1. Preface

1.1 Introduction

This user manual is designed to help you quickly get acquainted with Guarantee Amendment - Islamic process in Oracle Banking Trade Finance Process Management.

1.2 Audience

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 Related Documents

- Getting Started User Guide
- Common Core User Guide

1.6 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry

standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 Conventions

The following text conventions are used in this document:

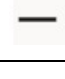

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3. Guarantee Issuance Amendment - Islamic

Guarantee Amendment enables the user to amend an already issued guarantee to the Beneficiary or to the Bank designated to Advise the Guarantee Amendment to the Beneficiary or to another Advising Bank.

Conventional Guarantee Amendment process enables the user to make an amendment to the Guarantee which had been already issued.

The common amendments that are made to Guarantees are:

- Expiry date
- Increase/Decrease in Guarantee amount
- Change in Terms and Conditions
- The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended Guarantee is parked awaiting beneficiary consent.

The various stages involved in Amendment of Guarantee Issued are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Input/Modify details of amendment of Guarantee - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements and draft Amendment copies
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Amendment process flow is similar to that of conventional Guarantee Issuance Amendment process flow.

This section contains the following topics:

3.1 Registration	3.2 Data Enrichment
3.3 Customer Response - Draft Confirmation	3.3.1 Amount Block Exception Approval
3.4 Multi Level Authorization	

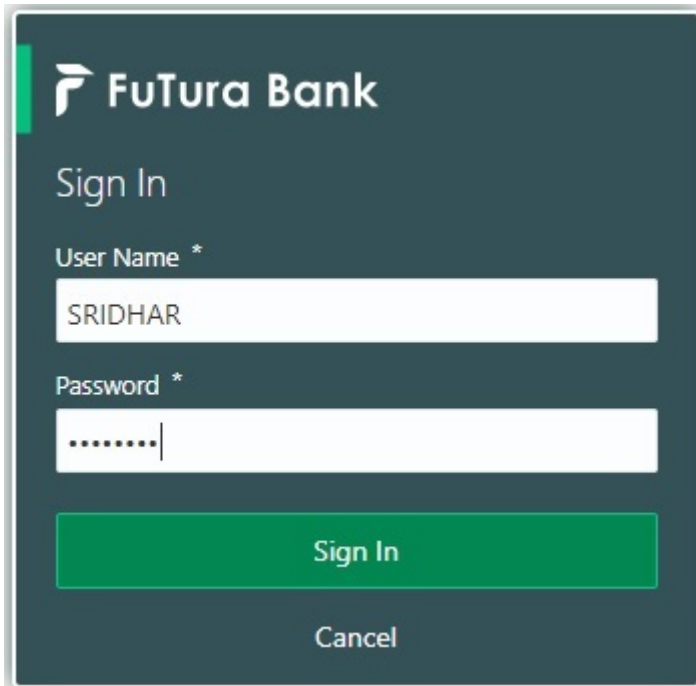

3.1 Registration

During registration stage, user can register request for an Islamic Guarantee amendment received at the front desk (as an application received physically/received by mail/fax). During registration, user captures the basic details of the application, check the signature of the applicant and upload related documents. On submit of the amendment request, the customer should be notified with acknowledgment and the request should be available for an Guarantee expert to handle in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance - Islamic > Bank Guarantee Issuance > Guarantee Issuance Amendment - Islamic.

The screenshot shows the Oracle dashboard interface. On the left is a dark navigation menu with the Oracle logo at the top. The menu items include: Home Maintenance, Dashboard, Maintenance, Security Management, Tasks, Trade Finance, Administration, Bank Guarantee Advice, Bank Guarantee Issuance (highlighted with a red box), Guarantee - SBLC Issuance, Guarantee Amendment (highlighted with a red box), Enquiry, Event Logs, and Export - Documentary. The main content area is titled 'SLA Status Summary' and contains a table with the following data:

SLA Status Summary	Count
Pending Exception Approval	(0)
Amount Block Exception	(0)
Limit Earmark Exception	(0)
KYC Checks Exception	(0)
Sanction Checks Exception	(0)

The Registration stage has two sections Application Details and SBLC/ Guarantee Details. Let's look at the details of Registration screens below:

The screenshot displays two sections of the Oracle application: 'Application Details' and 'SBLC/Guarantee Details'.

