1. Preface

1.1 Purpose

Welcome to the User Guide for Oracle Banking Digital Experience Cloud Service. This guide explains the operations that the user will follow while using the application.

1.2 Audience

This manual is intended for Customers and Partners who setup and use Oracle Banking Digital Experience.

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit, http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

1.4 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.5 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
Italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.6 Screenshot Disclaimer

The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.

1.7 Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Abbreviation	Description
OBDX	Oracle Banking Digital Experience

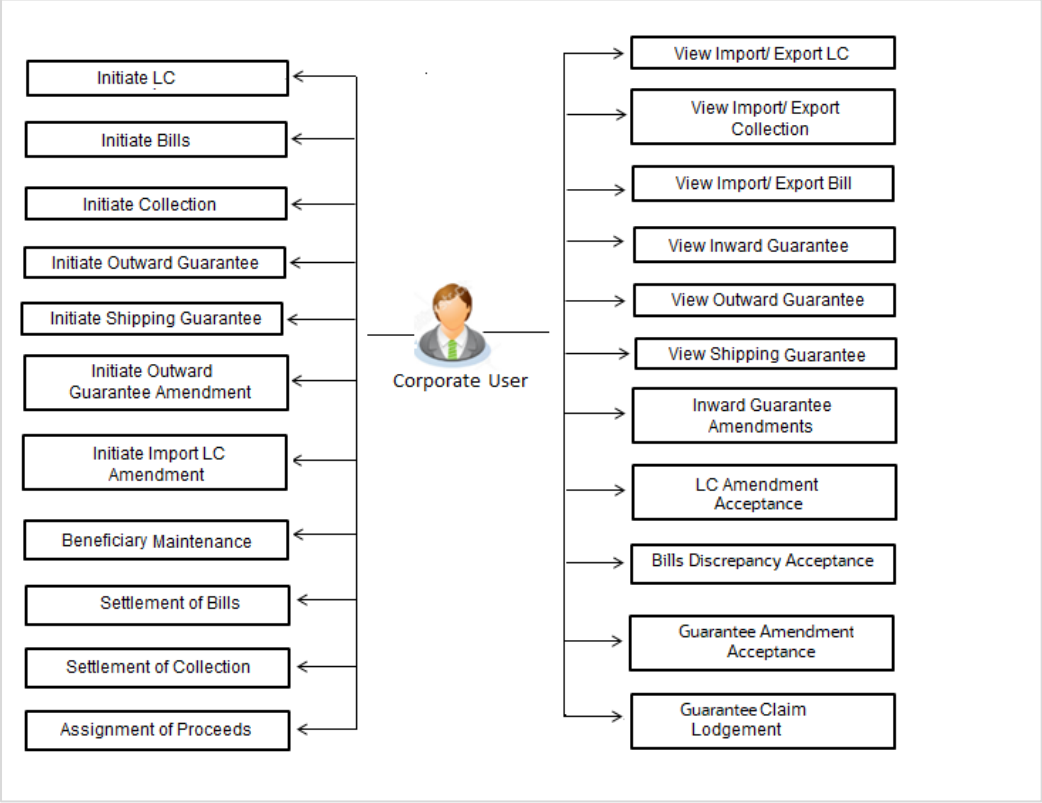

2. Trade Finance

Trade finance is process of financing commerce, i.e. both domestic and international trade based transactions. It comprises a seller, a buyer along with other service providing institutions to facilitate transactions such as banks, insurers, credit rating agencies etc. This may be considered as a tool to safeguard against the distinct risks present in doing international trade viz. fluctuations in currency conversions, political conditions, creditworthiness of the buyer etc. Some of the majorly used tools are Letter of Credits, Import and Export Bills, Outward Guarantees.

In the Trade Finance module, you can initiate, amend and view Letter of Credits (LC). You can also view details of Import and Export Bills, and Export Bills under LC, and Outward Guarantees raised. User can initiate Collection and outward Guarantees. User can initiate standalone shipping Guarantee and also Shipping Guarantee under LC.

Note: All transactions are supported on mobile devices.

Workflow

2.1 Letter of Credit

Letter of credit is a financial tool which acts as an obligation of the issuing bank to pay the agreed amount to the seller on behalf of the buyer, if buyer provides compliant documents about those goods as specifically mentioned in the sales contract or purchase agreement to the advising bank. They are governed by rules set by International Chamber of Commerce known as Uniform Customs and Practice for Documentary Credits (UCP 600).

These are of different types; most commonly used ones are irrevocable LC, transferable LC. Mostly they are used in situations where both parties i.e. seller and buyer are new to each other and are operating in different countries and seller thinks to safeguard his interests against multiple risks involved in the trade.

Bill is a trade transaction, in which the Exporter forwards the required commercial documents to the Importer's bank, against which the payment is to be done. Banks facilitates documents movement, makes the required checks and then process payments to the Exporter against the Bill.

There occurs some situations where the sales contract goes for some modification, and in order to replicate the same over Bills and Letter of Credits, acceptance from other party is also required. Using this option, user can accept or reject, the discrepancies raised in Import Bills or amendments under Export Letter of Credit. It is then forwarded for further approval from bank. A search facility is also provided to easily locate the discrepancy or amendment raised.

2.2 Collection

Import Collection offers a view about the Collection from the point of view of an Importer and Export Collection offers the same from the point of view of an Exporter.

2.3 Guarantees

It is a contract released by bank for its customer, who has signed an agreement to purchase goods from a supplier and agrees to fulfil any financial obligations to the supplier in case of default. In other words, if the debtor fails to settle a debt, the bank will cover it. Using this option, user can apply for an Outward Bank Guarantee. For the BG application, user must enter the details in the four tabs available in this option viz. Parties, Commitment Details, Bank Instructions and Guarantee. Any amendment raised by the counterparty can also be accepted or declined by customer.

