Oracle® Communications Diameter Signaling Router Release Notes

Oracle Communications Diameter Signaling Router Release Notes, Release 9.1.0.0.0

G18592-05

Copyright © 2019, 2025, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

My Oracle Support

My Oracle Support (https://support.oracle.com) is your initial point of contact for all product support and training needs. A representative at Customer Access Support can assist you with My Oracle Support registration.

Call the Customer Access Support main number at 1-800-223-1711 (toll-free in the US), or call the Oracle Support hotline for your local country from the list at http://www.oracle.com/us/support/contact/index.html. When calling, make the selections in the sequence shown below on the Support telephone menu:

- Select 2 for New Service Request.
- 2. Select **3** for Hardware, Networking and Solaris Operating System Support.
- 3. Select one of the following options:
 - For Technical issues such as creating a new Service Request (SR), select 1.
 - For Non-technical issues such as registration or assistance with My Oracle Support, select **2**.

You are connected to a live agent who can assist you with My Oracle Support registration and opening a support ticket.

My Oracle Support is available 24 hours a day, 7 days a week, 365 days a year.

What's New in this Guide

This section introduces the documentation updates for release 9.1.0.0.0.

Release 9.1.0.0.0 - G18592-05, August 2025

Updated the part number of Tekelec Platform Distribution in the Media Pack section.

Release 9.1.0.0.0 - G18592-04, June 2025

- Added DSR known bugs in the <u>Known Bug List</u> section.
- Updated the part number of Integrated Diameter Intelligence Hub in the Media Pack section.

Release 9.1.0.0.0 - G18592-03, April 2025

Updated IDIH and VNFM media pack in the Media Pack section.

Release 9.1.0.0.0 - G18592-02, January 2025

- Updated the media pack content in the Media Pack section.
- Added DSR resolved bugs in the <u>DSR</u> section.

Release 9.1.0.0.0 - G18592-01, December 2024

- Updated IDIH and VNFM media pack in the Media Pack section.
- Added DSR features in the DSR Features section.
- Added vSTP features in the vSTP Features section.
- Added VNFM features in the VNFM Features section.
- Added IDIH features in the IDIH Features section.
- Added DSR resolved bugs in the <u>DSR</u> section.
- Added vSTP resolved bugs in the <u>vSTP</u> section.
- Added VNFM resolved bugs in the VNFM section.
- Updated the supported upgrade paths in the <u>Supported Upgrade and Migration Paths</u> section.
- Updated the application and platform line up in the Load Lineup section.
- Updated the media pack content in the <u>Media Pack</u> section.
- Replaced OpenStack Train with OpenStack Wallaby in the <u>Virtual Platforms Supported</u> section.
- Added a note about IDIH in the Supported Upgrade and Migration Paths section.

Introduction

This document provides information about new features and enhancements to the existing features for Oracle Communications Diameter Signaling Router.

It also includes details related to media and documentation pack, feature descriptions, Information on supported hardware baseline, supported upgrade paths. The details of the fixes are included in the Resolved Bug List section. For issues that are not yet addressed, see the Customer Known Bug List.

Release Notes are included in the documentation pack and made available with every software release. For information on how to access key Oracle sites and services, see My Oracle Support.

1.1 DSR Overview

Oracle Communications Diameter Signaling Router (DSR) helps communications service providers monetize their network more efficiently to remain competitive in the market. It creates a centralized and secure signaling architecture that enables core networks to grow incrementally and to support increasing service and traffic demands. The distinctive advantages provided by the Oracle Communications Diameter Signaling Router are network scalability, resiliency, interoperability, and security, as well as network visibility. The cloud deployable Oracle Communications Diameter Signaling Router enables service providers to manage Diameter signaling while optimizing network resources, therefore maximizing the return on network and technology investments.

