# 1. Preface

## 1.1 **Purpose**

Welcome to the User Guide for Oracle Banking Digital Experience. This guide explains the operations that the user will follow while using the application.

## 1.2 **Audience**

This manual is intended for Customers and Partners who setup and use Oracle Banking Digital Experience.

## 1.3 **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### **Access to Oracle Support**

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit, <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## 1.4 **Critical Patches**

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

## 1.5 **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## 1.6 Conventions

The following text conventions are used in this document:

| Convention      | Meaning                                                                                                                                |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>boldface</b> | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.         |
| <i>Italic</i>   | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.                          |
| monospace       | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

## 1.7 Screenshot Disclaimer

The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.

## 1.8 Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

| Abbreviation | Description                       |
|--------------|-----------------------------------|
| <b>OBDX</b>  | Oracle Banking Digital Experience |

---

## 2. File Upload

Corporates often look forward for an option to make multiple transactions and multiple maintenances quickly and conveniently through a single file upload typically for processing the salary of the corporate staff, for making the vendor payments or even for managing their Virtual Accounts or creating invoices on buyers through uploading a file.

File Upload module of Oracle Banking Digital Experience provides with an ability to the corporate customers to manage file uploads. Various financial and non-financial type of files can be upload by the corporate using pre-defined templates resulting in saving the transaction processing time than entering single record for each transaction.

Salary payments, fund transfers, vendor payments are a few examples of financial transactions that can be supported through file upload. A non-financial file upload facilitates upload of multiple payee creation records, Virtual Account creation, Virtual Account structure creation, Virtual Account closure and remitter list creation, at a single instance.

The File Upload functionality enables users to process the following with respect to Supply Chain Finance and Cash Management:

- Invoices
  - Invoices with Linked Purchase Orders
  - Purchase Orders
  - Credit Notes
  - Debit Notes
  - Payments
  - Cash Flow Transaction records

Oracle Banking Digital Experience File Upload module enables banks to upload files according to the agreed operational and business rules. It also allows the users view the status of the files and records uploaded using OBDX Platform. Further, users can view and download error and response files.

File Uploads facility is simple to use, has daily transaction limits and comes with the security of dual / multi signatory approvals with an option to approve the entire file (File Level approval) or each record uploaded as a part of the file (Record level approval).

**Features Supported in the Application**

- Upload a File
- Approve a File (File Authorization)
- View Uploaded Files and status of file and its records (Uploaded Files Inquiry)
- Access Error File (if any)
- Access Response File

**Prerequisites**

- Party Preferences set for Corporate
- Corporate user is created
- Transaction and Party ID access is provided to corporate user.
- Approval rule set up for corporate user to perform the actions.
- Account and Transaction access has been provided to the user
- Access of the file identifiers are provided to the party and user to perform uploads and view other details.

## 2.1 Upload a File

The 'File Upload' feature provides an option to the corporate user to upload files containing multiple records of supply chain and cash management instruments such as, invoices, or purchase orders, or debit/credit notes, or cash-flow transactions, or payments.

While files are managed entirely within the OBDX File Uploads module, the supply chain specific instruments/transactions are queued in the respective Core Banking system/Back office system, once submitted.

### How to reach here:

*Corporate Dashboard > Toggle Menu > File Upload > File Upload*

*OR*

*Corporate Dashboard > Quick Links > File Upload*

### File Upload

### Field Description

| Field Name             | Description                                                                                                                                                                                       |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>File Identifier</b> | File identifier created earlier, in order to identify the file.<br><br>This will list the file identifiers assigned by the administrator user to the logged in user for handling of file uploads. |

### To upload a file:

1. From the **File Identifier** list, select the file identifier.  
The file identifier details appear.
2. In the **File Name** field, select the file to be uploaded.

File Upload

| Field Name       | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| File Identifier  | Select the File identifier created earlier and mapped to the user in order to identify the file.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Transaction Type | <p>Displays the transaction type of the file upload.</p> <p>The transaction type could be:</p> <ul style="list-style-type: none"><li>• Create Invoices</li><li>• Create Invoices with Linked Purchase Orders</li><li>• Create Purchase Orders</li><li>• Create Debit Notes</li><li>• Create Credit Notes</li><li>• Create and Modify Cash Flow Transactions</li><li>• Create Payments</li></ul> <p>A number of other transaction types are also present. The above types are specific to supply chain finance and cash management. The information displayed is based on the parameters defined for the file identifier selected by the user.</p> |