Application Details:

- Guarantee Number: 2GLR232156001
- Priority: Medium
- Amendment Date: Aug 3, 2023
- Received From Party: Applicant
- Received From - Customer ID: 032204
- Received From - Customer Name: Air Arabia
- Amendment Number: 1
- Submission Mode: Desk
- Customer Reference Number: [Empty]
- Related Reference: [Empty]

SBLC/Guarantee Details:

- Form of Undertaking: SAR - Guarantee
- Product Description: Islamic Guarantee Issuance / Reissuance
- Type of Undertaking: 32B - Undertaking Amount
- Amount In Local Currency: AED 10,000.00
- Narrative: 23X - Narrative
- Extension Required: [Toggle Off]
- Applicant Bank: 032204 Air Arabia
- Advise Through Bank: [Empty]
- Product Code: GLIR
- 22A - Purpose of Message: Amendment to Undertaking
- Date of Expiry: Aug 3, 2026
- 40C - Applicable Rules: UCPR - Uniform customs and Pr...
- Beneficiary: 032207 Emaar Propert
- Counter SBLC/Guarantee Issuing Bank: [Empty]
- Obligor Collateral Percentage: 0

Provide the Application Details based on the description in the following table. In case of MT798, Application Details are defaulted to SWIFT.

Field	Description	Sample Values
Application Details		
SBLC/Guarantee Number	The user identification of your external bank account. Provide the undertaking number. Alternatively, user can search the documentary undertaking number using LOV.	
Received From Party	Read only field. System will default the name of the party as available in Guarantee.	
Received From - Customer ID	Read only field. Customer ID will be auto-populated from Guarantee /SBLC Issuance.	001345
Received From - Customer Name	Read only field. Applicant Name will be auto-populated from Guarantee /SBLC Issuance.	
Branch	Read only field. Branch Name will be auto-populated from Guarantee /SBLC Issuance. <hr/> Note Once the request is submitted, Branch field is non-editable.	
Priority	System will default the Priority as Low/Medium/High based on maintenance. If no priority is maintained, system defaults the priority as Medium. User can change the priority populated any time before submit of Registration stage.	High
Amendment Number	Read only field. Amendment number will be auto-populated based on the system maintenance. Amendment number increases by 1 for each amendment.	

Field	Description	Sample Values
Submission Mode	Submission mode of Guarantee. Amendment request. By default the submission mode will have the value as 'Desk'. Desk - Request received through Desk Email - Request received through Email Courier - Request received through Courier User can change the submission mode.	Desk
Process Reference Number	Unique process reference number for the transaction. This is auto generated by the system.	203GTEISS000 001134
Amendment Date	Read only field. By default, the application will display branch's current date. User cannot change the date to back date or future date.	04/13/2018
Customer Reference Number	User can enter the 'Reference number' provided by the applicant/applicant bank. Enables the user to provide a unique Customer Reference Number for the amendment.	
Related Reference	Read only field. Related reference number will be auto-populated based on the system maintenance	
Beneficiary Consent Required	Toggle on: Beneficiary consent required for the amendment made to the fields. Toggle off: Switch off the toggle if beneficiary consent is not required for the amendments	
SBLC/ Guarantee Details		
Form of Undertaking	Read only field. Form of Undertaking defaults from Guarantee/ Standby Issuance	
Type of Undertaking	Read only field. Type of undertaking defaults from Guarantee/ Standby Issuance.	
Narrative	If Type of Undertaking field value is OTHR , user must provide description in this field.	
Product Code	Read only field. This field displays the product code defaulted from Guarantee/ Standby Issuance.	