Disclaimer

Before installing third-party software on the same server with Oracle products, for example, DSR, PCRF, UDR, PIC, EAGLE, and so on, you must be aware of the following information:

- Oracle is not responsible for installation, operation, maintenance, and so on, of any non-Oracle distributed software with Oracle products, for example, DSR, PCRF, UDR, PIC, EAGLE, and so on.
- Additional due diligence, including testing, is recommended to be performed in the lab before deploying non-Oracle software on production sites to avoid potential issues.
- Oracle is not responsible for validating or integrating non-Oracle software with Oracle products, for example, DSR, PCRF, UDR, PIC, EAGLE, and so on. Additionally, the persistence of the non-Oracle software over the upgrade of any Oracle product may or may not occur, and Oracle does not guarantee that the non-Oracle software will persist.
- Oracle Support may require that the customer uninstall the non-Oracle software and reinstall Oracle products, for example, DSR, PCRF, UDR, PIC, EAGLE, and so on, to recover the system to address any field issue.

Virtual Platforms Supported

Virtual DSR is tested and supported only on the following platforms:

- VMware ESXi 8.0 U2
- KVM QEMU 6.2.0, libvirt 8.0.0, and API QEMU 8.0.0
- OpenStack Wallaby

(i) Note

BareMetal is not supported from DSR 9.0.0.0.0.

For more information, see DSR Cloud Benchmarking Guide.

(i) Note

Our benchmarking and performance numbers are based only on the above mentioned platforms. If the customer environment is deployed on any other platform, all issues including compatibility and infrastructure concerns would be the responsibility of the customer. Oracle would only be responsible for application related issues.

Feature Descriptions

This chapter describes the features for the 9.1.0.0.0 release.

3.1 Release 9.1.0.0.0

This chapter introduces the new features or feature enhancements for DSR, vSTP, and VNFM.

3.1.1 DSR Features

The following DSR features are implemented in release 9.1.0.0.0:

- SDS Provisioning Capacity Uplift to 800 TPS: The Transaction Provisioning System
 (TPS) is updated for subscriber database processor for address resolution and subscriber
 location functions. For more information, see Oracle Communications Diameter Signaling
 Router Cloud Benchmarking Guide.
- Increase the APN Limit from 2000 to 8000: An Access Point Name (APN) is a unique
 packet data network identifier. The PCA uses configured Access Point Names to validate
 APN entries received in Diameter signaling, and to apply appropriate stale session timeout
 values during database audits. For more information, see Oracle Communications
 Diameter Signaling Router Policy and Charging Application User Guide.
- Egress Throttle limit from 128 to 512 in DRA: An Egress Throttle Group is a collection of Diameter Connections or Peers, or both, that are logically grouped together to monitor Egress Message Rate and Pending Transactions for multiple Peers and Connections across multiple DA-MPs on a Network Element. For more information, see Oracle Communications Diameter Signaling Router Diameter User Guide.
- Timeout based redirection across RGs: DSR can re-route request to peer or connection
 within the same route group up to a specified number of times as defined in maximum
 number of retry within same route group. When the count of reroutes attempts reaches the
 maximum limit, it re-routes the request to the next route group based on their priority. For
 more information, see *Oracle Communications Diameter Signaling Router Diameter User
 Guide*.
- LDAP to support dot symbol and 30 characters username length: If the user account name has "@" symbol, LDAP Authentication checks for the suffixed domain name in the list of configured LDAP Servers. It then connects to the first available server with a matching domain name to perform the authentication. If this server is not reachable, it proceeds to the next server with a matching domain name. For more information, see Oracle Communications Diameter Signaling Router Operations, Administration, and Maintenance Guide.
- Interface Level Report: The Interface Level Report allows the user to determine the number of total, successful, and rejected messages forwarded and received to or from DSR over a connection on a diameter interface. For more information, see Oracle Communications Diameter Signaling Router Diameter User Guide and Oracle Communications Diameter Signaling Router Measurement Reference Guide.
- Error codes counter peg at individual error code level: For each Policy and Charging Site, the Diameter Error Result Code value to send to the Request initiator for policy related errors can be configured according to which condition applies. Each condition can

- be mapped to a different Result Code for each supported interface. For more information, see *Oracle Communications Diameter Signaling Router Measurement Reference Guide*.
- **DSR Wallaby Support**: Oracle Communications Diameter Signaling Router is supported on OpenStack Wallaby.

