
PeopleSoft HCM 9.2: PeopleSoft Human Resources Plan Careers and Successions

January 2026

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://docs.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <https://docs.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <https://docs.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Preface

Understanding the PeopleSoft Online Help and PeopleBooks

The PeopleSoft Online Help is a website that enables you to view all help content for PeopleSoft applications and PeopleTools. The help provides standard navigation and full-text searching, as well as context-sensitive online help for PeopleSoft users.

Hosted PeopleSoft Online Help

You can access the hosted PeopleSoft Online Help on the [Oracle Help Center](#). The hosted PeopleSoft Online Help is updated on a regular schedule, ensuring that you have access to the most current documentation. This reduces the need to view separate documentation posts for application maintenance on My Oracle Support. The hosted PeopleSoft Online Help is available in English only.

To configure the context-sensitive help for your PeopleSoft applications to use the Oracle Help Center, see [Configuring Context-Sensitive Help Using the Hosted Online Help Website](#).

Locally Installed PeopleSoft Online Help

If you're setting up an on-premises PeopleSoft environment, and your organization has firewall restrictions that prevent you from using the hosted PeopleSoft Online Help, you can install the online help locally. Installable PeopleSoft Online Help is made available with selected PeopleSoft Update Images and with PeopleTools releases for on-premises installations, through the [Oracle Software Delivery Cloud](#).

Your installation documentation includes a chapter with instructions for how to install the online help for your business environment, and the documentation zip file may contain a README.txt file with additional installation instructions. See *PeopleSoft 9.2 Application Installation* for your database platform, "Installing PeopleSoft Online Help."

To configure the context-sensitive help for your PeopleSoft applications to use a locally installed online help website, see [Configuring Context-Sensitive Help Using a Locally Installed Online Help Website](#).

Downloadable PeopleBook PDF Files

You can access downloadable PDF versions of the help content in the traditional PeopleBook format on the [Oracle Help Center](#). The content in the PeopleBook PDFs is the same as the content in the PeopleSoft Online Help, but it has a different structure and it does not include the interactive navigation features that are available in the online help.

Common Help Documentation

Common help documentation contains information that applies to multiple applications. The two main types of common help are:

- Application Fundamentals

- Using PeopleSoft Applications

Most product families provide a set of application fundamentals help topics that discuss essential information about the setup and design of your system. This information applies to many or all applications in the PeopleSoft product family. Whether you are implementing a single application, some combination of applications within the product family, or the entire product family, you should be familiar with the contents of the appropriate application fundamentals help. They provide the starting points for fundamental implementation tasks.

In addition, the *PeopleTools: Applications User's Guide* introduces you to the various elements of the PeopleSoft Pure Internet Architecture. It also explains how to use the navigational hierarchy, components, and pages to perform basic functions as you navigate through the system. While your application or implementation may differ, the topics in this user's guide provide general information about using PeopleSoft applications.

Field and Control Definitions

PeopleSoft documentation includes definitions for most fields and controls that appear on application pages. These definitions describe how to use a field or control, where populated values come from, the effects of selecting certain values, and so on. If a field or control is not defined, then it either requires no additional explanation or is documented in a common elements section earlier in the documentation. For example, the Date field rarely requires additional explanation and may not be defined in the documentation for some pages.

Typographical Conventions

The following table describes the typographical conventions that are used in the online help.

| <i>Typographical Convention</i> | <i>Description</i> |
|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Key+Key | Indicates a key combination action. For example, a plus sign (+) between keys means that you must hold down the first key while you press the second key. For Alt+W , hold down the Alt key while you press the W key. |
| . . . (ellipses) | Indicate that the preceding item or series can be repeated any number of times in PeopleCode syntax. |
| { } (curly braces) | Indicate a choice between two options in PeopleCode syntax. Options are separated by a pipe (). |
| [] (square brackets) | Indicate optional items in PeopleCode syntax. |
| & (ampersand) | When placed before a parameter in PeopleCode syntax, an ampersand indicates that the parameter is an already instantiated object. Ampersands also precede all PeopleCode variables. |

| <i>Typographical Convention</i> | <i>Description</i> |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ⇒ | This continuation character has been inserted at the end of a line of code that has been wrapped at the page margin. The code should be viewed or entered as a single, continuous line of code without the continuation character. |

ISO Country and Currency Codes

PeopleSoft Online Help topics use International Organization for Standardization (ISO) country and currency codes to identify country-specific information and monetary amounts.

ISO country codes may appear as country identifiers, and ISO currency codes may appear as currency identifiers in your PeopleSoft documentation. Reference to an ISO country code in your documentation does not imply that your application includes every ISO country code. The following example is a country-specific heading: "(FRA) Hiring an Employee."

The PeopleSoft Currency Code table (CURRENCY_CD_TBL) contains sample currency code data. The Currency Code table is based on ISO Standard 4217, "Codes for the representation of currencies," and also relies on ISO country codes in the Country table (COUNTRY_TBL). The navigation to the pages where you maintain currency code and country information depends on which PeopleSoft applications you are using. To access the pages for maintaining the Currency Code and Country tables, consult the online help for your applications for more information.

Region and Industry Identifiers

Information that applies only to a specific region or industry is preceded by a standard identifier in parentheses. This identifier typically appears at the beginning of a section heading, but it may also appear at the beginning of a note or other text.

Example of a region-specific heading: "(Latin America) Setting Up Depreciation"

Region Identifiers

Regions are identified by the region name. The following region identifiers may appear in the PeopleSoft Online Help:

- Asia Pacific
- Europe
- Latin America
- North America

Industry Identifiers

Industries are identified by the industry name or by an abbreviation for that industry. The following industry identifiers may appear in the PeopleSoft Online Help:

- USF (U.S. Federal)

- E&G (Education and Government)

Translations and Embedded Help

PeopleSoft 9.2 software applications include translated embedded help. With the 9.2 release, PeopleSoft aligns with the other Oracle applications by focusing our translation efforts on embedded help. We are not planning to translate our traditional online help and PeopleBooks documentation. Instead we offer very direct translated help at crucial spots within our application through our embedded help widgets. Additionally, we have a one-to-one mapping of application and help translations, meaning that the software and embedded help translation footprint is identical—something we were never able to accomplish in the past.

Using and Managing the PeopleSoft Online Help

Select About This Help in the left navigation panel on any page in the PeopleSoft Online Help to see information on the following topics:

- Using the PeopleSoft Online Help.
- Managing hosted Online Help.
- Managing locally installed PeopleSoft Online Help.

Chapter 1

Getting Started with Plan Careers and Successions

Plan Careers and Successions Overview

Plan Careers and Successions are two separate, but integrated, business processes in HR. The Career Planning business process enables you to create default career paths and to design individual career plans for workers in an organization. The Succession Planning business process enables you to build graphical succession trees by using PeopleSoft Tree Manager and to create successions plans that identify key positions and target key candidates.

This diagram illustrates the Plan Careers and Plan Successions business processes in HR:

Note: The Plan Careers and the Plan Successions business processes can be implemented separately.

Plan Careers and Plan Successions Business Processes

Plan Careers and Successions provides these business processes:

- Manage career plans.
- Manage succession plans.

This documentation covers these business processes in the business process topics in PeopleSoft Human Resources Plan Careers and Successions.

Plan Careers and Successions Integrations

Plan Careers and Successions integrates with these PeopleSoft applications:

- HCM applications.
- Other PeopleSoft applications.

- Third-party applications.

This documentation discusses integration considerations in the implementation topics in this PeopleSoft Human Resources Plan Careers and Successions.

Supplemental information about third-party application integrations is located on the My Oracle Support website.

Plan Careers and Successions Implementation

PeopleSoft Setup Manager enables you to generate a list of setup tasks for your organization based on the features that you are implementing. The setup tasks include the components that you must set up, listed in the order in which you must enter data into the component tables, and links to the corresponding documentation.

Other Sources of Information

In the planning phase of your implementation, take advantage of all PeopleSoft sources of information, including the installation documentation, table-loading sequences, data models, and business process maps.

Refer to the *PeopleSoft HCM 9.2 - Reorganization of Component Interface Permissions* (Doc ID [2342162.1](#)) article on My Oracle Support for a list of system-delivered CIs and their usage, the mapping of CIs and associated permission lists, and the mapping of CI permission lists and user roles.

See the product documentation for *PeopleTools: Setup Manager*.

Chapter 2

Planning Careers

Understanding Plan Careers

This topic discusses:

- Plan careers
- (USF) Plan careers

Plan Careers

Retaining and motivating employees are important aspects of an organization's success. Use the Plan Careers business process in HR to ensure the organization uses employee talents to their fullest. Career planning enables you to assess and rank workers, record job preferences, create career paths, develop long-term goals, assign mentors, identify competencies, devise training plans, and create development plans.

To implement the Plan Careers business process:

1. Perform the prerequisite tasks.
2. Create the career paths.
3. Create the career plans.

Once everything is set up, review employee data and run the career reports on a regular basis to manage organizational growth and to adjust career paths and career plans as requirements change over time.

Integrations

The Plan Careers business process integrates with:

- The Manage Profiles business process in HR.
See “Understanding Profile Management” (PeopleSoft Human Resources Manage Profiles).
- The ePerformance business process.
See “ePerformance Integrations” (PeopleSoft ePerformance)
- The Administer Training business process in HR.
See Setting Up Training Programs.

(USF) Plan Careers

The Plan Careers business process for U.S. Federal Government users enables you to set up career plans and produce Individual Development Plans (IDPs) for employees' career development paths. You can track IDP progress, job move costs, training, employee appraisals, mentoring, and self-implemented career development activities. An employee or supervisor can request to work on a career plan at any time.

Once you create a career plan, the system:

1. Routes the plan along the agency's path of review and approval.
2. Tracks costs and activities associated with the plan.
3. Generates the IDP output form.

Use career plans to complement performance reviews and training programs or to prepare employees to become key managers. Career plans help you develop backup personnel for open positions.

Note: Using the Plan Careers business process is optional, and is intended to work with merit staffing practices as established by law, regulation, or internal policy.

Career Plan Tracking

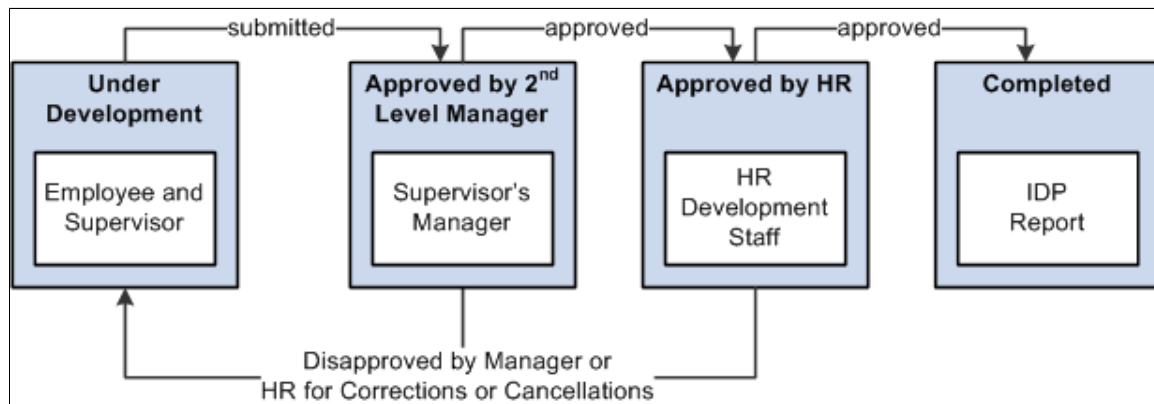

The Plan Careers business process includes a sequence of steps that enable you to track the request, approval, and completion of career plans. For example, a path might include:

- Creating a career plan.
- Submitting it as a request.
- Giving reviews and approvals.
- Completing an authorized career plan.
- Producing an IDP.

PeopleSoft workflow manages routing and tracking. You assign a status, and workflow tracks and routes the career plan through the approval cycle. Reviewers change the status to either continue the review process or disapprove the plan. The system then shows the career plan status on the Career Plan page.

Career Plan Approval Process

This graphic presents an overview of the career plan approval process:

The following definitions describe the process of submitting and reviewing career plans. You can use these or adapt them to meet specific requirements.

| Status | Career Plan Status Code | Definition |
|-------------------------|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Under Development | 1 | Employee and supervisor create a career plan, assign this status, and work on the plan until submitting it to the second-level supervisor or manager. |
| Submitted to Supervisor | 2 | Supervisor assigns this status to send the career plan to the second-level supervisor or manager. |
| Approved by Manager | 3 | Manager or second-level supervisor assigns this status to send the plan to the human resources department. |
| Disapproved by Manager | 4 | Manager or second-level supervisor assigns this status to send career plan back to originators for cancellation. |
| Approved by HR | 5 | Human resources official approves request by assigning this status. |
| Disapproved by HR | 6 | Human resources official disapproves request by assigning this status. |

Prerequisites

Perform the following tasks before setting up the Plan Careers business process in HR:

1. Set up HCM basic data, such as department codes, business units and geographic locations.
2. Set up HR job data for employees.
3. (optional) Set up job and employee profiles.
4. (optional) Set up training programs for employees.

Related Links

“Setting Up Implementation Defaults” (Application Fundamentals)

“Defining Job Subfunction and Job Function Codes” (Application Fundamentals)

“Tracking Workforce Contracts” (PeopleSoft Human Resources Administer Workforce)

Setting Up HR Job Data

Employee job data must exist in the Workforce Administration tables before you work with the Plan Careers pages. If you've implemented multiple business units and setIDs, the information that you use and create is determined by how business unit and setID functionality is set up for your user ID. You must define the job codes that you use in default career paths to populate identifying information from the Job Code table into the Career Path table.

To enable you to easily view employee's prior work experience, the Succession Planning-Prior Work page is accessible from the Plan Careers business process.

See “Human Resources Administer Workforce Overview” (PeopleSoft Human Resources Administer Workforce).

See “Human Resources Administer Workforce Implementation” (PeopleSoft Human Resources Administer Workforce).

Setting Up Profiles

Use the Manage Profiles business process to create profiles for your organization's jobs and employees. A significant part of planning careers is identifying worker strengths and developmental areas and establishing goals to help workers improve in their developmental areas. You can copy competencies from employees' profiles to their career plans or from the career plan to their profiles.