Field	Description	Sample Values
Product Description	Read only field. This field displays the description of the product as per the product code.	
Undertaking Amount	System defaults undertaking amount from registration stage. User can amend the value.	
Amount In Local Currency	Read only field. System fetches the local currency equivalent value for the transaction amount from back office (with decimal places).	
Purpose of Message	Read only field. Purpose of message defaults from Guarantee/ Standby Issuance.	
File Identification	This field enables the user to select the type of delivery channel and its associated file name or reference from the available values: <ul style="list-style-type: none"> ● COUR - Courier delivery ● EMAL - Email transfer ● FACT - SWIFTNet FileAct ● FAXT - Fax transfer ● HOST - Host-to-Host ● MAIL - Postal Delivery ● OTHR - Other delivery channel 	
Narrative	If File Identification field values are COUR or OTHR , user must provide description in this field.	
Expiry Type	Select the expiry type. By default the system displays the expiry date as maintained in Issuance. Select the applicable value from the available options: <ul style="list-style-type: none"> ● COND - With Expiry ● COND - Without Expiry ● FIXD - Specified expiry date (with/without automatic expansion) ● OPEN - No specific date of expiry 	
Date of Expiry	Read only field. The expiry date of the Guarantee Issuance defaults from Guarantee/ Standby Issuance.	
Auto Renewal	Enable the option for auto renewal. This field is enabled if Applicable Rules is URDG - Uniform rules for demand guarantees and Expiry Type is OPEN .	

Field	Description	Sample Values
Extension Required	Enable this option if extension is required for guarantee issuance internal amendment.	
Expiry Condition/Event	<p>Read only field.</p> <p>This field specifies the documentary condition/ event that indicates when the local undertaking will cease to be available.</p> <p>This field is enabled if Expiry Type is COND - With Expiry or COND - Without Expiry.</p> <p>For Guarantee Advising MT760, the value is read only and populated from Incoming MT 760.</p>	
Applicable Rules	<p>Read only field.</p> <p>This field displays the rules of the Guarantee/ Standby issuance.</p>	
Narrative	Specify the description in this field, if Applicable Rules field values is OTHR.	
Applicant Bank	<p>Read only field.</p> <p>System defaults the applicant bank name from Guarantee Issuance details.</p>	001345 Nestle
Applicant	<p>Read only field.</p> <p>This field displays the details of the applicant of the selected SBLC/Guarantee Number.</p>	
Beneficiary	<p>System defaults the beneficiary details of the selected Guarantee/ Standby issuance.</p> <p>User can change the beneficiary, if required.</p>	
Advising Bank	<p>Specify or click Search icon to search and select the details of the advising bank.</p> <hr/> <p style="text-align: center;">Note</p> <p style="text-align: center;">In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message “RMA arrangement not available, please change the bank or use MAIL Medium”.</p>	
Advising Bank Reference	Specify the advising bank reference number.	
Advising Through Bank	Specify or click Search icon to search and select the advising through bank d.	

Field	Description	Sample Values
Counter SBLC/Guarantee Issuing Bank	<p>Read only field.</p> <p>The value of Counter Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is applicable only if the Purpose of Message field has value as ICCO.</p> <hr/> <p style="text-align: center;">Note</p> <p>If Counter Issuing Bank has value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".</p>	
Local SBLC/Guarantee Issuing Bank	<p>Read only field.</p> <p>The value of Local Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is applicable only if the Purpose of Message field has value as ICCO or ISCO.</p> <hr/> <p style="text-align: center;">Note</p> <p>If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".</p>	
Supplementary Information About Amounts	This field specifies the additional amounts related to undertaking.	
Obligor/ Instructor Party	Click Search to search and select the name of the obligor from the lookup.	
Obligor Collateral Percentage	Specify the value for obligor collateral percentage.	
Closure Date	<p>System default the "Closure Date" value from the previous version of the contract.</p> <p>User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions,</p> <ul style="list-style-type: none"> ● Closure Date must be after the Issue Date. ● Closure Date must be after the Expiry Date. ● Closure Date cannot be blank 	

Field	Description	Sample Values
Accountee	Read only field. System defaults the accountee name available in Guarantee.	
Revenue Sharing Percentage	Read only field. System populates the values from the "Trade Finance Customer Maintenance" if any, from the Guarantee Contract.	

3.1.0.1 **Action Buttons**

Use action buttons based on the description in the following table:

Field	Description
Signature	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Documents	The user can upload the documents.
Remarks	The user can provide any additional information regarding the Guarantee ammendment. This information can be viewed by the users in other stages of the process.
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.
Cancel	Cancels the Guarantee Amendment Registration stage inputs and system should clear the details captured in the screen. The task will get deleted.
Save and Close	Save the information provided and displays the task in you queue for working later. This option will not submit the request
Submit	Task will get moved to next logical stage of Islamic Guarantee Issuance that is Data Enrichment stage. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

3.1.1 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is “Online”.
 3. In case submission mode is “Online”, the user can enter the clarification details in “Clarification Required” placeholder. In case submission mode is not “Online”, the system will validate if the counterparty is a OBDX customer by checking the flag “Trade Finance Portal” in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not “Online”, and if the “Trade Finance Portal” flag is set to ‘No’ in Customer Maintenance Table, the system should display the error message that ‘The customer is not subscribed to Trade Finance Portal’. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

3.2 Data Enrichment

As part of data enrichment, user can input new Islamic Guarantee Issuance Amendment request. User can enter/update basic details of the incoming request.

