1. Preface

1.1 Introduction

This user manual is designed to help you quickly get acquainted with Export LC Transfer process in Oracle Banking Trade Finance Process Management.

1.2 Audience

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 Related Documents

- Getting Started User Guide
- Common Core User Guide

1.6 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry

standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3. Export LC Transfer - Islamic

If the Export LC Advised to the beneficiary allows for transfer, the beneficiary of the Export LC (First Beneficiary) can transfer the LC to one or more Beneficiaries (Second Beneficiaries)

The various stages involved for Transfer of an Export Letter of Credit are:

- Receive and verify documents, Input Application details (Non Online Channel)- Registration stage
- Verify/capture details (Online/Non Online Channels)- Scrutiny stage
- Input/Modify details of Transfer LC - Data Enrichment stage
- Check balance availability for amount block
- Check for sanctions & KYC status
- Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Export LC Transfer process flow is similar to that of conventional Export LC Transfer process flow.

This section contains the following topics:

3.1 Common Initiation Stage	3.2 Registration
3.2.4 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM	3.4 Data Enrichment
3.5 Customer Response - Draft Confirmation	3.6 Multi Level Approval
3.7 Customer - Acknowledgement Format	3.8 Customer - Reject Format

3.1 Common Initiation Stage

The user can initiate the new Islamic export LC transfer request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

The screenshot shows the Oracle Trade Finance 'Initiate Task' registration form. The page title is 'Initiate Task'. The breadcrumb trail is 'Registration'. The form has two dropdown menus: 'Process Name' with the selected value 'Islamic Export LC Transfer Service' and 'Branch *' with the selected value 'PK2-Oracle Banking Trade Finan...'. There are 'Proceed' and 'Clear' buttons on the right side of the form. The left sidebar contains a navigation menu with 'Initiate Task' highlighted. The top right corner shows the user's name 'ZARTA subham@gmail.com' and the date 'May 5, 2021'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

