## Overview

### 2.1 About Credit Proposal

**OBCFPM** Credit proposal is a process to evaluate customers on the basis of their financial and non financial parameters and determine their credit worthiness.

### 2.2 Credit Proposal Stages

In **OBCFPM**, credit proposal application is passed through different stages from proposal initiation to hand over of liability, facility, collateral and covenants to Back office. Each of these stages can either be performed by the same or a different banking personnel based on the bank's structure.

 **Note:**

The Credit Proposal Origination process explained in this user manual is a model flow. Banks can configure the data segments to appear in various stages of the process flow based on their requirement as part of implementation.

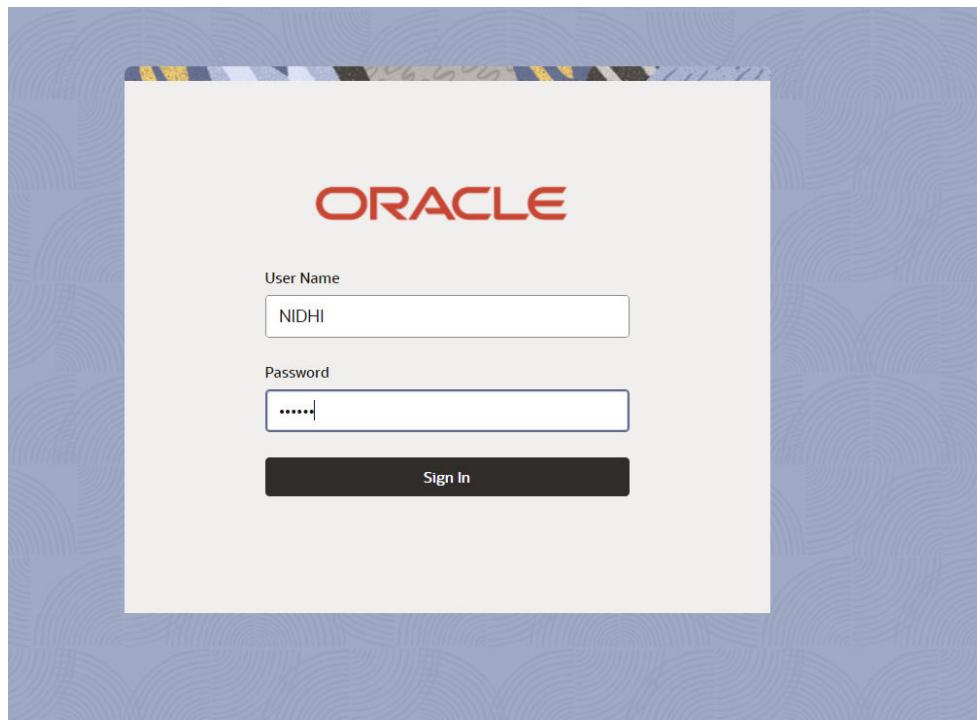

## Proposal Initiation

In this stage, the RM captures basic details about the customer and initiates the credit application process after discussing the credit proposal with a new customer. The RM can perform the following activities in this stage.