2.4 Other Party Maintenance

To ease the user from filling up the details of beneficiary, a facility to maintain beneficiary is added. User can create add, edit or delete beneficiary details and also have different access type, if he wants to share the same beneficiary with other users. Also, it can be defined as in which transactions, user will be able to use the beneficiaries viz. LC, BG or Collection. This enables user to directly choose a beneficiary from the maintained list and save time of filling up the detail every time he is initiating a new transaction.

2.5 Shipping Guarantee

Shipping Guarantee refers to a written guarantee, issued by the bank which will bear joint liability, and is presented by the Importer to the goods carrier or its agent for picking up the goods in the case of arrival of cargo prior to the receipt of shipping documents. Shipping Guarantee is commonly used under L/C with full set of documents of title to goods. This helps Importer to pick up the goods in time to avoid port demurrage.

2.6 Application Tracker

User gets a simple tracking tool for all his applications which are either saved and can be fetched further for retrieval or which are submitted for further processing. He can also look for the pending clarifications received from bank, and reply to them.

2.7 Documents and Clause Maintenance

A corporate user can save the clauses under documents, so that it can use the same as and when required while initiating an LC. User also have an option to mark it to be available to other users of corporate.

2.8 Additional Conditions Maintenance

Additional Condition is required while creating Letter of Credits. A user can create (if maintenance is not already there), view and edit the additional conditions. User will have the facility to save his custom conditions and use as and when required. Each Condition is saved with the help of an identifier which is unique for the customer, and all identifiers needs to be mapped to codes of additional conditions as maintained by bank.

2.9 Assignee Maintenance

Assignee Maintenance allows the user to create (if maintenance is not already there), view and edit the assignee.

2.10 Islamic Transactions

Sharia laws also govern and guide how trade finance works, and Islamic Trade Finance caters to these needs. These transactions will be available to those users entitled for it. For details, refer *User Manual Oracle Banking Digital Experience Corporate Trade Finance - Islamic*

3. Overview (Dashboard)

Trade Finance dashboard provides holistic information to the corporate user about its Trade Finance business in a simplified manner. It provides an overall understanding of the current position with respect to different trade instruments.

