Business Overrides

The system generates overrides to alert the user whenever there is a discrepancy in the requested, proposed and approved amounts based on configuration. The user authorized to approve the override must acquire the task and then view and accept the overrides in order to proceed further with the process.

Business overrides can be viewed before or during submitting the task.

To view the business overrides after capturing the limit amounts, click **Overrides** at the top right corner.

Chapter 4 - Appendix

To view the business overrides in the *Submit* window, click **Submit** and navigate to the **Business** data segment.

After the authorized user accepts the overrides, the override status is changed to Accepted Overrides as shown in the above screenshot.

If the business override is generated in the Approval stage, the other user authorization is not required. The approver can directly accept the overrides and proceed with the application.
