*:src=fixed** (Where XXXXXXXXXXXXX is the Software Access Key.)
3 ☐	Response to command is displayed.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y chg-upgrade-config:key=XXXXXXXXXXXXX:src=zzzzz Command entered at terminal #6. ;
☐	Verify the correct Upgrade target release is in the output.	eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Upgrade target: EAGLE XX.x.x.x.x-YY.y.y ; eaglestp YY-MM-DD hh:mm:ss TTTT PPP XX.x.x.x.x-YY.y.y Command Completed. ;

[26] If SAK unavailable, contact My Oracle Support.

APPENDIX D. SUPPLEMENTAL INFORMATION FOR PROCEDURE 8, STEP 2

D.1 Samples of message from convertstp action for act-upgrade command

The following are illustrative of the messages displayed on the user terminal during the semantic check of the upgrade command in Procedure 8, step 2. Headers have been removed for brevity.

```
    IMT Bus Check Started
    IMT Bus Check Completed Successfully.
;
    Hardware Validation Test Started
    Hardware Validation Test Completed Successfully.
;
    IP Route Conflict Validation Report
    No conflicts with Eagle PVN and FCN found
    End IP Route Conflict Validation Report.
;
    Using inactive standby partitions for OAM conversion (disk=xxxxx)
```

The following are illustrative of the messages to be seen on the console during Procedure 8, step 2 of the upgrade procedure if the **fixed disk** is used for OAM conversion workspace. Headers and messages not directly output by upgrade have been omitted.

```
    Using inactive standby partitions for OAM conversion (dest=fixed)

```

D.2 Determination and Recovery of DDL Hunt during Upgrade

NOTE: The following section should be completed with the assistance of My Oracle Support.

After loading its GPL and database tables, the last step required by an MTP card is to crossload its dynamic database (DDB) from adjacent cards. The DDB contains the status of all routes, linksets, and links provisioned in the system. The Dynamic Data Load (DDL) is the process where a loading MTP card obtains the current view of the network via downloading it from an already IS-NR network card. In order for a network card to download a proper view of the network status, the network must remain quiescent during the download. If an update to the DDB occurs, then the download aborts and restarts. Depending on the size of the network, it may take as long as 4 seconds to complete this process. Please note that the network must remain stable (no changes) during this phase for the download to complete successfully.

Note: After upgrade completion, the DB level must not be changed on the destination release. If the DB level is changed, then the MTP cards will not be able to crossload the DDB from other network cards because of the difference in the DB level and the cards get stuck in the DDL_HUNT state. This causes the rollback failures.

The card reports its PST as IS-ANR and its SST as DDL Hunt:

```
Card Failure: Card 1101 did not return to IS-NR.
Status of card 1101:  PST:  IS-ANR         SST:  DDL Hunt   AST:  -----
```

Please note this appendix addresses DDL during Upgrade. Refer to external reference [8] in section 1.2.1 for recovery in full function mode.

A system is considered unstable when provisioned and configured devices are cycling from an alarmed state to a clear state. Bouncing links, link congestion and discard, and DPC|Route transition have the most impact on the DDL Hunt state. Table 21 lists these conditions by UAM number and describes the recovery steps.

The guideline to determine if DDL Hunt is possible when a card boots and tries to reload is based on the number of DDB events, which causes network management messages to be generated. An event is one cycle of alarming and clearing:

```
1237.0236 ** SLK 1201,A1  tklclset   REPT-LKF: not aligned
1240.0200    SLK 1201,A1             RCVRY-LKF: link available
```

One event consists of two transactions, which generates two network management messages. Eight events in one minute causes sixteen messages which averages to a stability period of less than four seconds. This can range from eight events per one device to one event per eight devices.

Table 21. Recovery from DDL Hunt by UAM.

UAM	Device	Condition	Recovery
0236|0200	SLK	Bouncing Link	A) Issue DDB checksum SEND-MSG per internal Ref. [8] B) Issue CANC-SLK to deactivate the affected link
0264 – 0269	SLK	Link Congestion	A) Issue DDB checksum SEND-MSG per internal Ref. [8] B) Investigate the far-end and fix the far-end C) Issue CANC-SLK to deactivate the affected link
0270 – 0275	SLK	Link Discard	A) Issue DDB checksum SEND-MSG per internal Ref. [8] B) Investigate the far-end and fix the far-end C) Issue CANC-SLK to deactivate the affected link
0311 – 0313	Route	DPC Transition	A) Issue DDB checksum SEND-MSG per internal Ref. [8] B) Investigate the far-end and fix the far-end C) Issue CANC-SLK to deactivate the affected link
0314 – 0316	Route	Route Transition	A) Issue DDB checksum SEND-MSG per internal Ref. [8] B) Investigate the far-end and fix the far-end

			C) Issue CANC-SLK to deactivate the affected link

Note: If the front-end switches activity, device may return to previous state.

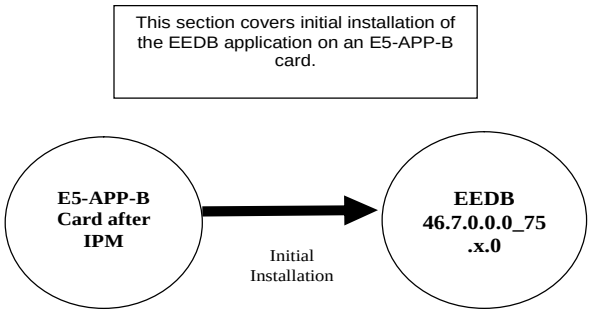
APPENDIX E. EEDB INSTALLATION

This section defines the step-by-step actions performed to execute EEDB software installation on **E5-APP-B-02**.

Figure 2: Initial EEDB Application Installation Path



E.1 Upgrade Overview

E.1.1 Required Materials

- Two (2) target-release USB media or a target-release ISO file.
- A terminal and null modem cable to establish a serial connection.
- Write down the system configuration information.

Table 22: EEDB System Configuration Information

Description	Information
Node A IP (IPv4)	
Node A NetMask (IPv4)	
Node A Default Router IP (IPv4)	
Node B IP (IPv4)	
Node B NetMask (IPv4)	
Node B Default Router IP (IPv4)	
NTP1 IP (IPv4)	
NTP2 IP (IPv4)	
NTP3 IP (IPv4)	
VIP	
Time Zone	

- Passwords for users on the local system:

Table 23. EEDB User Password Table

EEDB USERS		
Login	**Node A password**	**Node B password**
root		
eedbconfig		
admusr		

E.1.2 Installation Phases

The following table illustrates the progression of the installation process by procedure with estimated times. The estimated times and the phases that must be completed may vary due to differences in typing ability and system configuration. The phases outlined in Table 6 and Table 7 are to be executed in the order they are listed.