Use the Manage Profiles business process to specify a person's current location, location preferences, geographic preferences, international preferences, and travel

Profiles are discussed in *PeopleSoft Manage Profiles*.

See “Manage Profiles Overview” (PeopleSoft Human Resources Manage Profiles).

See [Career Strength/Develop Areas Page](#).

Setting Up Training Programs

Use the Administer Training business process to help workers develop the skills they need for their current position, to acquire the knowledge they need for their next position, and to develop alternate career paths. Training programs are discussed in *PeopleSoft HR Administer Training*.

See “Setting Up Courses” (PeopleSoft Human Resources Administer Training and Tuition Reimbursement).

You can link one or more training programs to a job code to establish default training programs for employees who have this job code. Courses can also be defaulted into employee career plans, enabling you to tailor training to the individual needs of each worker.

See [Career Training Plan Page](#).

Creating Career Paths

To create career paths, use the Integration Installations (GEOG_PREF_TBL) and Career Path Table (CAREER_PATH_TBL) components.

This topic provides an overview of career paths and discusses how to define career paths for job codes.

Understanding Career Paths

Set up default career paths for key job codes or for all job codes. Default career paths enable you to Create a hierarchy or network of jobs.

For example, you might want to coordinate career paths only for job codes above a certain management level, to make sure that employees in them get the necessary work experience to prepare for higher-level management positions.

Career Move Levels

Career move levels usually show a hierarchical job progression in a career path and build on the job code in the previous career-move level.

Let's look at an example of a default career path for Job Code, PD007, Personnel Clerk. The first move from the current job is to Personnel Assistant, which leads to Personnel Staffing Specialist as a second level move from the current job. As a third level move, the job leads to Personnel Officer, and so on. You can define up to nine career moves on a career path.

This table lists three career moves:

| Career-Move Level | Job Code | Position | |
|--------------------------|-----------------------------|-----------------|-----------------------------------|
| | Current job | PD007 | Personnel Clerk GS-0203 |
| 1 | First move from current job | PD010 | Personnel Assistant GS-0203-06 |

| Career-Move Level | Job Code | Position | |
|--------------------------|------------------------------|-----------------|---------------------------------------------|
| 2 | Second move from current job | PD101 | Personnel Staffing Specialist GS-0212-09 |
| 3 | Third move from current job | PD107 | Personnel Officer GS-0201-13 |

Some job codes have more than one possible job move in a particular career-move level. For example, Job Code PD007, Personnel Clerk, could have two job options as the first move from the current job: Job Code PD010, Personnel Assistant; and an additional option (not shown in the table) could be Job Code PD009, Personnel Staffing Assistant.

This diagram illustrates that a job code can have more than one job move:

If you have more than one job option in a career-move level, use option numbers to sort the job codes in the proper order.

Pages Used to Create Career Paths

| Page Name | Definition Name | Usage |
|-------------------------------|------------------------|---------------------------------------------------------------------------|
| Geographic Preference Page | GEOG_PREF_TBL | Define geographic areas for job relocation in career planning components. |
| <u>Career Path Table Page</u> | CAREER_PATH_TBL | Define default career paths for job codes. |

Career Path Table Page

Use the Career Path Table page (CAREER_PATH_TBL) to define default career paths for job codes.

Navigation:

Set Up HCM > Product Related > Workforce Development > Career Planning > Career Path Table > Career Path Table

This example illustrates the fields and controls on the Career Path Table page. You can find definitions for the fields and controls later on this page.

The screenshot shows the 'Career Path Table' interface. At the top, it displays 'Business Unit US004', 'Job Code 310015', and 'Consultant-Senior'. Below this is a 'Description Management' section. The 'Default Salary Details' section shows 'Set ID SHARE', 'Sal Plan KU01', 'Grade 006', and 'Manager Level Non-Mgr'. The 'Career Move' section has a dropdown for '*Career Move' set to '1st Move' and a '1st Move' field. Below this is the 'Job Options for Career Move' table with columns: Previous Move Option, Opt Nbr, Business Unit, Job Code, Job Title, Mgr Level, Job Function, Set ID, Plan, and Grade. The table contains one row with values: 1, 1, GBIBU, KU078, and navigation links like Find, View All, First, 1 of 3, Last.

Default Salary Details

The setID, salary plan, grade, and manager level that are associated with the selected job code appear in the **Default Salary Details** group box. These fields are for information only.

Career Move

| Field or Control | Description |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Career Move | Select a career move level. <i>1st Move</i> defines the first move from the selected job code, and <i>9th Move</i> is the last move. You can include multiple job codes for any career move to reflect moves at the same management level and moves up the management hierarchy. |
| Previous Move Option | Identifies the previous move option number for the current movement, only when the previous movement has more than one option. |
| Opt Nbr (option number) | Enter a number if there is more than one job code option for the selected career-move level. Use the option number to sort the job codes. |
| Job Code | Select the job code for the career move level. |

When you exit the **Job Code** field, the system completes the job details [**Job Title**, **Mgr Level** (manager level), and **Function** fields] and salary details (**SetID**, **Plan**, and **Grade** fields). The system makes these fields unavailable.

Creating Career Plans

To create career plans, use the Create Career Plan (CAREER_PLAN) component.

This topic provides an overview of career plans and discusses how to enter employee job, location, and availability preferences and career plans related tasks.

Pages Used to Create Career Plans

| Page Name | Definition Name | Usage |
|--------------------------------------------------------------------------|------------------------|-----------------------------------------------------------------------------------------------------------------|
| <u>Career Plan Page</u> | CAREER_PLAN1 | Enter employee preferences for jobs and geographic locations; indicate availability to move into new positions. |
| <u>Career Path Page</u> | CAREER_PLAN2 | Define an employee's career path; modify a default career path; configure a job progression. |
| Current Career Position Descr (current career position description) Page | CAREER_POSN_SEC | View a description of the position selected on the Create Career Plan - Career Path page. |
| Current Career Job Descr (current career job description) Page | CAREER_JOB_CD_SEC | View a description of the job code selected on the Create Career Plan - Career Path page. |
| (USF) Print Individual Development Plan (IDP) Actions Page | GVT_CAR_PIDP_SEC | Submit the career plan for approval; print the completed plan. |
| (USF) Federal Potential Future Positions Page | GVT_CAR_PLN2_SEC | Add further information about the career path specified on the Career Plan - Career Path page. |
| <u>Career Ranking and Potential Page</u> | CAREER_PLAN3 | Show how employees compare to their peers and indicate their potential. |

Understanding Career Plans

Use the Create Career Plan component to enter information about an employee's current position, abilities, strengths, and career desires for the future. You can use this information to help plan employee careers and maintain an available pool of candidates for key positions.

Create a new career plan whenever an employee changes jobs to ensure that the career plan is based on current job information. Use the old career plans for reference to see how elements like training, goals, and ratings change over time.

Recording Input From Multiple Sources

If you gather feedback on an employee from many people or groups and each evaluator has different recommendations, don't create a new career plan every time someone contributes information. Instead, identify the contributor by specifying an input evaluation type. After weighing the evaluations, assign a composite rating for inclusion in an approved career plan.

Career Plan Page

Use the Career Plan page (CAREER_PLAN1) to enter employee preferences for jobs and geographic locations; indicate availability to move into new positions.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan > Career Plan

This example illustrates the fields and controls on the Career Plan page. You can find definitions for the fields and controls later on this page.

The screenshot shows the 'Career Plan' page for Antonio Santos (Person ID KU0010). The page has a navigation bar with tabs: Career Plan, Career Path, Career Ranking and Potential, Career Goals, Career Mentoring, Career Strength/Develop Areas, and Career Training Plan. The 'Career Plan' tab is active.

Fields and controls include:

- Effective Date:** 03/23/2012 (calendar icon)
- Career Plan Review Date:** (calendar icon)
- Date Available:** (calendar icon)
- Projected Retirement Date:** 08/09/2037 (calendar icon)
- Date of Replacement:** (calendar icon)
- Time Remaining in Role:** (dropdown menu)
- Impact of Loss:** Low (dropdown menu)
- Risk of Leaving:** Medium (dropdown menu)
- Mobility Preferences:**
 - Employee Willing To:**
 - ☐ Willing to Travel
 - ☐ Willing to Relocate
 - ☐ Take International Assignment
 - Obstacle to Mobility:**
 - Obstacle: (text field)
 - Desired Work Sites:**
 - First Choice:**
 - Business Unit: (text field)
 - Location: (text field)
 - Second Choice:**
 - Business Unit: (text field)
 - Location: (text field)
 - Geographic Preferences:**
 - Preference 1: (text field)
 - Preference 2: (text field)
 - Preference 3: (text field)
 - International Preferences:**
 - Country 1: (text field)
 - Country 2: (text field)
 - Country 3: (text field)

| Field or Control | Description |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Projected Retirement Date | This field automatically populates with the date on which the employee turns 65. If that is not the employee's actual retirement date, enter the correct date. |
| Date of Replacement | Enter the scheduled date of arrival for the person replacing the current employee. |
| Time Remaining in Role and [time period] | Enter the amount of time remaining in the employee's current position, and select the unit of measure, months or years. |
| Impact of Loss | Select the impact to the organization if this employee leaves their current position. Values are: <i>High</i> , <i>Medium</i> , and <i>Low</i> . |
| Risk of Leaving | Select the overall risk of this employee leaving his or her current position. Values are: <i>High</i> , <i>Medium</i> , and <i>Low</i> . |
| Generate IDP | <p>This button appears for U.S. Federal users only.</p> <p>Click to display the Print Individual Development Plan (IDP) Actions page, where you submit the career plan for approval and print the completed plan.</p> |

The fields in the **Mobility Preferences** region of the Career Plan page display the preferences indicated on the Person Profile page for the specified Person ID.

Career Path Page

Use the Career Path page (CAREER_PLAN2) to define an employee's career path; modify a default career path; configure a job progression.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan > Career Path

This example illustrates the fields and controls on the Career Path page. You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Career Path | <p>Click to create a career path based on the default career path for the employee's job code. If a career path is defined for that job code, the system completes most of the information in the Potential Future Positions scroll area. If the employee's path differs from the default path, modify the fields as required.</p> <p>Once you save the plan, the Career Path button is unavailable. However, each time you create a new career plan for an employee, the system makes the button available, and you can use the default path for the new plan. See Setting Up Default Career Paths for information about creating default career paths.</p> <hr/> <p>Note: The system uses the date (career plan date) to determine the employee's job code. If the employee has changed jobs since the career plan date, the default career path is based on the previous job code. To ensure that the career plan is based on an employee's current job, create a new career plan whenever an employee changes job, and set the effective date to match the effective date on the Job Data page.</p> <hr/> |

Evaluation Type

Within each career plan, there can be multiple evaluation types. Several people, such as the employee's supervisor or mentor, might have ideas about the next job to which an employee should move. Because their input affects the same time frame, create new evaluation type records, not a new career plan.

| Field or Control | Description |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Evaluation Type | <p>Select an evaluation type to indicate who is evaluating the information on the employee. This is populated with <i>Approved/Official</i> if you clicked the Career Plan button.</p> <p>To use the evaluation in plan successions, you must select <i>Approved/Official</i>.</p> |

Potential Future Moves

| Field or Control | Description |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Previous Move Option | <p>Enter the previous move option number for the current movement, when the previous movement has more than one option. This field is not visible for the first move of any career path, or for any movement for which the previous move has only one option.</p> |

| Field or Control | Description |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Career Move | <p>Select the career move to define.</p> <p><i>1st Move</i> is the first step in the career path. It defines the job that the employee will move to from the current job and when the employee will be ready for that job. You can define up to nine moves. <i>9th Move</i> is the final step in the employee's career path. It defines the ninth job move from the current job.</p> |
| Option Number | <p>If you decide to include more than one job code in a career-move level, insert an option number to sort the job codes in the preferred order.</p> |
| Position | <p>If you're driving part or all of HR by position, select a position number from the available options.</p> <p>When you move out of this field, the system completes the Business Unit, Department and Job Code fields. It also displays the job title, salary plan, grade, manager level, and function associated with this position.</p> <p>If you use partial position management and decide not to use a position in this career move, delete the position number.</p> |
| Readiness | <p>Select an estimate of the employee's readiness for such a move from these options:</p> <p><i>1–2 Yrs:</i> (1–2 years) The employee will be ready for the move within the next two years.</p> <p><i>3–5 Yrs:</i> (3–5 years) The employee will be ready for the move in three to five years.</p> <p><i>Emergency:</i> The employee is overdue for a job move and needs to move as soon as possible.</p> <p><i>Ready Now:</i> The employee is ready for the move now.</p> <p><i>Retirement:</i> The employee will not move to another position after this; for example, those who are nearing retirement age.</p> <p>The system uses this information in Plan Successions to show blockages (succession candidates who are blocked from advancement).</p> |
| Federal Data | <p>This link only appears if you are a U.S. Federal user.</p> <p>Click to display the Federal Potential Positions page, where you enter further information about the potential career move.</p> |

| Field or Control | Description |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Department | If you know it, select a department for the job. This field is optional. You create departments in the Department table. The setID determines the departments that you see. |
| Job Code | Select the job code for the career move from the available options. When you select a job code and move out of the field, the system displays the associated job title, salary plan, grade, manager level, and function. You use the Job Code table to create job codes. |
| Update Development Plan | <p>Click to have the system compare the employee's current person profile against the job code or position profile associated with the focus movement. The system identifies competency deltas and other profile topics for insertion on the Career Development Plan page as follows:</p> <ul style="list-style-type: none"> • Competencies and other rated items with a lower rate than required by the job profile are inserted. • Required job profile items for which there is no rating in the employee profile are inserted. • Person profile items that have multiple ratings where any of those ratings are lower than required in the job profile are inserted. <p>After the identified competencies and other items are inserted into the career development plan, the system opens the Career Development Plan page. This enables the user to update any related information, such as the estimated completion date, and so on.</p> |

Update Development Plan Page

Use Update Development Plan page (HR_CP_DEVELOP) to compare the employee's current person profile against the job code or position profile associated with the focus movement.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan

After selecting the career plan, select **Update Development Plan** button on the screen, the Update Development Plan page appears.

