Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance Middle Office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import Documentary Collection Return - Close - Islamic

Import Documentary Collection Return - Close process facilitates the user to close the outstanding bills along with the returning of documents or without any documents, when no more payments are expected.

Import Documentary Collection can be Returned/Closed before liquidation. The Return/Close can be requested through Online/Offline channels.

The various stages involved for Import Doc Collection Return/Close are:

- Receive and verify documents and basic details(Non Online Channel)- Registration stage
- Verify documents and capture details (Online/Non Online Channels)- Data Enrichment stage
- Input/Modify details of Return/Close Collection - Data Enrichment stage
- Check balance availability for amount block if applicable
- Check for sanctions & KYC status
- Create amount block for charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Import Doc Collection Return process flow is similar to that of conventional Import Doc Collection Return/Close process flow.

This section contains the following topics:

Common Initiation Stage	Registration
Data Enrichment	Multi Level Approval
Reject Approval	

Common Initiation Stage

The user can initiate the new Islamic import collection return close from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

Action Buttons

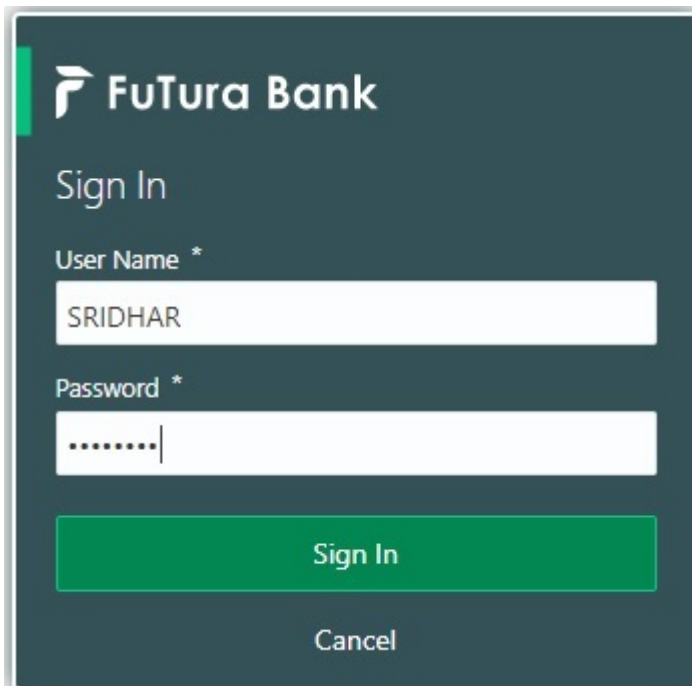

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

Registration

User can register request for an Islamic Import Doc Collection Return/Close at the front desk (as an application received physically/Courier). During Registration stage, user can capture the basic details of the transaction, check the signature of the applicant and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the Documentary Collection.	
Remarks	Provide any additional information regarding the return. This information can be viewed by other users handling the request.	
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	

Field	Description	Sample Values
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Events	On click, system will display the details of all the events.	
Action Buttons		
Submit	On submit, task will move to next logical stage of Import Documentary Collection Return - Close - Islamic. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.	
Cancel	Cancels the Import Documentary Collection Return - Close - Islamic Task. Details entered will not be saved and the task will be removed.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".

3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

Data Enrichment

On successful completion of Registration of an Islamic Import Documentary Collection Return - Close, the request moves to Data Enrichment stage. As part of data enrichment, user enters Return/Close basic details of the incoming request.

