# 1. Preface

## 1.1 Introduction

This user manual is designed to help you quickly get acquainted with Export LC Liquidation - Islamic process in Oracle Banking Trade Finance Process Management.

## 1.2 Audience

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

## 1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## 1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

## 1.5 Related Documents

- Getting Started User Guide
- Common Core User Guide

## 1.6 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry

standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## 1.7 Conventions

The following text conventions are used in this document:

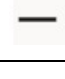

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## 1.8 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## 1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

## 2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

### 2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

### 2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

### 2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

## 3. Export LC Liquidation - Islamic

Export LC liquidation - Islamic process deals with handling a Liquidation of Drawings under Islamic LC.

The various stages involved for Export LC Drawing Liquidation are:

- Input Liquidation details and Upload of related mandatory and non-mandatory documents in Registration stage
- Input/Modify details of Export Drawing Liquidation - Data Enrichment stage
- Check balance availability for amount block
- Check for sanctions & KYC status
- Create amount block if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Export LC Drawing Liquidation process flow is similar to that of conventional Export LC Drawing Liquidation process flow.

This section contains the following topics:

<a href="#">3.1 Common Initiation Stage</a>	<a href="#">3.6 Reject Approval</a>
<a href="#">3.2 Registration</a>	<a href="#">3.3 Data Enrichment</a>
<a href="#">3.4 Exceptions</a>	<a href="#">3.5 Multi Level Approval</a>

### 3.1 Common Initiation Stage

The user can initiate the new export LC liquidation request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.

Field	Description
Drawing Reference Number	Select the Drawing Reference Number.
Branch	Select the branch.

### 3.1.0.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

## 3.2 Registration

The process starts from Registration stage, during Registration stage, user can capture the basic details of the transaction and upload related documents. On submit of the request the request will be available for an LC expert to handle the liquidation request in the next stage.

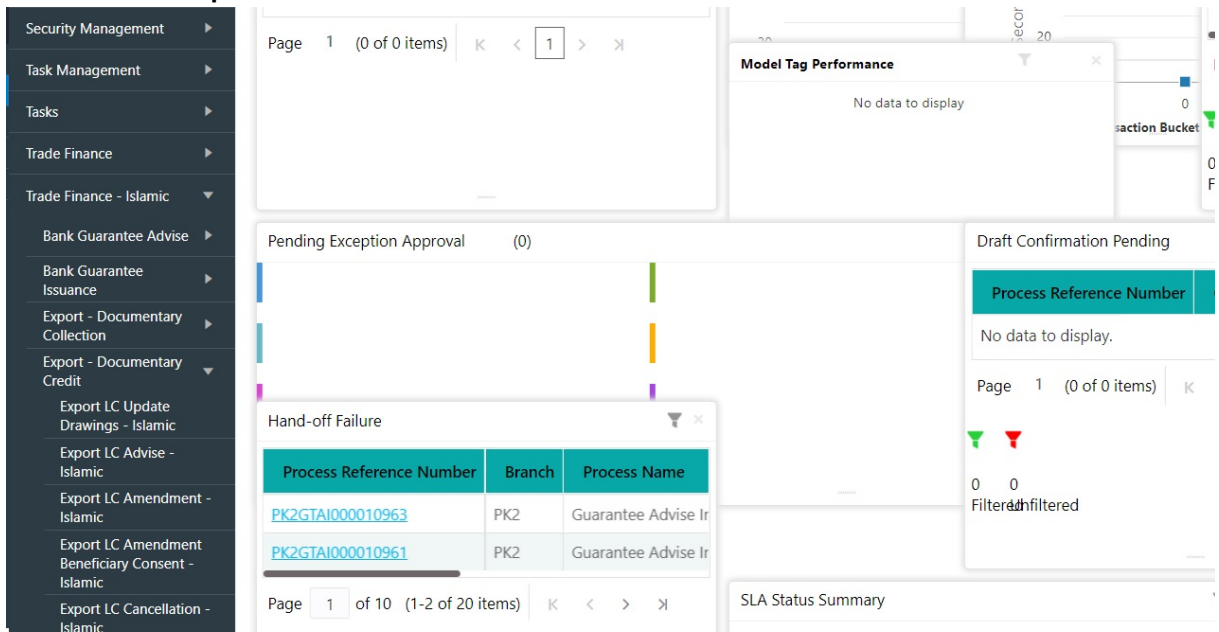

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

- On login, user must be able to view the dashboard screen with widgets as mapped to the user.