Note

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

In case of MT798 message, if the User encounters validation error during handling the task, user can put the transaction into hold and seek clarification from the customer in this stage. In DE stage the task is verified and enriched. The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value.

Do the following steps to acquire a task at Data Enrichment stage:

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
3. Click **Tasks > Free Tasks**.

Hold	<p>The details provided will be registered and status will be on hold.</p>
Cancel	<p>Cancels the details captured in the screen. The task will get deleted.</p>
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment as Sequence B.</p>

3.2.5 Additional Fields

This section displays the additional fields based on the User defined fields maintained in the system.

3.2.5.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.

Field	Description
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(763,767/768).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
View Undertaking	<p>Clicking this button allows the user should to view the undertaking details.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	<p>User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.</p>
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system and the task may get terminated or moved to Reject Approval Stage.</p>

Field	Description
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.
Save and Close	User will save the information provided and close the details captured. This option will not submit the request.
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment as Sequence B.

3.2.6 Amendment Snapshot

Data Enrichment user wants to enter the basic amendment details of the Islamic Guarantee Issuance Amendment Islamic request. At this step user can view all the fields that are amended with the old values and the amended value of the Guarantee/Standby undertaking.

The screen displays the latest Guarantee /SBLC value before amendment and the new amended value.

The screenshot shows the Oracle Banking Trade Finance application interface. The top navigation bar includes the Oracle logo, user information (ENTITY_ID1, ENTITY_J...), and the date (Aug 3, 2023). The main header displays the application name "Guarantee Issuance Amendment Islamic" and the application number "Application No:- 032IGTM000167861". The navigation menu includes buttons for Clarification Details, Documents, Remarks, Overrides, Customer Instruction, Incoming Message, View Undertaking, and Signatures. The main content area is titled "Amendment Snapshot" and shows "Sequence B" details. A table displays the following information:

Field Name	Amended Value	Value as per Undertaking
24G- Delivery to/ Collection by	BENE	

Page 1 of 1 (1 of 1 items) navigation controls are visible below the table. The bottom navigation bar includes buttons for Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

Field	Description	Sample Values
Sequence B		
Field Name	Displays the fields that are amended.	
Amended Value	Displays the Guarantee /SBLC value before amendment.	
Value as per Undertaking	Displays the Guarantee /SBLC new amendment value after amendment.	

3.2.6.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Field	Description
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(763,767/768).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
View Undertaking	Clicking this button allows the user should to view the undertaking details.
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system and the task may get terminated or moved to Reject Approval Stage.
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.

Field	Description
Save and Close	User will save the information provided and close the details captured. This option will not submit the request.
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment as Sequence B.

3.2.7 Advices

Data Enrichment user wants to verify the advice details of the Islamic Guarantee Issuance Amendment request. This section defaults the advices maintained for the product based on the advices maintained at the Product level.

Field	Description
Save and Close	User will save the information provided and close the details captured. This option will not submit the request.
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment as Sequence B.

3.2.8 Additional Details

As part of DE, the user can verify and enter the basic additional details available in the Guarantee issuance amendment. In case the request is received through online channel, the user verifies the details populated. In the Additional details section, Guarantee /Standby amendment can have impact on the Limits and Collaterals section.

If any of the fields in the financial section of the pop up screen is checked then the limits and collaterals screen will be enabled.

For non-financial and narrative field amendments, the Limits and Collaterals screen will be read only. User cannot make changes.

3.2.8.1 Limit and Collateral

There is change in limits, if the below fields were amendment.

- Increase in Amount
- Increase in Expiry Date

The additional details are displayed as tile. The tiles displays a list of important fields with values. User will be able to drill down from tiles into respective data segments. User can select the tile, an update the respective details.

