Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of Trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Amendment

Guarantee Amendment enables the user to amend an already issued guarantee to the Beneficiary or to the Bank designated to Advise the Guarantee Amendment to the Beneficiary or to another Advising Bank.

If the undertaking has been issued through another counter- counter issuing bank or Local Issuing Bank, the amendment would also be passed on through the same set of banks.

This section contains the following topics:

Registration

Data Enrichment

Multi Level Authorization

Registration

The first stage of Guarantee Amendment process starts from the Registration Stage. During Registration stage, user captures the basic details as well as undertaking details of the amendment application. On submit of the request, the customer will be notified with an acknowledgment letter.

The user has the option to submit, hold, save and hold and cancel the application.

For MT798 message with sub message MT763 when customer initiates a Guarantee Amendment request through SWIFT (Corporate to SWIFT) channel, the MT798 message along with the submessage MT763 containing the request is parsed and based on the STP parameters maintained, can create a Guarantee Amendment Task in OBTFPM. The MT798 message, is routed to the Issuing Bank. Issuing Bank receives the MT798 and creates a task in Guarantee Amendment Process in DE stage in OBTFPM.

The Incoming MT798 message contains 3 sections.

- MT798 Index Message which contains the Sub message type 763
- MT798 Details Message which contains the Sub Message type 767 (MT767 tags with values)
- MT798 Extension Message which contains the Sub Message type 768 (MT708 Extension message tag values) if applicable.

The user can process beneficiary's response to the Guarantee/Standby LC amendment received vide MT798 message through SWIFT.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

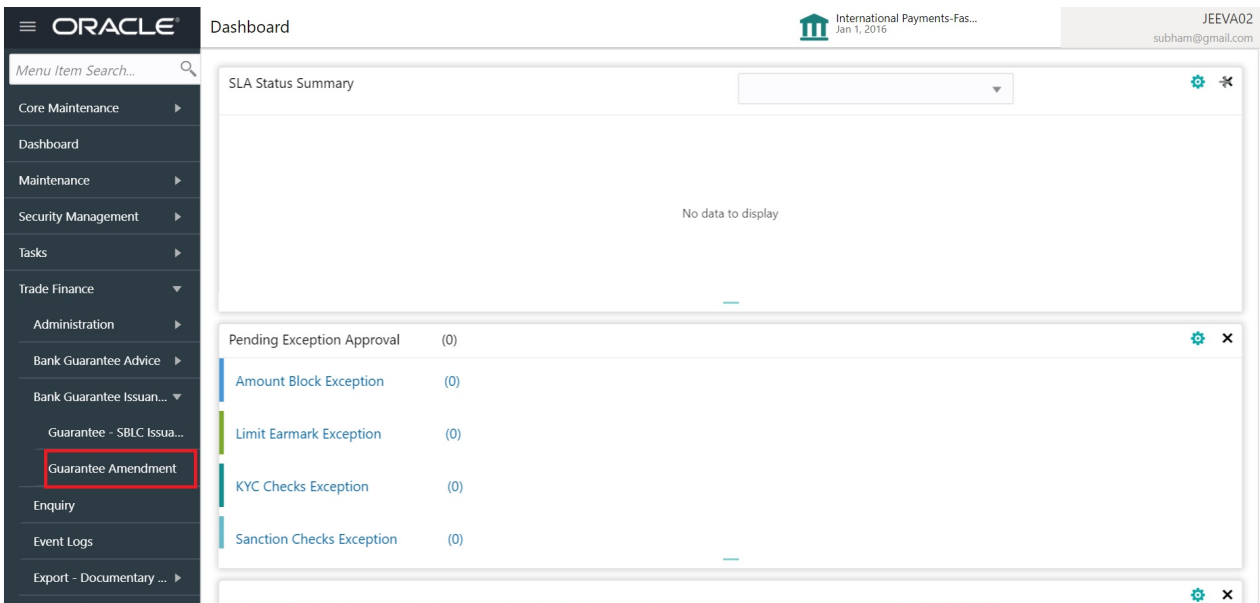

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click **Trade Finance > Bank Guarantee Issuance > Guarantee Amendment**.

