Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import Documentary Collection Update Booking

Import Collection update Booking process involves update of an existing documentary collection.

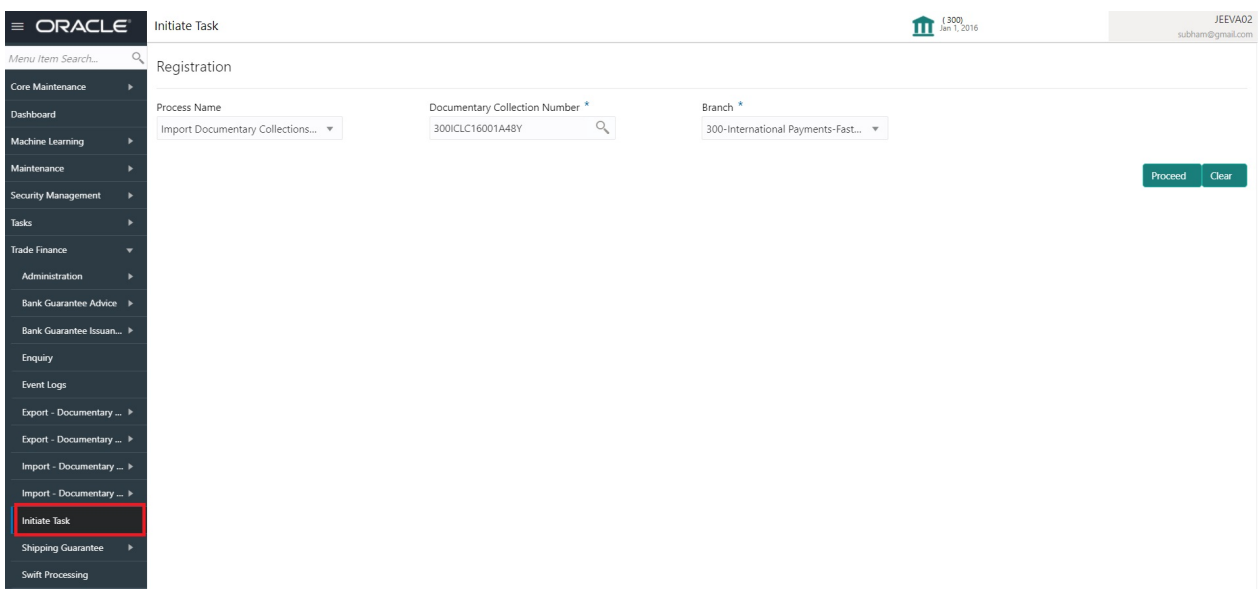

This section contains the following topics:

Common Initiation Stage	Reject Approval
Registration	Document Linkage
Exceptions	Multi Level Approval

Common Initiation Stage

The user can initiate the new import collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Documentary Collection Number	Select the Documentary Collection Number.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.

Field	Description
Clear	The user can clear the contents update and can input values again.

Registration

The process starts with Registration stage. In Registration stage, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

3. Click Trade Finance> Import Documentary Collection> Import Documentary Collection Update.

The screenshot displays the Oracle Flexcube Universal Banking Dashboard. On the left is a dark sidebar menu with the Oracle logo at the top. The menu items include: Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, Trade Finance (expanded), Bank Guarantee Advice, Bank Guarantee Issuan..., Enquiry, Export - Documentary..., Import - Documentary..., Import Documentary C..., and Import Documentary C... (highlighted with a red box). The main dashboard area is titled 'Dashboard' and shows several data panels. At the top right, it displays 'FLEXCUBE UNIVERSAL BAN...' and 'SRIDHAR01' with the email 'subham@gmail.com'. The date 'Jan 1, 2014' is also visible. The dashboard contains four panels: 'High Value Transactions' (No data to display), 'High Priority Tasks' (table with columns Branch, Process Name, Stage; No data to display), 'Priority Summary' (table with columns Branch, Process Name, Stage Name; No data to display), and 'A Status Summary' (table with columns Export Documentary Collections-Upd...). A search bar 'Menu Item Search...' is located at the top left of the dashboard area.

The Registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Documentary Collection Number	<p>Provide the documentary collection Number. Alternatively, user can search the documentary collection reference using LOV.</p> <p>In the LOV, user can search giving any combination details of Documentary Collection Number, Drawer, Currency, Amount, Product Code and Booking Date to fetch the collection details. Based on the search result, select the applicable documentary collection to update the details.</p>	
Drawee	<p>Read only field.</p> <p>Drawee ID and name will be auto-populated based on the selected Documentary Collection Number.</p> <p>The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.</p> <p> Note</p> <p>If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.</p>	
Branch	<p>Read only field.</p> <p>Branch details will be auto-populated based on the selected Documentary Collection Number.</p>	203-Bank Futura -Branch FZ1

Field	Description	Sample Values
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of task in Registration stage.	High
Submission Mode	Select the submission mode of Import Collection Update Booking request. By default the submission mode will have the value as 'Desk'. Desk- Request received through Desk Courier- Request received through Courier	Desk
Update Date	By default, the application will display branch's current date.	04/13/2018
Remitting Bank/Remitter	Read only field. Remitting Bank/Remitter will be auto-populated based on the selected Documentary Collection Number. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.  Note In case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".	
Remitting Bank/Remitting Bank Reference	Read only field. Remitting Bank/Remitting Bank Reference will be auto-populated based on the selected Documentary Collection Number.	
Process Reference Number	Read only field. Unique OBTfPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.	
Remitting Bank Date/ Remitting Date	Read only field. Remitting Bank Date/Remitting Date will be auto-populated based on the selected Documentary Collection Number.	
Version Number	Read only field. Version Number will be auto-generated.	

Collection Details

Registration user can provide collection details in this section. Alternately, details can be provided by Data Enrichment user.

Provide the Collection Details based on the description in the following table:

Field	Description	Sample Values
Documents Received	<p>Documents Received will be auto-populated based on the selected Documentary Collection Number.</p> <p>User can change the documents received value.</p> <p>The values are:</p> <ul style="list-style-type: none"> • First • Second • Both 	
Duplicate	<p>If a Duplicate (second set) of Import document is received, the user has to initiate Import Collection update process. User has to select the option as 'Second' in "Document Received" and has to set the "Duplicate" toggle to Yes.</p>	
Tenor Type	<p>Read only field.</p> <p>Tenor will be auto-populated based on the selected Documentary Collection Number.</p> <p>If Tenor type is Mixed, system should disable user input in Liquidation and Unlinked FX rate field. On Submit user will get an error message.</p>	
Product Code	<p>Read only field.</p> <p>Product Code will be auto-populated from the collection booking.</p>	
Product Description	<p>Read only field.</p> <p>This field displays the description of the product as per the product code.</p>	
User Reference Number	<p>User reference number is defaulted based on the description of the product as per the product code.</p> <p>User can change the value.</p>	

Field	Description	Sample Values
Operation Type	<p>Operation type will be auto-populated from the collection booking. User can update the operation code, if required.</p> <p>The options are:</p> <ul style="list-style-type: none"> • ACC • NEG • COL • PUR • DIS • PAY • FOP - Free of Payment for bills booked with operation Collection or Acceptance. • CAC <p> Note Change of Operation from Collection or Acceptance to Free of Payment should be enabled only for Documentary Bills not under LC.</p> <p> Note User cannot change the operation type, If the operation code is set as ADV or COL or DIS in collection Booking.</p> <p> Note User can change the operation type to ADV or DIS, if the operation code is set as ACC in collection booking.</p>	
Stage	<p>System displays the stage of the transaction. User can change the value from initial to final.</p> <p> Note User cannot change the stage value from Final to initial.</p> <p> Note For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.</p>	

Field	Description	Sample Values
Contract Reference Number	Read only field. System to populate contract reference number from the back end system once the Documentary Collection Number is selected.	
Bill Amount	Read only field. Bill amount will be auto-populated based on the selected Documentary Collection Reference.	
Amount In Local Currency	Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Bill Outstanding Amount	Read only field. Bill Outstanding Amount will be auto-populated from the collection booking.	
Finance Amount	Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number. User can update the Finance Amount, if the Operation Type is set to DIS.	
Acceptance Date	Provide the acceptance date.	
Non Acceptance Date	Non acceptance date is auto-populated based on the selected Documentary Collection Number.	
Non Payment Date	Non payment date is auto-populated based on the selected Documentary Collection Number. This field can be read only or editable depending on the Documentary Collection Number.	
Drawer	Drawer Name will be auto-populated from the collection booking. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.  Note If the values are allowed to change and the selected drawee/ party is blacklisted the system displays a warning message.  Note This field is read only for Operation Type, DIS and PUR.	