| Field Name              | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>File Format Type</b> | <p>Displays the format in which the file can be uploaded.</p> <p>The file formats could be:</p> <ul style="list-style-type: none"> <li>• CSV</li> <li>• XLS</li> <li>• XLSX</li> <li>• Fixed Length</li> </ul> <p>Information is displayed based on the parameters defined at the file identifier selected by the user.</p>                                                                                                                                                                                                                     |
| <b>Approval Type</b>    | <p>Displays approval level of the file.</p> <p>The approval could be:</p> <ul style="list-style-type: none"> <li>• Record Level: In record type approval, the approver can approve some records (in a file), and reject others. Only approved records are processed.</li> <li>• File Level: In a file type approval, the approver accepts or rejects the entire file, and all records are either processed or rejected.</li> </ul> <p>Information is displayed based on the parameters defined at the file identifier selected by the user.</p> |
| <b>Accounting Type</b>  | <p>Displays accounting type of the file.</p> <p>This field is displayed for the files that are financial in nature.</p>                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>File Name</b>        | <p>Choose the file from the local machine for upload.</p> <p>Post choosing the file, displays the file name.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                |

- Click **Upload**.  
OR  
Click **Cancel** to abort the file uploading process.
- The success message along with the file reference ID and status of the transaction appears.  
Click **OK** to complete the file upload.  
OR  
Click the **File Reference ID** to inquire about the uploaded file status.  
The Uploaded Files Inquiry screen appears.

## **FAQ**

### **1. What are the different file formats that can be uploaded?**

The file upload formats supported are:

Delimited (CSV, XLS, XLSX) / Fixed Length

---

**Note:** VAM supports only CSV file format for upload.

---

### **2. Can a file upload fail, before generating a File Reference Number?**

Yes, system performs validations on the uploaded file before generating a file reference number. If one or more validations fail – the error message will be displayed on the screen and the file reference number will not be generated.

Validations include a check for maximum size, that the file is not malicious in nature; that the file is not a duplicate file, that it has the correct extension, that it is not empty etc.

[Home](#)

## 2.2 Uploaded Files Inquiry

Through this option the user can view the files uploaded by the corporate user using OBDX platform (only those files that the user has access to) and their status.

- The search can be filtered on various parameters like status and file reference ID.
- The user can track the status of the file and in case of an error in the file, the user can download the error file to arrive at the exact reason for error.
- For files in the 'Processed' status, the user can download the Response file, to vet status of processing (in the host) for each record, of the file.
- The user can track file history and also check Individual record details.

### How to reach here:

*Corporate Dashboard > Toggle Menu > File Upload > Uploaded Files Inquiry*  
OR

*Corporate Dashboard > Quick Links > Uploaded Files Inquiry*

### 2.2.1 Uploaded Files Inquiry

The corporate user can search and view files that are uploaded under a party with the file identifier, date range, file name, file reference ID, transaction type, file status, and view the record details.

Users can provide at least two search parameters to get better search results.

The screenshot displays the 'Uploaded Files Inquiry' page within the Futura Bank system. The header includes the Futura Bank logo and a search bar. The main content area features a search form with the following fields:

- File Identifier** (Required)
- Transaction Type** (Dropdown)
- File Name** (Text)
- File Reference ID** (Text)
- File Status** (Dropdown)
- From Date** (Calendar icon, example: 6/6/25)
- To Date** (Calendar icon, example: 6/6/25)

Below the form is a checkbox labeled 'Show transactions awaiting approval workflow assignment'. The 'Search' button is highlighted in blue, and a 'Clear' button is also present.

**File Status Legend:**

- Uploaded:** File has been uploaded and file reference number is generated.
- Approved:** File has been approved.
- Rejected:** File has been rejected.
- Processing In Progress:** File has been pre-processed and contains error.
- Error:** File has been pre-processed and contains error.
- Processed:** File is liquidated.
- Processed with Exceptions:** File is processed but some of the records are in error.
- Deleted:** File has been deleted.
- Verified:** File has been pre-processed and authorization checks are done (limit + account access check).
- Expired:** File has been expired.
- Under Repair:**
- Repaired:**

OR  
Click **Cancel** to cancel the transaction.

## 2.2.2 Uploaded Files Inquiry - File Details - Payments File

Through this option, the user can view files that have been uploaded by the corporate user with respect to Payments.