3.1.0.1 Action Buttons

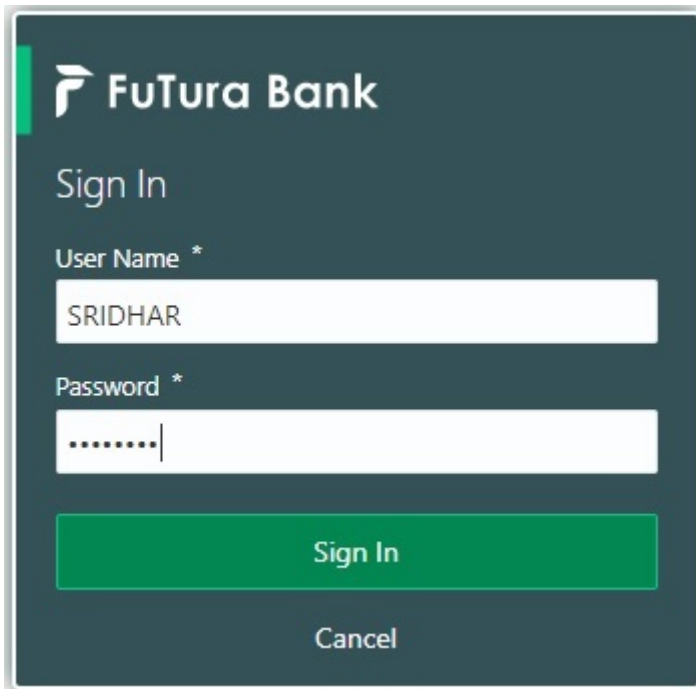

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

3.2 Registration

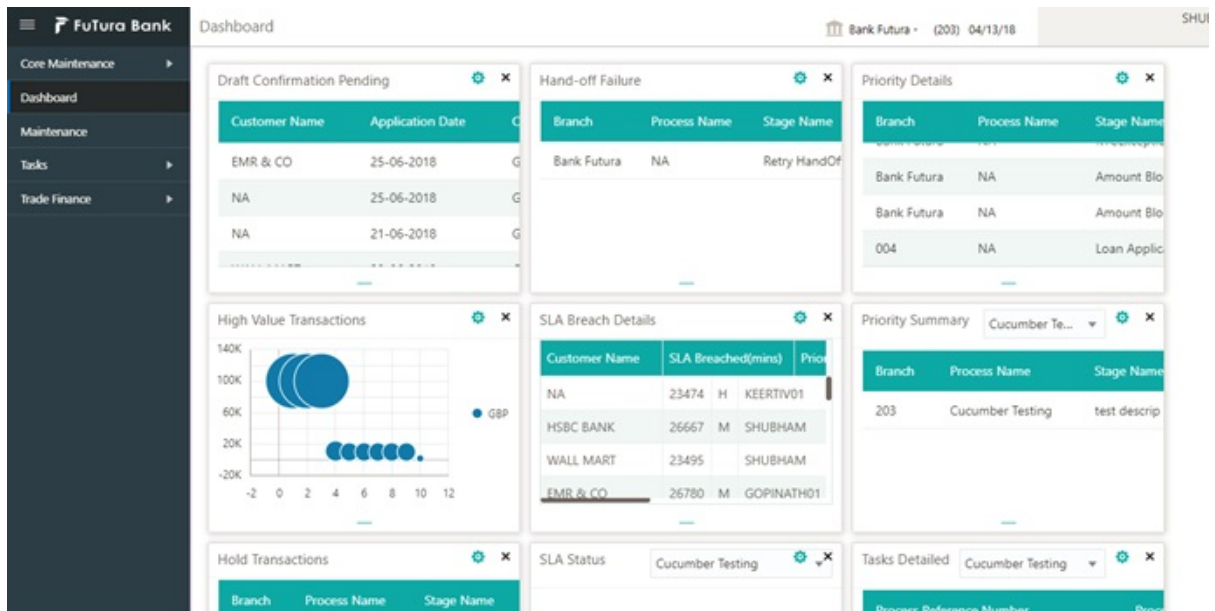

A user can register a request for an Islamic Export LC Transfer received by mail/Courier at the front desk. During registration, user captures the basic details of the request, check the signature of authorized signatory of the issuing bank, and then upload related documents. On submit of the request, the task should be available for an LC expert to handle in the next stage.

- Using the entitled login credentials for Registration stage, login to the OBTFPM application.

The image shows the 'FuTura Bank Sign In' screen. It features a dark blue header with the FuTura Bank logo and the text 'FuTura Bank Sign In'. Below the header, there are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing a series of dots. At the bottom, there are two buttons: a green 'Sign In' button and a white 'Cancel' button.

- On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image shows the FuTura Bank Dashboard. The dashboard is titled 'Dashboard' and includes a sidebar menu with options like 'Core Maintenance', 'Dashboard', 'Maintenance', 'Tasks', and 'Trade Finance'. The main content area displays several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'. Data rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes Bank Futura, NA, and Retry HandOf.
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data rows include Bank Futura, NA, Amount Bio, Bank Futura, NA, Amount Bio, 004, NA, and Loan Applic.
- High Value Transactions:** A bubble chart showing transactions for GBP. The y-axis ranges from -20K to 140K, and the x-axis ranges from -2 to 12. There are several blue bubbles of varying sizes.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Prior'. Data rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes 203, Cucumber Testing, and test descrip.
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes Cucumber Testing.
- Tasks Detailed:** A table with columns 'Process Reference Number' and 'Proc'.

3. Click **Trade Finance - Islamic > Export - Documentary Credit> Export LC Transfer - Islamic.**

The Registration stage has two sections Application Details and Transfer LC Details. Let's look at the details of Registration screens below:

3.2.1 Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Export LC Reference Number	User can search the Transfer LC Reference Number by using the LOV. User has to select the particular LC that need to be transferred. As part of LOV criteria; user can input the Transfer LC Reference Number, Beneficiary, Currency, Amount or User Reference Number.	

Field	Description	Sample Values
Available Amount	This field displays the available amount along with currency for Transfer. It must be less than or equals to LC amount.	
First Beneficiary	First Beneficiary details is defaulted from the underlying Export LC.	EMR & CO
Branch	Read only field. Branch details will be auto-populated from LC details.	203-Bank Futura -Branch FZ1
Priority	System will default the Priority as Low/Medium/High based on maintenance.	High
Submission Mode	By default the submission mode will have the value as 'Desk'. the suser can change the submission mode. Desk - Request received through Desk FAX - Request received through FAX Email - Request received through Email Courier - Request received through Courier	Desk
Transfer Amount	User has to input the Export LC transfer amount. Transfer amount plus tolerance cannot be more than value available in underlying Export LC. User cannot change the currency, it will be default from the underlying Export LC.	
Process Reference Number	Read only field. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Transfer Date	System defaults the branch's current date.	
Customer Reference Number	The user can enter the Customer Reference Number, if any.	
Allow Substitution of Document	Toggle On: The bank is allowed to substitute the Export Documents received from Transferee with the documents from Beneficiary during Drawing.	

3.2.2 LC Details

Details in this screen displays the data from the LC issued.

The screenshot shows a web form titled 'Details' with several sections:

- Type:** A dropdown menu with 'Sight' selected.
- Form of Documentary Credit:** A dropdown menu with 'REVOCABLE TRANSFERRABLE' selected.
- Reference To Pre-Advice:** A text input field.
- Place of Expiry:** A text input field.
- Advising Bank:** A search input field.
- Form of Documentary Credit Details:** A text input field.
- 31C - Date of Issue:** A date picker showing 'Aug 3, 2023'.
- Second Beneficiary:** A search input field.
- Product Code:** A search input field with 'V152' entered.
- 20 - Documentary Credit Number *:** A text input field with '032ELIC23215A1JL' entered.
- 40E - Applicable Rules:** A dropdown menu with 'UCP LATEST VERSION' selected.
- 39A - Percentage Credit Amount Tolerance:** A text input field with '/' entered.
- Product Description:** A text input field with 'Islamic Export LC with Adding Confirms' entered.
- User Reference Number:** A text input field with '032ELIC23215A1JL' entered.
- Date of Expiry *:** A date picker showing 'Oct 31, 2023'.
- 39C - Additional Amount Covered:** A text input field.

