1. Preface

1.1 Introduction

This user manual is designed to help you quickly get acquainted with Guarantee Cancellation process in Oracle Banking Trade Finance Process Management.

1.2 Audience

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 Related Documents

- Getting Started User Guide
- Common Core User Guide

1.6 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry

standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row

2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3. Guarantee Cancellation

Guarantee Cancellation enables the user to register request for Guarantee/SBLC Cancellation received from the Applicant.

If the request is received by mail/Courier, the user should be able to update the request.

This section contains the following topics

3.1 Registration

3.2 Data Enrichment

3.3 Multi Level Authorization

3.1 Registration

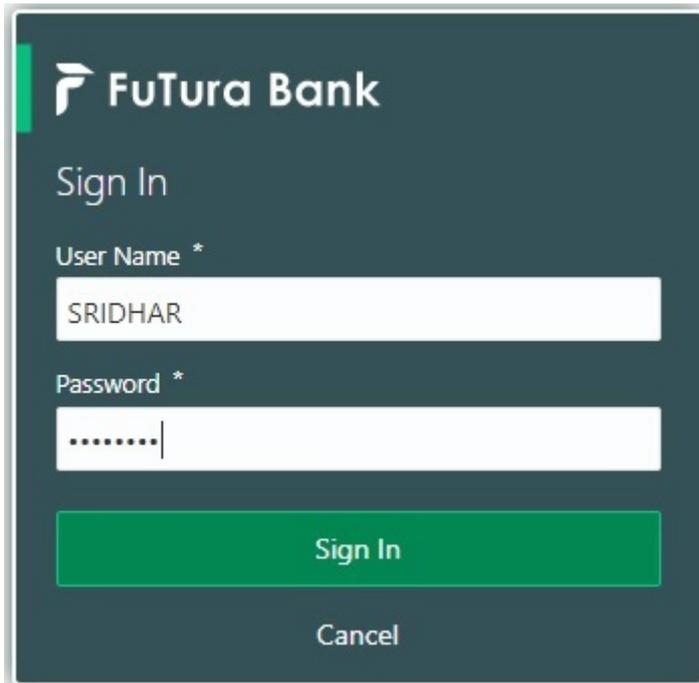

The first stage of Guarantee Cancellation process starts from the Registration Stage. During Registration stage, user captures the basic details as well as undertaking details of the cancellation application. On submit of the request, the customer will be notified with an acknowledgment letter.

The user has the option to submit, hold, save and hold and cancel the application.