This screenshot represents the fields and controls of Update Development Plan page.

| Rating | Delivered ratings include <i>Currently Well Placed</i> , <i>High Potential Candidate</i> , <i>Lateral Transfer</i> , <i>Officer Potential</i> , and <i>Promotable</i> . |

Career Goals Page

Use the Career Goals page (CAREER_PLAN4) to enter short and long-term goals for employees.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan > Career Goals

This example illustrates the fields and controls on the Career Goals page. You can find definitions for the fields and controls later on this page.

The screenshot displays the 'Career Goals' page for Antonio Santos (Person ID KU0010). The page has a navigation bar with tabs: Career Plan, Career Path, Career Ranking and Potential, Career Goals (active), Career Mentoring, and Career Strength/Develop Areas. Below the tabs, the user's name and ID are shown. The main section is titled 'Career Goals' and includes a 'Find | View All' link and pagination (First, 1 of 1, Last). The page contains several input fields: Effective Date (03/23/2012), Review Date, Business Unit (US006), Job Code (170005), Department (10000), and Supervisor LMI. There are two sections for career goals: 'Short-Term Career Goals' and 'Long-Term Career Goals'. Each section has a 'Personalize | Find | View All' link and pagination. The 'Short-Term Career Goals' section includes fields for 'Estimated Completion Date', 'Actual Completion Date', and 'Goals (Next 1 - 3 Years)'. The 'Long-Term Career Goals' section includes fields for 'Estimated Completion Date', 'Actual Completion Date', and 'Goals (Next 3 - 5 Years)'. Each goal field has a calendar icon and a '+' button.

| Field or Control | Description |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Import Short-Term Goals | This button is for U.S. Federal users only. Click this button to import goals from the employee's most recent appraisal. |
| Actual Completion Date | Enter the actual completion date when the employee achieves the goal. |
| Goals (Next 1 - 3 Years) | Enter short-term goals in this field. If you are tracking employee reviews in HR, use the short-term goals entered here as the basis for short-term goals and objectives in employee reviews. |
| Import Long-Term Goals | This button is for U.S. Federal users only. Click this button to import goals from the employee's most recent appraisal. |
| Goals (3 - 5 Years) | Enter long-term goals in this field. If you are tracking employee reviews in HR, use the long-term goals entered here as the basis for long-term goals and objectives in employee reviews. |

Career Mentoring Page

Use the Career Mentoring page (CAREER_PLAN5) to assign career mentors.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan > Career Mentoring

This example illustrates the fields and controls on the Career Mentoring page. You can find definitions for the fields and controls later on this page.

An employee can have multiple mentors of different types working towards different career goals.

| Field or Control | Description |
|-------------------------|------------------------------------------------------------------------|
| Name | Enter the name of the employee's mentor. |
| Mentor Type | Select the type of mentor from the list. |
| Estimated Date | Enter the expected date of completion for this mentoring activity. |
| Completion Date | When complete, enter the completion date. |
| Career Goal | Enter the career goal for the employee to achieve through this mentor. |

Federal Coaching/Mentor Information Page

Use the Federal Coaching/Mentor Information page (GVT_CAR_PLN5_SEC) to add further information about the career goal specified on the employee's Career Mentoring page.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan > Career Mentoring

Click the **Federal Data** button.

This example illustrates the fields and controls on the Federal Coaching/Mentor Information page. You can find definitions for the fields and controls later on this page.

The screenshot shows a window titled "Federal Career Plan Information" with a tab labeled "Federal Coaching/Mentoring Inf". Inside the window, there are several input fields and checkboxes:

- Date Need Identified**: A text box followed by a calendar icon showing the date 31.
- Self-Development**: A checkbox.
- Activity Required**: A checkbox.
- Reason**: A text box followed by a magnifying glass icon.
- Status**: A text box followed by a magnifying glass icon.
- Estimated Cost**: A text box.
- Actual Cost**: A text box.

At the bottom of the window are two buttons: "OK" and "Cancel".

| <i>Field or Control</i> | <i>Description</i> |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Date Need Identified | Enter the date that the goal was agreed to. |
| Self-Development | Select if this is part of the employee's self-development. This indicates that the employee is paying the costs for this activity. |
| Activity Required | Select if the activity is mandatory. |

Career Strength/Develop Areas Page

Use the Career Strength/Develop Areas page (CAREER_PLAN6) to record and evaluate an employee's career strengths and developmental areas.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan > Career Strength/Develop Areas

This example illustrates the fields and controls on the Career Strength/Develop Areas page. You can find definitions for the fields and controls later on this page.

Career Training Plan Page

Use the Career Training Plan page (CAREER_PLAN7) to enter or update a training program for the selected employee; use or modify the default training program for the employee job code.

Navigation:

Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Manage Career Plan > Career Training Plan

This example illustrates the fields and controls on the Career Training Plan page. You can find definitions for the fields and controls later on this page.

The screenshot displays the 'Career Training Plan' page for user Antonio Santos (Person ID KU0010). The page is organized into several sections. At the top, there's a navigation bar with tabs for 'Career Goals', 'Career Mentoring', 'Career Strength/Develop Areas', 'Career Training Plan' (which is the active tab), and 'Career Development Plan'. Below the navigation bar, the user's name 'Antonio Santos' and 'Person ID KU0010' are shown. The main content area is titled 'Career Training Plan' and includes a 'Find | View All' link and a 'First 1 of 1 Last' pagination control. The page contains several sections: 'Effective Date' (03/23/2012), 'Review Date', 'Business Unit' (US006), 'Job Code' (170005), 'Department' (10000), and 'Supervisor Lvl'. A 'Training Plan' button is visible. Below these, there is a 'Training Program' section with a 'Find | View All' link and a 'First 1 of 1 Last' pagination control. The 'Training Program' section contains fields for 'Sequence', 'Course', 'Course Title', 'Date Need Identified' (03/23/2012), 'Estimated Date', 'School', 'Reason', 'Required' (checkbox), 'Internal/External' (dropdown), 'Completion Date', and 'School Name'.

| <i>Field or Control</i> | <i>Description</i> |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Training Plan | <p>You create default training programs in the Training Program table and tie them to job codes in the Job Code table. If a training plan has been established for the job code displayed on this page, when you click the Training Plan button, the system populates the fields in the Training Plan scroll area with the information from the training program. If the employee's training plan differs from the default plan, modify the fields as required.</p> <p>After you save the plan, this button is unavailable. However, each time you create a new career plan for an employee, this button is available and you can choose to use the default for the new plan.</p> <hr/> <p>Note: The system uses the effective date (career plan date) to determine the employee's job code. If the employee has changed jobs since the career plan date, the default training plan is based on the previous job code. To ensure that the training plan is based on an employee's current job, create a new career plan whenever an employee changes job and set the effective date to match the effective date on the Job Data page.</p> <hr/> |

Training Program

| <i>Field or Control</i> | <i>Description</i> |
|--------------------------------|----------------------------------------------------------------------------------------------------------------|
| Training Program | Displays the training program name, if the employee's training plan is based on a predefined training program. |

Training Plan

| <i>Field or Control</i> | <i>Description</i> |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sequence | To set the course order, enter a sequence number. If this field is left cleared, courses appear in ascending chronological order by estimated completion date. To rearrange the courses on the list, enter sequence numbers for the courses in the order that they should appear. Save this information, close, and reopen the page. The courses will appear in the new order. |

| Field or Control | Description |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Completion Date | <p>If the training course has been scheduled in Administer Training, the system will display the end date of the course in this field when the status changes to <i>Completed</i>.</p> <p>If you are tracking a training course that is not handled in Administer Training, enter the actual completion date when the employee completes the course or training.</p> |
| Course | <p>Select a course code from the list of available options. When you exit this field, the system enters the course title, the internal and external value, the school code, and the school name for the course. The system makes the fields unavailable; you can't change this information.</p> <p>If you've entered a course code and decide that you don't want to use it after all, delete the selection. When you exit this field, the system makes the other fields available.</p> |
| Course Title | If you selected a course code, the system supplies the course title and makes this field unavailable. If the course is not in the course table, enter the course title. |
| Required | Select this check box if the course is mandatory. |
| Internal/External | <p>If you selected a course code, the system completes this field and makes it unavailable. If you left the Course field cleared, select one of these options:</p> <p><i>Internal:</i> If the course is held in-house.</p> <p><i>External:</i> If an external vendor administers the course.</p> |
| Date Need Identified | The system automatically populates this field with the career plan date, which you can change if necessary. |
| School | <p>If the course is <i>External</i>, select a school code, which you define in the school table. If the school isn't in the school table, leave this field cleared and complete the school Name field.</p> <p>When you select a course that is <i>Internal</i>, the system makes the School field unavailable.</p> |
| Name | If you selected a school code, the system enters the school name and makes this field unavailable. If the school isn't in the school table, enter the school name. |

(USF) Approving the Career Plan

Access the Career Plan, Career Path, Career Mentoring, and Career Training Plan pages.

Depending on how the approval process is set up, PeopleSoft workflow routes requested career plans to the appropriate person for approval. The reviewer can approve or change the request and send it to other reviewers and, ultimately, to a human resources person. To view the request, the reviewers open their worklist and the career plan appears. The reviewer then brings it up as a correction to approve or reject

it. All of the pages routed through workflow for approval contain a Status field to indicate approval or disapproval.

To begin the approval process:

1. Access the worklist and open the appropriate page (Career Plan, Career Path, etc.).
2. View the plans that are ready for approval.
3. Review them, then change the status to indicate the review decision.

To open the worklist:

1. Select View, Navigator Display, Worklist.
2. Open the career plan ready for approval.

To approve a career plan request:

1. Access the page by accessing the worklist.
2. At the bottom of the page, click either **Approve** or **Disapprove**.

To approve a career path request:

1. Open the worklist.

The system prompts for an employee ID.

2. Open the page and change the status to *Approved* or *Disapproved*.

To approve a career mentoring request:

1. Open the worklist.

The system prompts you for an employee ID.

2. Open the page and change the status to *Approved* or *Disapproved*.

To approve a career training plan request:

1. Open the worklist.

The system prompts for an employee ID.

2. Open the page and change the activity status to such as *Approved* or *Disapproved*.

Reviewing Employee Career Data

To review career-related employee data, use the Employment (EMPLOYEE_SUMMARY), Career Assignments (CAREER_SUMMARY), Immediate Family Summary (CAREER_DEPEND_SUMM), Compensation Summary (COMP_SUMMARY), and Training (TRN_STUDENT_CRIS_SU1) components.

This topic provides an overview of employee career data and discusses how to:

- View employee job paths.
- View summary information.

Understanding Employee Career Data

When you prepare employees for career advancements, look at the candidates' personal and job histories and review their career plans. All the information is on the Plan Careers menu. You can access prior work experience, education, career assignments, and several summary pages. The information on the summary pages is display-only.

Note: In the Plan Careers component, you can access career-related employee data only for employees who have career plans.

Pages Used to Review Employee Career Data

| <i>Page Name</i> | <i>Definition Name</i> | <i>Usage</i> |
|---------------------------------------|-------------------------------|-----------------------------------------------------------|
| <u>Reviewing Employee Career Data</u> | EMPLOYEE_SUMMARY1 | View employee current job, employment, and personal data. |
| <u>Career Assignments Page</u> | CAREER_SUMMARY | View employee job paths through an organization. |
| Immediate Family Page | IMMEDIATE_FAMILY | View employee dependent and beneficiary information. |
| Compensation Page | COMP_SUMMARY | View summary compensation information. |
| Training Page | TRN_STUDNT_CRS_SUM | View summary training information. |

Career Assignments Page

Use the Career Assignments page (CAREER_SUMMARY) to review employee job status and job history.

Navigation:

- **Organizational Development > Succession Planning > Review Career Summaries > Career Assignments**
- **Organizational Development > Succession Planning USF > Review Career Summary Info > Career Assignments**

This example illustrates the fields and controls on the Career Assignments page. You can find definitions for the fields and controls later on this page.

| Career Assignments | | | |
|-----------------------|-------------|--------------------------|-------------------------------------|
| Antonio Santos | | EMP | ID KU0010 |
| | | Empl Record 0 | |
| Company | GBI | GBI | First Hire Date 09/12/1997 |
| Current Location | US HQ | | Country USA |
| Annual Rate | \$18,512.00 | USD | State NY New York |
| Career Summary | | | Find View All First 1-2 of 2 Last |
| Effective Date | 07/01/1998 | | Position Number 19000018 |
| Business Unit | US006 | | Manager Level Non-Mgr |
| Department | 10000 | Human Resources | Job Function Code REL |
| Job Code | 170005 | Assistant-Administrative | Grade 004 |
| Supervisor Level | | | |
| Effective Date | 09/12/1997 | | Position Number 19000018 |
| Business Unit | US006 | | Manager Level Non-Mgr |
| Department | 10000 | Human Resources | Job Function Code REL |
| Job Code | 170005 | Assistant-Administrative | Grade 003 |
| Supervisor Level | | | |

The Career Assignments page shows a history of previous jobs that an employee has held in the company. It does not list every personnel action; it shows only job movements. Each position, job code, salary grade, department or business unit change appears.

Reviewing Career Progression

This topic provides an overview of the career progression chart and describes how to view the career progression chart.

Understanding the Career Progression Chart

The career progression chart page enables users to see a graphical representation of an employee's career path and perform a profile comparison between the employee and any role selected in the career path. The Career Progression Chart is available to employees and managers through their respective self service menus, as well as HR administrators through the Workforce Development menu.

An employee, manager or administrator can perform the following actions:

- Search for career paths.
- View a graphical representation of career paths.
- View role profile summaries for a position or job code.
- View a gap/fit analysis of an employee's competency for any job in his or her career path.
- View and compare competency list for a job code with that of any job in the same career path.

Complete the following prerequisites to perform the actions listed above:

- Define a career path on the Career Path page.

A personal career path or an Approved/Official path enables an employee to see a graphical representation of career paths.

- Define a person profile for the employee that includes a competency topic with ratings.

This enables employees and managers, through their respective self service options, to view profile summaries.

- The job has a defined non-person profile that includes a competency topic with required ratings.