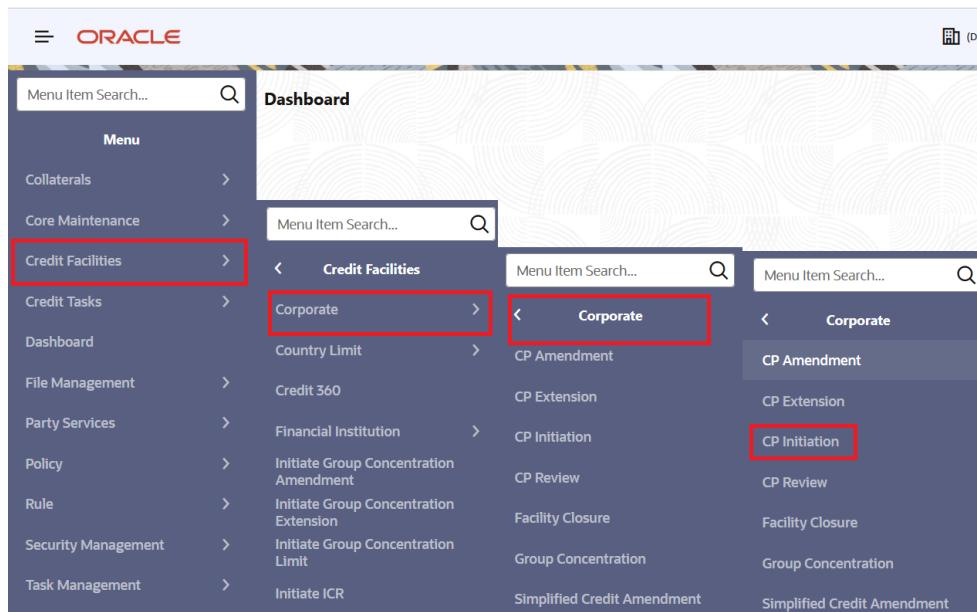

Activities that can be performed by user
<ul style="list-style-type: none"><li>• Capture customer basic information<ul style="list-style-type: none"><li>– Basic demographic details</li><li>– Sector to Sub Industry details</li><li>– Rating details</li></ul></li><li>• Capture other Bank details<ul style="list-style-type: none"><li>– Facilities availed</li></ul></li><li>• Capture connected party details</li><li>• Capture write up about customer</li><li>• Capture funding sought</li><li>• Capture collateral offered by customer</li><li>• Capture comments</li><li>• Upload customer documents</li></ul>

# Proposal Structuring

In this stage, the Credit manager structures the proposal in terms of quantum of funding, type of products/funding to be extended, and pricing, T&C, covenants, collateral/margin etc. to be applied based on the scoring generated in the risk, legal and credit evaluation stages, collateral value and information captured in the previous stages. In addition, the user can also structure the availability of funds between the parent and the child customers.

The following table provides high level overview about the **Proposal Structuring** stage.

# Proposal Review

This is a **Checker** stage in the work flow. In this stage, the senior member of the credit team reviews the application and verifies if it is as per the banks policies. The user will have the option to send the application back to the previous stages in case any additional information is required or if the proposal needs any modification. If all the conditions are satisfied, the proposal is sent to the approving authority for approval.

The following table provides high level overview about the **Proposal Review** stage.

## Proposal Handoff

### 13.1 Handoff to Back Office System

The proposal is automatically handed off to the back office system for customer creation, if the outcome of the previous stage is Proceed. If the automatic handoff fails, the proposal is sent to the **Handoff - Manual Retry** stage.

Refer [Handoff - Manual Retry](#) section for information on the manual retry stage.

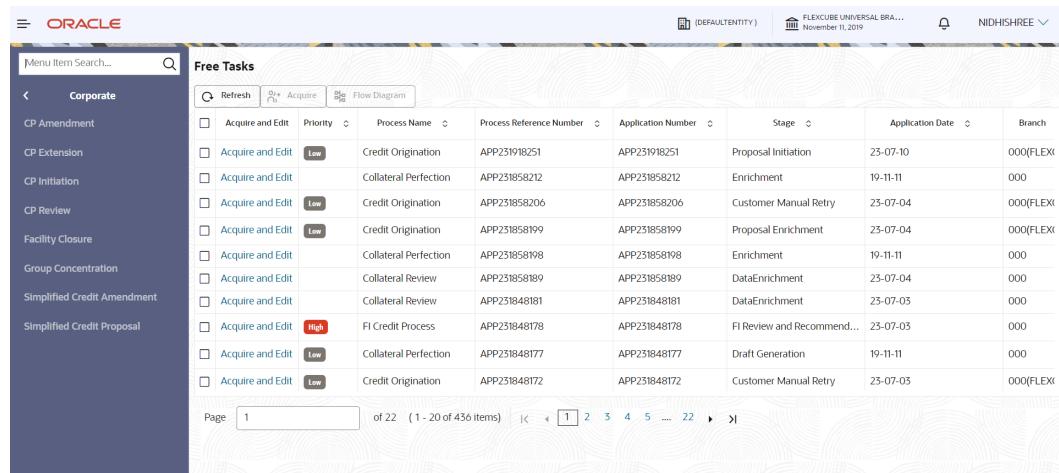

### 13.2 Handoff - Manual Retry

To manually Handoff the proposal to the Back Office System, perform the following steps:

1. In **OBCFPM**, navigate to **Tasks > Free Tasks**.

The **Free Tasks** page is displayed.