The Registration stage has two sections Application Details and SBLC/ Guarantee Details. Let's look at the details of Registration screens below:

The screenshot displays the Oracle Banking Trade Finance interface for a Guarantee Amendment. The top navigation bar includes the Oracle logo, user information (ENTITY_ID1), and the current date (Aug 3, 2023). The main content area is titled 'Guarantee Amendment' and contains two primary sections: 'Application Details' and 'SBLC/Guarantee Details'. The 'Application Details' section includes fields for SBL/Guarantee Number (032GUIR23215AKU4), Branch (032-Oracle Banking Trade Finan...), Process Reference Number (032GTEA000167862), and Amendment Date (Aug 3, 2023). The 'SBLC/Guarantee Details' section is further divided into sub-sections like '22D - Form of Undertaking' (DGAR - Guarantee), '32B - Undertaking Amount' (AED 100.00), and '23B - Expiry Type' (FIXD). It also includes fields for Applicant (032204 Air Arabia), Beneficiary (032205 Aldar Properti), and various other parameters like Product Code (GUIR) and Date of Expiry (Nov 28, 2023). The interface features a clean, modern design with search icons and dropdown menus throughout.

Provide the Application Details based on the description in the following table. In case of MT798, Application Details are defaulted to SWIFT.

Field	Description	Sample Values
Application Details		
SBL/Guarantee Number	The user identification of your external bank account. Provide the undertaking number. Alternatively, user can search the documentary undertaking number using LOV.	
Received From Party	Read only field. System will default the name of the party as available in Guarantee.	
Received From - Customer ID	Read only field. Customer ID will be auto-populated from Guarantee /SBLC Issuance.	001345
Received From - Customer Name	Read only field. Applicant Name will be auto-populated from Guarantee /SBLC Issuance.	

Field	Description	Sample Values
Branch	<p>Read only field.</p> <p>Branch Name will be auto-populated from Guarantee /SBLC Issuance.</p>  <p>Note</p> <p>Once the request is submitted, Branch field is non-editable.</p>	
Priority	<p>System will default the Priority as Low/Medium/High based on maintenance.</p> <p>If no priority is maintained, system defaults the priority as Medium.</p> <p>User can change the priority populated any time before submit of Registration stage.</p>	High
Amendment Number	<p>Read only field.</p> <p>Amendment number will be auto-populated based on the system maintenance.</p> <p>Amendment number increases by 1 for each amendment.</p>	
Submission Mode	<p>Read only field.</p> <p>Submission mode of Guarantee.</p> <p>Amendment request. By default the submission mode will have the value as 'Desk'.</p> <p>Desk- Request received through Desk</p> <p>Email - Request received through Email</p> <p>Courier- Request received through Courier</p>	Desk
Process Reference Number	<p>Read only field.</p> <p>Unique process reference number for the transaction.</p> <p>This is auto generated by the system.</p>	203GTEISS000 001134
Amendment Date	<p>Read only field.</p> <p>By default, the application will display branch's current date. User cannot change the date to back date or future date.</p>	04/13/2018
Customer Reference Number	<p>User can enter the 'Reference number' provided by the applicant/applicant bank.</p> <p>Enables the user to provide a unique Customer Reference Number for the amendment.</p>	
Related Reference	<p>Read only field.</p> <p>Related reference number will be auto-populated based on the system maintenance.</p>	

Field	Description	Sample Values
Beneficiary Consent Required	<p>Toggle on: Beneficiary consent required for the amendment made to the fields.</p> <p>Toggle off: Switch off the toggle if beneficiary consent is not required for the amendments</p>	
SBLC/ Guarantee Details		
Form of Undertaking	<p>Read only field.</p> <p>Form of Undertaking defaults from Guarantee/ Standby Issuance</p>	
Type of Undertaking	<p>Read only field.</p> <p>Type of undertaking defaults from Guarantee/ Standby Issuance.</p>	
Narrative	If Type of Undertaking field value is OTHR , user must provide description in this field.	
Product Code	<p>Read only field.</p> <p>This field displays the product code defaulted from Guarantee/ Standby Issuance.</p>	
Product Description	<p>Read only field.</p> <p>This field displays the description of the product as per the product code.</p>	
Undertaking Amount	<p>System defaults undertaking amount from Guarantee/ Standby Issuance.</p> <p>User can amend the value.</p>	
Amount In Local Currency	<p>Read only field.</p> <p>System fetches the local currency equivalent value for the transaction amount from back office (with decimal places).</p>	
Purpose of Message	<p>Read only field.</p> <p>Purpose of message defaults from Guarantee/ Standby Issuance.</p>	
File Identification	<p>This field enables the user to select the type of delivery channel and its associated file name or reference from the available values:</p> <ul style="list-style-type: none"> ● COUR - Courier delivery ● EMAL - Email transfer ● FACT - SWIFTNet FileAct ● FAXT - Fax transfer ● HOST - Host-to-Host ● MAIL - Postal Delivery ● OTHR - Other delivery channel 	