3.1.2 vSTP Features

The following vSTP features are implemented in release 9.1.0.0.0:

- Proxy Point Code: vSTP to home network and replacing direct connect links to a foreign network, a method must be available for seamless migration. At present, if the home network migrates links from direct connect to the vSTP, the foreign network must change the APC from the original node to the vSTP Self Point Code. For more information, see Oracle Communications Diameter Signaling Router Virtual Signaling Transfer Point User Guide.
- Support to Translation Type Mapping: The Translation Type Mapping feature enhances
 the functionality of the vSTP by allowing the standardized translation type code values for
 internetwork applications to be mapped to intranetwork values used within any particular
 network as well as intranetwork values to be mapped to internetwork values. For more
 information, see Oracle Communications Diameter Signaling Router Virtual Signaling
 Transfer Point User Guide.
- Point Code and CIC Translation (PCT): The feature enables vSTP to change the DPC, OPC, or CIC of an MTP routed message. This provides vSTP the capability to emulate a point code using other nodes in its network. For more information, see Oracle Communications Diameter Signaling Router Virtual Signaling Transfer Point User Guide.
- DNS/ENUM query Load balancer support: Introduced load balancer for all queries over vENUM servers in the same server group. Queries are load balanced in a round robin manner, which indiscriminately sends each query to the next server that is up. For more information, see Oracle Communications Diameter Signaling Router ENUM User Guide.
- MNP Capacity of 600-700Mn in vSTP to support India MNP: This enhancement helps users to enhance from DSR 9.1 or UDR 14.1 onwards, UDR capacity for MNP, ENUM, and MNP+ENUM use cases is enhanced to support 700M subscriber. For more information see, *Oracle Communications User Data Repository Installation Guide* (Appendix G).

3.1.3 VNFM Features

The following VNFM features and enhancements are implemented in release 9.1.0.0.0:

- Instantiating the IDIH VNF (VNFM V1): Instantiating the IDIH VNF (VNFM V1) supports the dynamic and fixed IP deployment model. In order to start IDIH deployment, it is required to instantiate a Signaling VNF. For more information, see Oracle Communications Virtual Network Functions Manager Installation and User Guide.
- Increase Compliance to ETSI SOL003 Life Cycle Operations Query Subscription Information (VNFM V2): This enhancement helps users to subscribe to notifications related to VNF lifecycle management. For more information, see Oracle Communications Virtual Network Functions Manager Installation and User Guide.

3.1.4 IDIH Features

Enhanced IDIH 9.1 provides a refresh to the architecture of old version while retaining all of its core feature functionality. The architecture brings in latest technology and also provides enhanced User Experience.

Media and Documentation

Oracle Communications software is available for electronic download on the Oracle Software Delivery Cloud (OSDC). Documentation is delivered electronically on the Oracle Help Center (OHC). Both the software Media Pack and Documentation Pack are listed in this chapter.

4.1 Media Pack

All components available for download from the Oracle Software Delivery Cloud (https://edelivery.oracle.com/) are in the following Media Pack contents tables.

(i) Note

This list is accurate at the time of release but is subject to change. See the <u>Oracle Software Delivery Cloud</u> website for the latest information.

4.1.1 DSR Release 9.1.0.0.0

Table 4-1 Media Pack Contents for DSR 9.1.0.0.0

4.2 Load Lineup

This section provides information about supported services and ATS for this release.

4.2.1 DSR Release 9.1.0.0.0

DSR Release 9.1.0.0.0 contains the following components:

Application Lineup

- DSR: 9.1.0.0.0_100.17.0

- SDS: 9.1.0.0.0_100.17.0

- VNFM: 6.1.0.0.0_61.3.12

ATS: 9.1.0.0.0-1.0.15

- UDR: 14.1.0.0.0_114.32.0

IDIH: 9.1.0.0.0

Platform Lineup

TPD: 8.10.1.1.0-150.4.0

gSOAP: 2.8.134

Comcol: 8.1.0.4.0-14244Appw: 9.9.1-100.13.0

Exgs: 9.9.1-100.13.0

4.3 Documentation Pack

All documents are available for download from the Oracle Help Center (OHC) site.

Supported Upgrade and Migration Paths

This release has been tested for an upgrade and migration from specific prior releases. This chapter contains the exact paths for the upgrade and migration. Verify that your current installed release is listed on a valid upgrade and migration path.