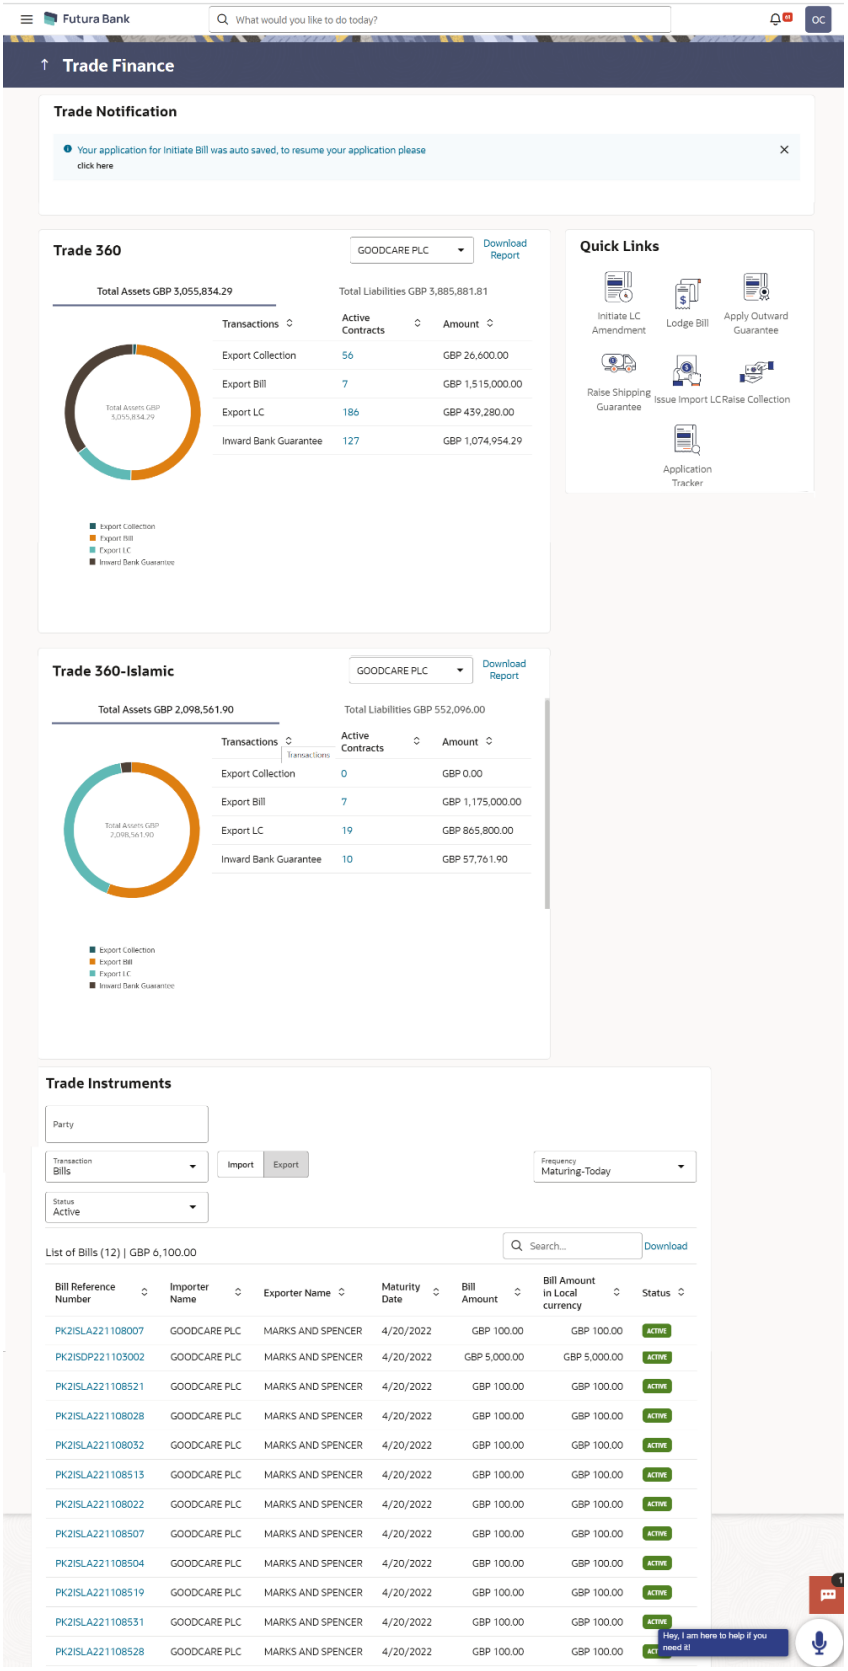

Below mentioned widgets are available in Trade Finance Overview:

- Trade 360
- Trade Instruments
- Quick Links

Hey, I am here to help if you need it!

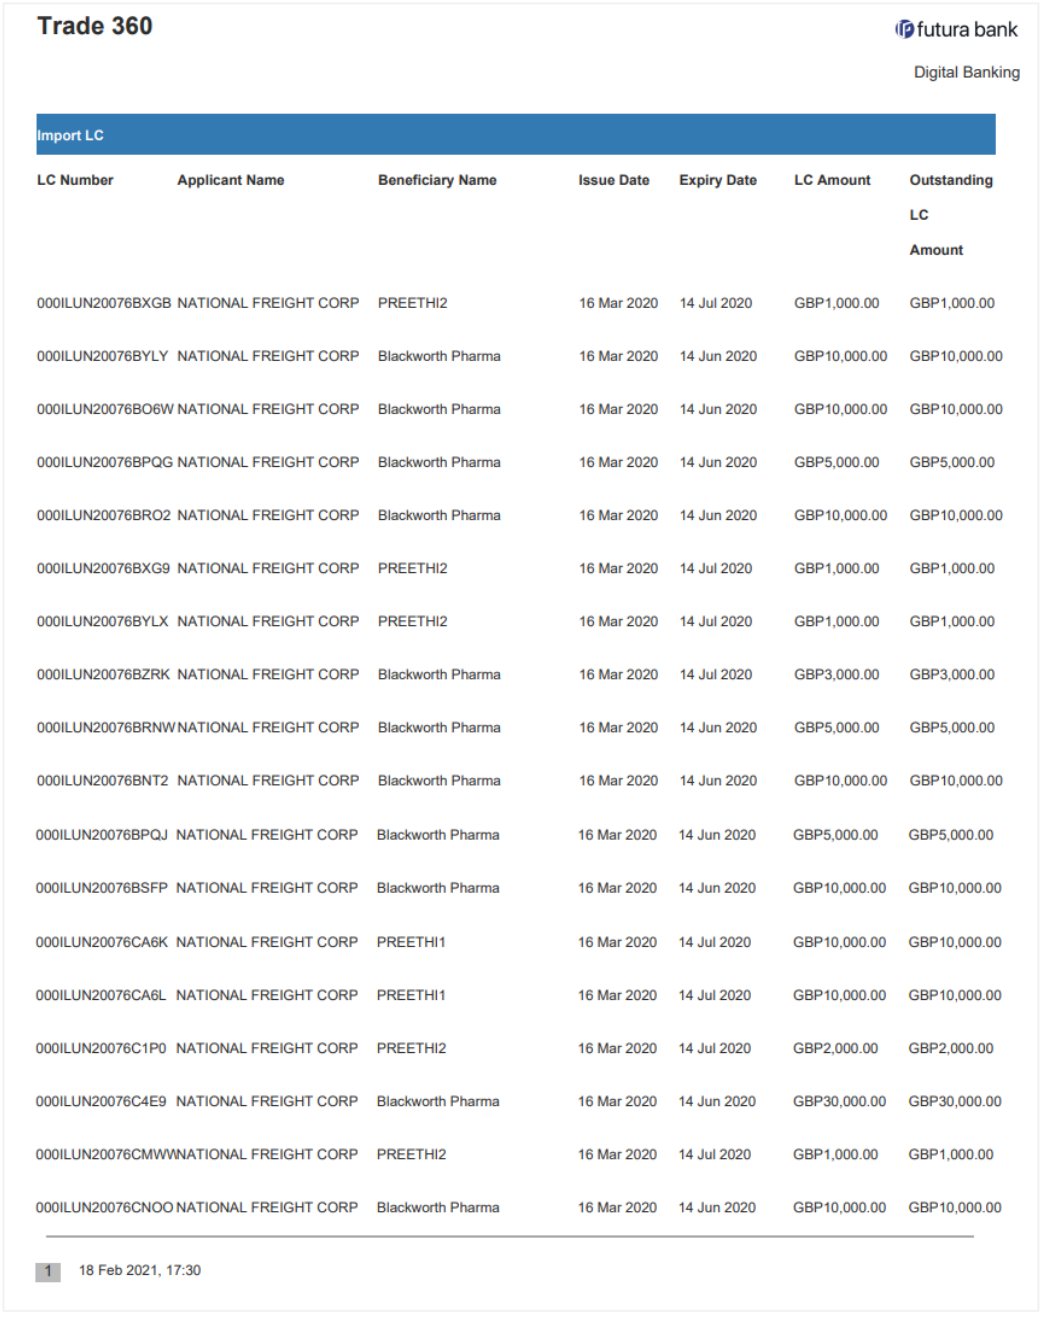

Bi-Directional Flow:

The corporate user can click the link to request for clarification. Whenever the user submits a trade finance transaction, then the bank's trade finance team sends back the transaction with their comments or reason for rejection to the user, so that he can rectify the transaction and resubmit again.