### File Details

The screenshot shows the 'Uploaded Files Inquiry' page in the Futura Bank interface. The page has a dark blue header with the Futura Bank logo and a search bar. Below the header, there's a section titled 'Uploaded Files Inquiry' with a sub-section 'File Details'. The 'File Details' section displays the following information:

- File Name:** OBDXPaymentsMay25.csv (with a download icon)
- Transaction Type:** Create Payments
- File Reference Id:** 531425082305
- Number of Records:** 1
- File Status:** Processed
- Transaction Reference Id:** 23053EF47A97
- Response File Download:** (with a download icon)

Below the file details, there's a 'File Workflow' section showing a progress bar with five steps: 1. Uploaded, 2. Verified, 3. Approved, 4. Processing In Progress, and 5. Processed (highlighted with a blue circle). At the bottom, there's a 'Payment Inquiry Records' table with one record:

| Record Reference Number | Customer Payment Reference Number | Payment Type | Payment Amount | Payment Date | Status    |
|-------------------------|-----------------------------------|--------------|----------------|--------------|-----------|
| 531425082305000001      | OBDXTrunkPay2305                  | Outgoing     | USD 100.00     | 1/15/20      | Completed |

At the bottom of the page, there's a 'Download as' button and a 'Back' button. A copyright notice is visible at the very bottom: 'Copyright © 2006, 2020, Oracle and/or its affiliates. All rights reserved (Security/Information/Terms and Conditions)'.

### Field Description

| Field Name | Description |
|------------|-------------|
|------------|-------------|

#### File Details

##### File Name

Displays the name of the uploaded file. The  icon is also provided to download the file.

##### Transaction Type

Transaction type associated with the file.

##### File Reference ID

The file reference number, which was generated while uploading the file.

##### Number of Records

The total number of payment records in the file.

##### File Status

Status of the file uploads.

##### Error Report

Shows an icon to download the error file in case the uploaded file faced some runtime issue and failed to execute.

##### Transaction Reference ID

The transaction reference number, which was generated at the time of transaction execution.

| Field Name                                                                                              | Description                                                                                                                                    |
|---------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|

| <b>File Workflow</b>                                                                                    | Flow displaying various stages and status of file upload.                                                                                      |
| <b>Payment Records</b>                                                                                  |                                                                                                                                                |
| If the user is inquiring about 'Payments' type of transaction, then the following fields are displayed. |                                                                                                                                                |
| <b>Record Reference Number</b>                                                                          | The reference ID for identification of each payment record. This is a hyperlink which when clicked displays the details of the payment record. |
| <b>Customer Payment Reference Number</b>                                                                | The reference number assigned to the payment by the customer, as fetched from the host system.                                                 |
| <b>Payment Type</b>                                                                                     | The type of payment, whether incoming or outgoing.                                                                                             |
| <b>Payment Amount</b>                                                                                   | The currency and amount of the payment.                                                                                                        |
| <b>Payment Date</b>                                                                                     | The date when the payment was made.                                                                                                            |
| <b>Status</b>                                                                                           | Status of the record in the uploaded file.                                                                                                     |

1. In the **Uploaded Files Inquiry – File Details** screen, you can do one of the following:

- In the **File Name** field, click  to download the originally uploaded file.
- In the **Response File Download** field click  to download the response file.
- Click the link under the **Record Reference Number** column of a particular record, to view its details.
- Click **Download as** to download the file in .pdf or .csv format.
- Click **Back** to navigate to the previous screen.

**Note:** If there is an error during file verification (i.e. the file is in error status), an option will be available to download the generated error file.

### 2.2.3 Uploaded Files Inquiry - File Details - Invoices File

Through this option, the user can view files that have been uploaded by the corporate user with respect to Invoices.

#### File Details

#### Field Description

| Field Name                      | Description                                                                                                                                                                   |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>File Details</b>             |                                                                                                                                                                               |
| <b>File Name</b>                | Displays the name of the uploaded file. The  icon is also provided to download the file. |
| <b>Transaction Type</b>         | Transaction type associated with the file.                                                                                                                                    |
| <b>File Reference ID</b>        | The file reference number, which was generated while uploading the file.                                                                                                      |
| <b>Number of Records</b>        | The total number of invoice records in the file.                                                                                                                              |
| <b>File Status</b>              | Status of the file uploads.                                                                                                                                                   |
| <b>Error Report</b>             | Shows an icon to download the error file in case the uploaded file faced some runtime issue and failed to execute.                                                            |
| <b>Transaction Reference ID</b> | The transaction reference number, which was generated at the time of transaction execution.                                                                                   |

