1. Preface

1.1 Introduction

This user manual is designed to help you quickly get acquainted with Update Details of Buyers Credit process in Oracle Banking Trade Finance Process Management.

1.2 Audience

This manual is intended for the following User/User Roles:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 <u>Documentation Accessibility</u>

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

1.4 Organization

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 Related Documents

- Settlements User Manual
- Core Services User Manual
- Procedures User Manual
- Common Core Automated End of Day User Manual

1.6 <u>Diversity and Inclusion</u>

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are

also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 <u>Screenshot Disclaimer</u>

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.9 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
×	Exit
+	Add row
_	Delete row
Q	Option List

2. Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

2.1 Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

2.2 Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

2.3 Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3. Update Details of Buyers Credit

Bank can arrange for a credit (Buyers Credit) for an Import Bill liquidation, based on the request from the customer through other Lending Banks.

In such cases, system should allow the bank user to liquidate the Import Bill using the Buyers Credit and to settle the Buyers Credit later on debiting the customer account.

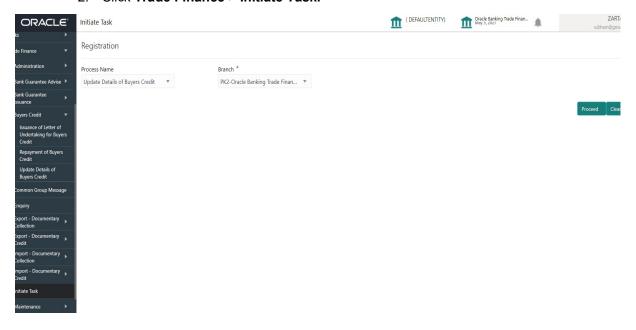

This section contains the following topics:

3.1 Common Initiation Stage	3.2 Registration
3.3 Data Enrichment	3.4 Exceptions
3.5 Multi Level Approval	3.6 Handoff

3.1 Common Initiation Stage

The user can initiate the new Update Details of Buyers Credit request from the common Initiate Task screen.

- 1. Using the entitled login credentials, login to the OBTFPM application.
- 2. Click Trade Finance > Initiate Task.

Provide the details based on the description in the following table:

Field	Description
Process Name	Select the process name to initiate the task.
Branch	Select the branch.

	The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.	
Settlement Account	Details of the settlement account.	

3.3.4.3 FX Linkage

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

Provide the FX linkage detail based on the description in the following table:

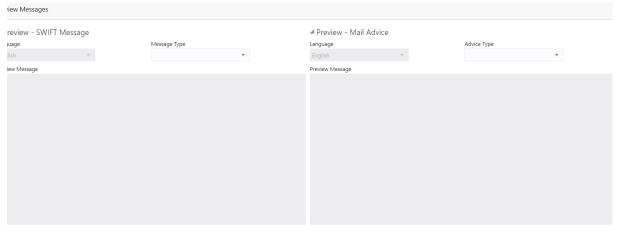

Field	Description	Sample Values
Click + plus icon to add new	r FX linkage details.	
Below fields are displayed o	on the FX linkage pop-up screen, if the user clicks plu	ıs icon.
FX Reference Number	Select the FX contract reference number from the LOV.	
	On select and save and close, system defaults the available amount, bot currency, sold currency and rate.	
	Forward FX Linkage available for selection at bill would be as follows,	
	 Counterparty of the FX contract should be the counterparty of the Bill contract. 	
	 Active Forward FX transactions authorized not marked for auto liquidation. 	
	Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.	
Currency	This field displays the FX SOLD currency from the linked FX contract.	
Contract Amount	This field displays the FX SOLD currency and Amount.	
	The user can change the currency.	

Field	Description	Sample Values
Available FX Contract Amount	This field displays the available FX contract amount.	
	The value is from the "Available Amount" in FXDLINKG screen in OBTR.	
	Available Amount SOLD currency and Amount is displayed.	
Linkage Amount	This field displays the amount available for linkage.	
	The Linkage amount should default the LC Contract Currency and allowed to change the linkage amount alone.	
	The validation "Sum of Linked amount will not be greater than contract amount" or "Linkage amount will not be greater than the available amount for linkage" should be triggered on save of the FX linkage screen when trying to link the single FX or multiple FX.	
Rate	This field displays the exchange rate defaulted from the linked FX Contract.	
FX Amount in Local Currency	This field displays the FX amount in local currency.	
	The value is defaulted as FX BOT currency and Amount from FXDTRONL	
FX Expiry Date	This field displays the expiry date from the linked FX contract.	
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.	
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.	
Below fields appear in the F	X linkage grid along with the above fields.	
Bought Currency	This field displays the currency from the linked FX contract.	
Sold Currency	This field displays the currency from the linked FX contract.	
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.	
Linked Amount	Sum of Linked amount will not be greater than LC contract amount.	
	Linked amount will not be greater than the available amount for linkage.	

