Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export LC Cancellation Islamic

As part of Conventional Export LC Cancel, System enables the user to Cancel to the LC which had been already issued.

The various stages involved for Export LC Cancel are:

- Receive and verify documents and Input Basic details(Non Online Channel)- Registration stage
- Upload of related mandatory and non-mandatory documents
- Input/Modify details of Cancel of LC - Data Enrichment stage
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Export LC Cancel process flow is similar to that of conventional Export LC Cancel process flow.

In the following sections, let's look at the details for export LC cancellation - Islamic process.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

Common Initiation Stage

The user can initiate the new export Islamic LC cancellation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

The screenshot shows the Oracle OBTFPM 'Initiate Task' interface. The left sidebar contains a navigation menu with 'Initiate Task' selected. The main content area is titled 'Registration' and contains a form with the following fields:

- Process Name:** A dropdown menu with 'Export LC Cancellation - Islamic' selected.
- Advising Bank Reference *:** A text input field containing 'PK2ELAC211252002' and a search icon.
- Branch *:** A dropdown menu with 'PK2-Oracle Banking Trade Finan...' selected.

At the bottom right of the form, there are two buttons: 'Proceed' and 'Clear'. The top right of the page shows user information: 'ZARTAB02 subham@gmail.com'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Advising Bank Reference	Select the advising bank reference.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

A user can register request for an Islamic Export LC Cancel received at the front desk (as an application received physically/received by mail/fax). During registration user can capture the basic details of the application and upload the related documents of the applicant. On submit of the request, the request will be available for an LC cancellation expert to handle the request in the next stage.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

The screenshot shows a dark-themed login interface for FuTura Bank. At the top left is the FuTura Bank logo. Below it, the text 'Sign In' is displayed. There are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing masked characters. Below these fields are two buttons: a prominent green 'Sign In' button and a smaller, lighter 'Cancel' button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance - Islamic> Export - Documentary Credit> Export LC Cancellation Islamic.

The registration stage has two sections Application Details and LC Details. Let's look at the details of registration screens below:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values

Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Data Enrichment

A DE User can input new Islamic Export LC Cancel. As part of data enrichment, user will enter/update basic details of the incoming request.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Tasks > Free Tasks**.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks** tab.

The Data Enrichment stage has six sections as follows:

- Main Details
- Availability & Shipment
- Documents & Conditions
- Payment Details
- Details
- Additional Fields
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

Main Details

Main details section has three sub section as follows:

- Application Details
- LC Details

Application Details

All fields displayed under Application details section, would be read only except for the **Priority** and **Cancel LC**. Refer to [Application Details](#) for more information of the fields.

LC Details

The fields listed under this section are same as the fields listed under the [LC Details](#) section in [Registration](#). Refer to [LC Details](#) for more information of the fields. During registration, if user has not captured input, then user can capture the details in this section.

Following are the fields which can be amended apart from the fields carried over from [LC Details](#) of [Registration](#). Provide the details for the amendable fields based on the description in the following table:

Field	Description	Sample Values
Applicable Rules	This field displays the rules of the selected Export LC and user can amend if required.	
Date of Expiry	This field displays the expiry date of the selected Export LC and user can amend if required.	
Place of Expiry	This field displays the place of expiry of the selected Export LC and user can amend if required.	

Field	Description	Sample Values
Currency/Amount	This field displays the value of LC along with the currency details of the selected Export LC.	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details of the selected Export LC.	
Additional Amounts Covered	This field displays the details of additional amount covered of the selected LC and user can amend if required.	

Action Buttons

Limits & Collateral

Limit availability needs to be checked if involves increase in amount or tolerance or both. This is applicable for confirmation of the unconfirmed LC or increasing the amount or tolerance if already LC is already confirmed.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

All the field values are display only and user can not modify the values.

Charge Details

On click of 'Next' in the previous screen, system will auto populate the charges, commission and tax components mapped to the product from the back office system.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	

Field	Description	Sample Values
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified	<p>From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.</p>	
Defer	<p>Select the check box, if charges/commissions has to be deferred and collected at any future step.</p>	
Waive	<p>Select the check box to waive charges/ commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	<p>Charge party will be 'Beneficiary' by Default. You can change the value to Applicant</p>	
Settlement Account	<p>Details of the Settlement Account.</p>	

Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Tag amount that is maintained under the product code.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be beneficiary by default. You can change the value to applicant.	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Tax details are defaulted from the back-end system.

Field	Description	Sample Values
Component	Tax Component type	
Type	This field displays the type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.

Summary

User can review the summary of details updated in Data Enrichment stage Export LC Cancellation - Islamic request.

As part of summary screen, user can see the summary tiles. The tiles should display a list of important fields with values.

Tiles Displayed in Summary

- Main Details - User can view about application details and LC details.
- Party Details - User can view details like beneficiary, issuing bank etc..
- Additional Fields - User can view the details of additional fields.
- Limits and Collaterals - User can view limits and collateral details.
- Charges - User can view charge details.
- Preview - User can view the preview messages.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated in back office.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the required documents. Application displays mandatory documents to be uploaded for cancellation. Place holders are also available to upload additional documents submitted by the applicant.	
Remarks	Provide any additional information regarding the LC. This information can be viewed by other users processing the request.	
View LC	Enables the user to view the latest LC values displayed in the respective fields.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	

Exceptions

The Export LC Cancellation request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the approval.	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Export LC Cancellation in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Application Details

The application details data segment have values for requests received from both non-online and online channels.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view and modify details about application details and LC details, if required.
