1. Preface

1.1 Introduction

This user manual is designed to help you quickly get acquainted with Import Collection update Booking Islamic process in Oracle Banking Trade Finance Process Management.

1.2 Audience

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 Related Documents

- Getting Started User Guide
- Common Core User Guide
-

1.6 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry

standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 Conventions

The following text conventions are used in this document:

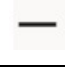

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3. Import Documentary Collection Update Booking - Islamic

Details of Import Documentary Collection can be updated before liquidation, changes can be for Collection amount, Maturity Date, etc. The update can be requested through Online/Offline channels.

The various stages involved for Import Doc Collection update are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents received from the presenting bank
- Verify documents and capture details (Online/Non Online Channels)- Data Enrichment stage
- Input/Modify details of update Collection - Data Enrichment stage
- Check for limit availability if applicable
- Check balance availability for amount block if applicable
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The Islamic Import Doc Collection Update process flow is similar to that of conventional Import Doc Collection Update process flow.

This section contains the following topics:

3.1 Common Initiation Stage	3.2 Registration
3.3 Data Enrichment	3.4 Exceptions
3.5 Multi Level Approval	3.6 Reject Approval

3.1 Common Initiation Stage

The user can initiate the new Islamic import collection update request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.

2. Click Trade Finance > Initiate Task.

The screenshot shows the Oracle Trade Finance 'Initiate Task' registration form. The form has a header with the Oracle logo and 'Initiate Task'. Below the header, there is a 'Registration' section. The 'Process Name' dropdown is set to 'Islamic Export Documentary Coll...' and the 'Branch' dropdown is set to 'PK2-Oracle Banking Trade Finan...'. At the bottom right, there are two buttons: 'Proceed' and 'Clear'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

3.1.0.1 Action Buttons

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

3.2 Registration

User can register request for an Islamic Import Doc Collection Booking Update at the front desk (as an application received physically/Courier). During Registration stage, user can capture the basic details of the transaction, check the signature of the applicant and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

- Using the entitled login credentials for registration stage, login to the OBTFPM application.

The image shows the 'FuTura Bank Sign In' screen. It features a dark blue header with the FuTura Bank logo and the text 'FuTura Bank' in white. Below the header, the text 'Sign In' is displayed. There are two input fields: 'User Name *' containing the text 'SRIDHAR' and 'Password *' containing a series of dots. At the bottom, there are two buttons: a green 'Sign In' button and a white 'Cancel' button.

- On login, user must be able to view the dashboard screen with widgets as mapped to the user profile.

The image shows the FuTura Bank Dashboard. The dashboard is titled 'Dashboard' and includes a sidebar with navigation options: Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main content area displays several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'. Data rows include EMR & CO (25-06-2018), NA (25-06-2018), and NA (21-06-2018).
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes Bank Futura, NA, and Retry HandOf.
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data rows include Bank Futura, NA, Amount Bio, Bank Futura, NA, Amount Bio, 004, NA, and Loan Applic.
- High Value Transactions:** A bubble chart showing transactions for GBP. The y-axis ranges from -20K to 140K, and the x-axis ranges from -2 to 12. There are several blue bubbles of varying sizes.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Prior'. Data rows include NA (23474, H, KEERTIV01), HSBC BANK (26667, M, SHUBHAM), WALL MART (23495, SHUBHAM), and EMR & CO (26780, M, GOPINATH01).
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes 203, Cucumber Testing, and test descrip.
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes Cucumber Testing.
- Tasks Detailed:** A table with columns 'Process Reference Number' and 'Proc'.

3. Click Trade Finance - Islamic > Import Documentary Collection > Import Documentary Collection Update - Islamic.

The screenshot displays the Oracle Trade Finance - Islamic application interface. On the left is a dark navigation menu with options like 'Completed Tasks', 'Free Tasks', 'Hold Tasks', 'My Tasks', 'Search', 'Supervisor Tasks', 'Trade Finance', and 'Trade Finance - Islamic'. The main content area shows several components:

- Pending Exception Approval (0)**: A header for a section with a vertical bar chart.
- Hand-off Failure**: A table with columns 'Process Reference Number', 'Branch', and 'Process Name'. It lists two entries with reference numbers PK2GTAI000010963 and PK2GTAI000010961, both under branch PK2.
- Draft Confirmation Pending**: A table with columns 'Process Reference Number' and 'Customer Id'. It shows 'No data to display' and a page indicator 'Page 1 (0 of 0 items)'.
- SLA Status Summary**: A donut chart showing a value of 247.