Page Used to View the Career Progression Chart

| <i>Page Name</i> | <i>Definition Name</i> | <i>Usage</i> |
|--------------------------------------|-------------------------------|-------------------------------------------------------------------------------------------------------|
| <u>Career Progression Chart Page</u> | HR_CP_ADM_CHART | View career paths and non-person profile summaries in order to perform a competency gap/fit analysis. |

Career Progression Chart Page

Use the Career Progression Chart page (HR_CP_ADM_CHART) to view career paths and non-person profile summaries in order to perform a competency gap/fit analysis.

Navigation:

- **Workforce Development > Career Planning > Prepare Evaluation/Career Plan > Career Progression Chart**
- **Manager Self Service > Career Planning > Career Progression Chart**
- **Self Service > Career Planning > Career Progression Chart**
- Click the **Career Progression Chart** link on various career planning pages.

This example illustrates the fields and controls on the Career Progression Chart page. You can find definitions for the fields and controls later on this page.

| Compare Role to Role or Compare Myself to Role or Compare Employee to Role | <p>Click to initiate a Profile Manager-based competency gap/fit comparison process, using the job code that is the Focus of the chart, displayed in the Profile Summary region, as the source for basing the comparison. The system displays the comparison results in a Match Results window.</p> <p>When accessing the Career Progression Chart page from the Self-Service pages, the Compare Myself to Role button initiates a comparison process. When accessing the Career Progression Chart page from the Manager Self-Service pages, the Compare Employee to Role button initiates a comparison process. The Profile system initiates the Management Person to Role Match process for the current employee and the job associated with the focus node in the Career Path region.</p> <p>When an HR administrator accesses the Career Progression Chart page from the Prepare Evaluation/Career Plan pages, the Compare Role to Role button initiates a side-by-side competency comparison between the selected job code or position and any job code selected in the career path. The displayed competencies are taken from the non-person profile for each job code.</p> <hr/> <p>Note: If the selected employee or the selected job code do not have defined profiles, the system will not initiate the comparison process.</p> <hr/> |

Running Career Reports

This topic lists the pages used to run career reports and discusses how to create career details by population reports.

Pages Used to Run Career Reports

| <i>Page Name</i> | <i>Definition Name</i> | <i>Usage</i> |
|------------------------------------------|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| <u>Career Details by Population Page</u> | HR_SUCC_METRICS1 | Create reports that display various career planning employee metrics. |
| <u>Available Career Plans Page</u> | HR_SUCC_METRICS3 | View the status of career plans for employees. |
| Career Potential Page | HR_SUCC_METRICS3 | Identify employees based on their defined potential, when those employees will retire, and how long they have been in their current role. |

| Page Name | Definition Name | Usage |
|----------------------------------|------------------------|-----------------------------------------------------------------------------------|
| Key Job Code - Incumbents Page | HR_SUCC_METRICS3 | Identify key job codes and the career plan of any incumbents for those job codes. |
| Individual Career Training Page | RUNCTL_CAR002 | Run the Career Plan Training Path (CARTRAIN) report. |
| Individual Development Plan Page | RUN_FGHR022 | Run the Individual Development Plan (FGHR022) report. |

Career Details by Population Page

Use the Career Details by Population page (HR_SUCC_METRICS1) to create reports that display various career planning employee metrics.

You can create report pages that you can view online that display various career planning employee metrics. Using the Career Details by Population page, you can view the following information:

- Employees with or without a defined career plan.
- The career potential for employees, including the amount of time in their current role and their retirement date.
- Incumbents with or without career plans for key job codes.

Navigation:

Workforce Development > Career Planning > Reports > Employee Career Plan Matrix

This example illustrates the fields and controls on the Career Details by Population page. You can find definitions for the fields and controls later on this page.

Career Details by Population

Instructions

Generate reports for specific employee populations such as 'by key person' and 'by key job code incumbents' based on your selected criteria.

1. Select report parameters such as report name and date range.
2. Specify additional search criteria such as Business Unit and Company.
3. Review output and select further filtering options as needed.

Career Planning Report Parameters

Report Name
Time Frame
From Date
To Date

Additional Selection Criteria

Business Unit Global Business Institute BU
Company
Department
Location Code

| Field or Control | Description |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Report Name | Select the type of report to display. Values are: <i>Available Career Plans</i> , <i>Career Potential</i> , and <i>Key Job Codes - Incumbents</i> |
| Time Frame | Specify the time span that the report includes. Values are: <i>Full History</i> , <i>Last 1 Month</i> , <i>Last 12 Months</i> , <i>Last 3 Months</i> , <i>Last 6 Months</i> , <i>Specify Dates</i> . You must select <i>Specify Dates</i> in the Time Frame field in order to display From Date and To Date fields. |

Available Career Plans Page

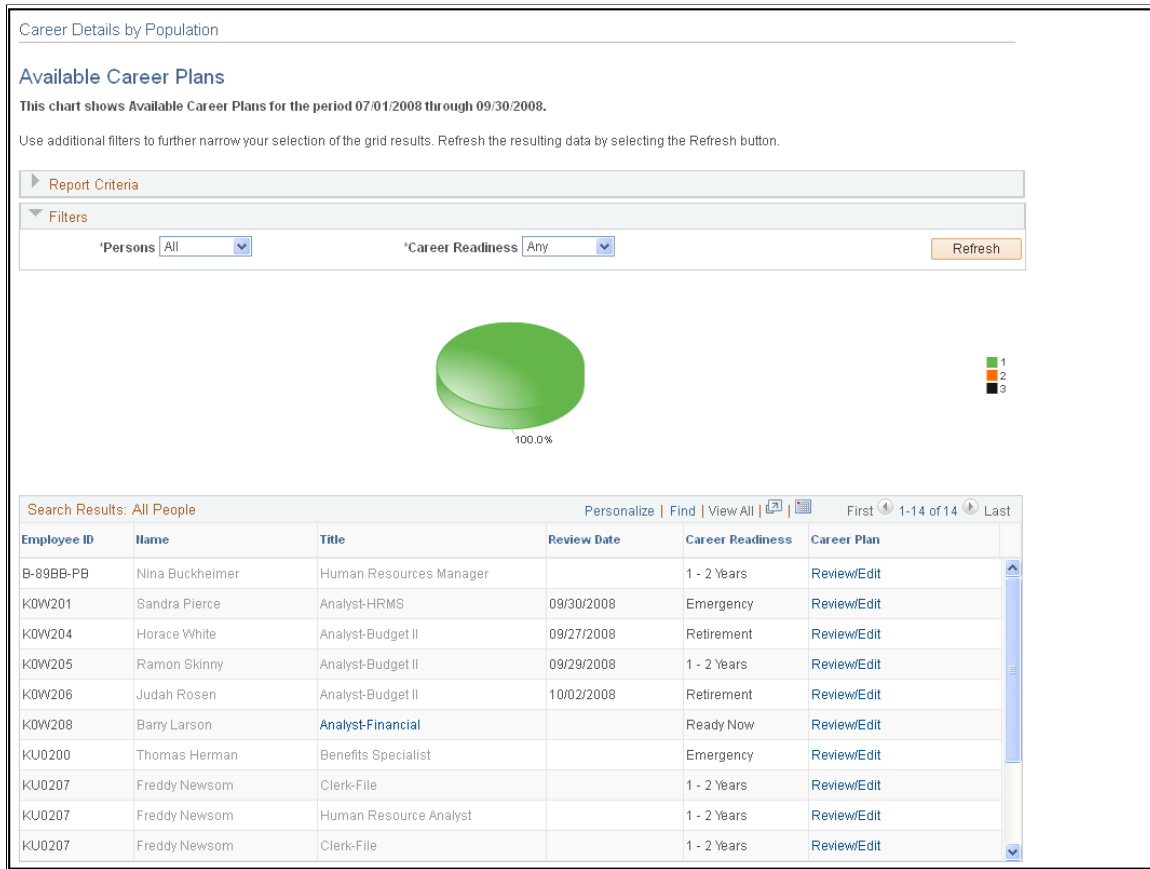

Use the Available Career Plans page (HR_SUCC_METRICS3) to view the status of career plans for employees.

This enables the organization to define activities and strategies based on the career plan readiness for employees.

Navigation:

Select *Available Career Plans* on the Career Details by Population page and click the **Run Report** button

This example illustrates the fields and controls on the Available Career Plans page. You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Review Date | Displays the last review date from the employee's current career plan. If the person does not have a career plan, this field is empty. |
| Career Readiness | <p>Displays the readiness value indicated for the employee's current career plan. If the person does not have a career plan, this field is empty.</p> <p>Note: The readiness value is from the first move, 1st option. It is possible to have multiple options, but for these metrics, the system uses the most probable move.</p> |
| Career Plan | <p>Click on a link in this column to view or create the career plan for a specific EmplID.</p> <p>The <i>View</i> option applies to people with existing career plans.</p> <p>The <i>Create</i> option applies to people without existing career plans.</p> |

Career Potential in Available Career Plans

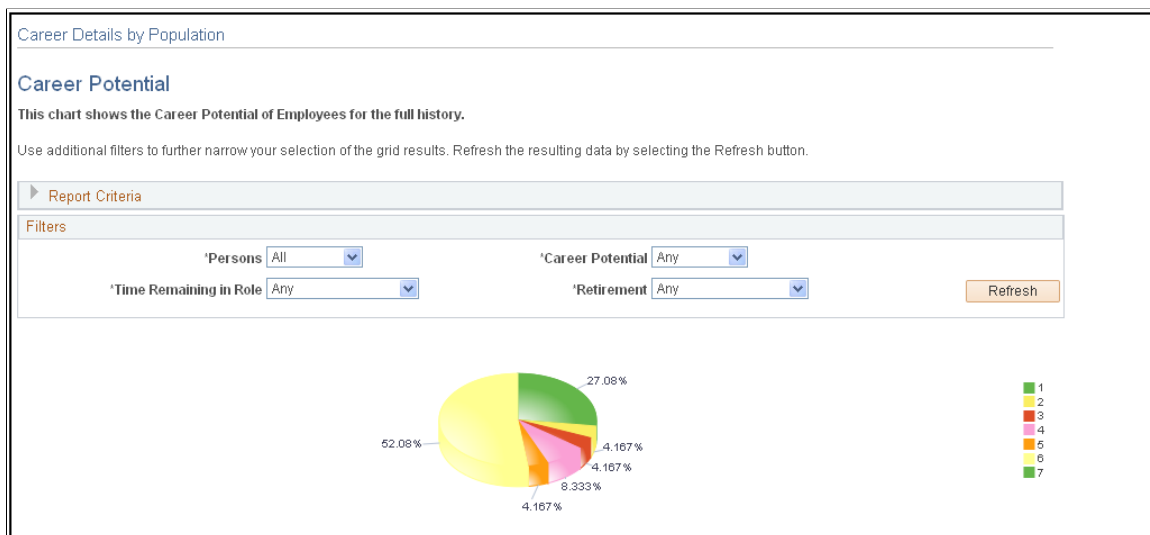

Use the Career Potential page to identify employees based on their defined potential, when those employees will retire, and how long they have been in their current role.

Use the Career Potential page to identify high potential employees, when those employees will retire, and how long they have been in their current role. This information can help you to identify the career potential within an employee group and define activities and strategies to retain high potential employees or improve employee proficiency

Navigation:

Select *Career Potential* on the Career Details by Population page and click the **Run Report** button

This example illustrates the fields and controls on the Career Potential page (1 of 2). You can find definitions for the fields and controls later on this page.

This example illustrates the fields and controls on the Career Potential page (2 of 2). You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Career Potential | Displays the career potential value from the person's current career plan. If the person does not have a career plan, this field is empty. |
| Time Remaining in Role | Displays the amount of time remaining in the employee's current role, or job, from the Career Plan page. |
| Retirement Date | Displays the retirement date from the person's current career plan. If the person does not have a career plan, this field is empty. |

Key Job Code - Incumbents in Available Career Plans

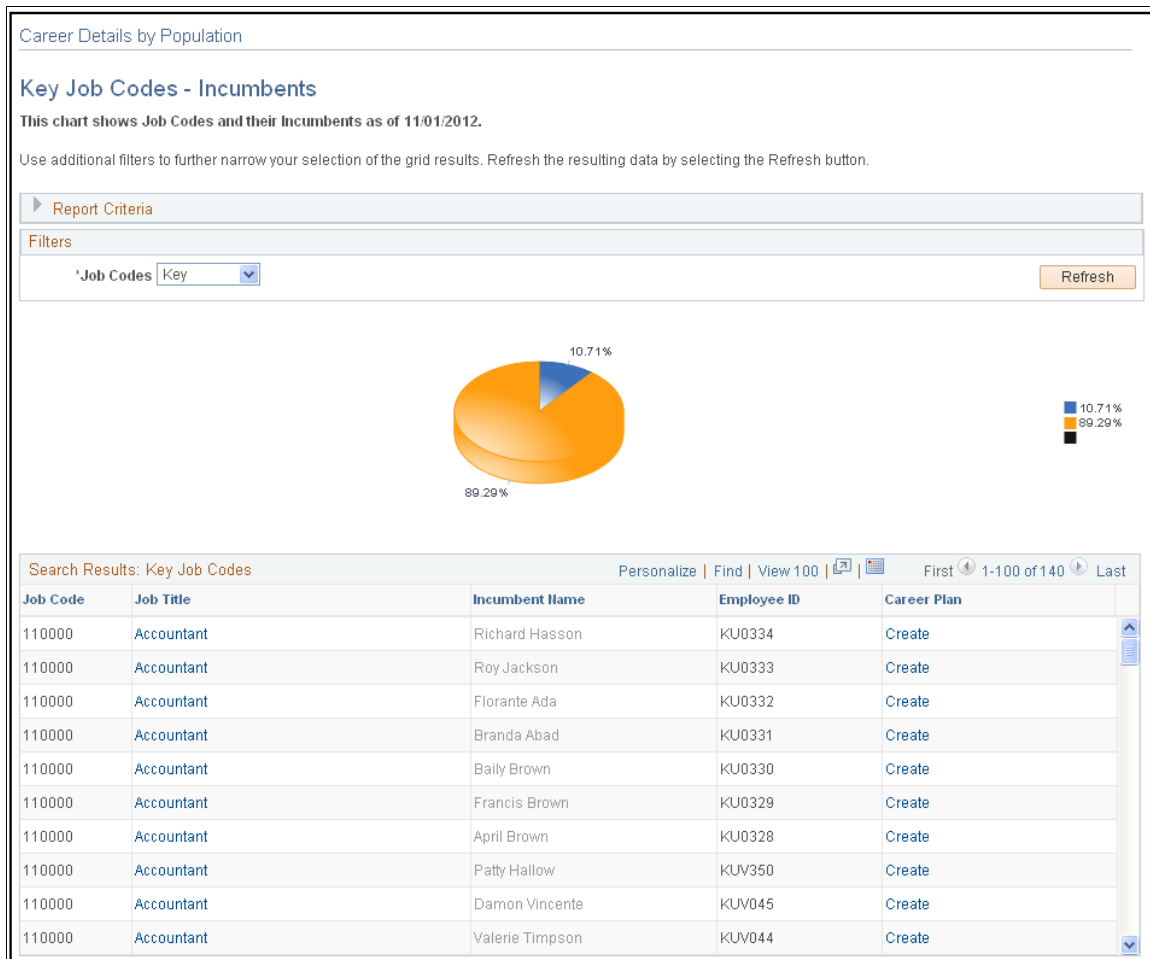

Use the Key Job Code - Incumbents page to identify key job codes and the career plan of any incumbents for those job codes.