The possible upgrade paths to DSR Release 9.1.0.0.0 are listed in the following table:

Table 5-1 Supported Upgrade Paths

Component	From	То
DSR	9.0.1.0.0, 9.0.2.0.0, 9.0.2.1.0	9.1.0.0.0
SDS	9.0.1.0.0, 9.0.2.0.0, 9.0.2.1.0	9.1.0.0.0
IDIH	NA	 9.1.0.0.0 Note: IDIH 9.1.0.0.0 supports only fresh installation. IDIH 9.1 needs different flavour VMs and require additional resources as compared to the older IDIH.
vSTP	9.0.1.0.0, 9.0.2.0.0, 9.0.2.1.0	9.1.0.0.0
UDR	14.0.0.0.0, 14.0.1.0.0, 14.0.1.0.1, 14.0.2.0.0	14.1.0.0.0

(i) Note

- For more information about IDIH see, Oracle Communications IDIH User Guide.
- Any upgrade other than those listed above is not recommended or supported.
 Version 9.0.X.0.0 is supported as a new or fresh installation.
- VEDSR is not supported from DSR Release 8.3 onwards.
- Diameter Security Application (DSA) with Universal-SBR (USBR) application is not supported from DSR Release 8.4.0.5.0. Customers using this application must not upgrade DSR software to DSR 8.4.0.5.0 release and must migrate to DSA with UDR based application.
- Zero Balance Application with USBR and Steering of Roaming (SOR) with USBR are not supported from DSR Release 8.4.0.5.0 and later. Customers using these applications must not upgrade the DSR software to DSR 8.4.0.5.0 or a later release and must migrate to ZBA with UDR and SOR with UDR based applications.

Deprecated Software and Features

The following software element is not compatible with DSR 9.0.0.0.0 and later:

SCEF

Baremetal is not supported from DSR 9.0.0.0.0.

The following features are deprecated from 8.4.0.5 and later:

- DSA with USBR
- ZBA with USBR
- SOR with USBR

The following software elements are not compatible with DSR 8.4 and later:

- DAMP Active-Standby Configuration
- GLA
- MAP Diameter Interworking

Virtualized Engineered DSR (VEDSR) deployment, also known as TVOE based Fully Virtualized Rack Mount Server (FV RMS) Signaling node, is not supported from DSR 8.3 and later. The following are the non-supported network elements of Virtualized Engineered DSR (VEDSR):

- DSR NOAM
- DSR SOAM
- DSR Message Processors (MP)
- SS7 MP
- DSR IPFE
- DSR SBR (Session or Binding or Universal)
- SDS NOAM
- SDS SOAM
- SDS QS
- SDS DP

Virtualized Engineered DSR (VEDSR) networks and associated elements need to be migrated to virtual DSR implementation based on KVM with or without OpenStack or VMware prior to DSR 8.3 or 8.4.x upgrade or install.

Resolved and Known Bugs

This chapter lists the resolved and known bugs for DSR.

These lists are distributed to customers with a new software release at the time of General Availability (GA) and are updated for each maintenance release.

7.1 Severity Definitions

The problem report sections in this document refer to bug severity levels. Definitions of these levels can be found in the publication, *TL 9000 Quality Management System Measurement Handbook*.

Problem Report

A report from a customer or on behalf of the customer concerning a product or process defect requesting an investigation of the issue and a resolution to remove the cause. The report may be issued through any medium.

Problem reports are systemic deficiencies with hardware, software, documentation, delivery, billing, invoicing, servicing, or any other process involved with the acquisition, operation, or performance of a product. An incident reported to request help to bring back the service or functionality to normal without the intent to investigate and provide a resolution to the cause of the incident is not a problem report.

Severity Definitions

Service requests for supported Oracle programs may be submitted by you online through Oracle's web-based customer support systems or by telephone. The service request severity level is selected by you and Oracle and should be based on the severity definitions specified as follows:

- Severity 1 Your production use of the supported programs is stopped or so severely
 impacted that you cannot reasonably continue work. You experience a complete loss of
 service. The operation is mission critical to the business and the situation is an emergency.
 A Severity 1 service request has one or more of the following characteristics:
 - Data corrupted.
 - A critical documented function is not available.
 - System hangs indefinitely, causing unacceptable or indefinite delays for resources or response.
 - System crashes, and crashes repeatedly after restart attempts.