On Approval, system should not release the Earmarking against each limit line and system should handoff the “Limit Earmark Reference Number” to the back office. On successful handoff, back office will make use of these “Limit Earmark Reference Number” to release the

Limit Earmark done in the mid office (OBTFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

3.2.8.5 Preview Message

The bank user can view a preview of the outgoing SWIFT message and advise simulated from back office.

Note

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number.

The screenshot shows a web application interface for previewing messages. It is organized into a grid of four panels:

- Preview - SWIFT Message:** Includes fields for Language (English), Message Status, Message Type, and Repair Reason.
- Preview - Mail Advice:** Includes fields for Language (English), Message Status, Advice Type, and Repair Reason.
- Draft Confirmation:** Features a 'Draft Confirmation Required' toggle, 'Customer Remarks', and 'Customer Email ID 1' and '2' search fields.
- Legal Verification:** Features a 'Legal Verification Required' toggle, 'Legal Remarks', and 'Verification Date' search field.

At the bottom right, there are two buttons: 'Save & Close' and 'Close'.

The Preview section consists of following.

3.2.8.6 Preview – SWIFT Message

Based on the guarantee amendment captured in the previous screen, the preview message simulated from the back office and the user can view the message.

3.2.8.7 Preview – Mail Advice

Based on the guarantee amendment captured in the previous screen, the preview message-mail advice is simulated from the back office and the user can view the message.

3.2.8.8 Legal Verification Required:

If the guarantee amendment message has to be verified and approved by Legal department before issue, the user can select the option for legal verification.

3.2.8.9 Draft Confirmation Required:

If the guarantee amendment message is to be approved by the customer before issue, then the user has to select the option for draft confirmation.

Field	Description	Sample Values
Preview - SWIFT Message		
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	
Message Status	Read only field. Display the message status of draft message of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of draft message of guarantee details.	
Preview Message	Display a preview of the draft message.	
Preview - Mail Device		
Language	Read only field. English is set as default language for the preview.	
Advice Type	Select the advice type.	
Message Status	Read only field. Display the message status of advice type of guarantee details.	
Repair Reason	Read only field. Display the message repair reason of advice type of guarantee details.	
Preview Message	Display a preview of the advice.	
Draft Confirmation		
Draft Confirmation Required	This toggle enables the user to select if draft confirmation is required or not	
Following fields will have values on receipt of customer response.		
Customer Response	User can enter the response received from customer. If the response is received online, the response is auto populated in this field by the system	
Customer Remarks	Remarks from the customer for the draft	
Response Date	Customer Response received date.	

Field	Description	Sample Values
Customer Email ID 1	Default email address of the customer. System fetches the Email ID from Customer Address maintenance in Back office and auto populates the available Email ID.	
Customer Email ID 2	By default this field is blank. User can search and select the Email ID from lookup from the Customer Email Address field of the customer maintenance in Back Office and replicated in OBTFPM.	

3.2.8.10 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.
Overrides	Click to view overrides, if any.

Field	Description
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(763,767/768).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
View Undertaking	<p>Clicking this button allows the user should to view the undertaking details.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	<p>User should be able to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.</p>
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system and the task may get terminated or moved to Reject Approval Stage.</p>

Field	Description
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	<p>The details provided will be registered and status will be on hold.</p>
Cancel	<p>Cancels the details captured in the screen. The task will get deleted.</p>
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>
Next	<p>On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment as Sequence B.</p>

3.2.9 Settlement Details

As part of DE, the user can enter the basic settlement details available in the Guarantee advise amendment. In case the request is received through online channel i will verify the

The screenshot displays the Oracle Settlement Details interface. At the top, there's a navigation bar with 'ORACLE' and user information. Below it, a breadcrumb trail shows 'Clarification Details', 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', 'Incoming Message', 'View Undertaking', and 'Signatures'. The main content area is titled 'Settlement Details' and includes a table of components. Below the table, there's a detailed view for 'AGLIR_COMM_LIQD - Party Details' with various input fields for transfer type, charges, netting indicators, and ordering customer information.

