Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process trade finance transaction.

Overview

OBTFPM is a Trade Finance Middle Office Platform, which enables Bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during Transaction handling /processing.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Shipping Guarantee Issuance - Islamic

As part of Shipping Guarantee Issuance, the Importer (Applicant in case of LC transaction and Drawee in case of Documentary Collection) approaches a bank and requests the bank to issue a Shipping Guarantee and the Shipping guarantee is presented by the Importer to the carrier for taking delivery of the goods in the case of arrival of cargo prior to the shipping document.

The various stages involved for issuance of Shipping Guarantees are:

- Input application details and Upload of related mandatory and non-mandatory documents in Registration stage.
- Input/Modify details of Shipping Guarantee - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements.
- Hand off request to back office

The design, development and functionality of the Islamic Shipping Guarantee Issuance process flow is similar to that of conventional Shipping Guarantee issuance process flow.

In the subsequent sections, let's look at the details for Shipping Guarantee Issuance process:

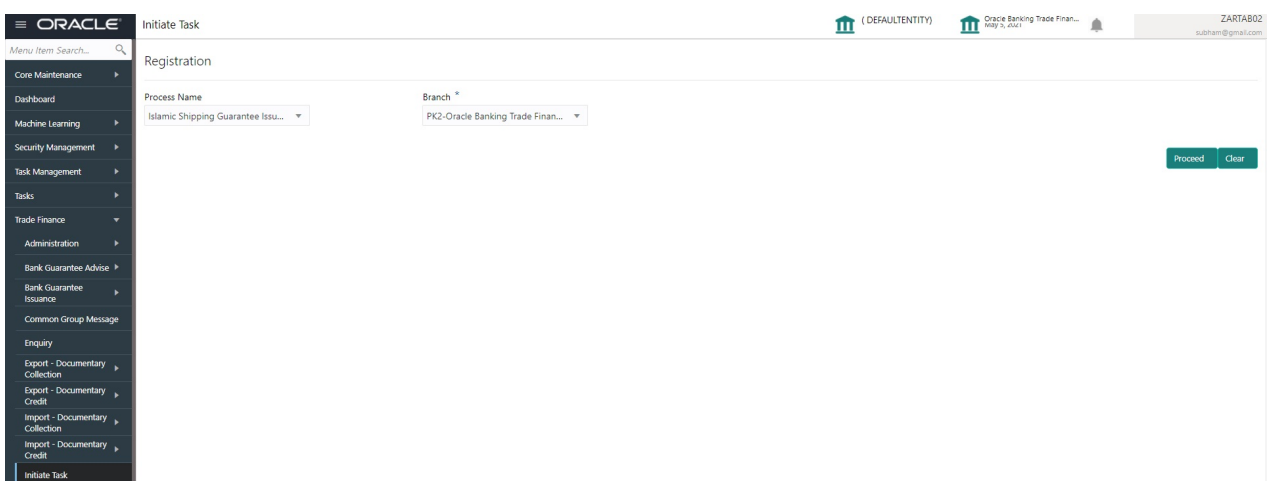

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Exception
Multi Level Authorization	

Common Initiation Stage

The user can initiate the new Islamic Shipping Guarantee request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

The first stage of Shipping Guarantee Issuance process starts from the Registration Stage. The user can initiate Islamic Shipping Guarantee issuance from the Registration process.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