## Document Upload and Checklist

In **OBCFPM**, supporting documents such as balance sheets and collateral documents can be uploaded in any stage of credit proposal process. Supporting documents help the senior officers in bank to accurately evaluate the credit worthiness of the party and approve the proposal. Documents added for the proposal can be removed whenever the document becomes invalid.

### Steps to upload documents

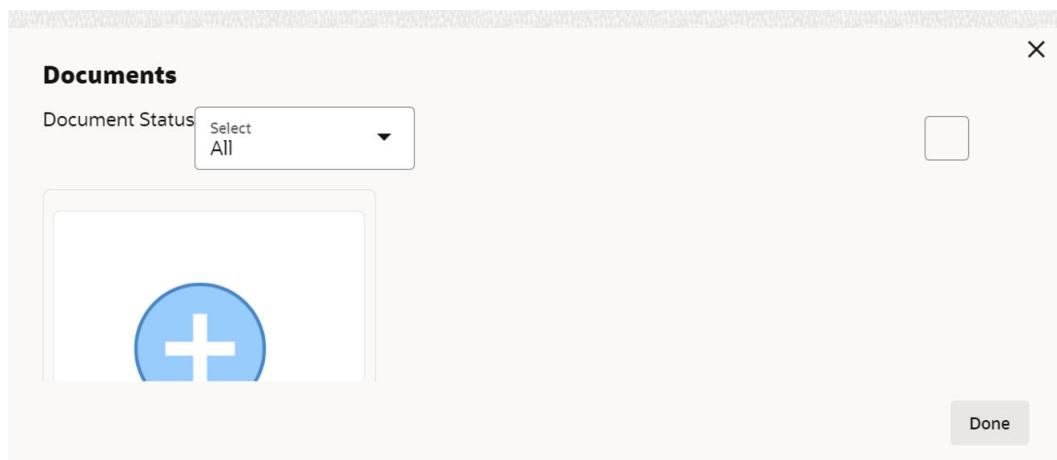

1. Click **Documents** Icon at the top right corner of any page.

**Figure 14-1 Documents**

The **Documents** window is displayed.

**Figure 14-2 Documents**

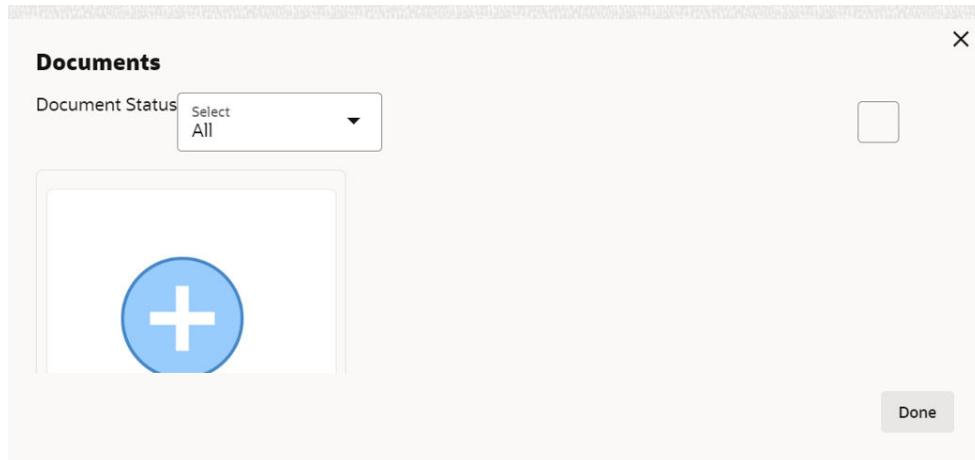

If the document list is configured in **Business Process Maintenance**, the same appears in the above window. You can also click the **Add** icon to upload other documents.