Component	Currency	Debit/Credit	Account	Account Description	Account Currency	Netting Indicator	Current Event
AGLIR_COM1_LIQD	AED	Debit	0322040001	Air Arabia	AED	No	No
AGLIR_COMM_LIQD	AED	Debit	0322040001	Air Arabia	AED	No	No
AVL_SET_LCAMT	AED	Debit	0322040001	Air Arabia	AED	No	No
AVL_SET_LCAMTEQ	AED	Credit	0322040001	Air Arabia	AED	No	No
CLAIM_CUST_AMT	AED	Debit	0322040001	Air Arabia	AED	No	No
CLAIM_CUST_AMT_FX	AED	Debit	0322040001	Air Arabia	AED	No	No
CLAIM_SETTLE_AMT	AED	Credit	0322070003	Emaar Properties	AED	No	No
COLLAMT_OS	AED	Debit	0322040001	Air Arabia	AED	No	No

COLLAMT_OSEQ_OBP	AED	Credit	0322040001	Air Arabia	AED	No	No

details populated.

Provide the settlement details based on the description in the following

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	System displays the default currency for the component.	
Debit/Credit	System displays the debit/credit indicators for the components.	
Account	System displays the account details for the components.	

Field	Description	Sample Values
Account Description	System displays the description of the selected account.	
Account Currency	System defaults the currency for all the items based on the account number.	
Netting Indicator	System displays the applicable netting indicator.	
Current Event	System displays the current event.	

On click of any component in the grid, the application displays Party Details, Payment Details and Remittance Information.

3.2.9.1 Party Details

Provide the party details based on the description in the following table:

Field	Description	Sample Values
Transfer Type	Select the transfer type from the drop list: <ul style="list-style-type: none"> • Customer Transfer • Bank Transfer for own account • Direct Debit Advice • Managers Check • Customer Transfer with Cover • Bank Transfer 	
Charge Details	Select the charge details for the transactions: <ul style="list-style-type: none"> • Beneficiary All Charges • Remitter Our Charges • Remitter All Charges 	
Netting Indicator	Select the netting indicator for the component: <ul style="list-style-type: none"> • Yes • No 	
Ordering Customer	Select the ordering customer from the LOV.	
Ordering Institution	Select the ordering institution from the LOV.	
Senders Correspondent	Select the senders correspondent from the LOV.	
Receivers Correspondent	Select the receivers correspondent from the LOV.	
Intermediary Institution	Select the intermediary institution from the LOV.	
Account with Institution	Select the account with institution from the LOV.	
Beneficiary Institution	Select the beneficiary institution from the LOV.	
Ultimate Beneficiary	Select the ultimate beneficiary from the LOV.	

Field	Description	Sample Values
Intermediary Reimbursement Institution	Select the intermediary reimbursement institution from the LOV.	
Receiver	Click Search to search and select the receiver.	

3.2.9.2 Payment Details

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Sender to Receiver 1	Provide the sender to receiver message.	
Sender to Receiver 2	Provide the sender to receiver message.	
Sender to Receiver 3	Provide the sender to receiver message.	
Sender to Receiver 4	Provide the sender to receiver message.	
Sender to Receiver 5	Provide the sender to receiver message.	
Sender to Receiver 6	Provide the sender to receiver message.	

3.2.9.3 Remittance Information

Provide the Payment Details based on the description in the following table:

Field	Description	Sample Values
Payment Detail 1	Provide the payment details.	
Payment Detail 2	Provide the payment details.	
Payment Detail 3	Provide the payment details.	
Payment Detail 4	Provide the payment details.	

3.2.9.4 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.

Field	Description
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>
Remarks	<p>Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.</p>
Overrides	<p>Click to view overrides, if any.</p>
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>This button displays the multiple messages (MT767+ up to 7 MT775).</p> <p>Click to allow parsing of MT 767 along with MT775 (up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(763,767/768).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
View Undertaking	<p>Clicking this button allows the user should to view the undertaking details.</p>

Field	Description
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system and the task may get terminated or moved to Reject Approval Stage.
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others
Hold	The details provided will be registered and status will be on hold.
Cancel	Cancels the details captured in the screen. The task will get deleted.
Save and Close	<p>User will save the information provided and close the details captured.</p> <p>This option will not submit the request.</p>
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment as Sequence B.

3.2.10 Summary

User can review the summary of details updated in Data Enrichment Islamic Guarantee Issuance amendment request.

Log in to Oracle Banking Trade Finance Process Management (OBTfPM) system to see the Summary tiles. The tiles must display a list of important fields with values. User can drill down from Summary Tiles into respective data segments.