Reasonable efforts will be made to respond to Severity 1 service requests within one hour. For response efforts associated with Oracle Communications Network Software Premier Support and Oracle

Except as otherwise specified, Oracle provides 24 hour support for Severity 1 service requests for supported programs (OSS will work 24x7 until the issue is resolved) when you remain actively engaged with OSS working toward resolution of your Severity 1 service request. You must provide OSS with a contact during this 24x7 period, either on site or by phone, to assist with data gathering, testing, and applying fixes. You are requested to

propose this severity classification with great care, so that valid Severity 1 situations obtain the necessary resource allocation from Oracle.

Network Software Support & Sustaining Support, please see the Oracle Communications Network Premier & Sustaining Support and Oracle Communications Network Software Support & Sustaining Support sections above.

- 2. Severity 2 You experience a severe loss of service. Important features are unavailable with no acceptable workaround; however, operations can continue in a restricted fashion.
- 3. Severity 3 You experience a minor loss of service. The impact is an inconvenience, which may require a workaround to restore functionality.
- 4. Severity 4 You request information, an enhancement, or documentation clarification regarding your software but there is no impact on the operation of the software. You experience no loss of service. The result does not impede the operation of a system.

7.2 Resolved Bug List

This sections lists all resolved bugs for DSR, vSTP, and VNFM in this release.

7.2.1 DSR

Release 9.1.0.0.0

The following table lists the resolved bugs in DSR 9.1.0.0.0 release.

Table 7-1 DSR 9.1.0.0.0 Resolved bugs

Bug Number	Severity	Found in Release	Title
			1
37386705	2	9.1	DNS lookup of hostnames of servers not working after upgrading to Release 9.1
36818553	3	8.6	Error while enabling or preparing the DB in SBR
36949476	3	9.0.2	Issue in Data Export SOAM GUI as insert option is not enabled.
36949017	3	9.0.1	SQL failure while inserting/deleting lpfe Target sets
36818553	3	9.0.1	Error while enabling or preparing the DB in SBR
35972236	3	8.6	Restrict the internal services on OAM servers to OAM networks only
36887803	3	9.0.2	Mediation rule [Error Code 40020]- Operation failed: Wrong value in the drop down list Message Copy
36616189	3	9.0.2	Insert option is not enable while adding Data export server
37183866	3	9.0.1	[Rel 9.1] DCA:DSA Very slow progress for importing DSA related config CSV in SO GUI
36512429	3	9.0	SFTP User not getting created
36605629	3	9.0.1	DCA:DSA S6a Reset-Request RSR w/o User-Id Detection

Table 7-1 (Cont.) DSR 9.1.0.0.0 Resolved bugs

Bug Number	Severity	Found in Release	Title
36546579	3	9.0	Documentation bug for adding proper notes around importing NO and SO jsons in DCA_DSA application after DSR upgrade
36854727	3	9.0	DSA user guide with UDR need to change for the comagent configuration
36392648	3	8.6	Incorrect current HaHeirRole received at the application side for Da_Mp_Leader resource's subresouce when the IMI interface (eth1) is up
37063040	4	9.0	Measurement Counter RxTcpDupPkt is Getting Pegged Incorrectly
37153483	4	9.0	Additional validation of Ring Buffer Configuration in upgrade procedure
36997204	4	9.0.1	Cron file missing after upgrade
37047383	4	8.6	Increase Hostname Length in ConnectionStatus table from 21 to 31

7.2.2 vSTP

Release 9.1.0.0.0

The following table lists the resolved bugs in vSTP 9.1.0.0.0 release.

