Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with Back End applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any Back End application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Issuance

As part of Import LC Issuance the applicant (importer or customer) approaches a bank and requests the bank to issue a Letter of Credit on their behalf to the beneficiary (exporter). The Letter of Credit stipulates the required documents and the conditions to be met by the beneficiary while shipping under the said LC. On receipt of credit compliant documents, the issuing bank is obliged to make payment under the LC.

The various stages involved for issuance of an Import Letter of Credit are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Input/Modify details of LC - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements and draft LC copies
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office

In the following sections, let's look at the details for Import LC issuance process.

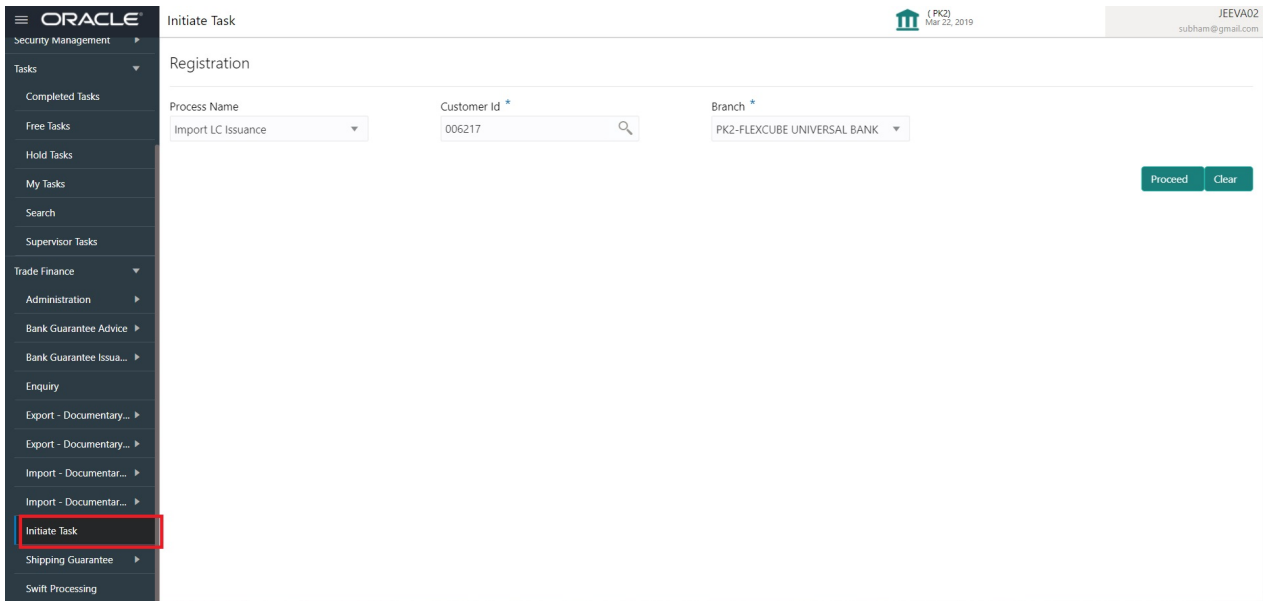

This section contains the following topics:

Common Initiation Stage	Provide the details based on the description in the following table:
Scrutiny	Data Enrichment
Customer Response - Draft Confirmation	Exceptions
Multi Level Approval	Customer - Acknowledgement
Customer - Reject Advice	Reject Approval

Common Initiation Stage

The user can initiate the new import LC issuance request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Customer Id	Select the customer id of the applicant or applicant's bank.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

3. Click **Proceed** to proceed to the next step.

Registration

The user initiates the transaction from Registration Stage, if the LC Issuance request is received from the Applicant at the branch counters either by fax, mail or physical application.

During Registration stage, user can capture the basic details of the application, check the signature of the applicant and upload the related documents submitted by the applicant. It also enables the user to capture some additional product related details as an option. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for an LC Issuance expert to handle the request in the next stage.

For request received vide MT798 along with sub message 770,700,701, when customer initiates an Import LC request through SWIFT (Corporate to SWIFT) channel, the MT798 message containing the

request is parsed and based on the STP parameters maintained, can create a Import LC Issuance Task in OBTFPM. The MT798 message, is routed to the Issuing Bank selected by the customer. Issuing Bank receives the MT798 and creates a task in Import LC Issuance Process in Scrutiny stage in OBTFPM.

The Incoming MT798 message contains 3 sections.

- MT798 Index Message which contains the Sub message type 770
- MT798 Details Message which contains the Sub Message type 700 (MT700 tags with values)
- MT798 Extension Message which contains the Sub Message type 701 (MT701 Extension message tag values) if applicable.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Import - Documentary Credit> Import LC Issuance.

The Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

Application Details

Provide the Application Details based on the description in the following table. In case of MT798, Application Details are defaulted to SWIFT.

Field	Description	Sample Values
Received From Party	<p>Import LC Issuance request can be received either from the applicant, applicant's bank or accountee.</p> <p>User can select the option from drop-down.</p>	
Received From - Customer ID	<p>Select the customer id of the applicant or applicant's bank.</p> <p>System allows only the customer of the bank for selection.</p> <p>If the selected customer/party is blacklisted the system displays a warning message.</p>	001344
Received From - Customer Name	<p>Name of the customer or applicant. This field will be auto populated based on the selected customer ID.</p>	EMR & CO
Branch	<p>Select the branch. Customer's home branch will be displayed based on the customer ID and it can be changed, if required.</p> <p> Note Once the request is submitted, Branch field is non-editable.</p>	203-Bank Futura -Branch FZ1

