# Overview

---

This document details the tested configuration for Oracle Primavera Unifier network or database administrator, and it includes a list of applications and supported version levels.

---

**Note** All platforms and technologies certified with a base Unifier version are also supported with the latest Unifier patch set for that version (unless specified). Before you install the latest version of a platform or technology, install the most recent Unifier patch set certified for it.

---

Interim Patches as well as Quarterly Critical patch updates (CPUs) for tested Base versions of Oracle Platform Technologies listed in this document (WebLogic, Oracle DB, and Java) are also supported.

For information on certified platforms for Oracle and other third-party technologies, refer to the certification matrix of the respective technology and select the platform compatible with your Primavera applications and the respective technology.

Oracle Primavera Unifier has been tested on the following configurations and certifies this release to work on these platforms. Customers may choose to install Oracle Primavera Unifier on non-certified platforms but do so at their own risk. If any problems are found with non-certified platforms, these may take longer to investigate and resolve by Oracle. Oracle will only test and have access to the tested platforms and configurations. In addition, the resolution for any issues with non-tested configurations could be a recommendation that to resolve the issue you will need to deploy the product on a tested platform. If it is still decided to deploy on a non-certified configuration, it is strongly recommended to fully test the product and non-certified platform in a test environment.

For your reference, refer to the following link for the specific and complete Oracle Support terms and conditions:

## Database Platforms

Version	OS Version*	OS	Oracle Database *	Exceptions and Additional Information
Version 25.12	Oracle Linux 8.10 Oracle Linux 9.6	64 bit	Oracle 19.3.0.0	Oracle Autonomous Database is not supported. Minimum Memory and Disk Space Requirements: <ul style="list-style-type: none"><li>▶ Requires 16GB memory (minimum)</li><li>▶ Requires 500GB disk space (minimum)</li></ul>
Version 25.12	Windows Server 2022	64 bit	Oracle 19.3.0.0	Oracle Autonomous Database is not supported. Minimum Memory and Disk Space Requirements: <ul style="list-style-type: none"><li>▶ Requires 4GB memory (minimum)</li><li>▶ Requires 50GB disk space (minimum)</li></ul>

### \*OS Version:

Tested with following fully localized international versions of OS:

- ▶ English
- ▶ Chinese Simplified

- ▶ French
- ▶ German
- ▶ Russian
- ▶ Spanish
- ▶ Brazilian Portuguese
- ▶ Japanese
- ▶ Korean
- ▶ Chinese Traditional
- ▶ Italian

Unifier supports Oracle Virtual Machine as Virtualization platform.

Unifier is tested using the Enterprise Edition for the Operating System Platforms and certifies this product edition to work on the platforms as listed above.

### \*Oracle Database:

- ▶ Unifier supports RAC (Real Application Cluster), Transparent Data Encryption, Data Guard features on Oracle Database.
- ▶ Unifier supports UTF 8, AL32UTF 8, Western European character sets for Oracle Database.
- ▶ Unifier does not support any version of Oracle XE database.
- ▶ Unifier is tested using the Enterprise Edition for the Database and certifies this product edition to work on the platforms as listed above.

Although untested, Unifier should be fully operational with usage of the following editions as well:

- ▶ Standard Edition
- ▶ Standard Edition One
- ▶ Personal Edition

See the **Tested Configuration** (on page 5) topic for further consideration of non-tested platforms.

- ▶ For the Unifier Earned Value Management (EVM) feature, the DB partitioning license is needed.

# Applications and Web Server

## Tested Applications and Web Servers

Version Supported*	Category	OS Version	Product	Version	Application	JDK Vendor Version*	JDK	Exceptions and Additional Information
Version 25.12	Application Server	Oracle Linux 8.10 Oracle Linux 9.6	Oracle WebLogic Server	14.1.2.0 .0	64 bit	Oracle JDK 17.0.17 +	64 bit	Minimum Memory and Disk Space Requirements: <ul style="list-style-type: none"> <li>▶ 4GB memory (minimum)</li> <li>▶ 50GB disc space (minimum)</li> </ul>