| Field Name                                                                                             | Description                                                                                                                                    |
|--------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|

| <b>File Workflow</b>                                                                                   | Flow displaying various stages and status of file upload.                                                                                      |
| <b>Invoice Records</b>                                                                                 |                                                                                                                                                |
| If the user is inquiring about 'Invoice' type of transaction, then the following fields are displayed. |                                                                                                                                                |
| <b>Reference Number</b>                                                                                | The reference ID for identification of each invoice record. This is a hyperlink which when clicked displays the details of the invoice record. |
| <b>Customer Invoice Number</b>                                                                         | The reference number assigned to the invoice by the customer, as fetched from the host system.                                                 |
| <b>Record Status</b>                                                                                   | Status of the record in the uploaded file.                                                                                                     |

1. In the **Uploaded Files Inquiry – File Details** screen, you can do one of the following:

- In the **File Name** field, click  to download the originally uploaded file.
- In the **Response File Download** field click  to download the response file.
- Click the link under the **Reference Number** column of a particular record, to view its details.
- Click **Download as** to download the file in .pdf or .csv format.
- Click **Back** to navigate to the previous screen.

**Note:** If there is an error during file verification (i.e., the file is in error status), an option will be available to download the generated error file.

## 2.2.4 Uploaded Files Inquiry - File Details – Invoices with Linked Purchase Orders File

Through this option, the user can view files that have been uploaded by the corporate user with respect to Invoices with Linked Purchase Orders.

### File Details

The screenshot shows the 'Uploaded Files Inquiry' page in the Futura Bank system. The 'File Details' section displays the following information:

- File Name:** InvPoNumNotExist26May.csv (with a download icon)
- Transaction Type:** Create Invoices With Linked Purchase Orders
- File Reference Id:** 374766582605
- Number of Records:** 3
- File Status:** Processed
- Transaction Reference Id:** 2605B3ED35C4
- Response File Download:** (with a download icon)

The **File Workflow** section shows a progress bar with five steps: 1. Uploaded, 2. Verified, 3. Approved, 4. Processing In Progress, and 5. Processed (highlighted).

The **Invoice Records** section shows a table with one record:

| Reference Number    | Customer Invoice Number | Record Status |
|---------------------|-------------------------|---------------|
| 3747665826050000001 | InvPoNotExist26May      | Completed     |

At the bottom, there are buttons for 'Download as' and 'Back'. The footer includes copyright information: 'Copyright © 2006, 2023, Oracle and/or its affiliates. All rights reserved. [SecurityInformation]Terms and Conditions'.

### Field Description

| Field Name | Description |
|------------|-------------|
|------------|-------------|

#### File Details

##### File Name

Displays the name of the uploaded file. The  icon is also provided to download the file.

##### Transaction Type

Transaction type associated with the file.

##### File Reference ID

The file reference number, which was generated while uploading the file.

##### Number of Records

The total number of invoice records in the file.

##### File Status

Status of the file uploads.

| Field Name                                                                                             | Description                                                                                                                                    |

| <b>Transaction Reference ID</b>                                                                               | The transaction reference number, which was generated at the time of transaction execution.                                                                  |
| <b>Response File Download</b>                                                                                 | Click the  icon to download the response file.                              |
| <b>File Workflow</b>                                                                                          | Flow displaying various stages and status of file upload.                                                                                                    |
| <b>Purchase Order Records</b>                                                                                 |                                                                                                                                                              |
| If the user is inquiring about 'Purchase Order' type of transaction, then the following fields are displayed. |                                                                                                                                                              |
| <b>Reference Number</b>                                                                                       | The reference ID for identification of each purchase order record. This is a hyperlink which when clicked displays the details of the purchase order record. |
| <b>Customer Purchase Order Number</b>                                                                         | The reference number assigned to the purchase order by the customer, as fetched from the host system.                                                        |
| <b>Record Status</b>                                                                                          | Status of the record in the uploaded file.                                                                                                                   |

1. In the **Uploaded Files Inquiry – File Details** screen, you can do one of the following:

- In the **File Name** field, click  to download the originally uploaded file.
- In the **Response File Download** field click  to download the response file.
- Click the link under the **Reference Number** column of a particular record, to view its details.
- Click **Download as** to download the file in .pdf or .csv format.
- Click **Back** to navigate to the previous screen.

**Note:** If there is an error during file verification (i.e. the file is in error status), an option will be available to download the generated error file.

