2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

ORACLE®

3. Import LC Amendment - Beneficiary Consent

Import LC Amendment - Beneficiary Consent process enables the user to register the beneficiary consent response received for an amendment made to a LC.

This section contains the following topics:

3.1   Common Initiation Stage

The user can initiate the new import LC amendment beneficiary consent request from the common Initiate Task screen.

1.   Using the entitled login credentials, login to the OBTFPM application.

2.   Click **Trade Finance > Initiate Task.**

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

ORACLE®

3.1.0.1 Action Buttons

Use action buttons based on the description in the following table:
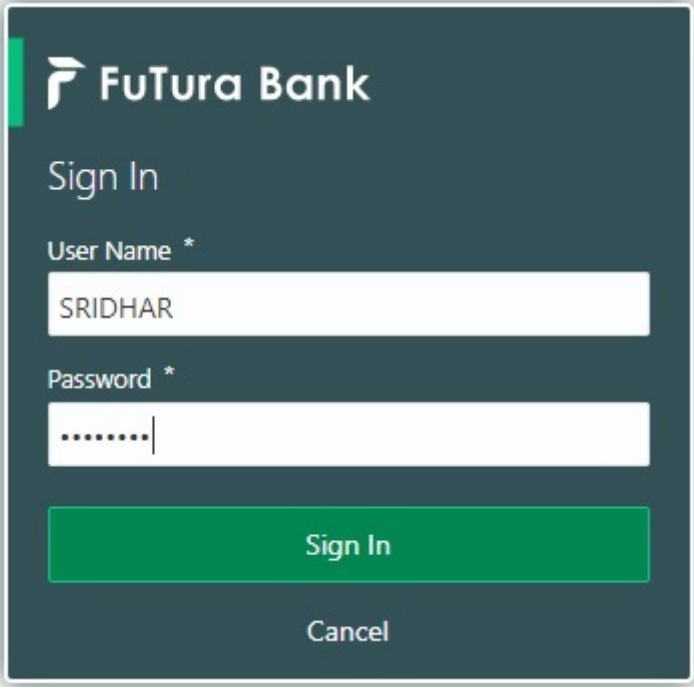

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

3.2 Registration

If beneficiary response is given through branch either by fax, mail, or paper, the Import LC amendment - Beneficiary Consent process starts from the Scrutiny Stage.

During Registration stage, user can capture the basic details of the response, check the signature of the signatory from the advising bank and upload the related documents. It also enables the user to capture beneficiary response.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

ORACLE®

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
3. Click **Trade Finance> Import - Documentary Credit> Import LC Amendment Beneficiary Consent.**
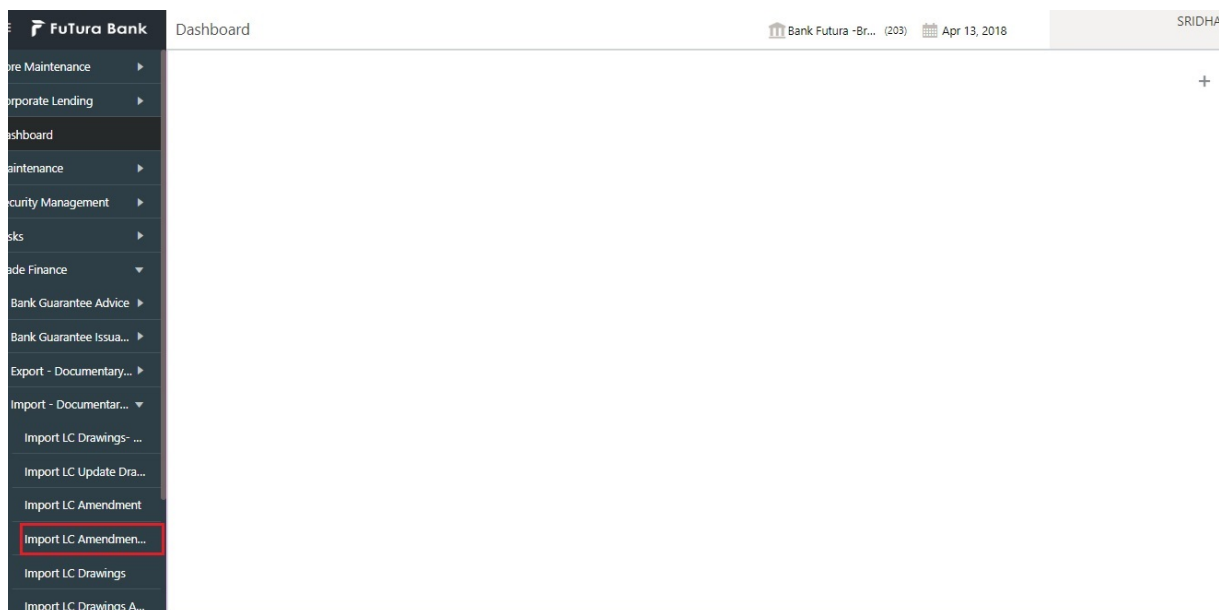