Table 7-2 vSTP Resolved Bugs

Bug Number	Severity	Found in Release	Title
36234363	3	8.6.0.0.0	Sfapp Velocity check getting failed for Update GPRS location from SGSN as LastUpdatedTS is common for VLR and SGSN
36476734	3	8.6.0.0.0	Parameter, Security Logging is not found in exported configuration of Linkset
36533381	3	9.1.0.0.0	VSTP: Operational state showing degraded in SCCP application status even after UDR is connected
36856495	4	9.0.0.0.0	SFAPP - Neighboring countries table is ignored in the Sfapp feature processing in other modes than OFF mode
36079673	3	8.6.0.0.0	SFAPP Validation Velocity Check Failed Event changes
36116898	4	8.6.0.0.0	Correct presence of value (instead of n/a) under 'VstpTmLnkAvailable' column in 'VSTP Link Usage' Measurement report
36080002	3	8.6.0.0.0	In the VLR Profile and VLR Roaming tables, 'Last Used Time' have a future timestamp
36083934	3	8.6.0.0.0	DSR 8.6.0.0.0_95.16.0 MRN Set Id entry cannot be deleted

Table 7-2 (Cont.) vSTP Resolved Bugs

Bug Number	Severity	Found in Release	Title
36744071	3	9.1.0.0.0	On DSR 9.0.2 running the vSTP applications, a user cannot update the throttle threshold for Sfthrot/Indv_Throt
36809388	3	9.1.0.0.0	Velocity of Travelling value cannot be set higher than 700
36666342	4	8.6.0.0.0	eLynx TDM Link Failure Due To E1 HSL Bandwidth exceeding
36825022	3	9.1.0.0.0	vSTP 8.6.0.5 MAP based routing not working for "forwardSM (MT) Opcode 46 MAP v2" messages
36856033	3	9.1.0.0.0	VSTP:SFAPP event log have missing information which makes it difficult for analysis
37116736	4	9.1.0.0.0	SFAPP: Handling timed out stale entries in UDR, in scenario where UDR does not get updated from home network STPs
37116718	4	9.1.0.0.0	SFAPP: Handling scenarios where ATI response from HLR does not contain ageOfLocation. Skip velocity check and update UDR data in this case.
36872898	2	9.0.0.0.0	Rel 9.0.2_vSTP: Abterm with SA= SNSCgPN ,NSCgPN for TIF and TIF2 service
37093704	3	9.0.0.0.0	After upgrade to 9.0.2 M3UA links to HLR are not sending the NA=12 causing traffic impact
37099648	4	9.0.0.0.0	Removing extra Vital logs in SFAPP code leg that may be causing timing/performance issues
37143183	4	9.1.0.0.0	vSTP SFAPP - SS7FW - CCNDCMCC mapping table fault (Not allowing multiple entry with same MCC)

7.2.3 VNFM

Release 6.1.0.0.0

The following table lists the resolved bugs in VNFM 6.1.0.0.0 release.

Table 7-3 VNFM 6.1.0.0.0 Resolved Bugs

Bug Number	Severity	Found in Release	Title
36748037	4	9.0	Section 11.5 needs to be added to DSR Security Guide
37258661	4	9.1	Third Party Library Upliftment For VNFM

7.2.4 IDIH

Release 9.1.0.0.0

There are no resolved bugs for the release.

7.3 Known Bug List

The section lists the known bugs for DSR, vSTP, and VNFM along with the associated customer impact statements.

7.3.1 DSR

Release 9.1.0.0.0

The following table lists the known bugs in DSR 9.1.0.0.0 release.

Table 7-4 Known Bugs

Bug Number	Severity	Found in Release	Title	Customer Impact
37473056	2	9.0.0.0	vDSR v9.1.0 Replication Audit not completing for Spare SBR after rebooting Active SBR	The SBR server switchover stops during audit. Workaround: There is no workaround available.
37475504	2	9.0.2.0.0_ 99.14.0	GUI Slowness observed for both NOAM & SOAM in DSR 9.0.2.0.0_99.14.0	The GUI runs slowly as the disk space on SOAM is full. Workaround: Guided customer to clear the disk space, post clearing, the GUI worked.
37765567	2	6.1.0.0.0_ 61.3.12	All the servers are not coming via VNFM 6.1.0 , DSR version 9.0.1.1	A few C-Level servers failed to launch during the release of DSR 9.0.1.1.0. Deployment was done manually. Workaround: There is no workaround available.
36524008	3	9.0.2.0.0-9 9.13.0	DSR Traces showing Unkown Profile while using XLVM profile , MMI fixes for XLVM	MMI GET/PUT operations will not work for some of the MP profiles that is XLVM, 35K_MPS etc. Workaround: There is no workaround available.
37212776	3	9.0.1.0.1-9 8.16.0	Not able to open DSR SOAM & NOAM GUI	Unable to open DSR SOAM and NOAM GUI Workaround: In order to log in to SOAM and NOAM, WA must restart Comcol when the login attempt fails.
37355117	3	9.0.1.0-98. 14.0	KPI Graph only scaling up 100	As the graph consistently displays values up to 100 but the MPS (Multimedia Priority Service) numbers are significantly higher than 100, the KPIs filter will not correctly display the graph for MPS statistics. Workaround: KPI (Key Performance Indicator) Graph is displayed properly with accurate scaling.
37373105	3	9.0.0.0.0	DSR Disaster Recovery Planning	Document cleanup Disaster Recovery Workaround: There is no workaround available.

