Following are some of the acronyms and abbreviations you are likely to find in the manual:

Abbreviation	Description
OBEDX	Oracle Banking Electronic Data Exchange for Corporates
OBRH	Oracle Banking Routing Hub

ORACLE®

2. Integration Guide

2.1 Introduction

OBEDX uses OBRH to integrate itself with other downstream Product Processors and Portal systems. All API calls to host/integrated system goes through OBRH.

2.2 Maintenance in Routing Hub

This section describes the specific maintenances needed in Routing Hub (OBRH) for OBEDX integration.

1. For Consuming Product services via OBRH where OBEDX acts as a consumer, consumer configurations are required to be imported in OBRH.

   Import "OBEDX_Consumer.json" in OBRH. Refer Service Consumer section in OBRH User Manual to know how to import a consumer JSON in OBRH.

2. Once the import is done successfully, you need to update the service provider's default implementation for IP, Port, etc. Refer Add/Edit Implementation section in OBRH User Manual for more information.

Note:
• In case of customizing the request response, Transformations needs to be changed in OBRH. Refer Request and Response Transformation Section in OBRH User Manual.

• Refer OBRH manual for any additional information for maintaining and configuring routing hub.