The Registration stage has two sections Application Details and Beneficiary Response Capture. Let's look at the details of Registration screens below:

ORACLE®

3.2.1 Application Details

Provide the Application Details based on the description in the following table:

Field	Description	Sample Values
Documentary Credit Number	Provide the documentary credit number. Alternatively, user can search the documentary credit number using LOV. In the advanced LOV search, user can input Applicant, Currency, Amount and User Reference to fetch the LC Amendment details. Based on the search result, select the applicable LC to add the Beneficiary response.	
Received From - Customer ID	Read only field. Customer ID will be auto-populated based on the selected LC from the LOV.	001344
Received From - Customer Name	Read only field. Customer Name will be auto-populated based on the selected LC from the LOV.	EMR & CO
Branch	Read only field. Branch details will be auto-populated based on the selected LC from the LOV.	203-Bank Futura -Branch FZ1
Process Reference Number	Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.	
Priority	Set the priority of the Import LC Amendment - Beneficiary Consent request as Low/Medium/High. If priority is not maintained for a customer, 'Medium' priority will be defaulted.	High

ORACLE

Field	Description	Sample Values
Submission Mode	Select the submission mode of Import LC Amendment - Beneficiary Consent request. By default the submission mode will have the value as 'Desk'. **Desk-** Request received through Desk **Fax-** Request received through Fax **Email-** Request received through Email **Courier-** Request received through Courier	Desk
User Reference Number	Read only field. User Reference Number will be auto populated by the system based on selected LC.	
Response Received Date	By default, the application will display branch's current date and enables the user to change the date to any back date. **Note** Future date selection is not allowed.	04/13/2018

3.2.2 Beneficiary Response Capture

Registration user can capture the beneficiary responses of each amendments made to the LC in this section.

Amendment Number	Amendment Date	Bene Conf Reqd	Beneficiary Response	Remarks	Action
	May 5, 2021	⬤	Unconfirmed ▾		☑
	May 5, 2021	⬤	Confirmed ▾		☑

Hold   Cancel   Save & Close   Subm

Capture the beneficiary response based on the description in the following table:

Field	Description	Sample Values
Amendment Number	Read only field. Amendment number will be auto-populated based on selected LC using documentary credit number.	
Amendment Date	Read only field. This field displays the date on which the amendment was made to LC.	
Beneficiary Conf Required	Read only field. Beneficiary Consent Required (Y/N) will be auto-populated based on selected LC using documentary credit number.	

ORACLE®

Field	Description	Sample Values
Beneficiary Response	Select the beneficiary response from the LOV. • Confirmed • Unconfirmed • Rejected --- **Note** Beneficiary Response field will be read only if Beneficiary Consent Required is 'No'.	
Remarks	Capture the remarks of the beneficiary response.	

3.2.3   Miscellaneous

Provide the Miscellaneous Details based on the description in the following table:

Field	Description	Sample Values
Signature	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.	
Documents	Upload the required documents.	

ORACLE

Field	Description	Sample Values
Remarks	Provide any additional information regarding the Beneficiary Consent. This information can be viewed by other users processing the request.	
Customer Instructions	Click to view/ input the following • **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
View LC	Enables user to view the details of the LC.	
Action Buttons		
Submit	On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Import LC Amendment - Beneficiary Consent. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request.	
Cancel	Cancels the Import LC Amendment - Beneficiary Consent Registration stage inputs.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	

ORACLE®

Field	Description	Sample Values
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.	

3.2.4 Document Linkage

The user can link an existing uploaded document in any of the process stages.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