Field	Description	Sample Values
Priority	Set the priority of the Import LC issuance request as Low/Medium/High. If priority is not maintained for a customer, 'Medium' priority will be defaulted.	High
Submission Mode	Select the submission mode of Import LC Issuance request. By default the submission mode will have the value as 'Desk'. Desk- Request received through Desk Fax- Request received through Fax Email- Request received through Email Courier- Request received through Courier	Desk
Currency Code, Amount	Select the currency code. Provide the value of LC (with decimal places) as per currency type and tab out.	GBP 1,000.00
Process Reference Number	Unique sequence number for the transaction. Process Reference Number is auto generated by the system based on process name and branch code.	203ILCISS0000 00500
Customer Reference Number	Enables the user to provide a unique Customer Reference Number which will be the User Reference of the LC.	
Application Date	By default, the application will display branch's current date and enables the user to change the date to any back date.  Note Future date selection is not allowed.	04/13/2018
Copy LC	If an existing LC is to be copied, the details of the LC is captured here. Provide the LC number, the system populates the details of the LC. Alternately, the user can search the LC from the LOV.	

Field	Description	Sample Values
Template Name	<p>Select a template if the applicant details are already captured and the data can be reused with the template to reduce the effort.</p> <p>Click the look up icon to search the Template code with Template Code or Template Description.</p> <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>Template Name</p> <hr/> <p>Template Code Template Description</p> <div style="display: flex; justify-content: space-between;"> <input style="width: 40%; border: 1px solid #ccc;" type="text"/> <input style="width: 40%; border: 1px solid #ccc;" type="text"/> </div> <p style="text-align: center; margin-top: 5px;">Fetch</p> </div>	

LC Details

Registration user can provide LC details in this section. Alternately, LC details can be provided by Scrutiny user.

40A - Form of Documentary Credit	Select the type of LC (Documentary Credit) as per the requirement. Default LC type is Irrevocable .	Irrevocable
Documentary Credit Number	Simulated from the back office and displayed in the application. Number will be populated on the selection of Product Code .	203ILUN18103 ACCI

Field	Description	Sample Values
User Reference Number	User Reference Number will be auto populated by the system based on selection of Product Code .	
Reference to Pre-Advice	Provide details of Pre-Advice, if issued by the bank.	
Date Of Issue	Application will default the branch's current date in date of issue. User cannot change the defaulted date. Application will populate the Date of Issue field with branch date on approval if date of approval is later than date of Registration.	04/13/18
Applicable Rules	Select the applicable rules for the LC. Default rule as UCP Latest Version.	UCP Latest Version.
Rule Narrative	Enter the rules narrative. This field is available if the value in 'Applicable Rule' is 'OTHR'	UCP Latest Version.
Date Of Expiry	Provide the expiry date of the LC. The expiry date can be equal or greater than the issue date. If the Expiry Date is earlier than the issue date, system will provide an error and if the 'Expiry Date is equal to the Issue Date', system will provide a alert message.	09/30/18
Place of Expiry	Provide the place of expiry of LC.	London
Applicant Bank	In application details, if Received From Applicant Bank toggle is on, the applicant bank details will be displayed here. If request is not received from applicant bank, this field must be blank.	001343 Bank of America
Applicant	Applicant details will be auto populated based on the details provided in Application Details section. If the request is received from Applicant bank, select the applicant from the List of Values.  Note If the selected applicant/ party is blacklisted the system displays a warning message.  Note If the KYC non-compliant party is selected then the system immediately gives instant alert as "Customer ID - (CIF ID) is not KYC compliant."	001344 EMR & CO

Field	Description	Sample Values
Beneficiary	<p>Select the beneficiary of the LC. Click the look up icon to search the beneficiary based on Party ID/Party Name.</p> <p>If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message.</p> <p> Note If the selected Beneficiary/ party i is blacklisted the system displays a warning message.</p> <p> Note If the KYC non-compliant party is selected then the system immediately gives instant alert as “Customer ID - (CIF ID) is not KYC compliant.”</p>	001346 Marks and Spencer
Percentage Credit Amount Tolerance	<p>Enables the user to provide tolerance (+/-) on the total LC value. Tolerance value must be either one or two digit value.</p> <p>If tolerance is more than 10%, alert message will be displayed.</p>	8/2
Limits/Collateral Required	<p>Toggle On: Set the Toggle On to enable limit check during the process flow of this request. Toggle Off: Set the Toggle Off to disable limit check during the process flow of this request.</p>	
Additional Amount Covered	Provide additional amount included in LC.	
Accountee	<p>User can select the accountee from LOV.</p> <p> Note If the KYC non-compliant party is selected then the system immediately gives instant alert as “Customer ID - (CIF ID) is not KYC compliant.”</p>	
Amount In Local Currency	<p>After the tab out of ‘Currency Code, Amount’ field, system populates the Local currency and amount value in this field.</p> <p>System fetches the local currency equivalent value for the LC amount from back office (with decimal places).</p>	

Field	Description	Sample Values
Back to Back LC	<p>Enable the option, if the back to back Import LC is issued.</p> <p>Toggle On: Set the Toggle On if back to back LC is applicable.</p> <p>Toggle Off: Set the Toggle Off if back to back LC is applicable.</p>	
Below Export LC related field appears, if Back to Back LC option is enabled.		
Export LC Reference	Specify the export LC reference or click Search to search and select the underlying export LC reference number.	
Export LC Available Amount	System displays the available amount under the Export LC.	
Export LC Expiry Date	System displays the expiry date of the underlying export LC.	
Export LC Shipment Date	System displays the latest shipment date of the underlying export LC.	
Auto Close	<p>Toggle On: Enable the toggle, if Auto close is required for that transactions.</p> <p>Toggle Off: Disable the toggle, if Auto close is not required for that transactions.</p>	
Closure Date	<p>System defaults the "Closure Date" with the value "Expiry Date" + No of Closure days maintained in the respective Product in which the contract has been created.</p> <p>System automatically close the contract on the specified "Closure Date" if "Auto Close" is selected as "Yes" for the specific contract.</p> <p>User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions,</p> <ul style="list-style-type: none"> ● Closure Date must be after the Issue Date. ● Closure Date must be after the Expiry Date. ● Closure Date cannot be blank, when the "Auto Close" is checked. 	