The Registration stage has two sections Application Details and Collection Details. Let's look at the details of Registration screens below:

3.2.1 Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values

Cancel	<p>Cancels the Import Documentary Collection Booking Task. Details entered will not be saved and the task will be removed.</p>	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

3.2.4 **Bi-Directional Flow for Offline Transactions Initiated from OBTFPM**

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online".
 3. In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

3.3 **Data Enrichment**

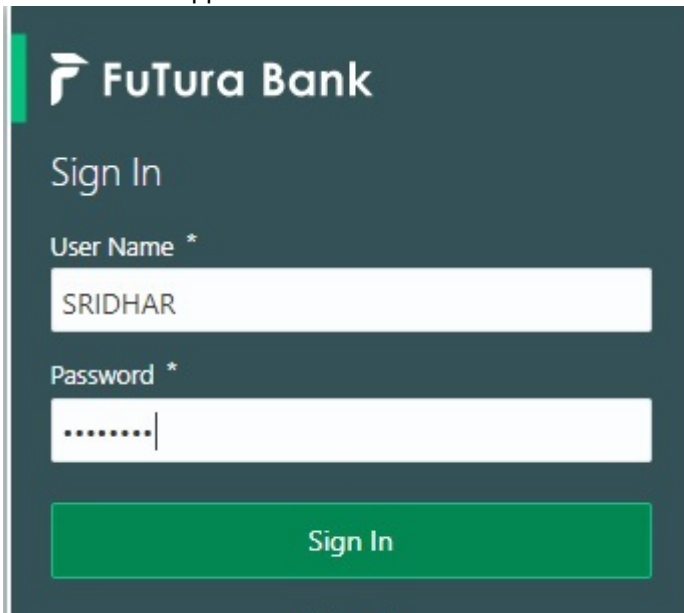

On successful completion of registration of an Import Collection Update Booking, the request moves to Data Enrichment stage. A DE user can input Islamic Import Doc Collection update. As part of data enrichment, user can enter/update basic details of the incoming request.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Data Enrichment stage:

- Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

The image shows the login interface for FuTura Bank. It features a dark blue header with the FuTura Bank logo and the text 'FuTura Bank'. Below the header, the text 'Sign In' is displayed. There are two input fields: 'User Name *' with the value 'SRIDHAR' and 'Password *' with masked characters. A green 'Sign In' button is located at the bottom of the form.

- On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The image shows the dashboard for FuTura Bank. The dashboard is titled 'Dashboard' and includes a sidebar with navigation options: Core Maintenance, Dashboard, Maintenance, Tasks, and Trade Finance. The main content area displays several widgets:

- Draft Confirmation Pending:** A table with columns 'Customer Name' and 'Application Date'. Data rows include 'EMR & CO' (25-06-2018), 'NA' (25-06-2018), and 'NA' (21-06-2018).
- Hand-off Failure:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes 'Bank Futura', 'NA', and 'Retry HandOf'.
- Priority Details:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data rows include 'Bank Futura', 'NA', 'Amount Blo', 'Bank Futura', 'NA', 'Amount Blo', and '004', 'NA', 'Loan Applic'.
- High Value Transactions:** A bubble chart showing transactions for GBP. The y-axis ranges from -20K to 140K, and the x-axis ranges from -2 to 12. There are several large blue bubbles clustered around x=4 and y=100K.
- SLA Breach Details:** A table with columns 'Customer Name', 'SLA Breached(mins)', and 'Priority'. Data rows include 'NA' (23474, H, KEERTIV01), 'HSBC BANK' (26667, M, SHUBHAM), 'WALL MART' (23495, SHUBHAM), and 'EMR & CO' (26780, M, GOPINATH01).
- Priority Summary:** A table with columns 'Branch', 'Process Name', and 'Stage Name'. Data row includes '203', 'Cucumber Testing', and 'test descrip'.
- Hold Transactions:** A table with columns 'Branch', 'Process Name', and 'Stage Name'.
- SLA Status:** A widget showing 'Cucumber Testing'.
- Tasks Detailed:** A widget showing 'Cucumber Testing'.

3. Click **Tasks > Free Tasks.**

The Data Enrichment stage has sections as follows:

- Main Details
- Document Details

- Other Details
- Shipment Details
- Maturity Details
- Additional Fields
- Advices
- Updated Details
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields in Application Details that are already having value from registration/online channels may not be editable.