Table 24. Installation Phases for EEDB

Phase	Elapsed Time (Minutes)		Activity	Procedure
	This Step	Cum.		
Connectivity setup	15	15	Set up connectivity to the MPS Servers.	**Upgrade Preparation**
Pre-upgrade check	5	20	Verify requirements for install are met.	**0**
Configure the Network	5	25	Configure the Network using platcfg on Node A	**0**
Configure the Network	5	30	Configure the Network using platcfg on Node B	**0**
Create the bulkconfig file	5	35	Create the configuration file	**0**
Create the bulkconfig file	5	40	Create the configuration file	**0**
Pre-install health check	5	45	Run the syscheck utility to verify that all servers are operationally sound on Node A.	**0**
Pre-install health check	5	50	Run the syscheck utility to verify that all servers are operationally sound on Node B.	**0**
Configure Server Node A	5	55	Set hostname, designation and time.	**0**
Configure Server Node B	5	60	Set hostname, designation and time.	**0**
Install Servers	30	90	Install software on Node A and B	**0, 0**

E.1.3 Upgrade Preparation

Procedure 44: Setting up the upgrade environment for EEDB

S T E P #	This procedure sets up the upgrade environment. Windows are opened for both MPS servers. **NOTE: Call My Oracle Support for assistance if modem access is the method use for upgrade.** Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Establish a connection to MPS A.	If access to the MPS servers is not available through an IP network, connect to the E5-APP-B card via the serial port. For connecting the E5-APP-B A card, disconnect the console cable from the serial port on the E5-APP-B B card's adapter. The cable should be disconnected at the point where it connects to the serial port labeled 'S1' on the E5-APP-B B card's adapter and use it for serial access. **Cable part numbers - 830-1220-xx**
2 ☐	On the workstation, open one terminal window in preparation for establishing remote connections to the MPS servers.	Create a terminal window
3 ☐	Create a terminal window for MPS A.	Create a terminal window and give it a title of **"MPS A"**
4 ☐	**MPS A**: Enable capture file and verify the correspondent file is created.	Enable the data capture and verify that the data capture file is created at the path specified.
5 ☐	Log into MPS A.	*<hostname> console login: admusr* *password: <password>*
6 ☐	MPS A: Start screen Session.	Execute the following command to start screen and establish a console session with MPS A. *$ screen -L*
7 ☐	Establish a connection to MPS B.	If access to the MPS servers is not available through an IP network, connect to the E5-APP-B card via the serial port. For connecting the E5-APP-B B card, disconnect the console cable from the serial port on the E5-APP-B A card's adapter. The cable should be disconnected at the point where it connects to the serial port labeled 'S1' on the E5-APP-B A card's adapter and use it for serial access. Cable part numbers - 830-1220-xx
8 ☐	Create a terminal window for MPS B.	Create a terminal window and give it a title of "MPS B"
9 ☐	MPS B: Enable capture file and verify a correspondent file is created.	Enable the data capture and verify that the data capture file is created at the path specified.
10 ☐	Log into MPS B.	*<hostname> console login: admusr* *password: <password>*
11 ☐	MPS B: Start screen Session.	Execute the following command to start screen and establish a console session with MPS B. *$ screen -L*

Procedure 44: Setting up the upgrade environment for EEDB

12 ■	MPS A and B: Procedure Complete.	This procedure is complete.

Note: For the complete list of cards supported by EAGLE Release 47.0, see Hardware Reference Guide.

Procedure 45 Pre-upgrade requirements

Procedure 45: Verify the Pre-Upgrade Requirements

S T E P #	This procedure verifies that all pre-upgrade requirements have been met. **NOTE: Call My Oracle Support for assistance if modem access is the method use for upgrade.** Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**	
1 ☐	Verify all required materials are present.	Verify that the materials listed in Upgrade Material List (Section E.1.1D.1E.1) are present.
2 ■	Verify the availability of passwords for MPS systems.	Refer to Table 23 for the list of users.
3 ☐	Procedure Complete.	This procedure is complete.

E.1.4 Software Installation Procedures

Procedure 46 Create Configuration file on Node A

Procedure 46: Create Configuration file on Node A

S T E P #	This procedure creates the EEDB configuration file. **NOTE: Call My Oracle Support for assistance if modem access is the method use for upgrade.** Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**

IMPORTANT: Installation of the Operating System on an Oracle Application Server should be completed before starting installation procedure. Refer to 0 for TPD installation.

Procedure 46: Create Configuration file on Node A

1 ☐	Log in as "admusr" user.	If not already logged in, then login as "admusr": **[hostname] consolelogin: admusr** **password: *password***
2 ☐	Switch super user to root.	***$ sudo su -***
3 ☐	Create the file in root directory named as "bulkconfig"	**$ vim /root/bulkconfig** Content of file should be as follow: host,<NodeA-hostname>,<Node A-IP>,bond0:1,<Node A- NetMask>,<Node A Default route>,1A host,<NodeB-hostname>,<Node B-IP>,bond0:1,<Node B- NetMask>,<Node B Default route>,1B vip,<Virtual IP>,bond0:2,<VIP Netmask> ntpserver1,<NTP Server IP> timezone,America/New_York For Example: host,Santos-A,10.75.141.64,bond0:1,255.255.255.0,10.75.141.1,1A host,Santos-B,10.75.141.65,bond0:1,255.255.255.0,10.75.141.1,1B vip,10.75.141.66,bond0:2,255.255.255.0 ntpserver1,10.250.32.10 timezone,America/New_York Note: Upto 3 NTP servers can be added in bulkconfig file. NTP servers should have names ntpserver1, ntpserver2 and ntpserver3 respectively.
4 ☐	Procedure Complete.	This procedure is complete.

Procedure 47 Create Configuration file on Node B

Procedure 47: Create Configuration file on Node B

S T E P #	This procedure creates the EEDB configuration file. **NOTE: Call My Oracle Support for assistance if modem access is the method use for upgrade.** Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE.**

IMPORTANT: Installation of the Operating System on an Oracle Application Server should be completed before starting installation procedure. Refer to 0 for TPD installation.

