U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are “commercial computer software” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Table of Contents

1. Preface	1-1
1.1 Introduction	1-1
1.2 Audience	1-1
1.3 Documentation Accessibility	1-1
2. Domain and Cluster Configuration	2-1
2.1 Plato Infrastructure Domain Configuration	2-1
3. Database Setup for Oracle Banking Electronic Data Exchange for Corporates	3-1
3.1 Introduction	3-1
3.2 Database Schema Creation	3-1
4. Data Sources Creation in WebLogic	4-1
4.1 Prerequisite	4-1
4.2 Data sources List	4-1
5. Deployments	5-1
5.1 Pre-requisite	5-1
5.2 Deployments List	5-1
5.3 Steps to Deploy as Application	5-2
6. Restarts and Refresh	6-1
6.1 Restarting Servers	6-1
6.2 Restart Order	6-1
7. Logging Area	7-1
7.1 Introduction	7-1
7.2 Logging Area	7-1

1. Preface

1.1 Introduction

This guide would help you to install the CM services on designated environment. It is assumed that all the prior setup is already done related with WebLogic 14c installation, WebLogic managed server creation and Oracle DB installation.

It is recommended to use dedicated managed server for each of the CM services.

1.2 Audience

This document is intended for WebLogic admin or ops-web team who are responsible for installing the OFSS banking products.

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

2. Domain and Cluster Configuration

2.1 Plato Infrastructure Domain Configuration

2.1.1 Prerequisites

- Machine should have JDK has installed.
- Plato, common core, sms services are up and running.

2.1.2 Domain Creation and Configuration

It is recommended to have different managed server in one domain for each application. For Creating Domain and Configuration, please refer to Configuration and Deployment Guide “**How to create and Cluster Configuration**”.

3. Database Setup for Oracle Banking Electronic Data Exchange for Corporates

3.1 Introduction

In this section, you are going to setup database related configuration for Oracle Banking Electronic Data Exchange for Corporates Installation.

Before you proceed with the document, ensure Schema's are being created. It is recommended to have different schema for each application.

3.2 Database Schema Creation

For help in creating database schemas, refer to **Configuration and Deployment Guide** section **Database Schema Creation**.

Create the following database schemas:

**Schema Names mentioned below are recommended, but not mandatory.

Database Schema Names
PLATO
PLATO_UI_CONFIG
PLATO_SECURITY
PLATO_FEED
PLATO_BATCH
COMMON_CORE
PLATOALERTS
PLATOORCH
OBEDX_APP
SMS

4. Data Sources Creation in WebLogic

4.1 Prerequisite

Database and application setup for Oracle Banking Electronic Data Exchange for Corporates services has to be performed prior to deployment setup. The data sources for the respective micro-services must be created first before the application deployment. Each of the data source target to their corresponding servers on which the application will be deployed. The following sections explain the list of data sources required to be created for Oracle Banking Electronic Data Exchange for Corporates services and the steps to configure them in the server.

4.2 Data sources List

For creating data source in please refer Configuration and Deployment Guide “**How to create Data sources section**”.

The table below lists the data sources to be created on each managed server prior to deployment of applications onto managed servers.

Database Connection Pool size to be defined - Oracle Banking Electronic Data Exchange for Corporates services pool configuration should be consistent with plato services.

Service Name	Data Source Name	Mapped Schema	Database	Data source JNDI
obedx-core-service	OBEDXC	OBEDX_APP		jdbc/OBEDX
	CMNCORE	COMMON_CORE		jdbc/CMNCORE
	PLATO	PLATO		jdbc/PLATO
	PLATOUI	PLATO_UI_CONFIG		jdbc/PLATO_UI_CONFIG
	SMS	SMS		jdbc/sms

obedx-workflow-service	OBEDXC	OBEDX_APP	jdbc/OBEDX
	SMS	SMS	jdbc/sms
	PLATOBATCH	PLATO_BATCH	jdbc/PLATOBATCH
obedx-notification-service	OBEDXC	OBEDX_APP	jdbc/OBEDX
	PLATOUI	PLATO_UI_CONFIG	jdbc/PLATO_UI_CONFIG
	SMS	SMS	jdbc/sms
obedx-inquiry-service	OBEDXC	OBEDX_APP	jdbc/OBEDX
	PLATOUI	PLATO_UI_CONFIG	jdbc/PLATO_UI_CONFIG
	SMS	SMS	jdbc/sms

5. Deployments

5.1 Pre-requisite

The database setup and data sources creation have to be performed prior to the application deployment stage. Each of the services corresponds to a specific war file that needs to be deployed into the server. The following sections explain the list of war files of the Oracle Banking Electronic Data Exchange for Corporates service and the steps to deploy them into the server.