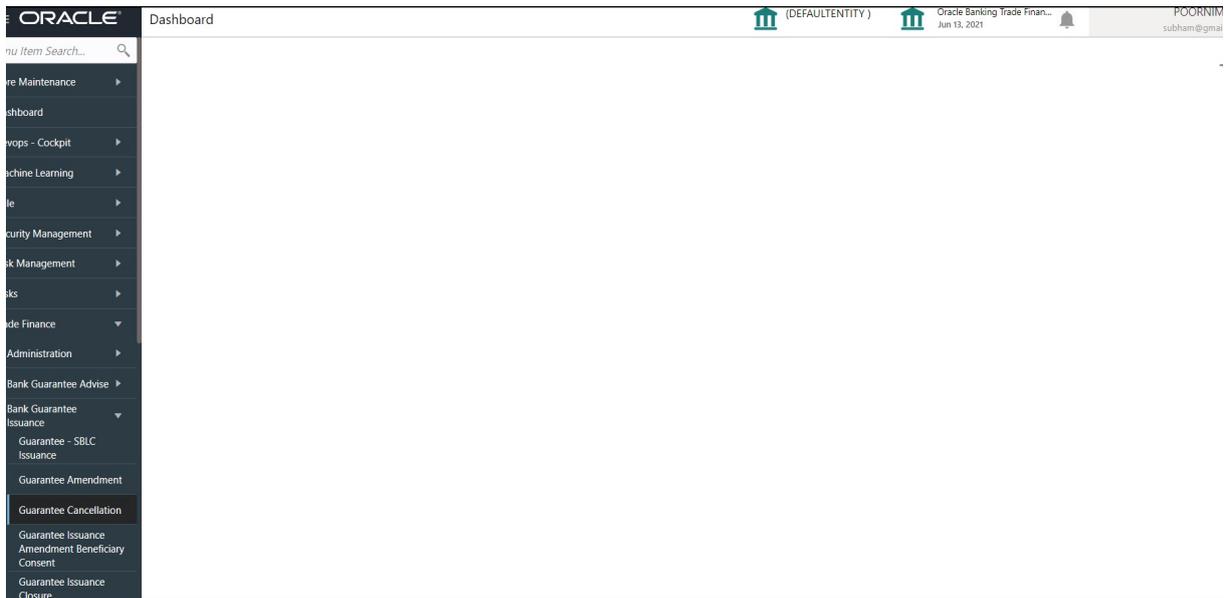

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
3. Click **Trade Finance > Bank Guarantee Issuance > Guarantee Cancellation**.

The Registration stage has two sections Application Details and SBLC/ Guarantee Details. Let's look at the details of Registration screens below:

The screenshot shows the Oracle application registration interface. The top navigation bar includes the Oracle logo, user information (ZARTAL subham@gmail), and system details (Oracle Banking Trade Finance, May 24, 2021). The main content is divided into two sections: Application Details and SBLC/Guarantee Details. The Application Details section includes fields for Guarantee Number (SUJR211253002), Received From Party (Applicant), Received From - Customer ID (001044), Received From - Customer Name (GOODCARE PLC), Priority (Medium), Submission Mode (Desk), and Amendment Number (2). The SBLC/Guarantee Details section includes fields for Form of Undertaking (Guarantee), Product Code (GUJR), Product Description (Guarantee Issuance Reissuance upon r), 32B - Undertaking Amount (GBP, £9,000.00), 23X - Narrative, 40C - Applicable Rules (URDG - Uniform rules for dema...), and Beneficiary (001043 MARKS AND SP...).

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Application Details		
SBLC Guarantee Number	Click Search to search and select the SBLC/ Guarantee number of the Guarantee to be cancelled from the look-up. Alternatively, user can specify the undertaking number. In the look-up search, user can specify the Undertaking Number, Applicant, Currency, Amount and User Reference to fetch the Guarantee details. Based on the search result, select the applicable Guarantee to be cancelled.	
Received From Party	Read only field. System will default the name of the party as available in Guarantee.	
Received From - Customer ID	Read only field. Customer ID is auto-populated from Guarantee / SBLC Issuance.	001345
Received From - Customer Name	Read only field. Customer name is auto-populated from Guarantee /SBLC Issuance.	

Field	Description	Sample Values
Branch	<p>Read only field.</p> <p>Branch name is auto-populated from Guarantee details.</p> <hr/> <p style="text-align: center;">Note</p> <p style="text-align: center;">Once the request is submitted, Branch field is non-editable.</p>	
Priority	<p>System defaults the Priority as Low/Medium/. High based on maintenance.</p> <p>If no priority is maintained, system defaults the priority as Medium.</p> <p>The user can change the priority.</p>	High
Submission Mode	<p>Submission mode of GuaranteeCancellation request. By default the submission mode will have the value as 'Desk'.</p> <p>Desk- Request received through Desk</p> <p>Email - Request received through Email</p> <p>Courier- Request received through Courier</p> <p>The user can change the submission mode.</p>	Desk
Process Reference Number	<p>Unique sequence reference number for the transaction.</p> <p>This is auto generated by the system.</p>	203GTEISS000 001134
Cancellation Date	<p>Read only field.</p> <p>By default, the application will display branch's current date.</p>	
Amendment Number	<p>Read only field.</p> <p>Amendment number is auto-populated based on the system maintenance.</p> <p>Amendment number increases by 1 for each amendment.</p>	
Customer Reference Number	<p>User can enter the 'Reference number' provided by the applicant/applicant bank.</p> <p>Enables the user to provide a unique Customer Reference Number for the cancellation.</p>	
Related Reference	<p>Read only field.</p> <p>Related reference number is auto-populated based on the system maintenance.</p>	