Copy LC

The user can copy the existing LC using Copy LC option, to create a new LC in Import LC Issuance process. The 'Copy LC' option allows quick processing of a request for issuing a new LC. The details of the LC is captured here. Following are the steps to copy the existing LC:

1. Specify the LC number or alternately, or click search icon to search and select the LC Number. The Search screen appears.

- Specify the fields DCN Reference Number, Applicant, Currency, Amount and User Reference Number as search criteria. The system displays all the LC with the given search criteria. Only LC which are authorized status in back office is displayed.

- Select the LC, the system should populate all the LC related fields (LC Detail, Shipment and Goods, Payment Details and Document Details) in the new LC issuance screen except all fields in the Application Details Section.

LC Type, Product Code, Product Description and Revolving flag value should be populated based on the LC selected. 'Applicant' field is populated based on the Customer ID chosen in the Application Details

field. If the request is received from Applicant Bank, then the user has to manually input the Applicant details.

The screenshot shows the 'View LC/Template' dialog box with the following fields and values:

- LC Details:**
 - Applicant: 0001101
 - 50 - Applicant Name: 0001101
 - Branch Code: 000
 - LC Type: Usance
 - Product Code: ILUR
 - Product Description: Import LC Usance Non Revolving
 - Advising Bank: 0001109
 - 40A - Form of Documentary Credit: IRREVOCABLE
 - 40E - Applicable Rules: UCPURR LATEST VERSION
 - 31D - Place of Expiry: CN
 - 51A - Applicant Bank: [Empty]
 - 59 - Beneficiary Name: 0001102
 - 32A - Percentage Credit Amount Tolerance: 10 / 10
 - 39C - Additional Amount Covered: [Empty]
- Availability Details:**
 - 41a - Available with: CN
 - 41a - Available By: [Empty]
 - 42C - Drafts At: [Empty]
 - 42a - Drawee: [Empty]
- Shipment Details:**
 - 43P - Partial Shipments: NOT ALLOWED
 - 43T - Transshipment: NOT ALLOWED
 - 44A - Place of Taking in Charge: [Empty]
 - 44E - Port of Loading: [Empty]
 - 44F - Port of Discharge: [Empty]
 - 44B - Place of Final Destination: [Empty]
 - 44C - Latest Date of Shipment: [Empty]
 - 44D - Shipment Period: [Empty]

4. Click **Apply** to copy the selected LC.

Revolving

The user can enable the Revolving option for revolving LC. The revolving LC can be time based or value based.

1. Click the **Edit** icon besides the **Revolving** field. The **Revolving Details** screen appears.

The screenshot shows the 'Revolving Details' dialog box with the following fields and values:

- Revolving: [Dropdown]
- Revolving In: Time
- Revolving Frequency: [Text Input]
- Revolve Units: [Dropdown]
- Next Reinstatement Date: [Calendar Icon]
- Cumulative: [Toggle Switch]
- Automatic Reinstatement: [Toggle Switch]

Field	Description	Sample Values
Revolving	System displays, if the LC is revolving or not.	
Revolving In	Select the mode of revolving for the LC. The values are: <ul style="list-style-type: none"> • Time • Value 	

Field	Description	Sample Values
Revolving Frequency	Specify the value for the frequency in days and months by which the LC revolves. This field is enabled , if Time option is selected in Revolving In field.	
Revolve Units	Specify the units by which the LC revolves. This field is enabled , if Time option is selected in Revolving In field.	
Next Reinstatement Date	Displays the date of next instatement for the LC based on the revolving frequency selected.	
Cumulative	Enable this option, if the LC value has to be cumulative or not on reinstatement.	
Automatic Reinstatement	Enable this option, to have automatic reinstatement on the reinstatement day without manual intervention.	

2. Click **Submit** to submit the revolving details.

Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Checklist	<p>Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.</p> 	

Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	
Document Title	Specify the document title.	

Field	Description	Sample Values
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.

The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

5. Click **Fetch** to retrieve the details from DMS. System Displays all the documents available for the given Document Type and Document Code for the Customer.

Field	Description	Sample Values
Customer ID	This field displays the transaction Customer ID.	
Document ID	Specify the document Id.	
Document Type	Select the document type from list.	
Document Code	Select the document code from list.	
Search Result		
Document ID	This field displays the document Code from metadata.	
Customer ID	This field displays the transaction Customer ID.	
Document Type	This field displays the document type from metadata.	
Document Code	This field displays the document code from metadata.	

Field	Description	Sample Values
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

6. Click **Link** to link the particular document required for the current transaction.

OBTFPM- OBDX Bidirectional flow

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling.