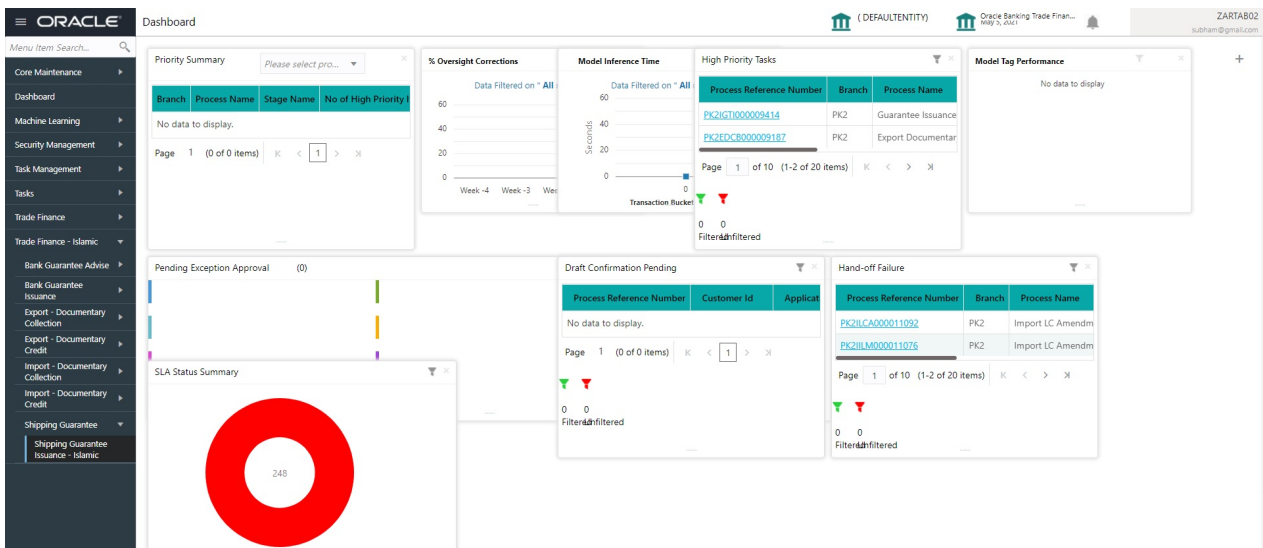

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance - Islamic > Shipping Guarantee > Shipping Guarantee Issuance - Islamic.

The Registration stage has two sections Application Details and Shipping Guarantee Details. Let's look at the Registration screens below:

Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Issued Against	Select whether this Shipping Guarantee is issued against Documentary Credit or against a Documentary Collection from the drop-down. Drop down values are: <ul style="list-style-type: none"> Documentary Credit Documentary Collection 	
Documentary Credit Number	Select Documentary Credit Number from LOV or input the LC number. This field is enabled only if value in Issued Against field is Documentary Credit .	
Customer	Read only field If the value in Issued Against field is Documentary Credit , the customer ID for the selected Documentary credit displays the ID of counter party of the LC as per the value available in Back office system and user should not be able to change the value. If the value in Issued Against is Documentary Collection , the user can input the Customer ID or select the Customer ID from the LOV	
Branch	System defaults branch details.	203-Bank Futura -Branch FZ1
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	203GTEISS00001134

Field	Description	Sample Values
Customer Reference Number	Specify the customer reference number.	
Priority	<p>Priority maintained will be populated as either 'Low or Medium or High'. If priority is not maintained for a customer, 'Medium' priority will be defaulted.</p> <p>User can change the priority populated any time before submit of Registration stage.</p>	Medium
Submission Mode	<p>System defaults the mode from Registration stage.</p> <p>User can change the submission mode populated. By default the submission mode will have the value as 'Desk'.</p> <p>Desk- Request at the Desk Courier- Request received through Courier Online - Request received Online</p>	Desk
Booking Date	<p>Read only field.</p> <p>System defaults the branch date. User cannot change the value. If the task gets approved on a later date, system will populate that date as the booking date.</p>	04/13/2018

Shipping Guarantee Details

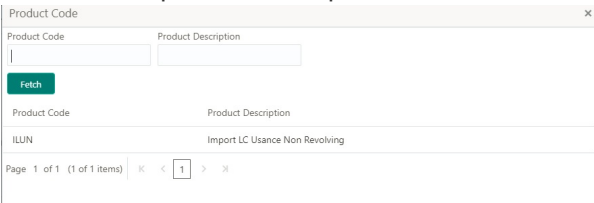

Registration user can provide Shipping Guarantee details in this section.