At the bottom right, there are four buttons: 'Hold', 'Cancel', 'Save & Close', and 'Submit'.

Provide the LC Details based on the description in the following table:

Field	Description	Sample Values
LC Type	Select the applicable LC Type from LOV The values are: <ul style="list-style-type: none"> • Sight • Usance • Mixed 	
Advising Bank	User can enter the details if applicable. System should validate whether the Advising Bank is RMA compliant, if not system should display an error message. <p style="text-align: center;">Note</p> <p style="text-align: center;">If the KYC non-compliant party is selected then the system immediately gives instant alert as "Customer ID - (CIF ID) is not KYC compliant."</p>	
Product Code	Read only field. Product Code of the underlying Export LC is displayed.	
Product Description	Read only field. Product Description of the underlying Export LC is displayed.	
40A - Form of Documentary Credit	User can select the type of LC (Documentary Credit) as per the requirement. Default LC type is Irrevocable.	
Form of Documentary Credit Details	Specify the Documentary Credit details.	
Documentary Credit Number	Generated from the back office and displayed in the application Number.	

Field	Description	Sample Values
User Reference Number	System defaults the user reference number based on the product code. The user can change the user reference number.	
Reference To Pre-Advice	This field is not applicable.	
Date of Issue	Application will default the branch's current date in date of issue. User cannot change the defaulted date. Application will populate the Date of Issue field with branch date on approval if date of approval is later than date of Registration.	
Applicable Rules	Select the applicable rules for the LC. Default rule as UCP Latest Version.	
Date Of Expiry	Date of Expiry is defaulted from the underlying Export LC and user is allowed to change expiry date which is on or before to Export LC Expiry date but not earlier to Transfer Date.	
Place of Expiry	Place of Expiry is defaulted from the underlying Export LC.	
Second Beneficiary	The user can select the beneficiary for Export LC Transfer. Click the look up icon to search the beneficiary based on Party ID/Party Name. If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message.	
Percentage Credit Amount Tolerance	Read only field. Tolerance Amount to default from the underlying Export LC.	
Additional Amount Covered	User can provide additional amount included in Export LC.	

3.2.3 Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Documents	User to upload the applicable documents. System displays the mandatory and optional documents. If mandatory documents are not uploaded, system should display an error on submit. The possible documents submitted under an Export LC Transfer request are:	
Remarks	Provide any additional information regarding the Beneficiary Consent. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

Field	Description	Sample Values
Verify Signature	System displays the details of Authorized signatories. The pop up box should display the signature id, signature title and image of the signature for verification	
Action Buttons		
Submit	On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Export LC Transfer. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task for working later. This option will not submit the request.	
Cancel	Cancels the Export LC Transfer Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

3.2.4 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the

Request Clarification functionality would be applicable to offline initiated transactions also.

3.3 Scrutiny

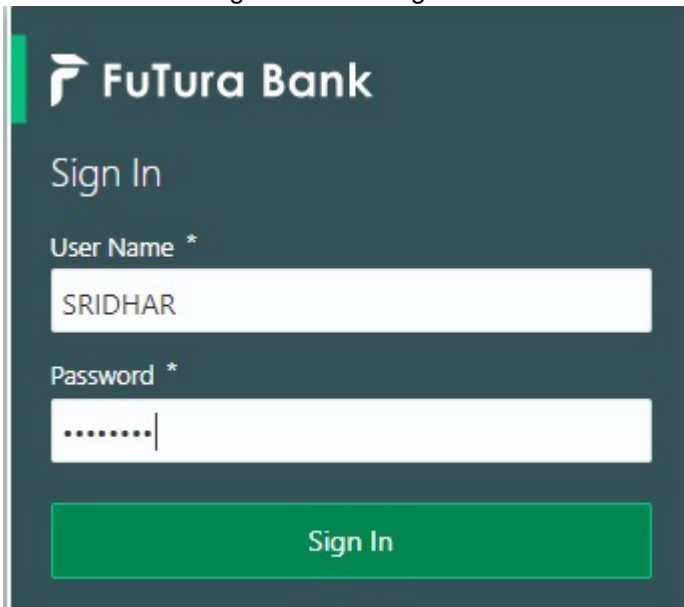

At Scrutiny stage, user can scrutinize the Islamic Export LC Transfer request. As part of Scrutiny, the user enters the basic details of the Export LC transfer Islamic request and can verify if the request can be processed further.

