Resource Administration	Administers resource information.	Manage Application Attachment Entity	Manage application attachment entities
Resource Administration	Administers resource information.	Manage Application Common Lookup	Not Available
Resource Administration	Administers resource information.	Manage Application Data Security Policy	Allows management of security policies that restrict access to functions and data, such as preventing particular values from being accessed in a chart of account segment.
Resource Administration	Administers resource information.	Manage Application Database Resource	Manage application database resources for data security
Resource Administration	Administers resource information.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Resource Administration	Administers resource information.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Resource Administration	Administers resource information.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Resource Administration	Administers resource information.	Manage Application Message	Manage an end-user message, shown in the User Interface. Messages can have different types, such as Error, Warning, Information. Messages are translated and can be re-used across products. Exampe: "File not found", "Table '&TABLE' does not exist".

Granted Role	Granted Role Description	Privilege	Privilege Description
Resource Administration	Administers resource information.	Manage Application Profile Category	Manage application profile option categories
Resource Administration	Administers resource information.	Manage Application Profile Option	Manage Application Profile Options: Manage the level the value can be changed
Resource Administration	Administers resource information.	Manage Application Reference Data Set	Manage Application Reference Data set. Maintain reference data set attributes.
Resource Administration	Administers resource information.	Manage Application Reference Data Set Assignment	Manage Application Reference Data Set Assignments. Create and edit reference data set assignments.
Resource Administration	Administers resource information.	Manage Application Set-Enabled Lookup	Manage sub-type entities stored in the Application Set-Enabled Lookup entity. Lookup Types are lists of values such as Days of the Week or Yes/No which can be used to validate column values.
Resource Administration	Administers resource information.	Manage Application Standard Lookup	Manage sub-type entities stored in the Application Standard Lookup Values entity. Lookup Types are lists of values such as "Days of the Week" or "Yes/No" which can be used to validate columns values.
Resource Administration	Administers resource information.	Manage Application Taxonomy	Manage hierarchical classification of Applications Taxonomy tree. A node in the Application Taxonomy Tree can be a Product Line, Product Family, Product or Logical Business Area.
Resource Administration	Administers resource information.	Manage Customer Data Management Foundation Custom Objects	Allows access to custom objects in Customer Data Management Foundation.
Resource Administration	Administers resource information.	Manage Goal Management Notifications	Manage Goal Management Notifications
Resource Administration	Administers resource information.	Manage My Application Profile Values	Manage My Application Profile Values. Access to manage profile values at the user level.
Resource Administration	Administers resource information.	Manage Person Talent Profile	Allows management of talent profile for a person.

Granted Role	Granted Role Description	Privilege	Privilege Description
Resource Administration	Administers resource information.	Manage Talent Education Establishment	Allows management of talent educational establishments.
Resource Administration	Administers resource information.	Manage Talent Notifications	Allows management of talent management notifications.
Resource Administration	Administers resource information.	Manage Talent Profile Content Item	Allows management of talent profile content items.
Resource Administration	Administers resource information.	Manage Talent Profile Rating Model	Allows management of talent profile rating models.
Resource Administration	Administers resource information.	Manage Talent Profile Sources	Allows management of talent profile subscribers.
Resource Administration	Administers resource information.	Manage Trading Community Resource	Allows the specification of resources for any employees or partner members who are to be associated to leads, opportunities, and territories and given sales credits or compensated for that work.
Resource Administration	Administers resource information.	Manage Trading Community Resource Address	Allows the management of resource addresses. If assigning, also assign the ability to view the trading community resource address.
Resource Administration	Administers resource information.	Manage Trading Community Resource Contact Information	Allows the management of resource contact information. If assigning, also assign the ability to view the trading community resource contact information.
Resource Administration	Administers resource information.	Manage Trading Community Resource History	Allows the management of resource historical information. If assigning, also assign the ability to view the trading community resource history.
Resource Administration	Administers resource information.	Manage Trading Community Resource Lookups	Allows the specification of lookup values that provide choices when defining resources, such as party usages available for resources.
Resource Administration	Administers resource information.	Manage Trading Community Resource Note	Allows the specification of resource notes. If assigning also assign the ability to view the trading community resource note.

Granted Role	Granted Role Description	Privilege	Privilege Description
Resource Administration	Administers resource information.	Manage Trading Community Resource Note Descriptive Flexfields	Allows the specification of additional fields which enter and track information that is not otherwise captured. Descriptive flexfields can be validated and dependent on other values entered in other areas of the page.
Resource Administration	Administers resource information.	Manage Trading Community Resource Note Type	Allows the specification of note types, such as person details, to categorize notes entered for resources. When mapped, note type values are limited to resources.
Resource Administration	Administers resource information.	Manage Trading Community Resource Note Type Mapping	Allows the specification of the mapping that provides a tailored list of note type values for resources. When no mapping is specified, note type values mapped to the object Note are used.
Resource Administration	Administers resource information.	Manage Trading Community Resource Organization Memberships	Allows the specification of resource organization members. If assigning, also assign the ability to view the trading community resource organization memberships.
Resource Administration	Administers resource information.	Manage Trading Community Resource Role Assignments	Allows the management of resource role assignments. If assigning also assign the ability to view the trading community resource role assignments.
Resource Administration	Administers resource information.	Manage Trading Community Resource Sales Representative Information	Allows the management of resource saleperson setup information. If assigning, also assign the ability to view the trading community resource sales representative information.
Resource Administration	Administers resource information.	Manage Trading Community Resource Skills	Allows the management of resource skills information. If assigning, also assign the ability to view the trading community resource skills.
Resource Administration	Administers resource information.	Manage Trading Community Resource Social Network	Allows the management of a resource social network. If assigning, also assign the ability to view the trading community resource social network.

Granted Role	Granted Role Description	Privilege	Privilege Description
Resource Administration	Administers resource information.	Manage Trading Community Resource Team Memberships	Allows the management of resource team members. If assigning also assign the ability to view the trading community resource team memberships.
Resource Administration	Administers resource information.	Remove Trading Community Resource	Allows the removal of resources.
Resource Administration	Administers resource information.	Reset Password	Allows reset password links to be emailed to users.
Resource Administration	Administers resource information.	Search Trading Community Resource	Allows the search of resources.
Resource Administration	Administers resource information.	Upload Trading Community Resource Picture	Allows the upload of resource pictures. If assigning, also assign the ability to view trading community resource details.
Resource Administration	Administers resource information.	View Administration Link	Privilege to view administration link in UI shell
Resource Administration	Administers resource information.	View Trading Community Resource Address	Allows viewing of resource addresses. If assigning, also assign the ability to view trading community resource details.
Resource Administration	Administers resource information.	View Trading Community Resource Administration Detail Information	Allows viewing of resource administration setup information.
Resource Administration	Administers resource information.	View Trading Community Resource Collaboration Information	Allows viewing of resource social network information.
Resource Administration	Administers resource information.	View Trading Community Resource Contact Information	Allows viewing of resource contact information.
Resource Administration	Administers resource information.	View Trading Community Resource Details	Allows viewing of resource basic information, such as name, primary phone, primary address, and primary e-mail.
Resource Administration	Administers resource information.	View Trading Community Resource History	Allows viewing of archived resource information.
Resource Administration	Administers resource information.	View Trading Community Resource Note	Allows viewing of resource notes. If assigning, also assign the ability to view trading community resource details.

Granted Role	Granted Role Description	Privilege	Privilege Description
Resource Administration	Administers resource information.	View Trading Community Resource Organization Memberships	Allows viewing of sales, marketing, and partner organization information.
Resource Administration	Administers resource information.	View Trading Community Resource Overview Information	Allows viewing of an overview for partner, marketing, and sales organization transaction information. If assigning, also assign the ability to view trading community resource details.
Resource Administration	Administers resource information.	View Trading Community Resource Profile	Allows viewing of resource profile information. If assigning, also assign the ability to view trading community resource details.
Resource Administration	Administers resource information.	View Trading Community Resource Role Assignments	Allows viewing of resource role assignments. If assigning, also assign the ability to view trading community resource details.
Resource Administration	Administers resource information.	View Trading Community Resource Sales Representative Information	Allows viewing of salesperson setup information, such as sales credits.
Resource Administration	Administers resource information.	View Trading Community Resource Skills	Allows viewing of resource skills information, such as language, competencies, and product expertise. If assigning, also assign the ability to view trading community resource details.
Resource Administration	Administers resource information.	View Trading Community Resource Social Network	Allows viewing of a resource's social network.
Resource Administration	Administers resource information.	View Trading Community Resource Team Memberships	Allows viewing of resource team memberships. If assigning, also assign the ability to view trading community resource details.
Resource Organization Administration	Administers resource organizations.	Manage Application Tree	Manage application trees and tree versions
Resource Organization Administration	Administers resource organizations.	Manage Application Tree Label	Manage application tree labels
Resource Organization Administration	Administers resource organizations.	Manage Application Tree Structure	Manage application tree structures
Resource Organization Administration	Administers resource organizations.	Manage Resource Organization Member Descriptive Flexfields	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Resource Organization Administration	Administers resource organizations.	Manage Trading Community Resource Organization	Allows the specification of partner resource organizations used to create partner organization hierarchies. If assigning, also assign the ability to view the trading community resource organization
Resource Organization Administration	Administers resource organizations.	Manage Trading Community Resource Organization Hierarchy	Allows the specification of sales, marketing, and partner organization hierarchies used to automatically generate reporting hierarchies. If assigning, also assign the ability to view the trading community resource organization hierarchy.
Resource Organization Administration	Administers resource organizations.	Manage Trading Community Resource Organization Members	Allows the specification of resources, such as employee, contractor and partner member, to sales, marketing and partner organizations.

Enter Trading Community Import Batch Information	Allows the creation of a trading community data import batch by entering batch definition parameters through user interface. If assigning, also assign the ability to view the trading community import batch information.
Trading Community Import Process Management	Manages trading community data import batch processes.	Enter Trading Community Import Batch Process Information	Allows the specification of trading community import batch process information, such as the import process mode, the batch and registry deduplication parameters, address cleansing parameters, and acceptable error limit.
Trading Community Import Process Management	Manages trading community data import batch processes.	Modify Trading Community Import Batch Process Information	Allows editing of trading community import batch process information, such as the import process mode, the batch deduplication and registry deduplication parameters, and the address cleansing error limit, especially to perform the What-if Analysis to get the most acceptable import results.
Trading Community Import Process Management	Manages trading community data import batch processes.	Purge Trading Community Import Batch	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	Run Trading Community Import Batch Error Report	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	Run Trading Community Import Batch Process	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	View Trading Community Import Batch Details and Statistics	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	View Trading Community Import Batch Errors and Details	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	View Trading Community Import Batch Information	Not Available

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Marketing Operations Manager job role.

Business Object	Policy Description	Policy Store Implementation
Activity	A Marketing Operations Manager can delete activity a member of an access group associated to the activity with delete access	Role: Access Groups Enablement Privilege: Delete Activity (Data) Resource: Activity
Activity	A Marketing Operations Manager can update activity a member of an access group associated to the activity with update access	Role: Access Groups Enablement Privilege: Update Activity (Data) Resource: Activity
Activity	A Marketing Operations Manager can view activity a member of an access group associated to the activity	Role: Access Groups Enablement Privilege: View Activity (Data) Resource: Activity
Activity Contact Export Object	A Marketing Operations Manager can view activity contact export object for all activity export objects in the enterprise	Role: Marketing Operations Manager Privilege: View Activity Contact Export Object (Data) Resource: Activity Contact Export Object
Activity Export Object	A Marketing Operations Manager can view activity export object for all activity export objects in the enterprise	Role: Marketing Operations Manager Privilege: View Activity Export Object (Data) Resource: Activity Export Object
Activity File Import Activity	A Marketing Operations Manager can view activity file import activity for all activity file import activities in all resource organizations for which they are authorized	Role: Marketing Operations Manager Privilege: View Activity File Import Activity Object (Data) Resource: Activity File Import Activity
Activity File Import Mapping	A Marketing Operations Manager can view activity file import mapping for all activity file import mappings in all resource organizations for which they are authorized	Role: Marketing Operations Manager Privilege: View Activity File Import Mapping Object (Data) Resource: Activity File Import Mapping

Business Object	Policy Description	Policy Store Implementation
Activity File Import Object	A Marketing Operations Manager can view activity file import object for all activity file import objects in all resource organizations for which they are authorized	Role: Marketing Operations Manager Privilege: View Activity File Import Object (Data) Resource: Activity File Import Object
Activity Resource Export Object	A Marketing Operations Manager can view activity resource export object for all activity export objects in the enterprise	Role: Marketing Operations Manager Privilege: View Activity Resource Export Object (Data) Resource: Activity Resource Export Object
Application Attachment	A Marketing Operations Manager can delete application attachment for all application attachments of categories including campaign brief, internal document, sales collateral, and miscellaneous	Role: Marketing Operations Manager Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can delete application attachment for all application attachments of categories including internal document, sales collateral, and miscellaneous	Role: Marketing Operations Manager Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can delete application attachment for all application attachments of categories including miscellaneous	Role: Marketing Operations Manager Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can read application attachment for the purchase document categories including document, from supplier, miscellaneous, to supplier, to buyer, to receiver, to approver, to payables, and internal to purchasing	Role: Contract View Access Across All Contracts Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can update application attachment for all application attachments of categories including campaign brief, internal document, sales collateral, and miscellaneous	Role: Marketing Operations Manager Privilege: Update Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can update application attachment for all application attachments of categories including internal document, sales collateral, and miscellaneous	Role: Marketing Operations Manager Privilege: Update Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can update application attachment for all application attachments of categories including miscellaneous	Role: Marketing Operations Manager Privilege: Update Application Attachment Resource: Application Attachment

Business Object	Policy Description	Policy Store Implementation
Application Attachment	A Marketing Operations Manager can view application attachment for all application attachments of categories including campaign brief, internal document, sales collateral, and miscellaneous	Role: Marketing Operations Manager Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can view application attachment for all application attachments of categories including internal document, sales collateral, and miscellaneous	Role: Marketing Operations Manager Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can view application attachment for all application attachments of categories including miscellaneous	Role: Marketing Operations Manager Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Operations Manager can view application attachment for the purchase document categories including document, from supplier, miscellaneous, to supplier, to buyer, to receiver, to approver, to payables, and internal to purchasing	Role: Marketing Operations Manager Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment Category	A Marketing Operations Manager can delete application attachment category for all miscelleneous category attachments data	Role: Marketing Operations Manager Privilege: Delete Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing Operations Manager can delete application attachment for all miscelleneous category attachments data	Role: Sales Lead Processing Privilege: Delete Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing Operations Manager can read application attachment for all miscelleneous category attachments data	Role: Sales Lead Processing Privilege: Read Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing Operations Manager can update application attachment category for all miscelleneous category attachments data	Role: Marketing Operations Manager Privilege: Update Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing Operations Manager can update application attachment for all miscelleneous category attachments data	Role: Sales Lead Processing Privilege: Update Application Attachment

Business Object	Policy Description	Policy Store Implementation
		Resource: Application Attachment Category
Application Attachment Category	A Marketing Operations Manager can view application attachment category for all miscelleneous category attachments data	Role: Marketing Operations Manager Privilege: Read Application Attachment Resource: Application Attachment Category
Asset Export Object	A Marketing Operations Manager can view asset export object for all asset export objects in the enterprise	Role: Marketing Sales Party Management Privilege: View Asset Export Object (Data) Resource: Asset Export Object
Asset Export Object	A Marketing Operations Manager can view asset export object for all asset export objects in the enterprise	Role: Sales Party Management Privilege: View Asset Export Object (Data) Resource: Asset Export Object
Asset Export Object	A Marketing Operations Manager can view asset export object for all asset export objects in the enterprise	Role: Sales Party Review Privilege: View Asset Export Object (Data) Resource: Asset Export Object
Assignment Grade	A Marketing Operations Manager can choose assignment grade for grades in their grade security profile	Role: Marketing Operations Manager Privilege: Choose Assignment Grade (Data) Resource: Assignment Grade
Business Unit	A Marketing Operations Manager can choose business unit for business units in their organization security profile	Role: Marketing Operations Manager Privilege: Choose Business Unit Organization (Data) Resource: Business Unit
Business Unit	A Marketing Operations Manager can choose business unit organization for business units in their organization security profile	Role: Resource Administration Privilege: Choose Business Unit Organization (Data) Resource: Business Unit
CRM Asset	A Marketing Operations Manager can delete asset a member of an access group associated to the asset with delete access	Role: Access Groups Enablement Privilege: Delete Asset (Data) Resource: CRM Asset

Business Object	Policy Description	Policy Store Implementation
CRM Asset	A Marketing Operations Manager can update asset a member of an access group associated to the asset with update access	Role: Access Groups Enablement Privilege: Update Asset (Data) Resource: CRM Asset
CRM Asset	A Marketing Operations Manager can view asset a member of an access group associated to the asset	Role: Access Groups Enablement Privilege: View Asset (Data) Resource: CRM Asset
Cases	A Marketing Operations Manager can delete case header a member of an access group associated to the case with delete access	Role: Access Groups Enablement Privilege: Delete Case Header (Data) Resource: Cases
Cases	A Marketing Operations Manager can update case header a member of an access group associated to the case with update access	Role: Access Groups Enablement Privilege: Update Case Header (Data) Resource: Cases
Cases	A Marketing Operations Manager can view case header a member of an access group associated to the case	Role: Access Groups Enablement Privilege: View Case Header (Data) Resource: Cases
Classification Code File Import Activity	A Marketing Operations Manager can view classification code file import activity object type for all classification code file import activities of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Activity Object Type (Data) Resource: Classification Code File Import Activity
Classification Code File Import Mapping	A Marketing Operations Manager can view classification code file import mapping object type for all classification code file import mappings of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Mapping Object Type (Data) Resource: Classification Code File Import Mapping
Classification Code File Import Object	A Marketing Operations Manager can view classification code file import object type for all classification code file import objects of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Object Type (Data) Resource: Classification Code File Import Object

Business Object	Policy Description	Policy Store Implementation
Consumer File Import Activity	A Marketing Operations Manager can view consumer file import activity object type for all consumer file import activities of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Activity Object Type (Data) Resource: Consumer File Import Activity
Consumer File Import Mapping	A Marketing Operations Manager can view consumer file import mapping object type for all consumer file import mappings of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Mapping Object Type (Data) Resource: Consumer File Import Mapping
Consumer File Import Object	A Marketing Operations Manager can view consumer file import object type for all consumer file import objects of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Object Type (Data) Resource: Consumer File Import Object
Contact Center Agent Connector Parameters File Import Activity	A Marketing Operations Manager can view contact center agent connector parameters file import activity for all file import activities of type contact center agent connector parameters in the enterprise	Role: Marketing Operations Manager Privilege: View Contact Center Agent Connector Parameters File Import Activity Object Type (Data) Resource: Contact Center Agent Connector Parameters File Import Activity
Contact Center Agent Connector Parameters File Import Mapping	A Marketing Operations Manager can view contact center agent connector parameters file import mapping for all file import mappings of type contact center agent connector parameters in the enterprise	Role: Marketing Operations Manager Privilege: View Contact Center Agent Connector Parameters File Import Mapping Object Type (Data) Resource: Contact Center Agent Connector Parameters File Import Mapping
Contact Center Agent Connector Parameters File Import Object	A Marketing Operations Manager can view contact center agent connector parameters file import object for all file import objects of type contact center agent connector parameters in the enterprise	Role: Marketing Operations Manager Privilege: View Contact Center Agent Connector Parameters File Import Object Type (Data) Resource: Contact Center Agent Connector Parameters File Import Object
Contact Center Agent File Import Activity	A Marketing Operations Manager can view contact center agent file import activity for all file import activities of type contact center agent in the enterprise	Role: Marketing Operations Manager Privilege: View Contact Center Agent File Import Activity Object Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Contact Center Agent File Import Activity
Contact Center Agent File Import Mapping	A Marketing Operations Manager can view contact center agent file import mapping for all file import mappings of type contact center agent in the enterprise	Role: Marketing Operations Manager Privilege: View Contact Center Agent File Import Mapping Object Type (Data) Resource: Contact Center Agent File Import Mapping
Contact Center Agent File Import Object	A Marketing Operations Manager can view contact center agent file import object for all file import objects of type contact center agent in the enterprise	Role: Marketing Operations Manager Privilege: View Contact Center Agent File Import Object Type (Data) Resource: Contact Center Agent File Import Object
Contact File Import Activity	A Marketing Operations Manager can view contact file import activity object type for all contact file import activities of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Activity Object Type (Data) Resource: Contact File Import Activity
Contact File Import Mapping	A Marketing Operations Manager can view contact file import mapping object type for all contact file import mappings of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Mapping Object Type (Data) Resource: Contact File Import Mapping
Contact File Import Object	A Marketing Operations Manager can view contact file import object type for all contact file import objects of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Object Type (Data) Resource: Contact File Import Object
Contract	A Marketing Operations Manager can view contract for all business units	Role: Contract View Access Across All Contracts Privilege: View Contract (Data) Resource: Contract
Contract	A Marketing Operations Manager can view contract for all business units	Role: Marketing Operations Manager Privilege: View Contract (Data) Resource: Contract