Shipping Guarantee Details

<p>Product Code ISGC</p> <p>Amount In Local Currency AED 100.00</p> <p>SG/DO Expiry Date * Aug 5, 2023</p>	<p>Product Description Islamic Shipping Guarantee Against Do</p> <p>Contract Reference Number 032ISGC232151501</p> <p>Mode of Transport * Rail</p>	<p>Outstanding LC Amount AED 1,000.00</p> <p>User Reference Number 032ISGC232151501</p> <p>Cargo Arrival Details</p>	<p>SG/DO Amount * AED 100.00</p> <p>SG/DO Beneficiary * 150703 Washlux Elect</p>
--	--	--	--

Hold Cancel Save & Close Submit

Provide the details based on the description in the following table:

Field	Description	Sample Values
Product Code	<p>Select the applicable Shipping Guarantee product code.</p> <p>Click the look up icon to search the product code with code or product description.</p>  <p>You can also enter the product code and on tab out system will validate and populate the selected product description. Cancel	Cancels the Shipping Guarantee Issuance Registration stage input.	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Checklist	Make sure that the details in the checklist are completed. If mandatory checklist items are not marked, system will display an error on submit.	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of Registration of a Shipping Guarantee Issuance request, the request moves to Data Enrichment stage. At this stage the bank user would be able to input/update fields for Islamic Shipping Guarantee Issuance.

Requests that are created online (Trade Portal) the task will be created in DE stage directly and the fields will be populated based on the incoming request and user can view and update if required. Submission mode for online requests will be "Online".

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

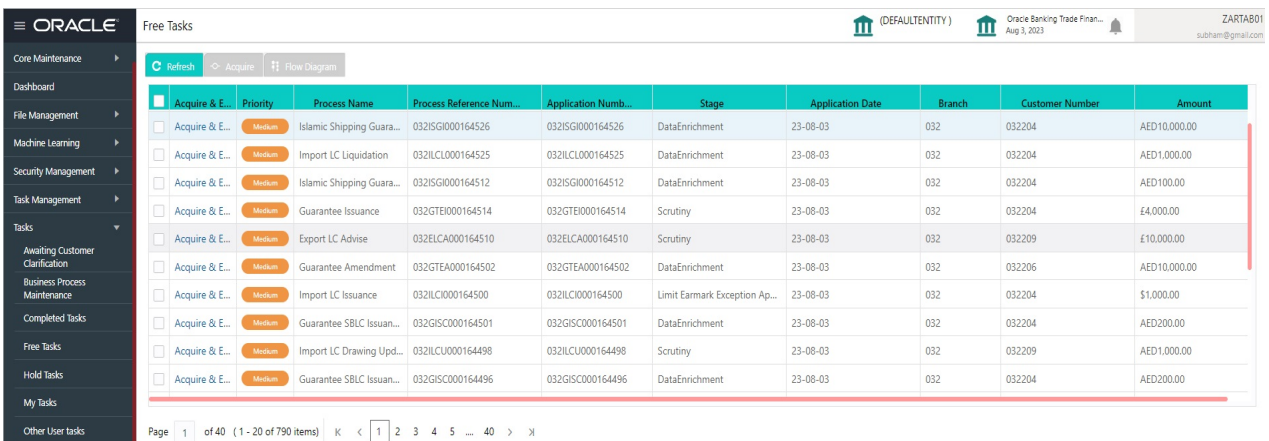

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets mapped to the user.

3. Click **Tasks > Free Tasks**.

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to acquire the task.

The Data Enrichment stage has following sections:

- Main
- Shipment Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Shipping Guarantee Details

Application Details

. Applications from Online channels will be directly available in the Data Enrichment stage and the fields will be populated with the details from incoming request.

When the requests that are created online (Trade Portal) then the Submission mode for online requests will be “Online” and user cannot change the Submission mode.

Refer to [Application Details](#) for more information of the fields.