Non-Online Channel - Export LC Transfer request that were received at the desk will move to Scrutiny stage post successful Registration. The requests will have the details entered during the Registration stage.

Online Channel - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage should be auto populated.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for Scrutiny stage, login to the OBTFPM application.

FuTura Bank

Sign In

User Name *

SRIDHAR

Password *

.....

Sign In

- On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The dashboard for Futura Bank displays several key performance indicators and task-related widgets. The 'Draft Confirmation Pending' widget shows a table with columns for Customer Name, Application Date, and Status. The 'Hand-off Failure' widget lists Branch, Process Name, and Stage Name. The 'Priority Details' widget provides a breakdown of tasks by Branch, Process Name, and Stage Name. The 'High Value Transactions' widget features a bubble chart showing transaction values for different currencies. The 'SLA Breach Details' widget lists Customer Name, SLA Breached (mins), and Priority. The 'Priority Summary' widget shows a summary of tasks for a specific branch and process. The 'Hold Transactions' widget displays a table of held transactions. The 'SLA Status' widget shows the current status of SLA compliance. The 'Tasks Detailed' widget provides a detailed view of tasks for a specific process.

- Click **Tasks > Free Tasks**.

The Oracle Free Tasks page displays a table of tasks. The table has the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Customer Number. The tasks are listed in descending order of priority, with High, Medium, and Low priority levels indicated by colored circles. The first task is 'Islamic Export LC Transfer' with a Medium priority. The table is paginated, showing 1 of 264 items (1 - 20 of 5272 items).

Place of Expiry	Place of Expiry is defaulted from the underlying Export LC.	
Second Beneficiary	This field displays the Second Beneficiary name selected for Export LC Transfer. In case of online request, system should auto-populate the details. User cannot change the populated value.	

Field	Description	Sample Values
Percentage Credit Amount Tolerance	Read only field. Tolerance Amount to default from the underlying Export LC.	
Additional Amount Covered	User can provide additional amount included in Export LC. In case of online request, system should auto-populate the details. User cannot change the populated value.	

3.3.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Request Clarification	<p>On click the Request Clarification button the user can specify the clarification details for requests received online.</p>	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Hold	<p>The details provided will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Cancel	<p>Cancel the Guarantee Advice Scrutiny inputs.</p>	
Save & Close	<p>Save the information provided and holds the task for working later.</p> <p>This option will not submit the request.</p>	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

3.3.2 Availability

User must scrutinize the Availability and Shipment details of an Islamic Export LC transfer request for the different fields under the respective data segments. In case the request is received through online channel, user will verify the details populated.

The screenshot displays the Oracle Islamic Export LC Transfer interface. The top navigation bar includes the Oracle logo, user information (ZARTZ, subham@gmail.com), and the date (Jun 15, 2021). The main header shows the application name and number: Islamic Export LC Transfer, Application No: PK2IELT000017038. The interface is divided into several sections: Availability, Shipment Details, and 45A Description of Goods and/or Services. The Availability section includes fields for 41a-Available with (TERR), 41a-Available By (BY PAYMENT), 42C-Drafts At, and 42a-Drawee. The Shipment Details section includes fields for 43P-Partial Shipments (NOT ALLOWED), 43T-Transshipment (NOT ALLOWED), 44A-Place of Taking in Charge, 44E-Port of Loading (Mumbai), 44F-Port of Discharge (London), 44B-Place of Final Destination (London), 44C-Latest Date of Shipment, and 44D-Shipments Period. The 45A Description of Goods and/or Services section includes fields for INCO Terms (CIF) and INCO Terms Description (Cost, Insurance and Freight (named de...)). At the bottom, there is a table with columns: Goods Code, Goods Type, Goods Description, Original No of Units, Original Price per Unit, Available Units, Transfer quantity, Transfer price per Unit, Total Amount, and Action. The table currently shows 'No data to display.' The bottom navigation bar includes buttons for Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

User can change the values available in the fields based on the description in the following table:

Field	Description	Sample Values
Available With	Read only This field identifies the bank with which the credit is available. System auto-populates the details. User cannot change the populated value.	
Available By	Read-only. This field identifies how the credit is available. System should auto-populate the details. User cannot change the populated value.

3.3.5.2 Commission Details

If default commission is available under the product, it should be defaulted here with values.

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	Select the commission component	
Rate	Defaults from product. User can change the rate, if required. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Rate	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Currency	Defaults the currency in which the commission needs to be collected.	
Amount	An amount that is maintained under the product code defaults in this field. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.	
Modified Amount	From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.	
Defer	Select the check box, if charges/commissions has to be deferred and collected at any future step.	

Field	Description	Sample Values
Waive	<p>Select the check box to waive charges/commission.</p> <p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	Charge party will be 'Applicant' by Default. You can change the value to Beneficiary	
Settlement Account	Details of the Settlement Account.	
Amendable	The value is auto-populated as the commission can be amended or not.	