Field	Description	Sample Values
Beneficiary Consent Required	<p>Toggle on: Beneficiary consent required for cancellation.</p> <p>Toggle off: Switch off the toggle if beneficiary consent is not required for cancellation.</p>	
SBLC/ Guarantee Details		
Form of Undertaking	<p>Read only field.</p> <p>Form of Undertaking defaults from Guarantee.</p>	
Product Code	<p>Read only field.</p> <p>This field displays the product code defaulted from Guarantee.</p>	
Product Description	<p>Read only field.</p> <p>This field displays the description of the product as per the product code.</p>	
Undertaking Amount	<p>Read only field.</p> <p>System defaults the outstanding value available in Guarantee.</p>	
Amount In Local Currency	<p>Read only field.</p> <p>System fetches the local currency equivalent value for the transaction amount from back office (with decimal places).</p>	
Purpose of Message	<p>Read only field.</p> <p>Purpose of message defaults from guarantee.</p>	
File Identification	<p>Read only field.</p> <p>System will default the value available in guarantee.</p>	
Narrative	<p>Read only field.</p> <p>System defaults the value available in guarantee.</p>	
Expiry Type	<p>Read only field.</p> <p>System defaults the expiry type as maintained in guarantee issuance.</p>	
Date of Expiry	<p>Read only field.</p> <p>System defaults the expiry date of the guarantee.</p>	
Expiry Condition/ Event	<p>Read only field.</p> <p>System defaults the expiry condition/event value available in guarantee.</p>	
Applicable Rules	<p>Read only field.</p> <p>This field displays the rules of the guarantee.</p>	

Field	Description	Sample Values
Narrative	Read only field. System defaults the narrative available in guarantee.	
Applicant Bank	Read only field. This system defaults the applicant bank name available in guarantee.	
Applicant	Read only field. This system defaults the value available in guarantee.	
Beneficiary	Read only field. This field displays the beneficiary details of the selected guarantee and user can edit the details if required.	
Advising Bank	Read only field. This field displays the details of the advising bank.	
Advising Bank Reference	Read only field. This field displays advising bank reference if available.	
Advice Through Bank	Read only field. System defaults the value available in guarantee.	
Advising Through Bank Reference	Read only field. This field displays advising bank reference if available.	
Counter SBLC/Guarantee Issuing Bank	Read only field. System defaults the value available in guarantee.	
Counter Guarantee Issuing Bank Reference	Read only field. System defaults the value available in guarantee.	
Local SBLC/Guarantee Issuing Bank	Read only field. System defaults the value available in guarantee.	
Local Guarantee Issuing Bank Reference	Read only field. System defaults the value available in guarantee.	
Additional Amounts	Read only field. Additional amount covered as per the latest guarantee details is displayed.	

Field	Description	Sample Values
Accountee	Read only field. System defaults the accountee name available in guarantee.	

3.1.0.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Documents	Non- Online: Upload the documents received under the Guarantee Cancellation. The user has to upload all the mandatory documents required by the system to proceed for the guarantee cancellation application.If mandatory documents are not uploaded, system should display an error on submit. The possible documents submitted under an Guarantee/SBLC Cancellation request are: <ul style="list-style-type: none"> • Guarantee/SBLC Cancellation Request
Remarks	The user can provide any additional information regarding the Guarantee cancellation. This information can be viewed by the users in other stages of the process.
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Field	Description
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.
Cancel	Cancels the Guarantee cancellation Registration stage inputs and system should clear the details captured in the screen. The task will get deleted.
Save and Close	Save the information provided and displays the task in you queue for working later. This option will not submit the request
Submit	Task will get moved to next logical stage of Guarantee Cancellation. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