Business Object	Policy Description	Policy Store Implementation
Contract Note	A Marketing Operations Manager can view contract note for notes that are not private or private notes where they are the author.	Role: Contract View Access Across All Contracts Privilege: View Contract Note (Data) Resource: Contract Note
Conversation	A Marketing Operations Manager can delete conversation a member of an access group associated to the conversation with delete access	Role: Access Groups Enablement Privilege: Delete Conversation (Data) Resource: Conversation
Conversation	A Marketing Operations Manager can update conversation a member of an access group associated to the conversation with update access	Role: Access Groups Enablement Privilege: Update Conversation (Data) Resource: Conversation
Conversation	A Marketing Operations Manager can view conversation a member of an access group associated to the conversation	Role: Access Groups Enablement Privilege: View Conversation (Data) Resource: Conversation
Conversation Message	A Marketing Operations Manager can delete conversation message a member of an access group associated to the conversation message with delete access	Role: Access Groups Enablement Privilege: Delete Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Marketing Operations Manager can update conversation message a member of an access group associated to the conversation message with update access	Role: Access Groups Enablement Privilege: Update Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Marketing Operations Manager can view conversation message a member of an access group associated to the conversation message	Role: Access Groups Enablement Privilege: View Conversation Message (Data) Resource: Conversation Message
Customer File Import Activity	A Marketing Operations Manager can view customer file import activity object type for all customer file import activities of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Activity Object Type (Data) Resource: Customer File Import Activity
Customer File Import Mapping	A Marketing Operations Manager can view customer file import mapping object type for all customer file import mappings of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Mapping Object Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Customer File Import Mapping
Customer File Import Object	A Marketing Operations Manager can view customer file import object type for all customer file import objects of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Object Type (Data) Resource: Customer File Import Object
Deal Registration Product	A Marketing Operations Manager can manage deal registration product a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Product	A Marketing Operations Manager can view deal registration product a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Summary	A Marketing Operations Manager can update deal registration approval details a member of an access group associated to the deal registration with update or full access and deal is in pending approval status	Role: Access Groups Enablement Privilege: Update Deal Registration Approval Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing Operations Manager can update deal registration deal details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing Operations Manager can update deal registration deal details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing Operations Manager can update deal registration opportunity details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing Operations Manager can update deal registration opportunity details a member of an access group associated to the deal	Role: Access Groups Enablement

Business Object	Policy Description	Policy Store Implementation
	registration with update access and deal is in pending approval or approved status	Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing Operations Manager can update deal registration partner details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status and the deal is created by an internal user	Role: Access Groups Enablement Privilege: Update Deal Registration Partner Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing Operations Manager can view deal registration a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration (Data) Resource: Deal Registration Summary
Deal Registration Team	A Marketing Operations Manager can manage deal registration team a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Team (Data) Resource: Deal Registration Team
Deal Registration Team	A Marketing Operations Manager can view deal registration team a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Team (Data) Resource: Deal Registration Team
Department	A Marketing Operations Manager can choose department for departments in their organization security profile	Role: Marketing Operations Manager Privilege: Choose Department (Data) Resource: Department
Department	A Marketing Operations Manager can choose department for departments in their organization security profile	Role: Resource Organization Administration Privilege: Choose Department (Data) Resource: Department
Employee Resource File Import Activity	A Marketing Operations Manager can view employee resource file import activity for all employee resource file import activities of object type 'employee resource'	Role: Marketing Operations Manager Privilege: View Employee Resource File Import Activity Object Type (Data) Resource: Employee Resource File Import Activity
Employee Resource File Import Activity	A Marketing Operations Manager can view employee resource file import activity object type for all employee resource file import activities of object type 'employee resource'	Role: Resource Administration Privilege: View Employee Resource File Import Activity Object Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Employee Resource File Import Activity
Employee Resource File Import Mapping	A Marketing Operations Manager can view employee resource file import mapping for all employee resource file import mappings of object type 'employee resource'	Role: Marketing Operations Manager Privilege: View Employee Resource File Import Mapping Object Type (Data) Resource: Employee Resource File Import Mapping
Employee Resource File Import Mapping	A Marketing Operations Manager can view employee resource file import mapping object type for all employee resource file import mappings of object type 'employee resource'	Role: Resource Administration Privilege: View Employee Resource File Import Mapping Object Type (Data) Resource: Employee Resource File Import Mapping
Employee Resource File Import Object	A Marketing Operations Manager can view employee resource file import object for all employee resource file import objects of object type 'employee resource'	Role: Marketing Operations Manager Privilege: View Employee Resource File Import Object Type (Data) Resource: Employee Resource File Import Object
Employee Resource File Import Object	A Marketing Operations Manager can view employee resource file import object type for all employee resource file import objects of object type 'employee resource'	Role: Resource Administration Privilege: View Employee Resource File Import Object Type (Data) Resource: Employee Resource File Import Object
Express Report Definitions	A Marketing Operations Manager can delete express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with delete access	Role: Access Groups Enablement Privilege: Delete Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Marketing Operations Manager can update express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with update access	Role: Access Groups Enablement Privilege: Update Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Marketing Operations Manager can view express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting	Role: Access Groups Enablement Privilege: View Express Report (Data) Resource: Express Report Definitions

Business Object	Policy Description	Policy Store Implementation
Field Service Work Order	A Marketing Operations Manager can delete field service work order a member of an access group associated to the field service work order with delete access	Role: Access Groups Enablement Privilege: Delete Field Service Work Order (Data) Resource: Field Service Work Order
Field Service Work Order	A Marketing Operations Manager can update field service work order a member of an access group associated to the field service work order with update access	Role: Access Groups Enablement Privilege: Update Field Service Work Order (Data) Resource: Field Service Work Order
Field Service Work Order	A Marketing Operations Manager can view field service work order a member of an access group associated to the field service work order	Role: Access Groups Enablement Privilege: View Field Service Work Order (Data) Resource: Field Service Work Order
File Export Batch	A Marketing Operations Manager can view file export batch for all export batches	Role: Marketing Operations Manager Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Marketing Operations Manager can view file export batch for all export batches	Role: Marketing Sales Party Management Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Marketing Operations Manager can view file export batch for all export batches	Role: Sales Party Management Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Marketing Operations Manager can view file export batch for all export batches	Role: Sales Party Review Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Object	A Marketing Operations Manager can manage file export object for all export unit test objects	Role: Marketing Operations Manager Privilege: Manage Export Unit Test (Data) Resource: File Export Object
File Import Activity	A Marketing Operations Manager can view file import activity for all standard file import activities that are accessible for marketing operations manager.	Role: Marketing Operations Manager Privilege: View Standard File Import Activity Object Type

Business Object	Policy Description	Policy Store Implementation
		Resource: File Import Activity
File Import Activity	A Marketing Operations Manager can view standard file import activity object type for all standard file import activities that are accessible for sales lead processing duty	Role: Sales Lead Processing Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Activity	A Marketing Operations Manager can view standard file import activity object type for all standard file import activities that are accessible for trading community batch import management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Mapping	A Marketing Operations Manager can view file import mapping for all standard file import maps that are accessible for marketing operations manager.	Role: Marketing Operations Manager Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
File Import Mapping	A Marketing Operations Manager can view standard file import mapping object type for all standard file import maps that are accessible for sales lead processing duty	Role: Sales Lead Processing Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
File Import Mapping	A Marketing Operations Manager can view standard file import mapping object type for all standard file import maps that are accessible for trading community batch import management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
Group Customer File Import Activity	A Marketing Operations Manager can view group customer file import activity object type for all group customer file import activities of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Activity Object Type (Data) Resource: Group Customer File Import Activity
Group Customer File Import Mapping	A Marketing Operations Manager can view group customer file import mapping object type for all group customer file import mappings of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Mapping Object Type (Data) Resource: Group Customer File Import Mapping

Business Object	Policy Description	Policy Store Implementation
Group Customer File Import Object	A Marketing Operations Manager can view group customer file import object type for all group customer file import objects of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Object Type (Data) Resource: Group Customer File Import Object
HR Job	A Marketing Operations Manager can choose hr job for all jobs in the enterprise	Role: Marketing Operations Manager Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	A Marketing Operations Manager can choose hr job for all jobs in the enterprise	Role: Resource Administration Privilege: Choose HR Job (Data) Resource: HR Job
Hierarchy File Import Activity	A Marketing Operations Manager can view hierarchy file import activity object type for all hierarchy file import activities of object type 'hierarchy'	Role: Trading Community Import Batch Management Privilege: View Hierarchy File Import Activity Object Type (Data) Resource: Hierarchy File Import Activity
Hierarchy File Import Activity	A Marketing Operations Manager can view standard file import activity object type for all standard file import activities that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: Hierarchy File Import Activity
Hierarchy File Import Mapping	A Marketing Operations Manager can view hierarchy file import mapping object type for all hierarchy file import mappings of object type 'hierarchy'	Role: Trading Community Import Batch Management Privilege: View Hierarchy File Import Mapping Object Type (Data) Resource: Hierarchy File Import Mapping
Hierarchy File Import Mapping	A Marketing Operations Manager can view standard file import mapping object type for all standard file import maps that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: Hierarchy File Import Mapping
Hierarchy File Import Object	A Marketing Operations Manager can view hierarchy file import object type for all hierarchy file import objects of object type 'hierarchy'	Role: Trading Community Import Batch Management

Business Object	Policy Description	Policy Store Implementation
		Privilege: View Hierarchy File Import Object Type (Data) Resource: Hierarchy File Import Object
Hierarchy Node File Import Activity	A Marketing Operations Manager can view hierarchy node file import activity object type for all hierarchy node file import activities of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Activity Object Type (Data) Resource: Hierarchy Node File Import Activity
Hierarchy Node File Import Activity	A Marketing Operations Manager can view standard file import activity object type for all standard file import activities that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: Hierarchy Node File Import Activity
Hierarchy Node File Import Mapping	A Marketing Operations Manager can view hierarchy node file import mapping object type for all hierarchy node file import mappings of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Mapping Object Type (Data) Resource: Hierarchy Node File Import Mapping
Hierarchy Node File Import Mapping	A Marketing Operations Manager can view standard file import mapping object type for all standard file import maps that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: Hierarchy Node File Import Mapping
Hierarchy Node File Import Object	A Marketing Operations Manager can view hierarchy node file import object type for all hierarchy node file import objects of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Object Type (Data) Resource: Hierarchy Node File Import Object
Legal Employer	A Marketing Operations Manager can choose legal employer for legal employers in their organization security profile	Role: Marketing Operations Manager Privilege: Choose Legal Employer (Data) Resource: Legal Employer
Legal Employer	A Marketing Operations Manager can choose legal employer for legal employers in their organization security profile	Role: Resource Administration Privilege: Choose Legal Employer (Data) Resource: Legal Employer

Business Object	Policy Description	Policy Store Implementation
Legal Entity File Import Activity	A Marketing Operations Manager can view legal entity file import activity object type for all legal entity file import activities of object type 'legal entity'	Role: Trading Community Import Batch Management Privilege: View Legal Entity File Import Activity Object Type (Data) Resource: Legal Entity File Import Activity
Legal Entity File Import Mapping	A Marketing Operations Manager can view legal entity file import mapping object type for all legal entity file import mappings of object type 'legal entity'	Role: Trading Community Import Batch Management Privilege: View Legal Entity File Import Mapping Object Type (Data) Resource: Legal Entity File Import Mapping
Legal Entity File Import Object	A Marketing Operations Manager can view legal entity file import object type for all legal entity file import objects of object type 'legal entity'	Role: Trading Community Import Batch Management Privilege: View Legal Entity File Import Object Type (Data) Resource: Legal Entity File Import Object
Location	A Marketing Operations Manager can choose location for locations in their location security profile	Role: Marketing Operations Manager Privilege: Choose Location (Data) Resource: Location
MDF Budget	A Marketing Operations Manager can delete marketing budget a member of an access group associated to the mdf budget with delete access and budget status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Budget (Data) Resource: MDF Budget
MDF Budget	A Marketing Operations Manager can update marketing budget a member of an access group associated to the mdf budget with update access	Role: Access Groups Enablement Privilege: Update Marketing Budget (Data) Resource: MDF Budget
MDF Budget	A Marketing Operations Manager can view marketing budget a member of an access group associated to the mdf budget	Role: Access Groups Enablement Privilege: View Marketing Budget (Data) Resource: MDF Budget
MDF Budget Team	A Marketing Operations Manager can delete marketing budget team a member of an access group associated to the mdf budget with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Budget Team (Data) Resource: MDF Budget Team

Business Object	Policy Description	Policy Store Implementation
MDF Budget Team	A Marketing Operations Manager can update marketing budget team a member of an access group associated to the mdf budget with update access	Role: Access Groups Enablement Privilege: Update Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Budget Team	A Marketing Operations Manager can view marketing budget team a member of an access group associated to the mdf budget	Role: Access Groups Enablement Privilege: View Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Claim	A Marketing Operations Manager can delete marketing claim a member of an access group associated to the mdf claim with delete or full access and the claim status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Claim (Data) Resource: MDF Claim
MDF Claim	A Marketing Operations Manager can update marketing claim approval details a member of an access group associated to the mdf claim with update or full access and the claim status is pending approval	Role: Access Groups Enablement Privilege: Update Marketing Claim Approval Details (Data) Resource: MDF Claim
MDF Claim	A Marketing Operations Manager can update marketing claim details a member of an access group associated to the mdf claim with update or full access and the claim status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Claim Details (Data) Resource: MDF Claim
MDF Claim	A Marketing Operations Manager can update marketing claim partner details a member of an access group associated to the mdf claim with update or full access and the claim status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Claim Partner Details (Data) Resource: MDF Claim
MDF Claim	A Marketing Operations Manager can view marketing claim a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim (Data) Resource: MDF Claim
MDF Claim Settlement	A Marketing Operations Manager can delete marketing claim settlement a member of an access group associated to the mdf claim with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Marketing Operations Manager can update marketing claim settlement a member of an	Role: Access Groups Enablement

Business Object	Policy Description	Policy Store Implementation
	access group associated to the mdf claim with update access	Privilege: Update Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Marketing Operations Manager can update marketing claim settlement details a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Settlement Details (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Marketing Operations Manager can view marketing claim settlement a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Team	A Marketing Operations Manager can delete marketing claim team a member of an access group associated to the mdf claim with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Claim Team	A Marketing Operations Manager can update marketing claim team a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Claim Team	A Marketing Operations Manager can view marketing claim team a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Request	A Marketing Operations Manager can delete marketing fund request a member of an access group associated to the mdf request with delete access and the request status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Fund Request (Data) Resource: MDF Request
MDF Request	A Marketing Operations Manager can update marketing fund request approval details a member of an access group associated to the mdf request with update or full access and the request status is pending approval	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Approval Details (Data) Resource: MDF Request
MDF Request	A Marketing Operations Manager can update marketing fund request details a member of an access group associated to the mdf request	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Details (Data)

Business Object	Policy Description	Policy Store Implementation
	with update or full access and the request status is draft, returned, failed or withdrawn	Resource: MDF Request
MDF Request	A Marketing Operations Manager can update marketing fund request partner details a member of an access group associated to the mdf request with update or full access and request is in draft, returned, failed or withdrawn status and the request is created by an internal user	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Partner Details (Data) Resource: MDF Request
MDF Request	A Marketing Operations Manager can view marketing fund request a member of an access group associated to the mdf request	Role: Access Groups Enablement Privilege: View Marketing Fund Request (Data) Resource: MDF Request
MDF Request Team	A Marketing Operations Manager can delete marketing fund request team a member of an access group associated to the mdf request with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Fund Request Team (Data) Resource: MDF Request Team
MDF Request Team	A Marketing Operations Manager can update marketing fund request team a member of an access group associated to the mdf request with update access	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Team (Data) Resource: MDF Request Team

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Marketing VP job role.

