### 3.2.5 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

**Pre- Conditions:**

- Customer Maintenance details are replicated from OBTF to OBTFPM.
  - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
  2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is “Online”.
  3. In case submission mode is “Online”, the user can enter the clarification details in “Clarification Required” placeholder.
  4. In case submission mode is not “Online”, the system will validate if the counterparty is a OBDX customer by checking the flag “Trade Finance Portal” in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification. In case submission mode is not “Online”, and if the “Trade Finance Portal” flag is set to ‘No’ in Customer Maintenance Table, the system should display the error message that ‘The customer is not subscribed to Trade Finance Portal’. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.