Tiles Displayed in Summary

- Main - User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Sequence B - User can view the details of the sequence B message if any.
- Sequence C - User can view the details of the sequence B message if any.
- Acknowledgement Details - User can view the acknowledgement details.
- Additional Fields - User can view the details of additional fields, if any.
-
- Amendment Snapshot - User can view the comprehensive fields amended with the previous value and new amended value.
- Advices - User can view the advices details.

Field	Description
Save and Close	User will save the information provided and close the details captured. This option will not submit the request.
Submit	Task will get moved to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

3.2.11 Legal Verification

The Legal verification stage allows the user to review and approved the guarantee message received under a Guarantee Amendment.

Legal Verification may be required for Guarantee amendment based on guarantee text format (standard vs non-standard) and other factors. In case Legal verification is required, this task is created in the system.

As a legal approver, log in to Oracle Banking Trade Finance Process Management (OBTFFPM) system to see the legal verification required tasks for Trade Finance transactions listed in queue. On opening the task, the user views the guarantee text that has to be verified.

3.2.11.1 Application Details

All fields displayed under Application details section, would be read only.

Provide the Application Details based on the description in the following table:

Field	Description
Application Details	
Received From Applicant	Read only field.
Received From - Customer ID	Read only field.
Customer Name	Read only field.
Branch	Read only field.
Currency Code	Read only field.
Amount	Read only field.
Priority	Read only field.

Field	Description
Submission Mode	Read only field.
Process Reference Number	Read only field.
Application Date	Read only field.
Customer Reference Number	Read only field.
Draft Message	
All fields displayed under Draft Message section, would be read only.	
Language	Select the language for the SWIFT message.
Draft Message	Read only field.
Legal Verification	
Legal Verification required	Read only field.
Legal Verification Outcome	The user can update any of the below response based on vetting the guarantee text <ul style="list-style-type: none"> • Accepted • Not accepted - Change and Send for Review Again • Not accepted - Change and Proceed • Pending
Legal Remarks	The user can enter the observation/changes/ remarks to be done to the guarantee text.
Verification Date	The user can enter the date on which the verification was done. The system date will be defaulted and the user can change the same.

3.2.11.2 Tiles Displayed in Summary

- Main Details - User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Party Details - User can view the application details and Guarantee/Standby details. User can modify the details if required.
- Guarantee Details - User can view the Counter Guarantee details and Guarantee text. User can modify the details if required.
- Limits and Collaterals - User can view the limits and collateral details. User can modify the details if required.
- Charges - User can view the charge details. User can modify the details if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction checks.
- Draft Confirmation – User can view the draft guarantee details, legal verification and customer confirmation details. User can modify the details if required.
- Documents - User can view the document details

- Remarks - As a Reject approval user, you will be able to view the remarks captured in the process during earlier stages. User also can see the Reject code with reason for rejection in the Remarks column

3.2.11.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Submit	<p>On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee/SBLC Amendment.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>

3.3 Customer Response - Draft Confirmation

In this section, the user can review and handle the customer's response received for the draft confirmation for Guarantee Amendment transactions, which is sent to the customer for their verification and confirmation. The system sends Draft MT767 along with up to seven MT775 messages as attachment to the customer.

The customer response can be received both by online and offline mode.

In non-online mode, user receives the response in the branch. Log in into OBTFPM application, and open the task to see customer response pending tasks for trade transactions listed in queue. On opening the task, the user views and update the customer response.

In online mode, the customer would receive a mail notification from the bank with a draft of the Guarantee Amendment. The customer can 'Approve' or 'Reject' post reviewing the draft through mail. The customer response will automatically be updated in OBTFPM. Based on the customer response; the task will move to the next stage or are referred to the previous stage for further update.