3.1.1 Document Linkage

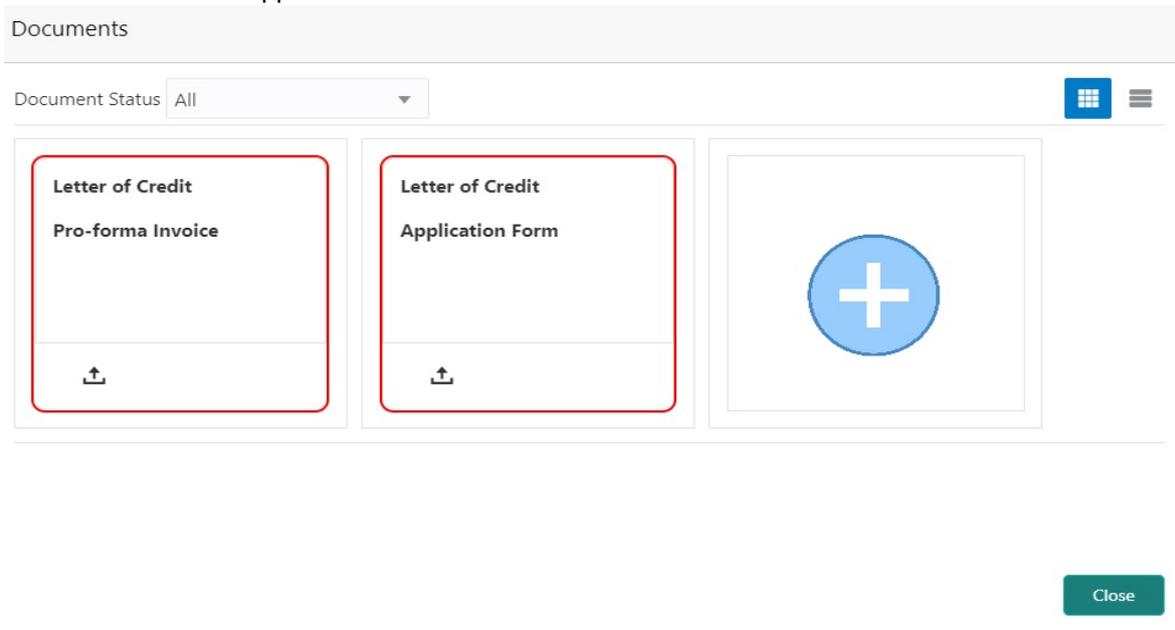

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3. Click the Add Additional Documents button/ link. The **Document** screen appears.

Field	Description	Sample Values
Document Type	Select the Document type from list. Indicates the document type from metadata.	
Document Code	Select the Document Code from list. Indicates the document Code from metadata.	

Field	Description	Sample Values
Document Title	Specify the document title.	
Document Description	Specify the document description.	
Remarks	Specify the remarks.	
Document Expiry Date	Select the document expiry date.	
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.	

4. Select the document to be uploaded or linked and click the **Link Document** link. The link Document pop up appears.
The value selected in Document Type and Document code of Document screen are defaulted in the Link Document Search screen.

3.1.2 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

3.2 Data Enrichment

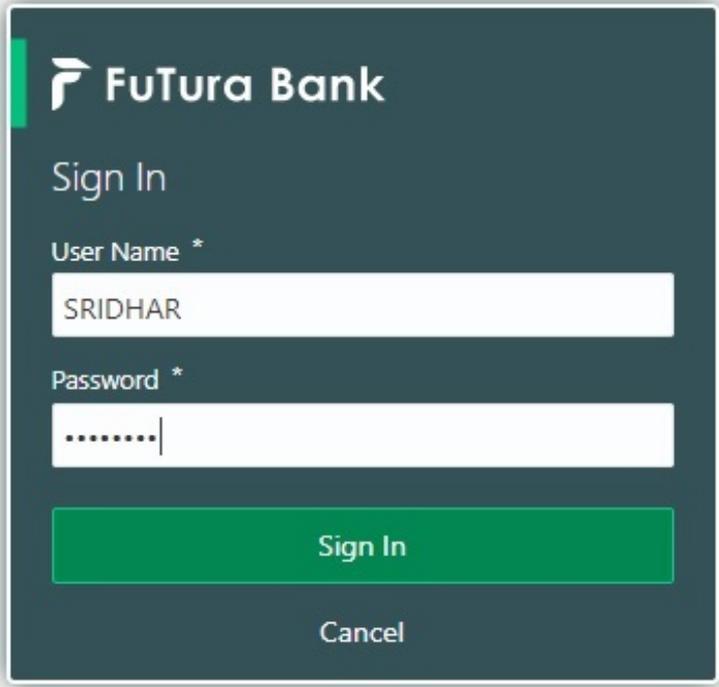

As part of Data Enrichment, user can register and update the Guarantee Cancellation request received from the Issuing Bank. If the request is received by mail/Courier, the user should be able to update the request. In case the message is received by SWIFT, then the cancellation task needs to be auto created and available for the user to handle.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The image shows a login interface for FuTura Bank. At the top left is the FuTura Bank logo. Below it, the text "Sign In" is displayed. There are two input fields: "User Name *" containing the text "SRIDHAR" and "Password *" containing masked characters. Below these fields are two buttons: a green "Sign In" button and a white "Cancel" button.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Tasks> Free Tasks.