Procedure 47: Create Configuration file on Node B

1 ☐	Log in as "admusr" user on Node B.	If not already logged in, then login as "admusr": *[hostname] consolelogin: admusr* *password: password*
2 ☐	Switch super user to root.	*$ sudo su -*

3 ☐	Create the file in root directory named as "bulkconfig"	*$ vim /root/bulkconfig*
		Content of file should be as follow:
		`host,<NodeA-hostname>,<Node A-IP>,bond0:1,<Node A- NetMask>,<Node A Default route>,1A`
		`host,<NodeB-hostname>,<Node B-IP>,bond0:1,<Node B- NetMask>,<Node B Default route>,1B`
		`vip,<Virtual IP>,bond0:2,<VIP Netmask>`
		`ntpserver1,<NTP Server IP>`
		`timezone,America/New_York`
		
		`For Example:`
		`host,Santos-A,10.75.141.64,bond0:1,255.255.255.0,10.75.141.1,1A`
		`host,Santos-B,10.75.141.65,bond0:1,255.255.255.0,10.75.141.1,1B`
		`vip,10.75.141.66,bond0:2,255.255.255.0`
		`ntpserver1,10.250.32.10`
		`timezone,America/New_York`
		
		Note: Upto 3 NTP servers can be added in bulkconfig file NTP servers should have names ntpserver1, ntpserver2 and ntpserver3 respectively.

4 ☐	Procedure Complete.	This procedure is complete.

Procedure 48 Pre-Install Configuration on Node A

Procedure 48: Pre-Install Configuration on Node A

S T E P #	This procedure provides instructions to perform pre-configuration for an initial install of the application. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND ASK FOR ASSISTANCE.	
1. ☐	Connect to the Server.	If not already connected, connect to the E5-APP-B card via the serial port. For connecting the E5-APP-B B card, disconnect the console cable from the serial port on the E5-APP-B A card's adapter. The cable should be disconnected at the point where it connects to the serial port labeled 'S1' on the E5-APP-B A cards' adapter and use it for serial access. **Cable part numbers - 830-1220-xx**

2. ☐	Log in as "admusr" user.	If not already logged in, then login as 'admusr':
		`[hostname] consolelogin: admusr`
		`password: password`

3. ☐	Start platcfg utility.	*$ sudo su - platcfg*

Procedure 48: Pre-Install Configuration on Node A

4. ☐	Navigate to the **Server Configuration** screen.	Select **Server Configuration** and press [ENTER] 5. ☐	Navigate to the **Hostname** screen.	Select **Hostname** and press [ENTER] 
6. ☐	Select **Edit** to edit the hostname.	Select **Edit** and press [ENTER] 
7. ☐	Enter the hostname and press ok.	Delete the default entry and enter the Hostname as mps-xxxx-a where xxxx is the last 4 digits of server serial number. Press OK when done.  While connected to the serial console, some console output might come when the user is using the serial console to configure the EEDB. Those serial output are harmless and can be ignored.

Procedure 48: Pre-Install Configuration on Node A

8. ☐	Exit Back to the Server Configuration Menu.	Select EXIT to exit back to the Server Configuration Menu. Verify that the hostname has been properly set. 9. ☐	Navigate to the **Designation/Function** menu option.	Select **Designation/Function** and press [ENTER] 10. ☐	Enter the designation.	Enter the appriopriate designation in the Designation field (Note: the designation must be capitalized). Select OK and press [ENTER]. 11. ☐	Enter the Designation press “Exit”.	
Procedure 48: Pre-Install Configuration on Node A

12. ☐	Select “Set Clock” Menu.	13. ☐	1) Select “Edit” from the options dialogue box. 2) Using an NTP source, set the Date/Time to be correct for the Eastern Time zone (GMT -5) and press “OK”. NOTE: All systems default to Eastern time post IPM. It is important to set the time for the Eastern Time zone at this time.	 14. ☐	Verify that the Date and Time is correct then select and press “Exit”.	
Procedure 48: Pre-Install Configuration on Node A

		
15. ☐	Exit from platcfg menu.	Select **EXIT** until the platcfg menu is closed and the command line is displayed.
16. ☐	Reboot the Server.	***$ sudo reboot***
17. ☐	Procedure complete.	Procedure is complete.

Procedure 49 Pre-Install Configuration on Node B

Procedure 49: Pre-Install Configuration on Node B

S T E P #	This procedure provides instructions to perform pre configuration for an initial install of the application. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORTAND ASK FOR ASSISTANCE.	
1. ☐	Connect to the Server.	If not already connected, connect to the E5-APP-B card via the serial port. For connecting the E5-APP-B B card, disconnect the console cable from the serial port on the E5-APP-B A card's adapter. The cable should be disconnected at the point where it connects to the serial port labeled 'S1' on the E5-APP-B A cards' adapter and use it for serial access. **Cable part numbers - 830-1220-xx**
2. ☐	Log in as "admusr" user.	If not already logged in, then login as 'admusr': ***[hostname] consolelogin: admusr*** ***password: password***
3. ☐	Start platcfg utility.	***$ sudo su - platcfg***
4. ☐	Navigate to the **Server Configuration** screen.	Select **Server Configuration** and press [ENTER] 
Procedure 49: Pre-Install Configuration on Node B

5. ☐	Navigate to the **Hostname** screen.	Select **Hostname** and press [ENTER] 
6. ☐	Select **Edit** to edit the hostname.	Select **Edit** and press [ENTER] 
7. ☐	Enter the hostname and press ok.	Delete the default entry and enter the Hostname as mps-xxxx-b where xxxx is the last 4 digits of server serial number. Press OK when done.  While connected to the serial console, some console output might come when the user is using the serial console to configure the EEDB. Those serial output are harmless and can be ignored.
8. ☐	Exit Back to the Server Configuration Menu.	Select EXIT to exit back to the Server Configuration Menu. Verify that the hostname has been properly set. 9. ☐	Navigate to the **Designation/Function** menu option.	Select **Designation/Function** and press [ENTER]

Procedure 49: Pre-Install Configuration on Node B

		10. ☐	Enter the designation.	Enter the appriopriate designation in the Designation field (Note: the designation must be capitalized). Select OK and press [ENTER]. 
11. ☐	Enter the Designation press "Exit".	12. ☐	Select "Set Clock" Menu.	
Procedure 49: Pre-Install Configuration on Node B

13. ☐	1) Select "Edit" from the options dialogue box. 2) Using an NTP source, set the Date/Time to be correct for the Eastern Time zone (GMT -5) and press "OK". NOTE: All systems default to Eastern time post IPM. It is important to set the time for the Eastern Time zone at this time.	 14. ☐	Verify that the Date and Time is correct then select and press "Exit".	 15. ☐	Exit from platcfg menu.	Select **EXIT** until the platcfg menu is closed and the command line is displayed.
16. ☐	Reboot the Server.	`$ sudo reboot`
17. ☐	Procedure complete.	`Procedure is complete.`