Use the Key Job Code - Incumbents page to identify key job codes for your organization and the career plan of any incumbents for those job codes. This enables you to identify key job codes and then define and prioritize activities and strategies to update or create career plans for the incumbent employees for the job codes.

Navigation:

Select *Key Job Code - Incumbents* on the Career Details by Population page and click the **Run Report** button

This example illustrates the fields and controls on the Key Job Code - Incumbents page. You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|------------------|----------------------------------------------------------------|
| Job Title | Displays the job title from the Job Data table. |
| Incumbent Name | Displays the name of the person in the corresponding job code. |

(FRA) Rating Employees

Within the French Public Sector, ratings are used as criteria for determining job eligibility.

Rating employees is discussed in *PeopleSoft HR Manage French Public Sector*.

Related Links

“Understanding Employee Ratings” (PeopleSoft Human Resources Manage French Public Sector)

Managing Career Planning Self-Service

This topic provides an overview of career planning self service transactions, and discusses how to define employee self service profiles.

Understanding Career Planning Self Service

Using the Career Planning self service pages, employees can identify their current job profile, view the requirements of profiles in various paths, and compare their current skills, competencies, and qualifications with those in targeted profiles. Individuals can pull a profile into their development plan in order to quickly implement the creation of goals and actions based on gaps. Users can also target specific areas identified in the comparison and import those into their development plan. Individuals can gain insight into opportunities. For a particular job profile, employees can identify open positions and apply, nominate themselves, or send an email regarding the position.

If you have PeopleSoft Enterprise Learning Management installed, several of the Career Planning Self Service pages use a **Search for Learning** link to enable you to access the Request Training Enrollment page.

Self Service Pages Used to Manage Career Plans

| <i>Page Name</i> | <i>Definition Name</i> | <i>Usage</i> |
|------------------------------------------|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| My Profile Page | JPM_JP_PROFL2_EMP | Enables employees to view and update their own profile data. |
| <u>Career Path Page</u> | HR_CP_PATH | Define an employee's career path; modify a default career path; configure a job progression. |
| Career Goals Page | HR_CP_GOALS | Enter short and long-term goals for employees. |
| Career Mentoring Page | HR_CP_MENTOR | Assign career mentors. |
| Career Strength/Developmental Areas Page | HR_CP_DVLP_AREA | Record and evaluate an employee's career strengths and developmental areas. |
| Career Training Plan Page | HR_CP_TRAINING | Enter or update a training program for the selected employee; use or modify the default training program for the employee job code. |
| Career Development Plan Page | HR_CP_DEVELOP | Help employees improve in developmental areas before their next performance review or career planning topic. |

| Page Name | Definition Name | Usage |
|--------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <u>My Internal Resume Page</u> | HR_CP_RESUME | Enables employees to select specific items to be included in an internal resume and create a personal resume for internal use. |
| Career Progression Chart Page | HR_CP_PRO_CHART | View career paths and non-person profile summaries in order to perform a competency gap/fit analysis. |
| <u>Manage Career Plans Component</u> | HR_CP_MANAGER | Enables managers to perform career planning activities for their direct reports. |

Career Path Page

Use the Career Path page (HR_CP_PATH) to define an employee's own career path; modify a default career path; configure a job progression.

Navigation:

Self Service > Career Planning > Career Path

This example illustrates the fields and controls on the Career Path page. You can find definitions for the fields and controls later on this page.

The screenshot displays the 'Career Path' page for user Antonio Santos (Person ID KU0010). The page is divided into several sections:

- Navigation Bar:** Career Plan, Career Path (selected), Career Ranking and Potential, Career Goals, Career Mentoring, Career Strength/Develop Areas, Career Training Plan.
- Header:** Antonio Santos, Person ID KU0010.
- Career Path Section:** Includes 'Find | View All' and 'First 1 of 1 Last' navigation. Fields include Effective Date (03/23/2012), Review Date, Business Unit (US006), Department (10000), Location (US HQ), Salary Plan (KU01), Supervisor Level, Job Code (170005), and Position (19000018). A 'Career Path' button is present.
- Evaluation Type Section:** Includes 'Find | View All' and 'First 1 of 1 Last' navigation. A dropdown menu shows '*Evaluation Type' set to 'Approved/Official'.
- Potential Future Moves Section:** Includes 'Find | View All' and 'First 1 of 1 Last' navigation. Fields include Previous Move Option (1), Option Number (1), *Career Move (1st Move), and Target Date.
- Position Section:** Includes fields for Position, *Readiness (Ready Now), Manager Level (Non-Manager), Salary Plan (KC02), Business Unit (GBIBU), Department, and Job Code (820005). A 'Job Code Long Description' link and an 'Update Development Plan' button are also visible.

You can view and update your career path by selecting the desired positions or roles. When one or more roles are placed on your career path, you can see the required job skills, competencies, and experiences for each position or role, and the gap between your current profile and the profile requirements for the desired position.

You can define multiple career paths, operational or personal, and identify the single path that the organization uses in evaluating your potential and creating a performance and development plan based on this path.

| Field or Control | Description |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Update Development Plan | <p>Click to insert developmental areas into the your Career Development Plan based on the selected movement rows. The system inserts deltas for competencies and other profile topics as follows:</p> <ul style="list-style-type: none"> Employee competencies and other rated items with a lower rate than required by the job profile. Required items on the job profile that are not in the employee's profile. Items in the person profile that have more than one rating, and any of the ratings for that item are lower than required in the job profile. For example, ratings for language items such as Understanding, Reading, and Speaking. <p>Once the identified competencies and other items are inserted into the Career Development Plan, the system opens the Career Development Plan page so that you can update related information about the inserted items, such as the Estimated Completion Date, and so on.</p> |
| Populate Career Path | When only one row exists in the career path for your next interested job, click the Populate Career Path button to select the interested job row as a basis for inserting the position's career path from the Career Path table into your career path. |
| Private Path | Select to prevent managers from viewing the personal career path. |
| Details | Click an icon in this column to open the Career Move Details page. The Career Move Details page provides more information about the career move, specially for Military and federal data users. |

My Internal Resume Page

Use the My Internal Resume page (HR_CP_RESUME) to enable employees to select specific items to be included in an internal resume and create a personal resume for internal use.

To consolidate all work-related information, you can generate a personalized resume. Use this internal resume to apply for an open job or position within the organization.

Navigation:

Self Service > Career Planning > My Internal Resume

This example illustrates the fields and controls on the My Internal Resume page (1 of 3). You can find definitions for the fields and controls later on this page.

My Internal Resume

You can select information to be included in your Internal Resume. Only rows with the check-box selected will be included in the Internal Resume. You can update the job title, department, and/or location descriptions just for your Internal Resume without changing actual job data. You can view and print your Internal Resume.

The integration of Career Planning and ePerformance provides managers easy access to employees' performance data from career plans, as well as employees' career planning data from performance documents. From the Manage Career Plans page, a manager can click a link at the bottom of the page to transfer to the current performance document of the employee. Similarly, a manager can click a link from the Career Plan Summary section of a performance document to open the Manage Career Plans page and update career plan data for an employee. For more information, refer "Understanding ePerformance and Career and Succession Planning Integration" (PeopleSoft ePerformance)

Chapter 3

Planning Successions

Understanding Plan Successions

This topic discusses:

- Plan successions
- (USF) Plan successions

Plan Successions

To ensure an organization's continued success, you need to determine who will eventually replace employees currently in key positions. The Plan Successions business process in HR enables you to identify candidates for key positions, anticipate organizational bottlenecks, and develop multiple career paths for individuals who are ready for promotion.

To implement the Plan Successions business process:

1. Perform the prerequisite tasks.
2. Create the succession plans.
3. (Optional) Build the succession trees.

Once the succession trees are in place, you can review career summaries, monitor the progress of key employees, track changes to key positions, and make adjustments to successions plans as the requirements of the organization change over time.

Integrations

The Plan Successions business process integrates with:

- The Manage Profiles business process in HR.
See [“Manage Profiles Overview”](#) (PeopleSoft Human Resources Manage Profiles)
- The Plan Careers business process in HR.
See [Setting Up Career Plans](#).
- The Manage Positions business process in HR.
See [Defining Key Positions](#), [Identifying Potential Candidates](#).
- PeopleSoft Talent Acquisition Manager.
See [Identifying Potential Candidates](#).

(USF) Plan Successions

The Plan Successions business process for U.S. Federal Government users enables you to set up and manage succession plans and succession trees for government workers.

The Succession Planning USF menu contains the same pages as the Succession Planning menu. The Key Positions (POSITION_DATA) component under the Succession Planning, Define Key Positions menu is the same as the Identify Key Positions component (POSITION_DATA) under the Succession Planning (USF) menu.

The Succession Planning USF components are discussed in (USF) Plan Successions as well as *PeopleSoft HR Manage Profiles* and *PeopleSoft HR Manage Positions*.

Prerequisites

Perform these tasks before setting up the Plan Successions business process in HR:

1. Set up HCM core data.
2. Set up HR job data.
3. Define key positions.
4. Define key job codes.
5. Identify key employees.
6. (optional) Set up profiles.
7. (optional) Set up career plans.
8. Identify potential candidates.

Setting Up HCM Core Data

The HCM core data required for the Plan Successions business process is discussed in *PeopleSoft HCM Application Fundamentals*.

See “Setting Up Implementation Defaults” (Application Fundamentals).

Setting Up Job Data

The HR job data required for the Plan Successions business process is discussed in *PeopleSoft HR Administer Workforce*.

Note: Employee job data must exist in the Workforce Administration tables before you work with the Plan Successions pages. If you've implemented multiple business units and SetIDs, the information that you use and create will be determined by how business unit and setID functionality is set up for your user ID.

See “Understanding Job Data” (PeopleSoft Human Resources Administer Workforce).

Defining Key Positions

Use the Manage Positions business process to identify key positions in the organization and to create position hierarchies (which are required for successions plans). Once the position hierarchy exists, identify the incumbent in each key position. Key positions are discussed in *PeopleSoft HR Manage Positions*.

See “Maintaining Position Data” (PeopleSoft Human Resources Manage Positions).

Note: USF users should access the Key Positions pages using the Organizational Development, Successions Planning USF, Identify Key Positions navigation path.

Defining Key Job Codes

Use the Job Code Table component to identify key jobs in the organization. This is only required if you want to create job code-based succession plans.

See “Classifying Jobs” (Application Fundamentals).

Identifying Key Employees

Use the Workforce Job Summary component to identify key employees. Identifying key employees is only required if you want to create people-based succession plans.

Key employees must be active members of a talent pool associated with a talent pool category specifically defined to source employee succession plan types. There is no limit to the number of talent pools that can source employee succession plan types.

See “Viewing Worker Job History” (PeopleSoft Human Resources Administer Workforce).

Setting Up Profiles

Use the Manage Profiles business process to create profiles for key employees and roles. Roles are positions and job codes. Profiles for roles define specific job-related competencies and accomplishments. The succession planning process matches the employee competencies with competencies in position and job code profiles to identify and rank potential candidates for key roles using the Search and Compare Profiles component. Profiles are discussed in *PeopleSoft HR Manage Profiles*.

To enable you to easily view employee profiles, the Person Profiles component is accessible from the Plan Successions business process.

See “Manage Profiles Overview” (PeopleSoft Human Resources Manage Profiles).

Setting Up Career Plans

Use the Plan Careers business process to prepare potential candidates for succession plans. The career plans you develop for high-potential employees will prepare them to move into key positions. Career plans are not a prerequisite for creating succession plans. Using succession plans in conjunction with career plans enables you to plan employee training and development in readiness for planned moves.

See [Creating Career Plans](#).

You can automate the process of identifying candidates for key positions. Use the Create Succession Plan (SUCCESSION_PLAN) component to generate a list of people who have the selected key roles in their career path

See [Candidates Page](#).

Reviewing Career Summaries

To review career summaries, use the Career Assignments (CAREER_SUMMARY), Compensation (COMP_SUMMARY2), and Training (TRN_STUDNT_CRS_SU2) components.

To enable you to easily review candidate career information, certain data from the Plan Careers, Administer Workforce business process is displayed in the Plan Successions business process.

Note: These pages are view-only. If you want to update career, compensation, or training data, use the appropriate pages from the Plan Careers, Administer Workforce, or Administer Training business processes.

See [Creating Career Paths](#).

See “Understanding the Process of Updating Person and Job Information” (PeopleSoft Human Resources Administer Workforce).

Identifying Potential Candidates

After you have identified the key positions and defined profiles for these positions, you can search and compare employee profiles to identify potential candidates.

See “Understanding the Search and Compare Profiles Process” (PeopleSoft Human Resources Manage Profiles).

Recruiting External Candidates

When creating candidate lists for succession plans, consider candidates outside the organization. Before you can include external candidates in a succession plan, you must add them to the HR system and associate an applicant ID.

You can increase the chances of identifying and recruiting candidates for key roles if the competencies listed in the job requisitions match the competencies required for the key roles.

Setting Up Succession Planning

This topic describes how to define the Succession Planning default values and defining succession planning default values.