Field	Description	Sample Values
Limit verification required	<p>Toggle On- Enables for limit verification.</p> <p>If the toggle is disabled and Finance amount has been provided, the system prompts an override message on Submit.</p>	
Rebate Amount	Provide rebate to the bill outstanding amount.	
Transferee Bank	<p>Read only field.</p> <p>Displays the name of the transferee bank.</p>	
Avalization/Co-Acceptance Requested	<p>Enable this option, if the bill is to be avalized.</p> <p>User can enable this option either during the Bill Booking or Amendment. During bill booking, the option can be enabled both INTIAL/FINAL stage and Operation is COL/ACC /DIS</p> <p>During the Amendment, stage should be Final.</p> <p>By default this option is disabled.</p> <p>Once the option is enabled, it can not be unchecked during any further actions or operations.</p> <div style="text-align: center;">  <p>Note</p> <p>Option is not applicable for Sight bills, Multi-tenor and Bills Under LC.</p> </div>	

Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the collection booking update.	
Remarks	Provide any additional information regarding the collection. This information can be viewed by other users handling the request.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Events	On click, system will display the details of collection and liquidations if any, in chronological sequence.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.	
Action Buttons		
Submit	<p>On submit, task will move to next logical stage of Import Documentary Update Collection Booking.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	
Save & Close	<p>Save the information provided and holds the task in 'My Task' queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	<p>Cancels the Import Documentary Collection Booking Task. Details entered will not be saved and the task will be removed.</p>	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

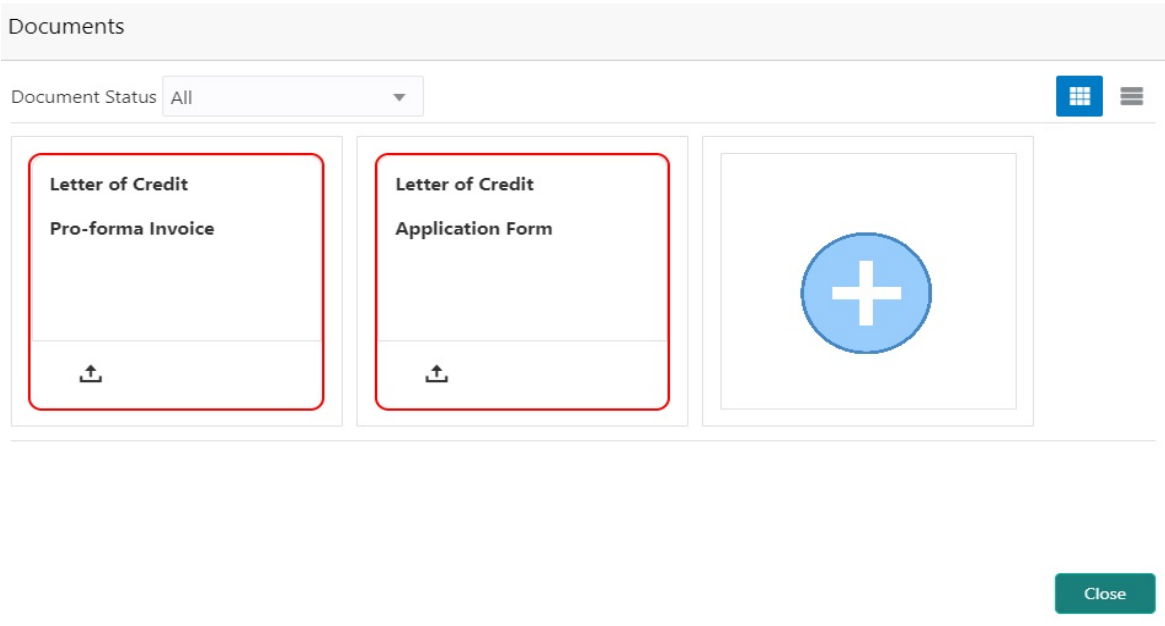

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.
2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of registration of an Import Collection Update Booking, the request moves to Data Enrichment stage.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Tasks> Free Tasks.