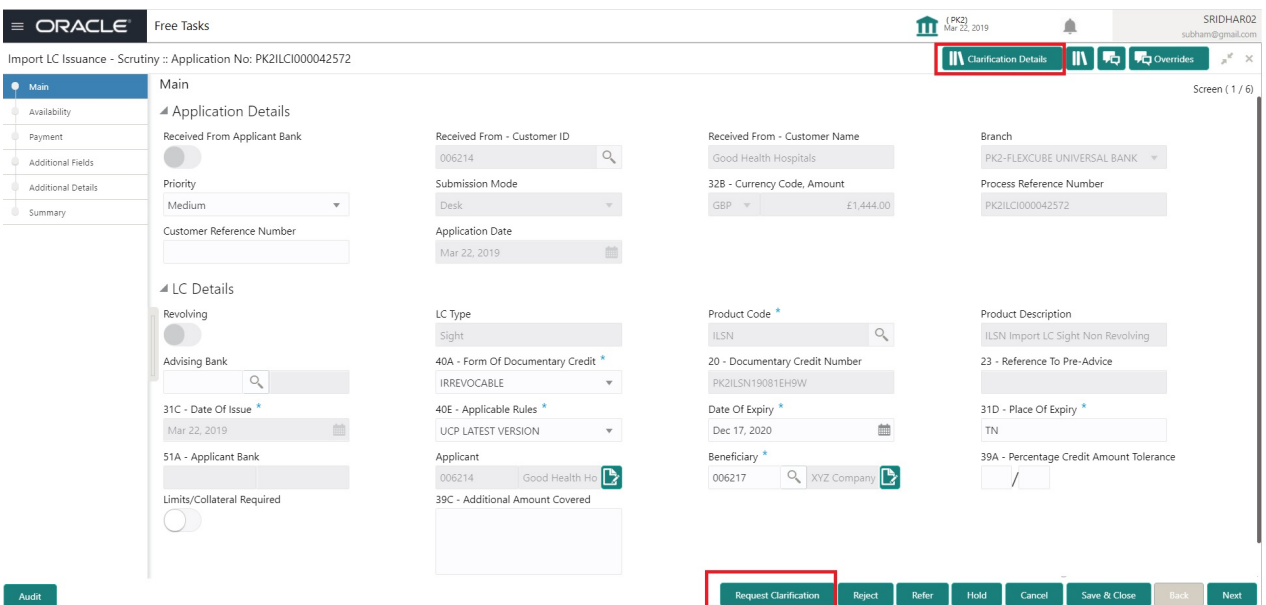

OBTFPM user, for task received from online channel, raise clarification and receive response from the customer.

1. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

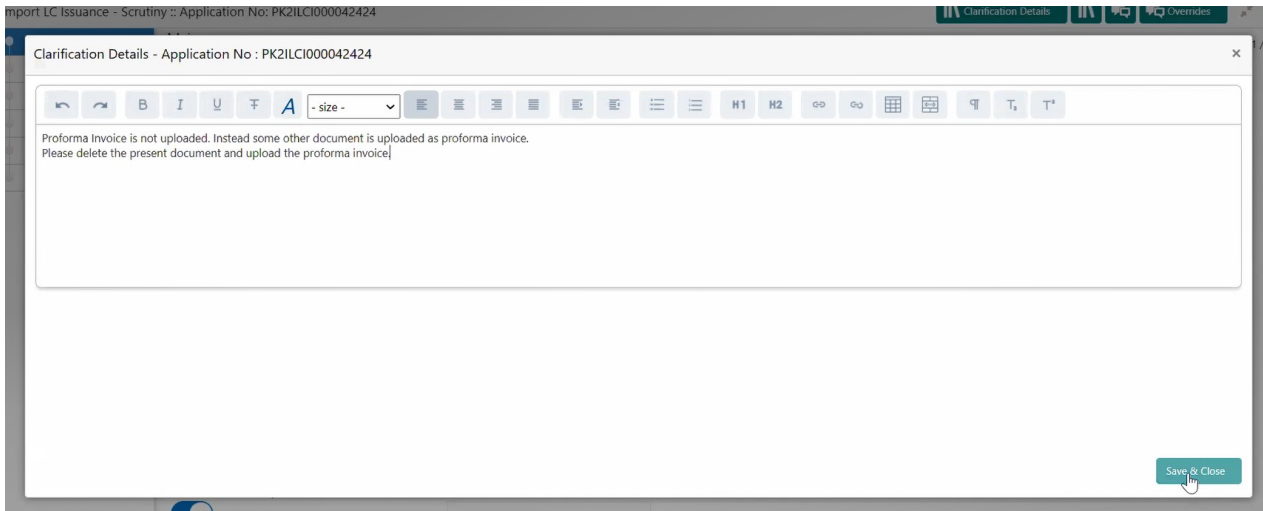

2. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.

3. In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks **Request Clarification** button to request for online clarification from customer.

4. The **Request Clarification** detailed screen appears, user enters the information and clicks **Save**, the information should be sent to customer.

- OBTFPM user should be able to see the details in the View Clarification window and the status will be Clarification Requested. The user can click Re clarification if required.

- The task goes to **Awaiting Customer Clarification** state until the response received from the customer.

7. Click **Edit**.

Clarification Details - Application No : PK2ILCI000042424

Clarification	Raised By	Clarification Date	Response	Response Date	Response Type	Status

Enter text here...

Accept Clarification Close

8. The user can click **Accept Clarification** button, if the query raised has been answered by the customer. The status should change to Clarification Accepted. on next the task moves to the next logical stage.

9. Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the documents.

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.

1. Customer Maintenance details are replicated from OBTF to OBTFPM.

2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Scrutiny

On successful completion of Registration of an Import LC issuance request, the request moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized.

Non-Online Channel - Import LC Issuance request that were received at the desk will move to Scrutiny stage post successful Registration. The requests will have the details entered during the Registration stage.

Online Channel - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage. The data gets auto populated for all data segments from Application stage to Data Enrichment stage.