2.2.7 Uploaded Files Inquiry - File Details – Credit Notes File

Through this option, the user can view files that have been uploaded by the corporate user with respect to Credit Notes.

File Details

Field Description

| Field Name               | Description                                                                                                                                                                   |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>File Details</b>      |                                                                                                                                                                               |
| <b>File Name</b>         | Displays the name of the uploaded file. The  icon is also provided to download the file. |
| <b>Transaction Type</b>  | Transaction type associated with the file.                                                                                                                                    |
| <b>File Reference ID</b> | The file reference number, which was generated while uploading the file.                                                                                                      |
| <b>Number of Records</b> | The total number of credit note records in the file.                                                                                                                          |
| <b>File Status</b>       | Status of the file uploads.                                                                                                                                                   |

| Field Name                      | Description                                                                                                                     |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <b>Error Report</b>             | Shows an icon to download the error file in case the uploaded file faced some runtime issue and failed to execute.              |
| <b>Transaction Reference ID</b> | The transaction reference number, which was generated at the time of transaction execution.                                     |
| <b>Response File Download</b>   | Click the  icon to download the response file. |
| <b>File Workflow</b>            | Flow displaying various stages and status of file upload.                                                                       |

### Credit Note Records

If the user is inquiring about 'Credit Note' type of transaction, then the following fields are displayed.

|                                     |                                                                                                                                                        |
|-------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Record Reference Number</b>      | The reference ID for identification of each credit note record. This is a hyperlink which when clicked displays the details of the credit note record. |
| <b>Credit Note Reference Number</b> | The reference number assigned to the credit note by the customer, as fetched from the host system.                                                     |
| <b>Credit Note Date</b>             | The date of creation of the credit note.                                                                                                               |
| <b>Credit Note Amount</b>           | The currency and amount of the credit note.                                                                                                            |
| <b>Record Status</b>                | Status of the record in the uploaded file.                                                                                                             |

1. In the **Uploaded Files Inquiry – File Details** screen, you can do one of the following:

- In the **File Name** field, click  to download the originally uploaded file.
- In the **Response File Download** field click  to download the response file.
- Click the link under the **Record Reference Number** column of a particular record, to view its details.
- Click **Download as** to download the file in .pdf or .csv format.
- Click **Back** to navigate to the previous screen.

**Note:** If there is an error during file verification (i.e. the file is in error status), an option will be available to download the generated error file.

## 2.2.8 Uploaded Files Inquiry - File Details – Debit Notes File

Through this option, the user can view files that have been uploaded by the corporate user with respect to Debit Notes.

### File Details

The screenshot shows the 'Uploaded Files Inquiry' page in the Futura Bank interface. The 'File Details' section displays the following information:

- File Name:** DebitNote2Jun1.txt (with a download icon)
- Transaction Type:** Debit Note
- File Reference Id:** 441478720206
- Number of Records:** 2
- File Status:** Processed
- Transaction Reference Id:** 020627FEA247

The **File Workflow** is shown as a sequence of five steps: 1. Uploaded, 2. Verified, 3. Approved, 4. Processing In Progress, and 5. Processed (the final step, indicated by a black circle).

The **Debit Note Inquiry Records** table contains one record:

| Record Reference Number | Debit Note Reference Number | Debit Note Date | Debit Note Amount | Record Status |
|-------------------------|-----------------------------|-----------------|-------------------|---------------|
| 441478720206000001      | DbBulk2Jun1                 | 3/7/20          | GBP 100.00        | Completed     |

At the bottom of the record table, there are buttons for 'Download as' and 'Back'. The footer includes copyright information: 'Copyright © 2006, 2023, Oracle and/or its affiliates. All rights reserved [SecurityInformation]Terms and Conditions'.

### Field Description

| Field Name               | Description                                                                                                                                                                   |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>File Details</b>      |                                                                                                                                                                               |
| <b>File Name</b>         | Displays the name of the uploaded file. The  icon is also provided to download the file. |
| <b>Transaction Type</b>  | Transaction type associated with the file.                                                                                                                                    |
| <b>File Reference ID</b> | The file reference number, which was generated while uploading the file.                                                                                                      |
| <b>Number of Records</b> | The total number of debit note records in the file.                                                                                                                           |
| <b>File Status</b>       | Status of the file uploads.                                                                                                                                                   |