Free Tasks

Collection Details

The fields listed under this section are same as the fields listed under the [Collection Details](#) section in [Registration](#). Refer to [Collection Details](#) for more information of the fields. During Registration, fields that were not captured during Registration can be updated in Data Enrichment stage.

Note

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same.(Display only field if Submission mode is Online.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	

Document Details

This section enables the user to capture the details of the documents received.

As part of document details screen in DE stage the user can capture the Transport Document reference and document date. On click of 'Next' system should validate the value in Document Reference field against the transport document/Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.

System to display an override if the Bill Of Lading reference mentioned in the document details screen matches with that of the Bill of Lading reference in any of the unlinked Shipping Guarantees issued for the customer.

The screenshot shows the Oracle 'Document Details' screen. The main content area displays a table with the following data:

Document Code	Document Type	Documents Description	Document Reference	Copies Received	Originals Received	Document Date	Action
BOL	T	Bill of Lading	D1	1	1	May 5, 2021	[Action icons]

The interface includes a sidebar with navigation options like 'Main Details', 'Document Details', 'Other Details', etc. At the bottom, there are buttons for 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Capture the information based on the description in the following table:

Field	Description	Sample Values
Document Code	System will default the document codes based on the product selected. User can add or delete the code by selecting the line on the grid.	
Document Type	System will default the document type based on the product selected.	
Document Description	System will populate the document description based on the document code. User can view the description, by clicking the link.	
Document Reference	User can capture the document reference, if available	
Copies Received	User can edit the actual copies received.	
Originals Received	User can edit the actual originals received.	
Document Date	User can edit the date on which the document is received.	
Action	Click Edit icon to edit the document code/ document date. Click Delete icon to delete the document code.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

Field	Description	Sample Values
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Cancel	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Back	<p>On click of Back, system moves the task back to previous data segment.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

Other Details

Other Details enables the user to capture details like Shipping guarantee Reference, Debit Value Date, Credit Value Date, Other Bank charges etc.

Maturity Details

Draft Details

Update the draft details based on the description in the following table:

Field	Description	Sample Values
Draft Code	Update the draft code. Alternatively, user can search the draft details using LOV.	
Draft Amount	Update the draft amount.	
Action	Click Edit icon to edit the draft code. Click Delete icon to delete the draft code.	

Maturity and Multi Tenor Liquidation Details

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
SNo.	Serial number of the tenor record.	
Tenor Basis	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.	
Tenor Description	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.	
Start Date	Select the start date.	
Tenor Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.	

Field	Description	Sample Values
Transit Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Mixed'.	
Maturity Date	Maturity date as Start date + Tenor Days or Transit Days. This field is disabled if the Tenor Type is 'Both'	
Bill Amount	Provide the bill amount.	
Liquidated Amount	If a liquidation has already happened in the bill, system should display the Liquidated amount. System should validate that the Total Liquidation Amount is not greater than the Bill amount and should display an error message	
Exchange Rate	Provide the Exchange Rate.	
Liquidation Date	Provide the liquidation date.	
Liquidation Amount	User to input the Liquidation Amount.	
Rebate Amount	Provide the value for bill rebate amount.	
Action	Click Edit icon to edit the tenor record. Click Delete icon to delete the tenor record.	
Interest from Date	Interest from date is defaulted in this field. The user can select the interest from date. The interest from date cannot be earlier than branch date and later than maturity date.	
Interest to Date	Interest to date is auto-populated in this filed. The user can change the interest to date.	
Accept Commission From Date	Acceptance commission from date is auto-populated in this filed. The user can change the acceptance commission from date.	
Accept Commission To Date	Acceptance commission to date is auto-populated in this filed. The user can change the acceptance commission to date.	