Table 7-4 (Cont.) Known Bugs

Bug Number	Severity	Found in Release	Title	Customer Impact
37380237	3	9.0.1.0.1_ 98.16.0	IPFE issue ,Fix to handle duplicate live configurations iptables rules	Duplicate live configurations IP table rules. Workaround: The purpose of this update is to eliminate duplicate IP table rules and prevent race conditions that could affect configured rules and chains and result in IP tables restoration.
37460349	3	9.0.0.0.0	False Critical alarms for DA Leader process on wrong SOAM	False Critical alarms for DA Leader process on wrong SOAM Workaround: No functional impact. Alarm is not relevant since MPs and VSTP MPs are not part of topology. WA (Wide Area) already shared to clear the alarm.
37500262	3	9.0.0.0.0	[Rel 9.2] Advance Upgrade Health Check fails	Advance Upgrade Health Check fails and stops at 20% with an exception. Workaround: The advance upgrade Health Check will generate the required report.
37663915	3	9.0.2.0.0_ 99.14.0	remoteServerCleanup.sh script is not correctly executed in the SOAMs	Backup and measurement files that have been exported cannot be deleted, consuming up disk space. Workaround: There is no workaround available.
37727909	3	IDIH 9.1.0.0.22	IDIH Functionality issues post installing 9.1.0.0.22	Due to the cinder volume dependencies, VMs are not returning to a normal state when Mysql or Kafka VMs go down, and cinder volumes are not mounting. Workaround: There is no workaround available.
37781521	3	9.0.0.0.0	Upgrade getting Failed from version 8.6.0.1 to 9.0.1.1 on the Standby NOAM	1st HOP upgrade was failing for TPD version. Workaround: New TPD 8.0.0.0.0_90.19.1 is provided and fix for same is submitted in DSR 9.0.1.2.0.
37848613	3	9.0.1.0.0	[9.1] TSA MAX DAMP count from 16 to 32	Feature to upgrade from 16 IPs to 32 IPs done in 8.6 release, adding it back in 9.0.1.0.0. Workaround: There is no workaround available.
37171152	4	9.2.0.0 99.14	DCA Script Compilation Error	Customer getting DCA script compilation error alarm when enabling the TDC check for continent in DSA. Workaround: Issue resolved, alarm will clear, and DSA application will start.
37396728	4	8.6.0.2.1_ 110.15.1	DSR 9.0.1 ERROR: Birva inside reserversc size in NOAM upgrade log	No functional impact.
37502132	4	9.0.0.0.0	Upgrade document update for DSR 9.1	Upgrade document update for DSR 9.1. Workaround: The upgrade document is updated with resolution.

Table 7-4 (Cont.) Known Bugs

Bug Number	Severity	Found in Release	Title	Customer Impact
37520607	4	8.6.0.0.0	The Export File Transfer failure alarm (10104) does not provide Task ID in instance	The Export File Transfer failure alarm (10104) does not provide Task ID in instance. Users insist TaskId to be part of GUI display. Workaround: TaskId is displayed along with manual clearing of alarm upon next successful export.
37581533	4	8.6.0.3.0	Documentation bug to address FQDN validation change	Single word FQDN/Realm not supported. Workaround: There is no workaround available.

7.3.2 vSTP

Release 9.1.0.0.0

There are no known bugs for this release.

7.3.3 VNFM

Release 6.1.0.0.0

There are no known bugs for this release.

7.3.4 IDIH

Release 9.1.0.0.0

There are no known bugs for this release.