Tasks received via MT798, the task is verified and enriched. The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message placeholder for the original value. If the User encounters validation error during handling the task, a MT719 (Bank to Corporate message) common group message is created in the workflow and the task is put on 'Hold'. Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

The screenshot shows the login interface for FuTura Bank. It features a dark blue header with the bank's logo and name. Below this, the text 'Sign In' is displayed. There are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing masked characters '.....'. A prominent green button labeled 'Sign In' is positioned at the bottom of the form.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard displays several widgets for user SHUBHAM at Bank Futura on 04/13/18. The widgets include:

- Draft Confirmation Pending:** Table with columns Customer Name, Application Date, and Status. Rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** Table with columns Branch, Process Name, and Stage Name. Row includes Bank Futura, NA, and Retry HandOf.
- Priority Details:** Table with columns Branch, Process Name, and Stage Name. Rows include Bank Futura, NA, Amount Blo, and Bank Futura, NA, Amount Blo.
- High Value Transactions:** A bubble chart showing transaction values for GBP. The y-axis ranges from -20K to 140K, and the x-axis ranges from -2 to 12.
- SLA Breach Details:** Table with columns Customer Name, SLA Breached(mins), and Priority. Rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** Table with columns Branch, Process Name, and Stage Name. Row includes 203, Cucumber Testing, and test descrip.
- Hold Transactions:** Table with columns Branch, Process Name, and Stage Name.
- SLA Status:** Cucumber Testing.
- Tasks Detailed:** Cucumber Testing.

3. Click **Tasks > Free Tasks**.

The Free Tasks page shows a list of tasks for user SRIDHAR01 at FBN UK (GS1) on Feb 1, 2019. The tasks are:

Action	Priority	Application Number	Branch	Customer Number	Amount	Process Name	Stage	Back Office Ref No.

LC Details

The fields listed under this section are same as the fields listed under the [LC Details](#) section in [Provide the details based on the description in the following table](#). Refer to [LC Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents button to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks button to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	

Field	Description	Sample Values
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Incoming Message	<p>This button displays the multiple messages.</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	

Field	Description	Sample Values
Cancel	Cancel the LC Issuance Scrutiny stage inputs and the task gets landed in My Task menu.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Availability

User must Input/Update Availability, Shipment and Goods details of an Import LC request for the different fields under the respective data segments.

Field	Description	Sample Values
INCO Terms	<p>Online Channel - Read only. Non Online Channel - Select the appropriate INCO terms.</p>	
INCO Term Description	The description of the INCO Term.	

Field	Description	Sample Values
+ Icon	Click + icon to add goods details.	
Delete Icon	Click - icon to remove goods details.	
Goods Code	Click look up icon to select the goods code. Once you select goods code, value will populate in Goods Type and Goods Description.	
Goods Type	The goods type is auto populated depending on selected goods code.	
Goods Description	The goods description is auto populated depending on selected goods code.	
No of Units	Enter the number of units being imported or exported.	
Price per Unit	Enter the value for price per unit.	
Total Amount	System to calculate the total price In case of online request, the system should populate the total amount from incoming request. System should validate that the total amount is equal to the value of the transaction (LC/ Collection).	
Action	Click Edit icon to edit the goods detail. Click Delete icon to delete the goods detail.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents button to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

Field	Description	Sample Values
Remarks	<p>Click the Remarks button to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Incoming Message	<p>This button displays the multiple messages.</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.	

Field	Description	Sample Values
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	<p>Cancel the LC Issuance Scrutiny stage inputs and the task gets landed in My Task menu.</p>	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	

Payment

The screenshot displays the Oracle Payment system interface. The main window is titled "Payment" and shows a "Payment Details" section. The interface includes a navigation menu on the left with options like "Main", "Availability", "Payment", "Additional Fields", "Additional Details", and "Summary". The "Payment" section is currently selected. The main content area contains several fields and sections:

- Payment Details:**
 - 49G-Special Payment conditions for beneficiary: A text input field with a search icon and a document icon.
 - 49H-Special Payment conditions for receiving bank: A text input field with a search icon and a document icon.
 - 48-Period for Presentation: A dropdown menu showing "20 Days".
 - 49-Confirmation Instructions: A dropdown menu showing "WITHOUT".
 - 58A - Requested Confirmation Party: A dropdown menu.
 - 57A-Advise Through Bank: A dropdown menu showing "000328" and "HSBC BANK" with a search icon and a document icon.
 - 78-Instructions to P/A/N Bank: A dropdown menu showing "INSTRUCTIONS" with a search icon and a document icon.
 - 72-Sender to Receiver Information: A dropdown menu showing "SND2RECM700" with a search icon and a document icon.
 - 71D - Charges: A text input field.
 - Reimbursement Authorization:
 - 53A - Reimbursing Bank: A dropdown menu showing "000330" and "CITIBANK" with a search icon and a document icon.
 - Reimbursing Bank Charge Type: A dropdown menu showing "Claimants".
 - Reimbursing Bank Charge Details: A text input field.
 - 72-Sender to Receiver Information - 740: A dropdown menu with a search icon and a document icon.

At the bottom of the interface, there is a navigation bar with buttons: "Audit", "Request Clarification", "Reject", "Refer", "Hold", "Cancel", "Save & Close", "Back", and "Next".

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Special Payment conditions for beneficiary	Online and Non Online Channels – If any special payment condition has to be provided to beneficiary, the details for the same must be captured in this field.	
Special Payment conditions for receiving bank	Online and Non-online channels –If any special payment condition has to be provided to receiving bank, the details for the same must be captured in this field. This field specifies special payment conditions applicable to the receiving bank without disclosure to the beneficiary, for example, post-financing request/conditions for receiving bank only.	
Period for Presentation	Online Channel – Read only. Non Online Channel – If the period of presentation is based on any event other than shipment, then you can capture the event name in text along with the number of days in number.	