Business Object	Policy Description	Policy Store Implementation
Activity	A Marketing VP can delete activity a member of an access group associated to the activity with delete access	Role: Access Groups Enablement Privilege: Delete Activity (Data) Resource: Activity
Activity	A Marketing VP can update activity a member of an access group associated to the activity with update access	Role: Access Groups Enablement Privilege: Update Activity (Data) Resource: Activity
Activity	A Marketing VP can view activity a member of an access group associated to the activity	Role: Access Groups Enablement Privilege: View Activity (Data) Resource: Activity
Activity	A Marketing Vp can delete activity where they are in the management chain of the activity owner	Role: Marketing VP Privilege: Delete Activity (Data) Resource: Activity
Activity	A Marketing Vp can update activity where they are in the management chain for a task activity or they are an owner for an appointment activity.	Role: Marketing VP Privilege: Update Activity (Data) Resource: Activity
Activity	A Marketing Vp can view activity where they are in the management chain of an activity resource.	Role: Marketing VP Privilege: View Activity (Data) Resource: Activity
Application Attachment	A Marketing VP can read application attachment for the purchase document categories including document, from supplier, miscellaneous, to supplier, to buyer, to receiver, to approver, to payables, and internal to purchasing	Role: Contract View Access Across All Contracts Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Vp can delete application attachment for all application attachments of categories including campaign brief, internal document, sales collateral, and miscellaneous	Role: Marketing VP Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Vp can update application attachment for all application attachments of categories including campaign brief, internal document, sales collateral, and miscellaneous	Role: Marketing VP Privilege: Update Application Attachment Resource: Application Attachment

Business Object	Policy Description	Policy Store Implementation
Application Attachment	A Marketing Vp can view application attachment for all application attachments of categories including campaign brief, internal document, sales collateral, and miscellaneous	Role: Marketing VP Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Marketing Vp can view application attachment for the purchase document categories including document, from supplier, miscellaneous, to supplier, to buyer, to receiver, to approver, to payables, and internal to purchasing	Role: Marketing VP Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment Category	A Marketing VP can delete application attachment for all miscelleneous category attachments data	Role: Sales Lead Processing Privilege: Delete Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing VP can read application attachment for all miscelleneous category attachments data	Role: Sales Lead Processing Privilege: Read Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing VP can update application attachment for all miscelleneous category attachments data	Role: Sales Lead Processing Privilege: Update Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing Vp can delete application attachment category for all miscelleneous category attachments data	Role: Marketing VP Privilege: Delete Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing Vp can update application attachment category for all miscelleneous category attachments data	Role: Marketing VP Privilege: Update Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Marketing Vp can view application attachment category for all miscelleneous category attachments data	Role: Marketing VP Privilege: Read Application Attachment Resource: Application Attachment Category
Asset Export Object	A Marketing VP can view asset export object for all asset export objects in the enterprise	Role: Marketing Sales Party Management Privilege: View Asset Export Object (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Asset Export Object
Asset Export Object	A Marketing VP can view asset export object for all asset export objects in the enterprise	Role: Sales Party Management Privilege: View Asset Export Object (Data) Resource: Asset Export Object
Asset Export Object	A Marketing VP can view asset export object for all asset export objects in the enterprise	Role: Sales Party Review Privilege: View Asset Export Object (Data) Resource: Asset Export Object
CRM Asset	A Marketing VP can delete asset a member of an access group associated to the asset with delete access	Role: Access Groups Enablement Privilege: Delete Asset (Data) Resource: CRM Asset
CRM Asset	A Marketing VP can update asset a member of an access group associated to the asset with update access	Role: Access Groups Enablement Privilege: Update Asset (Data) Resource: CRM Asset
CRM Asset	A Marketing VP can view asset a member of an access group associated to the asset	Role: Access Groups Enablement Privilege: View Asset (Data) Resource: CRM Asset
Cases	A Marketing VP can delete case header a member of an access group associated to the case with delete access	Role: Access Groups Enablement Privilege: Delete Case Header (Data) Resource: Cases
Cases	A Marketing VP can update case header a member of an access group associated to the case with update access	Role: Access Groups Enablement Privilege: Update Case Header (Data) Resource: Cases
Cases	A Marketing VP can view case header a member of an access group associated to the case	Role: Access Groups Enablement Privilege: View Case Header (Data) Resource: Cases
Classification Code File Import Activity	A Marketing VP can view classification code file import activity object type for all classification code file import activities of object type 'classification code'	Role: Trading Community Import Batch Management

Business Object	Policy Description	Policy Store Implementation
		Privilege: View Classification Code File Import Activity Object Type (Data) Resource: Classification Code File Import Activity
Classification Code File Import Mapping	A Marketing VP can view classification code file import mapping object type for all classification code file import mappings of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Mapping Object Type (Data) Resource: Classification Code File Import Mapping
Classification Code File Import Object	A Marketing VP can view classification code file import object type for all classification code file import objects of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Object Type (Data) Resource: Classification Code File Import Object
Consumer File Import Activity	A Marketing VP can view consumer file import activity object type for all consumer file import activities of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Activity Object Type (Data) Resource: Consumer File Import Activity
Consumer File Import Mapping	A Marketing VP can view consumer file import mapping object type for all consumer file import mappings of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Mapping Object Type (Data) Resource: Consumer File Import Mapping
Consumer File Import Object	A Marketing VP can view consumer file import object type for all consumer file import objects of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Object Type (Data) Resource: Consumer File Import Object
Contact File Import Activity	A Marketing VP can view contact file import activity object type for all contact file import activities of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Activity Object Type (Data) Resource: Contact File Import Activity

Business Object	Policy Description	Policy Store Implementation
Contact File Import Mapping	A Marketing VP can view contact file import mapping object type for all contact file import mappings of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Mapping Object Type (Data) Resource: Contact File Import Mapping
Contact File Import Object	A Marketing VP can view contact file import object type for all contact file import objects of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Object Type (Data) Resource: Contact File Import Object
Contract	A Marketing VP can view contract for all business units	Role: Contract View Access Across All Contracts Privilege: View Contract (Data) Resource: Contract
Contract	A Marketing Vp can view contract for all business units	Role: Marketing VP Privilege: View Contract (Data) Resource: Contract
Contract Note	A Marketing VP can view contract note for notes that are not private or private notes where they are the author.	Role: Contract View Access Across All Contracts Privilege: View Contract Note (Data) Resource: Contract Note
Conversation	A Marketing VP can delete conversation a member of an access group associated to the conversation with delete access	Role: Access Groups Enablement Privilege: Delete Conversation (Data) Resource: Conversation
Conversation	A Marketing VP can update conversation a member of an access group associated to the conversation with update access	Role: Access Groups Enablement Privilege: Update Conversation (Data) Resource: Conversation
Conversation	A Marketing VP can view conversation a member of an access group associated to the conversation	Role: Access Groups Enablement Privilege: View Conversation (Data) Resource: Conversation
Conversation Message	A Marketing VP can delete conversation message a member of an access group	Role: Access Groups Enablement Privilege: Delete Conversation Message (Data)

Business Object	Policy Description	Policy Store Implementation
	associated to the conversation message with delete access	Resource: Conversation Message
Conversation Message	A Marketing VP can update conversation message a member of an access group associated to the conversation message with update access	Role: Access Groups Enablement Privilege: Update Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Marketing VP can view conversation message a member of an access group associated to the conversation message	Role: Access Groups Enablement Privilege: View Conversation Message (Data) Resource: Conversation Message
Customer File Import Activity	A Marketing VP can view customer file import activity object type for all customer file import activities of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Activity Object Type (Data) Resource: Customer File Import Activity
Customer File Import Mapping	A Marketing VP can view customer file import mapping object type for all customer file import mappings of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Mapping Object Type (Data) Resource: Customer File Import Mapping
Customer File Import Object	A Marketing VP can view customer file import object type for all customer file import objects of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Object Type (Data) Resource: Customer File Import Object
Deal Registration Product	A Marketing VP can manage deal registration product a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Product	A Marketing VP can view deal registration product a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Summary	A Marketing VP can update deal registration approval details a member of an access group associated to the deal registration with update	Role: Access Groups Enablement

Business Object	Policy Description	Policy Store Implementation
	or full access and deal is in pending approval status	Privilege: Update Deal Registration Approval Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing VP can update deal registration deal details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing VP can update deal registration deal details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing VP can update deal registration opportunity details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing VP can update deal registration opportunity details a member of an access group associated to the deal registration with update access and deal is in pending approval or approved status	Role: Access Groups Enablement Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing VP can update deal registration partner details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status and the deal is created by an internal user	Role: Access Groups Enablement Privilege: Update Deal Registration Partner Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Marketing VP can view deal registration a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration (Data) Resource: Deal Registration Summary
Deal Registration Team	A Marketing VP can manage deal registration team a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Team (Data) Resource: Deal Registration Team

Business Object	Policy Description	Policy Store Implementation
Deal Registration Team	A Marketing VP can view deal registration team a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Team (Data) Resource: Deal Registration Team
Express Report Definitions	A Marketing VP can delete express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with delete access	Role: Access Groups Enablement Privilege: Delete Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Marketing VP can update express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with update access	Role: Access Groups Enablement Privilege: Update Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Marketing VP can view express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting	Role: Access Groups Enablement Privilege: View Express Report (Data) Resource: Express Report Definitions
Field Service Work Order	A Marketing VP can delete field service work order a member of an access group associated to the field service work order with delete access	Role: Access Groups Enablement Privilege: Delete Field Service Work Order (Data) Resource: Field Service Work Order
Field Service Work Order	A Marketing VP can update field service work order a member of an access group associated to the field service work order with update access	Role: Access Groups Enablement Privilege: Update Field Service Work Order (Data) Resource: Field Service Work Order
Field Service Work Order	A Marketing VP can view field service work order a member of an access group associated to the field service work order	Role: Access Groups Enablement Privilege: View Field Service Work Order (Data) Resource: Field Service Work Order
File Export Batch	A Marketing VP can view file export batch for all export batches	Role: Marketing Sales Party Management Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Marketing VP can view file export batch for all export batches	Role: Sales Party Management Privilege: View File Export Batch (Data) Resource: File Export Batch

Business Object	Policy Description	Policy Store Implementation
File Export Batch	A Marketing VP can view file export batch for all export batches	Role: Sales Party Review Privilege: View File Export Batch (Data) Resource: File Export Batch
File Import Activity	A Marketing VP can view standard file import activity object type for all standard file import activities that are accessible for sales lead processing duty	Role: Sales Lead Processing Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Activity	A Marketing VP can view standard file import activity object type for all standard file import activities that are accessible for trading community batch import management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Activity	A Marketing Vp can view file import activity for all standard file import activities that are accessible for marketing vp	Role: Marketing VP Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Mapping	A Marketing VP can view standard file import mapping object type for all standard file import maps that are accessible for sales lead processing duty	Role: Sales Lead Processing Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
File Import Mapping	A Marketing VP can view standard file import mapping object type for all standard file import maps that are accessible for trading community batch import management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
File Import Mapping	A Marketing Vp can view file import mapping for all standard file import maps that are accessible for marketing vp	Role: Marketing VP Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
Group Customer File Import Activity	A Marketing VP can view group customer file import activity object type for all group customer file import activities of object type 'group customer'	Role: Trading Community Import Batch Management

Business Object	Policy Description	Policy Store Implementation
		Privilege: View Group Customer File Import Activity Object Type (Data) Resource: Group Customer File Import Activity
Group Customer File Import Mapping	A Marketing VP can view group customer file import mapping object type for all group customer file import mappings of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Mapping Object Type (Data) Resource: Group Customer File Import Mapping
Group Customer File Import Object	A Marketing VP can view group customer file import object type for all group customer file import objects of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Object Type (Data) Resource: Group Customer File Import Object
Hierarchy File Import Activity	A Marketing VP can view hierarchy file import activity object type for all hierarchy file import activities of object type 'hierarchy'	Role: Trading Community Import Batch Management Privilege: View Hierarchy File Import Activity Object Type (Data) Resource: Hierarchy File Import Activity
Hierarchy File Import Activity	A Marketing VP can view standard file import activity object type for all standard file import activities that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: Hierarchy File Import Activity
Hierarchy File Import Mapping	A Marketing VP can view hierarchy file import mapping object type for all hierarchy file import mappings of object type 'hierarchy'	Role: Trading Community Import Batch Management Privilege: View Hierarchy File Import Mapping Object Type (Data) Resource: Hierarchy File Import Mapping
Hierarchy File Import Mapping	A Marketing VP can view standard file import mapping object type for all standard file import maps that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: Hierarchy File Import Mapping
Hierarchy File Import Object	A Marketing VP can view hierarchy file import object type for all hierarchy file import objects of object type 'hierarchy'	Role: Trading Community Import Batch Management

Business Object	Policy Description	Policy Store Implementation
		Privilege: View Hierarchy File Import Object Type (Data) Resource: Hierarchy File Import Object
Hierarchy Node File Import Activity	A Marketing VP can view hierarchy node file import activity object type for all hierarchy node file import activities of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Activity Object Type (Data) Resource: Hierarchy Node File Import Activity
Hierarchy Node File Import Activity	A Marketing VP can view standard file import activity object type for all standard file import activities that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: Hierarchy Node File Import Activity
Hierarchy Node File Import Mapping	A Marketing VP can view hierarchy node file import mapping object type for all hierarchy node file import mappings of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Mapping Object Type (Data) Resource: Hierarchy Node File Import Mapping
Hierarchy Node File Import Mapping	A Marketing VP can view standard file import mapping object type for all standard file import maps that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: Hierarchy Node File Import Mapping
Hierarchy Node File Import Object	A Marketing VP can view hierarchy node file import object type for all hierarchy node file import objects of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Object Type (Data) Resource: Hierarchy Node File Import Object
Legal Entity File Import Activity	A Marketing VP can view legal entity file import activity object type for all legal entity file import activities of object type 'legal entity'	Role: Trading Community Import Batch Management Privilege: View Legal Entity File Import Activity Object Type (Data) Resource: Legal Entity File Import Activity
Legal Entity File Import Mapping	A Marketing VP can view legal entity file import mapping object type for all legal entity file import mappings of object type 'legal entity'	Role: Trading Community Import Batch Management

Business Object	Policy Description	Policy Store Implementation
		Privilege: View Legal Entity File Import Mapping Object Type (Data) Resource: Legal Entity File Import Mapping
Legal Entity File Import Object	A Marketing VP can view legal entity file import object type for all legal entity file import objects of object type 'legal entity'	Role: Trading Community Import Batch Management Privilege: View Legal Entity File Import Object Type (Data) Resource: Legal Entity File Import Object
MDF Budget	A Marketing VP can delete marketing budget a member of an access group associated to the mdf budget with delete access and budget status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Budget (Data) Resource: MDF Budget
MDF Budget	A Marketing VP can update marketing budget a member of an access group associated to the mdf budget with update access	Role: Access Groups Enablement Privilege: Update Marketing Budget (Data) Resource: MDF Budget
MDF Budget	A Marketing VP can view marketing budget a member of an access group associated to the mdf budget	Role: Access Groups Enablement Privilege: View Marketing Budget (Data) Resource: MDF Budget
MDF Budget Team	A Marketing VP can delete marketing budget team a member of an access group associated to the mdf budget with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Budget Team	A Marketing VP can update marketing budget team a member of an access group associated to the mdf budget with update access	Role: Access Groups Enablement Privilege: Update Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Budget Team	A Marketing VP can view marketing budget team a member of an access group associated to the mdf budget	Role: Access Groups Enablement Privilege: View Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Claim	A Marketing VP can delete marketing claim a member of an access group associated to the mdf claim with delete or full access and the claim status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Claim (Data) Resource: MDF Claim

Business Object	Policy Description	Policy Store Implementation
MDF Claim	A Marketing VP can update marketing claim approval details a member of an access group associated to the mdf claim with update or full access and the claim status is pending approval	Role: Access Groups Enablement Privilege: Update Marketing Claim Approval Details (Data) Resource: MDF Claim
MDF Claim	A Marketing VP can update marketing claim details a member of an access group associated to the mdf claim with update or full access and the claim status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Claim Details (Data) Resource: MDF Claim
MDF Claim	A Marketing VP can update marketing claim partner details a member of an access group associated to the mdf claim with update or full access and the claim status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Claim Partner Details (Data) Resource: MDF Claim
MDF Claim	A Marketing VP can view marketing claim a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim (Data) Resource: MDF Claim
MDF Claim Settlement	A Marketing VP can delete marketing claim settlement a member of an access group associated to the mdf claim with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Marketing VP can update marketing claim settlement a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Marketing VP can update marketing claim settlement details a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Settlement Details (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Marketing VP can view marketing claim settlement a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim Settlement (Data) Resource: MDF Claim Settlement

Business Object	Policy Description	Policy Store Implementation
MDF Claim Team	A Marketing VP can delete marketing claim team a member of an access group associated to the mdf claim with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Claim Team	A Marketing VP can update marketing claim team a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Claim Team	A Marketing VP can view marketing claim team a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Request	A Marketing VP can delete marketing fund request a member of an access group associated to the mdf request with delete access and the request status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Fund Request (Data) Resource: MDF Request
MDF Request	A Marketing VP can update marketing fund request approval details a member of an access group associated to the mdf request with update or full access and the request status is pending approval	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Approval Details (Data) Resource: MDF Request
MDF Request	A Marketing VP can update marketing fund request details a member of an access group associated to the mdf request with update or full access and the request status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Details (Data) Resource: MDF Request
MDF Request	A Marketing VP can update marketing fund request partner details a member of an access group associated to the mdf request with update or full access and request is in draft, returned, failed or withdrawn status and the request is created by an internal user	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Partner Details (Data) Resource: MDF Request
MDF Request	A Marketing VP can view marketing fund request a member of an access group associated to the mdf request	Role: Access Groups Enablement Privilege: View Marketing Fund Request (Data) Resource: MDF Request

Business Object	Policy Description	Policy Store Implementation
MDF Request Team	A Marketing VP can delete marketing fund request team a member of an access group associated to the mdf request with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Fund Request Team (Data) Resource: MDF Request Team
MDF Request Team	A Marketing VP can update marketing fund request team a member of an access group associated to the mdf request with update access	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Team (Data) Resource: MDF Request Team
MDF Request Team	A Marketing VP can view marketing fund request team a member of an access group associated to the mdf request	Role: Access Groups Enablement Privilege: View Marketing Fund Request Team (Data) Resource: MDF Request Team
Marketing Campaign	A Marketing Vp can update marketing campaign where they are a manager in the management hierarchy of a resource in the marketing campaign team with full access	Role: Marketing VP Privilege: Update Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Marketing Vp can view marketing campaign for all marketing campaigns in the enterprise	Role: Marketing VP Privilege: View Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Marketing Vp can view marketing campaign for all resource organizations and child resource organizations for which they are authorized	Role: Marketing VP Privilege: View Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Integration Campaign	A Marketing VP can delete marketing integration campaign a member of an access group associated to the marketing integration campaign with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Integration Campaign (Data) Resource: Marketing Integration Campaign
Marketing Integration Campaign	A Marketing VP can update marketing integration campaign a member of an access group associated to the marketing integration campaign with update access	Role: Access Groups Enablement Privilege: Update Marketing Integration Campaign (Data) Resource: Marketing Integration Campaign
Marketing Integration Campaign	A Marketing VP can view marketing integration campaign a member of an access group	Role: Access Groups Enablement

Business Object	Policy Description	Policy Store Implementation
	associated to the marketing integration campaign	Privilege: View Marketing Integration Campaign (Data) Resource: Marketing Integration Campaign
Marketing Segment	A Marketing Vp can view marketing segment for all marketing segments in the enterprise	Role: Marketing VP Privilege: View Marketing Segment (Data) Resource: Marketing Segment
Note	A Marketing VP can delete note a member of an access group associated to the note with delete access	Role: Access Groups Enablement Privilege: Delete Note (Data) Resource: Note
Note	A Marketing VP can update note a member of an access group associated to the note with update access	Role: Access Groups Enablement Privilege: Update Note (Data) Resource: Note
Note	A Marketing VP can view note a member of an access group associated to the note	Role: Access Groups Enablement Privilege: View Note (Data) Resource: Note
Opportunity	A Marketing VP can manage opportunity general profile a member of an access group associated to the opportunity with update access	Role: Access Groups Enablement Privilege: Manage Opportunity General Profile (Data) Resource: Opportunity
Opportunity	A Marketing VP can manage opportunity restricted profile a member of an access group associated to the opportunity with delete access	Role: Access Groups Enablement Privilege: Manage Opportunity Restricted Profile (Data) Resource: Opportunity
Opportunity	A Marketing VP can manage opportunity revenue a member of an access group associated to the opportunity with full access	Role: Access Groups Enablement Privilege: Manage Opportunity Revenue (Data) Resource: Opportunity
Opportunity	A Marketing VP can manage opportunity team a member of an access group associated to the opportunity with full access	Role: Access Groups Enablement Privilege: Manage Opportunity Team (Data) Resource: Opportunity

Business Object	Policy Description	Policy Store Implementation
Opportunity	A Marketing VP can view opportunity a member of an access group associated to the opportunity	Role: Access Groups Enablement Privilege: View Opportunity (Data) Resource: Opportunity
Partner Profile	A Marketing VP can manage partner account a member of an access group associated to the partner with update access	Role: Access Groups Enablement Privilege: Manage Partner Account (Data) Resource: Partner Profile
Partner Profile	A Marketing VP can update partner account a member of an access group associated to the partner with update access	Role: Access Groups Enablement Privilege: Update Partner Account (Data) Resource: Partner Profile
Partner Program Enrollment	A Marketing VP can manage partner program enrollment a member of an access group associated to the partner program enrollment with delete access	Role: Access Groups Enablement Privilege: Manage Partner Program Enrollment (Data) Resource: Partner Program Enrollment
Partner Program Enrollment	A Marketing VP can manage partner program enrollment a member of an access group associated to the partner program enrollment with update access	Role: Access Groups Enablement Privilege: Manage Partner Program Enrollment (Data) Resource: Partner Program Enrollment
Partner Program Enrollment	A Marketing VP can view partner program enrollment a member of an access group associated to the partner program enrollment	Role: Access Groups Enablement Privilege: View Partner Program Enrollment (Data) Resource: Partner Program Enrollment
Price Book	A Marketing VP can delete price book a member of an access group associated to the price book with delete access	Role: Access Groups Enablement Privilege: Delete Price Book (Data) Resource: Price Book
Price Book	A Marketing VP can update price book a member of an access group associated to the price book with update access	Role: Access Groups Enablement Privilege: Update Price Book (Data) Resource: Price Book
Price Book	A Marketing VP can view price book a member of an access group associated to the price book	Role: Access Groups Enablement Privilege: View Price Book (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Price Book
Product Group	A Marketing VP can delete product group a member of an access group associated to the product group with delete access	Role: Access Groups Enablement Privilege: Delete Product Group (Data) Resource: Product Group
Product Group	A Marketing VP can update product group a member of an access group associated to the product group with update access	Role: Access Groups Enablement Privilege: Update Product Group (Data) Resource: Product Group
Product Group	A Marketing VP can view product group a member of an access group associated to the product group	Role: Access Groups Enablement Privilege: View Product Group (Data) Resource: Product Group
Products	A Marketing VP can delete product a member of an access group associated to the product with delete access	Role: Access Groups Enablement Privilege: Delete Product (Data) Resource: Products
Products	A Marketing VP can update product a member of an access group associated to the product with update access	Role: Access Groups Enablement Privilege: Update Product (Data) Resource: Products

Trading Community Resource Profile	A Partner Sales Representative can remove trading community resource a member of an access group associated to the resource with delete access	Role: Access Groups Enablement Privilege: Remove Trading Community Resource (Data) Resource: Trading Community Resource Profile
Trading Community Resource Profile	A Partner Sales Representative can update trading community resource a member of an	Role: Access Groups Enablement

Business Object	Policy Description	Policy Store Implementation
	access group associated to the resource with full access	Privilege: Update Trading Community Resource (Data) Resource: Trading Community Resource Profile
User Context Data	A Partner Sales Representative can view user context data for their user context data in the enterprise	Role: Partner Sales Representative Privilege: View User Context (Data) Resource: User Context Data

Privacy

This table lists data security policies for privacy for the Partner Sales Representative job role.