Additional Fields

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>

Message Status	Read only field. Display the message status of draft message of collection details.	
Repair Reason	Read only field. Display the message repair reason of draft message of collection details.	
Preview Message	Display a preview of the advice.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.

- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following:

The screenshot shows the 'FxLinkage' application window. At the top right is a close button (X). Below the title bar is a section labeled 'FX Linkage' with a plus icon (+) on the right. A table displays the following data:

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Total Utilized Amount	FX Expiry Date	Action
032FXF2230890501	GBP	AED	AED 149,873,698.50	1.5	AED 27,000.00	AED 2,100.00	Dec 30, 2025	

Below the table, there is a pagination control: 'Page 1 of 1 (1 of 1 items)' with navigation arrows. Underneath is a section for 'Average FX Rate' with a value of '0'. At the bottom right, there are two buttons: 'Save & Close' and 'Cancel'.

The screenshot shows the 'FX Linkage' pop-up form. It contains the following fields:

- FX Reference Number ***: 032FXF2230890501
- Currency**: AED
- Contract Amount**: AED 149,999,998.50
- Available FX Contract Amount**: AED 149,873,698.50
- Linkage Amount ***: AED 27,000.00
- Rate**: 1.5
- FX Amount in Local Currency**: GBP £149,999,998.50
- FX Expiry Date**: Dec 30, 2025
- FX Delivery Period From**: (empty)
- FX Delivery Period To**: (empty)

At the bottom right, there are two buttons: 'Save & Close' and 'Close'.

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values

Split Settlement	<p>Toggle On: Enables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill</p> <p>Toggle Off: Disables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill</p>	Disable
Settlement Details - Liquidation		
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	
Debit/Credit	Application displays debit/ credit for the component.	
Account	Customer account.	
Account Description	Description of the account.	
Branch	Branch of the customer's account.	
Account Currency	Currency of the account.	

Field	Description	Sample Values
Split Settlement		
Component	Components gets defaulted based on the product selected.	
Contract Currency	Application displays the default currency for the component.	
Amount	Amount for each component. This is populated from the transaction details of the drawing.	
Split Settlement Details		
Sequence	Sequence of the settlement details.	
Amount	Amount for the split settlement.	
Settlement Account	Details of the settlement account.	
Account Customer	Customer account.	
Account Currency	Currency of the account.	
Account Branch	Branch of the customer's account.	
Original Exchange Rate	Click the Fetch Exchange Rate button, the system displays the Original Exchange Rate as simulated in settlement details section from OBTF.	
Action	Click Edit icon to edit the split settlement details record. Click Delete icon to delete the split settlement details record.	

Tracers

This section enables the user to view the defaulted tracer details from back end application. It also allows the user to add new tracer details. Add new tracer details based on the description in the following table:

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

Payment Tracer

<input type="radio"/> Tracer Required	Number of Tracers <input type="text" value="0"/>	Tracer Frequency <input type="text"/>	Tracer Medium <input type="text"/>
Tracer Receiver Party <input type="text"/>	Tracer Start Date <input type="text"/>	77A- Reason for Non Payment <input type="text"/>	

Acceptance Tracer

<input type="radio"/> Tracer Required	Number of Tracers <input type="text" value="0"/>	Tracer Frequency <input type="text"/>	Tracer Medium <input type="text"/>
Tracer Receiver Party <input type="text"/>	Tracer Start Date <input type="text"/>	Template ID <input type="text"/>	77A- Reason for Non Acceptance <input type="text"/>

Field	Description	Sample Values
Payment Tracer		
Tracer Required	Select if Tracer is required or not.	
Number of Tracers	Provide the number tracers required.	
Tracer Frequency	Select the frequency for generation of the tracer.	
Tracer Medium	Select the tracer medium from the LOV.	
Tracer Receiver Party	Select the tracer receiver party from the LOV.	
Tracer Start Date	Select the tracer start date. Start date cannot be earlier than the branch date.	
Reason for Non Payment	Specify the reason for non payment.	
Acceptance Tracer		
Tracer Required	Select if Tracer is required or not.	
Number of Tracers	Provide the number tracers required.	
Tracer Frequency	Select the frequency for generation of the tracer.	
Tracer Medium	Select the tracer medium from the LOV.	
Tracer Receiver Party	Select the tracer receiver party from the LOV.	
Tracer Start Date	Select the tracer start date. Start date cannot be earlier than the branch date.	
Template ID	Select the template ID from LOV. This field is enabled if Tracer Medium has value as SWIFT.	
Reason for Non Acceptance	Specify the reason for non acceptance.

