2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1   Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2   Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3   Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

ORACLE®

3. Guarantee SBLC Advised - Claim Settlement Islamic

The claim requested for Guarantee/SBLC can be settled through the Settlement Process.

The various stages involved for Claim Settlement of Guarantee Issued are:

- Receive and verify documents- Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents
- Verify documents and capture details- Data Enrichment stage
- Check balance availability for amount block
- Check for sanctions & KYC status
- Create amount block for charges
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Advice Claim Settlement process flow is similar to that of conventional Guarantee Advice process flow.

This section contains the following topics:.

3.1   Common Initiation Stage

The user can initiate the new settlement for a claim lodged under a Islamic Guarantee/SBLC advised request from the common Initiate Task screen.

3.3.7.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system and the task may be terminated or moved to Reject Approval Stage. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Refer	On click of Refer, user will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others.	

ORACLE®

Field	Description	Sample Values
Hold	The details provided will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	On click of Cancel the user can cancel the task window and return to the dashboard. The data input will not be saved.	
Save & Close	Save the information provided and holds the task in 'My Tasks' for working later. This option will not submit the request	
Back	On clicking Back, system should move the task to the previous segment.	
Submit	On clicking Submit, system validates for all mandatory field values and the task should move to the next logical stage. If the user submits without visiting other mandatory steps, then error message is displayed and force the user to visit mandatory tabs/update mandatory fields.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	
Incoming Message	Clicking this button allows the user should be able to see the message in case of STP of incoming MT 767.	
View Undertaking	Clicking this button allows the user should to view the undertaking details.	

3.4 Multi Level Approval

This stage allows the approver user to approve a Claim settlement under Guarantee Advise Transaction.

The user can view the summary of details updated in multilevel approval stage for Islamic Guarantee Claim Settlement request.

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

ORACLE®

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

3.4.1 Re-Key Authorization

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Claim Amount
- Currency

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

In Approval, the user can view a snapshot of the amendment made to this transaction. Corresponding to the field the current latest Guarantee value and the new amended value should be displayed.

ORACLE®

3.4.1.1 Approval Summary

Tiles Displayed in Summary

Tiles Displayed in Summary

- Main - User can view the application details and Guarantee/ Standby details. User can modify the details if required.
- Advices - User can view the advices details.
- Commission, Charges and taxes - User can view the details provided for commission, charges and taxes. User can modify the details if required.
- Preview Message - User can drill down to view the message preview, legal verification and customer draft confirmation details.
- Payment Details - User can view the payment details.
- Settlement Details – User should be able to view the settlement details.
- Party Details - User can view the party details like beneficiary, advising bank etc.
- Compliance – The compliance tile has the KYC, Sanctions and AML.
- Accounting Details - User can see the accounting details.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.

- Exception(Approval) – User can view the Exception(Approval) details.
- FX Linkage – User can view the FX Linkages.

ORACLE®

3.4.1.2 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a reject reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a reject description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.