3.3.1 Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

3.3.1.1 Application Details

All fields displayed under Basic details section, would be read only except for the **Priority** and **Submission Mode** fields. Refer to [3.2.1 Application Details](#) for more information of the fields.

3.3.1.2 Collection Details

The fields listed under this section are same as the fields listed under the [3.2.2 Collection Details](#) section in [3.2 Registration](#). Refer to [3.2.2 Collection Details](#) for more information of the

fields. During Registration, fields that were not captured during Registration can be updated in Data Enrichment stage.

Note

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same. (Display only field if Submission mode is Online.

3.3.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Back	On click of Back, system moves the task back to previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Request Clarification	User should be able to specify the clarification details for requests received online.	

3.3.2 Document Details

This section enables the user to enter/ update Documents and conditions details for Islamic Import Collection Update.

As part of document details screen in DE stage the user can capture the Transport Document reference and document date. On click of 'Next' system should validate the value in Document Reference field against the transport document/Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.

System to display an override if the Bill Of Lading reference mentioned in the document details screen matches with that of the Bill of Lading reference in any of the unlinked Shipping Guarantees issued for the customer.

Field	Description	Sample Values
Carrier Name	Provide the details of the carrier as per the documents received, if the goods were shipped via multiple carriers.	
Port	Provide the port details as per the document received, if the ship has transit on its way to the destination.	
Action	Click Edit icon to edit the Carrier name and port. Click Delete icon to delete the record.	

3.3.4.4 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

Field	Description	Sample Values
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Back	On click of Back, system moves the task back to previous data segment.	

Field	Description	Sample Values
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Request Clarification	User should be able to specify the clarification details for requests received online.	

3.3.5 Maturity Details

A Data Enrichment user can enrich the maturity details for Islamic Import Collection Update.

3.3.5.1 Draft Details

Update the draft details based on the description in the following table:

Field	Description	Sample Values
Draft Code	Update the draft code. Alternatively, user can search the draft details using LOV.	
Draft Amount	Update the draft amount.	
Action	Click Edit icon to edit the draft code. Click Delete icon to delete the draft code.	

3.3.5.2 Maturity and Multi Tenor Liquidation Details

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
SNo.	Serial number of the tenor record.	
Tenor Basis	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.	
Tenor Description	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.	
Start Date	Select the start date.	

Field	Description	Sample Values
Tenor Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.	
Transit Days	Provide the tenor basis. This field is disabled if the Tenor Type is 'Both'.

Field	Description	Sample Values
Cash Collateral Details		
Collateral Percentage	Specify the percentage of collateral to be linked to this transaction.	
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.	
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.	

Click + plus icon to add new collateral details.

Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.

Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.	
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.	

Field	Description	Sample Values
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.	
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.	
Collateral Contribution Amount	Collateral contribution amount will get defaulted in this field. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.	
Settlement Account	This field displays the details of settlement account for the collateral.	
Settlement Account Currency	This field displays the Settlement Account Currency.	
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.	
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.	
Account Available Amount	Account Available Amount will be auto-populated based on the Settlement Account selected.	
Response	Response can be 'Success' or 'Amount not Available'. System populates the response on clicking the Verify button.	
Response Message	Detailed Response message. System populates the response on clicking the Verify button.	
Verify	Click to verify the account balance of the Settlement Account.	
Save & Close	Click to save and close the record.	
Cancel	Click to cancel the entry.	

Below fields appear in the **Cash Collateral Details** grid along with the above fields.

Field	Description	Sample Values
Collateral %	<p>User must enter the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message.</p> <p>System defaults the collateral % maintained for the customer into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product.</p> <p>User can modify the defaulted collateral percentage, in which case system should display an override message "Defaulted Collateral Percentage modified".</p>	
Contribution Amount	<p>This field displays the collateral contribution amount.</p> <p>The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.</p>	
Account Balance Check Response	This field displays the account balance check response.	
Delete Icon 	Click minus icon to remove any existing Collateral Details.	
Edit Link	Click edit link to edit any existing Collateral Details.	

Note

This section is applicable only for the bills that are co-accepted.

Deposit Linkage Details

In this section which the deposit linkage details is captured.

System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/ modification of existing Linkage by calling Back-office system (DDA) system directly.