1. Navigate to the Registration screen.

ORACLE®

2. On the header of **Registration** screen, click **Documents** button. The Document pop-up screen appears.

3.3 Data Enrichment

Non-Online Channel - Import LC Amendment - Beneficiary Consent request that were received at the desk will move to Data Enrichment stage post successful Registration. The requests will have the details entered during the Registration stage.
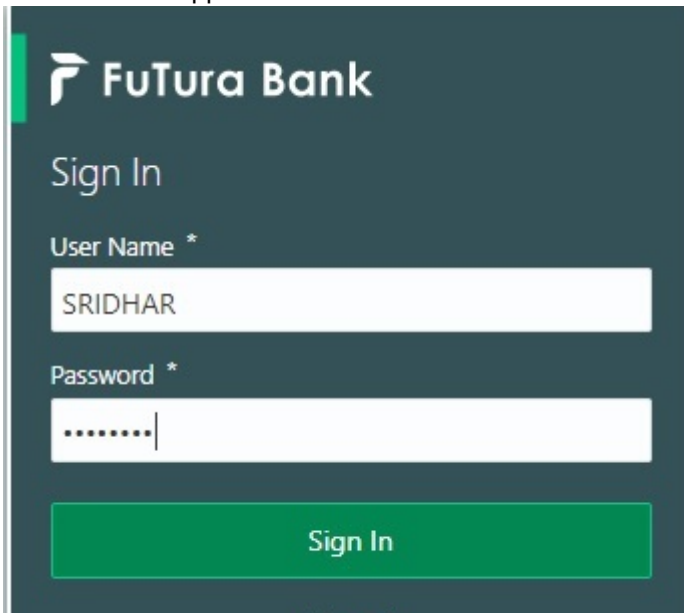

Online Channel - Requests that are received via online channel like SWIFT are available directly for further processing from Beneficiary Consent Response Capture stage.

Note

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task currently at Beneficiary Consent Response Capture stage:

ORACLE

1. Using the entitled login credentials for Data Enrichment stage, login to the OBTFPM application.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

ORACLE®

3. Click **Tasks> Free Tasks.**

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to capture responses of the registered task.

The Data Enrichment stage has three sections as follows:

- Main Details
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

ORACLE®

3.3.1 Main Details

Main details section has three sub section as follows:

- Application Details
- Beneficiary Response Capture

3.3.1.1 Application Details

All fields displayed under Application details section, would be read only except for the **Priority**. Refer to 3.2.1 Application Details for more information of the fields.

3.3.1.2 Beneficiary Response Capture

The fields listed under this section are same as the fields listed under the 3.2.2 Beneficiary Response Capture section in 3.2 Registration. Refer to 3.2.2 Beneficiary Response Capture for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Following are the fields which can be amended apart from the fields carried over from 3.2.2 Beneficiary Response Capture of 3.2 Registration. Provide the details for the amendable fields based on the description in the following table:

Field	Description	Sample Values
Beneficiary Response	Select the beneficiary response from the LOV. • Confirmed • Rejected **Note** Beneficiary Response field will be read only if Beneficiary Consent Required is 'No'.	
Remarks	Capture the remarks of the beneficiary response.	

3.3.1.3 Information to Reimbursing Bank

Field	Description	Sample Values
Sender to Receiver Information-747	Click **Search** icon to search and select the sender to receiver information Click the edit icon to view and modify the description of sender to receiver information.	
Narrative - 747	Click **Search** icon to search and select the narrative. Click the edit icon to view and modify the description of narrative.	

3.3.1.4 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Documents	Click the Documents icon to View/Upload the required documents. Application will display the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.	

ORACLE®

Field	Description	Sample Values
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view the overrides accepted by the user.	
Customer Instructions	Click to view/ input the following ● **Standard Instructions** – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. ● **Transaction Level Instructions** – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
View LC	Enables user to view the details of the LC. The user can view the LC Details, Availability Details, Shipment Details, Payment Details, Document Details, Additional Conditions, Revolving Details, Cash Collateral Details and FX Linkage details.	
Signature	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.

ORACLE®

3.4   Exceptions

The Import LC Amendment Beneficiary Consent request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

3.4.1   Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block

 Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

 Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

 Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

3.4.1.1   Amount Bock Exception

This section will display the amount block exception details.

3.4.1.3 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user.User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the Import LC Amendment Amount Block Exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

3.4.2 Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

ORACLE

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

3.4.2.1 Summary

Tiles Displayed in Summary:

- Main Details - User can view the main details.
- Commission, Charges and Taxes - User can view the commission, charges and taxes details.
- Parties Details - User can view the parties details.
- Compliance Details - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Advices - User can view the advice details.
- Preview Messages - User can view the preview message.
- Accounting Details - User can view the accounting entries generated in back office.

Note

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.

- Settlement Details - User can view the settlement details.

3.4.2.2 Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Refer	User will be able to refer the task back to the Data Enrichment user. User must select a Refer Reason from the values displayed by the system. Refer Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance- Limits • R5 - Others	
Cancel	Cancel the Import LC Amendment KYC exception check.	
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.	
Back	Task moves to previous logical step.	

3.4.3 Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for Trade Finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

ORACLE®

Note

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

Reject

The transaction due to non-availability of limits capturing reject reason.

3.4.3.1 Limit/Credit Check