Field	Description	Sample Values
Confirmation Instructions	<p>Online Channel – Read only.</p> <p>Non Online Channel - Select the confirmation instruction for the LC from the available LOV values – CONFIRM, MAY ADD, WITHOUT.</p> <p>Applicable only if field 49 - confirmation instruction is 'confirm' or 'may add'. You can search through LOV, Party type with banks should only be displayed in LOV. The system must display the following:</p> <p>a) SWIFT code (if available),</p> <p>b) Name and address of the bank</p> <p>On selection of the record, if SWIFT code is available then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.</p>	
Requested Confirmation Party	<p>Online and Non-Online Channels – Provide requested confirmation party details. If the Requested Confirmation Party has the value as Others then appropriate value must be selected from the LOV.</p> <p> Note This field is applicable if the Confirmation Instructions is Confirm or May Add.</p>	
Requested Confirmation Party	<p>Click Search to search and select the appropriate requested confirmation party, in case of online and non-online channels.</p> <p>This field is enabled if the Confirmation Instructions is CONFIRM or MAY ADD and 58A - Requested Confirmation Party is Others.</p>	
Advise Through Bank	<p>Online Channel – User can update the details received.</p> <p>Non-Online Channel -</p> <p>Search through LOV. Party type with banks must be displayed in LOV.</p> <ul style="list-style-type: none"> • SWIFT code (if available) • Name and address of the bank <p>On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address to be defaulted.</p>	
Instructions to P/A/N Bank	<p>Online Channel- User can update details received.</p> <p>Non Online Channel – Provide the details in this field.</p>	

Field	Description	Sample Values
72- Sender to Receiver Information	Online Channel – User can update details received. Non Online Channel – Provide details (FFT).	
Charges	Online Channel – User can update details received. Non Online Channel – Provide details (FFT).	
Reimbursement Authorization		
Reimbursing Bank	Click Search icon and select the reimbursing bank, from the look-up.	
Reimbursing Bank Charge Type	Select the reimbursing bank charge type. The options are: <ul style="list-style-type: none"> • Claimants - Select this option, if the charges are to be claimed from Beneficiary • Ours - Select this option, if the charges are to be borne by Applicant This field should be enabled only if Reimbursing Bank field has value.	
Reimbursing Bank Charge Details	Specify the additional details about reimbursing bank charges. This field should be enabled only if Reimbursing Bank field has value.	
Sender to Receiver Information-MT740	Select the FFT maintained for MT740 and change the description if required.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents button to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks button to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Incoming Message	<p>This button displays the multiple messages.</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the LC Issuance Scrutiny stage inputs and the task gets landed in My Task menu.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

Additional Fields

Banks can configure these additional fields during implementation.

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents button to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	

Field	Description	Sample Values
Remarks	<p>Click the Remarks button to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Incoming Message	<p>This button displays the multiple messages.</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>

Linkage Amount (Transaction Currency):	System to default the transaction amount user can change the value. System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.	
Below fields appear in the Deposit Details grid along with the above fields.		
Deposit Currency	The currency will get defaulted in this field.	
Transaction Currency	The currency will get defaulted in this field from the underlying task.	
Delete Icon 	Click minus icon to remove the existing Linked deposit details by selecting the Deposit.	
Edit Link	Click edit link to edit any existing deposit Details.	

Commission, Charges and Taxes Details

After payment, click on **Default Charges** button to the default commission, charges and tax if any will get populated.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from Back End system. The system also default the Charges/Commission Party maintained for the customer as per defined Class Maintenance in OBTF. System simulates the Charges, Commission and Tax details from the Back office. Provide the Charge Details based on the description provided in the following table:

At the time of contract initiation against respective commission and charge component, the OBTFPM by default captures the counter parties Account Description as the Charge Party.

The user can view the Account Description of the Charge Party of the respective Settlement Account holder, post successful handoff user can view the same Charge Party details against the commission and charges which were entered at the time of contract initiation in the BO/MO Enquiry screen of LC in OBTF.

Loan/Finance Account	Displays the loan account.	

Field	Description	Sample Values
Negotiation Rate	Specify the negotiation rate.	

Insurance Details

Provide the Insurance details based on the description in the following table:

Field	Description	Sample Values
Company Details		
Company Code	Select the Company Code from the LOV.	
Company Name	Read only field. Insurance company details will be displayed as per the selected Company Code from the LOV.	
Company Address	Read only field. Insurance company address will be displayed as per the selected Insurance Company Code from the LOV.	
Policy Number	Provide the policy number.	
Open Policy	If enabled, this field denotes whether the policy is an open policy.	
Cover Date	Specify the cover date of the policy.	
Expiry Date	Specify the Expiry Date of the Policy. System displays an override if the policy is expired.	
Insurance Amount	Specify the insurance amount for the policy.	
Utilized Amount	This field displays the utilized amount, if the policy is an Open Policy.	

FX Linkage

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.

- FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

System should default Counter party for FX linkage. However option to be provided to user to select contracts of Accountee, if Accountee is other than counter party.

Data Enrichment

As part of Data Enrichment, user can enter/update basic details of the incoming request.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard displays several key performance indicators and data points:

- Draft Confirmation Pending:** A table listing customer names (EMR & CO, NA, NA) and application dates (25-06-2018, 25-06-2018, 21-06-2018).
- Hand-off Failure:** A table showing branch (Bank Futura), process name (NA), and stage name (Retry HandOf).
- Priority Details:** A table with columns for Branch, Process Name, and Stage Name, listing items like Amount Blo and Loan Applic.
- High Value Transactions:** A bubble chart showing transaction values for GBP, with a scale from -20K to 140K.
- SLA Breach Details:** A table listing customer names (NA, HSBC BANK, WALL MART, EMR & CO), SLA Breached (mins) (23474, 26667, 23495, 26780), and priority (H, M, SHUBHAM, M, GOPINATHO1).
- Priority Summary:** A table showing Branch (203), Process Name (Cucumber Testing), and Stage Name (test descrip).
- Hold Transactions:** A table with columns for Branch, Process Name, and Stage Name.
- SLA Status:** A dropdown menu currently set to 'Cucumber Testing'.
- Tasks Detailed:** A table with columns for Branch, Process Name, and Stage Name.