This section displays the commission details:

Field	Description	Sample Values
Event	Read only field. This field displays the event name.	
Event Description	Read only field. This field displays the description of the event.	
Component	This field displays the commission component.	

Field	Description	Sample Values
Rate	<p>Defaults from product.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified Rate	<p>From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.</p>	
Currency	<p>Defaults the currency in which the commission needs to be collected</p>	
Amount	<p>An amount that is maintained under the product code defaults in this field.</p> <p>The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>	
Modified	<p>From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.</p>	
Defer	<p>If check box is selected, charges/commissions has to be deferred and collected at any future step.</p>	
Waive	<p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>	
Charge Party	<p>Charge party will be 'Applicant' by Default. You can change the value to Beneficiary</p>	
Settlement Account	<p>Details of the Settlement Account.</p>	
Amendable	<p>The value is auto-populated as the commission can be amended or not.</p>	

3.3.9.2 Charge Details

Field	Description	Sample Values
Component	Charge Component type.	
Tag Currency	Defaults the tag currency in which the charges have to be collected.	
Tag Amount	Defaults the tag amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	
Billing	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can not select/de-select the check box if it is de-selected by default.</p>	
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can select/de-select the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>	
Waive	<p>If charges have to be waived, this check box has to be selected.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>	
Charge Party	Charge party will be applicant by default. You can change the value to beneficiary	
Settlement Account	Details of the settlement account.	

The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

This section displays the tax details:

Field	Description	Sample Values
Component	Tax Component type	
Type	Type of tax Component.	
Value Date	This field displays the value date of tax component.	
Currency	The tax currency is the same as the commission.	
Amount	The tax amount defaults based on the percentage of commission maintained. User can edit the tax amount, if required.	
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.	
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

3.3.9.3 Message Preview

This section displays the preview message of MT412, if acceptance is involved.

The screenshot displays a 'Message Preview' window with two main sections: 'Preview - SWIFT Message' and 'Preview - Mail Advice'. Each section contains dropdown menus for 'Language' and 'Message Type', and text boxes for 'Message Status' and 'Repair Reason'. The 'Preview Message' area shows a detailed view of a SWIFT message, including fields like DATE (03-AUG-23), BRANCH ID, BRANCH NAME, BANK TRN (100282764800003), and TRANS TIME. The interface also includes 'Save & Close' and 'Close' buttons at the bottom right.

Field	Description	Sample Values
Preview - SWIFT Message		

Field	Description	Sample Values
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	
Message Status	Read only field. Display the message status of draft message of collection details.	
Repair Reason	Read only field. Display the message repair reason of draft message of collection details.	
Preview Message	Display a preview of the draft message.	
Preview - Mail Device		
Language	Read only field. English is set as default language for the preview.	
Advice Type	Select the advice type.	
Message Status	Read only field. Display the message status of draft message of collection details.	
Repair Reason	Read only field. Display the message repair reason of draft message of collection details.	
Preview Message	Display a preview of the advice.	

3.3.9.4 FX Linkage

This section enables the user to link the existing FX contract(s) to the bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.

- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Provide the FX linkage detail based on the description in the following:

Linkage

FX Linkage +

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Total Utilized Amount	FX Expiry Date	Action

Modified Rate	This field displays the modified rate.	

Field	Description	Sample Values
Special Pricing Reference Number	<p>Specify the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component).</p> <p>Special Pricing Reference is not applicable for Penal Interest components.</p> <p>For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same.</p> <hr/> <p style="text-align: center;">Note</p> <p style="text-align: center;">System displays an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.</p>	
Currency	System defaults the Interest currency in this field.	
Interest Amount	User can input the interest amount, in case the Rate Type is Special , else user can not be able to input the amount. In such cases, the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.	
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.	
Charge Party	<p>System displays the Charge Party based on the type of transaction.</p> <p>In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills..</p>	

Field	Description	Sample Values
Settlement Account	<p>System defaults the Settlement Account of the Charge Party for debit of Interest. User can change the value. System should display an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override.</p> <p>In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTfPM)..</p>	
Settlement Currency	This field displays the settlement account currency.	
Settlement Branch	This field displays the settlement account branch.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	
Documents	<p>Click the Documents icon to View/Upload the required documents.</p> <p>Application will display the mandatory and optional documents.</p> <p>The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>	
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>	
Overrides	Click to view the overrides accepted by the user.	