Version Supported*	Category	OS Version	Product	Version	Application	JDK Vendor Version*	JDK	Exceptions and Additional Information
Version 25.12	Web Server	Windows Server 2022	Oracle WebLogic Server	14.1.2.0 .0	64 bit	Oracle JDK 17.0.17 +	64 bit	Minimum Memory and Disk Space Requirements: <ul style="list-style-type: none"> <li>▶ 6GB memory (minimum)</li> <li>▶ 100 GB disc space (minimum)</li> </ul>
Version 25.12	Web Server	Oracle Linux 8.10 Oracle Linux 9.6	Oracle HTTP Server	14.1.2.0 .0	64 bit	n/a	n/a	n/a
Version 25.12	Web Server	Windows Server 2022	Oracle HTTP Server	14.1.2.0 .0	64 bit	n/a	n/a	n/a
Version 25.12	Web Server	Windows Server 2022	Microsoft Internet Information Server	10	n/a	n/a	n/a	n/a

**\*Version Supported**

## Unifier

- ▶ Supports Java Application Server Cluster set up on Oracle WebLogic 14.1.2.0 with Oracle JDK version 17.0.17+.
- ▶ Supports Oracle Fusion Middleware Infrastructure Software 12.2.1.4.0
- ▶ Supports both Application Server and Client Tier with SSL for Oracle WebLogic 14.1.2.0 with Oracle JDK version 17.0.17+.
- ▶ Supports WebLogic as a proxy server.
- ▶ Supports Oracle Virtual Machine as Virtualization platform.
- ▶ Is tested using the Enterprise Edition for the Operating System Platforms and certifies this product edition to work on the platforms as listed above. Refer to the menu page for further consideration of non-tested platforms.

## Integrations and Third-Party Applications

---

Version	Category	Product	Version	Exceptions and Additional Information
Version 25.12	Visualization Software	Oracle AutoVue 3D Professional Advanced	21.1.0.0	Oracle AutoVue is tested only with the following Content Repositories-W CC 12.2.1.4 and CMIS (Alfresco and SharePoint)
Version 25.12	Visualization Software	Oracle AutoVue 2D Professional	21.1.0.0	Oracle AutoVue is tested only with the following Content Repositories-W CC 12.2.1.4 and CMIS (Alfresco and SharePoint)
Version 25.12	Enterprise Administration	Oracle Enterprise Manager	13.3	OEM is tested with Unifier only when it is deployed on Oracle WebLogic Application server.
Version 25.12	Access Provisioning System	Oracle Identity Manager	14.1.2.0.0	OIM is tested with Unifier only when it is deployed on Oracle WebLogic Application server.

Version	Category	Product	Version	Exceptions and Additional Information
Version 25.12	Primavera Unifier Reporting	Oracle Analytics Server	2025 (8.2)	Prepare your environment first by installing Java Developers Kit 17.0.17+ and Web Logic Server 12.2.1.4, install Oracle Analytics Server, and then configure Oracle Analytics Server by running Configuration Assistant.
Version 25.12	Application Hosting	Secure Global Desktop	5.5	
Version 25.12	Configurator	uClient Configurator	Version 25.12	Primavera Unifier application that is automatically installed.
Version 25.12	Content Repository*	Oracle WebCenter Content Core Capabilities (WCC) 11gR1	12.2.1.4	<ul style="list-style-type: none"> <li>▶ Used for File Repository</li> <li>▶ Folders_g is no longer supported.</li> </ul>
Version 25.12	Content Repository*	Microsoft SharePoint Enterprise Edition	2016	Used for File Repository. SharePoint is supported only through CMIS.

Version	Category	Product	Version	Exceptions and Additional Information
Version 25.12	Content Repository*	Content Management Interoperability Services	n/a	<ul style="list-style-type: none"> <li>▶ CMIS connector supports all repositories which are 100% CMIS compliant.</li> <li>▶ CMIS connector is tested with SharePoint, Alfresco content repositories.</li> <li>▶ CMIS is tested on WebLogic 12 and JDK8.</li> </ul>
Version 25.12	PDF Utility	Adobe Acrobat (or other) PDF writer	9, 10	Used to create PDF files for custom business process (BP) help files
Version 25.12	PDF Utility	Adobe Acrobat Reader	11.x, 2015.x	Used to view PDF files.
Version 25.12	MS Office	Microsoft Excel	2016	(Required) Used to create Excel (xlsx) files.
Version 25.12	MS Office	Microsoft 365	2024	