Trade 360

This widget provides a Trade 360 view of user's all trade instruments of the selected party. The various tabs of trade instruments displays the total active contracts and their sum total.

This widget provides overall status of all of the existing Trade instruments so that one can have a better understanding of Trade Finance instruments and transactions. The user can see the summary of various active records and can download the report of all the contracts in a trade instrument.

Based on the selection, the Total Contracts and its equivalent LCY is also displayed.

The user can also see the graph which displays the sum total of transactions selected in various states as per the applicable filter such as Active/Expired/Liquidated etc.

4. Initiate a Letter of Credit

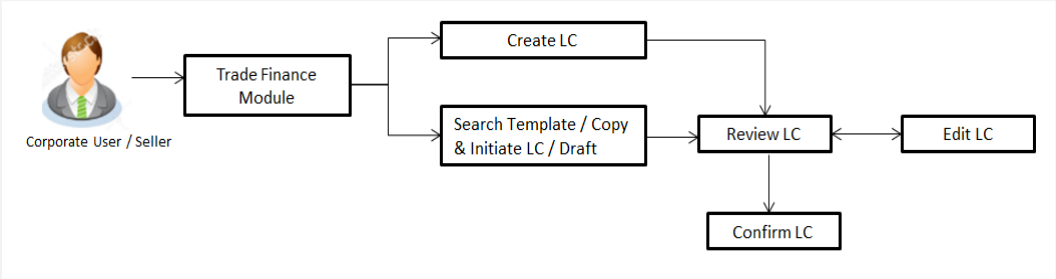

Using this option, you can initiate an Import Letter of Credit (LC) in the application. A Letter of Credit is a bank document which undertakes that the seller will receive payment against the stipulated documents, provided the terms and conditions have been satisfied.

An **Import Letter of Credit** provides the credit worthiness of the Importer, with the involvement of financial institutions such as banks.

Pre-Requisites

User must be having a valid corporate login credentials to get into the system. This will be under a maker – approver system, or as per user's access. User must be having a sanctioned limit /credit available for his perusal.

Workflow

How to reach here:

Dashboard > Toggle menu > Trade Finance > Letter of Credit > Import Letter of Credit > Initiate Letter of Credit
OR
Dashboard > Trade Finance > Overview > Quick Links > Issue Letter of Credit

User has four options to initiate LC

a. Using existing Templates
b. Using existing Drafts
c. Initiating LC (New Application)
d. Copy & Initiate (Copying the contents of existing LC transaction and initiate)

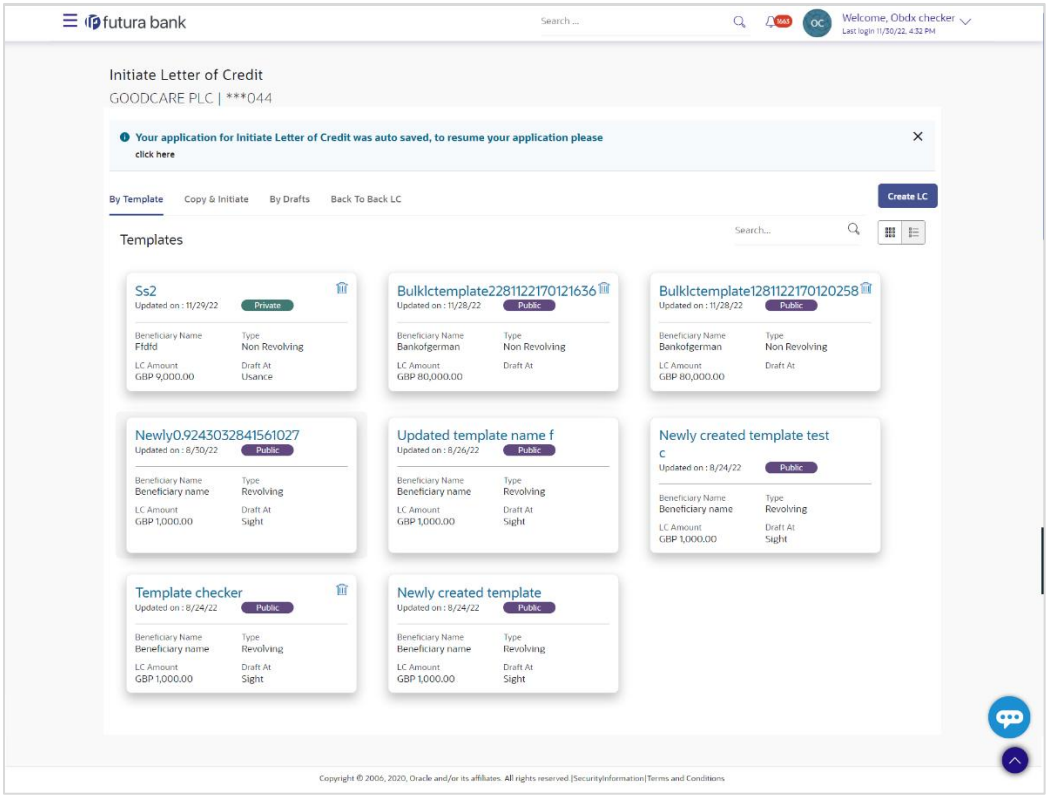

Using existing Templates - Initiate LC Template Summarized View

This is a default view; the user is landed on this screen on accessing 'Initiate Letter of Credit' menu option. The summary of all the Initiated LC template of a corporate are listed with basic information of each LC. User can choose to check the complete details of a specific template by clicking on a card.