Field	Description	Sample Values
Customer Instructions	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> ● Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View Collection	Enables the user to view the latest collection values displayed in the respective fields.	
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>	
Back	On click of Back, system moves the task back to previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update.</p> <p>This option will not submit the request.</p>	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	

Field	Description	Sample Values
Refer	<p>User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. 	
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> ● R1- Documents missing ● R2- Signature Missing ● R3- Input Error ● R4- Insufficient Balance/Limits ● R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Request Clarification	<p>User should be able to specify the clarification details for requests received online.</p>	

3.3.10 Settlement Details

A Data Enrichment user can enter basic settlement details available in the Islamic Import Collection Update. In case the request is received through online channel user can verify the

Request Clarification	User should be able to specify the clarification details for requests received online.	

3.4 Exceptions

The Islamic Import Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

3.4.1 Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

3.4.1.1 Amount Bock Exception

This section will display the amount block exception details.

3.4.1.2 Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Document Details - User can view the document details.
- Other Details - User can view the other details.
- Shipment Details - User can view the shipment details.

- Updated Details - User can view the updated details.

3.4.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	<p>On click of reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>	
Hold	<p>The details provided will be registered and status will be on hold.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>	
Refer	<p>User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	<p>Cancel the Import Collection Update Booking Amount Block Exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	
Back	<p>Task moves to previous logical step.</p>	

3.4.2 Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions will be listed in your queue. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

3.4.3 **Exception - Limit Check/Credit**

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

3.4.3.1 **Limit/Credit Check**

User must select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others 	
Cancel	<p>Cancel the Import Collection Update Booking Limit exception check.</p>	
Approve	<p>On approve, application must validate for all mandatory field values, and task must move to the next logical stage.</p>	

Field	Description	Sample Values
Back	Task moves to previous logical step.	

3.5 Multi Level Approval

A User can view the summary of details updated in multilevel approval stage of Import Collection update request. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving. User sees the summary tiles. The tiles should display a list of important fields with values. Use can also drill down from summary Tiles into respective data segments where user can verify the details of all fields under the data segment.

On successful Handoff, system triggers TRFB event in the Back office.

Note

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

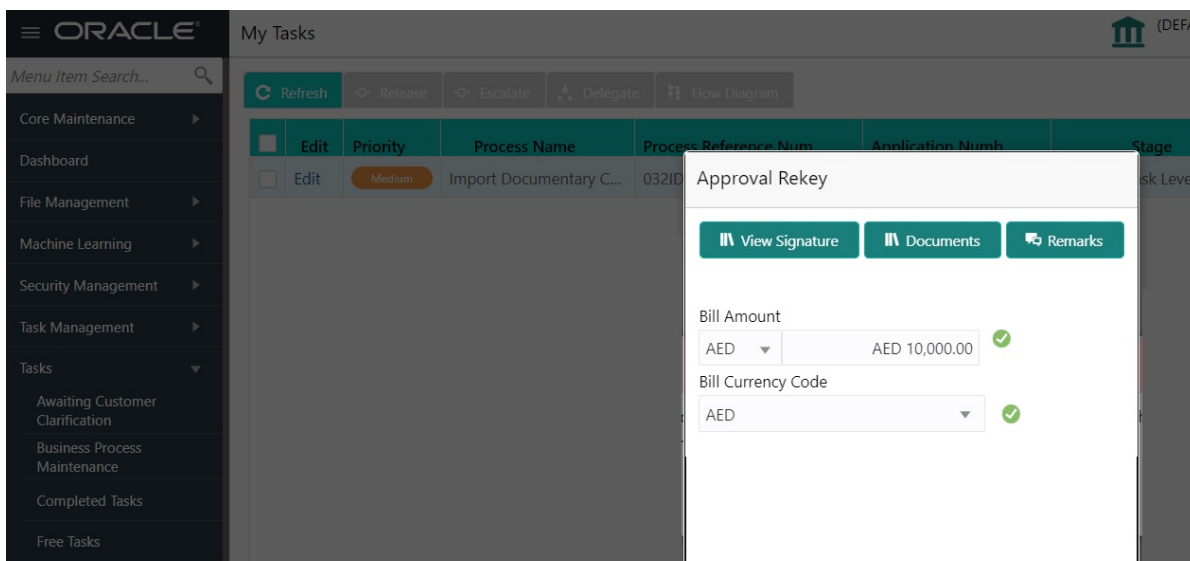

3.5.1 Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
