Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance Closure - Islamic

As part of Conventional Guarantee Issuance Close, System enables the user to close the Guarantee which had been already issued.

The various stages involved for Guarantee Issuance Closure are:

- Receive and verify documents and input basic details- Registration stage
- Upload of related mandatory and non-mandatory documents
- Input/Modify details of Close of Guarantee - Data Enrichment stage
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Close process flow is similar to that of conventional Guarantee Issuance Close process flow.

In the subsequent sections, let's look at the details for Islamic Guarantee Issuance Closure process:

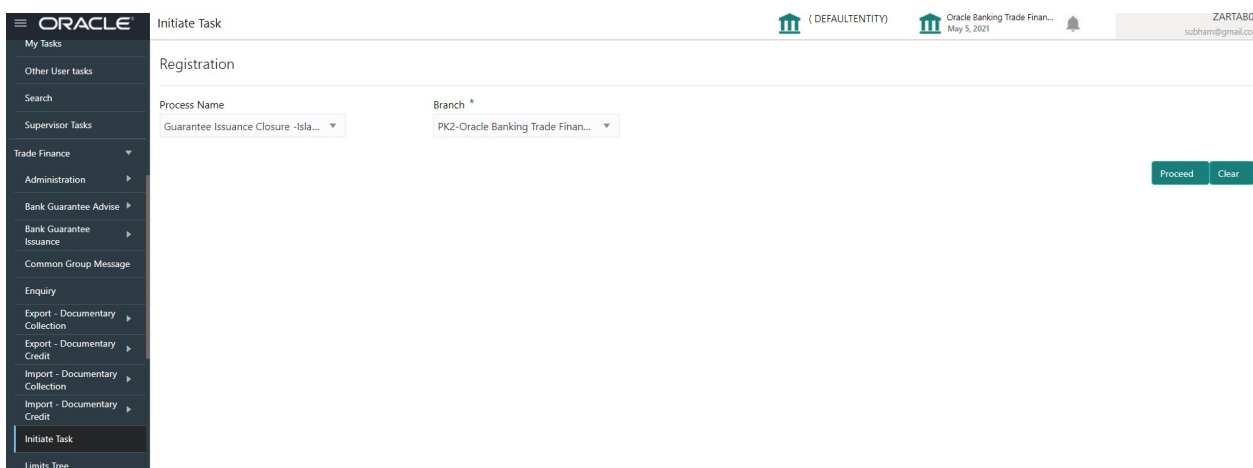

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval
Customer - Acknowledgement letter Format	Customer - Reject Letter Format

Common Initiation Stage

The user can initiate the new Islamic guarantee issuance closure request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.

Field	Description
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The user can register a request for the Closure of Guarantee/SBLC Issued received at the front desk (as an application received physically/received by mail/fax).

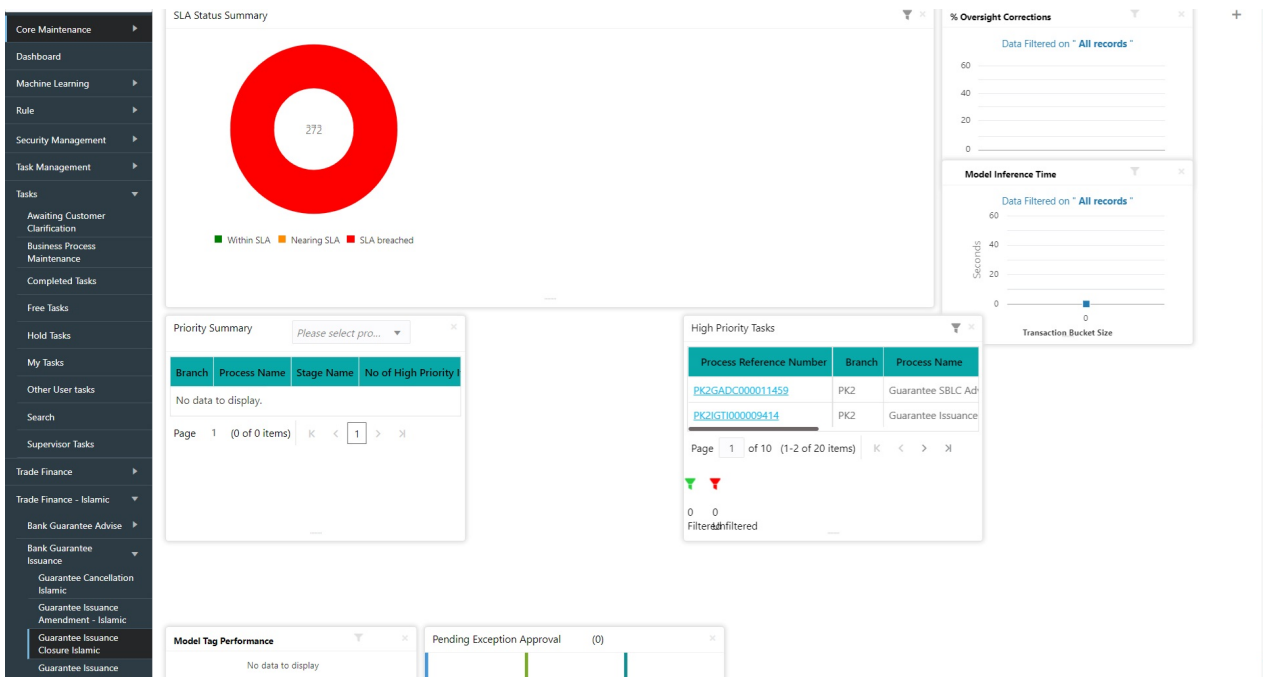

During registration stage, user can capture the basic details of the application, check the signature of the applicant and upload the related documents of the applicant. It also enables the user to capture some additional product related details as an option. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for a Guarantee Issuance expert to handle the request in the next stage

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance - Islamic > Bank Guarantee Issuance > Guarantee Issuance Closure - Islamic.

The registration stage has two sections Application Details and SBLC/Guarantee Details. Let's look at the registration screens below:

Application Details

Back	<p>Click Back to move the task to the previous segment.</p>	

Multi Level Approval

Approval user can review and approve the Closure of Guarantee/SBLC Issued. The user can view the summary of details updated in multilevel approval stage for Closure of Guarantee/SBLC Issued request.

The user log in to the application to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Undertaking Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

The screenshot shows a dialog box titled "Approval Rekey". At the top right is a close button (X). Below the title bar are two buttons: "Documents" and "Remarks". The main content area has two input fields. The first is labeled "Currency" and has a dropdown menu with "GBP" selected, followed by a green checkmark. The second is labeled "Undertaking Amount" and has a text input field containing "£10,000.00", also followed by a green checkmark. At the bottom of the dialog are three buttons: "Refer", "Close", and "Proceed".