3. Click Trade Finance> Tasks> Free Tasks.

The Free Tasks page displays a list of tasks with the following data:

Action	Priority	Application Number	Branch	Customer Number	Amount	Process Name	Stage	Back Office Ref No.

Page 1 of 1 (1-10 of 10 items) | Previous | Next

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks** tab.

The screenshot shows the same Free Tasks page as above, but with the 'Acquire & Edit' button for the first task (Application Number: GS1ILCA000006057) highlighted in red. The 'Acquire' button is also visible and highlighted in blue.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for Data Enrichment stage.

Action	Priority	Application Number	Branch	Customer Number	Amount	Process Name	Stage	Back Office Ref No.
Edit	M	GS11LCI000006057	GS1	000263	£15,000.00	Import LC Issuance	Data Enrichment	GS11LSN190328LVF

The Data Enrichment stage has six sections as follows:

- Main Details
- Availability
- Payment
- Documents & Conditions
- Additional Fields
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User must be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

Main Details

Refer to [Main Details](#).

Availability

Refer to [Availability](#).

Payment

Refer to [Payment Details](#).

Documents & Conditions

User must provide the required documents and additional conditions (if applicable) in this section.

Documents Details

Based on the 'Product' selected, Application will default the documents required under the LC. User can edit the details, delete an existing document and also add additional documents to the defaulted list.

Note

Insurance document is available in Documents Details section, if value in the 'INCO Term' field is not 'CFR', 'FOB', 'FCA', 'FAS' or 'EXW' in the **Availability** stage. If not system gives the warning message.

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both 'Bill Of lading' and 'Airway Bill' are chosen.

Field	Description	Sample Values
Code	Click Search icon to search and select the document code based on the document received. User can add or delete the code by deleting the line on the grid.	
Document Description	System displays the document description based on the document code selection. User can edit the description.	
Copy	Specify the number copies received from the Drawer. User can edit the actual copies received.	

Field	Description	Sample Values
Original	Specify the number of original documents received from the Drawer. User can edit the actual originals received.	
Clause Details	Displays the description of the clause required as per LC.	
Original Doc. Required	System displays whether original document is required or not. The user can enable the option, if original document is required.	
Action	Click Edit icon to edit the document details. Click Delete icon to delete the document details.	

Additional Conditions

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line de-limiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

Field	Description	Sample Values
FFT Code	This field displays the FFT code as per the latest LC.	
FFT Description	This field displays the description of the FFT code as per the latest LC.	
Action	Click Edit icon to edit the additional conditions details. Click Delete icon to delete the additional conditions details.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents button to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks button to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view overrides, if any.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Incoming Message	<p>This button displays the multiple messages.</p> <p>In case of MT798, the User can click and view the MT798 message(770,700/701).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>	

Field	Description	Sample Values
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>	
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Save & Close	<p>Save the information provided and holds the task in you queue for working later.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the LC Issuance Scrutiny stage inputs and the task gets landed in My Task menu.	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	

Field	Description	Sample Values
Submit	<p>Task will get moved to next logical stage of Import LC Issuance.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	

Additional Fields

Refer to [Additional Fields](#).

Advices

Advices menu displays the advices available under a product code from the back office as tiles. User can edit the fields in the tile, if required.

The screenshot displays the Oracle Flexcube Universal Banking interface. The top navigation bar shows the Oracle logo, 'My Tasks', and user information for 'SRIDHAR01' (subham@gmail.com). The main content area is titled 'Import LC Issuance - DataEnrichment :: Application No: 300ILCI000035573'. A sidebar on the left contains a menu with items: Main, Availability, Payment, Documents and Conditions, Additional Fields, Advices (highlighted), Additional Details, and Summary. The 'Advices' section shows a single advice tile for 'Advice : PAYMENT_MESSAGE'. The tile details are: Advice Name : PAYMENT_MESSAGE, Advice Party : , Party Name : , Suppress : N, and Advice. At the bottom of the interface, there is an 'Audit' button on the left and a row of action buttons: Reject, Refer, Hold, Cancel, Save & Close, Back, and Next. The top right corner shows 'Documents' and 'Remarks' buttons.

The user can also suppress the Advice, if required.

On reject, a reject notification gets generated to the applicant.</p>	
Next	<p>Task will get moved to next data segment of Import LC Issuance.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>	

Additional Details

The screenshot displays the Oracle Banking Trade Finance application interface. The main content area is titled 'Additional Details' and contains a grid of panels for 'Limits and Collaterals', 'Revolving Details', 'Commission, Charges and Taxes', 'Preview Messages', 'Create Template', 'Insurance Details', 'FX Linkage', and 'Tracer Details'. The 'Limits and Collaterals' panel shows fields like Contribution Currency (GBP), Collateral Contribution (115), and Collateral Status (Not Verified). The 'Revolving Details' panel shows Revolving (Yes), Revolving In (Time), and Revolving Frequency (Days). The 'Commission, Charges and Taxes' panel shows Charge Commission, Tax, and Block Status (Not Initiated). The 'FX Linkage' panel shows FX Reference Number, Contract Currency, and Contract Amount. The 'Tracer Details' panel shows Tracer Code (ACK_TRACER), Required (No), Medium, and Frequency.

Limits & Collateral

Refer to [Limits & Collateral](#).

Commission, Charges and Taxes

Refer to [Commission, Charges and Taxes Details](#).

FX Linkage

Refer to [FX Linkage](#).

Preview

User can preview the draft SWIFT message based on message type and the draft mail advice based on the advice type.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number.