The screenshot shows the Oracle Trade Portal interface for 'Islamic Shipping Guarantee Issuance'. The top navigation bar includes 'ORACLE', user information '(DEFAULTTENITY)', 'FLEXCUBE UNIVERSAL BAN...', and 'ZARTAB02'. The main content area is divided into two sections: 'Application Details - Main' and 'Shipping Guarantee Details'. The 'Application Details - Main' section contains fields for 'Issued Against' (Documentary Credit), 'Documentary Credit Number' (032ILIN232151501), 'Customer' (032204 Air Arabia), 'Branch' (032-Oracle Banking Trade Finan...), 'Process Reference Number' (032ISGI000164519), 'Customer Reference Number', 'Priority' (Medium), and 'Submission Mode' (Desk). The 'Shipping Guarantee Details' section contains fields for 'Product Code' (SGLI), 'Product Description' (SGLI - Islamic Shipping Guarantee Issu), 'Outstanding LC Amount' (AED 5,500.00), 'SG/DO Amount' (AED 100.00), 'Amount In Local Currency' (AED 100.00), 'Contract Reference Number' (0325GLI23215A3H1), 'User Reference Number' (0325GLI23215A3H1), 'SG/DO Expiry Date' (Sep 1, 2023), 'Mode of Transport' (Road), and 'SG/DO Beneficiary' (091214 Agthia Group). The bottom of the screen features a row of action buttons: 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Shipping Guarantee Details

The fields listed under this section are same as the fields listed under the [Shipping Guarantee Details](#) section in [Registration](#). Refer to [Shipping Guarantee Details](#) for more information of the fields. During Registration, if user has not captured values, then user can capture the details in this section.

The screenshot shows the 'Shipping Guarantee Details' section of the Oracle Trade Portal. It contains fields for 'Product Code' (SGLI), 'Product Description' (SGLI - Islamic Shipping Guarantee Issu), 'Outstanding LC Amount' (GBP £100,000.00), 'SG/DO Amount' (USD \$100.00), 'Amount In Local Currency' (GBP £100,000.00), 'Contract Reference Number' (PK2ILSR211258501), 'User Reference Number' (PK2ILSR211258501), 'SG/DO Expiry Date' (May 31, 2021), 'Mode of Transport' (Sea), and 'SG/DO Beneficiary' (000326 PHIL HAMPTC). The bottom of the screen features a row of action buttons: 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>Application displays mandatory documents to be uploaded for amendment. Place holders are also available to upload additional documents submitted by the applicant.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.</p>	
Overrides	<p>Click to view the overrides accepted by the user.</p>	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. Commission Details

The Commission Details with values is defaulted here, if default commission is available under the product.

Provide the Commission Details based on the description provided in the following table:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. User can change the rate, if required. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified	User can enter a new amount in 'Modified amount' field. From the default value, if the rate is changed or the amount is changed, the same is updated in the modified amount field.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	

Field	Description	Sample Values
Waive	Select the check box to waive charges/ commission. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary.	
Settlement Account	Details of the Settlement Account.	
Amendable	Displays if the field is amendable or not.	

Fields and Description of Charge Details provided in the following table:

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified	User can enter a new amount in 'Modified' field. From the default value, if the rate is changed or the amount is changed, the same is updated in the modified amount field.	
Billing	If charges are handled AZ the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.	

Field	Description	Sample Values
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary.	
Settlement Account	Details of the settlement account.	

Tax Details

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. Tax detail cannot be updated by you and any change in Tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Following Tax Details will be displayed:

Field	Description	Sample Values
Component	Tax Component type.	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If charges/commission is handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	

Field	Description	Sample Values
Settlement Account	Details of the settlement account.	

Preview Message

Based on the shipping guarantee details captured in the previous screen, the preview message simulated from the back office and the user can view the message.

Field	Description	Sample Values

User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 – Others 	

Field	Description	Sample Values
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Cancel the Data Enrichment Stage Inputs.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Back	On click Back , user navigates to previous step.	
Submit	On Submit, system should validate for all mandatory field values Task will get moved to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	

Exception

Amount Block Exception Approval - Trade Finance Transactions

As a part of Amount Block Exception, the user has to review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

In Amount block, system checks whether the sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.

- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

Tiles Displayed in Summary:

- Main Details - User can view the application details and Shipping Guarantee/Standby details. User can modify the details if required.

Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

Multi Level Authorization

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
-
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