3.3.5.3 Charges Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	

Field	Description	Sample Values
Settlement Account	Details of the settlement account.	

3.3.5.4 Tax Details

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. The user cannot update tax detail and any change in Tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	
Charges From Beneficiary	Detail of charges to be collected from beneficiary.

- Additional Fields: Banks can configure the additional fields during implementation.
- Commission, Charges and Taxes: User can see the details provided for charges. User should be able to update the details if required.

3.3.6.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767. In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
Request Clarification	On click the Request Clarification button the user can specify the clarification details for requests received online.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. 	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Cancel the Guarantee Advice Scrutiny inputs.	
Save & Close	Save the information provided and holds the task for working later. This option will not submit the request.	
Back	Click of Back to move the task to the previous segment.	
Submit	On Submit, system validates all mandatory field values and the task should move to the next logical stage. If the user submits without visiting other mandatory hops, then error message should be displayed and force the user to visit mandatory tabs/update mandatory fields.	

3.4 Data Enrichment

As a part of Data Enrichment stage, User can enter/update basic details of the incoming request.

Non Online Channel - Export LC Transfer request that were received at the desk will move to DE stage post successful registration and scrutiny stage. The transaction will have the details entered during the registration/scrutiny stage.

Online Channel - Request that are received via online channels like trade portal, external system and SWIFT are available directly for further processing in OBTFPM from scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

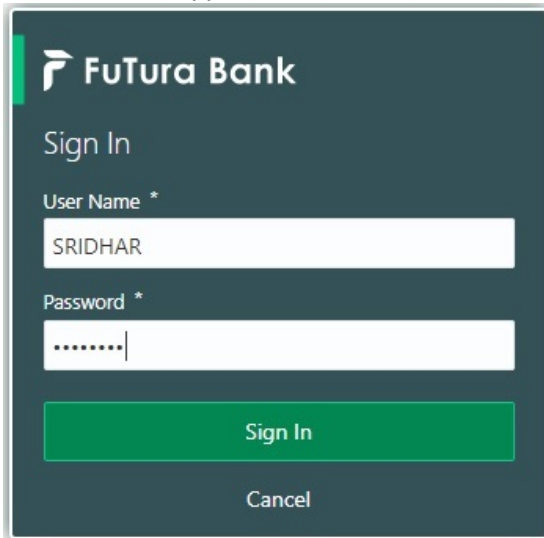

The user can select the respective field and will be allowed to edit/update the field.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

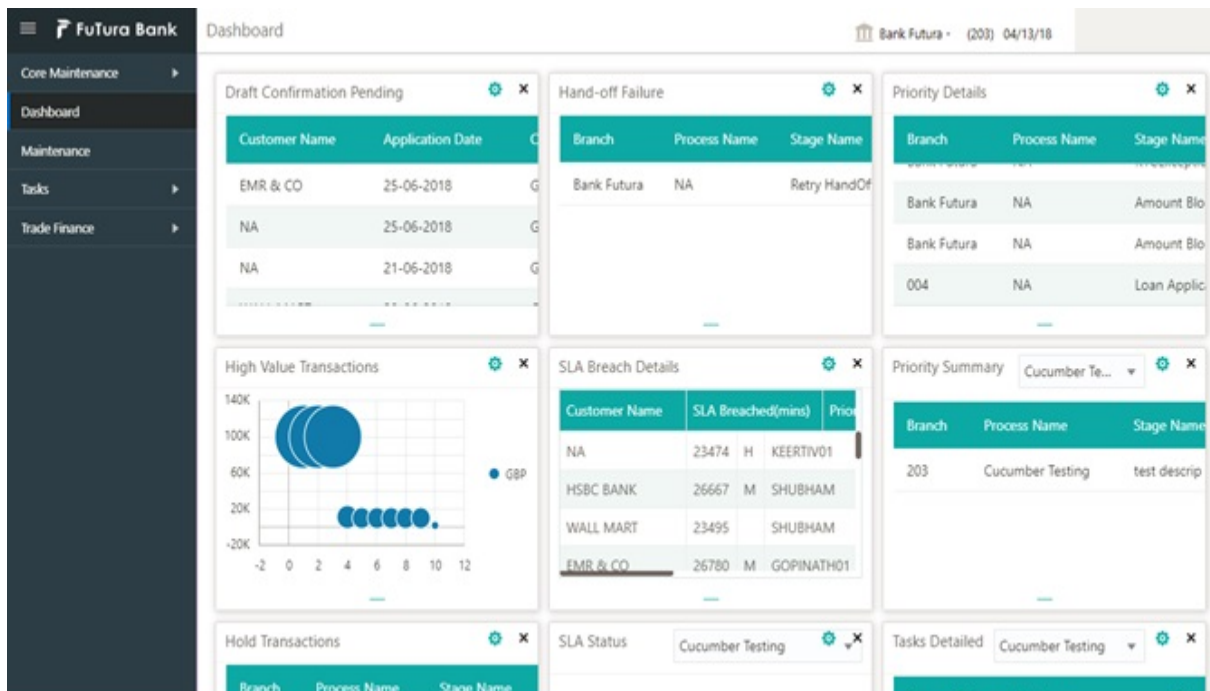

Do the following steps to acquire a task at Data Enrichment stage:

- Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and name. Below the header, the text "Sign In" is displayed. There are two input fields: "User Name *" with the value "SRIDHAR" and "Password *" with masked characters. A green "Sign In" button and a "Cancel" link are positioned at the bottom of the form.