The user has the facility to save incomplete transactions automatically as a draft, which can be resumed at a later stage. If user forgot to save those applications explicitly in draft/template or couldn't save those due to session timeout. On next login same day, system will give option to user to continue using auto saved application.

In case when the user clicks on cross of the auto saved message in the ribbon, an alert that the saved application will get deleted is displayed.

However, if the user is working from an existing Draft, it will also get automatically saved with the click of each next button. It will be saved with the old name only, and the default naming convention used for auto save will not be exercised here.

Field Description

Field Name	Description
Party Name	The name of the applicant is displayed.

4.6 Initiate Back to Back Letter of Credit

Using this option, the user can initiate a Back to Back Letter of Credit (LC) in the application. This LC reduces the fund constraints problems of the exporter by providing the opportunity to open the LC against Export LC and to pay after getting the export proceeds.

The application will do the Amount and Expiry Date Validation with the underlying Export LC while listing the export LCs where Back to Back LC can be initiated.

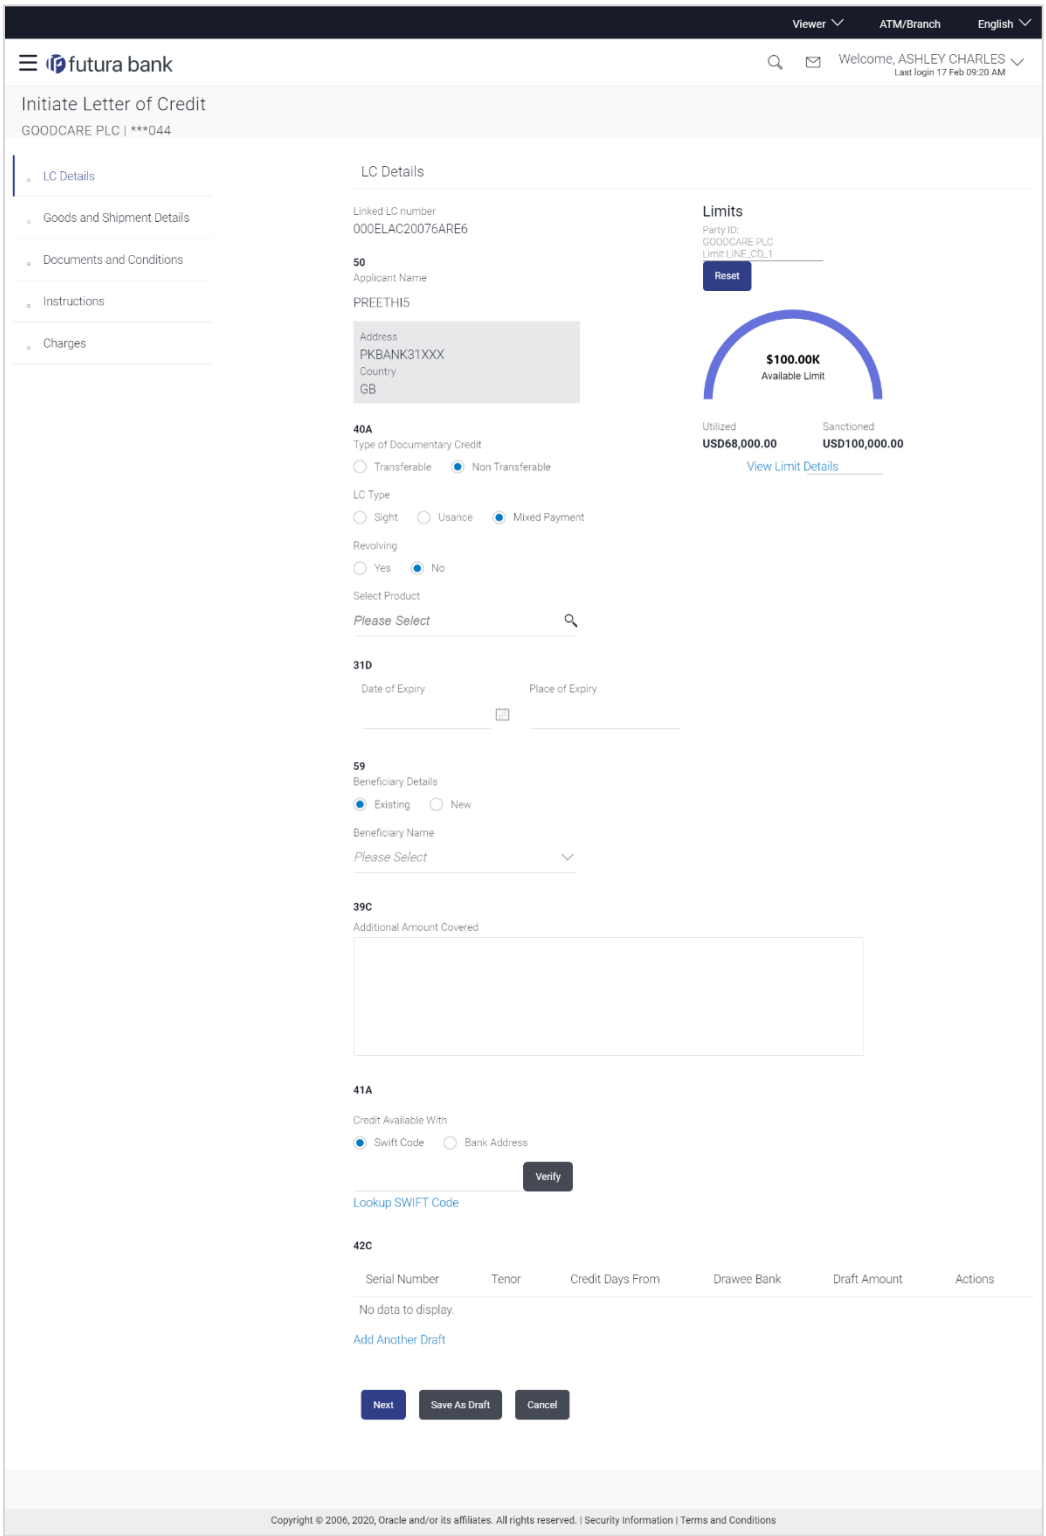

System validates that Back to Back LC should not have maturity date/ tenor date/ expiry date greater than that in parent LC and the application amount of Back to back should not be more than parent export LC.

Once submitted by user, the application would be available in OBTFPM for bank user to process. The created LC will be available along with other initiated Import LCs and also available in application tracker for tracking purpose.

To initiate the Back to Back LC:

1. In the Initiate Letter of Credit - Back to Back Search Results screen, click **the Reference Number** link. The **Initiate Letter of Credit Back to Back** screen.

Initiate Back to Back Letter of Credit

9. Settlement of Bills

Once the goods are shipped and the Importer receives the trade documents, the Exporter draws out the Bills to be paid by the Importer. With the introduction of the 'Settlement of Bill' transaction, the Importer can now liquidate the Bills he has received under his Import LC, i.e. he can instruct the bank to pay the Bills he has received, from one of his accounts. The user can also use one of his booked forward deals while settling the Bill.

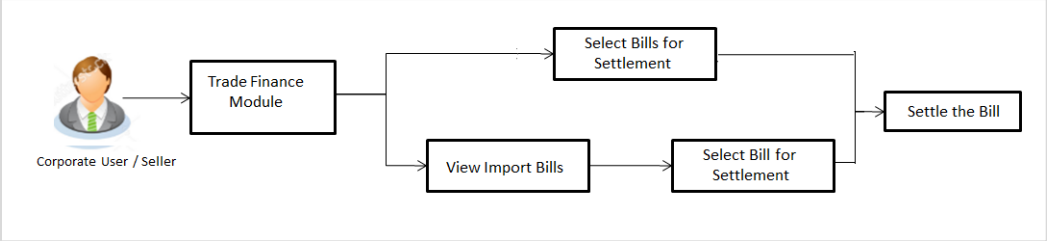