Procedure 50 Install Application on Node A

Procedure 50: Install the Application on Node A

S T E P #	This procedure installs the application on the server. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORTAND ASK FOR ASSISTANCE.	
1. ☐	**MPS A:** Copy the EEDB ISO on 1A.	Refer 00 to download the EEDB ISO and copy EEDB 46.8 ISO to /var/TKLC/upgrade directory.
2. ☐	Create a terminal window and log into MPS A.	If not already connected, connect to the E5-APP-B card via the serial Port. For connecting the E5-APP-B A card, disconnect the console cable from the serial port on the E5-APP-B B card's adapter. The cable should be disconnected at the point where it connects to the serial port labeled 'S1' on the E5-APP-B B card's adapter and use it for serial access. **Cable part numbers - 830-1220-xx**
3. ☐	**MPS A**: Login prompt is displayed.	*<hostname> console login:* Note: Hit enter if no login prompt is displayed.
4. ☐	**MPS A:** log in as "admusr" user.	*[hostname] consolelogin: admusr* *password: password*
5. ☐	**MPS A:** Validate ISO file.	Validate ISO file using **00.**
6. ☐	**MPS A:** Start platcfg utility.	*$ sudo su - platcfg*
7. ☐	**MPS A:** Navigate to the Upgrade menu.	The platcfg **Main Menu** appears. On the **Main Menu**, select **Maintenance** and press **[ENTER]**.  Select the **Upgrade** menu and press **[ENTER]**. 8. ☐	**MPS A**: Select Early Upgrade Checks	Select the "Early Upgrade Checks" menu to verify that the system is ready for upgrade.

Procedure 50: Install the Application on Node A

		 If the Early Upgrade Checks fail due to the ongoing syncing of raid mirrors, then wait until the resync is completed and run the "Early Upgrade Checks" again. Early Checks failed for the next upgrade Look at earlyChecks.log for more info tarting Early Upgrade Checks at 1011413059 Running earlyUpgradeChecks() for Upgrade::EarlyPolicy::TPDEarlyChecks upgrade policy... Verified server is not pending accept of previous upgrade ERROR: Raid mirrors are syncing! ERROR: md2 is syncing! 18. ☐	**MPS B:** Install Complete.	Install Procedure is complete.

E.1.5 Generic Procedure

Procedure 52 ISO Image download from Oracle Software Delivery Cloud

Procedure 52: ISO Image download from OSDC

STEP #	This procedure provides instructions to download an ISO image from OSDC and copy to the required server. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND ASK FOR UPGRADE ASSISTANCE.	
1. ☐	**MPS X:** Log in to the server as the "admusr" user.	*[hostname] consolelogin: admusr* *password: <admusr_password>*
2. ☐	**MPS X:** Verify ISO image doesn't already exist.	Execute the following command to perform directory listing: *$ ls -alrt /var/TKLC/upgrade* The output should look like as follows (There is no ISO present in following example): [admusr@Osorna-B-PDBonly ~]$ ls -alrt /var/TKLC/upgrade/ total 12 drwxrwxr-x. 3 root admgrp 4096 Feb 19 21:43 . dr-xr-xr-x. 22 root root 4096 Jun 15 2018 .. If an ISO image exists, remove it by executing the following command: *$ rm -f /var/TKLC/upgrade/<ISO image>*
3. ☐	Download the ISO image from OSDC.	Download the ISO image from OSDC(Oracle Software Delivery Cloud).
4. ☐	Copy the ISO from source path to destination path.	**NOTE: Skip this step if same ISO is already present on destination folder.** Copy the ISO image from source path to destination path using scp/ftp command.

Procedure 52: ISO Image download from OSDC

		Execute the following command on destination server: ***$ sudo scp <source_username>@<source_server_IP>:/<source_path>/xyz.iso /var/TKLC/upgrade*** Password: <enter source userpassword> OR, Execute the following command on source server: ***$ scp /<source_path>/<xyz.iso> admusr@<destination_server_IP>:/var/TKLC/upgrade*** Password: <Enter admusr password>
5. ☐	**MPS X:** Verify ISO image copied on destination path.	Execute the following command to perform directory listing: ***$ ls -alrt /var/TKLC/upgrade*** The output should look like: [admusr@hostname ~]$ ls -alrt /var/TKLC/upgrade total 684816 drwxr-xr-x. 2 root sys 4096 Mar 20 2018 patch drwxrwxr-x. 3 root admgrp 4096 Jun 15 18:09 . -rw-r----- 1 root root 701235200 Nov 21 18:12 EEDB-46.7.0.0.0_75.24.0-x86_64.iso dr-xr-xr-x. 21 root root 4096 Nov 21 18:37 .. Repeat this procedure from step 1 if EEDB ISO file is not as expected.
6. ☐	**MPS X:** Validate ISO file.	Validate ISO file using 00.
7. ☐	**Procedure complete.**	This procedure is complete.

Procedure 53 Validate Upgrade Media

This procedure is used to execute a validation of the Upgrade Media (typically an ISO image) separately from executing an upgrade. The upgrade process automatically validates the upgrade media. However, sometime the user may wish to perform just a validation before proceeding with upgrade, thus the reason for this separate process.

Validation could be performed on MPS A or B, however, this procedure specifies MPS X for simplicity.

Procedure 53: Validate the Upgrade Media

S T E P #	This procedure provides instructions to perform a validation of the upgrade media on the MPS X server. This procedure assumes that the E5-APP-B card IPM procedure has been executed and the user has an EEDB Upgrade ISO image available. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND **ASK FOR UPGRADE ASSISTANCE.**	
1. ☐	**MPS X:** If necessary, log in to the server as the user "admusr".	If not already logged in to the MPS server, then login as user "admusr". ***<hostname> console login: admusr*** ***password: <password>***
2.	**MPS X:** Execute the platcfg menu.	***$ sudo su - platcfg***

Procedure 53: Validate the Upgrade Media

☐		
3. ☐	**MPS X**: Select the Maintenance submenu.	The platcfg **Main Menu** appears. On the **Main Menu**, select **Maintenance** and press **[ENTER]**. 4. ☐	**MPS X**: Select the Upgrade submenu.	Select the **Upgrade** menu and press **[ENTER]**. 5. ☐	**MPS X:** Select the Validate Media selection.	Select the **Validate Media** menu and press **[ENTER]**. 6. ☐	**MPS X**: Output from the Validate Media selection.	The screen will display a message that it is searching for upgrade media. Once the upgrade media is found, an Upgrade Media selection menu will be displayed similar to the example shown below. If the upgrade media is not found, follow 0 to copy the upgrade ISO. Select the upgrade media or ISO image. There should only be one selection available, as shown in the example below. If there is more than one selection available, contact My Oracle Support following the instructions on the front page or the instructions on the Appendix I 
Procedure 53: Validate the Upgrade Media

7. ☐	**MPS X**: View the Validation results.	The results of the validation will be displayed, similar to the example below. Press the "enter" key to continue. 8. ☐	**MPS X**: Select the Exit option.	Select the **Exit** option, and keep selecting the Exit option, until you reach the command line prompt or you return to another menu that you wish to use.
9. ☐	**MPS X**: Procedure complete.	Media Validation is complete. Return to the procedure that you came here from.