- On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image displays the FuTura Bank dashboard. On the left is a navigation sidebar with options like Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main dashboard area contains several widgets:

- Draft Confirmation Pending:** A table with columns Customer Name, Application Date, and Status. Data includes EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns Branch, Process Name, and Stage Name. Data includes Bank Futura, NA, and Retry HandOf.
- Priority Details:** A table with columns Branch, Process Name, and Stage Name. Data includes Bank Futura, NA, Amount Blo, and Loan Applic.
- High Value Transactions:** A bubble chart showing transaction values for GBP. The y-axis ranges from -20K to 140K, and the x-axis ranges from -2 to 12.
- SLA Breach Details:** A table with columns Customer Name, SLA Breached(mins), and Priority. Data includes NA (23474 H KEERTIV01), HSBC BANK (26667 M SHUBHAM), WALL MART (23495 SHUBHAM), and EMR & CO (26780 M GOPINATH01).
- Priority Summary:** A table with columns Branch, Process Name, and Stage Name. Data includes 203, Cucumber Testing, and test descrip.
- Hold Transactions:** A table with columns Branch, Process Name, and Stage Name.
- SLA Status:** A widget showing Cucumber Testing.
- Tasks Detailed:** A widget showing Cucumber Testing.

3.4.1.1 Application Details

Field	Description	Sample Values
Export LC Reference Number	Read only. System displays the Export LC Reference Number to be transferred.	
Available Amount	Read only. Displayed as available from earlier stages.	
First Beneficiary	Read only. Displayed as available from earlier stages.	EMR & CO
Branch	Read only. Branch details will be auto-populated from LC details.	203-Bank Futura -Branch FZ1
Priority	Priority to default based on priority maintenance and user should be allowed to change. Values are High, Medium and Low.	High
Submission Mode	Read only. Displayed as available from earlier stages.	Desk
Transfer Amount	Read only. Displayed as available from earlier stages.	

Field	Description	Sample Values
Process Reference Number	Read only. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Transfer Date	Read only System should default the branch's current date	
Customer Reference Number	The user can enter the Customer Reference Number, if any.	
Allow Substitution of Document	Read only - If selected, the bank is allowed to substitute the Export Documents received from Transferee with the documents from Beneficiary.	
First Beneficiary	Read only - Displayed as available from earlier stages.	EMR & CO
Branch	Read only field. Branch details will be auto-populated from LC details.	203-Bank Futura -Branch FZ1
Process Reference Number	Read only field. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Priority	Read only - Priority default based on priority maintenance and user should be allowed to change. Values are High, Medium and Low.	High
Submission Mode	Read only Displayed as available from earlier stages.	Desk
Customer Reference Number	The user can enter the Customer Reference Number, if any.	
Allow Substitution of Document	Read only. If the field is checked, the bank is allowed to substitute the Export Documents received from Transferee with the documents from Beneficiary.	

3.4.1.2 LC Details

Field	Description	Sample Values
LC Type	Read only field. The value used for LC Type as per the latest LC details should be displayed.	
Advising Bank	The Advising Bank as per the latest LC details should be displayed.	
Product Code	Read only field. Product Code of the underlying Export LC is displayed.	
Product Description	Read only field. Product Description of the underlying Export LC is displayed.	
40A - Form of Documentary Credit	User can select the type of LC (Documentary Credit) as per the requirement. Default LC type is Irrevocable. In case of online request, system should auto-populate the details. User cannot change the populated value.	
Form of Documentary Credit Details	The Documentary Credit details.	
Documentary Credit Number	Read only - This field displays the Documentary Credit Number of the selected LC.	
Reference To Pre-Advice	This field is not applicable.	
Date of Issue	Read only field. Application will default the branch's current date in date of issue.	
Applicable Rules	Read only field. The applicable rules for the LC is auto populated from previous operation. Default rule.	
Date Of Expiry	Expiry date is auto populated from previous stage and user can edit the value.	
Place of Expiry	The place of expiry is auto populated from previous stage and user can edit the value.	
Second Beneficiary	This field is populated from previous stage and user can edit the value if required. In case of online request, system should auto-populate the details. User cannot change the populated value.	

Field	Description	Sample Values
Percentage Credit Amount Tolerance	Tolerance Amount to default from the underlying Export LC and its display only value. In case of online request, system should auto-populate the details. User cannot change the populated value.	
Additional Amount Covered	User can provide additional amount included in Export LC. In case of online request, system should auto-populate the details. User cannot change the populated value.	