The user can settle either multiple bills from his account, with or without a forex deal, or apply for a loan to settle the bills. The user can link the FX deals.

Using this option, user can settle one or more Bills under LC in the application.

Pre-Requisites

- User must have a valid corporate party Id and login credentials in place
- At least a single Import Bill should exist for the party ID and party must having view rights for it

Workflow

These are explained in detail underneath.

How to reach here:

Dashboard > Toggle menu > Trade Finance > Letter Of Credit > Import Letter of Credit > Settlement of Bills
OR
Dashboard > Toggle menu > Trade Finance > Import Letter of Credit > View Bills > View Bill details > Settle

FAQs

1. **Can I see LCs which has expired?**

   Yes, you can look details of LCs which are expired, active, closed or on hold.

2. **Can I see Bills linked to my LC?**

   Yes, on clicking Bills section, you will have a summary and link to attach Bills under the LC.

3. **Why only certain Incoterms, documents or clauses coming, not the others?**

   It depends on the LC product chosen while creating; all these are dependent on the LC product.

4. **How many amendments are possible and how to keep track?**

   Application will show you all the fields with their values and the amendments done to it. The details of amendments are displayed in the amendment section.

12. LC Amendment Acceptance

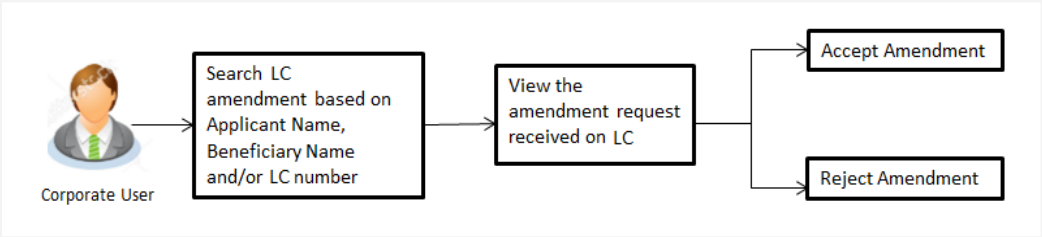

User can search amendments under Export Letter of Credits using various parameters like Beneficiary Name, LC Number, and Applicant Name etc. The user can accept / reject LC Amendments. The amended value comes on the screen and the previous value is shown beneath the same field in red.

If an amendment is initiated under the Parent LC to reduce the LC amount with the beneficiary's consent, but before the beneficiary's consent is received, and the Parent LC amount is utilized by transferring the LC, then during the Export LC Amendment Acceptance, if the user attempts to accept the amendment and sufficient balance is not available under the Parent LC, the system displays an error message and prevent the user from reducing the Parent LC amount.

Pre-Requisites

- User must have a valid corporate party Id and login credentials in place

    Click **Cancel** to cancel the transaction. The **Dashboard** appears.
26. The success message appears along with the reference number. Click **OK** to complete the transaction.

22. View Inward Guarantee/Stand By LC

Using this option, you can view existing Inward guarantees in the application.