Procedure 54 IPM MPS Server with TPD 7.6.X

Note: Both the MPS-A and MPS-B servers can be IPM'ed at the same time.

Procedure 54: IPM with TPD 7.6.x

S T E P #	This procedure will IPM the E5-APP-B Server. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND **ASK FOR UPGRADE ASSISTANCE**.	
1. ☐	**MPS X:** Insert TPD 7.6.x USB media into the USB port (E5-APP-B). Note: Refer 0 to copy the ISO in USB.	Reboot server ***# reboot***

Procedure 54: IPM with TPD 7.6.x

2. ☐	**MPS X:** Press 'del' key to enter the BIOS, set System Time to GMT time, and System Date.	
3. ☐	**MPS X:** Select *Boot* → *Hard Disk Drives* option	4. ☐	**MPS X:** Press 'Enter' key and select USB as the 1st Drive	**remo**

Procedure 54: IPM with TPD 7.6.x

		5. ☐	**MPS X:** Press 'Esc' key and select Boot Device Priority	6. ☐	**MPS X:** Verify that the 1st Boot Device is set to USB.	

Procedure 54: IPM with TPD 7.6.x

		7. ☐	**MPS X:** Press 'Esc' key and select *Exit → Save Changes and Exit* option	8. ☐	**MPS X:** Select [OK] to save the configuration changes. The server will reboot and TPD boot prompt will appear.	

Procedure 54: IPM with TPD 7.6.x

		9. ☐	**MPS X:** Start the IPM process by entering the TPDlvm command at the boot prompt.	10. ☐	**MPS X:** After a few seconds, additional messages will begin scrolling by on the screen as the Linux kernel boots, and then the drive formatting and file system creation steps will begin.	

Procedure 54: IPM with TPD 7.6.x

		11. ☐	**MPS X:** Once the drive formatting and file system creation steps are complete, the screen at right will appear indicating that the package installation step is about to begin.	12. ☐	**MPS X:**	

Procedure 54: IPM with TPD 7.6.x

	After a few minutes, you will see a screen similar to that at right, showing the status of the package installation step. For each package, there will be a status bar at the top indicating how much of the package has been installed, with a cumulative status bar at the bottom indicating how many packages remain. In the middle, you will see text statistics indicating the total number of packages, the number of packages installed, the number remaining, and current and projected time estimates.	
13. ☐	**MPS X:** Once all the packages have been successfully installed, the screen at right will appear letting you know the installation process is complete. **On E5-APP-B server remove the installation media (USB) and press <ENTER> to reboot the system and continue with the next step.**	
14. ☐	**MPS X:** Press 'del' key to enter the BIOS, set correct System Time in GMT and System Date.	

Procedure 54: IPM with TPD 7.6.x

15. ☐	**MPS X:** Select *Boot* → *Hard Disk Drives* option	16. ☐	**MPS X:** Press 'Enter' key and select HDD:P0 as the 1st Drive	17. ☐	**MPS X:** Press 'Esc' key and select Boot Device Priority	

Procedure 54: IPM with TPD 7.6.x

		18. ☐	**MPS X:** Verify that the 1st Boot Device is set to HDD:P0.	19. ☐	**MPS X:** Press 'Esc' key and select *Exit → Save Changes and Exit* option	

Procedure 54: IPM with TPD 7.6.x

		20. ☐	**MPS X:** Select [OK] to save the configuration changes. The server will reboot. Remove USB media from USB drive.	 When the message "Upstart Job ntdMgr: started", is displayed, press the Enter Key to get the Login prompt.
21. ☐	**MPS X:** Log in to the server as the user "admusr"	*console login: admusr* *password: <admusr_password>*
22. ☐	**MPS X:** Verify that the platform revision is same as the TPD DVD or ISO used.	*$ getPlatRev* 7.6.x.0.0-y.z.0

Procedure 54: IPM with TPD 7.6.x

23. ☐	**MPS X:** Verify the system date.	*$ date -u* Wed Mar 21 11:04:54 UTC 2018 Verify that the output time matches the time set in step 14. If mismatch is found, then Refer to Appendix I for instructions on accessing My Oracle Support.
24. ☐	**Procedure complete.**	Return to the procedure that you came here from.

Procedure 55 Perform System Health Check

Procedure 55: Perform System Health Check

S T E P #	This procedure performs a system health check on any MPS server. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND **ASK FOR UPGRADE ASSISTANCE.**	
1. ☐	**MPS X:** If necessary, log in to the server as the user "admusr".	If not already logged in to the MPS server, then login as user "admusr". *<hostname> console login: admusr* *password: <password>*
2. ☐	**MPS X:** Execute the platcfg menu.	*$ sudo su - platcfg*
3. ☐	**MPS X**: Select the Diagnostics submenu.	The platcfg **Main Menu** appears. On the **Main Menu**, select **Diagnostics** and press **[ENTER]**. 4. ☐	Select the Online Diagnostics submenu.	Select the **Online Diagnostics** submenu and press **[ENTER]**.

Procedure 55: Perform System Health Check

		5. ☐	Select the Non-Verbose option.	Select the **Non-Verbose** option and press **[ENTER]**. 6. ☐	Examine the output of the Online Diagnostics	Example output shown below. Examine the actual output of the Online Diagnostics. 
7. ☐	System Check Successful. System Check Failure.	Exit from the above menu. If the System Check was successful, return to the procedure that you came here from. If the "Server Disk Space Shortage Error" was there in the output, proceed to step 8 to clean up the '/' directory. If any other failures were detected by System Check, contact My Oracle Support following the instructions on the front page or the instructions on the Appendix I.
8. ☐	Server clean-up to create space.	Execute the following command: ***$ df -h /var/TKLC*** The output may look like:

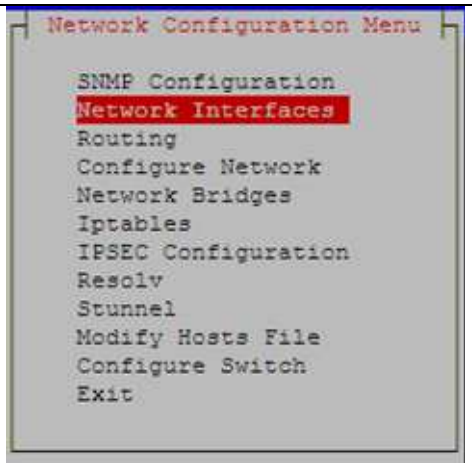
Procedure 55: Perform System Health Check

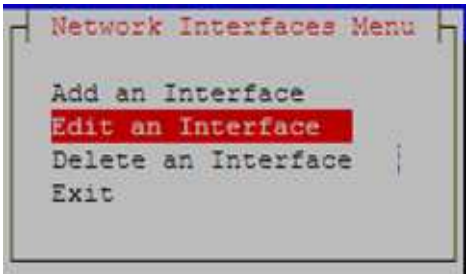
		[admusr@hostname ~]$ df -h /var/TKLC Filesystem Size Used Avail Use% Mounted on /dev/mapper/vgroot-plat_var_tklc 3.9G 2.2G 1.5G 60% /var/TKLC Verify that there is at least 600M in the Avail column. If not, clean up files until there is space available. **CAUTION: Make sure you know what files you can remove safely before cleaning up. It is recommended that you only clean up files in the /var/TKLC/upgrade directory as this is a platform owned directory that should only contain ISO images. This directory should not be expected to contain images for any length of time as they can get purged.** Also, execute the following command to check space in '/lib/module' directory. *$ df -h /lib/modules* [admusr@hostname ~]$ df -h /lib/modules Filesystem Size Used Avail Use% Mounted on /dev/mapper/vgroot-plat_root 976M 397M 529M 43% / Verify that the Use% column does not exceed the value 80%.
9. ☐	**MPS X**: Procedure complete.	Media Validation is complete. Return to the procedure that you came here from.

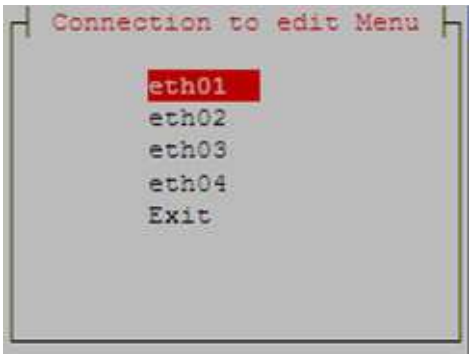
Procedure 56 Configure Network Interface using platcfg utility

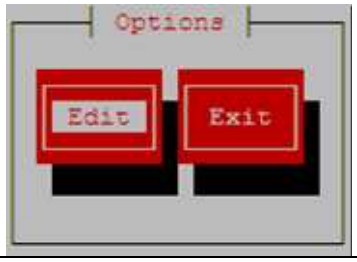
Procedure 56: Configure Network Interface using platcfg utility

S T E P #	This procedure configures the network interfaces and makes the E5APPB servers accessible to the network. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND **ASK FOR UPGRADE ASSISTANCE**.	
1. ☐	**MPS X:** If necessary, log in to the server as the user "admusr".	If not already logged in to the MPS server, then login as user "admusr". *<hostname> console login: admusr* *password: <password>*
2. ☐	**MPS X:** Execute the platcfg menu.	*$ sudo su - platcfg*
3. ☐	**MPS X**: configure Network Interface.	
Procedure 56: Configure Network Interface using platcfg utility



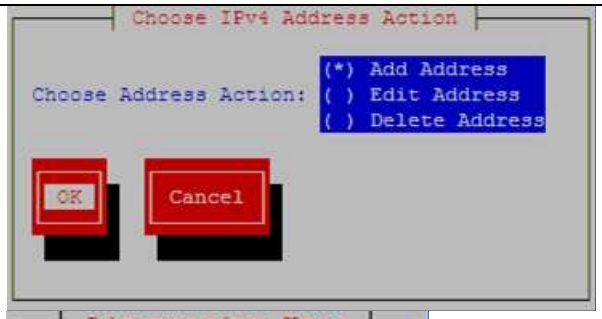


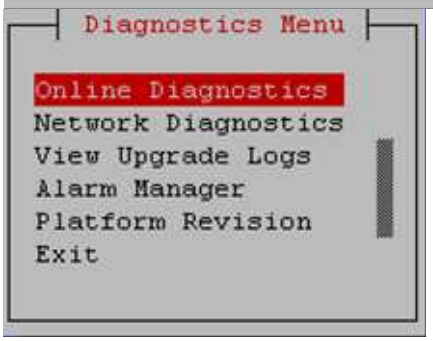




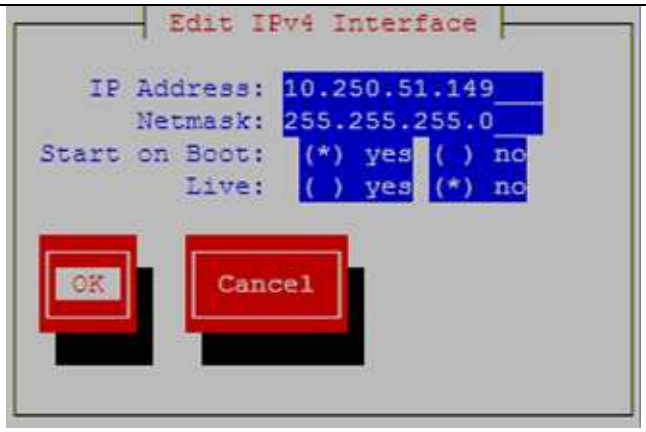
Procedure 56: Configure Network Interface using platcfg utility

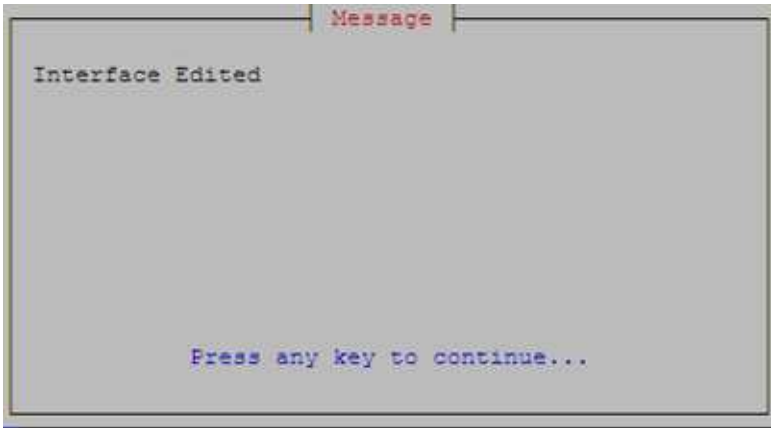
4.	Select the Interface option.	   
Procedure 56: Configure Network Interface using platcfg utility





5. ☐ Input the IP Address and Netmask.