| Field Name                                                                                                | Description                                                                                                                                          |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Error Report</b>                                                                                       | Shows an icon to download the error file in case the uploaded file faced some runtime issue and failed to execute.                                   |
| <b>Transaction Reference ID</b>                                                                           | The transaction reference number, which was generated at the time of transaction execution.                                                          |
| <b>Response File Download</b>                                                                             | Click the  icon to download the response file.                      |
| <b>File Workflow</b>                                                                                      | Flow displaying various stages and status of file upload.                                                                                            |
| <b>Debit Note Records</b>                                                                                 |                                                                                                                                                      |
| If the user is inquiring about 'Debit Note' type of transaction, then the following fields are displayed. |                                                                                                                                                      |
| <b>Record Reference Number</b>                                                                            | The reference ID for identification of each debit note record. This is a hyperlink which when clicked displays the details of the debit note record. |
| <b>Debit Note Reference Number</b>                                                                        | The reference number assigned to the debit note by the customer, as fetched from the host system.                                                    |
| <b>Debit Note Date</b>                                                                                    | The date of creation of the debit note.                                                                                                              |
| <b>Debit Note Amount</b>                                                                                  | The currency and amount of the debit note.                                                                                                           |
| <b>Record Status</b>                                                                                      | Status of the record in the uploaded file.                                                                                                           |

1. In the **Uploaded Files Inquiry – File Details** screen, you can do one of the following:

- In the **File Name** field, click  to download the originally uploaded file.
- In the **Response File Download** field click  to download the response file.
- Click the link under the **Record Reference Number** column of a particular record, to view its details.
- Click **Download as** to download the file in .pdf or .csv format.
- Click **Back** to navigate to the previous screen.

**Note:** If there is an error during file verification (i.e. the file is in error status), an option will be available to download the generated error file.

## 2.2.9 Uploaded Files Inquiry - File Details – Cash Flow Transactions File

Through this option, the user can view files that have been uploaded by the corporate user with respect to Cash Flow Transactions.

### File Details

The screenshot shows the 'Uploaded Files Inquiry' page in the Futura Bank interface. The 'File Details' section displays the following information:

- File Name:** BulkCashamMarch29.csv (with a download icon)
- Transaction Type:** Create And Modify Cash Flow Transactions
- File Reference Id:** 765333792205
- Number of Records:** 1
- File Status:** Processed
- Transaction Reference Id:** Z205E455AAAF2
- Response File Download:** (with a download icon)

Below the details is a 'File Workflow' diagram showing five steps: 1. Uploaded, 2. Verified, 3. Approved, 4. Processing In Progress, and 5. Processed. The 'Processed' step is highlighted with a black circle.

The 'Expected Cash Flow Records' section contains a table with the following data:

| Reference Number   | Customer Reference Number | Type   | Category | Expected Date | Status    |
|--------------------|---------------------------|--------|----------|---------------|-----------|
| 765333792205000001 | 7890900977945             | Inflow | Point    | 5/3/20        | Completed |

At the bottom, there is a 'Download as' button and a 'Back' button. A chat icon is visible in the bottom right corner.

### Field Description

| Field Name | Description |
|------------|-------------|
|------------|-------------|

#### File Details

##### File Name

Displays the name of the uploaded file. The  icon is also provided to download the file.

##### Transaction Type

Transaction type associated with the file.

##### File Reference ID

The file reference number, which was generated while uploading the file.

##### Number of Records

The total number of cash flow transaction records in the file.

##### File Status

Status of the file uploads.

##### Error Report

Shows an icon to download the error file in case the uploaded file faced some runtime issue and failed to execute.

| Field Name                      | Description                                                                                                                     |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <b>Transaction Reference ID</b> | The transaction reference number, which was generated at the time of transaction execution.                                     |
| <b>Response File Download</b>   | Click the  icon to download the response file. |
| <b>File Workflow</b>            | Flow displaying various stages and status of file upload.                                                                       |

### Cash Flow Transaction Records

If the user is inquiring about 'Cash Flow Transaction' type of transaction, then the following fields are displayed.

|                                  |                                                                                                                                                                     |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Reference Number</b>          | The reference ID for identification of each cash flow transaction record. This is a hyperlink which when clicked displays the details of the cash flow transaction. |
| <b>Customer Reference Number</b> | The reference number assigned to the cash flow transaction by the customer, as fetched from the host system.                                                        |
| <b>Type</b>                      | The type of cash flow transaction, whether Inflow or Outflow.                                                                                                       |
| <b>Category</b>                  | The category of the cash flow transaction.                                                                                                                          |
| <b>Expected Date</b>             | The date when the cash flow transaction was/will be made.                                                                                                           |
| <b>Status</b>                    | Status of the record in the uploaded file.                                                                                                                          |

1. In the **Uploaded Files Inquiry – File Details** screen, you can do one of the following:

- In the **File Name** field, click  to download the originally uploaded file.
- In the **Response File Download** field click  to download the response file.
- Click the link under the **Reference Number** column of a particular record, to view its details.
- Click **Download as** to download the file in .pdf or .csv format.
- Click **Back** to navigate to the previous screen.