The screenshot shows the Oracle Free Tasks interface. The left sidebar contains a navigation menu with 'Free Tasks' highlighted. The main area displays a table of tasks. The table has the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Customer Number. The first row shows a task with Action 'Acquire & E...', Priority 'M', Process Name 'Guarantee Cancellation', Process Reference Number 'PK2GTFC000035781', Application Number 'PK2GTFC000035781', Stage 'DataEnrichment', Application Date '20-09-09', Branch 'PK2', and Customer Number '001044'. Below the table is a pagination control showing 'Page 1 of 71 (1 - 20 of 1417 Items)'.

4. Select the appropriate cancellation task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task.

This screenshot is similar to the previous one, but the 'Acquire' button in the top toolbar is highlighted with a red box. The table below shows the same list of tasks, with the first row (Guarantee Cancellation) now having a checked checkbox in the 'Action' column. The pagination control remains the same.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for Data Enrichment stage.

The screenshot shows the Oracle My Tasks interface. On the left is a navigation menu with categories like Maintenance, Board, and Finance. The main area displays a table of tasks. The table has the following columns: Action, Priority, Process Name, Process Reference Number, Application Number, Stage, Application Date, Branch, and Customer Number. The first row is selected, showing a task with Priority 'M', Process Name 'Guarantee Cancellation', Process Reference Number 'PK2GTEC000035781', Application Number 'PK2GTEC000035781', Stage 'DataEnrichment', Application Date '20-09-09', Branch 'PK2', and Customer Number '001044'. Below the table is a pagination control showing 'Page 1 of 4 (1 - 20 of 70 items)'.

The Guarantee Cancellation - Data Enrichment stage has sections as follows:

- Main Details
- Acknowledgment Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Guarantee Cancellation - Data Enrichment stage.

User can enter/update the following fields. Some of the fields that are already having value from registration/online channels may not be editable.

3.2.1 Main Details

Main details section has three sub section as follows:

- Application Details
- SBLC/ Guarantee Details

3.2.1.1 Application Details

Refer to Registration for more information of the fields.

3.2.1.2 SBLC/ Guarantee Details

The fields listed under this section are same as the fields listed under the SBLC Guarantee Details section in Registration. During Registration, if user has not captured input, then user can capture the details in this section.

3.2.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.

Field	Description
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>Clicking this button allows the user to see the message in case of STP of incoming MT 767.</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system and the task may get terminated or moved to Reject Approval Stage.

Field	Description
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.
Save and Close	User will save the information provided and close the details captured. This option will not submit the request.
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.2.2 Acknowledgement Details

At this stage user can update details for the acknowledgment and response details. This Acknowledgment related section is applicable only for Counter Issuing bank and Local issuing bank.

Field	Description	Sample Values
Acknowledgment Details		
MT 768 Guarantee Acknowledgment		
(This is applicable in case of Counter Guarantee/Counter Counter Guarantee Issuing Bank)		
Issuing Bank Reference	Specify the values for issuing bank reference.	
Account Identification	Click Search to search and select the values for account identification from the lookup. Alternatively user can specify the account identification details.	
Date of Acknowledgement	System defaults the current system date as date of message acknowledgment. The user can change the date.	
Amount of Charges	Specify the values for the amount of charges and select the currency.	
Account with Bank	Click Search to search and select the account with bank details from the lookup. Alternatively user can also specify the account with bank details.	
Charges	Specify more details about charges, if applicable.	
Sender to Receiver Information	Click Search to search and select the sender to receiver details from the lookup. Alternatively user can specify the sender to receiver details if applicable.	