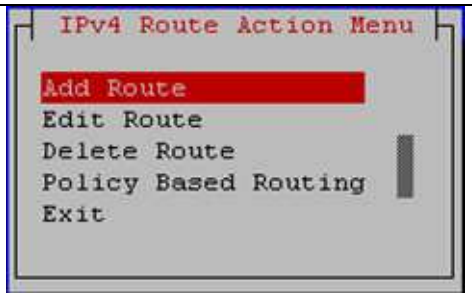


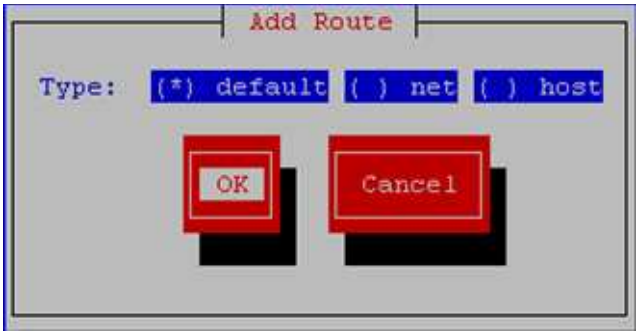


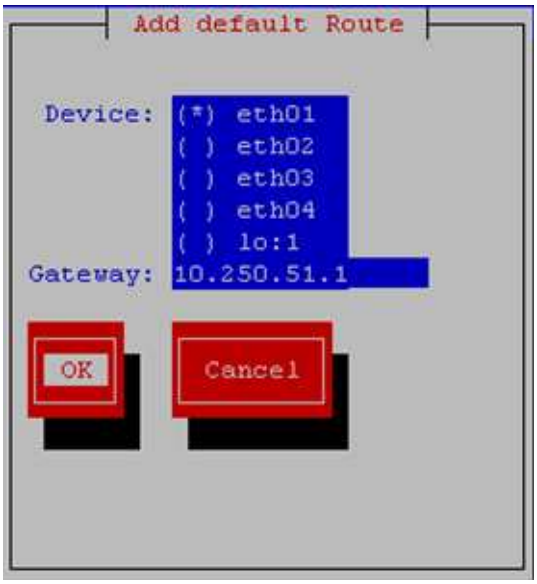
Select “Exit” until you reach the network configuration menu.

Procedure 56: Configure Network Interface using platcfg utility

6. ■	Configure Default Route.	  
Procedure 56: Configure Network Interface using platcfg utility







Procedure 56: Configure Network Interface using platcfg utility

		 Select "Exit" until you exit from the platcfg utility.
7. ☐	**Procedure complete.**	This procedure is complete.

Procedure 57 Copy ISO image in USB

Procedure 57: ISO Image download from OSDC

S T E P #	This procedure provides instructions to copy an ISO to USB. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND ASK FOR UPGRADE ASSISTANCE.	
1. ☐	**MPS X:** Log in to the server as the "admusr" user.	*[hostname] consolelogin: admusr* *password: <admusr_password>*

2. ☐	**MPS X:** Verify ISO image present at directory.	Execute the following command to perform directory listing:
		$ cd /var/TKLC/upgrade
		$ ls -alrt
		The output should look like as follows (There is no ISO present in following example):
		`[admusr@waffle-a upgrade]$ ls -arlt`
		`total 695312`
		`drwxr-xr-x. 2 root sys 4096 Mar 20 2018 patch`
		`dr-xr-xr-x. 21 root root 4096 Nov 20 02:57 ..`
		`-r--r----- 1 root root 711983104 Dec 5 12:25 TPD.install-7.6.0.0.0_88.54.0-OracleLinux6.9-x86_64.iso`
		`drwxrwxr-x. 3 root admgrp 4096 Dec 5 12:26`

3. ☐	**MPS X**: Copy ISO to the USB.	*$ sudo dd if=/var/TKLC/upgrade/TPD.install-7.6.0.0.0_88.54.0-OracleLinux6.9-x86_64.iso of=/dev/sdc* *1390592+0 records in* *1390592+0 records out* *711983104 bytes (712 MB) copied, 111.797 s, 6.4 MB/s*
4. ☐	Procedure complete.	This procedure is complete.

APPENDIX F. UPGRADING SOURCE RELEASE 46.5.1.10.0 TO TARGET RELEASE 46.5.1.20.0 (46.9.1.20.0)

Procedure 58: Upgrading Source Release 46.5.1.10.0 to Target Release 46.5.1.20.0 (46.9.1.20.0)

S T E P #	This procedure upgrades the EAGLE Software Release 46.5.1.10.0 to the Release 46.5.1.20.0 (46.9.1.20.0). The only EPM-A cards that are allowed to be operational in the EAGLE prior to upgrading to the Release 46.5.1.20.0 are the E5-ENET-A cards running the IPSG application. In addition, other A cards, that is, the cards that contain the BLIXP flash GPL must be removed from the machine prior to the upgrade. Release 46.9.1.20.0 is used to perform chg-gpl only. The release should not be used for a fresh installation. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. IF THIS PROCEDURE FAILS, CONTACT MY ORACLE SUPPORT AND ASK FOR UPGRADE ASSISTANCE.	
1. ☐	Disable the security feature. Note: To turn off both SSH and SFTP, refer to EAGLE's Database Administration – System Management User's Guide, Section A.4.	
2. ☐	Migrate IPSM, MCPM, and OAM to the VxWorks 6.9 GPL versions.	
3. ☐	Upgrade to EAGLE 46.5.1.20.0 by referring to EAGLE Software Upgrade Guide for 46.x.	
4. ☐	Re-enable the security feature. Note: Refer to EAGLE's Database Administration – System Management User's Guide, Section A.4.	
5. ☐ ☐ ☐	Migrate the E5-ENET-A cards to the SLIC cards. Flash SLIC (to be used in 4-Port IPSG locations) to BLSL932. Consolidate two E5-ENET-A cards into one SLIC card.	
6. ☐	At this point, all of the E5-ENET-A cards have been removed from the EAGLE node.	
7. ☐ ☐	Prepare USB with the 46.9.1.20.0 upgrade GPLs to run the chg-gpl command. Create the Removable Eagle STP USB by performing the following steps: - Format the Removable Eagle STP USB. - Download the 46.9.1.20 zip file from My Oracle Support (MOS), and copy the SYSREL.SYS and toamhc69.elf files to the Removable Eagle STP USB.	