**Note:** If there is an error during file verification (i.e. the file is in error status), an option will be available to download the generated error file.

## **FAQ**

### **1. What are some of the validations that a file goes through at various stages, in its life cycle?**

The following are the validations performed on an uploaded file by OBDX and subsequently by the Host, before file is liquidated.

| <b>Sr No</b> | <b>Events</b>          | <b>Applicable to</b> | <b>Checks</b>                                                                                                                                              |
|--------------|------------------------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1            | On File Upload         | All Files            | File contents should not match an already uploaded file                                                                                                    |
| 2            | On File Upload         | All Files            | File should not exceed the Maximum Size limit                                                                                                              |
| 3            | On File Upload         | All Files            | The File Extension type should be the ones permitted                                                                                                       |
| 4            | On File Upload         | All Files            | The file should not be Malicious                                                                                                                           |
| 5            | At Pre-Processing      | All Files            | The format for all fields, should be as per template viz., Date, Currency in accordance with ISO standards, CIF- numeric, account number-alphanumeric etc. |
| 6            | At Pre-Processing      | All Files            | The CIF should be valid, should exist                                                                                                                      |
| 7            | File At Pre-Processing | All Files            | CIF and Debit account should belong to each other                                                                                                          |
| 8            | At Pre-Processing      | All Files            | User should have access to Debit Account                                                                                                                   |
| 9            | At Pre-Processing      | All Files            | Debit account should not be in closed status                                                                                                               |
| 10           | At Pre-Processing      | All Files            | Transaction Limits are not violated at user level                                                                                                          |
| 11           | At Pre-Processing      | All Files            | Payment date should not be in the past                                                                                                                     |
| 12           | At Pre-Processing      | All Files            | Payment date should not be a holiday as per the host calendar maintenance                                                                                  |
| 13           | At Pre-Processing      | All Files            | Debit account should be a CASA account, not loan or TD                                                                                                     |

| Sr No | Events              | Applicable to           | Checks                                                                                                     |
|-------|---------------------|-------------------------|------------------------------------------------------------------------------------------------------------|
| 14    | At Pre-Processing   | All Files               | Debit currency in the file, should match the currency of the CASA account                                  |
| 15    | At Pre-Processing   | Internal Files          | Transaction currency should match either the debit or credit CASA                                          |
| 16    | At Pre-Processing   | Internal Files          | The Credit Account should be a CASA account, not loan or TD                                                |
| 17    | At Pre-Processing   | All SDSC and SDMC files | A file with multiple records, should have the same debit account                                           |
| 18    | At Pre-Processing   | Internal Ad hoc         | The Purpose of remittance should be valid                                                                  |
| 19    | At Pre-Processing   | Domestic Files          | The NEFT / RTGS code should be valid                                                                       |
| 20    | At Approval         | All Files               | Cumulative limits should not be violated either for the Approver and the Party                             |
| 21    | Validations in Core | All Files               | The Debit account should have sufficient balance                                                           |
| 22    | Validations in Core | All Files               | Debit account should not be in dormant status                                                              |
| 23    | Validations in Core | All Files               | Debit account should not be in debit block status                                                          |
| 24    | Validations in Core | Internal Files          | The Credit CASA account should not be closed                                                               |
| 25    | Validations in Core | Internal Files          | There should not be a Credit Block on the CASA account                                                     |
| 26    | Validations in Core | International Files     | The BIC / SWIFT code should be valid, as per the BIC / Clearing directory as maintained in the host system |

**2. If some records in a file are liquidated, others are deleted, what will the status of the file be?**

The following table shows the file status which is followed to depict various status of the file upload. So if all the records of file are liquidated then the file status is processed, and if any of the records in the file is liquidated while all the other are rejected the file status will be processed, and if any of the records is liquidated and rest all have an error the file status will be processed with exception.

