Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office Platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during Transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance Internal Amendment - Islamic

Conventional Guarantee Issuance Internal Amendment process enables the user to make the following amendments to the Guarantee which has been already issued.

- Change in Limits
- Change in Collateral

The various stages involved in Islamic Internal Amendment of Guarantee Issued are:

- Receive and verify documents and input the basic details- Registration stage
- Input/Modify details - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements.
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Internal Amendment process flow is similar to that of conventional Guarantee Issuance Internal Amendment process flow.

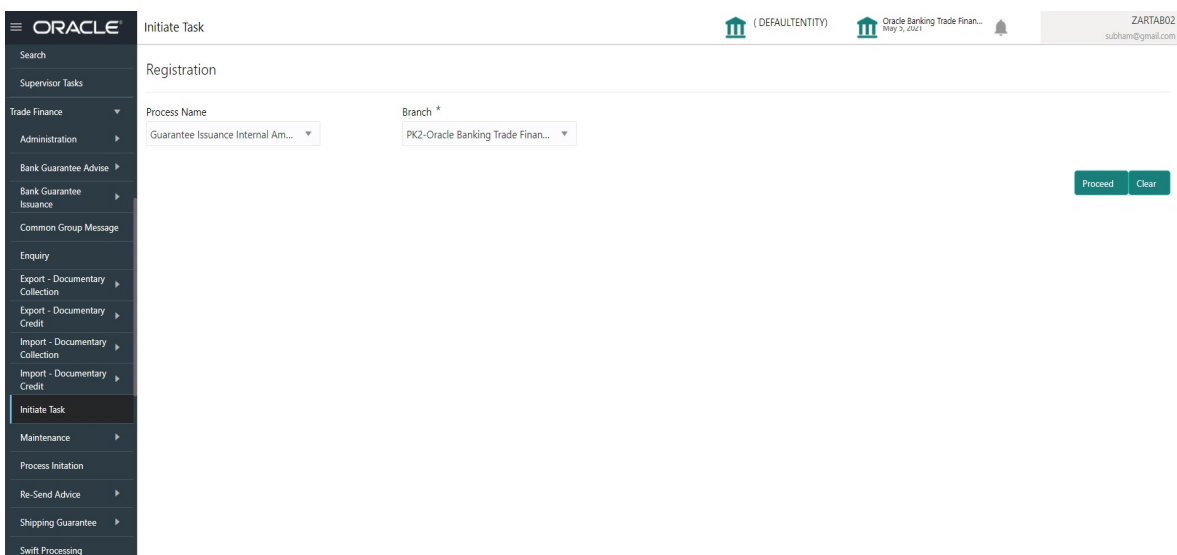

This chapter contains the following topics:

Common Initiation Stage	Registration
Bi-Directional Flow for Offline Transactions Initiated from OBTFPM	Multi Level Approval

Common Initiation Stage

The user can initiate the new Islamic guarantee issuance internal amendment request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

As a Registration user can register an Islamic internal amendment to a Guaranteed/SBLC issued request, received at the front desk (as an application received physically/received by mail/fax). On submit of the amendment request, the customer should be notified with acknowledgment and the request should be available for an Guarantee Amendment expert to handle in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