Business Object	Policy Description	Policy Store Implementation
Trading Community Person Phone	A Partner Sales Representative manage trading community person phone for all trading community person mobile phone numbers	Role: Partner Sales Representative Privilege: Manage Trading Community Person Mobile Phone Number Resource: Trading Community Person Phone
Trading Community Person Phone	A Partner Sales Representative view trading community person phone for all trading community person mobile phone numbers	Role: Partner Sales Representative Privilege: View Trading Community Person Mobile Phone Number Resource: Trading Community Person Phone

Product Data Steward (Job Role)

Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.

Role Hierarchy

The Product Data Steward job role directly and indirectly inherits these roles.

- Product Data Steward
  - Download data for Product Catalog Export
  - Guided Tasks
    - Product Management Guided Task Builder
      - Use REST Service - Journey Categories
      - Use REST Service - Journey Categories List of Values
      - Use REST Service - Journey Templates
    - Product Management Guided Task Exploration
      - Use REST Service - Journeys
    - Product Management My Guided Task Access
      - Use REST Service - Assigned Journeys
  - Item Inquiry
  - Item Management
  - Manage Delete Group
  - Manage Guided Journeys
  - Manage Product for Pedigree and Serialization
  - Manage Publication Map
  - Manage Spoke System
  - Product Common Management
    - Guided Tasks Run Time
      - Product Management Guided Task Exploration
        - Use REST Service - Journeys
    - Guided Tasks View
      - Product Management My Guided Task Access
        - Use REST Service - Assigned Journeys
    - Product Catalog Transaction Analysis
      - Business Intelligence Authoring
  - Product Hub Administration
    - Configure Index
    - Configure Views
    - Guided Tasks
      - Product Management Guided Task Builder
        - Use REST Service - Journey Categories
        - Use REST Service - Journey Categories List of Values
        - Use REST Service - Journey Templates
      - Product Management Guided Task Exploration
        - Use REST Service - Journeys

        - Product Management My Guided Task Access
            - Use REST Service - Assigned Journeys
    - Guided Tasks Builder
        - Product Management Guided Task Builder
            - Use REST Service - Journey Categories
            - Use REST Service - Journey Categories List of Values
            - Use REST Service - Journey Templates
    - Guided Tasks Run Time
        - Product Management Guided Task Exploration
            - Use REST Service - Journeys
    - Guided Tasks View
        - Product Management My Guided Task Access
            - Use REST Service - Assigned Journeys
    - Product Model Administration
        - FSCM Load Interface Administration
        - Functional Setups
- Product Search
- Supply Chain Management Folder Reporting
- Upload and Download data for Product Catalog images
- Upload and Download data for Product Catalog schema
- Upload data for Item Import
- Upload data for Product Catalog Import
- Use REST Service - Guided Journey Responses
- Use REST Service - Guided Journeys Read Only

Duties

This table lists the duties assigned directly and indirectly to the Product Data Steward job role.

Duty Role	Description
Business Intelligence Authoring	An author of Business Intelligence reports as presented in the web catalog. The role allows authoring within Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office.
Configure Index	Manage search index configurations.
Configure Views	Manage view configurations.
Download data for Product Catalog Export	Allows to download data exported from Product Catalog related data.
FSCM Load Interface Administration	Manages load interface file for import

Duty Role	Description
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Guided Tasks	Manages guided tasks.
Guided Tasks Builder	Manages configuration of guided tasks.
Guided Tasks Run Time	Manages of running guided tasks.
Guided Tasks View	Manages of viewing guided tasks progress and status.
Item Inquiry	Queries and views items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.
Manage Product for Pedigree and Serialization	Duty role to manage Product.
Manage Publication Map	Manages publication maps for publishing content.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.
Product Catalog Transaction Analysis	Analyzes Product Catalog transactional information
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.
Product Management Guided Task Builder	Allows management of product management guided tasks and task categories (product management journeys and journey categories).
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).
Product Management My Guided Task Access	Allows product management users to access their own guided tasks (product management assigned journeys).
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.

Duty Role	Description
Product Search	Manages product searches.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
Transactional Analysis	This duty is used for various generic OTBI security and filtering purposes and is therefore required for all OTBI users.
Upload and Download data for Product Catalog images	Allows to upload and download Product Catalog images.
Upload and Download data for Product Catalog schema	Allows to upload and download Product Catalog schema.
Upload data for Item Import	Allows access to import items and related information.
Upload data for Product Catalog Import	Allows to upload data file to import Product Catalog related data.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Product Data Steward job role.

Aggregate Privilege	Description
Manage Guided Journeys	Allows management of guided journeys.
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - Journey Categories	Allows the user to call all methods associated with the Journey Categories REST Service.
Use REST Service - Journey Categories List of Values	Allows the user to call the GET method associated with the Journey Categories List of Values REST Service.
Use REST Service - Journey Templates	Allows the user to call all methods associated with the Journey Templates REST Service.

Aggregate Privilege	Description
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.

Privileges

This table lists privileges granted to duties of the Product Data Steward job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Configure Index	Manage search index configurations.	Access Manufacturer Attributes for Indexing Using REST	Allows access to manufacturer attributes that are available for indexing, using a REST service.
Configure Index	Manage search index configurations.	GET Product Management Index REST	Allows access to view indexed attributes.
Configure Index	Manage search index configurations.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Configure Index	Manage search index configurations.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Configure Index	Manage search index configurations.	Manage Product Management Index	Allows access to view and edit the index for an object.
Configure Index	Manage search index configurations.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Configure Index	Manage search index configurations.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Configure Index	Manage search index configurations.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Configure Index	Manage search index configurations.	Rebuild Product Management Indexes	Allow access to ESS Job PMESIndexMaintenanceJob to maintain Product Management Indexes.
Configure Views	Manage view configurations.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.

Granted Role	Granted Role Description	Privilege	Privilege Description
Configure Views	Manage view configurations.	GET Product Management Index REST	Allows access to view indexed attributes.
Configure Views	Manage view configurations.	Get View Available Attribute REST	Allows access to query and view available attributes for the view.
Configure Views	Manage view configurations.	Manage Product Management View	Allows access to view and edit the view for an object.
Configure Views	Manage view configurations.	Manage Search View REST	Allows access to view and manage search views.
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Guided Tasks	Manages guided tasks.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Guided Tasks	Manages guided tasks.	Run Guided Tasks	Allows access to run guided task flows.

Granted Role	Granted Role Description	Privilege	Privilege Description
Guided Tasks	Manages guided tasks.	View Guided Tasks	Allows view access to guided tasks.
Guided Tasks Builder	Manages configuration of guided tasks.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Guided Tasks Run Time	Manages of running guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks View	Manages of viewing guided tasks progress and status.	View Guided Tasks	Allows view access to guided tasks.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Configure Item Extended Attributes	Allows configuration of item extended attributes.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Item Structure	Allows access to create item structure action from regional task pane.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Trading Partner	Allows access to creation of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Delete Trading Partners	Allows access to deletion of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item	Allows access to browse items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Lifecycle Phase Change	Allows access to change lifecycle phase of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Organization Association	Allows access to manage item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Relationship	Allows access to manage item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Status Change	Allows access to change status of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Work List	Allows access to manage item work list entries.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Product Audit Trail Reports	Allows management of audit data for products.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Modify Trading Partners	Allows access to modify of trading partners.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Summary	Allows access to items overview page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Work Area	Allows access to items and notifications page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Development Structures	Allows access to development structures.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item	Allows access to product dashboard.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item History	Allows viewing of audit data for an item.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Organization Association	Allows access to view item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Relationship	Allows access to view item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Trading Partner Item	Allows access to view trading partner items.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Access Change Order Using a REST Service	Permits access to change order using REST services
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Access Item Structure Data Using a REST Service	Permits access to retrieve component data for item structures using REST services.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	GET Product Management Index REST	Allows access to view indexed attributes.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Get Search View REST	Allows query of search views.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Manage Delete Group Rest	Allows full access to Manage Delete Group page through Rest API.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Manage Item Delete Group	Allows access to manage delete groups in order to purge items, product structures, packs, change orders, and new item requests.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	View Product Management Search	Allows access to view Product Management Search.
Manage Product for Pedigree and Serialization	Duty role to manage Product.	Create Product for Pedigree and Serialization	Privilege to define the attributes of the shippable product. Products contain: Regulatory Information, Serial Generation Information, and Item Cross Reference Information.
Manage Product for Pedigree and Serialization	Duty role to manage Product.	Delete Product for Pedigree and Serialization	Privilege to delete a product that does not have any associated serials, transactions or lots.
Manage Product for Pedigree and Serialization	Duty role to manage Product.	Edit Product for Pedigree and Serialization	Privilege to edit product information associated with the management of serial numbers.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Publication Map	Manages publication maps for publishing content.	Manage Publication Maps	Allows management of the publication maps through the Publication Map user interface.
Manage Publication Map	Manages publication maps for publishing content.	Manage Publication Maps REST	Allows management of the publication maps through the REST API.
Manage Publication Map	Manages publication maps for publishing content.	Manage Publishable Attributes REST	Allows management of the publishable attributes through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Access Change Order Using a REST Service	Permits access to change order using REST services
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Access Item Structure Data Using a REST Service	Permits access to retrieve component data for item structures using REST services.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Get Item Rule Set Rest	Allows query access to item rule sets through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage File Import and Export	Privilege to manage import and export of files.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Item Source System	Allows management of batch options for source systems.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Publication Maps REST	Allows management of the publication maps through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Publishable Attributes REST	Allows management of the publishable attributes through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Spoke System Import Options Rest	Allows full access to the import option for the spoke system through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Spoke System Rest	Allows full access to spokes systems through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Analyze Change Order	Allows users to route the change order from draft to open status.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Change Order	Allows access to create change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Item Pack	Allows access to create pack action from regional task pane.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Generate Item Change Order Report	Allows access to generate item change order reports.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Search View REST	Allows query of search views.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Import Item	Allows access to import items and related information.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Orders	Allows access to view and edit change orders. Does not include access to view and edit change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Requests	Allows access to view and edit change requests.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Change Order	Allows access to manage item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Delete Group	Allows access to manage delete groups in order to purge items, product structures, packs, change orders, and new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Supplier Association	Allows access to manage item supplier site organizations and the association details.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage New Item Request	Allows access to manage new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Modify Change Status	Allows users to modify the status of a change order through routing.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Catalog Summary	Allows access to catalogs overview page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Change Order Summary	Allows access to change orders overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Dashboard	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Summary	Allows access to items overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Work Area	Allows access to items and notifications page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor New Item Request Summary	Allows access to new item requests overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Product Management Workflow Objects	Allows access to Product Management workflow objects.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Reschedule Item Change Order	Allows rescheduling of change orders.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Run Guided Tasks	Allows access to run guided task flows.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Order	Allows access to view change orders. Does not allow access to view change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Request	Allows access to view change requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Change Order	Allows access to search and view item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Supplier Association	Allows access to view item supplier site organizations and the association details.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View New Item Request	Allows access to search and view new item requests.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Product Management Search	Allows access to view Product Management Search.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Check Item Data Quality	Allows access to check item data quality including data standardization.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Generate Access Token	Allows the generation of access token for smart spreadsheets.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Manage Application Data Security Policy	Allows management of security policies that restrict access to functions and data, such as preventing particular values from being accessed in a chart of account segment.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation.	Manage Application Database Resource	Manage application database resources for data security

Granted Role	Granted Role Description	Privilege	Privilege Description
	Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.		
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Manage Assignee	Allows you to modify the assignee of an object, such as a change order, change request, problem report or corrective action.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Manage Configured Item Exceptions	Privilege to allow user to view, resubmit and discard Configured Item exception messages.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Source System	Allows management of batch options for source systems.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Upload Rest	Allows full access to item uploads through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Product Management Data Upgrade	Allows access to Upgrade Product Management ESS Job.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Related Item Relationship Rest	Allows full access to related item relationship through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Source System Descriptive Flexfields	Allows the specification of additional fields to enter and track information that is not otherwise captured. Descriptive flexfields can be validated and dependent on other values entered in other areas of the page.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Community Import Lookups	Allows reviewing and defining of lookup values that provide choices related to data import batch processing, such as batch status, batch identifier, batch configuration, and process status.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Community Original System	Allows the update of original system information.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Community Source System Lookups	Allows the specification of lookup values that provide choices related to the source system model, such as original system types.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Partner Item Relationship Rest	Allows full access to trading partner item relationship through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Partner Item Rest	Allows full access to trading partner Item through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Process Oracle Fusion Data Extensions for Transactional Business Intelligence	Allows a process to be run that makes Oracle Fusion data extensions available to Transactional Business Intelligence.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Refresh Material View	Allows access to refresh the material view of Product Management objects.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Update Enterprise Application Deployment Information	Allows updating deployment information of an enterprise application.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	View Audit History	Allows to view the audit history of all the business object attributes enabled for auditing.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Manufacturer Attributes for Indexing Using REST	Allows access to manufacturer attributes that are available for indexing, using a REST service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Configure Access Control Teams, Permission Sets, and Conditions	Allows configuration of teams, permission sets, and conditions using the UI or the REST interface.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Category Rest	Allows query access to item categories through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Class Rest	Allows query access to item Classes through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Cost Rest	Allows query access to item costs through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Rest	Allows query access to items through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Search View REST	Allows query of search views.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get View Available Attribute REST	Allows access to query and view available attributes for the view.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Import Item	Allows access to import items and related information.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage File Import and Export	Privilege to manage import and export of files.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Attribute Control	Allows access to manage attribute controls on item operational attributes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Change Order Status	Allows access to create and manage statuses for change orders.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Change Order Type	Allows access to create and manage change order types.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Child Value Set	Allows access to create and manage child value sets.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Class	Allows access to view and manage item classes including item class hierarchy.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Cost Rest	Allows management of item costs through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Default Functional Area	Allows access to manage default item catalog associations to functional areas.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Keyword Search Attribute	Allow management of attributes that are added to the keyword search.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Lifecycle Phase	Allows access to create and manage item lifecycle phases.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Status	Allows access to manage item statuses.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Structure Type	Allows access to manage item structure type details.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty	Manage Product Management Index	Allows access to view and edit the index for an object.

Granted Role	Granted Role Description	Privilege	Privilege Description

Resource	Identifies the person as front office personnel.	View Trading Community Resource Organization Memberships	Allows viewing of sales, marketing, and partner organization information.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Organization Team Memberships	Allows viewing of sales, marketing, and partner team membership information.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Organization Usage Information	Allows viewing of sales, marketing, and partner organization usage information.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Overview Information	Allows viewing of an overview for partner, marketing, and sales organization transaction information. If assigning, also assign the ability to view trading community resource details.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Profile	Allows viewing of resource profile information. If assigning, also assign the ability to view trading community resource details.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Role Assignments	Allows viewing of resource role assignments. If assigning, also assign the ability to view trading community resource details.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Sales Representative Information	Allows viewing of salesperson setup information, such as sales credits.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Skills	Allows viewing of resource skills information, such as language, competencies, and product expertise. If assigning, also assign the ability to view trading community resource details.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Social Network	Allows viewing of a resource's social network.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Team	Allows viewing of resource team information.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Team Details	Allows viewing of resource team details.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Team Members	Allows viewing of resource team members.

Granted Role	Granted Role Description	Privilege	Privilege Description
Resource	Identifies the person as front office personnel.	View Trading Community Resource Team Memberships	Allows viewing of resource team memberships. If assigning, also assign the ability to view trading community resource details.
Resource	Identifies the person as front office personnel.	View Trading Community Resource Team Usages	Allows viewing of resource team usages.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Resource abstract role.