Procedure 58: Upgrading Source Release 46.5.1.10.0 to Target Release 46.5.1.20.0 (46.9.1.20.0)

8. ■	Run the given command.	`chg-gpl:gpl=oamhc69:ver-147.5.11`
9. ☐	Run the given command.	`init-card:appl=oam`
10. ■	The OAM displays the release label 46.9.1.20.0-77.5.11.	
11. ☐	At this point, the EAGLE node is running Release 46.9.1.20.0. The only supported upgrade path from 46.9.1.20.0 will be to Release 47.0.0.0.0.	

APPENDIX G. MIGRATE TO VXWORKS6.9

Migrate the OAM and selected modules to VxWorks 6.9 if target release is 46.6 or above.

If the source release is 46.5 or prior and the target release is 46.6 or later, then execute Procedure 9 through Procedure 13. Otherwise, go to

If the display/report is for a command such as RTRV-GPL, or REPT-STAT-GPL, any command intended to display or Operate on a particular GPL, then EAGLE displays the correct GPL name, i.e.: OAMHC or OAMHC69.
But when the command intends to display the status of a card, then EAGLE displays the generic name that is OAMHC for OAMHC and/or OAMHC69, MCPHC for MCPHC and/or MCPHC69; IPSHC for IPSHC and/or IPSMHC69.

Procedure 59: Migrate the MASP cards running VxWorks 6.4 GPL to VxWorks 6.9 GPL

S T E P #	This procedure flashes the MASPs to BLDC32 to load new VxWorks 6.9 flash images. Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number. SHOULD THIS PROCEDURE FAIL, CONTACT My Oracle Support AND **ASK FOR UPGRADE ASSISTANCE**.	
1 ☐	Issue the card status to verify the location of the active/standby MASP slots	**REPT-STAT-CARD:APPL=OAM**
2 ☐ ☐	Response to the card status command is displayed. Record the MASP in the standby role: Standby: 1113 or 1115 For this sample output, 1113 is active and 1115 is standby.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y CARD VERSION TYPE GPL PST SST AST 1113 XXX-XXX-XXX E5MCAP OAMHC IS-NR Active ----- 1115 XXX-XXX-XXX E5MCAP OAMHC IS-NR Standby ----- Command Completed. ;
3 ☐	Report the GPLs running on the card location.	**REPT-STAT-GPL:LOC=*XXXX*** (Where ***XXXX*** is the location of the standby MASP slot display in the above step.)
4 ☐ ☐	Response from the status command is displayed. Record the flash image running on the standby MASP: BLMCAP or BLDC32 If the "ALM" indicator is displayed for the card's flash image, continue. Or if the card is running BLMCAP, continue. Otherwise, go to step 23.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x-YY.yy.y Upg Phase 3 GPL CARD RUNNING APPROVED TRIAL OAMHC *XXXX* XXX-XXX-XXX XXX-XXX-XXX XXX-XXX-XXX *ZZZZZZ* YYY-YYY-YYY **ALM** YYY-YYY-YYY YYY-YYY-YYY Command Completed. ;
5 ☐	Issue the command to inhibit the standby MASP.	**INH-CARD:LOC=*XXXX*** (Where ***XXXX*** is the location of the standby MASP slot used in the previous command.)

Procedure 59: Migrate the MASP cards running VxWorks 6.4 GPL to VxWorks 6.9 GPL

6 ☐ ☐	Response to the inhibit command is displayed Verify UAM 514 is displayed. If the "ALM" indication was displayed in step 4, continue. Otherwise, go to step 11.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Upg Phase 3 Card is inhibited. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Upg Phase 3 ** 5045.0514 ** CARD XXXX OAMHC Standby MASP is inhibited ; **Note**: Wait for the card to boot and return to the IMT bus.
7 ☐	Download the approved version flash to the standby MASP.	**INIT-FLASH:LOC=*XXXX*:CODE=APPR** (Where ***XXXX*** is the location of the standby MASP slot used in the previous command.)
8 ☐ ☐	Response to flash initialization is shown. Verify UAM 0004 is displayed. If the card is running BLMCAP, continue. Otherwise, go to step 17.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Upg Phase 3 FLASH Memory Download for card xxxx started. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Upg Phase 3 FLASH Memory Download for card xxxx completed. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Upg Phase 3 8003.0004 * GPL SYSTEM *ZZZZZZ* Card is running non-activated GPL ; **Note:** Wait for card to boot and return to the IMT bus.
9 ☐	Issue command to activate the flash on standby MASP	**ACT-FLASH:loc=*XXXX*** (Where ***XXXX*** is the location of the standby MASP slot used in the previous command.)
10 ☐	Response to the activate command is displayed.	eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase 3 FLASH Memory Activation for card *XXXX* Started. ; eaglestp YY-MM-DD hh:mm:ss EST PPP XX.x.x.x.x-YY.y.y Upg Phase 3 FLASH Activation for card *XXXX* Completed. ;
11 ☐	Issue flash command to download the bootloader image.	**INIT-FLASH:LOC=*XXXX*:MODE=RPLCEBL:BITS=32** (Where ***XXXX*** is the location of the standby MASP slot used in the previous command.)
12 ☐	Response to flash command is shown.	eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Upg Phase 3 BOOTLOADER change for card *XXXX* SUCCESSFUL. ; eaglestp YY-MM-DD hh:mm:ss TTTT EAGLE XX.x.x.x.x-YY.y.y Upg Phase 3 Command Completed. ;

APPENDIX I.MY ORACLE SUPPORT

 **CAUTION: Use only the guide downloaded from the Oracle Technology Network (OTN)** (http://www.oracle.com/technetwork/indexes/documentation/oracle-comms-tekelec-2136003.html).

My Oracle Support (https://support.oracle.com) is your initial point of contact for all product support and training needs. A representative at Customer Access Support can assist you with My Oracle Support registration.

Call the Customer Access Support main number at 1-800-223-1711 (toll-free in the US), or call the Oracle Support hotline for your local country from the list at http://www.oracle.com/us/support/contact/index.html. When calling, make the selections in the sequence shown below on the Support telephone menu:

- For Technical issues such as creating a new Service Request (SR), select **1**.
- For Non-technical issues such as registration or assistance with My Oracle Support, select **2**.
- For Hardware, Networking and Solaris Operating System Support, select **3**.

You are connected to a live agent who can assist you with My Oracle Support registration and opening a support ticket.

My Oracle Support is available 24 hours a day, 7 days a week, 365 days a year.