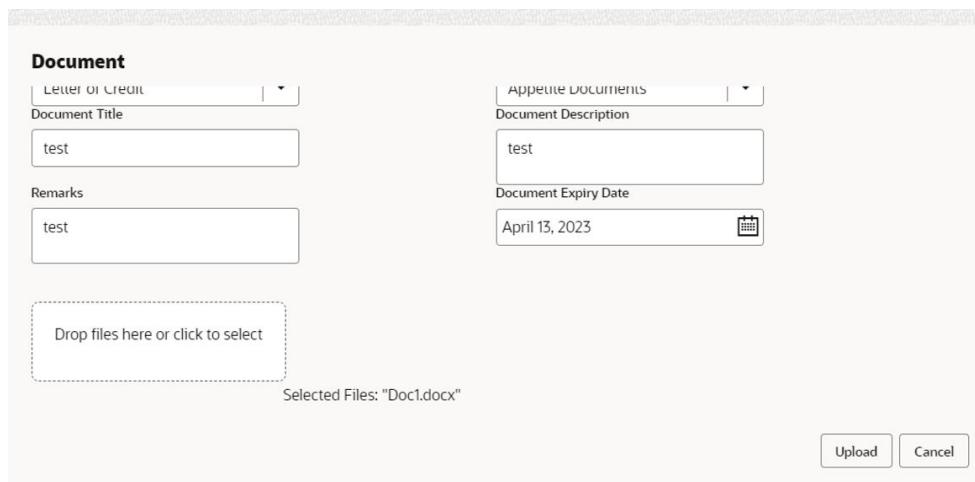

In case the mandatory document is not uploaded, the system prompts an alert. You need to upload the necessary documents and proceed further.

2. To change the table view to the list view, click the list icon at the top right corner. The **Documents** window appears as shown below.

The **Documents** window is displayed.