Field	Description	Sample Values
Narrative	If File Identification field values are COUR or OTHR , user must provide description in this field.	
Expiry Type	Select the expiry type. By default the system displays the expiry date as maintained in Issuance. Select the applicable value from the available options: <ul style="list-style-type: none"> • COND - With Expiry • COND - Without Expiry • FIXD - Specified expiry date (with/without automatic expansion) • OPEN - No specific date of expiry 	
Date of Expiry	The expiry date of the Guarantee Issuance defaults from Guarantee/ Standby Issuance. User can change the date.	
Auto Renewal	Enable the option for auto renewal. This field is enabled if Applicable Rules is URDG - Uniform rules for demand guarantees and Expiry Type is OPEN .	
Extension Required	Enable this option if extension is required for guarantee issuance internal amendment.	
Expiry Condition/Event	Read only field. This field specifies the documentary condition/ event that indicates when the local undertaking will cease to be available. This field is enabled if Expiry Type is COND - With Expiry or COND - Without Expiry . For Guarantee Advising MT760, the value is read only and populated from Incoming MT 760.	
Applicable Rules	Read only field. This field displays the rules of the Guarantee/ Standby issuance.	
Narrative	Specify the description in this field, if Applicable Rules field values is OTHR.	
Applicant Bank	Read only field. This system defaults the applicant bank name available in Guarantee.	
Applicant	Read only field. This field displays the details of the applicant of the selected SBLC/Guarantee Number.	

Field	Description	Sample Values
Beneficiary	<p>System defaults the beneficiary details of the selected Guarantee/ Standby issuance.</p> <p>User can change the beneficiary, if required.</p>	
Advising Bank	<p>System defaults the details of the advising bank.</p> <p>User can change the Advising Bank, if required.</p> <p> Note</p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message “RMA arrangement not available, please change the bank or use MAIL Medium”.</p>	
Advising Bank Reference	Specify the advising bank reference number.	
Advising Through Bank	Specify or click Search icon to search and select the value of advising through bank defaults from Guarantee/ Standby Issuance.	
Counter SBLC/Guarantee Issuing Bank	<p>Read only field.</p> <p>The value of Counter Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is applicable only if the Purpose of Message field has value as ICCO.</p> <p> Note</p> <p>If Counter Issuing Bank has value, and in case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available”.</p>	
Local SBLC/Guarantee Issuing Bank	<p>Read only field.</p> <p>The value of Local Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is applicable only if the Purpose of Message field has value as ICCO or ISCO.</p> <p> Note</p> <p>If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message “RMA arrangement not available”.</p>	

Field	Description	Sample Values
Supplementary Information About Amounts	This field specifies the supplementary information about amount related to undertaking.	
Obligor/ Instructor Party	Click Search to search and select the name of the obligor from the lookup.	
Obligor Collateral Percentage	Specify the value for obligor collateral percentage.	
Closure Date	<p>System default the "Closure Date" value from the previous version of the contract.</p> <p>User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions,</p> <ul style="list-style-type: none"> • Closure Date must be after the Issue Date. • Closure Date must be after the Expiry Date. • Closure Date cannot be blank 	
Accountee	<p>Read only field.</p> <p>System defaults the accountee name available in Guarantee.</p>	
Revenue Sharing Percentage	<p>Read only field.</p> <p>System populates the values from the "Trade Finance Customer Maintenance" if any, from the Guarantee Contract.</p>	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Signature	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>
Documents	The user can upload the documents.

Field	Description
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
View Guarantee/SBLC	Clicking this button allows the user to view the Guarantee/SBLC details.
Guarantee/SBLC Events	On Clicking this button, system will display the details of guarantee issuance and amendments, if any in chronological sequence.
Remarks	The user can provide any additional information regarding the Guarantee ammendment. This information can be viewed by the users in other stages of the process.
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>
Cancel	Cancels the Guarantee Amendment Registration stage inputs and system should clear the details captured in the screen. The task will get deleted.
Save and Close	<p>Save the information provided and displays the task in you queue for working later.</p> <p>This option will not submit the request</p>
Submit	<p>Task will get moved to next logical stage of Guarantee Issuance.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>

