1. Preface

1.1 Introduction

This user manual is designed to help you quickly get acquainted with Export LC Liquidation process in Oracle Banking Trade Finance Process Management.

1.2 <u>Audience</u>

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/ lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 <u>Related Documents</u>

- Getting Started User Guide
- Common Core User Guide

1.6 **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry

standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 <u>Conventions</u>

The following text conventions are used in this document:

| Convention | Meaning |
|------------|--|
| boldface | Boldface type indicates graphical user interface elements asso- ciated with an action, or terms defined in text. |
| italic | Italic type indicates book titles, emphasis, or placeholder varia- bles for which you supply particular values. |
| monospace | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

1.8 <u>Screenshot Disclaimer</u>

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

| lcons | Function |
|-------|-------------|
| × | Exit |
| + | Add row |
| — | Delete row |
| Q | Option List |

2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 <u>Overview</u>

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3. Export LC Liquidation

Export LC liquidation process enables the user to liquidate of drawings under an Export LC.

This section contains the following topics:

| 3.1 Common Initiation Stage | 3.6 Reject Approval |
|-----------------------------|--------------------------|
| 3.2 Registration | 3.2.4 Document Linkage |
| 3.4 Exceptions | 3.5 Multi Level Approval |

3.1 <u>Common Initiation Stage</u>

The user can initiate the new export LC liquidation request from the common Initiate Task screen.

- 1. Using the entitled login credentials, login to the OBTFPM application.
- 2. Click Trade Finance > Initiate Task.

| ORACL | E Initiate Task | | | | | (PK2) Mar 22, 2019 | JEEV/ subham@gmail/ |

| V | | | | |

Provide the Basic Details based on the description in the following table:

| Field | Description | Sample Values | | | | | | |
|-------------------------------|---|-----------------------------------|--|--|--|--|--|--|
| Drawing Reference Num- ber | Provide the drawing reference number. Alternatively, user can search the Drawing reference number using LOV. In the LOV, user can input Drawing Reference Number, Applicant, Beneficiary, Issue Date, Cur- rency, Amount and User Reference to fetch the drawing details. Based on the search result, select the applicable LC to add the applicant response. | | | | | | | |
| Export LC Reference Number | Read only field. Export LC Reference Number will be auto-popu- lated based on the selected LC from the LOV. | | | | | | | |
| Beneficiary | Read only field. Beneficiary ID and name will be auto-populated based on the selected LC from the LOV. | | | | | | | |
| Branch | Read only field. Branch details will be auto-populated based on the selected LC from the LOV. | 203-Bank Futura -Branch FZ1 | | | | | | |
| Process Reference Num- ber | Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code. | | | | | | | |

| Field | Description | Sample Values |
|------------------|--|---------------|
| Priority | System will populate the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit. | High |
| Submission Mode | Select the submission mode of Export LC Liqui- dationrequest. By default the submission mode will have the value as 'Desk'. | Desk |
| | Desk- Request received through Desk | |
| | Courier- Request received through Courier | |
| Liquidation Date | By default, the application will display branch's current date and does not enables the user to change the date to any back date. | 04/13/2018 |

Liquidation Details 3.2.2

Registration user can provide liquidation details in this section. Alternately, details can be provided by Data Enrichment user.

| Field | Description | Sample Values |
|-----------------------|---|---------------|
| Tenor Type | Read only field. | |
| | This field displays the tenor of the drawing. | |
| Documents Received | Read only field. | |
| | This field displays the documents received details of the drawing. | |
| Product Code | Read only field. | |
| | This field displays the product code of the draw- ing. | |
| Product Description | Read only field. | |
| | This field displays the description of the product as per the product code. | |
| User Reference Number | Read only field. | |
| | This field displays the user reference number based on the product code. | |
| Drawing Date | Read only field. | |
| | This field displays the drawing date details of the drawing. | |
| Issuing Bank | Read only field. | |
| | This field displays the issuing bank ID and issuing bank name of the drawing. | |

Provide the Liquidation Details based on the description in the following table:

.