| Verified | Approved | Processing in Progress | Liquidated | Rejected | Deleted | Error | File Status              |
|----------|----------|------------------------|------------|----------|---------|-------|--------------------------|
| All      |          |                        |            |          |         |       | Verified                 |
|          | All      |                        |            |          |         |       | Approved                 |
|          |          | All                    |            |          |         |       | Processing in Progress   |
|          |          |                        | All        |          |         |       | Processed                |
|          |          |                        |            | All      |         |       | Rejected                 |
|          |          |                        |            |          | All     |       | Deleted                  |
|          |          |                        |            |          |         | All   | Error                    |
|          |          |                        | 1          | 1        |         |       | Processed                |
|          |          |                        | 1          |          | 1       |       | Processed                |
|          |          |                        | 1          |          |         | 1     | Processed with exception |
|          |          |                        | 1          | 1        | 1       |       | Processed                |
|          |          |                        | 1          | 1        | 1       | 1     | Processed with exception |
|          |          |                        |            | 1        | 1       |       | Deleted                  |
|          |          |                        |            | 1        |         | 1     | Processed with exception |
|          |          |                        |            |          | 1       | 1     | Processed with exception |

**3. If a payment file is in the approved status, does it mean that all the records are successfully liquidated?**

No, the file still has to successfully pass validations in the host system, before records are processed.

**4. Can a user delete the entire file or deletion of only individual records within a file is allowed?**

Whether only records can be deleted, or the entire file will be deleted depends on the accounting type of the file, and the approval type (Record Level or File level)

The table below throws light on the combinations allowed

| Sr No | Accounting Type | Authorization Type | File / Record Deletion allowed?                                |
|-------|-----------------|--------------------|----------------------------------------------------------------|
| 1     | SDMC            | File Level         | The entire file, as well as individual records can be deleted. |
| 2     | SDSC            | File Level         | The entire file, as well as individual records can be deleted. |
| 3     | SDSC            | Record Level       | Only records can be deleted, and not the entire file           |
| 4     | MDMC            | Record Level       | Only records can be deleted, and not the entire file           |

**5. If a working window is set for the File Upload transaction – how will processing be impacted outside of the working window?**

Outside of the transaction working window set for file uploads, processing will depend on whether the file has a Record Level approval or a File Type approval.

Files with a File Type approval – will be rejected, outside of the transaction working window  
Files with Record Type approval – if some records are processed within the working window, will be completed – if processing of some records, falls outside of the working window – these will be rejected.

**6. What is the impact of limits on processing of File Upload transactions?**

File uploads transaction will utilize limits depending on if the transfer is an internal, domestic, or international funds transfer.

Further, for domestic funds transfer – limits are defined for each network – NEFT, RTGS and IMPS. Limits will be checked at the pre-processing's stage for file uploads.

**7. Does this functionality solely cater to bulk payment transactions?**

No, File uploads is used for bulk payment transactions and to add multiple payees. Internal, domestic or international payees can be added through the file upload functionality.

**8. After a file is successfully uploaded, is the user provided notifications on its status?**

Yes, Users mapped to the FI – initiators and approvers of the file, are provided with alerts / notification, as file progresses from the Uploaded stage to Approved to Processing in Progress to the Processed stage. Alternately, users can log in to view the status of the file.

## 3. File Approval

This option allows the approver to approve / reject the uploaded file. File approval could be either

- File Type
- Record Type

In a File type Approval, the approver accepts or rejects the entire file, and all records are either processed or rejected, respectively. While in a Record type approval, the approver could approve some records, and reject others. Only the approved records are processed further.

**How to reach here:**

*Approver Dashboard > Pending for Approvals*

### 3.1 File Approval

Once a file is uploaded and pre-processing checks are successfully completed, the file is pending approval, and is in the respective Approver's queue.

**To approve / reject a file:**

1. In the **Pending for Approval** section, click the **Bulk File** tab. All the uploaded files that require approval appears.
2. Select the multiple files and click **Approve** to approve the transactions.  
OR  
Click the link under the **Reference No** column. The **File Details** screen appears.

**Bulk File Approve / Reject**

3. If you click **Approve**, the **Approval Comment** screen appears.

## Bulk File Approve / Reject – Remarks

**Approval Comment**

Summary of Selected Transactions (1)

| Date              | File Identifier         | Transaction Type                        | File Name               | Reference Number | File Reference Number | Approval Status  |
|-------------------|-------------------------|-----------------------------------------|-------------------------|------------------|-----------------------|------------------|
