# Get Help

There are a number of ways to learn more about your product and interact with Oracle and other users.

## Get Help in the Applications

Some application pages have help icons ⑦ to give you access to contextual help. If you don't see any help icons on your page, click your user image or name in the global header and select Show Help Icons. If the page has contextual help, help icons will appear.

## Get Support

You can get support at *My Oracle Support*. For accessible support, visit *Oracle Accessibility Learning and Support*.

## Get Training

Increase your knowledge of Oracle Cloud by taking courses at *Oracle University*.

## Join Our Community

Use *Cloud Customer Connect* to get information from industry experts at Oracle and in the partner community. You can join forums to connect with other customers, post questions, suggest *ideas* for product enhancements, and watch events.

## Learn About Accessibility

For information about Oracle's commitment to accessibility, visit the *Oracle Accessibility Program*. Videos included in this guide are provided as a media alternative for text-based topics also available in this guide.

## Share Your Feedback

We welcome your feedback about Oracle Applications user assistance. If you need clarification, find an error, or just want to tell us what you found helpful, we'd like to hear from you.

You can email your feedback to *oracle_fusion_applications_help_ww_grp@oracle.com*.

Thanks for helping us improve our user assistance!

# 1 Questions and Answers

## How can I create saved searches for all users or specific users?

As an admin, you can create saved searches with the Page Composer tool opened in a sandbox. The context level of the sandbox makes your saved searches available to all or select users.

1. Create and activate a sandbox that has the Page Composer tool in it.
   - The default context level for the tool is **Site**, which applies to all users.
   - To apply to specific users, click the **Edit** icon and select a level other than **Site**.

   See *Create and Activate Sandboxes*.
2. Open the page where you want to create saved searches. For example, from the **Navigator**, select **Tools**, and then select **Transaction Console**.
3. Click your user image or name in the global header and select **Edit Page** from the **Settings and Actions** menu.
4. Set the filters you want for the saved search (in this example, on the Transaction Manager: Transactions page).
5. Click **Save** and optionally set this saved search as **Default** for all affected users.
6. Publish the Sandbox. See *Publish Sandboxes*.