Pages Used to Set Up Succession Planning

| Page Name | Definition Name | Usage |
|---------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <u>Succession Planning Setup Page</u> | HR_SP_DEFAULT | Define Succession Planning setup and default information, such as the use of Profile Manager profile types, and rating box associations. |
| <u>Defining Ratings Boxes Page</u> | HR_RATINGS_BOX_CFG | Define ratings boxes, or matrices, to graphically represent employee rating assignments, such as a 9-Box for <i>performance versus potential</i> , which you can use in succession plans or talent pools to assess employees in relation to other employees. |
| Map Ratings Page | HR_RB_MAP_RATINGS | Map the performance and career potential ratings to succession planning rating box ratings. Since multiple rating models can be used in performance processes, the system supports the mapping of multiple rating models to one Rating Box ID. |

Succession Planning Setup Page

Use the Succession Planning Setup page (HR_SP_DEFAULT) to define Succession Planning setup and default information, such as the use of Profile Manager profile types, and rating box associations.

Navigation:

Set Up HCM > Product Related > Organizational Development > Succession Planning Setup

This example illustrates the fields and controls on the Succession Planning Setup page. You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Search Document Type | Define the PeopleSoft ePerformance document type and rating model the system uses when searching for succession candidates or talent pool members by the Overall Performance Rating search option. Select from the defined document types used for appraisal processing through PeopleSoft ePerformance. |
| Rating Model | Select from the defined rating models associated with the document type specified in the Document Type field. |

Defining Ratings Boxes Page

Use the Define Ratings Box page (HR_RATINGS_BOX_CFG) to define ratings boxes, or matrices, to graphically represent employee rating assignments, such as a 9-Box for performance versus potential, which you can use in succession plans or talent pools to assess employees in relation to other employees.

Navigation:

Set Up HCM > Product Related > Organizational Development > Define Ratings Box > Define Ratings Box

You can use ratings boxes in succession plans or talent pools to assess employees in relation to other employees.

A conventional ratings box matrix is usually a 9-box, which is three boxes across and three boxes vertically. However, you can define ratings boxes as large as five boxes by five boxes. There is no limit to the number of ratings boxes you can define.

You can also use this page to define talent categories and then assign employees into the categories.

This example illustrates the fields and controls on the Define Ratings Box page (1 of 2). You can find definitions for the fields and controls later on this page.

The screenshot displays the 'Define Ratings Box' page for 'Ratings Box ID: KUSPRB01'. The page is divided into two main sections: 'Ratings Box Details' and 'X-Axis Setup' and 'Y-Axis Setup'.

Ratings Box Details:

- *Effective Date:** 01/01/2000
- *Status:** Active
- *Title:** PERFORMANCE VS. POTENTIAL
- *Description:** 9-Box
- Short Desc:** Perform
- Comments:** Rate succession candidates or talent pool members using the Performance versus Potential 9-Box.
- ☐ Used for Talent Pool Category

X-Axis Setup:

- Title:** PERFORMANCE
- Number of Boxes:** 3
- Rating Integration:** None
- X-Axis Ratings:**
 - 1 LOW
 - 2 MEDIUM
 - 3 HIGH

Y-Axis Setup:

- Title:** POTENTIAL
- Number of Boxes:** 3
- Rating Integration:** None
- Y-Axis Ratings:**
 - 1 LOW
 - 2 MEDIUM
 - 3 HIGH

This example illustrates the fields and controls on the Define Ratings Box page (2 of 2). You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Used for Talent Pool Category | Select to indicate that the values in the X-Axis Ratings region are used to define talent categories. |
| X–Axis Box Number and Y–Axis Box Number | <p>Select the number of boxes to display along each axis of the ratings box grid. Values are: 2, 3, 4, and 5.</p> <p>The Y–Axis Box Number field is not available if you select the Used for Talent Pool Category check box.</p> |

Setting up Integrated Rating Boxes

The integration with ePerformance supports the defaulting of ePerformance ratings into the rating box functionality in Succession Planning. When Performance Integration is selected as the rating integration for an axis setup in the ratings box definition, you can map each rating within the specified rating model to a rating value that is defined on the ratings box definition (for example, HIGH, MEDIUM and LOW for an axis with three boxes. At runtime, the system collects each candidate’s performance rating from his or her latest completed performance document, maps the performance rating to the associated axis rating based on the mapping, and displays the candidate on the rating box appropriately.

The system also supports the defaulting of career potential ratings into the rating box functionality.”

Integration with ePerformance supports the facility of using Map Rating link, which facilitates the ratings from a Rating Model or the Translate Table for the Potential value to map to Rating Box Ratings. To integrate the ePerformance rating and the career potential rating, the Rating Integration field on the Rating Box must be set as either Performance or Career Potential. If Rating Integration values are set, a Map Ratings link displays and the link opens the map rating page.

This example illustrates the fields and controls on the Define Rating Box page with Integration. You can find definitions for the fields and controls later on this page.

Since multiple rating models can be used in performance processes, the system supports the mapping of multiple rating models to one Rating Box ID.</p> |

Creating Succession Plans

Succession Planning is the process of identifying long-range needs and cultivating a supply of internal talent to meet those future needs. The process anticipates the future needs of the organization and assists in finding, assessing, and developing the human capital necessary to successfully execute the strategy of the organization.

To create succession plans, use the Create Succession Plan (SUCCESSION_PLAN) component.

This topic discusses how to enter succession plan data and select candidate relating tasks.

Pages Used to Create Succession Plans

| Page Name | Definition Name | Usage |
|----------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <u>Succession Plan Page</u> | SUCCESSION_PLAN1 | Enter plan details such as effective date, plan status, and projected vacancy date. Review incumbent job and career plan details. |
| <u>Candidates Page</u> | SUCCESSION_PLAN2 | Search and compare employee profiles to identify potential candidates. |
| <u>Entering Succession Rating Page</u> | SUCCESSION_RATINGS | Rate successors using configurable X-Y matrices, or 9-boxes. Use ratings boxes to track custom-defined criteria such as performance, potential, readiness, and so on. |
| <u>Slate Page</u> | SUCCESSION_SLATE | View the finalized list of candidates slated to replace the incumbent in a succession plan. Link to defined succession plan records for any of the candidates to help determine any blocked scenarios. |

Succession Plan Page

Use the Succession Plan page (SUCCESSION_PLAN1) to enter plan details such as effective date, plan status, and projected vacancy date.

Review incumbent job and career plan details.

| Field or Control | Description |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Search Method | Select the search method the system uses to search for candidates for this succession plan. The search method options differ depending on the Plan Type: Position, Job Code or Person. Different search methods change the appearance of the Candidates region of the page to enable you to locate succession plan candidates based on specific criteria. |
| Find Candidates | <p>Click to search for succession candidates based on the search method selected.</p> <p>If you want to add additional candidates manually, enter new data rows and select the candidate's employee ID.</p> <p>The system displays a message indicating that the process is unavailable if the search indexes for Job Profile Management have not been created.</p> |

Candidates

The **Candidates** scroll area lists potential successors for the selected position. The succession planning process maintains static data and must be updated by creating new succession plans for each key entity as needed. Creating new succession plans prevents data from becoming outdated.

| Field or Control | Description |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Order | <p>Enter a succession order for each candidate. Assign the number 1 to indicate that a candidate is the first choice in the list. Proceed in descending order. When you save the succession plan, the candidates appear in order of rank.</p> <hr/> <p>Note: You rank the candidates and save the information before viewing candidates on the Succession Plan - Slate page, where you view the hierarchy of successors to a candidate, job code or position.</p> <hr/> |
| Name | Click to open the Profile Manager-based Person Profile page, if available, for the selected individual. |
| Candidate Type | Indicates whether the candidate is an applicant for the succession plan. The field displays <i>Applicant</i> when you add the candidate manually using the Add Applicant button. The field displays <i>Person</i> when you add the candidate manually using the Add Person button, or if the candidate was retrieved using any of the search methods. |
| Status | Select the status of the individual within the succession plan. Select <i>Active</i> or <i>Inactive</i> . |
| Succession Readiness | <p>Select the readiness level for an individual in the succession plan. Select from the following values:</p> <ul style="list-style-type: none"> • <i>1–2 Yrs (1–2 years)</i> <p>The employee will be ready for the position change within the next two years.</p> • <i>3–5 Yrs (3–5 years)</i> <p>The employee will be ready for the position change in three to five years.</p> • <i>Emergency</i> <p>The individual is ready to step in to the role/job/position in case of an emergency vacancy, but may not be the most suitable successor long-term.</p> • <i>Ready Now</i> <p>This indicates that this employee is in the highest level of readiness.</p> |

| Field or Control | Description |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Target Date | Enter the date when you expect the candidate to move into the selected position. |
| Impact of Loss | Specify the impact losing this employee would have on the organizations goals. Values are <i>Low</i> , <i>Medium</i> , or <i>High</i> . |
| Notes | Click to open the Notepad page in order to document notes for any successor or talent pool candidate. |

Performance and Career

Click the Performance and Career tab in the **Candidates** region.

| Field or Control | Description |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Compare Profiles | Click to access the Compare Profiles - Match Results page. |
| Performance Rating | Displays the performance rating of the employee's most currently completed performance document. Click the link to access the corresponding performance document in ePerformance. |
| Career Development Plan | Click to open the Career Development plan page for the selected individual. |

On the **Job Data** and **Salary Plan** tabs, the system displays the candidates' current position, and salary details from the Career Ranking and Potential page.

Entering Succession Rating Page

Use the Ratings Box page (SUCCESSION_RATINGS) to rate successors using configurable X-Y matrices, or 9-boxes.

Navigation:

- **Organizational Development > Succession Planning > Create Succession Plan > Ratings Box**
- **Organizational Development > Succession Planning USF > Create Succession Plan > Ratings Box**
- **Organizational Development > Succession Planning > Maintain Succession Plans > Ratings Box**

This example illustrates the fields and controls on the Succession Plan - Ratings Box page (1 of 2) for an Auto Load Ratings flag. You can find definitions for the fields and controls later on this page.

| KUSPRB02 | BEHAVIOR VS. INFLUENCE | 9-Box | View Ratings |

Add Ratings Box

This example illustrates the fields and controls on the Succession Plan - Ratings Box page (2 of 2). You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|------------------|---------------------------------------------------------------------------------------------------------------------------------|
| View Ratings | Click to view the Ratings Box chart on this page using the candidates and ratings specified in Box Ratings region of this page. |
| Add Ratings Box | Click to add additional ratings box charts to this succession plan. |

Note: You can rate successors using configurable X-Y grids for ratings boxes, or 9-boxes. Use ratings boxes to track custom-defined criteria such as performance, potential, readiness, and so on.

If the status of any succession candidate or talent pool member is changed from active to inactive and the employee has been rated in a ratings box, then the employee or applicant is automatically removed from all rating boxes.

If the Auto Load Ratings are not enabled and there are many candidates in the succession plan, then the field of Performance and Potential will be blank. You can manually designate the rating or change the rating by selecting the appropriate rating in the drop-down box. You can select the checkboxes and load the mapped ratings at any point in time.

From this page, you can manually select the ratings or the ratings can be defaulted from the employees performance rating in ePerformance, the career potential rating in Career Planning, or both. When the administrator adds a new succession plan and selects the View Ratings button on the Rating Box page, the system checks if the Auto Load Ratings field on the Succession Planning setup page is enabled for the rating box. If the option is selected, the system finds the appropriate ratings from Career Planning and ePerformance, maps those ratings, and populates the Box Ratings in the grid. This auto load process is enabled each time when a new candidate is added to an existing Succession Plan.

Use ratings boxes to track custom-defined criteria such as performance, potential, readiness, and so on.

Box Ratings

The Box Ratings region enables you to select ratings for each candidate specified on the Candidates page. Based on your selections, the names of the candidates appear in the Ratings Box chart on this page. The column titles correspond to the X-Axis Title and the Y-Axis Title specified on the Define Ratings Box page. Select from the values specified on the Define Ratings Box page for the X-Axis Ratings and the Y-Axis Ratings.

Slate Page

Use the Slate page (SUCCESSION_SLATE) to view the finalized list of candidates slated to replace the incumbent in a succession plan.

The Succession Planning business process enables you to manage the slate of candidates. Create successor order, successor plan status (active or inactive), and successor rating box assignments. The Slate page enables you to view the roster of candidates that you manage on the other pages in the Succession Plan component. The Slate page updates as you add or delete candidates on the Candidates page.

Link to defined succession plan records for any of the candidates to help determine any blocked scenarios.

Navigation:

- **Organizational Development > Succession Planning > Create Succession Plan > Slate**

Succession Plan | Candidates | Ratings Box | **Slate**

Succession Slate

Use the options in the Succession Slate region to view plan incumbents for a key role or replacements for a key person, depending on the plan type.

The Succession Slate region enables you to view the selected candidates from the Candidates page, in the succession order.

All names in the grid are candidates for the succession plan. The title of the far right column is dynamic based on the Plan Type. Click the links in this column to access succession plans based on the plan type. For position plans, where the person is a candidate, click the link to access a position succession plan. For job code plans, click the link to access the succession plan for the job code. For person plans, clicking the link accesses the succession plan for the person.

The system sorts the succession plan rows in ascending succession order.

The adjustments to the readiness status for successors is probably the last step toward finalizing succession plans.

This page is particularly useful after you've created succession plans for several key positions, because you can see if succession plans are in place for other key positions and key job codes for which the successors may be incumbents. This helps to ensure that no gaps exist in replacements and to identify and prevent any organizational bottlenecks. See which candidates are blocked in their current position so that you can prepare them for other roles or change their rotations, thereby preventing the loss of high-potential employees.

The system checks the employee's readiness. If this is set at *3–5 Yrs* (ready in three to five years), *Emergency* (ready in an emergency) or *Retirement* (retire in current position), then **Blocked** is set to *N* designating that this employee is not ready.

If the employee's readiness is *Ready Now* or *1–2 Yrs* (ready in one to two years), the system checks the incumbent's readiness. If there is an incumbent but the incumbent has no row on the succession plan table for this or any other position, **Blocked** is set to *Y*.

If the incumbent has one or more rows on the succession plan table (any position) then the system checks the lowest readiness in all positions.

If the incumbent's minimum readiness is set to *Ready Now* or *1–2 Yrs*, **Blocked** is set to *N*; otherwise, if readiness is set to *3–5 Yrs*, *Emergency* or *Retirement*, **Blocked** is set to *Y*.

