# Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

## Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

## Export LC Advise

As part of Export LC Advice, the advising bank receives the LC to be advised to the beneficiary from the issuing bank. The letter of credit is advised to the beneficiary through the advising bank. The various stages involved for advice of an Export Letter of Credit are:

- Receive and verify documents (Non Online Channel) - Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details
- Input/Modify details of LC - Data Enrichment stage
- Check for limit availability (In case of confirmation)
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges, if applicable.
- Capture remarks for other users to check and act.
- Hand off request to back office

### Note

The user can initiate the transfer of LC advise process from the Export LC Advise screen. The process can be initiated manually at the branch or by parsing the incoming MT 700/720.

In the following sections, let's look at the details for Export LC Advising process:

This section contains the following topics:

Common Initiation Stage	Document Linkage
Registration	Scrutiny
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

## Common Initiation Stage

The user can initiate the new export LC drawing request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

## 2. Click Trade Finance > Initiate Task.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer Id	Select the customer id of the applicant or applicant's bank.
Branch	Select the branch.

### Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

## Registration

A user can register a request for an Islamic Export LC Advise received by mail/Courier at the front desk. During registration, user captures the basic details of the request, check the signature of authorized signatory of the issuing bank, and then upload related documents. On submit of the request, the task should be available for an LC expert to handle in the next stage.

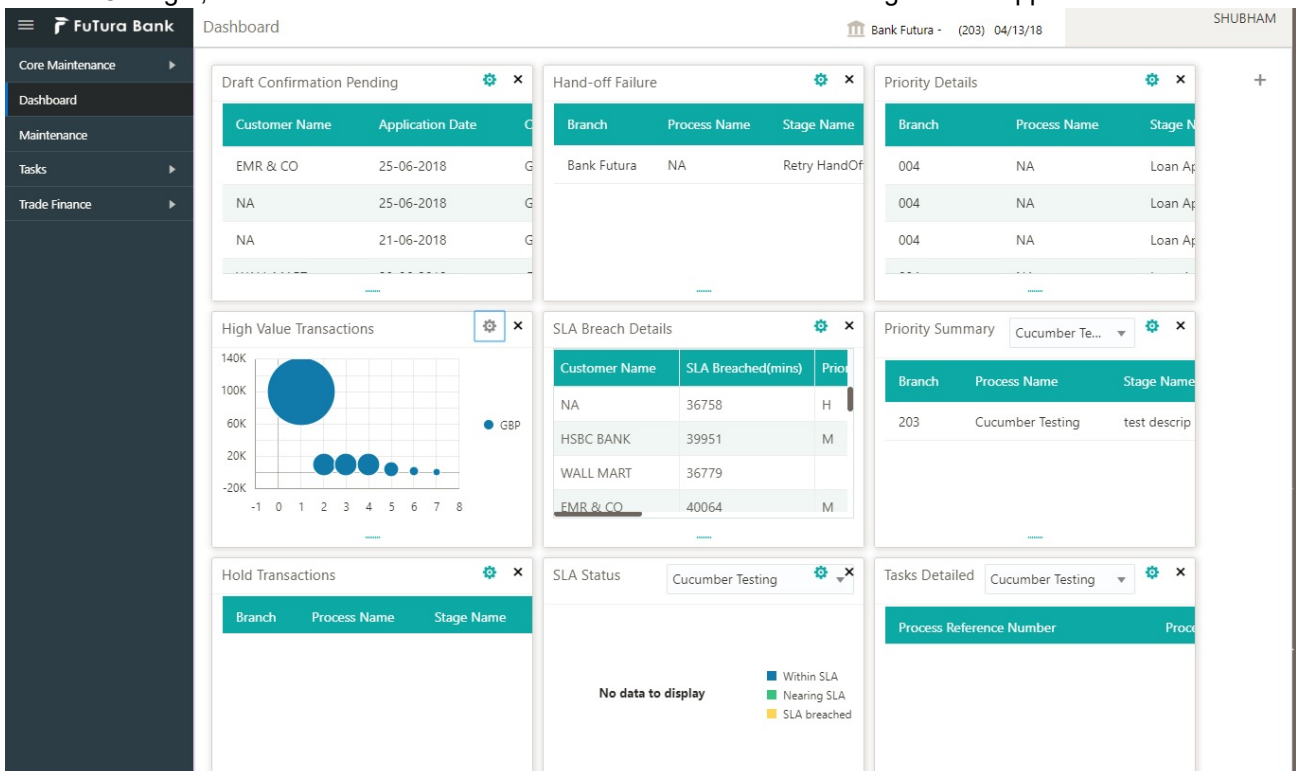

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

### 3. Click Trade Finance> Export - Documentary Credit> Export LC Advise.

The screenshot shows the FuTura Bank Dashboard. The left sidebar contains a navigation menu with 'Export LC Advise' highlighted in red. The main content area displays three widgets: 'Priority Summary' with a table of process stages, 'High Value Transactions' with a bubble chart, and 'High Priority Tasks' with a table of tasks.

Branch	Process Name	Stage Name	No of High Priority Items	No of Medium Priority Items	No of Low Priority Items
GS1	Export LC Amendment Beneficiary Consent	Registration	0	0	0
GS1	Export LC Amendment Beneficiary Consent	Approval1	0	0	0
GS1	Export LC Amendment Beneficiary Consent	Approval2	0	0	0

## Scrutiny

On successful completion of Registration of an Export LC Advice request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized.