A guarantee from a lending institution ensures that the liabilities of a debtor will be met. In other words, if the applicant fails to fulfil a commitment, the lending institution will cover it. A Bank Guarantee enables user to show more credibility while doing business.

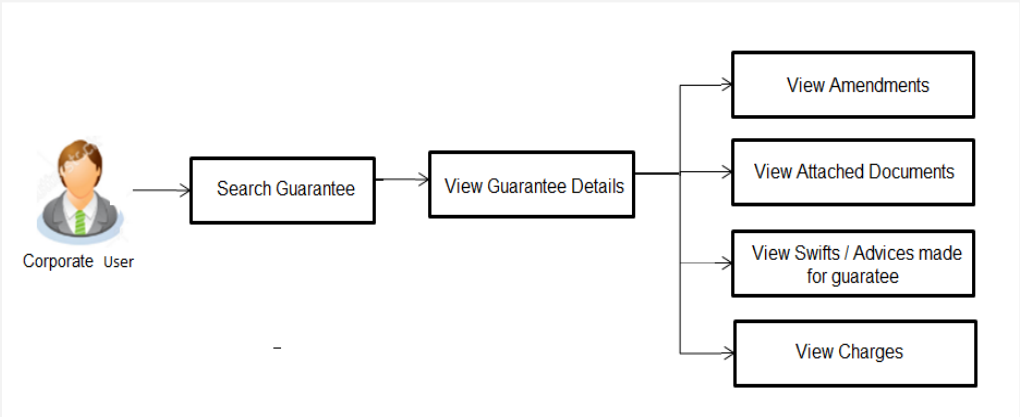

This option allows you to search for guarantees based on a certain search criterion. It allows you to view a list of Bank Guarantees (also called Inward Guarantee) for the selected customer. Details of an individual guarantee can be viewed and Exported in various formats.

Note: Whenever the API services are called by the OBDX, then OBTF pass only those incoming and outgoing SWIFT messages details that are flagged as External by the bank in the "Trade Finance Message Type Maintenance" screen.

Pre-Requisites

- User must have a valid corporate party Id and login credentials in place

29. View Outward Guarantee/Stand By LC

Using this option, you can view existing Outward Guarantees in the application.

A guarantee from a lending institution ensures that the liabilities of a debtor will be met. In other words, if the applicant fails to fulfil a commitment, the lending institution will cover it. A Bank Guarantee enables user to show more credibility while doing business.

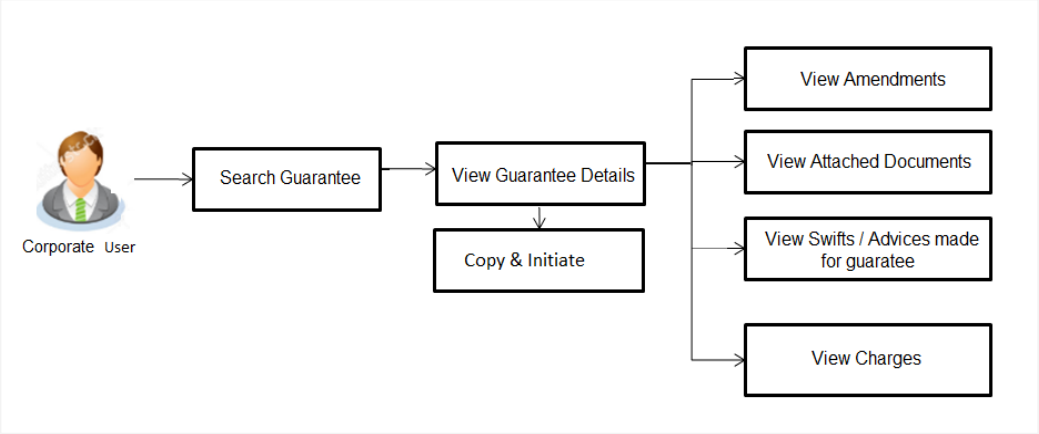

Guarantees can be initiated in the system using the Initiate Guarantee option. This option allows you to search for guarantees based on a certain search criterion. It allows you to view a list of Bank Guarantees (also called Outward Guarantee) for the selected customer. Details of an individual guarantee can be viewed and exported in various formats.

Note: Whenever the API services are called by the OBDX, then OBTF pass only those incoming and outgoing SWIFT messages details that are flagged as External by the bank in the "Trade Finance Message Type Maintenance" screen.

Pre-Requisites

37. The success message initiation of guarantee creation appears along with the reference number. Click **OK** to complete the transaction.

32.4 Save As Template

User can save the application as a Template so that it can be used for creation of similar shipping guarantees, if required in future. The application allows the template access as public or private if saved as template.

- Public: A template marked as 'Public are visible to all the users mapped to the Party ID of the user who created the template. All users mapped to the party will only be able to view and use whereas they will not be able to edit or delete template. Only the creator of the template is allowed to edit or delete the template.
- Private: A template marked as 'Private' is available to only the creator of the template. Only creator of the template can use the template while initiating shipping guarantee and modify or delete such templates.

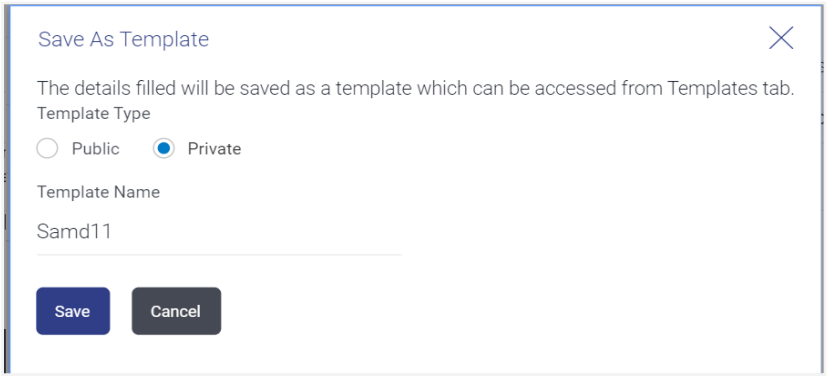

User can search the saved shipping guarantee template by template name in search tab. The LC applications earlier saved as template can also be saved as draft while initiating a shipping guarantee.

