Overview

2.1 About Post Sanction Process

In **OBCFPM**, the PSN process is run manually to complete the post approval and pre disbursement activities as stipulated during the approval of the credit process.

For existing customers, the PSN process must be initiated in the following scenarios:

- New credit proposal
- Amendment to existing proposal

Facility can be released partially or completely based on the requirement. Once the application is created, the same must go through different stages for approval from different teams.

The Post Sanction process explained in this user manual is a model flow. Banks can configure the data segments to appear in various stages of the process flow based on their requirement as part of implementation. The stages available in the Post Sanction Process are:

- Docket Generation
- Document Execution
- Business Head Review
- Document Officer Review
- Legal Check (Optional)
- Final Check
- Limit Activation

3

Docket Generation

This stage acts as the initiation stage for the PSN process where the Document Officer must upload the necessary customer documents for evaluation and mark the facility for release with the Credit Proposal application details as gold copy.

The following table provides a high level overview about the Docket Generation stage in PSN process.

8. Click **Next**, **Business** window appears:

Figure 3-41 Business

9. Click **Submit**, **Checklist** window appears:

Figure 3-42 Checklist

The screenshot shows a 'Submit' window with a progress bar at the top. The progress bar has three steps: 'Policy exceptions' (step 1), 'Business' (step 2), and 'Checklist' (step 3). The 'Checklist' step is currently active. Below the progress bar, there is a text area that says 'No items to display.' and a pagination control showing 'Page 1 (0 of 0 items)'. There are 'Back' and 'Next' buttons on the progress bar. At the bottom right, there is a dropdown menu for 'Outcome' set to 'Proceed' and a 'Submit' button.

In case the checklist is configured for verification in the Maintenance module, the same appears in the above window. You have to manually ensure the checklist and enable check box.

10. Select **Outcome** as **Proceed**.
11. Click **Submit**.
The PSN application is moved to **Document Execution** stage on clicking **Submit**.

4

Document Execution

In this stage, the Relationship Manager or the Credit Manager can review the documents added in Docket Generation stage and also add additional documents if any. In addition, the Release Amount specified in the Docket Generation stage can be modified, new facility can be marked for release or the facilities already marked for release can be removed from release.

The following table provides a high level overview about the **Document Execution** stage in PSN process.

Document Upload

10.1 Document Upload and Checklist

In **OBCFPM**, supporting documents such as balance sheets and collateral documents can be uploaded in any stage of PSN process. Supporting documents help the senior officers in bank to accurately evaluate the credit worthiness of the organization and approve the application. Documents added for the PSN process can be removed whenever the document becomes invalid.

Steps to upload documents

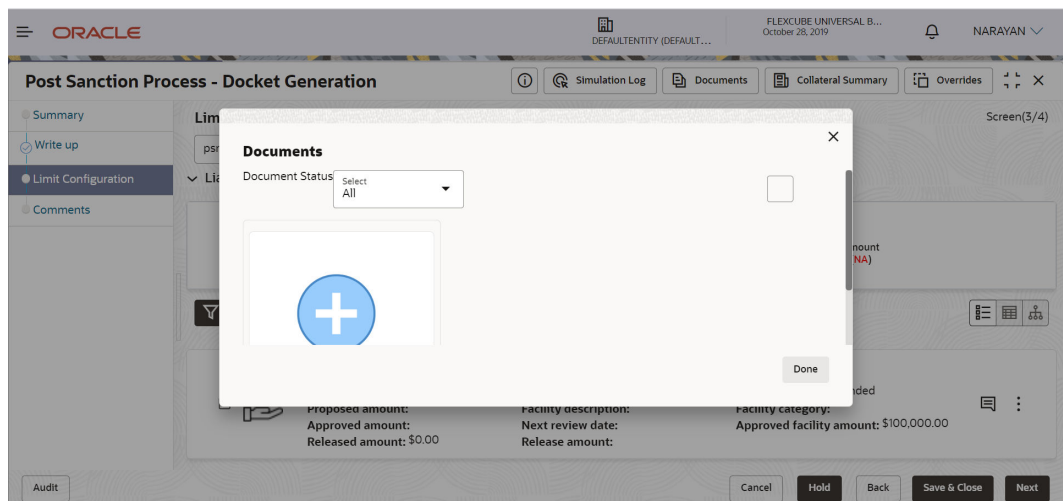

1. Click