- Click **Trade Finance - Islamic > Export - Documentary Credit > Export LC Liquidation - Islamic.**

The Registration stage has two sections Basic Details and Liquidation Details. Let's look at the details of Registration screens below:

### 3.2.1 Application Details

Provide the Basic Details based on the description in the following table:

Field	Description	Sample Values
Drawing Reference Number	Specify the drawing reference number. Alternatively, user can search the Drawing reference number using lookup. In the lookup, user can input Drawing Reference Number, Applicant, Beneficiary, Issue Date, Currency, Amount and User Reference to fetch the drawing details. Based on the search result, select the applicable LC to add the applicant response.	
Export LC Reference Number	Read only field. Export LC Reference Number will be auto-populated based on the selected LC from the LOV.	
Beneficiary	Read only field. Beneficiary ID and name will be auto-populated based on the selected LC from the LOV.	
Branch	Read only field. Branch details will be auto-populated based on the selected LC from the LOV.	203-Bank Futura -Branch FZ1
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	

Field	Description	Sample Values
Priority	System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit.	High
Submission Mode	Select the submission mode of Export LC Drawing request. By default the submission mode will have the value as 'Desk'.  <b>Desk-</b> Request received through Desk <b>Courier-</b> Request received through Courier	Desk
Liquidation Date	By default, the application will display branch's current date and does not enables the user to change the date to any back date.	04/13/2018

### 3.2.2 Liquidation Details

Registration user can provide liquidation details in this section. Alternately, details can be provided by Data Enrichment user.

Provide the Liquidation Details based on the description in the following table:

Field	Description	Sample Values
Tenor Type	Read only field. This field displays the tenor of the drawing.	
Documents Received	Read only field. This field displays the documents received details of the drawing.	
Product Code	Read only field. This field displays the product code of the drawing.	
Product Description	Read only field. This field displays the description of the product as per the product code.	
User Reference Number	Read only field. This field displays the user reference number based on the product code.	
Drawing Date	Read only field. This field displays the drawing date details of the drawing.	
Issuing Bank	Read only field. This field displays the issuing bank ID and issuing bank name of the drawing.	

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Issuing Bank Reference	Read only field. This field displays the issuing bank ID of the drawing.	
Date of Expiry	Read only field. This field displays the expiry date of the drawing.	
Presenting Bank	Read only field. Presenting Bank will be auto-populated based on the selected LC from the LOV.	
Presenting Bank Reference Number	Read only field. Presenting Bank Reference number will be auto-populated based on the selected LC from the LOV.	
Confirming Bank	Specify the name of the Confirming Bank. Alternatively, user can search the Confirming Bank using lookup.	
Available with Bank	Specify the name of the Confirming Bank. Alternatively, user can search the Confirming Bank using lookup.  The Available Bank details should be handed off against 'Collecting Bank' Party in OBTF.  <hr/> <b>Note</b>  1) If the Bank selected in Confirming Bank and Available with Bank are same, system should hand off only the Confirming Bank details in Back office.  2) If Confirming Bank/Available with Bank are the same as Issuing Bank/ Presenting Bank, system should display an error.	
Drawing Amount	Read only field. This field displays the LC Drawing Amount as per the selected drawing.	
Amount in Local Currency	Read only field. This field displays the Local currency and amount.	
Outstanding Amount	Read only field. Outstanding amount value will be auto-populated. This field displays the value as per the latest LC.	