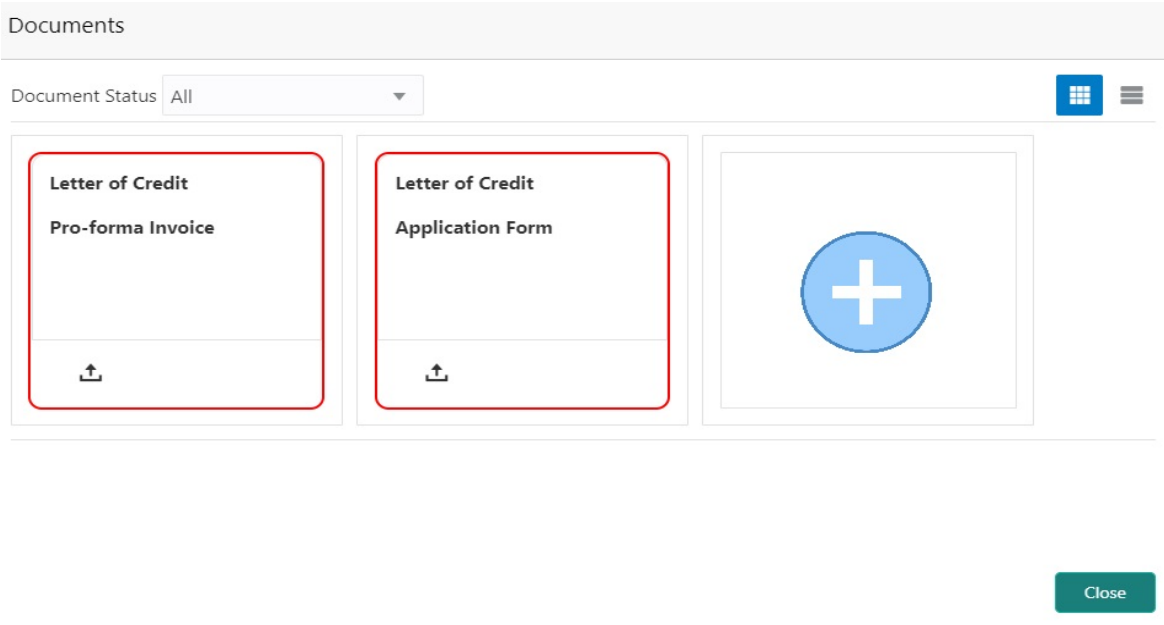

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

OBTFPM- OBDX Bidirectional flow

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling.

OBTFPM user, for task received from online channel, raise clarification and receive response from the customer.

1. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

Oracle OBTFPM Interface

Import LC Issuance - Scrutiny :: Application No: PK2ILCI000042424

Documents Modal:

- Proforma Inv 1.pdf
- Created - 2020-12-13
- By - SUNDAR01

Background Fields:

- Application No: PK2ILCI000042424
- Priority: Medium
- LC Details: Revolving, Advising Bank, 31C - Date Of Issue (Mar 22, 2019), 51A - Applicant Bank

2. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.

3. In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks **Request Clarification** button to request for online clarification from customer.

The screenshot shows the Oracle application interface for 'Guarantee Amendment - Data Enrichment'. The application number is PK2GTEA000042587. The 'Request Clarification' button is highlighted in red at the bottom right of the screen.

Application Details:

<input checked="" type="checkbox"/> Edit	M	Guarantee Amendment	PK2ILCA000042586	PK2ILCA000042586	Scrutiny	20-12-16	PK2	006466	

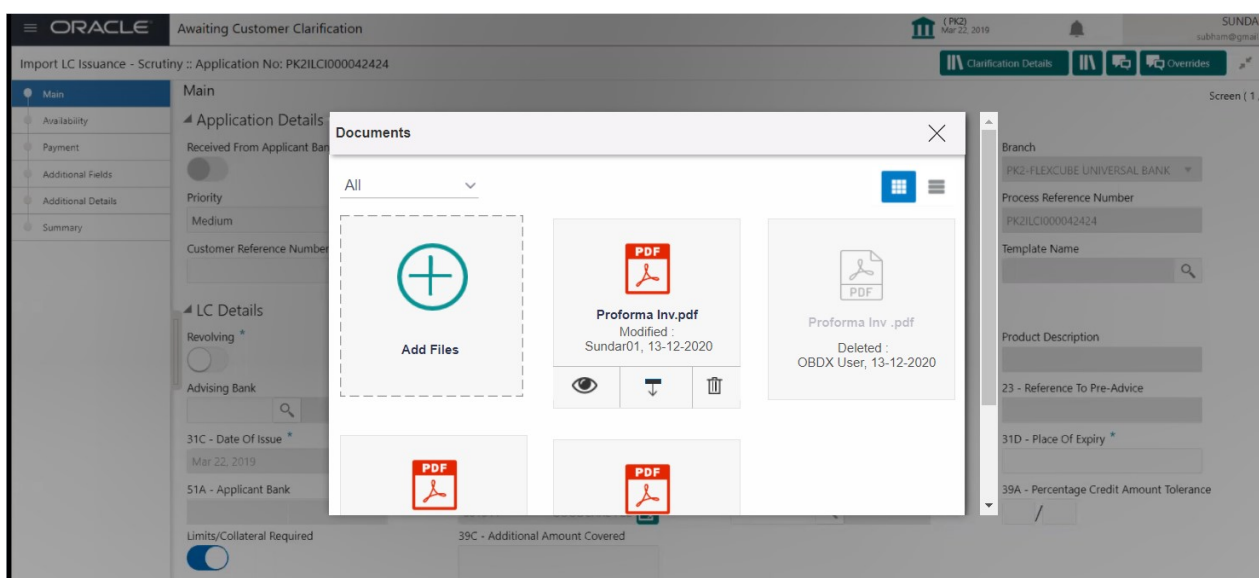

7. Click **Edit**.

Clarification	Raised By	Clarification Date	Response	Response Date	Response Type	Status
<input type="checkbox"/> Proforma Invoice is not uploaded. Instead some other document is	SUNDAR01	2019-03-21T18:31				Clarification Requested

8. The user can click **Accept Clarification** button, if the query raised has been answered by the customer. The status should change to Clarification Accepted. on next the task moves to the next logical stage.

9. Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in

a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the documents.

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.

1. Customer Maintenance details are replicated from OBTF to OBTFPM.
2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

As part of Data Enrichment, user can amend the various allowed fields, check the limits and other legal and financial risks, the bank is exposed to and either approve or reject or refer the transaction to the customer for changes.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

In case of MT798 message, if the User encounters validation error during handling the task, user can put the transaction into hold and seek clarification from the customer in this stage. In DE stage the task is verified and enriched. The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value.

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The Guarantee Amendment - Data Enrichment stage has three sections as follows:

- Main Details
- Sequence B (Continued)
- Sequence C
- Acknowledgement Details
- Additional Fields
- Amendment Snapshot
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Guarantee Amendment - Data Enrichment stage.

User can enter/update the following fields. Some of the fields that are already having value from registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- SBLC/ Guarantee Details

Application Details

All fields displayed under Application details section, would be read only except for the Priority. Refer [Registration](#) for more information of the fields.

The screenshot displays the Oracle application details for a Guarantee Amendment (Application No: 032GTEA000167708). The interface includes a top navigation bar with tabs for Clarification Details, Documents, Remarks, Overrides, Customer Instruction, Incoming Message, View Undertaking, and Signatures. The main content area is organized into sections: Application Details (including fields for SBL/Guarantee Number, Branch, Process Reference Number, and Beneficiary Consent Required), SBLC/Guarantee Details (including 22D - Form of Undertaking, Product Description, 23X - File Identification, and 40C - Narrative), and various input fields for details like Type of Undertaking, Amount, Expiry, and Applicant. At the bottom, there are action buttons: Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

SBLC/ Guarantee Details

The fields listed under this section are same as the fields listed under the SBLC Guarantee Details section in [Registration](#). During Registration, if user has not captured input, then user can capture the details in this section.

The screenshot displays the Oracle application details for a Guarantee Amendment, focusing on the SBLC/Guarantee Details section. The interface includes the same navigation menu and main content area as the previous screenshot, but with the SBLC/Guarantee Details section expanded. The fields for Type of Undertaking, Amount, Expiry, and Applicant are visible. At the bottom, there are action buttons: Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Field	Description
Documents	<p>Click the Documents button to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. Field	Description
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>The reject codes are:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others. The user would be able to select a Reject code and give a Reject Description. <p>Other users should be able to see the reject reason in remarks window throughout the process.</p>
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>

Field	Description
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Back	On click Back , user navigates to previous step.
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.

Additional Fields

This section displays the additional fields based on the User defined fields maintained in the system.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents.
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.