Copy below files from the OSDC path to `<WEBLOGIC_DOMAIN_CONFIG_AREA>/bin` folder.

1. `PRE_DEPLOYMENT_SETUP/weblogic/plato-config-deploy.env`

This file applicable only for plato-config-service. Edit this file and provide appropriate values.

2. `PRE_DEPLOYMENT_SETUP/weblogic/domain-config-deploy.env`

This file is applicable for rest of the PLATO services. Edit this file and provide appropriate values

3. `PRE_DEPLOYMENT_SETUP/weblogic/setUserOverrides.sh`

For providing property values, refer “Annexure” section of “Oracle Banking Electronic Data Exchange for Corporates Pre-Installation Guide”.

5.2 Deployments List

Below table, give details of the deployments required on each Server for the Plato application to run. Deploy one after other in the same given order.

Note: INFRA Pre-requisites should be available before proceeding with the Application deployment process.

Application Startup and Deployment Sequence for new installation or Upgrades.

- PLATO Domain < All Plato Infrastructure Services & Plato Services should be deployed as per respective installation document>
- Common Core <All SMS, Common Core and Mid-Office Common Core services should be deployed as per respective installation document>
- Domain services
- All Oracle Banking Electronic Data Exchange for Corporates services must be deploy as per the order mentioned in the table below.
- Below is the recommended list of managed server names and the application distribution on the targets. However, not mandatory, provided the managed server is configured as per the sizing recommendations during the implementation phase.

Application	Archive name	OSDC path	Targets
obedx-core-service	obedx-core-service-{version}.war	{UNZIP OSDC PACKAGE}\OBEDX_SERVICES\obedx-core-service	OBEDXC Managed Server
obedx-workflow-service	obedx-workflow-service-{version}.war	{UNZIP OSDC PACKAGE}\OBEDX_SERVICES\obedx-workflow-service	OBEDXC Managed Server
obedx-notification-service	obedx-notification-service-{version}.war	{UNZIP OSDC PACKAGE}\OBEDX_SERVICES\obedx-notification-service	OBEDXC Managed Server
obedx-inquiry-service	obedx-inquiry-service-{version}.war	{UNZIP OSDC PACKAGE}\OBEDX_SERVICES\obedx-inquiry-service	OBEDXC Managed Server

5.3 Steps to Deploy as Application

To deploy application please refer Configuration and Deployment Guide. “**How to deploy section**”.

6. Restarts and Refresh

Once everything is deployed, the managed servers. In addition, for each application call path “/refresh” for refreshing the configuration properties.

6.1 Restarting Servers

To restart the server please refer to Configuration and Deployment Guide. “**How to restart**” section.

6.2 Restart Order

- Sequence in case of any configuration changes in the plato schema's -> properties table or server arguments (eg : port or host)
 - Restart the plato-config-service and plato-discovery-service.
 - Restart the impacted service
- Sequence in case of any configuration changes in the plato-ui-config schema (eg : port or host)
 - Restart plato-ui-config-service

7. Logging Area

7.1 Introduction

This part of the document will talk about the logs area where after deployment of Plato Applications in WebLogic server.

7.2 Logging Area

Plato Application writes logs in the below area of the server-

<WEBLOGIC_DOMAIN_CONFIG_AREA>/ logs/plato-api-gateway.log

Let us assume a domain has been created **obedxc_domain** in the following area of the server “/scratch/oracle/middleware/user_projects/domains/obedxc_domain”. Logging area for Plato would be **/scratch/oracle/middleware/user_projects/domains/obedxc_domain/logs**.