Business Object	Policy Description	Policy Store Implementation
Activity	A Resource can delete activity a member of an access group associated to the activity with delete access	Role: Access Groups Enablement Privilege: Delete Activity (Data) Resource: Activity
Activity	A Resource can update activity a member of an access group associated to the activity with update access	Role: Access Groups Enablement Privilege: Update Activity (Data) Resource: Activity
Activity	A Resource can view activity a member of an access group associated to the activity	Role: Access Groups Enablement Privilege: View Activity (Data) Resource: Activity
CRM Asset	A Resource can delete asset a member of an access group associated to the asset with delete access	Role: Access Groups Enablement Privilege: Delete Asset (Data) Resource: CRM Asset
CRM Asset	A Resource can update asset a member of an access group associated to the asset with update access	Role: Access Groups Enablement Privilege: Update Asset (Data) Resource: CRM Asset
CRM Asset	A Resource can view asset a member of an access group associated to the asset	Role: Access Groups Enablement Privilege: View Asset (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: CRM Asset
Cases	A Resource can delete case header a member of an access group associated to the case with delete access	Role: Access Groups Enablement Privilege: Delete Case Header (Data) Resource: Cases
Cases	A Resource can update case header a member of an access group associated to the case with update access	Role: Access Groups Enablement Privilege: Update Case Header (Data) Resource: Cases
Cases	A Resource can view case header a member of an access group associated to the case	Role: Access Groups Enablement Privilege: View Case Header (Data) Resource: Cases
Conversation	A Resource can delete conversation a member of an access group associated to the conversation with delete access	Role: Access Groups Enablement Privilege: Delete Conversation (Data) Resource: Conversation
Conversation	A Resource can update conversation a member of an access group associated to the conversation with update access	Role: Access Groups Enablement Privilege: Update Conversation (Data) Resource: Conversation
Conversation	A Resource can view conversation a member of an access group associated to the conversation	Role: Access Groups Enablement Privilege: View Conversation (Data) Resource: Conversation
Conversation Message	A Resource can delete conversation message a member of an access group associated to the conversation message with delete access	Role: Access Groups Enablement Privilege: Delete Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Resource can update conversation message a member of an access group associated to the conversation message with update access	Role: Access Groups Enablement Privilege: Update Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Resource can view conversation message a member of an access group associated to the conversation message	Role: Access Groups Enablement Privilege: View Conversation Message (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Conversation Message
Deal Registration Product	A Resource can manage deal registration product a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Product	A Resource can view deal registration product a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Summary	A Resource can update deal registration approval details a member of an access group associated to the deal registration with update or full access and deal is in pending approval status	Role: Access Groups Enablement Privilege: Update Deal Registration Approval Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Resource can update deal registration deal details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Resource can update deal registration deal details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Resource can update deal registration opportunity details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Resource can update deal registration opportunity details a member of an access group associated to the deal registration with update access and deal is in pending approval or approved status	Role: Access Groups Enablement Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Resource can update deal registration partner details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status and the deal is created by an internal user	Role: Access Groups Enablement Privilege: Update Deal Registration Partner Details (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Deal Registration Summary
Deal Registration Summary	A Resource can view deal registration a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration (Data) Resource: Deal Registration Summary
Deal Registration Team	A Resource can manage deal registration team a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Team (Data) Resource: Deal Registration Team
Deal Registration Team	A Resource can view deal registration team a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Team (Data) Resource: Deal Registration Team
Express Report Definitions	A Resource can delete express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with delete access	Role: Access Groups Enablement Privilege: Delete Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Resource can update express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with update access	Role: Access Groups Enablement Privilege: Update Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Resource can view express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting	Role: Access Groups Enablement Privilege: View Express Report (Data) Resource: Express Report Definitions
Field Service Work Order	A Resource can delete field service work order a member of an access group associated to the field service work order with delete access	Role: Access Groups Enablement Privilege: Delete Field Service Work Order (Data) Resource: Field Service Work Order
Field Service Work Order	A Resource can update field service work order a member of an access group associated to the field service work order with update access	Role: Access Groups Enablement Privilege: Update Field Service Work Order (Data) Resource: Field Service Work Order

Business Object	Policy Description	Policy Store Implementation
Field Service Work Order	A Resource can view field service work order a member of an access group associated to the field service work order	Role: Access Groups Enablement Privilege: View Field Service Work Order (Data) Resource: Field Service Work Order
MDF Budget	A Resource can delete marketing budget a member of an access group associated to the mdf budget with delete access and budget status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Budget (Data) Resource: MDF Budget
MDF Budget	A Resource can update marketing budget a member of an access group associated to the mdf budget with update access	Role: Access Groups Enablement Privilege: Update Marketing Budget (Data) Resource: MDF Budget
MDF Budget	A Resource can view marketing budget a member of an access group associated to the mdf budget	Role: Access Groups Enablement Privilege: View Marketing Budget (Data) Resource: MDF Budget
MDF Budget Team	A Resource can delete marketing budget team a member of an access group associated to the mdf budget with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Budget Team	A Resource can update marketing budget team a member of an access group associated to the mdf budget with update access	Role: Access Groups Enablement Privilege: Update Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Budget Team	A Resource can view marketing budget team a member of an access group associated to the mdf budget	Role: Access Groups Enablement Privilege: View Marketing Budget Team (Data) Resource: MDF Budget Team
MDF Claim	A Resource can delete marketing claim a member of an access group associated to the mdf claim with delete or full access and the claim status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Claim (Data) Resource: MDF Claim
MDF Claim	A Resource can update marketing claim approval details a member of an access group associated to the mdf claim with update or full access and the claim status is pending approval	Role: Access Groups Enablement Privilege: Update Marketing Claim Approval Details (Data) Resource: MDF Claim

Business Object	Policy Description	Policy Store Implementation
MDF Claim	A Resource can update marketing claim details a member of an access group associated to the mdf claim with update or full access and the claim status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Claim Details (Data) Resource: MDF Claim
MDF Claim	A Resource can update marketing claim partner details a member of an access group associated to the mdf claim with update or full access and the claim status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Claim Partner Details (Data) Resource: MDF Claim
MDF Claim	A Resource can view marketing claim a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim (Data) Resource: MDF Claim
MDF Claim Settlement	A Resource can delete marketing claim settlement a member of an access group associated to the mdf claim with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Resource can update marketing claim settlement a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Resource can update marketing claim settlement details a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Settlement Details (Data) Resource: MDF Claim Settlement
MDF Claim Settlement	A Resource can view marketing claim settlement a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim Settlement (Data) Resource: MDF Claim Settlement
MDF Claim Team	A Resource can delete marketing claim team a member of an access group associated to the mdf claim with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Claim Team (Data) Resource: MDF Claim Team

Business Object	Policy Description	Policy Store Implementation
MDF Claim Team	A Resource can update marketing claim team a member of an access group associated to the mdf claim with update access	Role: Access Groups Enablement Privilege: Update Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Claim Team	A Resource can view marketing claim team a member of an access group associated to the mdf claim	Role: Access Groups Enablement Privilege: View Marketing Claim Team (Data) Resource: MDF Claim Team
MDF Request	A Resource can delete marketing fund request a member of an access group associated to the mdf request with delete access and the request status is draft	Role: Access Groups Enablement Privilege: Delete Marketing Fund Request (Data) Resource: MDF Request
MDF Request	A Resource can update marketing fund request approval details a member of an access group associated to the mdf request with update or full access and the request status is pending approval	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Approval Details (Data) Resource: MDF Request
MDF Request	A Resource can update marketing fund request details a member of an access group associated to the mdf request with update or full access and the request status is draft, returned, failed or withdrawn	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Details (Data) Resource: MDF Request
MDF Request	A Resource can update marketing fund request partner details a member of an access group associated to the mdf request with update or full access and request is in draft, returned, failed or withdrawn status and the request is created by an internal user	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Partner Details (Data) Resource: MDF Request
MDF Request	A Resource can view marketing fund request a member of an access group associated to the mdf request	Role: Access Groups Enablement Privilege: View Marketing Fund Request (Data) Resource: MDF Request
MDF Request Team	A Resource can delete marketing fund request team a member of an access group associated to the mdf request with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Fund Request Team (Data) Resource: MDF Request Team

Business Object	Policy Description	Policy Store Implementation
MDF Request Team	A Resource can update marketing fund request team a member of an access group associated to the mdf request with update access	Role: Access Groups Enablement Privilege: Update Marketing Fund Request Team (Data) Resource: MDF Request Team
MDF Request Team	A Resource can view marketing fund request team a member of an access group associated to the mdf request	Role: Access Groups Enablement Privilege: View Marketing Fund Request Team (Data) Resource: MDF Request Team
Marketing Integration Campaign	A Resource can delete marketing integration campaign a member of an access group associated to the marketing integration campaign with delete access	Role: Access Groups Enablement Privilege: Delete Marketing Integration Campaign (Data) Resource: Marketing Integration Campaign
Marketing Integration Campaign	A Resource can update marketing integration campaign a member of an access group associated to the marketing integration campaign with update access	Role: Access Groups Enablement Privilege: Update Marketing Integration Campaign (Data) Resource: Marketing Integration Campaign
Marketing Integration Campaign	A Resource can view marketing integration campaign a member of an access group associated to the marketing integration campaign	Role: Access Groups Enablement Privilege: View Marketing Integration Campaign (Data) Resource: Marketing Integration Campaign
Note	A Resource can delete note a member of an access group associated to the note with delete access	Role: Access Groups Enablement Privilege: Delete Note (Data) Resource: Note
Note	A Resource can update note a member of an access group associated to the note with update access	Role: Access Groups Enablement Privilege: Update Note (Data) Resource: Note
Note	A Resource can view note a member of an access group associated to the note	Role: Access Groups Enablement Privilege: View Note (Data) Resource: Note

Business Object	Policy Description	Policy Store Implementation
Opportunity	A Resource can manage opportunity general profile a member of an access group associated to the opportunity with update access	Role: Access Groups Enablement Privilege: Manage Opportunity General Profile (Data) Resource: Opportunity
Opportunity	A Resource can manage opportunity restricted profile a member of an access group associated to the opportunity with delete access	Role: Access Groups Enablement Privilege: Manage Opportunity Restricted Profile (Data) Resource: Opportunity
Opportunity	A Resource can manage opportunity revenue a member of an access group associated to the opportunity with full access	Role: Access Groups Enablement Privilege: Manage Opportunity Revenue (Data) Resource: Opportunity
Opportunity	A Resource can manage opportunity team a member of an access group associated to the opportunity with full access	Role: Access Groups Enablement Privilege: Manage Opportunity Team (Data) Resource: Opportunity
Opportunity	A Resource can view opportunity a member of an access group associated to the opportunity	Role: Access Groups Enablement Privilege: View Opportunity (Data) Resource: Opportunity
Partner Profile	A Resource can manage partner account a member of an access group associated to the partner with update access	Role: Access Groups Enablement Privilege: Manage Partner Account (Data) Resource: Partner Profile
Partner Profile	A Resource can update partner account a member of an access group associated to the partner with update access	Role: Access Groups Enablement Privilege: Update Partner Account (Data) Resource: Partner Profile
Partner Program Enrollment	A Resource can manage partner program enrollment a member of an access group associated to the partner program enrollment with delete access	Role: Access Groups Enablement Privilege: Manage Partner Program Enrollment (Data) Resource: Partner Program Enrollment
Partner Program Enrollment	A Resource can manage partner program enrollment a member of an access group associated to the partner program enrollment with update access	Role: Access Groups Enablement Privilege: Manage Partner Program Enrollment (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Partner Program Enrollment
Partner Program Enrollment	A Resource can view partner program enrollment a member of an access group associated to the partner program enrollment	Role: Access Groups Enablement Privilege: View Partner Program Enrollment (Data) Resource: Partner Program Enrollment
Price Book	A Resource can delete price book a member of an access group associated to the price book with delete access	Role: Access Groups Enablement Privilege: Delete Price Book (Data) Resource: Price Book
Price Book	A Resource can update price book a member of an access group associated to the price book with update access	Role: Access Groups Enablement Privilege: Update Price Book (Data) Resource: Price Book
Price Book	A Resource can view price book a member of an access group associated to the price book	Role: Access Groups Enablement Privilege: View Price Book (Data) Resource: Price Book
Product Group	A Resource can delete product group a member of an access group associated to the product group with delete access	Role: Access Groups Enablement Privilege: Delete Product Group (Data) Resource: Product Group
Product Group	A Resource can update product group a member of an access group associated to the product group with update access	Role: Access Groups Enablement Privilege: Update Product Group (Data) Resource: Product Group
Product Group	A Resource can view product group a member of an access group associated to the product group	Role: Access Groups Enablement Privilege: View Product Group (Data) Resource: Product Group
Products	A Resource can delete product a member of an access group associated to the product with delete access	Role: Access Groups Enablement Privilege: Delete Product (Data) Resource: Products

Business Object	Policy Description	Policy Store Implementation
Products	A Resource can update product a member of an access group associated to the product with update access	Role: Access Groups Enablement Privilege: Update Product (Data) Resource: Products
Products	A Resource can view product a member of an access group associated to the product	Role: Access Groups Enablement Privilege: View Product (Data) Resource: Products
Public Person	A Resource can view person deferred for persons and assignments in their person and assignment security profile	Role: Use User Details Service Privilege: View Person Deferred (Data) Resource: Public Person
Sales Business Plan	A Resource can delete sales business plan a member of an access group associated to the business plan with delete access	Role: Access Groups Enablement Privilege: Delete Sales Business Plan (Data) Resource: Sales Business Plan
Sales Business Plan	A Resource can update sales business plan general a member of an access group associated to the business plan with update access	Role: Access Groups Enablement Privilege: Update Sales Business Plan General (Data) Resource: Sales Business Plan
Sales Business Plan	A Resource can update sales business plan status a member of an access group associated to the business plan with full access	Role: Access Groups Enablement Privilege: Update Sales Business Plan Status (Data) Resource: Sales Business Plan
Sales Business Plan	A Resource can view sales business plan a member of an access group associated to the business plan	Role: Access Groups Enablement Privilege: View Sales Business Plan (Data) Resource: Sales Business Plan
Sales Business Plan Team	A Resource can manage sales business plan team a member of an access group associated to the business plan with full access	Role: Access Groups Enablement Privilege: Manage Sales Business Plan Team (Data) Resource: Sales Business Plan Team
Sales Competitor	A Resource can manage sales competitor a member of an access group associated to the sales competitor with update access	Role: Access Groups Enablement Privilege: Manage Sales Competitor (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Sales Competitor
Sales Competitor	A Resource can view sales competitor a member of an access group associated to the sales competitor	Role: Access Groups Enablement Privilege: View Sales Competitor (Data) Resource: Sales Competitor
Sales Contests	A Resource can delete sales contest a member of an access group associated to the contest with delete access	Role: Access Groups Enablement Privilege: Delete Sales Contest (Data) Resource: Sales Contests
Sales Contests	A Resource can update sales contest a member of an access group associated to the contest with update access	Role: Access Groups Enablement Privilege: Update Sales Contest (Data) Resource: Sales Contests
Sales Contests	A Resource can view sales contest a member of an access group associated to the contest	Role: Access Groups Enablement Privilege: View Sales Contest (Data) Resource: Sales Contests
Sales Forecast	A Resource can delete sales forecast participants a member of an access group associated to the sales forecast with delete access	Role: Access Groups Enablement Privilege: Delete Sales Forecast Participants (Data) Resource: Sales Forecast
Sales Forecast	A Resource can update sales forecast participants a member of an access group associated to the sales forecast with update access	Role: Access Groups Enablement Privilege: Update Sales Forecast Participants (Data) Resource: Sales Forecast
Sales Forecast	A Resource can view sales forecast participants a member of an access group associated to the sales forecast with read access	Role: Access Groups Enablement Privilege: View Sales Forecast Participants (Data) Resource: Sales Forecast
Sales Forecast Item	A Resource can manage sales forecast item a member of an access group associated to the territory forecast with full access	Role: Access Groups Enablement Privilege: Manage Sales Forecast Item (Data) Resource: Sales Forecast Item

Business Object	Policy Description	Policy Store Implementation
Sales Forecast Participant	A Resource can manage sales forecast participant a member of an access group associated to the territory forecast with full access	Role: Access Groups Enablement Privilege: Manage Sales Forecast Participant (Data) Resource: Sales Forecast Participant
Sales Goal Participants	A Resource can delete sales goal participants a member of an access group associated to the goal participant with delete access	Role: Access Groups Enablement Privilege: Delete Sales Goal Participants (Data) Resource: Sales Goal Participants
Sales Goal Participants	A Resource can update sales goal participants a member of an access group associated to the goal participant with update access	Role: Access Groups Enablement Privilege: Update Sales Goal Participants (Data) Resource: Sales Goal Participants
Sales Goal Participants	A Resource can view sales goal participants a member of an access group associated to the goal participant	Role: Access Groups Enablement Privilege: View Sales Goal Participants (Data) Resource: Sales Goal Participants
Sales Goals	A Resource can delete sales goal a member of an access group associated to the goal with delete access	Role: Access Groups Enablement Privilege: Delete Sales Goal (Data) Resource: Sales Goals
Sales Goals	A Resource can update sales goal a member of an access group associated to the goal with update access	Role: Access Groups Enablement Privilege: Update Sales Goal (Data) Resource: Sales Goals
Sales Goals	A Resource can view sales goal a member of an access group associated to the goal	Role: Access Groups Enablement Privilege: View Sales Goal (Data) Resource: Sales Goals
Sales KPI	A Resource can delete sales kpi a member of an access group associated to the kpi with delete access	Role: Access Groups Enablement Privilege: Delete Sales KPI (Data) Resource: Sales KPI
Sales KPI	A Resource can update sales kpi a member of an access group associated to the kpi with update access	Role: Access Groups Enablement Privilege: Update Sales KPI (Data) Resource: Sales KPI

Business Object	Policy Description	Policy Store Implementation
Sales KPI	A Resource can view sales kpi a member of an access group associated to the kpi	Role: Access Groups Enablement Privilege: View Sales KPI (Data) Resource: Sales KPI
Sales Lead	A Resource can convert sales lead a member of an access group associated to the sales lead with full access	Role: Access Groups Enablement Privilege: Convert Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Resource can delete sales lead a member of an access group associated to the sales lead with delete access	Role: Access Groups Enablement Privilege: Delete Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Resource can update sales lead a member of an access group associated to the sales lead with update access	Role: Access Groups Enablement Privilege: Update Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Resource can view sales lead a member of an access group associated to the sales lead	Role: Access Groups Enablement Privilege: View Sales Lead (Data) Resource: Sales Lead
Sales Objective	A Resource can delete sales objective a member of an access group associated to the sales business plan with delete access	Role: Access Groups Enablement Privilege: Delete Sales Objective (Data) Resource: Sales Objective
Sales Objective	A Resource can update sales objective attainment a member of an access group associated to the sales business plan with full access	Role: Access Groups Enablement Privilege: Update Sales Objective Attainment (Data) Resource: Sales Objective
Sales Objective	A Resource can update sales objective general a member of an access group associated to the sales business plan with update access	Role: Access Groups Enablement Privilege: Update Sales Objective General (Data) Resource: Sales Objective
Sales Objective	A Resource can view sales objective a member of an access group associated to the sales business plan	Role: Access Groups Enablement Privilege: View Sales Objective (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Sales Objective
Sales Order	A Resource can view sales order a member of an access group associated to the sales order	Role: Access Groups Enablement Privilege: View Sales Order (Data) Resource: Sales Order
Sales Quota Plan	A Resource can view sales quota plan a member of an access group associated to the sales quota plan with read access	Role: Access Groups Enablement Privilege: View Sales Quota Plan (Data) Resource: Sales Quota Plan
Sales Resource Quota	A Resource can manage sales resource quota a member of an access group associated to the sales resource quota with delete access	Role: Access Groups Enablement Privilege: Manage Sales Resource Quota (Data) Resource: Sales Resource Quota
Sales Resource Quota	A Resource can manage sales resource quota a member of an access group associated to the sales resource quota with update access	Role: Access Groups Enablement Privilege: Manage Sales Resource Quota (Data) Resource: Sales Resource Quota
Sales Resource Quota	A Resource can view sales resource quota a member of an access group associated to the sales resource quota with read access	Role: Access Groups Enablement Privilege: View Sales Resource Quota (Data) Resource: Sales Resource Quota
Sales Territory	A Resource can manage sales territory a member of an access group associated to the sales territory with delete access	Role: Access Groups Enablement Privilege: Manage Sales Territory (Data) Resource: Sales Territory
Sales Territory	A Resource can manage sales territory a member of an access group associated to the sales territory with update access	Role: Access Groups Enablement Privilege: Manage Sales Territory (Data) Resource: Sales Territory
Sales Territory	A Resource can view sales territory a member of an access group associated to the sales territory with read access	Role: Access Groups Enablement Privilege: View Sales Territory (Data) Resource: Sales Territory
Sales Territory Proposal	A Resource can manage sales territory proposal a member of an access group associated to the sales territory proposal with delete access	Role: Access Groups Enablement Privilege: Manage Sales Territory Proposal (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Sales Territory Proposal
Sales Territory Proposal	A Resource can manage sales territory proposal a member of an access group associated to the sales territory proposal with update access	Role: Access Groups Enablement Privilege: Manage Sales Territory Proposal (Data) Resource: Sales Territory Proposal
Sales Territory Proposal	A Resource can view sales territory proposal a member of an access group associated to the sales territory proposal with read access	Role: Access Groups Enablement Privilege: View Sales Territory Proposal (Data) Resource: Sales Territory Proposal
Service Category	A Resource can delete service category a member of an access group associated to the service category with delete access	Role: Access Groups Enablement Privilege: Delete Service Category (Data) Resource: Service Category
Service Category	A Resource can update service category a member of an access group associated to the service category with update access	Role: Access Groups Enablement Privilege: Update Service Category (Data) Resource: Service Category
Service Category	A Resource can view service category a member of an access group associated to the service category	Role: Access Groups Enablement Privilege: View Service Category (Data) Resource: Service Category
Service Profile	A Resource can delete service profile a member of an access group associated to the service profile with delete access	Role: Access Groups Enablement Privilege: Delete Service Profile (Data) Resource: Service Profile
Service Profile	A Resource can update service profile a member of an access group associated to the service profile with update access	Role: Access Groups Enablement Privilege: Update Service Profile (Data) Resource: Service Profile
Service Profile	A Resource can view service profile a member of an access group associated to the service profile	Role: Access Groups Enablement Privilege: View Service Profile (Data) Resource: Service Profile