| Field | Description | Sample Values |
|--------------------------|---|---------------|
| Issuing Bank Reference | Read only field. | |
| | This field displays the issuing bank ID of the drawing. | |
| Date of Expiry | Read only field. | |
| | This field displays the expiry date of the drawing. | |
| Presenting Bank | Read only field. | |
| | Presenting Bank will be auto-populated based on the selected LC from the LOV. | |
| Presenting Bank Refer- | Read only field. | |
| ence Number | Presenting Bank Reference number will be auto- populated based on the selected LC from the LOV. | |
| Confirming Bank | Read only field. | |
| | Confirming Bank. details if any, will populate from drawing/update drawing. | |
| Available with Bank | Specify the value for available with bank. | |
| | The Available Bank details should be handed off against 'Collecting Bank' Party in OBTF. | |
| | Note | |
| | 1) If the Bank selected in Confirming Bank and Available with Bank are same, system should hand off only the Confirming Bank details in Back office. | |
| | 2) If Confirming Bank/Available with Bank are the same as Issuing Bank/ Presenting Bank, system should display an error. | |
| Drawing Amount | Read only field. | |
| | This field displays the LC Drawing Amount as per the selected drawing. | |
| Amount in Local Currency | Read only field. | |
| | This field displays the Local currency and amount. | |
| Outstanding Amount | Read only field. | |
| | Outstanding amount value will be auto-populated. This field displays the value as per the latest LC. | |
| Additional Amount | Read only field. | |
| | Additional Amount will be auto-populated. This field displays the value as per the latest LC. | |

| Field | Description | Sample Values |
|---------------------|--|---------------|
| Nego/Finance Amount | Read only field. | |
| | Nego/Finance Amount will be auto-populated. This field displays the value as per the latest LC. | |
| Liquidation Amount | Provide the liquidation amount. | |
| Unlinked FX Rate | Provide the Unlinked FX Rate. | |
| Rebate Amount | Read only field. | |
| | Rebate to the bill outstanding amount. | |
| Customer Dispatch | The value will be populated from back office based on the maintenance. | |
| | Toggle On : If the toggle is set to Yes, the customer has the option to dispatch the documents directly to the importer's bank. | |
| | Toggle Off : If the toggle is set to No, the bank has to dispatch the documents to the importer's bank. | |
| | Bank user is not allowed to edit the field, if the value defaulted from the back office is "No", | |

Provide the Miscellaneous Details based on the description in the following table:

| Field | Description | Sample Values |
|-----------|---|---------------|
| Documents | Upload the documents received under the LC. | |

| Field | Description | Sample Values |
|-----------------------|---|---------------|
| Remarks | Provide any additional information regarding the drawing. This information can be viewed by other users processing the request. | |
| Customer Instructions | Click to view/ input the following | |
| | Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. | |
| | • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. | |
| View LC | Enables the user to view the latest LC values dis- played in the respective fields. All fields displayed in LC details section are read only fields. | |
| Events | On click, system will display the details of LC issuance, amendments (if any), drawings (if any) and liquidations if any under the LC in chronological sequence from LC drawing. | |
| Action Buttons | | |
| Submit | On submit, task will get moved to next logical stage of Export LC Liquidation. | |
| | If mandatory fields have not been captured, sys- tem will display an error message until the man- datory fields data are provided. | |
| Save & Close | Save the information provided and holds the task in you queue for working later. | |
| | This option will not submit the request. | |
| Cancel | Cancels the Export LC Liquidation Registration stage inputs. | |
| Hold | The details provided will be registered and status will be on hold. This option is used, if there are any pending infor- mation yet to be received from applicant and appropriate remarks must be provided. | |
| Checklist | Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will dis- play an error on submit. | |

3.2.4 Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

- 1. Navigate to the Registration screen.
- 2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3.3 Data Enrichment

On successful completion of Registration of an Export LC Liquidation request, the request moves to Data Enrichment stage. At this stage the gathered information during Registration are scrutinized.

During the submit at the end of this stage, an amount block will be created in the settlement account for the amount to be liquidated. Customer cannot use the amount for which the amount block is created until the transaction is completed.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

| 🗗 FuTura Bank |

The Data Enrichment stage has following hops for data capture:

- Main Details
- Maturity Details
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for liquidation stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

3.3.1 Main Details

Main details section has two sub section as follows:

- Application Details
- Liquidation Details

3.3.1.1 Application Details

All fields displayed under Application details section, would be read only except for the **Priority**. Refer to 3.2.1 Application Details for more information of the fields.

3.3.1.3 Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|-----------------------|--|---------------|
| Documents | The user can view the uploaded documents. Application will display the mandatory and optional documents. | |
| | The user can view and input/view application details simultaneously. | |
| | When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the applica- tion. | |
| Remarks | The user can view the remarks captured in the process during earlier stages. | |
| Overrides | User can view the various overrides that have been generated and accepted. | |
| Customer Instructions | Click to view/ input the following | |
| | Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. | |
| | Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. | |
| View LC | Enables user to view the details of the underlying LC. | |
| Events | Enables the user to view the latest snap shot of the various events under the LC. | |
| Save & Close | Save the information provided and holds the task in you queue for working later. This option will not submit the request. | |
| Cancel | Cancel the Data Enrichment stage inputs. | |
| Hold | The details provided will be on hold. This option is used, if there are any pending infor- mation yet to be received from applicant and appropriate remarks must be provided. | |

| Field | Description | Sample Values |
|--------|---|---------------|
| Reject | On click of Reject, user must select a Reject Rea- son from a list displayed by the system. | |
| | Reject Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | R5 - Others. | |
| | Select a Reject code and give a Reject Descrip- tion. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Next | On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. | |

3.3.2 <u>Maturity Details</u>

Commission is not applicable for Drawing/Bills.

3.3.4.5 Charge Details

| Field | Description | Sample Values |
|-----------------|---|---------------|
| Component | Charge Component type. | |
| Tag Currency | Defaults the tag currency in which the charges have to be collected. | |
| Tag Amount | Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required. | |
| Currency | Defaults the currency in which the charges have to be collected. | |
| Amount | An amount that is maintained under the product code gets defaulted in this field. | |
| Modified Amount | From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field. | |
| Billing | If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. | |
| | On simulation of charges/commission from Back Office, if any of the Charges/Commission compo- nent for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automati- cally checked in OBTFPM. | |
| | The user can not select/de-select the check box if it is de-selected by default. | |
| | This field is disabled, if 'Defer' toggle is enabled. | |
| Defer | If charges have to be deferred and collected at any future step, this check box has to be selected. | |
| | On simulation of charges/commission from Back Office, if any of the Charges/Commission compo- nent for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be auto- matically checked in OBTFPM. | |
| | The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation. | |
| Waive | If charges have to be waived, this check box has to be selected. | |
| | Based on the customer maintenance, the charges should be marked for Billing or for Defer. | |
| | This field is disabled, if 'Defer' toggle is enabled. | |
| Charge Party | Charge party will be applicant by default. You can change the value to beneficiary | |

| Field | Description | Sample Values |
|--------------------|------------------------------------|---------------|
| Settlement Account | Details of the settlement account. | |

3.3.4.6 Tax Details

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

| Field | Description | Sample Values |
|--------------------|--|---------------|
| Component | Tax Component type | |
| Туре | Type of tax Component. | |
| Value Date | This field displays the value date of tax compo- nent. | |
| Currency | The tax currency is the same as the commission. | |
| Amount | The tax amount defaults based on the percent- age of commission maintained. User can edit the tax amount, if required. | |
| Billing | If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled. | |
| Defer | If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation. | |
| Settlement Account | Details of the settlement account. | |

3.3.4.10

| Field | Description | Sample Values |
|-----------------------|--|---------------|
| Component | This field displays the component maintained in the back office. | |
| Component Description | This description of the component. | |
| Rate Type | System defaults the rate type maintained for the component in back office. | |
| | Value can be: | |
| | Fixed Floating | |
| | Special | |
| Rate Code | This field displays the rate code applicable for the Component. | |
| Min Spread | This field displays the minimum spread applicable for the Rate Code. | |
| | This field have value only if the Rate Type is Floating. | |
| Max Spread | This field displays the maximum spread applica- ble for the Rate Code. | |
| | This field have value only if the Rate Type is Floating. | |
| Spread | This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. | |
| | System validates whether the spread input is within the Minimum to Maximum Spread. | |
| Min Rate | This field displays the minimum rate applicable for the Rate Code. | |
| Max Rate | This field displays the maximum rate applicable for the Rate Code. | |
| Rate | This field displays the value applicable for the Rate Code. | |
| | User can change the value if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate. | |
| Modified Rate | This field displays the modified rate. | |

| Field | Description | Sample Values |
|-------------------------------------|---|---------------|
| Special Pricing Reference Number | User can capture the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component). | |
| | Special Pricing Reference is not applicable for Penal Interest components. | |
| | For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same. | |
| | Note | |
| | System shows an override as "Special Pricing Applicable", on clicking "Save" in the Interest Details screen, if Special Pricing Reference number has been provided. | |
| Currency | System defaults the Interest currency in this field. | |
| Amount | User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained. | |
| Waive | User can waive the Interest applicable. System displays an override, if the user has waived the Interest. | |
| Charge Party | System displays the Charge Party based on the type of transaction. | |
| | In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills | |

| Field | Description | Sample Values |
|--------------------|---|---------------|
| Settlement Account | System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. | |
| | In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM). | |

3.3.4.11 FX Linkage

This section enables the user to link the existing FX contract(s) to the drawing. User can link one or more FX deals to a drawing/bill. The linked value of an FX deal(s) must not exceed the value of the drawing/bill.

FX contract linkage with the Drawing/Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the drawing/bill.

Provide the FX linkage detail based on the description in the following table:

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

• Provide the FX linkage detail based on the description in the following table:.

| Linkage | | | | | | | | |
|------------------------|-----------------|---------------|---------------------------|------|----------------|-----------------------|----------------|--------|
| FX Linkage | | | | | | | | _ |
| | | | | | | | | + |

- Accounting Details User can view the accounting entries generated in back office.
- Assignment of Proceeds User can view the details of assignment of proceeds.
- Linked Loan Details User can view the linked loan details.
- Interest Details User can view interest details.

3.3.6.1 Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|--------------|---|---------------|
| Documents | The user can view the uploaded documents. Application will display the mandatory and optional documents. | |
| Remarks | The user can view the remarks captured in the process during earlier stages. | |
| Overrides | User can view the various overrides that have been generated and accepted | |
| View LC | Enables user to view the details of the underlying LC. | |
| Events | Enables the user to view the latest snap shot of the various events under the LC. | |
| Back | Clicking on Back button, takes the user to the previous screen. | |
| Submit | Task will get moved to next logical stage of Export LC Liquidation. | |
| | If mandatory fields have not been captured, sys- tem will display an error message until the man- datory fields data are provided. | |
| Save & Close | Save the information provided and holds the task in you queue for working later. This option will not submit the request | |
| Cancel | Cancel the Liquidation stage inputs. | |
| Hold | The details provided will be registered and status will be on hold. This option is used, if there are any pending infor- mation yet to be received from applicant and appropriate remarks must be provided. | |

| Field | Description | Sample Values |
|--------|--|---------------|
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. | |
| | Reject Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | • R5 - Others. | |
| | Select a Reject code and give a Reject Descrip- tion. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Refer | User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance- Limits | |
| | R5 - Others | |

3.4 Exceptions

As per regulatory requirement, all tasks are scrutinized for KYC, Compliance and Sanctions. Task. The checks to external system/internal system is initiated after the Data Enrichment Stage.

The amount Block earmark and Limit Earmarks if applicable are also initiated after the Data Enrichment stage.

If a negative response is received for any of the calls, the task lands in respective exceptional queue which require further manual handling/approval.

3.4.1 Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account.

3.4.1.1 Amount Bock Exception

This section will display the amount block exception details.

3.4.1.2 Summary

Tiles Displayed in Summary:

- Main Details User can view and modify details about application details and LC details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Charge Details User can view and modify details provided for charges, if required.