3.4.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values

Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767. In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Save & Close	Save the information provided and holds the task for working later. This option will not submit the request.	

Field	Description	Sample Values
Cancel	Cancel the Scrutiny stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

3.4.2 Availability

DE user can verify and enter the basic details in Islamic Export LC transfer request for the different fields under the respective data segments. In case the request is received through online channel, user will verify the details populated.

The screenshot displays the Oracle Islamic Export LC Transfer request form. The top navigation bar includes the Oracle logo, user information (DEFAULTTENTY), and system details (Oracle Banking Trade Finan, May 24, 2021). The main header shows the application number: PK2IELT000026013. The left sidebar contains a navigation menu with options like Main, Availability, Payment, Documents and Conditions, Additional Fields, Advices, Additional Details, Settlement Details, and Summary. The main content area is titled 'Availability' and is divided into several sections: Availability Details, Shipment Details, and 45A Description of Goods and/or Services. Each section contains various input fields and dropdown menus for data entry. At the bottom, there is a table for 'Goods Code' with columns for Goods Code, Goods Type, Goods Description, Original No of Units, Original Price per Unit, Available Units, Transfer quantity, Transfer price per Unit, Total Amount, and Action. The table contains one row with the value 'CILLAFABRIC' in the Goods Code column. The bottom navigation bar includes buttons for Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

For Field Descriptions, refer to [3.3.2 Availability](#).

3.4.3 Payments

DE user can verify and enter the basic details available in the Islamic Export LC Transfer request.

The screenshot displays the Oracle Islamic Export LC Transfer interface. The top navigation bar includes 'Clarification Details', 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', 'Common Group Messages', and 'Incoming Message'. The main content area is titled 'Payment' and is divided into two sections: 'Payment Details' and 'Reimbursement Authorization'. The 'Payment Details' section includes fields for '49G-Special Payment conditions for beneficiary', '49H-Special Payment conditions for receiving bank', '48-Period for Presentation', '58A - Requested Confirmation Party', '72-Sender to Receiver Information', '57A-Advise Through Bank', '49-Confirmation Instructions', and '78-Instructions to P/A/N Bank'. The 'Reimbursement Authorization' section includes '53A - Reimbursing Bank', 'Reimbursing Bank Charge Type', and 'Reimbursing Bank Charge Details'. A bottom toolbar contains buttons for 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'New'.

Refer to [3.4.3 Payments](#).

3.4.4 Documents and Conditions

User can enter/ update Documents and conditions details for Islamic Export LC Transfer. The below fields can be modified in DE stage.

- Document Details
- Additional Conditions.

The screenshot displays the Oracle Islamic Export LC Transfer interface for 'Documents and Conditions'. The top navigation bar is the same as in the previous screenshot. The main content area is titled 'Documents and Conditions' and is divided into two sections: 'Document Details' and 'Additional Conditions'. The 'Document Details' section is a table with the following data:

Code	Document Description	Copy	Original	Clause Description	Document Received	Action
AIRDOC	Air Way Documents			Airway Bill SET of Clause for CIF	<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
BOL	Bill of Lading				<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
INSDOC	Insurance Documents			+INSURANCE POLICY OR CERTIFICATE ENDORSED	<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
INVDOC	Invoice Documents			Commercial invoice, duly signed	<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
MARDOC	Sea Way Documents			SET of Clauses for CIF COPY OF B/L TELEV	<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
OTHERDOC	Other Docs			Beneficiary's declaration within the 10 days advised	<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
PACKINGLIST	PACKINGLIST				<input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>

The 'Additional Conditions' section is a table with the following data:

FFT Code	FFT Description	Action
23XFILEIDENT	23xfileident	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

A bottom toolbar contains buttons for 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'New'.

3.4.4.1 Document Details

Documents details should default from underlying LC. If Substitute documents allowed is checked, system to give a warning message” Substitution of Documents allowed, please verify the documents”

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading” and 'Airway Bill' are chosen. Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading” and 'Airway Bill' are chosen.

Field	Description	Sample Values
Code	Document code is auto-populated from the latest LC.	
Document Description	Description of the document is auto-populated from the latest LC.	
Copy	Number of duplicate copies of documents as required in LC.	
Original	Number of documents in original as required in LC.	
Clause Description	Description of the clause required as per LC.	
Document Received	System defaults the value to display whether the document is received or not. The user can enable the option, if received the document.	
Action	Click Edit icon to edit the document details. Click Delete icon to delete the document details.	

3.4.4.2 Additional Conditions

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line delimiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. User should also be able to add additional FFT.

Field	Description	Sample Values
FFT Code	This field displays the FFT code as per the latest LC.	