Field	Description	Sample Values
Additional Amount	Read only field. Additional Amount will be auto-populated. This field displays the value as per the latest LC.	
Nego/Finance Amount	Read only field. Nego/Finance Amount will be auto-populated. This field displays the value as per the latest LC.	
Liquidation Amount	Provide the liquidation amount.	
Unlinked FX Rate	Provide the Unlinked FX Rate.	
Rebate Amount	Read only field. Rebate to the bill outstanding amount.	
Customer Dispatch	The value will be populated from back office based on the maintenance.  <b>Toggle On:</b> If the toggle is set to Yes, the customer has the option to dispatch the documents directly to the importer's bank.  <b>Toggle Off:</b> If the toggle is set to No, the bank has to dispatch the documents to the importer's bank.  Bank user is not allowed to edit the field, if the value defaulted from the back office is "No",	

### 3.2.3 Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	Upload the documents received under the LC.	

Field	Description	Sample Values
Remarks	Provide any additional information regarding the drawing. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> <li>● <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>● <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	Enables the user to view the latest LC values displayed in the respective fields. All fields displayed in LC details section are read only fields.	
Events	On click, system will display the details of LC issuance, amendments (if any), drawings (if any) and liquidations if any under the LC in chronological sequence from LC Issuance.	
<b>Action Buttons</b>		
Submit	On submit, task will get moved to next logical stage of Export LC Liquidation.  If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later.  This option will not submit the request.	
Cancel	Cancels the Export LC Liquidation Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold.  This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

### 3.3 Data Enrichment

On successful completion of Registration of an Export LC Liquidation request, the request moves to Data Enrichment stage. At this stage the gathered information during Registration are scrutinized.

During the submit at the end of this stage, an amount block will be created in the settlement account for the amount to be liquidated. Customer cannot use the amount for which the amount block is created until the transaction is completed.

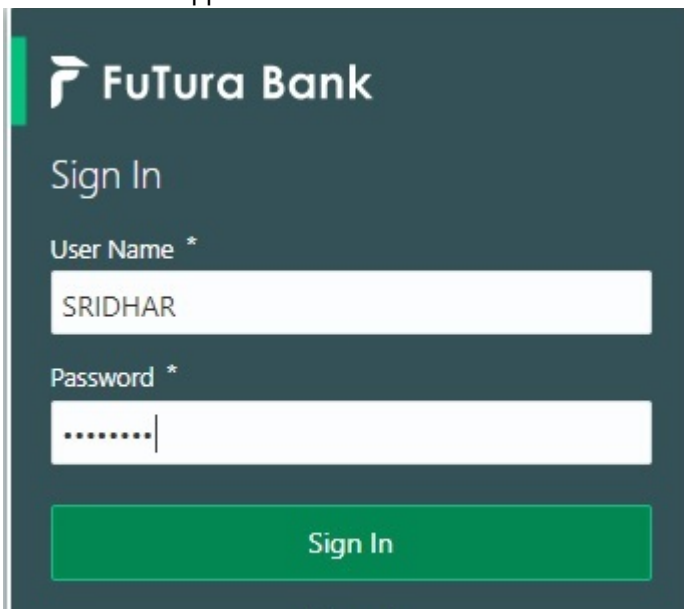

---

#### Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

**FuTura Bank**

Sign In

User Name \*

SRIDHAR

Password \*

.....

Sign In

- On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard for FuTura Bank displays several data widgets. On the left is a navigation menu with options like Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main area contains:
 

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and Status. Rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns Branch, Process Name, and Stage Name. Row: Bank Futura, NA, Retry HandOf.
- Priority Details:** A table with columns Branch, Process Name, and Stage Name. Rows include Bank Futura (NA, Amount Blo) and 004 (NA, Loan Applic).
- High Value Transactions:** A bubble chart showing transaction values for GBP, with a scale from -20K to 140K.
- SLA Breach Details:** A table with columns Customer Name, SLA Breached(mins), and Priority. Rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns Branch, Process Name, and Stage Name. Row: 203, Cucumber Testing, test descrip.
- Hold Transactions:** A table with columns Branch, Process Name, and Stage Name.
- SLA Status:** A dropdown menu currently set to Cucumber Testing.
- Tasks Detailed:** A dropdown menu currently set to Cucumber Testing.

- Click Trade Finance> Tasks> Free Tasks.

The Oracle Free Tasks page displays a list of tasks. The table has the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, and Branch. The tasks listed include:
 

- Acquire & E... (Medium) Export LC Liquidation Islamic (PK2IELL000010968) - DataEnrichment (22-03-08)

The Data Enrichment stage has following hops for data capture:

- Main Details
- Maturity Details
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for liquidation stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

### 3.3.1 Main Details

Main details section has two sub section as follows:

- Application Details
- Liquidation Details

#### 3.3.1.1 Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to [3.2.1 Application Details](#) for more information of the fields.

**Main Details**

**Application Details**

### 3.3.1.2 Liquidation Details

The fields listed under this section are same as the fields listed under the [3.2.2 Liquidation Details](#) section in [3.2 Registration](#). Refer to [3.2.2 Liquidation Details](#) for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

### 3.3.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	<p>The user can view the uploaded documents. Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted.	
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>● <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>● <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>	

Field	Description	Sample Values
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	Enables user to view the details of the underlying LC.	
Events	Enables the user to view the latest snap shot of the various events under the LC.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> Select a Reject code and give a Reject Description.  This reject reason will be available in the remarks window throughout the process.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

### 3.3.2 Maturity Details

A DE user can input maturity data segment details of an Islamic Export LC Drawing Liquidation.

Provide the maturity details based on the description in the following table:

Field	Description	Sample Values
Tenor Type	Read only field. This field displays the tenor type as per LC.	
Tenor Basis	Read only field. This field displays the tenor basis as per LC.	
Start Date	Read only field. This field displays the tenor start date as per LC.	
Tenor Days	Read only field. This field displays the the number of tenor days as per LC.	
Transit Days	Read only field. This field displays the transit days as per LC.	
Maturity Date	System displays the due date for the drawing based on tenor and tenor basis.	
Interest Amount	Read only field. This field displays the Interest Amount.	
Profit From Date	Read only field. This field displays the profit from date.	
Profit To Date	Read only field. This field displays the profit to date.	

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Accept Commission From Date	Read only field. This field displays the acceptance commission start date.	
Accept Commission To Date	Read only field. This field displays the acceptance commission to date.	

### **3.3.2.1 Other Bank Charges**

Provide the other bank charges based on the description in the following table:

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Other Bank Charges - 1	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Charges - 2	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Charges - 3	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -1	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -2 to 3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Description -3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.	

### **3.3.2.2 Other Bank Profits**

Provide the other bank profits based on the description in the following table:

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Other Bank Profits - 1	Profits to be collected for the other bank as part of the drawings transaction.	
Other Bank Profits - 2	Profits to be collected for the other bank as part of the drawings transaction.	
Other Bank Profits - 3	Profits to be collected for the other bank as part of the drawings transaction.	

### 3.3.2.3 Other Details

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Debit Value Date	Provide the debit value date.	
Credit Value Date	Provide the credit value date.	
Value Date	Provide the value date.	
Allow Pre-Payment	<p><b>Toggle On:</b> Set the toggle 'On' to enable pre-payment.</p> <p><b>Toggle Off:</b> Set the toggle 'Off' to disable pre-payment.</p>	
Refund Interest	<p><b>Toggle On:</b> Set the toggle 'On' to refund the interest.</p> <p><b>Toggle Off:</b> Set the toggle 'Off' to deny the interest refund.</p>	
Transfer Collateral from LC	<p><b>Toggle On:</b> Set the toggle 'On' to enable the transfer collateral from LC.</p> <p><b>Toggle Off:</b> Set the toggle 'Off' to disable the transfer collateral from LC.</p>

### 3.3.4.3 Commission Details

This section displays the commission details:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	This field displays the commission component.	
Rate	Defaults from product.  The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.  If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected	
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	If check box is selected, charges/commissions has to be deferred and collected at any future step.	
Waive	<p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	

### 3.3.4.4 Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	

Field	Description	Sample Values
Settlement Account	Details of the settlement account.	

### 3.3.4.5 Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.  This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled.  The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.

### 3.3.4.9

Field	Description	Sample Values
Component	This field displays the component maintained in the back office.	
Component Description	This description of the component.	
Rate Type	System defaults the rate type maintained for the component in back office. Value can be: <ul style="list-style-type: none"> <li>• Fixed Floating</li> <li>• Special</li> </ul>	
Rate Code	This field displays the rate code applicable for the Component.	
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value only if the <b>Rate Type</b> is <b>Floating</b> .	
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value only if the <b>Rate Type</b> is <b>Floating</b> .	
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.	
Min Rate	This field displays the minimum rate applicable for the Rate Code.	
Max Rate	This field displays the maximum rate applicable for the Rate Code.	
Rate	This field displays the value applicable for the Rate Code. User can change the value if the <b>Rate Type</b> is <b>Fixed</b> . System validates whether the Rate input is between the Minimum and Maximum Rate.	
Modified Rate	This field displays the modified rate.	

Field	Description	Sample Values
Special Pricing Reference Number	<p>User can capture the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component).</p> <p>Special Pricing Reference is not applicable for Penal Interest components.</p> <p>For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same.</p> <hr/> <p style="text-align: center;"><b>Note</b></p> <p style="text-align: center;">System shows an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.</p>	
Currency	System defaults the Interest currency in this field.	
Amount	User can input the interest amount, in case the <b>Rate Type</b> is <b>Special</b> , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	<p>System displays the Charge Party based on the type of transaction.</p> <p>In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..</p>	

Field	Description	Sample Values
Settlement Account	<p>System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override.</p> <p>In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTfPM).</p>	

### 3.3.4.10 FX Linkage

This section enables the user to link the existing FX contract(s) to the drawing. User can link one or more FX deals to a drawing/bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Drawing/Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the drawing/bill.

Provide the FX linkage detail based on the description in the following table:

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following table:

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Total Utilized Amount	FX Expiry Date	Action
032FXF2232155502	AED	USD	AED 222,999.99	1.4	AED 100,000.00	AED 0.00	Jan 31, 2025

Provide the FX linkage detail based on the description in the following table:

Field	Description	Sample Values
-------	-------------	---------------

Click + plus icon to add new FX linkage details.

Below fields are displayed on the FX linkage pop-up screen, if the user clicks plus icon.

Field	Description	Sample Values
FX Reference Number	<p>Select the FX contract reference number from the LOV.</p> <p>On select and save and close, system defaults the available amount, bot currency, sold currency and rate.</p> <p>Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> <li>• Counterparty of the FX contract should be the counterparty of the Bill contract.</li> <li>• Active Forward FX transactions authorized not marked for auto liquidation.</li> </ul> <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>	
Currency	This field displays the FX BOT currency from the linked FX contract.	
Contract Amount	<p>This field displays the FX BOT currency and Amount.</p> <p>The user can change the currency.</p>	
Available FX Contract Amount	<p>This field displays the available FX contract amount.</p> <p>The value is from the “Available Amount” in FXDLINKG screen in OBTR.</p> <p>Available Amount BOT currency and Amount is displayed.</p>	
Linkage Amount	<p>This field displays the amount available for linkage.</p> <p>The Linkage amount should default the LC Contract Currency and allowed to change the linkage amount alone.</p> <p>The validation “Sum of Linked amount will not be greater than contract amount” or “Linkage amount will not be greater than the available amount for linkage” should be triggered on save of the FX linkage screen when trying to link the single FX or multiple FX.</p>	
Rate	This field displays the exchange rate defaulted from the linked FX Contract.	
FX Amount in Local Currency	<p>This field displays the FX amount in local currency.</p> <p>The value is defaulted as FX BOT currency and Amount from FXDTRONL</p>	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Below fields appear in the FX linkage grid along with the above fields.		
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount.  Linked amount will not be greater than the available amount for linkage.	
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.  The value is Total Utilized Amount BOT currency and Amount for Import LC/Guarantee Issuance from FXDLINKG	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	
Action	Click the Edit icon to modify the FX details.  Click the Delete icon to delete the FX details.	

