Chapter 3 - Overview

About Simplified Credit Proposal Evaluation

Banks around the countries have different teams to perform their day to day activities that are necessary to keep the banks functional. Since credit proposal is initiated and enriched by the same team in many banks, Simplified Credit Proposal Evaluation Process (CPEP) is introduced in OBCFPM to process and evaluate the credit proposals with ease. As the process name indicates, the credit proposal is only evaluated for determining the credit, legal, and risk status of the corporate customer. To handoff the facility, Simplified Credit Proposal Handoff Process must be initiated.

Refer each chapter in this book for information on processing the application in each stage.

The following flow diagram illustrates the different stages in Simplified CPEP:
