# Client System Requirements

This document covers the client system requirements for Primavera Data Warehouse and Primavera Analytics Version 25 cloud deployments.

**Note:** All platforms and technologies certified with a base Primavera Data Warehouse and Primavera Analytics version are also supported with the latest patch set for that version (unless specified).

For information on certified platforms for Oracle and other third-party technologies, refer to the certification matrix of the respective technology and select the platform compatible with your Primavera applications and the respective technology.

Oracle has tested on the following configurations and certifies this version to work with these technologies. Customers may choose to use non-certified technologies but do so at their own risk. If any problems are found with non-certified technologies, these may take longer to investigate and resolve by Oracle. Oracle will only test and have access to tested platforms and configurations. In addition, the resolution for any issues with non-tested configurations could be a recommendation that to resolve the issue you will need to use a tested technology. If it is still decided to use a non-certified technology, it is strongly recommended to fully test the product and non-certified platform in a test environment.

For your reference, please refer to the link below for the specific and complete Oracle Support terms and conditions:

## Client and Browser

This document covers the client system requirements for Primavera Data Warehouse and Primavera Analytics version Version 25 cloud deployments.

### Notes:

- Analytics Administration web-based configuration utility is tested with Oracle Weblogic Server only.
- P6 EPPM Version 25 and Primavera Unifier Version 25 are supported with Primavera Data Warehouse and Primavera Analytics.

| Client OS          | Client OS<br>32/64 bit | Supported Browsers   | Exceptions and Additional Information  |
|--------------------|------------------------|--|--|
| Windows 11         | 64 bit                 | Firefox 131+<br>Firefox 127+ (ESR)<br>Chrome 130+<br>Microsoft Edge 130+ | Browser support specified is for the optional Primavera Data Warehouse web configuration utility only. |
| Mac OS 14 (Sonoma) | 64 bit                 | Safari 18+<br>Firefox 127+ (ESR)<br>Chrome 130+                          | Browser support specified is for the optional Primavera Data Warehouse web configuration utility only. |

## Other Primavera Applications

This document covers the client system requirements for Primavera Data Warehouse and Primavera Analytics version Version 25 cloud deployments.

| Product*                     | Exceptions and Additional Information |
|------------------------------|---------------------------------------|
| P6 EPPM Version 25           |                                       |
| Primavera Unifier Version 25 |                                       |

**\*Product** - Refer to Primavera Unifier Version 25 and P6 EPPM Version 25 client system requirements for more information.

## Localization

The following languages are supported in the user interface of Primavera Data Warehouse and Primavera Analytics version 23 cloud deployments.

| Language Code | Language             |
|---------------|----------------------|
| PT_BR         | Brazilian Portuguese |
| ZH_CN         | Chinese Simplified   |
| ZH_TW         | Chinese Traditional  |
| EN            | English              |
| NL            | Dutch                |
| FR            | French               |
| DE            | German               |
| IT            | Italian              |
| JA            | Japanese             |
| KO            | Korean               |
| RU            | Russian              |
| ES_ES         | Spanish              |