### 3.3.4.11 Finance Preference

This section enables the user to request for a finance to liquidate the drawing under the LC. This section will be enabled based on the product selected for booking the drawing under the LC.

Finance Preferences

---

Finance Preferences

Drawing/Collection Ref	Bill Currency-Amount	Customer Id	Customer Name
Product Code	Finance Currency-Amount	Original Exchange Rate	Exchange Rate
Finance Tenor Units	Tenor Type	Rate Type	Rate Code
Finance Value Date	Finance Maturity Date

Finance Profit/UDE Details

User Defined Element ID	UDE Description	Rate Code	Usage	UDE Value
No data to display.				

---

Limits

Linkage Type	Linkage Reference Number	Linked Percentage	Limit Amount
No data to display.			

Provide the finance preference details based on the description in the following table:

Field	Description	Sample Values
Drawing/Collection Ref	Read only field. This field displays the loan product linked to the drawing product.	
Bill Currency-Amount	Outstanding Drawing/ Collection Currency and Amount. Defaults from the underlying task. User cannot change the value.	
Product	Read only field. This field displays the finance product linked to the drawing product.	
Customer ID	Read only field. This field displays the customer ID of the applicant/applicant bank.	
Customer Name	Read only field. This field displays the applicant/applicant bank name.	
Product Code	Defaults from the underlying Collection/ Drawing Product maintenance. User cannot change the value.	

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Finance Currency-Amount	Finance currency is defaulted from the bill currency. System populates the Finance account based on the outstanding drawing/ Collection amount less the collateral amount. User cannot change the Finance amount.	
Original Exchange Rate	System displays the Original Exchange rate.	
Exchange Rate	This field will be enabled only if the Drawing currency and Loan Currency are different. If FX linkage is available, system to display the Exchange rate from FX linkage. System will display the card rate, if FX linkage is not applicable.	
Finance Tenor Units	Application defaults the finance tenor units based on the product.	
Tenor Type	System defaults the value.	
Rate Type	System defaults the rate type.	
Rate Code	System populates the Rate code as part of simulation.	
Finance Value Date	System defaults the branch date as Value date. User cannot change the value.	
Finance Maturity Date	System defaults the date based on the Loan value date and Loan tenor. User cannot change the value.	
<b>Finance Profit/UDE Details</b>		
User Defined Element ID	System populates the UDE Element ID as part of simulation. User are allowed to change the selection through LOV.	
UDE Description	System populates the UDE description as part of simulation. If a user changes the UDE ID, system should populate the description.	
Rate Code	System populates the Rate code as part of simulation.	
Usage	System populates the details as part of simulation.	
UDE Value	System populates the value as part of simulation.	

Limits

Field	Description	Sample Values
Linkage Type	System defaults the linkage type as "Facility" from back office.	
Linkage Reference Number	System defaults the Linkage reference as part of simulation. User can change the value. Linkages available for the customer should be displayed for selection.	
Linked Percentage	User can enter the value. Maximum is 100. User cannot enter negative values.	
Limit Amount	System defaults the value. System should populate the value based on the contribution percentage.	

### 3.3.4.12 Preview

User can view the draft preview of the advise.

The screenshot displays a web interface titled "Preview Messages". It is divided into two main sections: "Preview - SWIFT Message" and "Preview - Mail Advice".

- Preview - SWIFT Message:**
  - Language: Dropdown menu with "English" selected.
  - Message Type: Dropdown menu.
  - Message Status: Text input field.
  - Repair Reason: Text input field.
  - Preview Message: Large text area for the message content.
- Preview - Mail Advice:**
  - Language: Dropdown menu with "English" selected.
  - Advice Type: Dropdown menu.
  - Message Status: Text input field.
  - Repair Reason: Text input field.
  - Preview Message: Large text area for the message content.

At the bottom right of the interface, there are two buttons: "Save & Close" and "Cancel".