Field	Description	Sample Values
FFT Description	This field displays the description of the FFT code as per the latest LC.	
Action	Click Edit icon to edit the additional conditions details. Click Delete icon to delete the additional conditions details.	

3.4.4.3 Documents and Checklist:

Documents: No documents are required for upload in this screen.

Checklist: User to verify if standard clauses are added to Additional conditions.

Remarks: User should be able to capture remarks as well as see remarks made in the earlier screens/stages

3.4.4.4 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to see the documents uploaded.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767. In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.	
Save & Close	Save the information provided and holds the task in for working later. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs.	
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

Field	Description	Sample Values
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>	
Back	<p>Click of Back to move the task to the previous segment.</p>	

3.4.5 Additional Fields

Refer to [3.3.4 Additional Fields](#).

3.4.6 Advices

DE user can view the Advices generated during Export LC Transfer request. Advices menu displays the advices available under a product code from the back office as tiles. Some of the possible advices could be of Transfer LC Instrument (SWIFT MT 720), Transfer LC Instrument Copy, and Payment message.

3.4.7.1 Preview Message

The bank user can view a preview of the message and advice simulated from back office which is based on the guarantee Claim captured in the previous screen.

Note

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

Note

Preview to have MT 720 as SWIFT and other advices as Mail Advice. This needs to be mentioned under Preview messages heading.

3.4.7.2 Draft Confirmation

The user can view the draft LC message (outgoing MT700 SWIFT message format) being displayed on the preview message text box.

If the user wants to send a copy of the draft LC for customer confirmation, the same can be done by choosing the customer response slider as 'Yes'. On submit of the data enrichment stage the mail message to the customer will be sent.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number.

The task will not move to approval but to 'Pending customer response stage. Upon receipt of customer's confirmation, the transaction moves to approval.

In case the customer asks for changes, the transaction will move to data enrichment and after necessary changes, it will move to approval.

3.4.8 The Preview section consists of following.

Field	Description	Sample Values
Preview - SWIFT Message		
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	
Preview Message	Display a preview of the draft message.	
Preview - Mail Device		
Language	Read only field. English is set as default language for the preview.	
Advice Type	Select the advice type.	
Preview Message	Display a preview of the advice.	
Draft Confirmation		
Draft Confirmation Required	This toggle enables the user to select if draft confirmation is required or not	
Following fields will have values on receipt of customer response.		
Customer Response	User can enter the response received from customer. If the response is received online, the response is auto populated in this field by the system	
Customer Remarks	Remarks from the customer for the draft	
Response Date	Customer Response received date.	
Customer Email ID 1	Default email address of the customer. System fetches the Email ID from Customer Address maintenance in Back office and auto populates the available Email ID.	
Customer Email ID 2	By default this field is blank. User can search and select the Email ID from lookup from the Customer Email Address field of the customer maintenance in Back Office and replicated in OBTFPM.	

3.4.8.1 Commission, Charge and Taxes

For more information, Refer to [3.4.8.1 Commission, Charge and Taxes](#).

3.4.9 Settlement Details

The user can view/input/verify the settlement details for Islamic Export LC Transfer request. In case the request is received through online channel, user will verify the details populated.

The screenshot displays the Oracle Banking Trade Finance Settlement Details screen. The main content area shows a table with the following data:

Component	Currency	Debit/Credit	Account	Account Description	Account Currency	Netting Indicator	Current Event	Original Exchange Rate	Exchange Rate	Deal Reference

For Online response – Read only

For Non Online response – The default would be pending. The user will be able to select from the drop list if the customer has accepted the draft or has request for change based on the above drop list responses.

Customer Remarks: The user can capture the remarks of the customer.

Response Date: Non Online channel – I will update the date on which the customer response has been received.

Online Channel – Read Only

3.5.0.4 Summary

Tiles Displayed in Summary

- Main Details - User can view the details about application details and LC details.
- Party Details - User can view the party details like beneficiary, advising bank etc.
- Availability and Shipment - User can view the availability and shipment details.
- Payments - User can view all details related to payments.

- Documents & Condition - User can view the documents required grid and the additional conditions grid.
- Charges: User can see the details for charges, commission and taxes.
- Preview Messages - User can view the preview details.
- Compliance - User can view compliance details with statuses.

Documents – User must be able to view the documents uploaded in the system and upload documents if customer response has been received through non- online channel.

Remark - Capture remarks if required and must be able to view the remarks captured during earlier stages.

3.5.0.5 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will get moved to next logical stage of Export LC Transfer. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Cancel	Cancel the Draft Confirmation.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.	

Field	Description	Sample Values
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	

3.6 Multi Level Approval

This stage allows the approver user to review and approve the Export LC Transfer transaction.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

3.6.1 Re-Key Authorization

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount
- Expiry Date

Approval Rekey

View Signature

Documents

Remarks

Transfer Currency

GBP

Transfer Amount

GBP £500,000.00

Date of Expiry

Mar 5, 2021

Refer

Close

Proceed

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