3.4.1.3 Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|---------|---|---------------|
| Reject | On click of reject, user must select a Reject Rea- son from a list displayed by the system. | |
| | Reject Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | • R5 - Others. | |
| | Select a Reject code and give a Reject Descrip- tion. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Hold | The details provided will be registered and status will be on hold. | |
| | This option is used, if there are any pending infor- mation yet to be received from applicant and appropriate remarks must be provided. | |
| Refer | User will be able to refer the task back to the Data Enrichment user.User must select a Refer Rea- son from the values displayed by the system. Refer Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance- Limits | |
| | R5 - Others | |
| Cancel | Cancel the Export LC Liquidation Amount Block Exception check. | |
| Approve | On approve, application must validate for all man- datory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

3.4.2 **Exception - Know Your Customer (KYC)**

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

3.4.2.2 Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|---------|---|---------------|
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. | |
| | Reject Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | • R5 - Others. | |
| | Select a Reject code and give a Reject Descrip- tion. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Hold | The details provided will be registered and status will be on hold. | |
| | This option is used, if there are any pending infor- mation yet to be received from applicant and appropriate remarks must be provided. | |
| Refer | User will be able to refer the task back to the Data Enrichment user.User must select a Refer Rea- son from the values displayed by the system. Refer Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance- Limits | |
| | R5 - Others | |
| Cancel | Cancel the Export LC Liquidation KYC exception check. | |
| Approve | On approve, application must validate for all man- datory field values, and task must move to the next logical stage. | |
| Back | Task moves to previous logical step. | |

3.5 Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles must display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

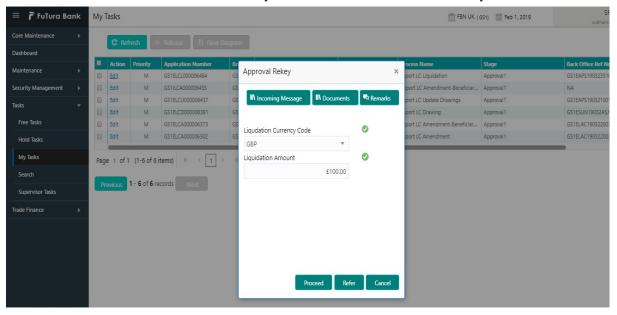

3.5.1 Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key .:

- Liquidation Currency Code •
- Liquidation Amount .

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

3.5.1.1 **Action Buttons**

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|------------------|--|---------------|
| Documents | Upload the required documents. | |
| Remarks | Provide any additional information regarding the LC. This information can be viewed by other users processing the request. | |
| Incoming Message | Displays the incoming message, if any. | |

Action Buttons

| Field | Description | Sample Values |
|---------|---|---------------|
| Proceed | On proceed, the screen navigates to approval summary screen. | |
| Refer | User will be able to refer the task back to the Data Enrichment user.User must select a Refer Rea- son from the values displayed by the system. Refer Codes: | |
| Cancel | Cancel the Import LC Drawing Approval Rekey. | |

3.5.2.1 Action Buttons

Use action buttons based on the description in the following table:

| Field | Description | Sample Values |
|---------|--|---------------|
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. | |
| | Reject Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance/Limits | |
| | • R5 - Others. | |
| | Select a Reject code and give a Reject Descrip- tion. | |
| | This reject reason will be available in the remarks window throughout the process. | |
| Hold | The details provided will be registered and status will be on hold. | |
| | This option is used, if there are any pending infor- mation yet to be received from applicant and appropriate remarks must be provided. | |
| Refer | User will be able to refer the task back to the Data Enrichment user.User must select a Refer Reason from the values displayed by the system. Refer Codes: | |
| | R1- Documents missing | |
| | R2- Signature Missing | |
| | R3- Input Error | |
| | R4- Insufficient Balance- Limits | |
| | R5 - Others | |
| Cancel | Cancel the approval. | |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approv- ers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting. | |

3.6 <u>Reject Approval</u>

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Export LC Liquidation in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

3.6.1 Application Details

The application details data segment have values for requests received from both non-online and online channels.

3.6.2 <u>Summary</u>

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details User can view details about application details and LC details.
- Party Details User can view party details like applicant, advising bank etc.
- Beneficiary Response User can view beneficiary response details.
- Discrepancy Details User can view the discrepancy details of the drawing.
- Maturity Details User can view the maturity details.