Version	Category	Product	Version	Exceptions and Additional Information
Version 25.12	Schedule Developer & Schedule Manager	Microsoft Project	Standard	Used to create a schedule file, which can be imported into an existing schedule sheet and into a new and existing activity sheet. <b>Note</b> The Schedule Manager feature was deprecated starting with version 23.5.
Version 25.12	WebViewer Server	Apryse, formerly PDFTron	2.2.4	n/a

## Integration with Primavera Applications

---

Version Supported	Product*	Version	Application / Web Server	"JDK Vendor Version"	Exceptions and Additional Information
Version 25.12	Primavera P6 Enterprise Project Portfolio Management	Version 25.12	Oracle WebLogic 14.1.2.0.0	Oracle JDK 17.0.17+	Unifier Version 25.12 is supported with P6 Web and P6 Professional applications only. There are some limitations in the integration when Gateway/Unifier/P6 are in end-end SSL. Integration may not work and test connection issues might occur.

Version Supported	Product*	Version	Application / Web Server	"JDK Vendor Version"	Exceptions and Additional Information
Version 25.12	Oracle Primavera Gateway	22.10	Oracle WebLogic 14.1.1.0.0	Oracle WebLogic 14.1.1.0.0	Integration between Unifier Version 25.12 and P6 Version 25.12 is done through Gateway 22.10 P6 - Unifier integration is tested only with WebLogic application server for all the products. There are some limitations in the integration when Gateway/Unifier/P6 are in end-end SSL. Integration may not work and test connection issues might occur.

**\* Product**

Refer to Primavera P6 Enterprise Project Portfolio Management Release Version 25.12 and Primavera Gateway 21.12 Tested Configurations for more information.

**Primavera Data Warehouse and Primavera Analytics**

Version Supported	Product	Release	Oracle Analytics Server Version	Exceptions and Additional Information
Version 25.12	Primavera Data Warehouse	Version 25.12	2025 (8.2)	Unifier from a SQL Server source is <i>not</i> supported.
Version 25.12	Primavera Analytics	Version 25.12	2025 (8.2)	Unifier from a SQL Server source is <i>not</i> supported.

# LDAP and SSO

---

## User Directory Support

Version	Category	Product*	Version	Exceptions and Additional Information
Version 25.12	User Directory	Oracle Internet Directory	14.1.2.0	Tested Direct LDAP Binding and with OAM as well.
Version 25.12	User Directory	Active Directory	Windows Server 2022	Tested Direct LDAP Binding and with OAM as well.
Version 25.12	User Directory	Oracle Unified Directory	14.1.2.0	n/a
Version 25.12	WebLogic Authentication	Oracle WebLogic	14.1.2.0 12.2.1.4.0	WebLogic Authentication is tested only when Unifier is deployed on WebLogic application server.

## Single Sign On Support

Version	Category	Product*	Version	Exceptions and Additional Information
Version 25.12	Single Sign On	Oracle Access Manager	14.1.2.0	OAM is tested with Unifier, only when it is deployed on Oracle WebLogic Application server.  Unifier supports Oracle Identity Federation 12.2.1.4 and SAML 2.0

Version	Category	Product*	Version	Exceptions and Additional Information
Version 25.12	Single Sign On	Shibboleth	3.3.3.0.0	Unifier supports SAML 2.0

**\*Product**

"Single Sign On" support is tested only with Oracle WebLogic Server (application server) and OHTTP (web server).

"Single Sign On" support with Shibboleth is tested only with Tomcat (application server) and Apache (web server).

# Client and Browser

---

## Client and Browser Support

Version Supported	Client OS/ Email Clients	Client OS 32/64 bit	Supported Browsers	Exceptions and Additional Information
Version 25.12	Windows 11	64 bit	Chrome 140+ Firefox 145+ Firefox 140+ (ESR) Microsoft Edge 142+	JRE is used for Markups
Version 25.12	Mac OS 15 (Sequoia)	64 bit	Chrome 140+ Safari 18+	JRE is used for Markups
Version 25.12	iOS 14.x (iPad and iPhone) The minimum supported iOS version for Unifier Mobile App is 14.0.	Not applicable	Not applicable	Only supported for Unifier Mobile Native iOS App.
Version 25.12	Android Marshmallow 6.0 Android Nougat 7.1 Android Oreo 8.1 The minimum supported Android OS version for Unifier Mobile App is 5.0.	Not applicable	Not applicable	Only supported for Unifier Mobile Native Android App.