Business Object	Policy Description	Policy Store Implementation
Service Request Header	A Resource can delete service request header a member of an access group associated to the service request with delete access	Role: Access Groups Enablement Privilege: Delete Service Request Header (Data) Resource: Service Request Header
Service Request Header	A Resource can update service request header a member of an access group associated to the service request with update access	Role: Access Groups Enablement Privilege: Update Service Request Header (Data) Resource: Service Request Header
Service Request Header	A Resource can view service request header a member of an access group associated to the service request	Role: Access Groups Enablement Privilege: View Service Request Header (Data) Resource: Service Request Header
Service Request Message	A Resource can delete service request message a member of an access group associated to the sr message with delete access	Role: Access Groups Enablement Privilege: Delete Service Request Message (Data) Resource: Service Request Message
Service Request Message	A Resource can update service request message a member of an access group associated to the sr message with update access	Role: Access Groups Enablement Privilege: Update Service Request Message (Data) Resource: Service Request Message
Service Request Message	A Resource can view service request message a member of an access group associated to the sr message	Role: Access Groups Enablement Privilege: View Service Request Message (Data) Resource: Service Request Message
Subscription	A Resource can manage subscription a member of an access group associated to the subscription with delete access	Role: Access Groups Enablement Privilege: Manage Subscription (Data) Resource: Subscription
Subscription	A Resource can update subscription a member of an access group associated to the subscription with update access	Role: Access Groups Enablement Privilege: Update Subscription (Data) Resource: Subscription
Subscription	A Resource can view subscription a member of an access group associated to the subscription	Role: Access Groups Enablement Privilege: View Subscription (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Subscription
Trading Community Contact Preference	A Resource can manage trading community legal contact preference a member of an access group associated to contact preferences.	Role: Access Groups Enablement Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Contact Preference
Trading Community Duplicate Identification Batch	A Resource can manage trading community duplicate identification batch a member of an access group associated to the duplicate identification batch with delete access	Role: Access Groups Enablement Privilege: Manage Trading Community Duplicate Identification Batch (Data) Resource: Trading Community Duplicate Identification Batch
Trading Community Duplicate Identification Batch	A Resource can manage trading community duplicate identification batch a member of an access group associated to the duplicate identification batch with update access	Role: Access Groups Enablement Privilege: Manage Trading Community Duplicate Identification Batch (Data) Resource: Trading Community Duplicate Identification Batch
Trading Community Duplicate Identification Batch	A Resource can view trading community duplicate identification batch a member of an access group associated to the duplicate identification batch with view access	Role: Access Groups Enablement Privilege: View Trading Community Duplicate Identification Batch (Data) Resource: Trading Community Duplicate Identification Batch
Trading Community Duplicate Resolution Request	A Resource can manage trading community duplicate resolution request a member of an access group associated to the duplicate resolution request with delete access	Role: Access Groups Enablement Privilege: Manage Trading Community Duplicate Resolution Request (Data) Resource: Trading Community Duplicate Resolution Request
Trading Community Duplicate Resolution Request	A Resource can manage trading community duplicate resolution request a member of an access group associated to the duplicate resolution request with update access	Role: Access Groups Enablement Privilege: Manage Trading Community Duplicate Resolution Request (Data) Resource: Trading Community Duplicate Resolution Request
Trading Community Duplicate Resolution Request	A Resource can view trading community duplicate resolution request a member of an access group associated to the duplicate resolution request with view access	Role: Access Groups Enablement Privilege: View Trading Community Duplicate Resolution Request (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Trading Community Duplicate Resolution Request
Trading Community Party	A Resource can manage sales party a member of an access group associated to the account with full access	Role: Access Groups Enablement Privilege: Manage Sales Party (Data) Resource: Trading Community Party
Trading Community Party	A Resource can manage sales party a member of an access group associated to the contact with full access	Role: Access Groups Enablement Privilege: Manage Sales Party (Data) Resource: Trading Community Party

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Amendment	Amends approved contracts. This includes initiating an amendment, reverting the contract to the previous signed version, updating all allowable attributes, and submitting the amendment for approval.	View Contract	Allows viewing and printing of a contract and its history, including the contract's financial summary.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	(OBSOLETE) Manage Contract Collaborations	Allows contract collaboration.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Assign Contract Owner	Allows the running of the process that assigns and reassigns the contract owner.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Create Contract	Provides ability to initiate contract creation.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Create Contract Deliverable	Allows creation of a contract deliverable.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Create Contract in Wizard	Provides the ability to initiate contract creation using a wizard.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Delete Contract	Allows the deletion of draft or canceled contracts.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Delete Contract Documents	Not Available
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Delete Supporting Documents	Not Available
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Edit Contract	Allows the editing of contracts, as well as other contract management tasks.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Edit Contract in Wizard	Provides the ability to edit a contract using a wizard.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Generate PDF Contract for Text Search	Allows the running of the process to generate PDFs of draft contracts, or contracts under amendment, so they are available during text searches.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Contract Deliverable	Allows the management of contract terms deliverables after contract approval. This includes setting the status, adding comments, and uploading attachments for contractual deliverables such as proof of insurance and inspections.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Contract Documents	Not Available
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Contract Template	Allows management of a contract templates.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Contract Work Area	Allows the navigation to the contracts work area. This work area provides quick access to relevant tasks and contracts.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Customer Assets	Allows creation and update of customer assets, related configurations and structures.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Electronic Signature	Allows management of electronic signature on a contract.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Meter Reading History	Allows the management of meter reading history.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Meters	Allow the creation and update of meters.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Sales Credits	Not Available
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Manage Supporting Documents	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Merge Contract	Allows merging contracts
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Purge Contract Temporary Tables	Purges all contract temporary tables.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Record Meter Readings	Allows the recording of meter readings.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Renew Contract	Allows renewal of a contract
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Search Contract Template	Allows search of a contract template.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Search Contracts	Allows searches in contracts.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	Send Contract Expiration Notification	Allows the running of the process for sending automatic notifications about contracts with impending expiration dates.
Contract Authoring	Authors contracts, including terms and conditions, interactions, and customer account information.	View Contract	Allows viewing and printing of a contract and its history, including the contract's financial summary.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Export Customer Account	Not Available
Contract Search and View Access	Searches and views contracts for the assigned business units.	Export Customer Account Contact	Allows the export of customer account contact information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Export Customer Account Relationship	Allows the export of customer account contact relationship information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Manage Contract Work Area	Allows the navigation to the contracts work area. This work area provides quick access to relevant tasks and contracts.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Contract Template	Allows search of a contract template.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Contract Text	This privilege is used to search contracts by text
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Contract by Text	Allows searches in contracts by text.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Contracts	Allows searches in contracts.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Customer Account Relationships	Allows the search of customer account relationships. If assigning, also assign the ability to view the customer account relationship.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Purchase Agreement	Allows a procurement agent to search for purchase agreements including blankets and contracts.
Contract Search and View Access	Searches and views contracts for the assigned business units.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Contract	Allows viewing and printing of a contract and its history, including the contract's financial summary.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Contract Template	Not Available
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Contract Terms	Not Available
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account	Allows the viewing of customer account information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account Contact	Allows the viewing of customer account contact information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account Contact Responsibility	Allows the viewing of customer account contact information.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account Information	Not Available
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account Relationship	Allows the viewing of customer account relationship information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account Relationships	Allows the viewing of customer account relationship information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account Site	Allows the viewing of the customer account site information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Account Site Use	Allows the viewing of the customer account site use information.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Customer Assets	Allows query and view of customer assets, related configurations and structures.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Meter Reading History	Allow the query and view of meter reading history.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Meters	Allow the query and view of meters.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Purchase Agreement	Allows a user to review a blanket or contract purchase agreement.
Contract Search and View Access	Searches and views contracts for the assigned business units.	View Purchase Order	Allows a user to review a purchase order.
Contract Setup	Contract Setup	(OBSOLETE) Define Contract Collaboration Configuration	Allows the configuration of contract collaboration.
Contract Setup	Contract Setup	Administer Sandbox	Allows administration of all sandboxes.
Contract Setup	Contract Setup	Build Keyword Search Index for the Contract Terms Library	Allows the running of processes to synchronize and optimize the keyword index for clause and terms template searches in the Contract Terms Library.
Contract Setup	Contract Setup	Configure Contract UI	Allows the configuration of contract UI

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Setup	Contract Setup	Define Endpoint and Security Policy Information	Allows definition of endpoint and security policy information for an enterprise application.
Contract Setup	Contract Setup	Define Project Contract Billing Configuration	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Generate PDF Contract for Text Search	Allows the running of the process to generate PDFs of draft contracts, or contracts under amendment, so they are available during text searches.
Contract Setup	Contract Setup	Manage All Application Profile Values	Allows management of all application profile option settings and values at various levels to control application behavior.
Contract Setup	Contract Setup	Manage Application Common Lookup	Not Available
Contract Setup	Contract Setup	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Contract Setup	Contract Setup	Manage Application Document Sequence	Manage implementation of Application Document Sequences. Document Sequences are identifiers guarenteed to be unique, time-ordered, and gapless. This is in contrast to a database sequence which (for performance purposes) may contain gaps and which might not be ordered by time of document creation. Examples would include ID numbers for traffic tickets or other legal documents where gaps in the record may trigger an investigation.
Contract Setup	Contract Setup	Manage Application Document Sequence Category	Manage document sequence categories
Contract Setup	Contract Setup	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Contract Setup	Contract Setup	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Setup	Contract Setup	Manage Application Set-Enabled Lookup	Manage sub-type entities stored in the Application Set-Enabled Lookup entity. Lookup Types are lists of values such as Days of the Week or Yes/No which can be used to validate column values.
Contract Setup	Contract Setup	Manage Application Standard Lookup	Manage sub-type entities stored in the Application Standard Lookup Values entity. Lookup Types are lists of values such as "Days of the Week" or "Yes/No" which can be used to validate columns values.
Contract Setup	Contract Setup	Manage Contract Currency Conversion Rate Types	Allows the definition of user-defined currency conversion rate types.
Contract Setup	Contract Setup	Manage Contract Customer Account	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Customer Account Site Usages	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Defaults	Allows management of contract defaults
Contract Setup	Contract Setup	Manage Contract Global Employee	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Interaction Reference Mapping	Allows the mapping of interaction types to applications where the interaction types can be used.
Contract Setup	Contract Setup	Manage Contract Layout Templates	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Line Item	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Line Type	Allows creating and managing of contract line types such as product and service.
Contract Setup	Contract Setup	Manage Contract Note Type Mapping	Allows creating and managing of the mapping that provides a tailored list of note type values for contracts. When no mapping is specified, note type values mapped to the object Note are used.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Setup	Contract Setup	Manage Contract Organization Party	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Party Contact	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Party Location	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Party Role and Contact Sources	Allows the specification of the data sources for parties and contacts. A data source specifies the available list of values for parties or contacts of a given role.
Contract Setup	Contract Setup	Manage Contract Payment Terms	Allows creating and managing of payables payment terms for use in supplier contracts.
Contract Setup	Contract Setup	Manage Contract Person Party	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Request Type	Manage contract request types.
Contract Setup	Contract Setup	Manage Contract Risk Event	Allows creating and managing of contract risk events that can be associated to a contract.
Contract Setup	Contract Setup	Manage Contract Standard Clauses, Templates, and Contract Expert Rules	Allows the viewing of this task in the Functional Setup Manager.
Contract Setup	Contract Setup	Manage Contract Type	Allows the management of contract types to specify properties of different contracts such as the type of permitted contract lines, party roles, contract validation checks, and the contract acceptance and signature requirements.
Contract Setup	Contract Setup	Manage Contract and Pricing Integration	Not Available
Contract Setup	Contract Setup	Manage Coverage Times	Allows management of coverage times
Contract Setup	Contract Setup	Manage Default Coverage	Allows management of default coverage

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Setup	Contract Setup	Manage Electronic Signature Setup	Allows setting up electronic signature
Contract Setup	Contract Setup	Manage Matrix Classes	Allows creation, update, deletion, copy, and viewing of all matrix classes and child entities.
Contract Setup	Contract Setup	Manage Pricing Algorithms	Allows creation, update, deletion, copy, and viewing of all algorithms and child entities.
Contract Setup	Contract Setup	Manage Service Mappings	Allows creation, update, deletion, copy, and viewing of all service mappings and child entities.
Contract Setup	Contract Setup	Manage Standard Coverage	Allows management of standard coverage
Contract Setup	Contract Setup	Manage Time Unit Mappings	Allows management of time unit mappings
Contract Setup	Contract Setup	Manage User Statuses and Transitions	Manage user statuses and transitions
Contract Setup	Contract Setup	Process Installed Base updates	Processes installed base updates.
Contract Setup	Contract Setup	Specify Customer Contract Management Business Function Properties	Allows specifying and managing of currency conversion rules, project billing rules and default values, adoption rules for contract standards and policies, and other contract management functions during business unit setup.
Contract Setup	Contract Setup	Specify Procurement Contract Management Business Function Properties	Allows specification of supplier contract management properties during business unit setup. This includes the specification of contract standards, policies, and adoption rules.
Contract Setup	Contract Setup	Track Purchasing Activity for Contract Fulfillment Line	Allows the running of the process that retrieves the number and the status of the purchasing document created by the integrated procurement application from the contract fulfillment line.
Contract Setup	Contract Setup	Update Contract Status	Updates the status of contracts that are dependent on time. For

Granted Role	Granted Role Description	Privilege	Privilege Description
			example, updates the status to expired when the end date is reached.
Contract Setup	Contract Setup	Update Enterprise Application Deployment Information	Allows updating deployment information of an enterprise application.
Contract Setup	Contract Setup	View Administration Link	Privilege to view administration link in UI shell
Contract Setup	Contract Setup	View Contract Type	Allows viewing of the contract type and its attributes.
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Author Additional Standard Contract Terms and Conditions	Allows authoring using standard terms and conditions in the contract. This includes adding and deleting standard clauses, selecting alternate clauses, managing sections that contain standard clauses, and moving contract terms.
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Author Nonstandard Contract Terms and Conditions	Allows authoring of nonstandard terms and conditions in the contract. This includes editing standard clauses, creating nonstandard clauses, deleting nonstandard clauses and sections, and removing contract terms.
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Author Standard Contract Terms and Conditions	Allows authoring of contract terms and conditions using contract terms templates defined in the Contract Terms Library. Also includes using the Contract Expert and validating the contract terms.
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Delete Contract Documents	Not Available
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Delete Supporting Documents	Not Available
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Manage Contract Documents	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Manage Supporting Documents	Not Available
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	Override Contract Terms and Conditions Controls	Allows editing of protected clauses and deleting of mandatory clauses and sections in contract terms.
Contract Terms and Conditions Override Controls	Edits protected clauses, and deletes mandatory clauses and sections in addition to authoring nonstandard terms and conditions.	View Contract Terms	Not Available
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Enable Buy Intent	Allows all actions permitted by other privileges for contracts with a buy intent. For example, granting this privilege to an individual with a view privilege permits the viewing of supplier contracts. Granting this privilege to an individual with the delete contracts privilege permits the deletion of supplier contracts.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Enable Full Access	Not Available
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Enable Sell Intent	Allows all actions permitted by other privileges for contracts with a sell intent. For example, granting this privilege to an individual with a view privilege permits the viewing of customer contracts. Granting this privilege to an individual with the delete contracts privilege permits the deletion of customer contracts.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Export Customer Account	Not Available
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Export Customer Account Contact	Allows the export of customer account contact information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Export Customer Account Relationship	Allows the export of customer account contact relationship information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Generate PDF Contract for Text Search	Allows the running of the process to generate PDFs of draft contracts, or contracts under amendment,

Granted Role	Granted Role Description	Privilege	Privilege Description
			so they are available during text searches.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Search Customer Account Relationships	Allows the search of customer account relationships. If assigning, also assign the ability to view the customer account relationship.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Search Purchase Agreement	Allows a procurement agent to search for purchase agreements including blankets and contracts.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Contract	Allows viewing and printing of a contract and its history, including the contract's financial summary.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Contract Terms	Not Available
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account	Allows the viewing of customer account information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account Contact	Allows the viewing of customer account contact information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account Contact Responsibility	Allows the viewing of customer account contact information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account Information	Not Available
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account Relationship	Allows the viewing of customer account relationship information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account Relationships	Allows the viewing of customer account relationship information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account Site	Allows the viewing of the customer account site information.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Customer Account Site Use	Allows the viewing of the customer account site use information.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Purchase Agreement	Allows a user to review a blanket or contract purchase agreement.
Contract View Access Across All Contracts	Views all contracts across an enterprise.	View Purchase Order	Allows a user to review a purchase order.
Conversation Message Administration	Has complete conversation message management capabilities including create messages, reply to messages, change a reply to ready to send status and delete a message.	Delete Conversation Message	Allows user to delete a message in a conversation.
Conversation Message Administration	Has complete conversation message management capabilities including create messages, reply to messages, change a reply to ready to send status and delete a message.	Manage Outbound Message	Allows a user to create, update, delete and view outbound messages.
Conversation Message Administration	Has complete conversation message management capabilities including create messages, reply to messages, change a reply to ready to send status and delete a message.	Participate in Collaboration Conversation	Allows a user to participate in a collaboration conversation.
Conversation Message Administration	Has complete conversation message management capabilities including create messages, reply to messages, change a reply to ready to send status and delete a message.	Participate in Customer Conversation	Allows a user to participate in a customer conversation.
Conversation Message Administration	Has complete conversation message management capabilities including create messages, reply to messages, change a reply to ready to send status and delete a message.	Use REST Service to View All Workers	Allows the user to view all workers using REST API.
Conversation Message Administration	Has complete conversation message management capabilities including create messages, reply to messages, change a reply to ready to send status and delete a message.	View Conversation Message	Allows a user to view a conversation message.

Granted Role	Granted Role Description	Privilege	Privilege Description
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Approve Self Service Registration	Allows approving self service registration request.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Associate User With Contact	Allows association of a user with a contact.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Create Self Service Role	Allows creating a self service role instance.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Delete Last Account Administration Role	Allows deletion of the last account administrator role.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Delete Self Service Role	Allows deleting a self service role instance.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Setup Self Service Secondary Identity Provider	Allows the user to setup the secondary identity provider.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Update Registration Request to Failed	Allows the user to update the registration request status to failed.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Update Self Service Role	Allows deleting a service role instance.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Use REST Service to Approve Self Service registration	Allows approving self service registration request using REST API.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Use REST Service to Create Registration Request	Allows creation of a registration request using REST API.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Use REST Service to Create Self Service Role	Allows creating a self service role instance using REST API.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Use REST Service to Delete Self Service Role	Allows deleting a self service role instance using REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Use REST Service to Update Self Service Role	Allows deleting a service role instance using REST API.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Use REST Service to View Self Service Registrations	Allows viewing self service registration requests using REST API.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	Use REST Service to View Self Service Roles	Allows viewing self service role instances using REST API.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	View Self Service Registrations	Allows viewing of self service registration requests.
Customer Self-Service Administration	Manages the provisioning and approval of self service registration requests	View Self Service Roles	Allows viewing self service roles.
Data Integration Management	This role allows setup and management of data integration maps and instances.	Manage Data Integrations	Allows the user to manage the integration maps and instances for data integrations.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Add Participant Plan Document Template	Allows adding a default participant plan document template to the business unit incentive parameters. Allows adding a participant plan document template to the incentive compensation plan.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Configure Incentive Compensation Tables and Columns	Allows configuration of tables and columns required for incentive compensation processing.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Configure Incentive Compensation UI	Allows configuration of incentive compensation pages.

Granted Role	Granted Role Description	Privilege	Privilege Description
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Business Unit	Allows the definition of the business unit.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Data Access for Users	Manage data access for user provisioned roles.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Calendar	Allows maintenance of calendar, which defines the processing periods for incentive compensation.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Calendar Period	Allows enablement of incentive compensation reports for period, for participants.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Currency Conversion Rate Type	Allows maintenance of currency conversion rate types used to convert the payment amount from processing currency to operating or home currency, or for conversion during collection, transaction adjustment, crediting, and calculation.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Currency Conversions	Allows maintenance of currency conversions among incentive compensation processing, operating, and home currencies.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Earning Types	Allows maintenance of incentive compensation earning types, which can be monetary benefits, represented with operating or participant home currency, or nonmonetary benefits such as points, air miles, and Club.