Field	Description
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(763,767/768) and MT798 message(728,787).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
View Undertaking	<p>Clicking this button allows the user should to view the undertaking details.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	<p>User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.</p>

Field	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>The reject codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others. The user would be able to select a Reject code and give a Reject Description. <p>Other users should be able to see the reject reason in remarks window throughout the process.</p>
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others
Hold	<p>The details provided will be registered and status will be on hold.</p>
Cancel	<p>Cancels the details captured in the screen. The task will get deleted.</p>
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>
Back	<p>On click Back, user navigates to previous step.</p>
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>
Clarification Details	<p>Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.</p>

Amendment Snapshot

At this step user can view all the fields that are amended with the old values and the amended value of the Guarantee/Standby undertaking.

The screen displays the latest Guarantee /SBLC value before amendment and the new amended value.

Field	Description	Sample Values
Sequence B		
Field Name	Displays the fields that are amended.	
Amended Value	Displays the Guarantee /SBLC value before amendment.	
Value as per Undertaking	Displays the Guarantee /SBLC new amendment value after amendment.	
Sequence C		
Field Name	Displays the fields that are amended.	
Amended Value	Displays the Guarantee /SBLC value before amendment.	
Value as per Undertaking	Displays the Guarantee /SBLC new amendment value after amendment.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents.
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.

Field	Description
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified Amount	User can enter a new amount in 'Modified amount' field. This will be the new charge for the modified component.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Split	The bank User can split the Charges/Commission by enabling/disabling the flag as per the requirement.	

Field	Description	Sample Values
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system. Tax details are defaulted from the back-end system.

Following Tax Details will be displayed:

Field	Description	Sample Values
Component	Tax Component type.	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If tax are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	
Settlement Account	Details of the settlement account.	

Split Settlement

Once the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice, new section "Split Settlement" will appear below the 'Tax' section. The default parties in Split row should be fetched from OBTF.

Field	Description	Sample Values
Component	The split component type eligible for Split .	
Currency	The currency of split settlement.	
Amount	The amount of split settlement.	

Split Settlement Details

Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.

Split Settlement Details ×

Component	Amount
CHGTRAMND_LIQD_S01	50
Customer	<input type="checkbox"/>
001044	Account Currency
Account	GBP
PK20010440017	Percentage
Branch	50.00
PK2	Original Exchange Rate
Exchange Rate	1
1	Negotiation Reference
Party Type	
BEN	Loan/Finance Account
AR-AP Tracking	N
<input type="checkbox"/>	
Negotiation Rate	

Field	Description	Sample Values
Sequence	The sequence number is auto populated with the value, generated by the system.	
Component	The split component type eligible for Split.	
Amount	The system splits the respective Charge/ Commission amount automatically between counter party and third party with 50% value by default. The bank user can modify the amount. More than two splits are not allowed.	
Customer	Indicates the ID of the Customer in Split Settlement Details section.	
Account	The system defaults the settlement account. User can modify the settlement account. System initiates a call to common core tables within OBTFPM to select the account	
Account Currency	Defaults the currency of the account.	
Branch	Indicates the branch of the customer where transaction is getting processed.	
Percentage	The system splits the respective Charge/ Commission percentage automatically between counter party and third party with 50% value by default. More than two splits are not allowed. The bank user can modify the amount. The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount.	
Exchange Rate	System populates the exchange rate maintained.	
Original Exchange Rate	System displays the Original Exchange Rate as simulated in split settlement details section.	
Party Type	System displays the party type in split settlement details section.	
Negotiation Reference	Specify the negotiation reference number.	
AR-AP Tracking	Indicates to defer the charge/ commission in Split Settlement Details section. The user can modify the AR-AP Tracking flag as per the requirements.	
Loan/Finance Account	Displays the loan account.	

Field	Description	Sample Values
Negotiation Rate	Specify the negotiation rate.	

Amendment of Guarantee/SBLC Issued – Preview Message

The bank user can view a preview of the outgoing SWIFT message and advise simulated from back office.

Note

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number.

The Preview section consists of following.

Preview – SWIFT Message

Based on the guarantee amendment captured in the previous screen, the preview message simulated from the back office and the user can view the message.

Preview – Mail Advice

Based on the guarantee amendment captured in the previous screen, the preview message-mail advice is simulated from the back office and the user can view the message.

Legal Verification Required:

If the guarantee amendment message has to be verified and approved by Legal department before issue, the user can select the option for legal verification.

Draft Confirmation Required:

If the guarantee amendment message is to be approved by the customer before issue, then the user has to select the option for draft confirmation.