Managing Talent Pools

A talent pool is a group of individuals that is generally identified as the top talent within an organization. In order to prevent attrition and provide motivation, individuals that have met certain criteria for success are placed in a pool based upon their role, job code, or position.

Understanding Talent Pools

Talent pools provide flexibility in the selection process for a leadership team. Creating a talent pool rather than choosing one employee with key competencies is more effective and efficient for an organization.

For example, a championship athletic team usually finds the best available athletes based on a predetermined talent pool, and then determines where to fit those athletes into the team lineup. This is in sharp contrast to the traditional business approach, in which companies begin by assigning employees to more limited career paths.

An integrated approach identifies and grooms candidates for increasingly demanding leadership positions and prepares the organization for demographic trends that sharply decrease leadership ranks. The majority of high-potential development programs encourage cross-functional rotations to develop breadth of knowledge in future company leaders. Many companies focus on identifying and promoting talent within the organization as a whole, often seeking to deploy this talent across business units. Making cross-functional development training part of the job prevents disruption in the flow of business.

Pages Used to Create Talent Pools

| Page Name | Definition Name | Usage |
|--------------------------------------------|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <u>Define Talent Pool Categories Page</u> | HR_TPOOL_CATEGORY | Define talent pool categories. |
| <u>Managing Talent Pools Page</u> | HR_TPOOL_DEF | Search for and edit existing talent pools. |
| <u>Talent Pools - Ratings Box Page</u> | HR_TPOOL_RATINGS | Rate successors using configurable X-Y matrices, or 9-boxes. Use ratings boxes to track custom-defined criteria such as performance, potential, readiness, and so on. |
| <u>Manage Talent Pools - Learning Page</u> | HR_TP_LRN_PRG | Associate learning programs or a list of coursework for a specific talent pool through integration with Enterprise Learning Management. |

Define Talent Pool Categories Page

Use the Define Talent Pool Categories page (HR_TPOOL_CATEGORY) to define talent pool categories.

Talent pool categories enable you to refine the definition of a Talent Pool. Defining a talent pool specifically for defining Key People allows you to create person-based succession plans for the talent pool members, and creates a search base for person-based succession plan definitions.

Navigation:

Set Up HCM > Product Related > Organizational Development > Define Talent Pool Categories

This example illustrates the fields and controls on the Define Talent Pool Categories page. You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Talent Pool Defines Key People | Select to indicate that any talent pool associated with this talent pool category is used to source person-based succession plans. |

Managing Talent Pools Page

Use the Manage Talent Pools - Talent Pool page (HR_TPOOL_DEF) to search for and edit existing talent pools.

You can manually add internal and external individuals to talent pools based on performance and potential analysis. Add internal individuals automatically using Profile Manager's search and match feature. Depending on your organization's practices, readiness is a key monitor factor for talent pools. You can manually specify each employee's readiness based on criteria established by your organization.

Navigation:

Organizational Development > Succession Planning > Manage Talent Pools > Talent Pool

This example illustrates the fields and controls on the Manage Talent Pools - Talent Pool page. You can find definitions for the fields and controls later on this page.

Manage Talent Pools - Learning Page

Use the Manage Talent Pools - Learning page (HR_TP_LRN_PRG) to associate learning programs or a list of coursework for a specific talent pool through integration with Enterprise Learning Management.

You can associate learning programs or a list of coursework for a specific talent pool through integration with Enterprise Learning Management. If a talent pool member has an active pool status, the system adds the learning program to the talent pool members' Learning Plan page (LM_LEARNING_HM) in Enterprise Learning Management. The learning definitions are initiated on the Learning tab of the Create Talent Pool page.

Note: Enterprise Learning Management must be installed in order to display the Manage Talent Pools - Learning page.

Managing Succession Trees

Succession trees provide a graphical view of an organization's succession plan. Succession trees show which workers currently hold key positions and which candidates are slated to move into this position.

Building Succession Trees

To build succession trees, use the Tree Manager (PSTREEMGR), Tree Structure (PSTREESTRCT), Tree Auditor (RUN_TREE_AUDITS) , and Tree Viewer (PSTREEVIEWER) components.

Note: You must create successions plans and identify succession candidates before creating the succession tree.

Use the PeopleSoft Tree Manager to build, view, modify, and control access to succession trees. To represent positions as a hierarchy, identify the reporting relationships among the key positions and then build the succession tree.

Succession trees are effective-dated; you can build multiple trees to maintain a history of the organization's succession planning and to track planned and actual changes. You can also build alternative scenarios using the Save As feature to clone a tree and then changing hierarchy properties to create different scenarios.

See *PeopleTools 8.52: PeopleSoft Tree Manager*

See “Creating Organization Charts” (Application Fundamentals).

Determining Security Access

You can determine the type of access that users have to succession trees. Many levels of access exist: to the tree itself, to key position and succession plans, and to career plans.

For example, you might allow many users to update key position, succession plan, and career plan data from within succession trees yet permit only a few users to make changes to the succession trees themselves. You might want other users to view key position, succession plan, and career plan data as display-only. You can delegate the maintenance of different levels in trees by specifying the level of access or update authority that a user or a set of users has.

Use object security to specify which users can access trees and to control whether the trees that users access are display-only. User security determines whether users can access pages from nodes and details and controls whether they are display-only pages. Use employee data security to specify whether users can access the data in pages tied to specific nodes and details.

See *PeopleTools 8.52: Security Administration*

Adding and Viewing Details in Succession Trees

Once you've created succession plans with candidate lists, you can view career plans and related employee data for succession candidates. Use this information to make decisions about particular candidates, to re-rank candidates in succession plans, or to remove candidates from the candidate list.

See *PeopleTools 8.52: PeopleSoft Tree Manager*

Viewing Details in Succession Trees

Use the Detail feature of Tree Manager to view and update career plans for succession candidates and to view and update several other pages containing pertinent employee data, such as compensation history, skills, languages, and prior work experience.

This diagram illustrates a succession tree:

Adding Details in Succession Trees

To add details to the succession tree, click the **Insert Detail** button. When you double-click the button, a list of candidates in the succession plan for that position appears. Select the candidate for whom to view career plans or related employee data.

Note: Before you can view career plans and other employee data, create succession plans for key positions and include succession candidates in them. These pages are available in Tree Manager only for succession candidates.

To add a detail to succession tree:

1. In Tree Manager, open the succession tree and select the key position for which you want to add a detail.
2. Click **Insert Detail**.
3. Select the **Dynamic Flag** check box on the Detail Value Range page and click **Add**.

The detail is placed on the tree in what appears to be a lower level in the plan. For example, a detail for Position 1 in the CEO level appears under the EVP level.

To hide the details in a succession tree:

1. Click **Display Options**.
2. Deselect the **Display Node Description** check box on the Configure User Options page.

When you highlight a detail and click **Edit Data**, the system displays a list of candidates in the succession plan for the key position. The candidates are sorted first by succession plan date, then by ranking, and then by readiness. If a candidate is in more than one succession plan, they appear in this list only for the most current succession plan. Click the **Update** button on the line for the candidate for which you want to view additional information. The first page in the group, Career Plan, appears. If you prefer to access other pages from within Tree Manager, you can change the link between Tree Manager and the pages.

Note: You can specify which page you'll see when you select to see details on a tree object, by selecting a page on the Details menu.

Managing Succession Plans

This topic provides an overview of Succession 360° and discusses how to configure the related setup.

Pages Used to Manage Succession 360°

| <i>Page Name</i> | <i>Definition Name</i> | <i>Usage</i> |
|-----------------------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------|
| <u>Succession 360° Setup - Search Setup Page</u> | HR_VT_SETUP1_SRCH | Define the default search criteria and page layout for the Succession 360° page. |
| <u>Succession 360° Org Chart Page</u> | HR_VT_SETUP1 | Define organizational chart hierarchies for the Succession 360° page. |
| <u>Succession 360° Setup - Profile Content Page</u> | HR_VT_SETUP2 | Define profile content for the Succession 360° page. |
| <u>Succession 360° Setup - Legend Page</u> | HR_VT_SETUP3 | Configure icons and color values for the Succession Readiness Legend used on the Succession 360° page. |
| <u>Succession 360 Page</u> | HR_VT_DASHBOARD | Visually review and manage a person or role within the context of the organization. |

Understanding Succession 360°

You may want to use a talent review process centered on a person or role when you initiate succession planning. The Succession 360° page enables you to visually review and manage succession planning-related processing for a person or role within the context of the organization.

Use the Succession 360° page as planning tool or reviewing tool. The page highlights the completed portions of the succession planning process or any unfinished business in the succession planning process.

The Succession 360° feature gathers and displays a variety of pertinent data from PeopleSoft HR. You can perform the following functions:

- Search for people, succession plans, and positions or job codes.
- View graphical representations of reporting hierarchies.
- View profile summaries for people, positions, or job codes.
- View succession plans for people, positions, or job codes.
- Edit succession plans.

The Succession 360° component exchanges succession plan data from the underlying succession plan record. For example, in the Successor Details region of the Succession 360° component, the system retrieves the Ratings Box information and the candidate list from the Succession Plan ID specified on the Successors tab.

The system updates the information in the plan record as you make changes in either the Succession 360° component or the Succession Plan pages.

Succession 360° Setup - Search Setup Page

Use the Succession 360° Setup - Search Setup page (HR_VT_SETUP1_SRCH) to define the default search criteria and page layout for the Succession 360° page.

Navigation:

Set Up HCM > Product Related > Organizational Development > Succession 360° Setup > Search Setup

This example illustrates the fields and controls on the Succession 360° Setup - Search Setup page. You can find definitions for the fields and controls later on this page.

| Field or Control | Description |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Persons | Select to specify a person search as the default search method on the Succession 360° page. This enables users to perform a search for persons in the system that may or may not be associated with a succession plan. The search returns any person to whom the user has security access. When you select this option, the system uses the person-based hierarchy setup information, defined on the Org Chart page, for rendering the chart on the Succession 360° page |
| Positions | Select to specify a position search as the default search method on the Succession 360° page. This enables users to perform a search for positions in the system that may or may not be associated with a succession plan. The search returns any position to which the user has security access. When you select this option, the system uses the position-based hierarchy setup information for rendering the chart on the Succession 360° page. If full or partial position management is not installed, then this search option is not displayed. |
| Job Codes | Select to specify a job code search as the default search method on the Succession 360° page. This enables users to perform a search for job codes in the system that may or may not be associated with a succession plan. The search returns any job code to which the user has security access. When you select this option, the system uses the job code-based hierarchy setup information for rendering the chart on the Succession 360° page. |
| Succession Plans | Select to specify a succession plan search as the default search method on the Succession 360° page. This enables users to perform a search for existing succession plans in the system. The search returns any succession plan to which the user has security access. |

| Field or Control | Description |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Page Layout after Search | <p>Select the default layout of the Succession 360° page after the user performs a search.</p> <p>Values are: <i>Organization Chart and Profile</i>, <i>Organization Chart Maximized</i>, or <i>Profile Only</i>.</p> |

Succession 360° Org Chart Page

Use the Succession 360° Setup - Org Chart page (HR_VT_SETUP1) to define organizational chart hierarchies for the Succession 360° page.

Navigation:

Set Up HCM > Product Related > Organizational Development > Succession 360° Setup > Org Chart

This example illustrates the fields and controls on the Succession 360° Setup - Org Chart page. You can find definitions for the fields and controls later on this page.

The screenshot displays the 'Succession 360° Setup - Org Chart' page. The interface includes a top navigation bar with tabs: 'Search Setup', 'Org Chart' (selected), 'Profile Content', and 'Legend'. Below the tabs, the 'Organization Chart' section is visible, featuring a 'Find | View All' link and pagination 'First 1 of 2 Last'. The 'Effective Date' is set to '01/01/1990'. The 'Person Hierarchy Source' section contains an '*Access Type' dropdown menu currently set to 'By Part Posn Mgmt Supervisor'. The 'Position Hierarchy Source' section has two radio button options: 'Use Position Data' (which is selected) and 'Use Position Tree', followed by a 'Position Tree Name' text input field. The 'Job Code Hierarchy Source' section includes a text prompt 'Enter only one Job Code Tree Name per Set ID'. Below this is a table titled 'Job Code Trees' with columns for '*Set ID' and '*Job Code Tree Name'. The table lists one entry: 'SHARE' for the Set ID and 'KUJCTREE01' for the Tree Name. At the bottom of the form are 'Save' and 'Notify' buttons. A footer navigation bar shows 'Search Setup | Org Chart | Profile Content | Legend'.

Person Hierarchy Source

| <i>Field or Control</i> | <i>Description</i> |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Access Type | <p>Select the reporting access type from which the person-based chart hierarchy on the Succession 360° page is derived.</p> <p>Values are:</p> <ul style="list-style-type: none"> • <i>By Department Manager ID</i> <p>Select this value to display the hierarchy based on information in the Manager ID field on the Department Profile page.</p> • <i>By Dept Security Tree</i> <p>Select to display the hierarchy using information from the department security tree.</p> • <i>By Part Posn Mgmt Supervisor</i> (by partial position management supervisor) <p>Select to display the hierarchy by both the Reports To and the Supervisor ID fields on the Work Location page. This is designed for the organizations that use partial position management. The system searches for reporting relationships based on Report To first, and then Supervisor ID.</p> • <i>By Reports to Position,</i> <p>Select to display the hierarchy based on information in the Reports To field on the Work Location page.</p> • <i>By Supervisor ID</i> <p>Select to define the reporting relationship based on information in the Supervisor ID field on the Work Location page in Job Data.</p> |

Position Hierarchy Source

| <i>Field or Control</i> | <i>Description</i> |
|-------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Use Position Data and Use Position Tree | <p>Select one of these options to indicate that the position-based chart hierarchy on the Succession 360° page is derived from either position data or a position tree. Selecting the Use Position Tree option requires the selection of a valid position tree in the Position Tree Name field.</p> |

Job Code Hierarchy Source

Use the fields in this region of the page to select the **SetID** and **Job code Tree Name** of each tree you want to use for job code-based organizational chart hierarchies on the Succession 360° page. The valid values in the **Job code Tree Name** field are any job code-based hierarchies created using Tree Manager, or any tree with a tree structure that uses the JOBCODE_TBL record as the Tree Node Record Name.