Granted Role	Granted Role Description	Privilege	Privilege Description
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Intervals	Allows maintenance of intervals, which are incentive compensation calendar periods used to accumulate achievements, earnings, or payments during calculation or payment processing.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Participant Import Mappings	Allows the maintenance of the mapping between the participant attributes and the related trading community party or HCM person attributes. The mapping is used when importing participant details into Incentive Compensation. For example, the trading community party location country can be mapped as the source for populating the participant country attribute.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Participant Selection Rules	Allows maintenance of the criteria to qualify trading community parties and HCM persons as eligible incentive compensation participants and analysts. The criteria, grouped into rules and rule sets, is used by the participant import process. For example, define a rule set to select HCM persons who are employees and work in the sales department.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Incentive Compensation Rule Qualifier and Lookups	Allows configuration of incentive compensation custom rule qualifiers and related artifacts.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Manage Signal Definitions	Allows creating and updating signal definitions
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Populate Incentive Compensation Rules Report Tables	Allows upgrade of rule reporting tables for business intelligence reporting.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Purge Incentive Compensation Data	Allows submission of a process to purge transactional data created while testing implementations in a preproduction state. Purged data includes all transactions, credits, earnings, payment batches, and paysheets. Once purged, the data is no longer retrievable.
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Set Up Incentive Compensation Parameters	Allows set up of incentive compensation parameters.

Granted Role	Granted Role Description	Privilege	Privilege Description
Incentive Compensation Administration	Configure and maintain incentive compensation enterprise and business unit setup.	Submit Incentive Compensation Table Statistics Process	Allows submission of the incentive compensation gather table statistics process.
Interview Definition Authoring	Manage access for authoring Interview definitions.	Check-in Interview Definitions	Allow access to check-in Interview definitions.
Interview Definition Authoring	Manage access for authoring Interview definitions.	Check-out Interview Definitions	Allow access to check-out Interview definitions.
Interview Definition Authoring	Manage access for authoring Interview definitions.	Copy Interview Definitions	Allow access to copy Interview definitions.
Interview Definition Authoring	Manage access for authoring Interview definitions.	Create Interview Definitions	Allow access to create Interview definitions.
Interview Definition Authoring	Manage access for authoring Interview definitions.	Update Interview Definitions	Allow access to update Interview definitions.
Interview Definition Managing	Manage access for deleting and forcing checkout of Interview definitions.	Change Interview Definition Owner	Allow access to change the owner of Interview definitions.
Interview Definition Managing	Manage access for deleting and forcing checkout of Interview definitions.	Delete Interview Definitions	Allow access to delete Interview definitions.
Interview Definition Managing	Manage access for deleting and forcing checkout of Interview definitions.	Force Checkout Interview Definitions	Allow access to force checkout Interview definitions.
Interview Definition Publishing	Manage access for publishing and unpublishing Interview definitions.	Publish Interview Definitions	Allow access to publish Interview definitions.
Interview Definition Publishing	Manage access for publishing and unpublishing Interview definitions.	Unpublish Interview Definitions	Allow access to unpublish Interview definitions.
Interview Definition Viewing	Manage access for viewing Interview definitions.	View Interview Definitions	Allow access to view the Interviews menu item and Interviews page.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Lead Registration Processing	Reviews, accepts, and rejects sales lead registrations. Includes the ability to view sales lead details and update internal attributes.	Accept Sales Lead	Allows accepting ownership of sales leads.
Lead Registration Processing	Reviews, accepts, and rejects sales lead registrations. Includes the ability to view sales lead details and update internal attributes.	Delete Sales Lead Internal Attributes	Allows deleting sales lead attributes with the exception of partner related information.

	Center, Knowledge Management and Chat areas. Usage requires access to all generative AI API's essential to input data and fetch results from the LLM model.		included in chat messages along with a link to the source document.
Service Generative AI User	Can use generative AI features across Oracle Fusion Service including but not limited to Service Center, Knowledge Management and Chat areas. Usage requires access to all generative AI API's essential to input data and fetch results from the LLM model.	Chat Transcript Summary Service for Transfers and Conferences	Allows for the creation of a generative AI chat transcript summary that will be passed to agents when receiving chat transfer or conference offers.
Service Generative AI User	Can use generative AI features across Oracle Fusion Service including but not limited to Service Center, Knowledge Management and Chat areas. Usage requires access to all generative AI API's essential to input data and fetch results from the LLM model.	Generative AI Wrap Up Summary Service	Allows for the creation of a generative AI summary that will be inserted into wrap up notes at the end of an interaction.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	Create Service Profile	Allows the user to create a new service profile.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	Delete Service Profile	Allows the user to delete an existing service profile.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	Edit Service Profile Technician Access Schedule	Allows editing of a technician access schedule on the service profile.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	Edit Service Profile Technician Preferences	Allows editing of a technician preference.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	Edit Work Order Technician Access Schedule	Allows editing of a technician access schedule on the work order.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	Update Service Profile	Allows the user to update an existing service profile.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	View Service Profile	Allows viewing of service profiles.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	View Technician Access Schedules	Allows viewing of a technician access schedules.
Service Profile Administration	Manages all aspects of the Service Profile object, including deleting a service profile.	View Technician Preferences	Allows viewing of a technician preference.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Access Co-browse Feature	Allows launching and usage of Co-browse functionality.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Access Feed View	Allows access to view feeds.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Access Mobile CRM	Functional privilege providing access to CRM data using mobile applications
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Access Partner Media Toolbar	Allows access to the partner media toolbar
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Access Routing Service APIs	Allows access to the routing service APIs.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Add Attachment	Allows adding an attachment to a SR or SR Message. This privilege will also allow the user to delete an attachment from the SR.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Administer Conversation Message	Allows administration of conversation message.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Administer SR Summarization APIs	Allows administration of tasks such as payload to be passed on to APIs.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Administer SmartText	Allows the user to administer SmartText.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Approve Service Work Order Override Request	Allows approving a service work order scheduler override request.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Assign Case to Case Worker	Allows user to assign a case to a case worker
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Assign Case to Queue	Allows user to assign a case to queue
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Assign Service Request	Allows manual assigning of service request to a resource
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Assign Service Request to Queue	Allows manual assigning of service request to a service queue.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Cancel Service Work Order	Allows canceling of a service work order.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Compose Customer Message	Allows composing a customer message for a SR
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Compose Internal Note	Allows composing an internal note for a SR
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Compose Internal Note for Case	Allows users to compose an internal note for a case
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Compose Response	Allows composing a Response for a SR
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Configure CX Service Dashboard	Allows the user to create, update and delete custom CX service infolets. The out of the box application defined infolets cannot be edited or deleted.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Action Plan	Allows creation of an Action Plan.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Activity	Allows creating activities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Article	Not Available
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Case	Allows user to create case records
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Case Conversation	Allows the user to create a converation on the case object.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Customer Assets by Service	Allows creation of customer assets, related configurations and structures.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create DLM Policies	Allows creation of DLM policies.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create IoT Registration Request	Allows submitting a request to register a device or asset with the IoT cloud
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Knowledge Tasks	Allows users to suggest improvements to knowledge articles.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Object Link	Allows the user to create an object link.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Service Request	Allows creation of a service request
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Service Work Order	Allows creation of a service work order.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Create Tag	Allows the user to create tags.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete Activity	Allows deleting activities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete Case	Allows user to delete a case record
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete Chat Transcript	Allows user to delete a chat transcript.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete DLM Policies	Allows deletion of DLM policies.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete Object Link	Allows the user to delete an object link.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete Service Request	Allows deleting of service request
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete Service Request Attachment	Allows deleting an attachment from an SR or SR message.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Delete Service Work Order	Allows the user to delete a work order.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Download Attachment of an SR or SR Message	Allows downloading an attachment of an SR or SR Message.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Action Plan	Allows edit of an Action Plan.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Case	Allows user to edit case attributes
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit DLM Policies	Allows editing of DLM policies.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Service Profile Technician Access Schedule	Allows editing of a technician access schedule on the service profile.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Service Profile Technician Preferences	Allows editing of a technician preference.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Service Request	Allows editing of a service request
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Service Work Order	Allows editing of a service work order.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Work Order Technician Access Schedule	Allows editing of a technician access schedule on the work order.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Edit Workflows	Allows creating, editing and reading of workflow automations.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Forward Service Request	Allows forwarding a SR
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Get Customer Assets by Service	Allows query of customer assets using a service.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Get Service Request Follow Notifications	Allows the user to get notifications when they follow a service request.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Activities	Allows user to manage activities for a case such as edit or delete
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Attachments	Allows the user to manage attachments for a case such as add or delete.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Contacts	Allows user to manage contacts for a case such as add or delete
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Conversations	Allows the user to manage conversations for a case such as add or delete.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Household	Allows user to manage household for a case such as add or delete
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Messages	Allows user to manage messages for a case such as edit or delete
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Service Requests	Allows user to manage service requests for a case such as update
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Case Team Members	Allows user to manage team members for a case such as add or delete resources
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Co-browse Access	Enables Availability setting for new Co-browse work.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Content for Sales Cloud Virtual Assistant	Allows the user to create, update and delete content within their Oracle Virtual Assistant instance.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Content for Virtual Assistant	Allows the user to create, update and delete content within their Oracle Virtual Assistant instance.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Content for Virtual Assistant for HCM	Allows the user to create, update and delete content within their Oracle Virtual Assistant instance. Applicable only to CRM.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage DLM Policies	Allows create, edit, delete and execution of DLM policies.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Data Visualization Configuration	Allows creation, modification and deletion of data visualization configurations either through UI pages or through REST service calls. For example, a data visualization could be configured to be displayed as a Bar chart.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Depot Repair Order Details	Allows the user to manage depot repair order details.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Express Report Definitions	Allows creation, modification and deletion of Express Report Definitions
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Express Report Types	Allows creation, modification and deletion of Express Report Types
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Feed Configurations	Allows create, delete and update of feed configurations.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Field Security	Allows the user to administer field security for functional objects.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Inbound Message	Allows create, update, delete and view of inbound messages
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Installed Base Assets	Allows creation and editing of installed Base assets.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Inventory Reservation and Picks	Allows management of inventory reservations and picks.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Notification Preferences	Allows management of notification preferences.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Omnichannel Capacities	Allows defining the maximum number of active objects or interactions assigned to a user.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Omnichannel Presence and Availability	Allows management of the omnichannel availability for new work, presence menu and indicator.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Outbound Message	Allows a user to create, update, delete and view outbound messages.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Part Orders	Allows creating and managing part orders for a work order and service request.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage SR Contacts	Allows adding/removing a contact from a service request.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage SR Team Member	Allows adding/removing a team member to a SR
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Service Queues	Allows management of service queues and queue memberships.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Smart Actions	Allows access to Smart Actions Framework REST operations.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage SmartText	Allows creation, update and delete of a SmartText.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Social Post	Allows create, update, delete and view of social posts
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Survey Requests	Allows the user to create, update, view, and delete survey requests.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Tags	Allows the administrator to manage tags.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Technician Access Schedules	Allows the user to manage technician access schedules.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Technician Preferences	Allows the user to manage technician preferences.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Video Access	Enables availability setting for new video work.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Manage Work Order Debrief and Estimates	Allows the user to manage work order debrief and estimates.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Modify Service UI	Allows modifying service UI.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Override Part Order Pricing	Allows the user to manually override the part order price.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Personalize Analytics Dashboard Display	Allows create, update and delete of custom CX service infolets. Also, allows show/hide and rearrange the display order of the infolets.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Personalize CX Service Dashboard	Allows the user to show/hide and rearrange the display order of the CX service infolets.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Publish SmartText	Allows scope of SmartText to be set to GLOBAL so that all users can view/use it.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Receive Browser Notifications	Allows users to receive browser notifications from the notification framework. If notifications have links to objects, you will need appropriate privilege to view the object.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Reschedule Service Work Order	Allows rescheduling of a service work order.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Run Purge Batch Assignment Information Process	Allows scheduling and monitoring of the process to purge the batch assignment data.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Schedule Service Jobs	Allows scheduling of service related jobs, such as, closing of old service requests
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files containing business objects, such as customers and contacts, into staging tables.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Set Up File Import Object and Mapping	Allows reviewing and registering business objects, such as sales leads and opportunities, intended for import from external files. Also allows creating and maintaining maps of external source file columns to target staging table columns for use in importing those business objects, such as sales leads, customers, contacts, and sales catalogs.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Action Plan	Allows action plan setup.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Engagement Engine	Allows the user setup and configure engagement engine.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup External Collaboration Network Integration	Allows the user to setup external collaboration network integration.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Object Links	Allows the user to setup object links.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Omnichannel	Allows the administration of channel instances and defining presentation and labeling for Availability Groups.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Proxy User Authentication Service	Allows the setup and configuration of the proxy user authentication service.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Self Service Role Mapping	Allows the user to setup the mapping between the self service and the identiy provider roles.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Service	Allows Service application setup

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Service Assignment	Allows Service application assignment setup
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Service Work Order	Allows service work order setup.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Setup Survey Integration Framework Template	Allows the user to setup survey integration framework.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Update Activity	Allows editing activities.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Update Customer Assets by Service	Allows update of customer assets, related configurations and structures.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Update Primary Contact	Allows manual update of Primary Contact field.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Update Service Request Business Unit	Allows updating the business unit on the service request.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Use Live Experience Agent Recording and Playback Features	Allows the use of live experience recording download and playback features.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Use Location Service	Allows use of the location service
Service Request Administrator	Administers all aspects of the Service application, including Setup.	Use SmartText	Allows using SmartText.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Action Plan	Allows viewing of an Action Plan.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Action Plan Process	Allows a user to view the process details in an action plan.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Activity	Allows viewing activities.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Attachment	Allows viewing attachments on a SR or SR Message
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Audit History	Allows to view the audit history of all the business object attributes enabled for auditing.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Case	Allows user to view case records
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Case Attachments	Allows the user to view the attachments for a case.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Case Audit History	Allows the user to view the audit history for a case.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Case Conversations	Allows the user to view the conversations for a case.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Case Team Members	Allows user to view team members for a case
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Chat Transcript	Allows the user to view chat transcripts.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Conversation Message	Allows a user to view a conversation message.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View DLM Policies	Allows viewing of DLM policies.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Express Report Definitions	Allows viewing of Express Report Definitions

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Express Report Types	Allows viewing of Express Report Types
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Installed Base Assets	Allows viewing the installed Base assets.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Installed Base Assets Landing Page	Allows viewing the installed base assets landing page.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Interactions	Allows viewing of interactions history.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Knowledge within Service Request	Allows viewing of knowledge base components within the service request UI.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Named Routes	Allows viewing and grouping all functional navigation flows across channels into a single name
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Navigator Menu	Allows viewing navigator metadata information
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Object Link	Allows the user to view an object link.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Page Peek	Allows the user to view page peek data.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Partner	Allows viewing a list of partners from the partner work area.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Partner Profile	Allows viewing the partner profile.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Resource Capacities	Allows the user to view a resource's capacities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Self Service Registrations	Allows viewing of self service registration requests.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Self Service Roles	Allows viewing self service roles.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Center	Allows viewing of Service Center.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Manager Dashboard	Allows viewing of the service manager dashboard. The dashboard contains analytical reports on service objects.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Manager Dashboard for FSCM	Allows viewing of the service manager dashboard. The dashboard contains analytical reports on service objects. Applicable only to CRM.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Manager Dashboard for HCM	Allows viewing of the service manager dashboard. The dashboard contains analytical reports on service objects. Applicable only to CRM.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Profile	Allows viewing of service profiles.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Representative Dashboard	Allows viewing of the service representative dashboard. The dashboard contains analytical reports on service objects.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Request	Allows viewing of service request(s).

Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Request Audit History	Allows viewing of service request audit history.

Granted Role	Granted Role Description	Privilege	Privilege Description
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Request Team	Allows viewing of service request team tab and its contents.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Work Order	Allows viewing of service work order(s).
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Service Work Order Audit History	Allows viewing of service work order audit history.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Smart Actions	Allows read and view access to Smart Actions Framework data.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Subscription Entitlements	Change the subscription user status
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Survey Integration Framework Template	Allows the user to view the survey integration framework template and its details.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Survey Requests	Allows the user to view survey requests.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Technician Access Schedules	Allows viewing of a technician access schedules.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Technician Preferences	Allows viewing of a technician preference.
Service Request Administrator	Administers all aspects of the Service application, including Setup.	View Visitor History	Allows the user to view visitor browser history data.
Service Status Computation	Perform actions required to determine the availability of a service.	Determine Service Status	Allows determining the availability of a service.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage All Application Profile Values	Allows management of all application profile option settings and values at various levels to control application behavior.

Granted Role	Granted Role Description	Privilege	Privilege Description
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Common Lookup	Not Available
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Profile Category	Manage application profile option categories
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Profile Option	Manage Application Profile Options: Manage the level the value can be changed
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Set-Enabled Lookup	Manage sub-type entities stored in the Application Set-Enabled Lookup entity. Lookup Types are lists of values such as Days of the Week or Yes/No which can be used to validate column values.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Application Standard Lookup	Manage sub-type entities stored in the Application Standard Lookup Values entity. Lookup Types are lists of values such as "Days of the Week" or "Yes/No" which can be used to validate columns values.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as	Manage Sales Party Appointments	Allows reviewing and defining profile options for appointments. Additionally allows reviewing and defining lookup values that

Granted Role	Granted Role Description	Privilege	Privilege Description
	appointments, assessments, interactions, notes and tasks.		provide appointment choices, such as appointment category. Appointments can be created and separated into customer center specific categories.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Sales Party Assessments	Allows creation and maintenance of assessment templates. Assessment templates are collections of questions and answers that can be weighted and scored to evaluate the sales account.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Sales Party Interactions	Allows defining additional fields, descriptive flexfields, to enter and track information that is not otherwise captured. Descriptive flexfields can be validated and dependent on other values entered in other areas of the page. Additionally allows reviewing and defining of lookup values for interaction channel types, such as e-mail and phone call, and interaction outcomes. Interactions record inbound and outbound communications with customers.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Sales Party Notes	Allows defining additional fields to enter and track information that is not otherwise captured. These descriptive flexfields can be validated and dependent on other values entered in other areas of the page. Allows reviewing and defining note types, such as address change. Additionally allows creating and maintaining mapping of note type values for customer center. When mapped, note type values are limited to Customer Center. When none is specified, note type values mapped to the object Note are used.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Manage Sales Party Tasks	Allows reviewing and defining the task template duty role required to create and manage customer center templates. Specify the owner or assignee if not provided by the application. Also allows reviewing and defining lookup values for task categories such as, needed, or, to do.

Granted Role	Granted Role Description	Privilege	Privilege Description
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Run Sales Party Batch Assignment	Allows scheduling and monitoring of the process to automatically evaluate and assign the territory candidate objects to the eligible sales accounts.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Set Up Customer Center	Allows reviewing and configuring account, contact and household settings, including lookup values and profile options.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.	Set Up Sales Party Assignment	Allows set up of sales party attributes that can be used for its assignment.
Subscription Amendment	Amends approved subscriptions. This includes initiating an amendment, reverting the subscription to the previous signed version, updating all allowable attributes, and submitting the amendment for approval.	Add Adhoc Bill Lines	Allows adding adhoc bill lines

Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Customer Account Site Use	Allows the viewing of the customer account site use information.
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Customer Assets	Allows query and view of customer assets, related configurations and structures.
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Meter Reading History	Allow the query and view of meter reading history.
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Meters	Allow the query and view of meters.
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Receivables Credit Memo	View a Receivables credit memo.
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Receivables Invoice	View a Receivables invoice.

