About This Guide

This document covers the tested configurations for P6 Professional and P6 Visualizer Version 25.12.

Oracle has tested on the following configurations and only certifies this release to work on these platforms. Customers may choose to install on non-certified platforms but do so at their own risk. If customers find any problems with non-certified platforms, these may take longer to investigate and resolve by Oracle. Oracle will only test and have access to tested platforms and configurations. In addition, the resolution for an issue with a non-tested configuration might be a recommendation to deploy the product on a tested platform. If you still decide to deploy on a non-certified configuration, Oracle strongly recommends you fully test the product with the non-certified platform in a test environment before deployment to users.

Note

- All platforms and technologies certified with a base P6 Professional version are also supported with the latest P6 Professional patch set for that version (unless specified). Before you install the latest version of a platform or technology, install the most recent P6 Professional patch set certified for it.
- Interim patches as well as quarterly Critical Patch Updates (CPUs) for tested base versions of Oracle platform technologies listed in this document are also supported.
- P6 Professional is tested using the Enterprise Edition of the stated database, operating system, or web server and only certifies this product edition to work on the platforms as listed in this document.
- Any operating system certified for use with technologies listed in this document is supported. For information on certified platforms for Oracle and other third-party technologies, refer to the certification matrix of the respective technology and select the platform compatible with your Primavera applications and the respective technology.

Refer to the link below for the specific and complete Oracle Support terms and conditions:

What's Changed

Review the table to learn about updates to this document.

Change Record

Date	Change Reference
December 2024	First published for this release.

General Information

P6 Professional supports:

- ▶ VMWare and Oracle Virtual Machine as virtualization platforms.
- ▶ EXA Hardware for database server platform.
- ▶ Microsoft .Net framework 4.6.2.
- ▶ Windows installer 4.5.

Deprecated Technologies

- ▶ SQL Server is deprecated as of version 16.1 of Construction and Engineering products and may be dropped in a future release.
- ▶ P6 Integration API is deprecated as of version 16.1 of P6 and may be dropped in a future release.

Systems - Oracle Database Information

Database Platforms

OS Version*	Oracle Database *	Exceptions and Additional Information
Solaris SPARC 11 (64 bit)	Oracle Database 23 Oracle 19.29.0.0 Oracle Autonomous Database	P6 is supported only for English OS locale and input language
Oracle Linux 7 (UL8) (64 bit)	Oracle Database 23 Oracle 19.29.0.0 Oracle Autonomous Database	
Red Hat EL 7(UL8) (64 bit)	Oracle Database 23 Oracle 19.29.0.0 Oracle Autonomous Database	
Windows Server 2019 (64 bit)	Oracle Database 23 Oracle 19.29.0.0 Oracle Autonomous Database	
Windows Server 2022 (64 bit)	Oracle Database 23 Oracle 19.29.0.0 Oracle Autonomous Database	

Database Drivers

Database Type	Database Driver
EPPM	Oracle JDBC
PPM	Oracle ODBC

*OS Version:

Tested with following fully localized international versions of Windows:

- ▶ Arabic
- ▶ Brazilian Portuguese
- ▶ Chinese Simplified
- ▶ Chinese Traditional
- ▶ English
- ▶ French

- ▶ German
- ▶ Italian
- ▶ Japanese
- ▶ Russian
- ▶ Spanish
- ▶ Korean
- ▶ Dutch (Netherlands)

***Oracle and Oracle Autonomous Database:**

Oracle database versions are on-premises or Oracle Autonomous Database only.

Only EPPM database is supported on Oracle Autonomous Database.

P6 Professional supports:

- ▶ Dataguard, Oracle Advanced Compression, RAC (Real Application Cluster), database partitioning, Oracle Database Vault, and transparent data encryption features on Oracle databases.
- ▶ AL32UTF8, UTF 8, and Western European (WE8MSWIN1252) character sets for Oracle databases.
- ▶ Hardened database server environment setup on Oracle Database.

