Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Lodge Claim Guarantee Issued

As part of Lodge Claim - Guarantee Issued process, the applicant can lodge a claim against the Guarantee/SBLC issued.

Data Enrichment

As part of Data Enrichment, user can enter/update the various fields of the claim request. The user can also input the transaction details.

In case of requests received through SWIFT MT765, the task will be created in DE stage directly and the fields will be populated based on the incoming request.

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task which completed the Registration and Scrutiny and currently at Data enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

The image shows the login page for FuTura Bank. It features the bank's logo and name at the top. Below that is a 'Sign In' heading. There are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' which is masked with dots. A green 'Sign In' button is positioned at the bottom of the form.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the dashboard of the FuTura Bank application. The interface includes a sidebar menu on the left with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main area contains several data widgets:

Multi Level Approval

This stage allows the approver user to approve a Claim Lodged under Guarantee Issued Transaction.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT 765, Approval stage processing is same as in Offline Processing for Guarantee Claim.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

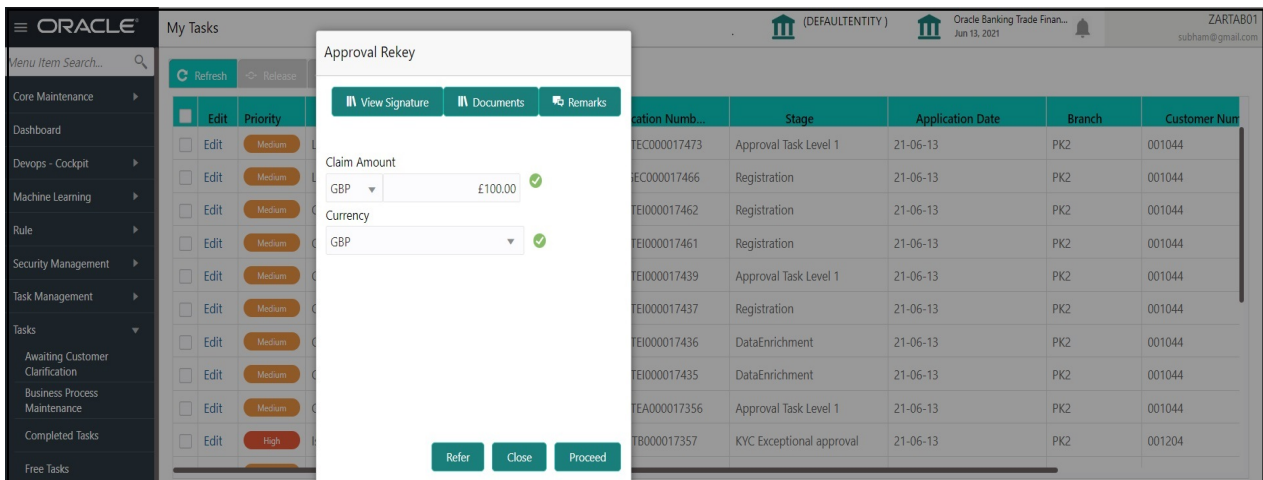

Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

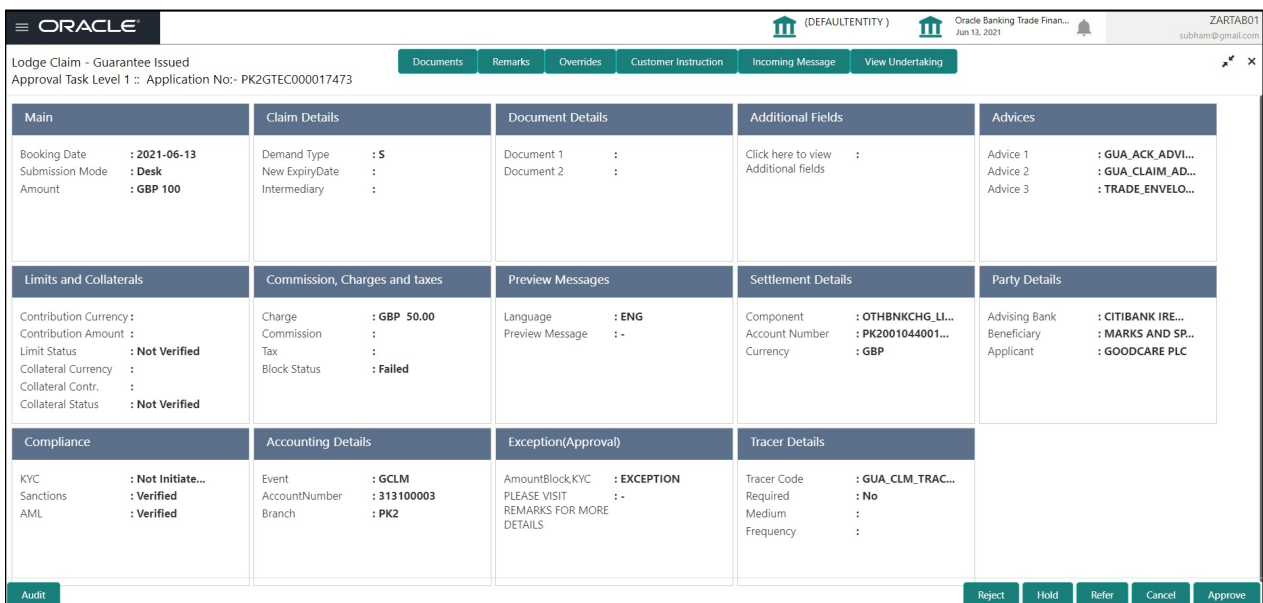

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

-
- Claim Amount
- Currency

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.