## Business Overrides

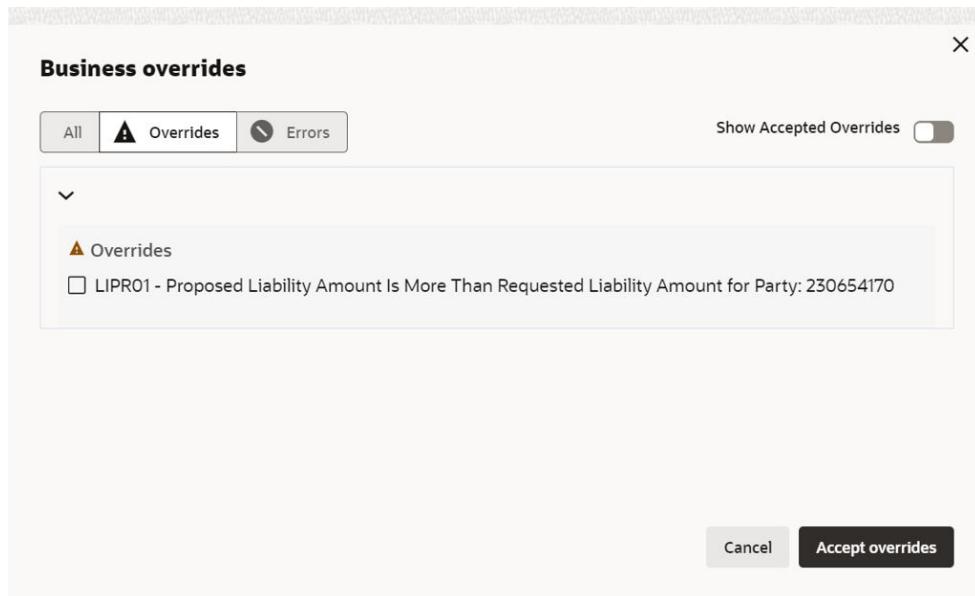

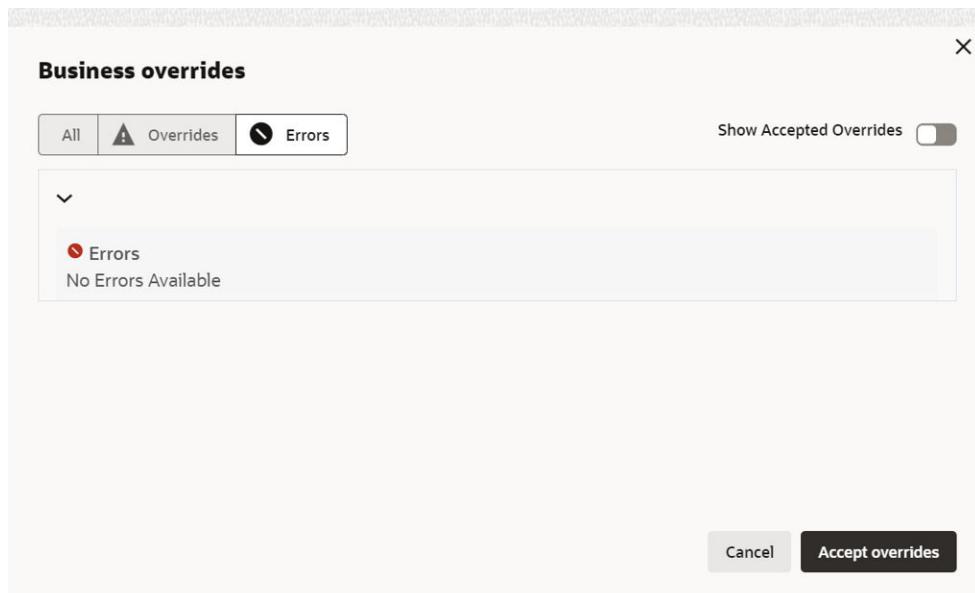

The system generates overrides to alert the user whenever there is a discrepancy in the requested, proposed and approved amounts based on configuration. The user authorized to approve the override must acquire the task and then view and accept the overrides in order to proceed further with the process.

**Business Overrides** can be viewed before or during submitting the task.

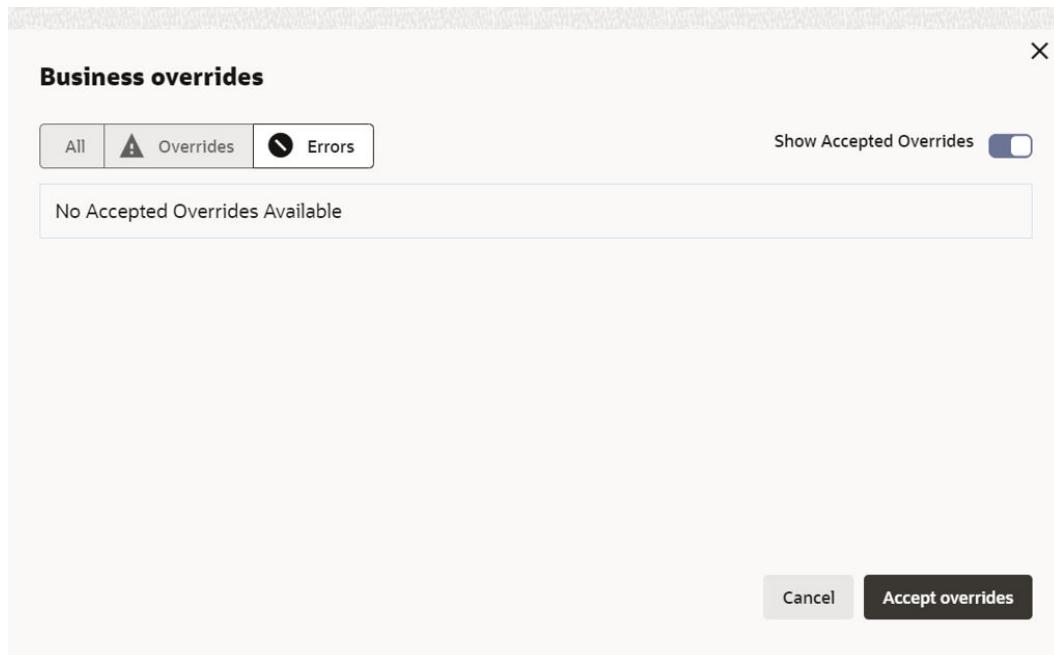

1. Click **Overrides** at the top right corner to view the business overrides after capturing the limit amounts.

**Figure 15-1 Business Overrides**

**Figure 15-2 Business Overrides****Figure 15-3 Business Overrides**

2. Click **Submit** and navigate to the **Business** data segment to view the business overrides in the **Submit** window.

**Figure 15-4 Submit**

After the authorized user accepts the overrides, the override status is changed to **Accepted Overrides** as shown in the above screenshot.

If the business override is generated in the **Approval** stage, the other user authorization is not required. The approver can directly accept the overrides and proceed with the application.