Field	Description	Sample Values
Total Utilized amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.	
	The value is Total Utilized Amount SOLD currency and Amount for Import LC/Guarantee Issuance from FXDLINKG	
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.	
Action	Click the Edit icon to modify the FX details.	
	Click the Delete icon to delete the FX details.	

3.3.4.4 Preview Messages

User can preview the draft SWIFT message based on message type and the draft mail advice based on the advice type.

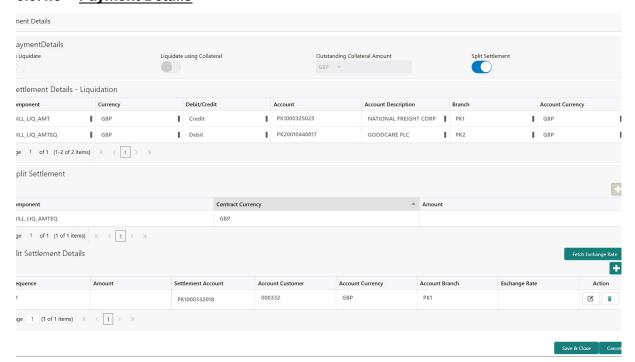

Save & Close Cance

Provide the Preview details based on the description in the following table:

Field	Description	Sample Values
Preview - Swift Message		
Language	Read only field. English is set as default language for the preview.	
Message type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.	

Field	Description	Sample Values
Preview - Swift Message	,	
Message Status	Read only field.	
	Display the message status of draft message of issuance details.	
Repair Reason	Read only field.	
	Display the message repair reason of draft message of issuance details.	
Preview Message	Display a preview of the draft message.	
Preview - Mail Advice		
Language	Read only field.	
	English is set as default language for the preview.	
Advice type	Select the advice type.	
Message Status	Read only field.	
	Display the message status of draft message of issuance details.	
Repair Reason	Read only field.	
	Display the message repair reason of draft message of issuance details.	
Preview Message	Display a preview of the advice.	

3.3.4.5 Payment Details

Provide payment details based on the description in the following table:

Field	Description	Sample Values
Auto Liquidate	Toggle On: Set the toggle 'On' if the auto liquidation is required.	
	Toggle Off: Set the toggle 'Off' if the auto liquidation is not required.	
Liquidate using Collateral	Read only field.	
Outstanding Collateral	Read only field.	
Amount	System defaults the outstanding collateral amount (if mapped).	
Split Settlement	Toggle On: Enables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill	Disable
	Toggle Off: Disables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill	
Settlement Details - Liquida	tion	
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	

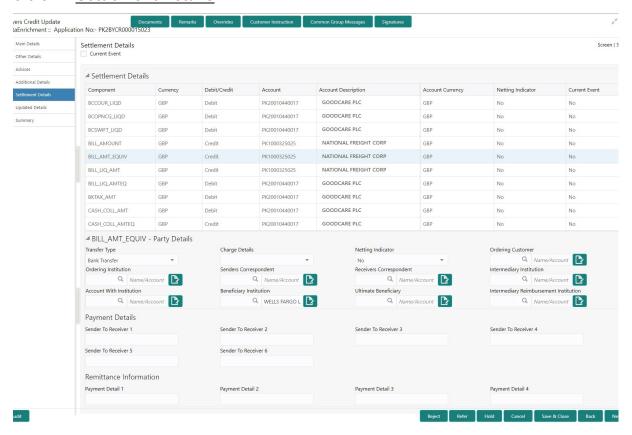

Field	Description	Sample Values
Debit/Credit	Application displays the debit/credit indicators for the components.	
Account	Application Displays the account details for the components.	
Account Description	Application displays the description of the selected account.	
Branch	Application displays the branch of the selected account.	
Account Currency	Application defaults the currency for all the items based on the account number.	
Split Settlement		
Component	Components gets defaulted based on the product selected.	
Currency	Application displays the default currency for the component.	
Amount	Amount for each component. This is populated from the transaction details of the buyers credit.	
Split Settlement Details		
Click + plus icon to add new	v split settlement details.	
Sequence	Sequence of the settlement details.	
Amount	Specify the amount for the split settlement.	
Settlement Account	Settlement Account where the repayment of the Buyers Credit has to be routed.	
Account Customer	Customer account is auto-populated based on the settlement account.	
Account Currency	Currency of the account is auto-populated based on the settlement account.	
Account Branch	Branch of the customer's account is auto-populated based on the settlement account.	
Exchange Rate	Exchange rate for the split settlement.	
Action	Click Edit icon to edit the split settlement details record.	
	Click Delete icon to delete the split settlement details record.	

3.3.4.6 Action Buttons

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents.	
	Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.	
	Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	
Customer Instructions	Click to view/ input the following	
	 Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. 	
	 Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is available, system should display all the signatures.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	

Field	Description	Sample Values
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs and the task gets landed in My Task menu.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.	
Back	On click of Back, system moves the task back to the previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

3.3.5 <u>Settlement Details</u>

Provide the settlement details based on the following table

Field	Description	Sample Values
Current Event	The user can select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event.	
Component	Components gets defaulted based on the product selected.	
Currency	System displays the default currency for the component.	
Debit/Credit	System displays the debit/credit indicators for the components.	
Account	System displays the account details for the components.	
Account Description	System displays the description of the selected account.	
Account Currency	System defaults the currency for all the items based on the account number.	
Netting Indicator	Application displays the applicable netting indicator.	