**Non Online Channel** - Export LC Advice requests that were received at the desk will move to Scrutiny stage post successful Registration. The request will have the details entered during the Registration stage.

**Online Channel** - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

### Note

In case of SWIFT MT720, requests that are received via online channels like trade portal, external system and SWIFT should be available directly for further processing in OBTFPM from Scrutiny stage.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the bank's logo and name. Below the header, the text "Sign In" is displayed. There are two input fields: "User Name \*" with the value "SRIDHAR" and "Password \*" with masked characters. A green "Sign In" button is located at the bottom of the form.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The screenshot displays the FuTura Bank dashboard for user SHUBHAM on 04/13/18. The dashboard is composed of several widgets:

- Draft Confirmation Pending:** A table with columns "Customer Name" and "Application Date".
- Hand-off Failure:** A table with columns "Branch", "Process Name", and "Stage Name".
- Priority Details:** A table with columns "Branch", "Process Name", and "Stage Name".
- High Value Transactions:** A bubble chart showing transaction values for different categories.
- SLA Breach Details:** A table with columns "Customer Name", "SLA Breached(mins)", and "Priority".
- Priority Summary:** A table with columns "Branch", "Process Name", and "Stage Name".
- Hold Transactions:** A table with columns "Branch", "Process Name", and "Stage Name".
- SLA Status:** A widget showing "No data to display" with a legend for "Within SLA", "Nearing SLA", and "SLA breached".
- Tasks Detailed:** A table with columns "Process Reference Number" and "Process Name".

### 3. Click **Tasks > Free Tasks**.

## Exceptions

The Export LC Advice request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

### Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral. Amount block check will be done for all the parties related to the LC.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM Application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Field	Description	Sample Values
Cancel	Cancel the Export LC Amendment Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

## Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

### Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

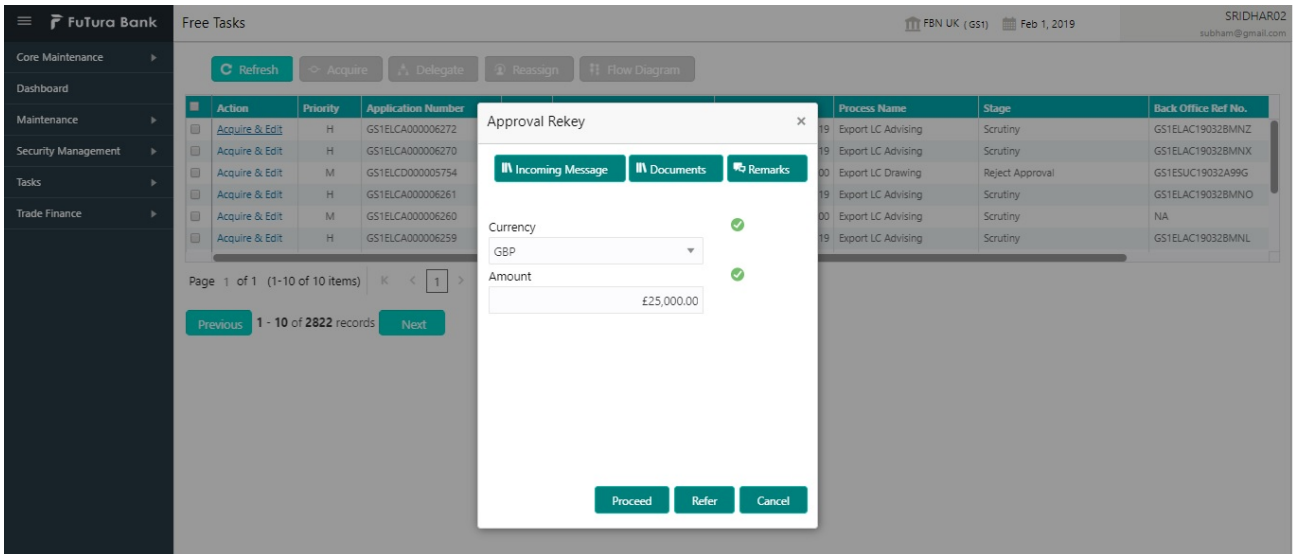

## Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- LC Currency, Amount
- Beneficiary party
- Expiry Date
- Issuing Bank

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

# Processing Incoming MT 710 at the Advise - Through Bank

An advise-through bank is involved in an Export LC Advising process, when the advising bank passes on the LC through another bank for advising the LC to the beneficiary.

The OBTFPM user can process the incoming MT 710 for further advising to the beneficiary. The advise through bank will process the incoming MT 710 in OBTFPM and advise the LC to the beneficiary.

The incoming MT 710 is processed as an STP transaction and the system creates a task in Scrutiny stage of LC Advising process. The MT 710 can also be manually processed if required.

## Registration Stage

### Application Details

All fields displayed under Application details section, would be same as **Export LC Advise - Registration - Application Details**. Refer to [Application Details](#) for more information of the fields.

### LC Details

The fields listed under this section are same as the fields listed under the **Export LC Advise LC Details** section in [Registration](#). Refer to [LC Details](#) for more information of the fields.