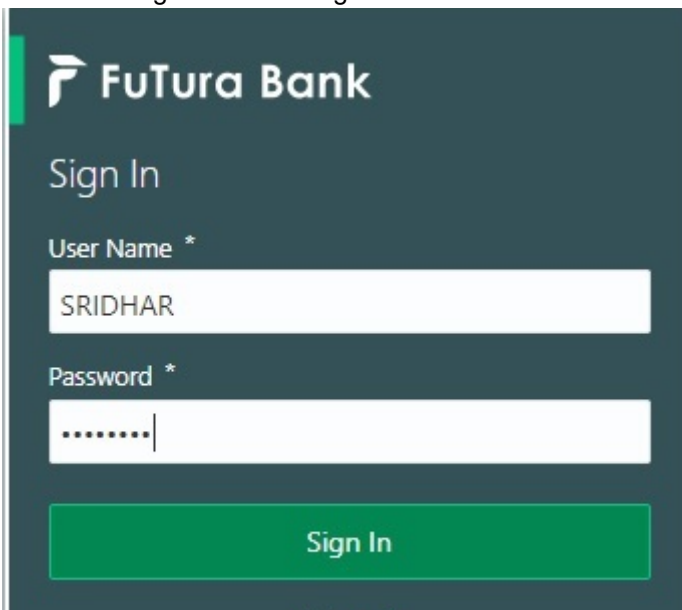

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

FuTura Bank

Sign In

User Name *

SRIDHAR

Password *

.....

Sign In

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

The screenshot shows the Oracle dashboard interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Maintenance, Security Management, Tasks, and Trade Finance. The main content area contains several widgets:

- High Value Transactions:** A scatter plot showing data points for GBP and EUR over a period of 12 units. The y-axis ranges from 0 to 120K.
- High Priority Tasks:** A table listing tasks with columns for Branch, Process Name, and Status. Tasks include 'Import Documentary Collections', 'Export LC Advising', and 'Export LC Advising'.
- Priority Summary:** A table with columns for Branch, Process Name, and Status, showing multiple instances of 'Export Documentary Collections-Update'.
- Pending Exception Approval:** A table with columns for Customer Name, Stage Name, Process Reference Number, Process Name, Branch Name, and Currency. It lists 'Amount Block Exception Approval' and 'Limit Earmarking Exception Approval'.
- SLA Status Summary:** A summary widget with a dropdown menu set to 'Export Documentary Collections-Update'.

3. Click Tasks > Free Tasks.

The screenshot shows the 'Free Tasks' page in the Oracle system. It features a table of tasks with the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, and Branch. The tasks are listed with their respective priorities (Medium, High) and stages (DataEnrichment, Registration, Scrutiny, Approval Task Level 1, KYC Exceptional approval).

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

The screenshot shows the 'Free Tasks' interface in Oracle. The top navigation bar includes 'ORACLE', 'Free Tasks', and user information. Below the navigation bar, there are buttons for 'Refresh', 'Acquire', and 'Flow Diagram'. The main area contains a table with the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, and Branch. The first row is selected, showing a task with 'Acquire & E...' as the action, 'Medium' priority, and 'DataEnrichment' stage. The table is paginated to show 1 of 138 items.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to updated the registered task.

The screenshot shows the 'My Tasks' interface in Oracle. The top navigation bar includes 'ORACLE', 'My Tasks', and user information. Below the navigation bar, there are buttons for 'Refresh', 'Release', 'Escalate', 'Delegate', and 'Flow Diagram'. The main area contains a table with the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Customer Number. The first row is selected, showing a task with 'Edit' as the action, 'Medium' priority, and 'DataEnrichment' stage. The table is paginated to show 1 of 11 items.

The Data Enrichment stage has the following hops for data capture:

- Main Details
- Return Details
- Draft Details
- Additional Fields
- Advices
- Settlement Details
- Additional Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from registration application Details may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details

- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**, **'Submission Mode'** and **'Return Date'**.. Refer to [Application Details](#) for more information of the fields.

Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Request Clarification	User should be able to specify the clarification details for requests received online.	

Multi Level Approval

A User can view the summary of Return details in multilevel approval stage of Islamic Import Collection Return/Close request.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving. User can see the summary tiles. The tiles should display a list of important fields with values. The user can drill down from summary Tiles into respective data segments where user can verify the details of all fields under the data segment.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.

- Closure/Return Details - User can view the return details.