Granted Role	Granted Role Description	Privilege	Privilege Description
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Subscription	View a subscription
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Subscription Approval Details	View the subscription approval notification details.
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.	View Subscription Entitlements	Change the subscription user status
Subscription Setup	Handles the setup required for subscriptions.	Manage Consolidation Grouping Rules	Manage consolidation grouping rules
Subscription Setup	Handles the setup required for subscriptions.	Manage Matrix Classes	Allows creation, update, deletion, copy, and viewing of all matrix classes and child entities.
Subscription Setup	Handles the setup required for subscriptions.	Manage Pricing Algorithms	Allows creation, update, deletion, copy, and viewing of all algorithms and child entities.
Subscription Setup	Handles the setup required for subscriptions.	Manage Service Mappings	Allows creation, update, deletion, copy, and viewing of all service mappings and child entities.
Subscription Setup	Handles the setup required for subscriptions.	Manage Subscription Setup	Manage subscription setup
Subscription Setup	Handles the setup required for subscriptions.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Subscription Setup	Handles the setup required for subscriptions.	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Subscription Setup	Handles the setup required for subscriptions.	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export
Subscription Setup	Handles the setup required for subscriptions.	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files containing business objects, such as customers and contacts, into staging tables.
Territory Management Enterprise Administration	Manages sales territories and territory proposals.	Administer Sandbox	Allows administration of all sandboxes.

Granted Role	Granted Role Description	Privilege	Privilege Description
	Additional duties include territory management setup and quota management administration.		
Territory Management Enterprise Administration	Manages sales territories and territory proposals. Additional duties include territory management setup and quota management administration.	Configure Territory Management UI	Grants access to use Page Composer to configure task flows in Territory Management, where available.
Territory Management Enterprise Administration	Manages sales territories and territory proposals. Additional duties include territory management setup and quota management administration.	Manage Sales Territory Inheritance	Allows managing of the relationship of a territory to inherit dimension definitions from a source territory.
Territory Management Enterprise Administration	Manages sales territories and territory proposals. Additional duties include territory management setup and quota management administration.	Manage Sales Territory Proposal	Allows managing of sales territory proposals, for example proposal name, description, and activation date.
Territory Management Enterprise Administration	Manages sales territories and territory proposals. Additional duties include territory management setup and quota management administration.	Manage Territories Work Area	This work area is the landing page for accessing the frequently used tasks and reports useful for managing sales territories.
Territory Management Enterprise Administration	Manages sales territories and territory proposals. Additional duties include territory management setup and quota management administration.	View Administration Link	Privilege to view administration link in UI shell
Territory Management Enterprise Administration	Manages sales territories and territory proposals. Additional duties include territory management setup and quota management administration.	View Sales Territory Proposal	Allows viewing of sales territory proposals, for example proposal name, description, and activation date.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Export Sales Territory	Allows initiating the process of exporting territory definitions for offline review and editing.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Import Sales Territory	Allows initiating the process of importing territory definitions that have been edited offline.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file

Granted Role	Granted Role Description	Privilege	Privilege Description
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Run Import Territory Definitions Job	Allows importing of territories and related standard objects.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Run Import Territory Extended Definitions Job	Allows importing of top level territory custom objects.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files containing business objects, such as customers and contacts, into staging tables.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	View Sales Territory Export Status	Allows viewing the status of territory export processes.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.	View Sales Territory Import Status	Allows viewing the status of territory import processes.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Export Import Territory Geography	Not Available
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Product Eligibility Rules	Allows management of eligibility rules for products.

Granted Role	Granted Role Description	Privilege	Privilege Description
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Product Groups	Allows management of product groups and their attributes, lookups, mapping, profile options, templates and usages.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Sales Territory	Allows managing of sales territories. A Territory is the jurisdiction of responsibility of a sales representative over a set of sales accounts.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Sales Territory Account Exclusions	Allows excluding individual accounts from the territory definition, on exception basis.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Sales Territory Account Inclusions	Allows including individual accounts into the territory definition, on exception basis.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Sales Territory Customer Size	Allows managing of values used in the customer size territory dimension.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Sales Territory Proposal	Allows managing of sales territory proposals, for example proposal name, description, and activation date.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Sales Territory Setup	Allows defining and managing of sales territory lookups, profile options, flexfields, and dimension data.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Trading Community Classification Category	Allows the specification of classification categories used to classify or group organizations and persons in your business community. The classification model lets you record complex, real-life categories in which entities

Granted Role	Granted Role Description	Privilege	Privilege Description
			can be grouped, such as industry classification.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Trading Community Classification Category Group	Allows the specification of groups of classification categories, such as industry groups. Use classification groups to categorize similar classification categories.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Trading Community Classification Lookups	Not Available
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Manage Trading Community Zones	Allows managing of geographical boundaries for a specific zone use such as Tax or Shipping based on master reference geography hierarchy data.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Clear Stage Job	Allows deleting of the stage environment with all its dimension members.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Dimension Synchronization Job	Allows scheduling and monitoring of the process of refreshing dimension members and promoting members to production.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Inheritance Recipient Update Job	Allows scheduling and monitoring of the process of updating the inherited dimensionality of recipient territories.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data.	Run Territory Partition Deletion Job	Allows deleting of the trash partition.

Granted Role	Granted Role Description	Privilege	Privilege Description
	Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.		
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Proposal Activation Job	Allows scheduling and monitoring of the process of activating sales territory proposals.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Restore Job	Allows initiating the process of restoring territory definitions.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Stage Activation Job	Allows initiating the process of promoting members to production and activating the error correction proposal.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Stage Synchronization Job	Allows initiating the process of refreshing dimension members in the stage environment.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Territory Validation Job	Allows initiating the territory validation process.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Run Trading Community Classification Hierarchy Generation	Allows the running of the process that generates the classification hierarchy.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export

	flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.		of responsibility of a sales representative over a set of sales accounts.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.	View Sales Territory Proposal	Allows viewing of sales territory proposals, for example proposal name, description, and activation date.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Migrate Sales Territory - Export	Allows initiating the process of exporting territory definitions for the purpose of migration from one environment to another.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Migrate Sales Territory - Import	Allows initiating the process of importing territory definitions being migrated from one environment to another.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Run Import Territory Definitions Job	Allows importing of territories and related standard objects.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Run Import Territory Extended Definitions Job	Allows importing of top level territory custom objects.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export

Granted Role	Granted Role Description	Privilege	Privilege Description
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files containing business objects, such as customers and contacts, into staging tables.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	View Sales Territory Export Status	Allows viewing the status of territory export processes.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.	View Sales Territory Import Status	Allows viewing the status of territory import processes.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Manage Enterprise Data Quality Cleansing Configurations	Allows management of cleansing configurations associated with Oracle Enterprise Data Quality integration.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Manage Enterprise Data Quality Key Generation	Allows management of key generation associated with Oracle Enterprise Data Quality matching.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Manage Enterprise Data Quality Matching Configurations	Allows management of matching configurations associated with Oracle Enterprise Data Quality integration.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Manage Trading Community Data Quality Cleansing Setup	Allows reviewing and updating of configurations for real-time and batch address cleansing.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Manage Trading Community Data Quality Lookups	Allows reviewing and defining of the lookup values that provide choices for data matching and address cleansing, such as entities supported for matching and cleansing, cleansing modes, and match options.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined	Manage Trading Community Data Quality Matching Setup	Allows the reviewing and updating of matching configurations for both real-time and batch usages.

Granted Role	Granted Role Description	Privilege	Privilege Description
	matching, synchronization, and cleansing configurations.		
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Manage Trading Community Data Quality Server Setup	Allows configuration of the data quality server to be used for both matching and cleansing data quality functions.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Manage Trading Community Data Quality Synchronization	Allows the review and update of data synchronization configuration, to synchronize trading community registry data with the data quality engine repository. Allows to view the latest synchronization results, evaluate errors, and reset for continued processing after resolving error conditions.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Run Trading Community Data Quality Data Synchronization Process	Allows scheduling and monitoring of the process to synchronize trading community registry data with the data quality engine repository.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.	Run Trading Community Data Quality Data Synchronization Sub-Process	Allows monitoring of the data quality synchronization sub-process that synchronizes trading community registry data with the data quality engine repository for a specific identity table. If assigning, also assign the ability to schedule and monitor the trading community data quality data synchronization process.
Trading Community Import Batch Management	Manages trading community data import batches.	Enter Trading Community Import Batch Information	Allows the creation of a trading community data import batch by entering batch definition parameters through user interface. If assigning, also assign the ability to view the trading community import batch information.
Trading Community Import Batch Management	Manages trading community data import batches.	Enter Trading Community Import Batch Process Information	Allows the specification of trading community import batch process information, such as the import process mode, the batch and registry deduplication parameters, address cleansing parameters, and acceptable error limit.
Trading Community Import Batch Management	Manages trading community data import batches.	Purge Trading Community Import Batch	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Trading Community Import Batch Management	Manages trading community data import batches.	Run Trading Community Import Batch Error Report	Not Available
Trading Community Import Batch Management	Manages trading community data import batches.	Run Trading Community Import Batch Process	Not Available
Trading Community Import Batch Management	Manages trading community data import batches.	View Trading Community Import Batch Details and Statistics	Not Available
Trading Community Import Batch Management	Manages trading community data import batches.	View Trading Community Import Batch Errors and Details	Not Available
Trading Community Import Batch Management	Manages trading community data import batches.	View Trading Community Import Batch Information	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	Enter Trading Community Import Batch Information	Allows the creation of a trading community data import batch by entering batch definition parameters through user interface. If assigning, also assign the ability to view the trading community import batch information.
Trading Community Import Process Management	Manages trading community data import batch processes.	Enter Trading Community Import Batch Process Information	Allows the specification of trading community import batch process information, such as the import process mode, the batch and registry deduplication parameters, address cleansing parameters, and acceptable error limit.
Trading Community Import Process Management	Manages trading community data import batch processes.	Modify Trading Community Import Batch Process Information	Allows editing of trading community import batch process information, such as the import process mode, the batch deduplication and registry deduplication parameters, and the address cleansing error limit, especially to perform the What-if Analysis to get the most acceptable import results.
Trading Community Import Process Management	Manages trading community data import batch processes.	Purge Trading Community Import Batch	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	Run Trading Community Import Batch Error Report	Not Available
Trading Community Import Process Management	Manages trading community data import batch processes.	Run Trading Community Import Batch Process	Not Available

Conversation	A Sales Administrator can delete conversation a member of an access group associated to the conversation with delete access	Role: Access Groups Enablement Privilege: Delete Conversation (Data) Resource: Conversation
Conversation	A Sales Administrator can manage conversation for all crm conversations	Role: Sales Administrator Privilege: Manage Conversation (Data) Resource: Conversation
Conversation	A Sales Administrator can update conversation a member of an access group associated to the conversation with update access	Role: Access Groups Enablement Privilege: Update Conversation (Data) Resource: Conversation

Business Object	Policy Description	Policy Store Implementation
Conversation	A Sales Administrator can view conversation a member of an access group associated to the conversation	Role: Access Groups Enablement Privilege: View Conversation (Data) Resource: Conversation
Conversation Message	A Sales Administrator can delete conversation message a member of an access group associated to the conversation message with delete access	Role: Access Groups Enablement Privilege: Delete Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Sales Administrator can manage conversation message for all crm conversation messages	Role: Sales Administrator Privilege: Manage Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Sales Administrator can update conversation message a member of an access group associated to the conversation message with update access	Role: Access Groups Enablement Privilege: Update Conversation Message (Data) Resource: Conversation Message
Conversation Message	A Sales Administrator can view conversation message a member of an access group associated to the conversation message	Role: Access Groups Enablement Privilege: View Conversation Message (Data) Resource: Conversation Message
Customer File Import Activity	A Sales Administrator can view customer file import activity object type for all customer file import activities of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Activity Object Type (Data) Resource: Customer File Import Activity
Customer File Import Mapping	A Sales Administrator can view customer file import mapping object type for all customer file import mappings of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Mapping Object Type (Data) Resource: Customer File Import Mapping
Customer File Import Object	A Sales Administrator can view customer file import object type for all customer file import objects of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Object Type (Data) Resource: Customer File Import Object

Business Object	Policy Description	Policy Store Implementation
Deal Registration Export Object	A Sales Administrator can view deal registration export object all deal registration export objects in the enterprise	Role: Sales Administrator Privilege: View Deal Registration Export Object (Data) Resource: Deal Registration Export Object
Deal Registration File Import Activity	A Sales Administrator can view deal registration file import activity for all file import activities of type deal registration in the enterprise	Role: Sales Administrator Privilege: View Deal Registration File Import Activity Object Type (Data) Resource: Deal Registration File Import Activity
Deal Registration File Import Mapping	A Sales Administrator can view deal registration file import mapping for all file import mappings of type deal registration in the enterprise	Role: Sales Administrator Privilege: View Deal Registration File Import Mapping Object Type (Data) Resource: Deal Registration File Import Mapping
Deal Registration File Import Object	A Sales Administrator can view deal registration file import object for all file import objects of type deal registration in the enterprise	Role: Sales Administrator Privilege: View Deal Registration File Import Object Type (Data) Resource: Deal Registration File Import Object
Deal Registration Product	A Sales Administrator can manage deal registration product a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Product	A Sales Administrator can view deal registration product a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Product (Data) Resource: Deal Registration Product
Deal Registration Summary	A Sales Administrator can update deal registration approval details a member of an access group associated to the deal registration with update or full access and deal is in pending approval status	Role: Access Groups Enablement Privilege: Update Deal Registration Approval Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Sales Administrator can update deal registration deal details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary

Business Object	Policy Description	Policy Store Implementation
Deal Registration Summary	A Sales Administrator can update deal registration deal details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status	Role: Access Groups Enablement Privilege: Update Deal Registration Deal Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Sales Administrator can update deal registration opportunity details a member of an access group associated to the deal registration with full access	Role: Access Groups Enablement Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Sales Administrator can update deal registration opportunity details a member of an access group associated to the deal registration with update access and deal is in pending approval or approved status	Role: Access Groups Enablement Privilege: Update Deal Registration Opportunity Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Sales Administrator can update deal registration partner details a member of an access group associated to the deal registration with update access and deal is in draft, returned or withdrawn status and the deal is created by an internal user	Role: Access Groups Enablement Privilege: Update Deal Registration Partner Details (Data) Resource: Deal Registration Summary
Deal Registration Summary	A Sales Administrator can view deal registration a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration (Data) Resource: Deal Registration Summary
Deal Registration Team	A Sales Administrator can manage deal registration team a member of an access group associated to the deal registration with update access	Role: Access Groups Enablement Privilege: Manage Deal Registration Team (Data) Resource: Deal Registration Team
Deal Registration Team	A Sales Administrator can view deal registration team a member of an access group associated to the deal registration	Role: Access Groups Enablement Privilege: View Deal Registration Team (Data) Resource: Deal Registration Team
Default Coverage File Export Object	A Sales Administrator can manage default coverage export for all the default coverage objects	Role: Contract Setup Privilege: Manage Default Coverage Export (Data) Resource: Default Coverage File Export Object

Business Object	Policy Description	Policy Store Implementation
Default Coverage File Import Object	A Sales Administrator can manage default coverage import for all the default coverage objects	Role: Contract Setup Privilege: Manage Default Coverage Import (Data) Resource: Default Coverage File Import Object
Department	A Sales Administrator can choose department for all departments in the enterprise	Role: Employee Resource Administration Privilege: Choose Department (Data) Resource: Department
Department	A Sales Administrator can choose department for departments in their organization security profile	Role: Resource Organization Administration Privilege: Choose Department (Data) Resource: Department
Department	A Sales Administrator can choose department for departments in their organization security profile	Role: Sales Administrator Privilege: Choose Department (Data) Resource: Department
Employee Resource File Import Activity	A Sales Administrator can view employee resource file import activity for all employee resource file import activities of object type 'employee resource'	Role: Sales Administrator Privilege: View Employee Resource File Import Activity Object Type (Data) Resource: Employee Resource File Import Activity
Employee Resource File Import Activity	A Sales Administrator can view employee resource file import activity object type for all employee resource file import activities of object type 'employee resource'	Role: Resource Administration Privilege: View Employee Resource File Import Activity Object Type (Data) Resource: Employee Resource File Import Activity
Employee Resource File Import Mapping	A Sales Administrator can view employee resource file import mapping for all employee resource file import mappings of object type 'employee resource'	Role: Sales Administrator Privilege: View Employee Resource File Import Mapping Object Type (Data) Resource: Employee Resource File Import Mapping
Employee Resource File Import Mapping	A Sales Administrator can view employee resource file import mapping object type for all employee resource file import mappings of object type 'employee resource'	Role: Resource Administration Privilege: View Employee Resource File Import Mapping Object Type (Data) Resource: Employee Resource File Import Mapping

Business Object	Policy Description	Policy Store Implementation
Employee Resource File Import Object	A Sales Administrator can view employee resource file import object for all employee resource file import objects of object type 'employee resource'	Role: Sales Administrator Privilege: View Employee Resource File Import Object Type (Data) Resource: Employee Resource File Import Object
Employee Resource File Import Object	A Sales Administrator can view employee resource file import object type for all employee resource file import objects of object type 'employee resource'	Role: Resource Administration Privilege: View Employee Resource File Import Object Type (Data) Resource: Employee Resource File Import Object
Express Report Definitions	A Sales Administrator can delete express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with delete access	Role: Access Groups Enablement Privilege: Delete Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Sales Administrator can update express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting with update access	Role: Access Groups Enablement Privilege: Update Express Report (Data) Resource: Express Report Definitions
Express Report Definitions	A Sales Administrator can view express report access the express reports for table zca_srt_report_def as a member of an access group associated to express reporting	Role: Access Groups Enablement Privilege: View Express Report (Data) Resource: Express Report Definitions
Field Service Work Order	A Sales Administrator can delete field service work order a member of an access group associated to the field service work order with delete access	Role: Access Groups Enablement Privilege: Delete Field Service Work Order (Data) Resource: Field Service Work Order
Field Service Work Order	A Sales Administrator can manage field service work order for all field service work orders	Role: Service Request Administrator Privilege: Manage Field Service Work Order (Data) Resource: Field Service Work Order
Field Service Work Order	A Sales Administrator can update field service work order a member of an access group associated to the field service work order with update access	Role: Access Groups Enablement Privilege: Update Field Service Work Order (Data) Resource: Field Service Work Order

Business Object	Policy Description	Policy Store Implementation
Field Service Work Order	A Sales Administrator can view field service work order a member of an access group associated to the field service work order	Role: Access Groups Enablement Privilege: View Field Service Work Order (Data) Resource: Field Service Work Order
File Export Batch	A Sales Administrator can view file export batch for all export batches	Role: Sales Administrator Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Sales Administrator can view file export batch for all export batches	Role: Sales Party Management Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Sales Administrator can view file export batch for all export batches	Role: Sales Party Review Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Sales Administrator can view file export batch for all export batches	Role: Service Request Administrator Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Object	A Sales Administrator can manage file export object for all export unit test objects	Role: Sales Administrator Privilege: Manage Export Unit Test (Data) Resource: File Export Object
File Export Object	A Sales Administrator can view file export object for all mdf budget countries export objects in the enterprise	Role: Sales Administrator Privilege: View MDF Budget Countries Export Object (Data) Resource: File Export Object
File Export Object	A Sales Administrator can view file export object for all mdf budget team export objects in the enterprise	Role: Sales Administrator Privilege: View MDF Budget Team Export Object (Data) Resource: File Export Object
File Export Object	A Sales Administrator can view file export object for all mdf claim export objects in the enterprise	Role: Sales Administrator Privilege: View MDF Claim Export Object (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: File Export Object
File Export Object	A Sales Administrator can view file export object for all mdf claim settlements export objects in the enterprise	Role: Sales Administrator Privilege: View MDF Claim Settlement Export Object (Data) Resource: File Export Object