Systems - Non Oracle Database Information

Database Platforms

OS Version*	MS SQL Server Database	Exceptions and Additional Information
Windows Server 2019 (64 bit)	SQL Server 2019 SQL Server 2022	Case-sensitive (CS) collation is not supported for SQL Server. Only case insensitive (CI) collation is supported for SQL Server.
Windows Server 2022 (64 bit)	SQL Server 2019 SQL Server 2022	Case-sensitive (CS) collation is not supported for SQL Server. Only case insensitive (CI) collation is supported for SQL Server.
Windows 10 (64 bit)	SQLite	SQLite is supported only for standalone installation of P6 Professional.
Windows 11 (64 bit)	SQLite	SQLite is supported only for standalone installation of P6 Professional.

Database Drivers

Database Type	Platform	Database Driver
EPPM	SQL Server	Microsoft JDBC for SQL Server
PPM	SQL Server	Microsoft ODBC for SQL Server
	SQLite	SQLite Connector

*OS Version:

Tested with following fully localized international versions of Windows:

- ▶ Arabic
- ▶ Brazilian Portuguese
- ▶ Chinese Simplified
- ▶ Chinese Traditional
- ▶ English
- ▶ French
- ▶ German
- ▶ Italian
- ▶ Japanese
- ▶ Russian
- ▶ Spanish
- ▶ Korean
- ▶ Dutch (Netherlands)

*MS SQL Server Database

P6 Professional supports:

- ▶ Hardened database server environment setup SQL Server 2019.
- ▶ Cyrillic, Japanese, Chinese/PRC, Chinese/Taiwan, Western European Collation Page for SQL Server databases on the respective operating system locales.
- ▶ Oracle recommends LEGACY_CARDINALITY_ESTIMATION be switched on for any version of SQL Server 2019, or later.

Integrations and 3rd Party Applications

Application Hosting

Product	Version	Exceptions and Additional Information
Citrix XenApp	7.18	<ul style="list-style-type: none"> ▶ Citrix XenApp Plugin for Hosted Apps is tested with this server version ▶ P6 Professional through Citrix is supported by application publishing only

Secure Global Desktop	5.5	
Remote Desktop Services	2019 2022	

Microsoft Office Format Support

Format	Product	Version	Exceptions and Additional Information
MS Excel (xlsx)	Microsoft Office	2013 2016 2019	

Microsoft Project Format Support

Format	Product	Version	Exceptions and Additional Information
MS Project (xml)	Microsoft Project	2007 2010 2013 2016 2019	

LDAP

User Directory Support

Product*	Version	Exceptions and Additional Information
Active Directory	Windows Server 2019 Windows Server 2022	
Oracle Directory Server Enterprise Edition	11.1.1.7.3	
Oracle Internet Directory	12.2.1.4.0	
Oracle Unified Directory	12.2.1.4.0	

*Product

Failover and referrals are supported for Active Directory only.

P6 Professional Windows Client

P6 Professional Windows Client

Client OS/ Email Clients	Oracle database Client Version	Exceptions and Additional Information
Windows 11 (64 bit)	19.8	<p>P6 EPPM supports only 64 bit versions of database clients for P6 Professional on 64 bit operating systems.</p> <p>Database client is supported for P6 Professional only.</p> <p>Chrome is recommended for optimal performance.</p>

*OS Version:

Tested with the following fully localized international versions of Windows:

- ▶ Arabic
- ▶ Brazilian Portuguese
- ▶ Chinese Simplified
- ▶ Chinese Traditional
- ▶ English
- ▶ French
- ▶ German
- ▶ Italian
- ▶ Japanese
- ▶ Russian
- ▶ Spanish
- ▶ Korean
- ▶ Dutch (Netherlands)

Hardware Requirements

- ▶ 4GB memory (minimum).
- ▶ 5GB disk space (minimum).

Other Primavera Applications

Applications

Product	Exceptions and Additional Information
Primavera Risk Analysis	The tested version is the most recent version available.

Localization

Language Code	Language	Exceptions and Additional Information
AR	Arabic	English help, only P6 Professional is supported.