Provide the loan preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Defaults from the underlying task. User cannot change the value.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Customer Id	Defaults from the underlying task. User cannot change the value.	
Customer Name	Applicant/ Drawee name. Defaults from the underlying task. User cannot change the value.	
Product Code	Defaults from the underlying Collection/ Drawing Product maintenance. The user can change the Product Code. Click Search to search and select the product code.	
Loan Currency-	Loan currency is defaulted from the bill currency. User can change this to Local Currency. <div style="text-align: center;">  Note Loan currency allowed either in contract currency or in local currency. </div>	

Field	Description	Sample Values
Original Exchange Rate	System displays the original Exchange rate from maintenance. User cannot change the value.	
Exchange Rate	Read only field. Exchange rate applicable for Local Currency. System displays the Exchange rate from maintenance. User cannot change the value. System validates the exchange rate is within the allowed range.	
Loan Tenor Units	Period of loan. System defaults the value as per the selected loan product. . The numerical value for Days or months or Years is applicable. User can change the value within the variance of loan tenor.	
Tenor Type	Read only field. System defaults the value as per the selected loan product. . Values are Days, Months and Years. The numerical value for Days or months or Years is applicable.	
Rate Type	System defaults the rate type. User cannot change the value.	
Rate Code	System defaults the rate code. User cannot change the value.	
Loan/Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	
Loan Maturity Date	Loan maturity date as default based on Tenor type and Tenor units.	
Liquidate Charge/Comm On LC	Toggle On: Turn the toggle on to include the outstanding Commission/charge to be included as part of Liquidation.	
Loan Interest/UDE Details		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	

Field	Description	Sample Values
Usage	System populates the details as part of simulation.	
UDE Value	System populates the value as part of simulation.	
Limits		
Linkage Type	System defaults the linkage type as "Facility" from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.	

Linked Loan Details

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: <ul style="list-style-type: none"> • Fixed Floating • Special 	
Rate Code	This field displays the rate code applicable for the Componen.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the Rate Type is Floating .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	

Field	Description	Sample Values
Special Pricing Reference Number	<p>Specify the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component).</p> <p>Special Pricing Reference is not applicable for Penal Interest components.</p> <p>For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same.</p> <p> Note System displays an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.</p>	
Currency	System defaults the Interest currency in this field.	
Interest Amount	User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	<p>System displays the Charge Party based on the type of transaction.</p> <p>In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..</p>	
Settlement Account	<p>System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override.</p> <p>In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM)..</p>	

Field	Description	Sample Values
Settlement Currency	This field displays the settlement account currency.	
Settlement Branch	This field displays the settlement account branch.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	

Field	Description	Sample Values
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	

Field	Description	Sample Values
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Back	On click of Back, system moves the task back to previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Settlement Details

The screenshot shows the Oracle Settlement Details interface. At the top, there is a navigation bar with the Oracle logo and user information: (DEFAULTTENITY), FLEXCUBE UNIVERSAL BAN., Aug 3, 2023, and POORNIMA01 subham@gmail.com. Below this is a menu bar with options: Clarification Details, Documents, Remarks, Overrides, Customer Instruction, Common Group Messages, Incoming Message, and View Collection. A 'Signatures' button is also visible. The main content area is titled 'Settlement Details' and includes a 'Current Event' checkbox. Below this is a table with the following data:

Component	Currency	Debit/Credit	Account	Account Description	Account Currency	Netting Indicator	Current Event
BCCOUR_LIQD	GBP	Debit	0322040001	Air Arabia	AED	No	No
BCOPNGG_LIQD	GBP	Debit	0322040001	Air Arabia	AED	No	No
BCSWIFT_LIQD	GBP	Debit	0322040001	Air Arabia	AED	No	No
BILL_AMOUNT	AED	Credit	0322060004	Aramex	AED	No	No
BILL_AMT_EQUIV	AED	Credit	0322060004	Aramex	AED	No	No
BILL_LIQ_AMT	AED	Debit	0322040001	Air Arabia	AED	No	No
BILL_LIQ_AMTEQ	AED	Debit	0322040001	Air Arabia	AED	No	No
BKTAX_AMT	GBP	Debit	0322040001	Air Arabia	AED	No	No
CHG1_LIQD	AED	Credit	0322040001	Air Arabia	AED	No	No
CHG1_LIQD_AMTEQ	AED	Debit	0322060004	Aramex	AED	No	No

At the bottom of the interface, there is an 'Audit' button and a row of action buttons: Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

Provide the settlement details based on the description in the following table:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	System displays the default currency for the component.	
Debit/Credit	System displays the debit/credit indicators for the components.	
Account	System displays the account details for the components.	

Field	Description	Sample Values
Account Description	System displays the description of the selected account.	
Account Currency	System defaults the currency for all the items based on the account number.	
Netting Indicator	System displays the applicable netting indicator.	
Current Event	System displays the current event as Y or N.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	

Field	Description	Sample Values
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Incoming Message	User can view the incoming SWIFT message MT730.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Back	On click of Back, system moves the task back to previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Summary

User can review the summary of details updated in Data Enrichment stage of Import Documentary Collection Update Booking request.

The tiles must display a list of important fields with values. User can drill down from summary Tiles into respective data segments.

Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Back	On click of Back, system moves the task back to previous data segment.	
Submit	<p>Task will move to next logical stage of Import Documentary Collection Update Booking.</p> <p>If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.</p>	

Exceptions

The Import Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Document Details - User can view document details.
- Draft Details - User can view the draft details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Advices - User can view the advices.
- Payment Details - User can view the payment details.
- FX Linkage - User can view the FX Linkage details.
- Settlement Details - User can view the settlement details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Import Collection Booking KYC exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Limit/Credit Check

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charges - User can view and modify charge details, if required.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	

Field	Description	Sample Values
Cancel	Cancel the Import Collection Update Booking Limit exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

On successful Handoff, system triggers TRFB event in the Back office.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

-
- Bill Amount Bill Currency Code

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the Oracle application's 'My Tasks' interface. A modal window titled 'Approval Rekey' is open, showing two fields: 'Bill Amount' with a value of 'AED 10,000.00' and 'Bill Currency Code' with a value of 'AED'. Both fields have green checkmarks next to them, indicating they are correct. The dialog also includes buttons for 'View Signature', 'Documents', 'Remarks', 'Refer', 'Close', and 'Proceed'. The background shows a table of tasks with columns for 'Process Name', 'Process Reference Num', 'Application Num', 'Stage', 'Application Date', 'Branch', and 'Customer Num'.

Tiles Displayed in Summary:

- Main Details - User can view details about application details and collection details.
- Maturity Details - User can view the maturity details in case usance and multi tenor.
- Additional Fields - User can view the additional fields.
- Advices - User can view the details of advices.
- Limits and Collaterals - User can view limits and collateral details.
- Commission, Charges and taxes - User can view commission, charges and taxes details.
- Preview Message- User can view the preview of the simulated messages to remitting bank.
- Payment Details - User can view the payment details.
- FX Linkage - User can view the details of FX Linkage.
- Loan Preferences - User can view the details of the loan preferences selected.
- Tracer Details - User can view the tracer details.
- Settlement Details - User can view settlement details.
- Updated Details - User can view the details updated to the Import Collection.
- Linked loan Details - User can view linked loan details.
- Parties Details - User can view party details like remitting bank, drawee, drawer etc.
- Compliance Details - User can view the compliance details.
- Accounting Details - User can view the accounting entries generated by back office system.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.

- Interest Details - User can view the interest details.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance- Limits• R5 - Others	
Cancel	<p>Cancel the approval.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>	

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import Documentary Collection Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject Approve	On click of Reject Approve, the transaction is rejected.	
Reject Decline	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.	
Hold	User can put the transaction on 'Hold'. Task will remain in Pending state.	
Cancel	Cancel the Reject Approval.