Note

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

- Settlement Details - User can view and modify settlement details, if required.
- Tracer Details - User can view and modify tracer details, if required.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	
Request Clarification	User should be able to specify the clarification details for requests received online.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others.	
Submit	Task will get moved to next logical stage of Import LC Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs and the task gets landed in My Task menu.	

Field	Description	Sample Values
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.</p>	

Customer Response - Draft Confirmation

The user can review and handle the customer's response received for the draft confirmation for LC issuance transactions, which is sent to the customer for their verification and confirmation. The OBTFPM system sends Draft MT700 along with up to seven MT701 messages as attachment to the customer.

The Transaction Reference Number is masked, before sending the Draft Import LC for Customer approval.

The customer response can be received both by online and offline mode. In non-online mode, user receives the response in the branch.

In online mode the customer will share their response online that will be automatically updated in the customer response field in the task, which is available in the customer response pending stage.

Log in into OBTFPM application, and open the task to see customer response screen.

Customer Response

Language - Read only field

Draft Message - Read only field

Draft Confirmation

Draft Confirmation required - Read only field

Customer Response - This field will be available for you to update any of the below response based on the customer's reply

- Accepted
- Changes Required - Change and proceed

For non-online response – User can select customer response from one of the three drop list values mentioned above.

For Online response – Read only

Customer Remarks - Capture the remarks of the customer.

Response Date - Non-Online channel – Update the date on which the customer response has been received.

Online Channel – Read only

Summary

Tiles Displayed in Summary

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
- Payments - User can view and modify all details related to payments, if required.
- Documents & Condition - User can view and modify the documents required grid and the additional conditions grid, if required.

Exceptions

The Import LC Issuance request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the Import LC issuance Amount Block Exception check and the task gets landed in My Task menu.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the Back End application (outside this process).
- Without changing the KYC status in the Back End application.
- Reject (with appropriate reject reason).

Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	Cancel the Import LC issuance KYC exception check and the task gets landed in My Task menu.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the Back End (outside this process).
- Without enhancing limit in the Back End.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT798, on approval the task is handed off to back office system to create LC contract and generate the required MT700/701/740 messages.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

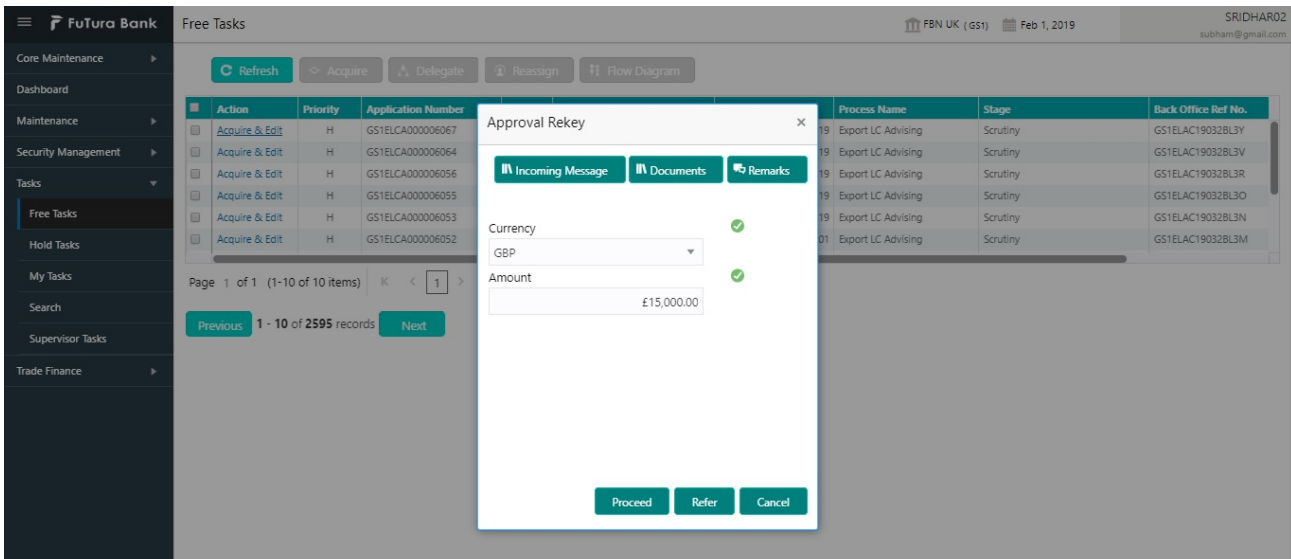

Authorization Re-Key

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

Action Buttons

Thank you

Customer - Reject Advice

Reject Letter is generated by the system and addressed to the customer, when a task is rejected by the user. The Reject Letter format is as follows:

FROM:

<BANK NAME>

<BANK ADDRESS>

TO:

DATE <DD/MM/YYYY>

<CUSTOMER NAME>

<CUSTOMER ADDRESS>

<CUSTOMER ID>

Dear Sir,

SUB: Your Import LC Application <Customer Reference Number> under our Process Ref
<Process Ref No> - Rejected

Further to your recent Import LC application request dated <Application Date -DD/MM/YYYY>, under our process ref no <process ref no>, this is to advise you that we will not be able to issue the required LC.

After a thorough review of your application and the supporting documents submitted, we have concluded we will not be able to issue the LC due to the below reason

<Reject Reason >

On behalf of Demo Bank, we thank you for your ongoing business and trust we will continue to serve you in future.

For any further queries about details of your Import LC application review, please contact us at our bank customer support ph.no xxxxxxxxxxxx

Yours Truly

Reject Approval

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Import LC Issuance in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Application Details

The application details data segment have values for requests received from both non-online and online channels.

Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Availability and Shipment - User can view and modify availability and shipment details, if required.