Field	Description	Sample Values
Preview - SWIFT Message		
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	
Message Status	Read only field. Display the message status of draft message of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of draft message of guarantee details.	
Preview Message	Display a preview of the draft message.	
Preview - Mail Device		
Language	Read only field. English is set as default language for the preview.	
Advice Type	Select the advice type.	
Message Status	Read only field. Display the message status of advice type of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of advice type of guarantee details.	
Preview Message	Display a preview of the advice.	
Draft Confirmation		
Draft Confirmation Required	This toggle enables the user to select if draft confirmation is required or not	
Following fields will have values on receipt of customer response.		
Customer Response	User can enter the response received from customer. If the response is received online, the response is auto populated in this field by the system	
Customer Remarks	Remarks from the customer for the draft	
Response Date	Customer Response received date.	

Field	Description	Sample Values
Customer Email ID 1	Default email address of the customer. System fetches the Email ID from Customer Address maintenance in Back office and auto populates the available Email ID.	
Customer Email ID 2	By default this field is blank. User can search and select the Email ID from lookup from the Customer Email Address field of the customer maintenance in Back Office and replicated in OBTFPM.	
Legal Verification		
Legal Verification Required	Enable the toggle, if the guarantee amendment message has to be verified and approved by Legal department before issue.	
Legal Response	User can enter the legal response.	
Legal Remarks	Displays the legal remarks entered by the user.	
Verification Date	Displays the legal verification date.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>

Field	Description
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Cancel	Cancel the Data Enrichment Stage Inputs.
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p>
Back	On click Back , user navigates to previous step.
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p>
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Field	Description
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(763,767/768) and MT798 message(728,787).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
View Undertaking	Clicking this button allows the user should to view the undertaking details.
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>

View Undertaking	Clicking this button allows the user should to view the undertaking details.	

Legal Verification

The Legal verification stage allows the user to review and approved the guarantee message received under a Guarantee Amendment.

Legal Verification may be required for Guarantee amendment based on guarantee text format (standard vs non-standard) and other factors. In case Legal verification is required, this task is created in the system.

As a legal approver, log in to Oracle Banking Trade Finance Process Management (OBTFFPM) system to see the legal verification required tasks for Trade Finance transactions listed in queue. On opening the task, the user views the guarantee text that has to be verified.

Application Details

All fields displayed under Application details section, would be read only.

Provide the Application Details based on the description in the following table:

Field	Description
Application Details	
Received From Applicant	Read only field.
Received From - Customer ID	Read only field.
Customer Name	Read only field.
Branch	Read only field.

Cancel	Cancel the Scrutiny Stage Inputs.
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request</p>

Field	Description
Back	On click Back , user navigates to previous step.

Customer Response - Draft Confirmation

In this section, the user can review and handle the customer's response received for the draft confirmation for Guarantee Amendment transactions, which is sent to the customer for their verification and confirmation. The system sends Draft MT767 along with up to seven MT775 messages as attachment to the customer.

The customer response can be received both by online and offline mode.

In non-online mode, user receives the response in the branch. Log in into OBTFPM application, and open the task to see customer response pending tasks for trade transactions listed in queue. On opening the task, the user views and update the customer response.

In online mode, the customer would receive a mail notification from the bank with a draft of the Guarantee Amendment. The customer can 'Approve' or 'Reject' post reviewing the draft through mail. The customer response will automatically be updated in OBTFPM. Based on the customer response; the task will move to the next stage or are referred to the previous stage for further update.

The draft mail will be addressed to a primary contact and a secondary contact. On approval or reject, an acknowledgement will be sent to the primary and secondary contacts confirming receipt of response. As the draft mail is sent to more than one recipients, system to follow the below guidelines to register the customer response.

- Approved from Primary Mail, Rejected from Secondary Mail - Application already Approved from Primary mail
- Approved from Primary Mail, Approved from Secondary Mail - Application already Approved from Primary mail
- Rejected from Primary Mail, Approved from Secondary Mail - Application already Rejected from Primary mail
- Rejected from Primary Mail, Rejected from Secondary Mail – Application already Rejected from Primary mail
- Approved from Secondary Mail, Approved from Primary Mail - Application already Approved from Secondary mail
- Approved from Secondary Mail, Rejected from Primary Mail - Application already Approved from Secondary mail
- Rejected from Secondary Mail, Approved from Primary Mail - Application already Rejected from Secondary mail
- Rejected from Secondary Mail, Rejected from Primary Mail - Application already Rejected from Secondary mail

Draft mail to customer

Response from Customer

Draft Message	Read only field.	