Field	Description	Sample Values
Current Event	System defaults the current event as Y or N.	

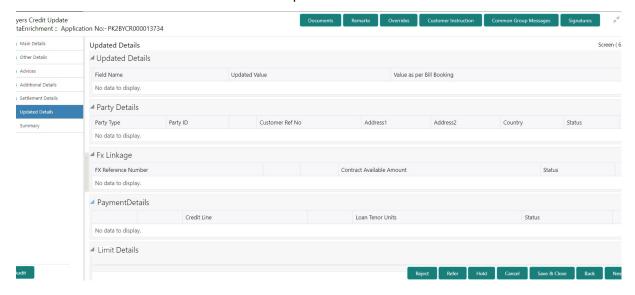

3.3.5.1 Action Buttons

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents.	
	Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.	
	Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	
Customer Instructions	Click to view/ input the following	
	 Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this 	
	section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.	
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is available, system should display all the signatures.	

Field	Description	Sample Values
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others.	
Save & Close	Save the information provided and holds the task in you queue for working later. This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs and the task gets landed in My Task menu.	
Hold	The details provided will be registered and status will be on hold. This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.	
Back	On click of Back, system moves the task back to the previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

3.3.6 **Updated Details**

This section enables the user to view the details of the updated fields along with the old values for the Data Enrichment user to compare.

3.3.6.1 Action Buttons

Field	Description	Sample Values
Documents	Click the Documents icon to Upload the required documents.	
	Application will display the mandatory and optional documents.	
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request.	
	Content from Remarks field should be handed off to Remarks field in Backend application.	
Overrides	Click to view overrides, if any.	
Customer Instructions	Click to view/ input the following	
	Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.	
	 Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. 	

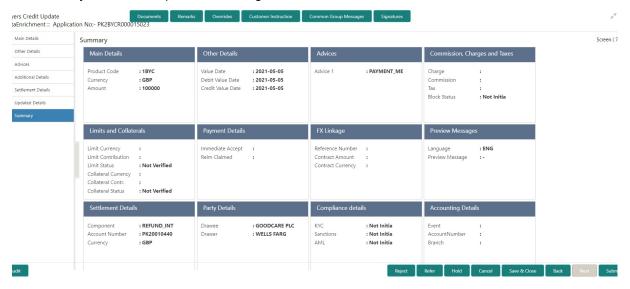

Field	Description	Sample Values
Common Group Message	Click Common Group Message button, to send MT799 and MT999 messages from within the task.	
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.	
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.	
	If more than one signature is available, system should display all the signatures.	
Refer	User must select a Refer Reason from the values displayed by the system. Refer Codes:	
	R1- Documents missing	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others.	
Save & Close	Save the information provided and holds the task in you queue for working later.	
	This option will not submit the request	
Cancel	Cancel the Scrutiny stage inputs and the task gets landed in My Task menu.	
Hold	The details provided will be registered and status will be on hold.	
	This option is used, if there are any pending information yet to be received from applicant and appropriate remarks must be provided.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.	
	Reject Codes:	
	R1- Documents missing	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/LimitsR5 - Others.	
	Select a Reject code and give a Reject Description.	
	This reject reason will be available in the remarks window throughout the process. On reject, a reject notification gets generated to the applicant.	

Field	Description	Sample Values
Back	On click of Back, system moves the task back to the previous data segment.	
Next	On click of Next, system should validate if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	

3.3.7 Summary

User can review the summary of details updated in Data Enrichment stage of Update Details of Buyers Credit request.

Log in to Oracle Banking Trade Finance Process Management (OBTFPM) system to see the summary tiles. The tiles must display a list of important fields with values. User can drill down from summary Tiles into respective data segments.

Tiles Displayed in Summary

3.4 Exceptions

The Update Details of Buyers Credit request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

3.4.1 <u>Exception - Amount Block</u>

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into Oracle Banking Trade Finance Process Management application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

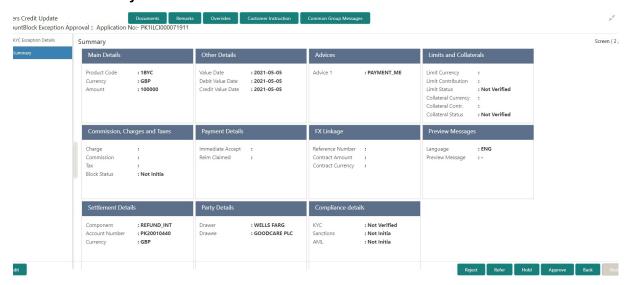

Reject the transaction due to non-availability of sufficient balance in settlement account

3.4.1.1 Amount Bock Exception

This section will display the amount block exception details.
