# **Client System Requirements**

This document covers the client system requirements for Primavera P6 EPPM Database, P6 Web, P6 Web Services, P6 Team Member Web, P6 Professional Cloud Connect and P6 Professional Version 24 cloud deployments.

**Note**: All platforms and technologies certified with a base P6 version are also supported with the latest p6 patch set of the platform or technology for that major release version (unless specified).

For information on certified platforms for Oracle and other third-party technologies, refer to the certification matrix of the respective technology and select the platform compatible with your Primavera applications and the respective technology.

Oracle has tested on the following configurations and certifies this version to work with these technologies. Customers may choose to use non-certified technologies but do so at their own risk. If any problems are found with non-certified technologies, these may take longer to investigate and resolve by Oracle. Oracle will only test and have access to tested platforms and configurations. In addition, the resolution for any issues with non-tested configurations could be a recommendation that to resolve the issue you will need to use a tested technology. If it is still decided to use a non-certified technology, it is strongly recommended to fully test the product and non-certified platform in a test environment.

For your reference, please refer to the link below for the specific and complete Oracle Support terms and conditions:

| Date      | Change Reference                                                      |
|-----------|-----------------------------------------------------------------------|
| June 2023 | <ul> <li>Added support for Oracle Analytics Publisher 7.0.</li> </ul> |

| April 2022      | <ul> <li>Windows 11 support added.</li> <li>See: <i>Client and Browser</i> (on page 7)</li> </ul>                                                                                                                            |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                 | Version Supported and Client OS 32/64 bit columns removed from<br>all pages. The version supported throughout this document is P6<br>Version 24. The Client OS bit version supported is provided in the<br>Client OS column. |
| January<br>2022 | <ul> <li>First publication for this release.</li> </ul>                                                                                                                                                                      |

# **Integrations and 3rd Party Applications**

This document covers the tested configurations for Primavera P6 EPPM Database, P6 Web, P6 Web Services, P6 Team Member Web, P6 Professional Cloud Connect and P6 Professional Version 24 cloud deployments.

#### **Microsoft Office Format Support**

| Format          | Product          |                  | Exceptions and Additional Information |
|-----------------|------------------|------------------|---------------------------------------|
| MS Excel (xlsx) | Microsoft Office | 2010, 2013, 2016 |                                       |

### **Microsoft Project Format Support**

| Format              | Product              | Version                         | Exceptions and Additional<br>Information |
|---------------------|----------------------|---------------------------------|------------------------------------------|
| MS Project<br>(mpp) | Microsoft<br>Project | 2003                            |                                          |
| MS Project<br>(xml) | Microsoft<br>Project | 2003, 2007, 2010,<br>2013, 2016 |                                          |
| MS Project<br>(mpx) | Microsoft<br>Project | 2003                            |                                          |

#### P6 Reporting Software

| Product      | Version | Exceptions and Additional Information                                                                         |
|--------------|---------|---------------------------------------------------------------------------------------------------------------|
| BI Publisher | 5.5     | Apply April 2021 CPU patch #32709138<br>Oracle® Analytics Server Bundle patch<br>5.5.0.0.210331 is mandatory. |
|              |         | Zero byte files are not allowed. Manually delete zero byte files in the sample reports archive.               |

| BI Publisher               | 5.9        | Zero byte files are not allowed. Manually delete zero byte files in the sample reports archive. |
|----------------------------|------------|-------------------------------------------------------------------------------------------------|
| Oracle Analytics Publisher | 5.9<br>7.0 |                                                                                                 |

## **Client and Browser**

This document covers the tested configurations for Primavera P6 EPPM Database, P6, P6 EPPM Web Services, P6 Team Member Web, P6 Professional Cloud Connect and P6 Professional Version 24 cloud deployments.

## **Client and Browser Support**

| Client OS                             | Supported<br>Browsers                                                                  | Exceptions and Additional<br>Information |

| iOS 14.3<br>(iPad and iPhone)                                                                                      | n/a                                                                                 | <ul> <li>Supported for only P6 Mobile<br/>Native iOS App</li> </ul>                                                                                                 |
| Microsoft Outlook<br>Mozilla Thunderbird<br>Apple Mail<br>Android<br>Blackberry                                    | n/a                                                                                 | <ul> <li>Supported for Email Statusing<br/>Service only</li> <li>Only English Operating System<br/>environment certified for Email<br/>Statusing Service</li> </ul> |

\***JRE Vendor Version** - JRE is not a requirement for P6 EPPM. It is requirement only for AutoVue and JRE 1.8.0\_311 is certified for this requirement.

## **P6 Professional Windows Client**

### **P6 Professional Windows Client**

| OS Version*                                                                                    | Oracle database Client<br>Version*                                       | Exceptions and<br>Additional Information                               |
|------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|------------------------------------------------------------------------|
| Windows 10 (64 bit)<br>(Windows Surface Pro,<br>Windows Surface Pro2,<br>Windows Surface Pro3) | 18.16 (for Oracle 18c<br>database)<br>19.13 (for Oracle 19c<br>database) | No database client is required to connect to a Microsoft SQL database. |
| Windows 11 (64 bit)<br>(Windows Surface Pro,<br>Windows Surface Pro2,<br>Windows Surface Pro3) | 18.16 (for Oracle 18c<br>database)<br>19.13 (for Oracle 19c<br>database) | No database client is required to connect to a Microsoft SQL database. |

## \*OS Version:

Tested with the following fully localized international versions of Windows:

- Arabic
- Brazilian Portuguese
- Chinese Simplified
- Chinese Traditional
- English
- French
- German
- Italian
- Japanese
- Russian
- Spanish
- Korean
- Dutch (Nederlands)

#### **Hardware Requirements**

- 4GB memory (minimum).
- 5GB disk space (minimum).

## **Other Primavera Applications**

This document covers the tested configurations for Primavera P6 EPPM Database, P6 Web, P6 Web Services, P6 Team Member Web, P6 Professional Cloud Connect and P6 Professional Version 24 cloud deployments.

| Product*<br>Primavera Unifier<br>Version 24 | Exceptions and Additional Information |
|---------------------------------------------|---------------------------------------|
| Primavera Gateway<br>22.10                  |                                       |
| Oracle Primavera Cloud<br>Version 24        |                                       |

#### **Primavera Data Warehouse and Primavera Analytics**

| Product                                | OBIEE Version | Exceptions and Additional<br>Information |
|----------------------------------------|---------------|------------------------------------------|
| Primavera Data Warehouse<br>Version 24 | 12.2.1.4.0    |                                          |
| Primavera Analytics Version<br>24      | 12.2.1.4.0    |                                          |

\***Product** - Refer to the Primavera Primavera Unifier Version 24, Primavera Gateway Version 24 and Oracle Primavera Cloud Version 24 Tested Configurations for more info.

# Localization

This document covers the tested configurations for Primavera P6 EPPM Database, P6 Web, P6 Web Services, P6 Team Member Web, P6 Professional Cloud Connect and P6 Professional Version 24 cloud deployments.