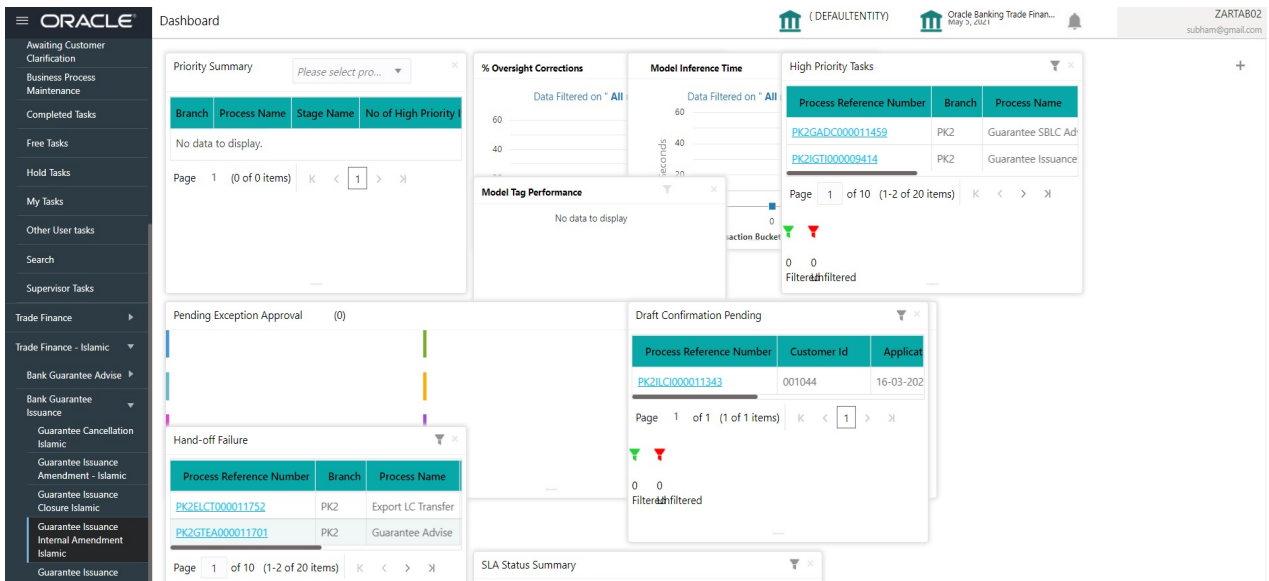

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance - Islamic > Bank Guarantee Issuance > Guarantee Issuance Internal Amendment - Islamic.

The Registration stage has two sections Application Details and Undertaking Details. Let's look at the Registration stage:

Cancel	Cancels the Guarantee Issuance Internal Amendment Islamic. Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the

counterparty is a OBDX customer by checking the flag “Trade Finance Portal” in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.

4. In case submission mode is not “Online”, and if the “Trade Finance Portal” flag is set to ‘No’ in Customer Maintenance Table, the system should display the error message that ‘The customer is not subscribed to Trade Finance Portal’. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

At this stage you can register a request for Islamic Internal Amendment of Guarantee/SBLC Issued.

As part of Data Enrichment, you can update the details already captured in Registration stage and enter new details in Data Enrichment stage of Islamic Guarantee Issuance Internal Amendment process.

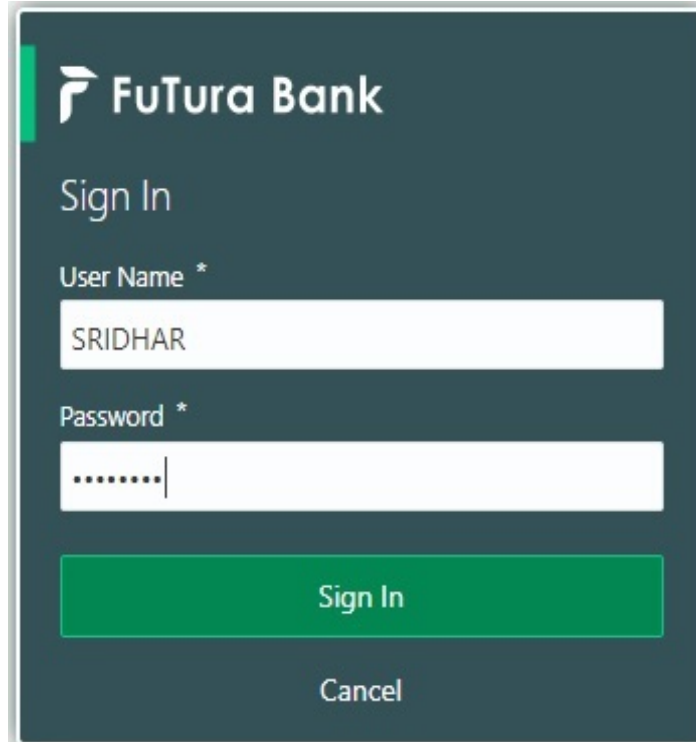

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task which completed the Registration and currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Tasks > Free Tasks.

The screenshot shows the Oracle Free Tasks page. The left sidebar contains navigation options like Core Maintenance, Dashboard, Machine Learning, Maintenance, etc. The main area displays a table of tasks. The 'Acquire & Edit' button is highlighted in the top toolbar.

Action	Priority	Process Name	Process Reference Number	Application Number	Stage	Application Date	Branch	Customer Number
Acquire & Edit	Medium	Guarantee Issuance Internal Amendment L...	PK2IGI000071696	PK2IGI000071696	DataEnrichment	22-03-28	PK2	000153
