1. Preface

1.1 Introduction

This user manual is designed to help you quickly get acquainted with Guarantee Issuance Amendment - Beneficiary Consent - Islamic process in Oracle Banking Trade Finance Process Management.

1.2 Audience

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 Related Documents

- Getting Started User Guide
- Common Core User Guide

1.6 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry

standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3. Guarantee Issuance Amendment - Beneficiary Consent - Islamic

As part of Guarantee Issuance Amendment, the amendments may need consent from the beneficiary of the amendment and the amended Guarantee is parked awaiting beneficiary consent. Once the Beneficiary has accepted the amendment, the Guarantee amendment Confirmation will be triggered.

The various stages involved for Islamic Guarantee Issuance Amendment Beneficiary Consent are:

- Input data and Upload of related mandatory and non-mandatory documents in Registration stage
- Input/Modify details of amendment of Guarantee - Data Enrichment stage
- Capture remarks for other users to check and act
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office for amendment confirmation

The design, development and functionality of the Islamic Guarantee Issuance Amendment Beneficiary Consent process flow is similar to that of conventional Guarantee Issuance Amendment Beneficiary Consent process flow.

This section contains the following topics:

[3.1 Common Initiation Stage](#)

[3.3 Data Enrichment](#)

[3.2 Registration](#)

[3.4 Exceptions](#)

3.1 Common Initiation Stage

The user can initiate the new Islamic Guarantee Issuance Amendment Beneficiary Consent request from the common Initiate Task screen.

1. Using the entitled login credentials, login to the OBTFPM application.
2. Click **Trade Finance > Initiate Task**.

The screenshot shows the Oracle OBTFPM application interface. On the left is a dark sidebar with a navigation menu. The 'Initiate Task' option is highlighted. The main content area is titled 'Initiate Task' and shows a 'Registration' form. The form has two main fields: 'Process Name' with a dropdown menu showing 'Islamic Guarantee Issuance Ame...' and 'Branch' with a dropdown menu showing 'PK2-Oracle Banking Trade Finan...'. At the top right of the main area, there is a header bar with user information: 'ZARTI subham@gmail.com' and a notification bell icon. At the bottom right of the form area, there are two buttons: 'Proceed' and 'Clear'.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

3.1.0.1 **Action Buttons**

Use action buttons based on the description in the following table:

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

3.2 **Registration**

During Registration stage, user can register the Beneficiary's response for the amendment to the Guarantee. User can enter the basic details of the response, check the signature of the signatory from the advising bank and upload the related documents.

The OBTfPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTfPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTfPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.	

3.4 Exceptions

The Guarantee Amendment Beneficiary Consent Islamic request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

3.4.1 Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

3.4.1.1 Amount Bock Exception

This section will display the amount block exception details.

3.5.0.4 **Action Buttons**

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	
Remarks	Click the Remarks icon to view the remarks captured as part of Registration stage and also can input Remarks, which can be seen by other users.	
Overrides	Click to view overrides, if any.	
Customer Instruction	Click to view/ input the following • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
View Undertaking	Clicking this button allows the user to view the undertaking details.	
View Events	Clicking this button allows the user to view the various events under the Guarantee amendment details.	

Field	Description	Sample Values
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Cancel the Guarantee Issuance under beneficiary consent approval.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.	

3.5.0.5 Acceptance Criteria

As a OBTFPM user, the user can capture the beneficiary consent received for an Amendment of Guarantee/ SBLC to the beneficiary.