### 3.3.4.13

Field	Description	Sample Values
Preview - SWIFT Message		
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	
Message Status	Read only field. Display the message status of draft message of liquidation details.	
Repair Reason	Read only field. Display the message repair reason of draft message of liquidation details.	
Preview Message	Display a preview of the draft message.	
Preview - Mail Device		
Language	Read only field. English is set as default language for the preview.	
Advice Type	Select the advice type.	
Message Status	Read only field. Display the message status of draft message of liquidation details.	
Repair Reason	Read only field. Display the message repair reason of draft message of liquidation details.	
Preview Message	Display a preview of the advice.	

### 3.3.4.14 Linked Finance Details

This user can view the details of linked finance accounts.

Linked Finance Details		
Finance Account	Finance Currency	Finance Amount
No data to display.		

Cancel

Provide the loan preference details based on the description in the following table:

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Finance Account	The details of the linked finance account.	
Finance Currency	Finance Currency of the linked finance account.	
Finance Amount	Finance amount of the linked finance account.	

### **3.3.4.15 Action Buttons**

Use action buttons based on the description in the following table:

<b>Field</b>	<b>Description</b>	<b>Sample Values</b>
Documents	The user can view the uploaded documents. Application will display the mandatory and optional documents.	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted	
View LC	Enables user to view the details of the underlying LC.	
Events	Enables the user to view the latest snap shot of the various events under the LC.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>

### 3.3.6.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	The user can view the uploaded documents. Application will display the mandatory and optional documents.	
Remarks	The user can view the remarks captured in the process during earlier stages.	
Overrides	User can view the various overrides that have been generated and accepted	
View LC	Enables user to view the details of the underlying LC.	
Events	Enables the user to view the latest snap shot of the various events under the LC.	
Submit	Task will get moved to next logical stage of Export LC Liquidation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Liquidation stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance/Limits</li> <li>● R5 - Others.</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> <li>● R1- Documents missing</li> <li>● R2- Signature Missing</li> <li>● R3- Input Error</li> <li>● R4- Insufficient Balance- Limits</li> <li>● R5 - Others</li> </ul>	

### 3.4 Exceptions

As per regulatory requirement, all tasks are scrutinized for KYC, Compliance and Sanctions. Task. The checks to external system/internal system is initiated after the Data Enrichment Stage.

The amount Block earmark and Limit Earmarks if applicable are also initiated after the Data Enrichment stage.

If a negative response is received for any of the calls, the task lands in respective exceptional queue which require further manual handling/approval.

#### 3.4.1 Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account.

### 3.4.1.1 Amount Block Exception

This section will display the amount block exception details.

### 3.4.1.2 Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

### 3.4.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others.</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.</p>	

Field	Description	Sample Values
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance- Limits</li> <li>• R5 - Others</li> </ul>	
Cancel	Cancel the Export LC Liquidation Amount Block Exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

### 3.4.2 Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

#### **Approve**

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

#### 3.4.2.1 Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Maturity Details - User can view the maturity details.
- Advices - User can view the details of advices.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Payment Details - User can view the payment details.
- Commission, Charges and taxes - User can view charge details.
- Party Details - User can view party details like applicant, advising bank etc.
- Settlement Details - User can view the settlement details.
- FX Details - User can view the details of FX linkage.

- Preview Messages - User can view the preview of the draft message.
- Loan Preferences - User can view the loan preference details.

Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

## 3.5 Multi Level Approval

Log into OBTFPM application and open the task to see the summary tile with summary of details updated in multilevel approval stage of Islamic Export LC Drawing Liquidation. The tiles must display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

### Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

### 3.5.1 Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawing Currency
- Drawing Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

The screenshot shows the Oracle OBTFPM application interface. On the left is a navigation menu with categories like Core Maintenance, Dashboard, Machine Learning, Maintenance, etc. The main area displays a table of tasks with columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, Customer Number, and Amount. A modal dialog titled 'Approval Rekey' is open in the foreground, containing two input fields: 'Drawing Currency' with a dropdown menu showing 'GBP' and a green checkmark, and 'Drawing Amount' with a dropdown menu showing 'GBP' and a text input field containing '£100.00' with a green checkmark. At the bottom of the dialog are three buttons: 'Refer', 'Close', and 'Proceed'.

#### 3.5.1.1 Action Buttons