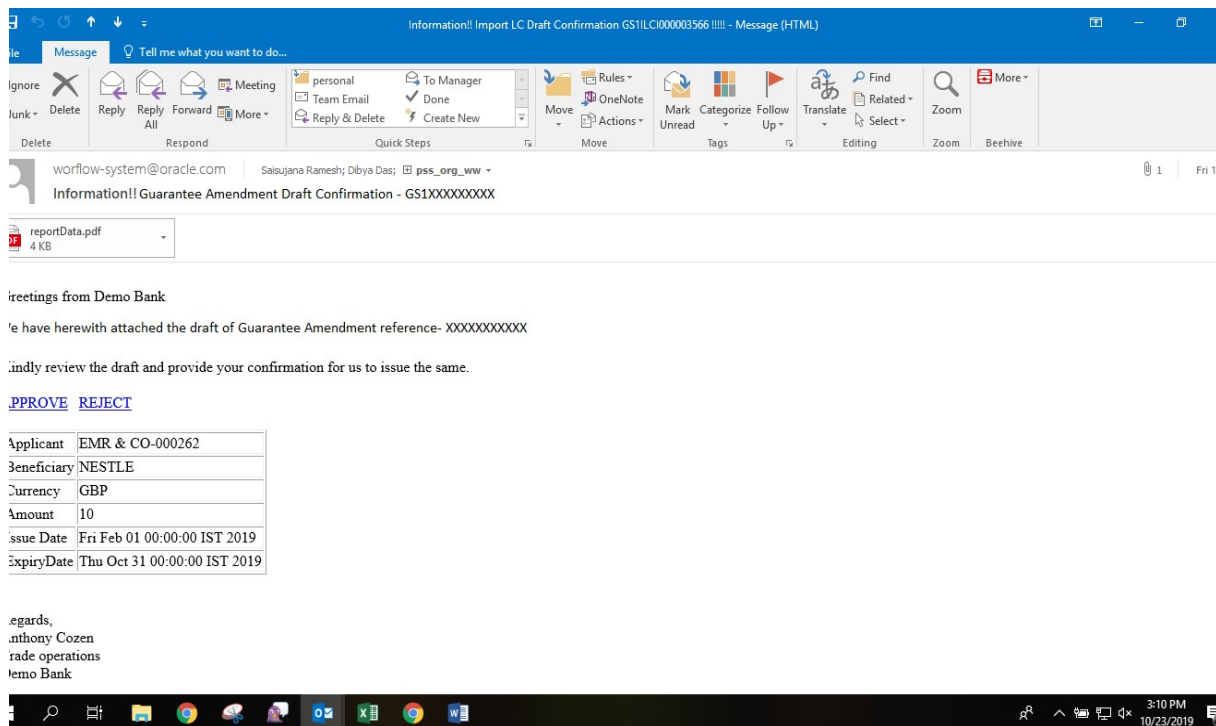

The draft mail will be addressed to a primary contact and a secondary contact. On approval or reject, an acknowledgement will be sent to the primary and secondary contacts confirming receipt of response. As the draft mail is sent to more than one recipients, system to follow the below guidelines to register the customer response.

- Approved from Primary Mail, Rejected from Secondary Mail - Application already Approved from Primary mail
- Approved from Primary Mail, Approved from Secondary Mail - Application already Approved from Primary mail
- Rejected from Primary Mail, Approved from Secondary Mail - Application already Rejected from Primary mail
- Rejected from Primary Mail, Rejected from Secondary Mail – Application already Rejected from Primary mail
- Approved from Secondary Mail, Approved from Primary Mail - Application already Approved from Secondary mail
- Approved from Secondary Mail, Rejected from Primary Mail - Application already Approved from Secondary mail

Rejected from Secondary Mail, Approved from Primary Mail - Application already Rejected from Secondary mail

Rejected from Secondary Mail, Rejected from Primary Mail - Application already Rejected from Secondary mail

Exceptions

The Guarantee Issuance Amendment Islamic request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

3.3.1 Amount Block Exception Approval

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the “Amount Block Reference Number” to the back office. On successful handoff, back office will make use of these “Amount Block

Reference Number” to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off Refer:
- Refer
 - Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account Amount Bock Exception This section will display the amount block exception details

3.3.1.1 Tiles Displayed in Summary

- Main - User can view the application details and Guarantee/Standby details. User can modify the details if required.

3.3.1.5 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Reject	<p>On click of Reject, user must select a reject reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a reject description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance- Limits ● R5 - Others 	
Cancel	Cancel the Amount Block Exception Inputs.	

Field	Description	Sample Values
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	

3.4 Multi Level Authorization

The Approval user can approve a Guarantee Amendment Transaction.

As an approver user, log in into OBTFPM application and open the task to see the summary tiles.

The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to validate the details of all fields under the data segment.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

In case of MT798, on approval the task is handed off to back office system to amend the Guarantee contract and generate the required MT767/768 messages. Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable only in case of to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