Draft Confirmation

All fields displayed under Draft Confirmation section, would be read only.

Field	Description	Sample Values
Draft Verification required	Read only field.	

Customer Response - This field will be available for you to update any of the below response based on the customer's reply

- Accepted
- Rejected

For non-online response – User can select customer response from one of the three drop list values mentioned above.

For Online response – Read only

Customer Remarks - Capture the remarks of the customer.

Response Date - Non-Online channel – Update the date on which the customer response has been received. Online Channel – Read only

Tiles Displayed in Summary

- Main Details - Read Only. User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Party Details - Read Only. User can view the application details and Guarantee/Standby details. User can modify the details if required
- Sequence B: User can view the details of the Sequence B message if available
- Sequence C – User can view the details of Sequence C message if available
- Amendment Details - Read Only. User can view the amended field details
- Limits and Collaterals - Read Only. User can view the limits and collateral details. User can modify the details if required.
- Charges - Read Only. User can view the charge details. User can modify the details if required.
- Preview Messages - User can view the preview details. User can modify the details if required.
- Settlement Details - User can view the settlement details.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Submit	<p>On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee/SBLC Amendment.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>

Field	Description
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. The user would be able to select a Reject code and give a Reject Description <p>Other users should be able to see the reject reason in remarks window throughout the process.</p>
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes.</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.

Exceptions

The Guarantee Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval - Trade Finance Transactions

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number” to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off Refer:
- Refer
 - Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account
Amount Bock Exception This section will display the amount block exception details

Application Details

All fields displayed under Application details section, would be read only.

Tiles Displayed in Summary

- Main - User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Sequence B(Continued) - User can view the details of the sequence B message if any.
- Sequence C - User can view the details of the sequence C message if any.
- Acknowledgement Details - User can view the acknowledgement details.
- Amendment Snapshot - User can view the comprehensive fields amended with the previous value and new amended value.
- Advices - User can view the advices details.
- Limits and Collaterals - User can view the limits and collateral details. User can modify the details if required.
- Commission, Charges and Taxes - User can view the commission, charges and taxes details. User can modify the details if required.
- Preview Messages - User can drill down to view the message preview, legal verification and customer draft confirmation details. The message preview screen has the Legal Verification details.
- Settlement amount will be funded (outside of this process)Allow account to be overdrawn during hand-off

Amount Block Details

All the data elements shown in the tables below will go in as read-only information to the Amount Block exception System

Provide the Amount Block Details based on the description in the following table:

Limits Details

Field	Description	Sample Values
Customer ID	Unique Customer Identification Number of the customer for whom the credit exception approval is required.	
Line ID	Line ID under which the limit check was originally performed.	
Contribution%	Percentage of the transaction amount that need to be earmarked.	
Contribution Currency	Currency of the transaction.	
Contribution Amount	User can enter the contribution amount to be utilized under the selected limit.	
Limit Check Response	Response received from backend system. Response can be Limit Earmark Created or Limits not available.	

Provide the collateral details based on the description provided in the following table:

Field	Description	Sample Values
Collateral Type	This can be either Cash Collateral or Deposits.	
Collateral %	Percentage of the transaction amount that needs to be marked against a collateral.	
Currency	Currency of transaction.	
Amount	Amount that will be marked as collateral.	
Settlement Account	Account that will be marked as collateral.	

Charge Details

Provide the Charge Details based on the description provided in the following table:

Field	Description	Sample Values
Type	The type for which the amount block is required eg: charges, cash collateral, deposit etc.	
Contact Currency	The currency of contact.	
Block Amount	The amount for which the block is required.	
Branch	The branch under which the amount block has to be made.	
Account	Settlement account to be used.	

Field	Description	Sample Values
Account Currency	Currency in which the settlement account is maintained.	
Available Balance	The outstanding balance in the account when the amount block was placed in contract currency.	
Block Reference Number	Unique Amount Block reference.	
Block Status	The status of amount block – Success or failure	
Block Status Detail	Failed Reason (This field will have value only if amount block is failed).	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the Amount Block Exception Inputs.	

Field	Description	Sample Values
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	

Multi Level Authorization

The Approval user can approve a Guarantee Amendment Transaction.

As an approver user, log in into OBTFPM application and open the task to see the summary tiles.

The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to validate the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

In case of MT798, on approval the task is handed off to back office system to amend the Guarantee contract and generate the required MT767/768 messages. Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount
-

Re-key is applicable only in case of to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