3.2.2.1 Action Buttons

Use action buttons based on the description in the following table:

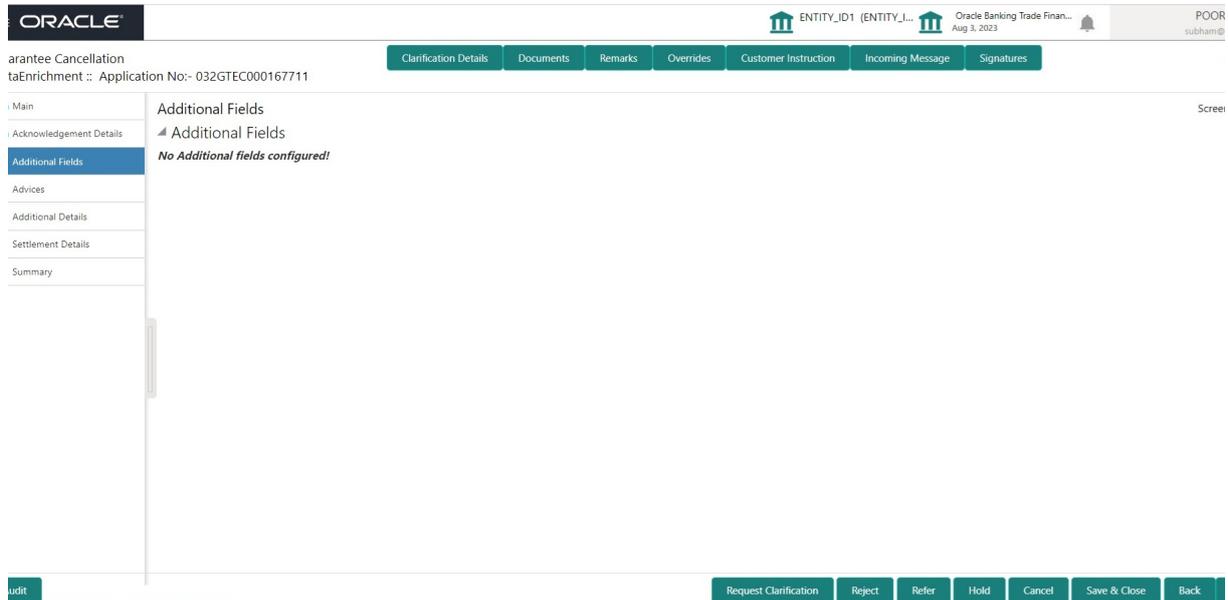

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents.
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.

Field	Description
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>Clicking this button allows the user to see the message in case of STP of incoming MT 767.</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	<p>User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.</p>
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>The reject codes are:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others. The user would be able to select a Reject code and give a Reject Description. <p>Other users should be able to see the reject reason in remarks window throughout the process.</p>

Field	Description
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	<p>The details provided will be registered and status will be on hold.</p>
Cancel	<p>Cancels the details captured in the screen. The task will get deleted.</p>
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>
Back	<p>On click Back, user navigates to previous step.</p>

3.2.3 Additional Fields

This step system defaults the Additional details based on the Additional fields maintained in the system.

3.2.3.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents.
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.

Field	Description
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>Clicking this button allows the user to see the message in case of STP of incoming MT 767.</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	<p>User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.</p>
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>The reject codes are:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others. The user would be able to select a Reject code and give a Reject Description. <p>Other users should be able to see the reject reason in remarks window throughout the process.</p>

Field	Description
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.
Save and Close	User will save the information provided and close the details captured. This option will not submit the request.
Back	On click Back , user navigates to previous step.
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.2.4 Advices

This section defaults the advices maintained for the product based on the advices maintained at the Product level.

3.2.5 Additional Details

In the Additional details section, the user can verify/input/update the additional details data segment of the Guarantee/SBLC Cancellation request.

Guarantee cancellation may have impact on the Charges & Commission section.

The screenshot shows the Oracle Banking Trade Finance application interface. The top navigation bar includes the Oracle logo, user information (ENTITY_ID1, ENTITY_ID2, POORNIM subham@gmail.com), and the date (Aug 3, 2023). Below the navigation bar, there are several tabs: Clarification Details, Documents, Remarks, Overrides, Customer Instruction, Incoming Message, and Signatures. The main content area is titled 'Additional Details' and contains three tiles:

Limit & Collateral	Charge Details	Preview Message
Contribution Currency : Contribution Amount : Limit Status : Collateral Currency : Collateral Contr. : Collateral Status : Not Verified	Charge : Commission : Tax : Block Status :	Language : Preview Message : -

At the bottom of the screen, there is a row of action buttons: Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and New.

3.2.5.1 Limit and Collateral

The limits and collateral details are displayed as tile. The tiles displays a list of important fields with values.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number" to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Note

For Guarantee Advising MT 760, user can input the values, applicable if Advising bank confirms undertaking.

Customer ID	Linkage Type	Liability Number	Line Id/Linkage Ref No	Line Serial	Contribution %	Contribution Currency	Amount to Earmark	Limit Check Response	Response Message	View

CLAIM_CUST_AMT	AED	Debit	0322040001	Air Arabia	AED	No	No
CLAIM_CUST_AMT_FX	AED	Debit	0322040001	Air Arabia	AED	No	No
CLAIM_SETTLE_AMT	AED	Credit	0323020032	Abu Dhabi Islamic Bank	AED	No	No
COLLAMT_OS	AED	Credit	0322040001	Air Arabia	AED	No	No
COLLAMT_OSEQ	AED	Debit	0322040001	Air Arabia	AED	No	Yes
COLL_AMNDAMT	AED	Debit	0322040001	Air Arabia	AED	No	No

3.2.7.1 Provide the settlement details based on the description in the following table:

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	System displays the default currency for the component.	
Debit/Credit	System displays the debit/credit indicators for the components.	
Account	System displays the account details for the components.	
Account Description	System displays the description of the selected account.	
Account Currency	System defaults the currency for all the items based on the account number.	
Netting Indicator	System displays the applicable netting indicator.	
Current Event	System displays the current event as Y or N.	

3.2.7.2 Action Buttons

3.2.8 Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents.
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.
Customer Instructions	Click to view/ input the following <ul style="list-style-type: none">● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767. In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.

Field	Description
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>The reject codes are:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others. The user would be able to select a Reject code and give a Reject Description. <p>Other users should be able to see the reject reason in remarks window throughout the process.</p>
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>
Back	On click Back , user navigates to previous step.
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.2.9 Summary

User can review the summary screen of Guarantee/SBLC Cancellation request.

Log in to Oracle Banking Trade Finance Process Management (OBTFPM) system to see the Summary tiles. The tiles must display a list of important fields with values. User can drill down from Summary Tiles into respective data segments.

The screenshot displays the Oracle Banking Trade Finance Process Management (OBTFPM) Summary screen. The interface includes a top navigation bar with the Oracle logo, user information (ENTITY_ID1, ENTITY_L...), and the date (Aug 3, 2023). Below the navigation bar, there's a sidebar with a 'Summary' tile selected. The main content area is a grid of 12 summary tiles arranged in a 3x4 layout. The tiles are: Main, Guarantee Details, Additional Fields, Guarantee Preferences, Local Guarantee, Advices, Commission, Charges and Taxes, Preview Message, Limits and Collaterals, Party Details, and Accounting Details. Each tile contains key-value pairs for various fields related to the application.

Tiles Displayed in Summary

- Main - User can view the application details and Guarantee/Standby details.
- Guarantee Details - User can view the Guarantee Details.
- Additional Fields - User can view the user defined field details.
- Guarantee Preferences - User can view the Guarantee preference details. User can only view but cannot edit any of the details.
- Local Guarantee - User can view the local Guarantee Details.
- Advices - User can view the advices details.
- Commission, Charges, Taxes - User can view the charge details.
- Preview Message - User can view the message preview, legal verification and customer draft confirmation details. The message preview screen has the Legal Verification details.
- Limits and Collaterals - User can view the captured details of limits and collateral. User can only view but cannot edit any of the details.
- Party Details - User can view the party details like beneficiary, advising bank etc.
- Accounting Details - User can view the accounting entries generated by back office system.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries."