Note: User cannot save application with attached document as Template.

To save Shipping Guarantee application as template:

1. Enter the required details in application.
2. Click Save As , and then select **Template** option.

Save as Template

Field Description

Field Name	Description
Template Type	Indicates the type of access for the template. The options are: • Public: A template marked as 'Public' is visible to all the users mapped to the Party ID for which the user has created the template. All such users will only be able to view and use this template, however they will not be able to edit or delete the template. Only the creator of the template is allowed to edit or delete the template. • Private: A template marked as 'Private' is available to only the creator of the template. Only creator of the template can use it while initiating Shipping Guarantee and modify or delete such template.
Template Name	Name of the template to be saved.

3. From the **Template Type** list, select the appropriate option.
4. In the **Template Name** field, enter the desired name for the template.
5. Click **Save** to save the template.
   The transaction details are saved as a template which can be access from the **Template** tab.
   OR
   Click **Cancel** to cancel the transaction. The **Dashboard** appears.

32.5 Save As Draft

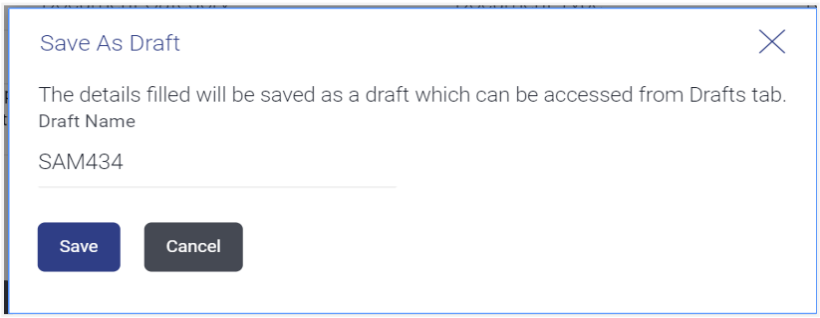

User can save Shipping Guarantee application as a Draft so that it can be used if required in future. It can be re used only one time for Shipping Guarantee Application initiation. User can search the saved Shipping Guarantee draft using the draft name in search box. The saved drafts can be accessed from the **Draft** tab. The Shipping Guarantee applications, which were saved as draft can also be saved as template after adding all other necessary fields.

Note: User cannot save application with attached document as Draft.

To save Shipping Guarantee application as draft:

1. Enter the required details in Shipping Guarantee application.
2. Click **Save As** and then select **Draft** option.

Save as Draft

Field Description

Field Name	Description
Draft Name	Name of the draft.

4. Click **Save** to save the draft.
   The transaction details are saved as a draft which can be accessed from the **Draft** tab.
   OR
   Click **Cancel** to cancel the transaction. The **Dashboard** appears.

Note: When shipping Guarantee is linked with LC it cannot be saved as Draft, when it is not linked with LC, then it can be saved either as a draft or as a template.

33. View shipping Guarantee

Using this option, you can view existing shipping guarantees in the application.

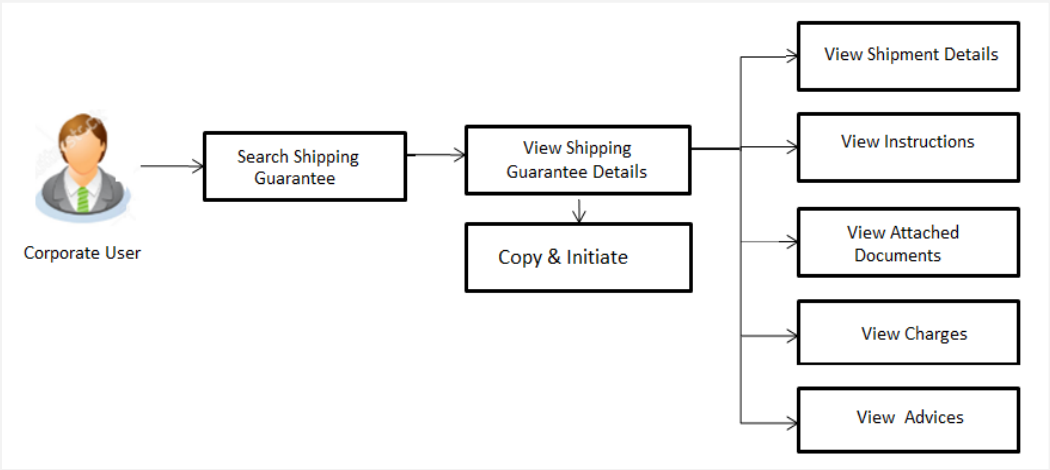

A guarantee from a lending institution ensures that the liabilities of a debtor will be met. In other words, if the applicant fails to fulfil a commitment, the lending institution will cover it. A Bank Guarantee enables user to show more credibility while doing business.

Guarantees can be initiated in the system using the Initiate Shipping Guarantee option. This option allows you to search for guarantees based on a certain search criterion. It allows you to view a list of guarantees for the selected customer. Details of an individual guarantee can be viewed and Exported in various formats.

Pre-Requisites

- User must have a valid corporate party Id and login credentials in place
- At least a single shipping guarantee should exist for the party ID and party must having view rights for it