Succession 360° Setup - Profile Content Page

Use the Succession 360° Setup - Profile Content page (HR_VT_SETUP2) to define profile content for the Succession 360° page.

Navigation:

Set Up HCM > Product Related > Organizational Development > Succession 360° Setup > Profile Content

You can specify the content on the Succession 360° page using the Succession 360° Setup - Profile Content page.

This example illustrates the fields and controls on the Succession 360° Setup - Profile Content page (1 of 2). You can find definitions for the fields and controls later on this page.

| Key Job Code Icon | Select to display an icon on the Succession 360° page if the job code is defined as a key job code using the job code table. The icon is visible in the Org Chart Node, Slate Node and Person Profile topics of the Succession 360° page. |

Select up to eight of the remaining check boxes in this region to include specific fields to display in the Profile Summary topic of the Succession 360° page. The system displays the selected content in the profile summary topic of the Succession 360° page in the order displayed on this page.

| <i>Field or Control</i> | <i>Description</i> |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Non Person Attribute Count | Displays the number of selected options in the Non-Person Profile region of this page. The selections made for the Key Position Icon or Key Job Code Icon are not included in the displayed count. |

Person Profile Content

| <i>Field or Control</i> | <i>Description</i> |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Key Person Icon | Select to display an icon on the Succession 360° page for any employee defined as a key person. The icon is visible in the Org Chart Node, Slate Node and Person Profile topics of the Succession 360° page. |

Select up to eight of the remaining check boxes in this region to include specific data types in the Profile Summary topic of the Succession 360° page. The system displays the selected content in the profile summary topic of the Succession 360° page in the order displayed on this page.

| <i>Field or Control</i> | <i>Description</i> |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Person Attribute Count | Displays the number of selected options in the Person Profile region of this page. The selections made for the Photo or Key Person Icon fields are not included in the displayed count. |

Talent Category Icon Mapping

| <i>Field or Control</i> | <i>Description</i> |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| X-Axis Rank | Displays the box rating labels defined in the X-axis for the specified Rating Box ID. The maximum numbers of displayed ratings is five. This area displays the box rating labels in reverse order. For example, the first row in the Talent Category Icon Mapping region displays the box 5 label on the X-axis. The second row displays the box 4 label on the X-axis, and so on. |
| Content Name | Specify pre-configured talent category icon names. |
| Image | Displays the image associated with the value specified in the Content Name field. Five pre-configured icons are delivered and used as the default Talent Category icons. |

Succession 360° Setup - Legend Page

Use the Succession 360° Setup - Legend page (HR_VT_SETUP3) to configure icons and color values for the Succession Readiness Legend used on the Succession 360° page.

Navigation:

Set Up HCM > Product Related > Organizational Development > Succession 360° Setup > Legend

This example illustrates the fields and controls on the Succession 360° Setup - Legend page. You can find definitions for the fields and controls later on this page.

| Succession Readiness | *Icon Name | Org Chart Image | *Ratings Box Icon Name | Ratings Box Image |
|----------------------|----------------------|-----------------|------------------------|-------------------|
| Ready Now | PS_STATUS_DIAMOND_IC | | PS_STATUS_PERSON_DIAM | |
| 1 - 2 Years | PS_STATUS_SQUARE_IC | | PS_STATUS_PERSON_SQU | |
| 3 - 5 Years | PS_STATUS_CIRCLE_ICN | | PS_STATUS_PERSON_CIRC | |
| Emergency | PS_STATUS_TRIANGLE_ | | PS_STATUS_PERSON_TRIA | |

Five pre-configured icons are delivered and used as the default Succession Readiness icons for use in the Succession Readiness legend.

| <i>Field or Control</i> | <i>Description</i> |
|----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Succession Readiness | Displays the current system defined succession readiness translate values. Values are: <i>Now</i> , <i>1-2 years</i> , <i>3-5 years</i> , and <i>Emergency</i> . |
| Icon Name | For each value in the Succession Readiness column, specify the name of the icon image to display in the organizational chart, Succession Readiness legend, and Successors Details. |
| Ratings Box Icon Name | For each value in the Succession Readiness column, specify the name of the icon image to display in the Ratings Box. |
| Org Chart Image and Ratings Box Image | Displays the image associated with the specified values in the Icon Name and Ratings Box Icon Name fields. |

| Plan Type | Plan ID | Plan Description |
|-----------|-----------|--------------------------------|
| Job Code | KUSPLAN06 | Plan for Senior Manager-Accoun |

The Succession 360 page has two primary topics:

- An organization chart or reporting hierarchy.

This information, on the left side of the Succession 360 page focuses on a person or a role and enables you to navigate to another person or role of interest.

- A profile view.

This region displays details regarding the person or role in focus on the organizational chart.

Depending on the perspective of the Succession 360 page, you can compare the succession candidates to the role profile or the incumbent profile. You can expand or collapse this information to optimize

the workspace for a particular task. For example, when focusing on succession information, you may choose to collapse the incumbent details topic.

Organization Chart or Reporting Hierarchy

The system uses trees from Tree Manager to build the hierarchies rendered by the organization chart. The organization chart supports three types of hierarchies:

- Person-based

The chart hierarchy derives from the reporting Access Type defined in the Succession 360° Setup component.

- Position-based

The chart hierarchy derives from either Position Management data or a position tree as configured in the Succession 360° Setup component.

- Job code-based

The chart hierarchy derives from a job code tree as configured in the Succession 360° Setup component.

You can scroll both vertically and horizontally through the chart on the Succession 360 page. The chart displays a maximum of three vertical levels at any time.

The focus chart node is displayed in a contrasting color from other nodes in the chart. You can change the focus node by clicking the name, job title, or role link in each node of the chart. Changing the focus node updates the contents of the profile topic on the right-hand side of the Succession 360 page.

Profile View - Person-based

This region of the Succession 360 page displays details about the person that is the focus of the organization chart. The region has three tabs that change based on the selected hierarchy type.

For a person-based hierarchy, the profile view region displays the name and job code title from the job record of the employee specified in the focus node of the organization chart region. If a position title is not available, then the system displays the job code title. There are three tabs associated with a person-based profile view:

- Person Details

The information on this tab is based on information in several HR tables. You can configure the information on the Succession 360° Setup - Profile Content page.

| Field or Control | Description |
|----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Go To | <p>Select the detailed career or profile page you want to access and click the Transfer icon to access the desired page. For the selected employee, select from the following pages:</p> <ul style="list-style-type: none"> • Select <i>Career Development Plan</i> to go to the Career Development Plan page. • Select <i>Career Path</i> to go to the Career Path page. • Select <i>Person Profile</i> to go to the Profile Manager Person Profile page. • Select <i>Performance Document</i> to go to the Maintain Performance Documents page. <hr/> <p>Note: The Performance document link is only available if you have the appropriate ePerformance roles and associated permission lists to view performance documents.</p> <hr/> |
|  (Transfer icon) | Click the Transfer icon to access the selected page in the Go To field. |

- **Compare to Role**

Click the **Compare to Role** button on this tab to perform a Profile Manager-based comparison between the selected employee and their current role. The results display a side-by-side comparison of the employee's qualification content topics, if defined in Profile Manager, with those of the employee's current role, if defined in Profile Manager. The system displays a message indicating that the process is unavailable in the following cases:

- If there are no defined profiles for the employee or role.
- If the search indexes for Job Profile Management have not been created.

See “Understanding Setting Up Search and Compare Profiles” (PeopleSoft Human Resources Manage Profiles).

- **Career**

The **Career** tab displays a summary of future career moves and career history for the current employee.

Profile View - Position or Job Code-based

This region of the Succession 360 page displays details about the selected role, job code, or position that is the focus of the organization chart. The region has three tabs that change based on the selected node in the organizational chart.

For a position-based or job code-based hierarchy, the profile view region displays the position or job code associated with the focus node of the organization chart region. There are three tabs associated with the profile view for non-person profiles:

- Details

The information on this tab is based on the position or job code associated with the focus node of the organization chart region.

- Required Competencies

The **Required Competencies** tab displays a list of competencies and associated required ratings, based on the Profile Management non-person profile for the role or job code selected in the organization chart region.

- Incumbents

The **Incumbents** tab displays a grid of incumbents for the job code or position.

| <i>Field or Control</i> | <i>Description</i> |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Compare Incumbent to Role | <p>Select an employee from the displayed list and click to perform a Profile Manager-based comparison between the selected incumbent and the current role. The results display a side-by-side comparison of the incumbent's qualification content topics, if defined in Profile Manager, with those of the current job or role, if defined in Profile Manager. If there are no defined profiles for the employee or role, the system displays a message indicating that the process is unavailable.</p> <p>See “Setting Up Searches” (PeopleSoft Human Resources Manage Profiles).</p> |
| View Career Detail | <p>Select an incumbent from the displayed list and click to displays a summary of future career moves and career history for the selected incumbent.</p> |

Successor Details

This region of the Succession 360 page displays three tabs associated with the source succession plan:

- Successors

This tab displays summary succession plan information and a succession slate grid, if the information is available, from the associated succession plan. The slate grid enables you to edit succession order and plan status, which is updated in the associated succession plan and the slate pop-up when you click the **Save** button in this region.

- Compare to Incumbent or Compare to Role

Select a candidate and click the **Compare to Incumbent** button or the **Compare to Role** button to perform a comparison between the two profiles. If there are no defined profiles for the selected person or role, the system displays a message indicating that the process is unavailable.

See “Setting Up Searches” (PeopleSoft Human Resources Manage Profiles).

- **Ratings Box**

This tab enables you to view and edit all of the rating boxes defined for the succession plan for any previously rated candidates. There can be up to 3 rating boxes defined for a succession plan.

Related Succession Plans

This region of the Succession 360 page displays any succession plans in the system related to the person, position, or job code specified in the organization chart region of the page.

For persons in focus, the grid displays succession plans, if available, for the role the person holds.

For position in focus, the grid displays succession plans, if available, for either a job code associated with the focus position or an incumbent of the position.

For a job code in focus, the grid displays succession plans, if available, for either a position associated with the focus job code or an incumbent of the job code.

Reviewing Career Summaries

This topic lists the pages used to review career summaries.

Pages Used to Review Career Summaries

| <i>Page Name</i> | <i>Definition Name</i> | <i>Navigation</i> | <i>Usage</i> |

| Compensation | COMP_SUMMARY | <ul style="list-style-type: none"> • Organizational Development > Succession Planning > Review Career Summaries > Compensation • Organizational Development > Succession Planning USF > Review Career Summary Info > Compensation | Review employee compensation history. |
| Training | TRN_STUDNT_CRS_SUM | <ul style="list-style-type: none"> • Organizational Development > Succession Planning > Review Career Summaries > Training • Organizational Development > Succession Planning USF > Review Career Summary Info > Training | Review employee training history. |

Running Succession Reports

This topic provides an overview of succession planning reports and describes the pages used to run Succession Planning reports.

Understanding Succession Reports

The summary metrics in Succession Planning reports enable administrators to see key people or roles that are in line for succession planning and identify key persons or roles that require succession plans. This enables organizations to define activities and strategies to search for and select the best candidates for person and role-based succession plans.

Key Person/Job Codes/Positions

The Key Person/Job Codes/Positions page enables you to create the following reports:

- Plans for Key Entities, people, positions, and job codes
- Projected Vacancy for Key People
- Risk of Leaving for Key People

The Plans for Key Entities report tracks the status of succession plans for key people, key job codes, or key positions, as of the report date.

The Projected Vacancy for Key People report provides information about projected vacancies, career readiness information for a key employee or person's next job code or position, and the availability of successors to fill their projected vacancy.

The Risk of Leaving for Key People report enables managers and administrators to view the likelihood of key people leaving and impact of their loss on the organization. The system also indicates whether there are any possible successors to replace key employees with a high risk of leaving.

Talent Pool Readiness

The Talent Pool Readiness report displays all of the active members of an active talent pool. Changing the filters for the report enables managers and administrators to evaluate various talent pool readiness values.

Talent Pool Ratings Box Assignments

The Talent Pool Ratings Box report displays a box rating assignment summary of talent pool members for a given talent pool.

Pages Used to Run Succession Reports

| <i>Page Name</i> | <i>Definition Name</i> | <i>Navigation</i> | <i>Usage</i> |
|------------------------------------|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Key Person/Job Codes/ Positions | HR_SUCC_METRICS1 | Organizational Development > Succession Planning > Reports > Person/Job Code Position Rpt > Key Person/Job Codes/Positions | View candidates for hierarchical-based succession planning, and identify key entities that require succession plans. |
| Talent Pool Readiness | HR_TPOOL_METRIC1 | Organizational Development > Succession Planning > Reports > Talent Readiness Report > Talent Pool Readiness | Displays the people assigned to an active talent pool and enables managers and administrators to evaluate various readiness values. |
| Talent Pool Ratings Box | HR_TPOOL_RATE1 | Organizational Development > Succession Planning > Reports > Active Talent Pool Report | Displays a box rating assignment summary of talent pool members for a given talent pool. |

Key Person/Job Codes/Positions Page

Use the Key Person/Job Codes/Positions page (HR_SUCC_METRICS1) to view candidates for hierarchical-based succession planning, and identify key entities that require succession plans.

Navigation:

Succession Planning > Reports > Person/Job Code Position Rpt > Key Person/Job Codes/Positions

Succession Planning Self-Service

PeopleSoft delivers a manager self-service succession planning dashboard that allows managers to view and manage the succession planning information for their direct and indirect reports. The manager self-service succession dashboard supports the following views:

- View Succession Plans.
- View Person Profile Summaries.
- View successors and succession readiness levels, risk of leaving and impact of loss.

- Re-rank successors.
- Activate and deactivate successors.
- Compare an employee's person profile with their current role's profile.
- Compare a successors' profile to a succession plan's incumbent, job code or position
- Edit successor rating box assignments.

Career and Succession Planning Tile

The Talent administrators use the Career and Succession Planning tile to access a collection of Career and Succession Planning components.

Navigation:

The Career and Succession planning tile is delivered as part of the Talent Administration home page, but the location can change if you change the delivered home pages or if administrators personalize their home pages

This example illustrates the Career and Succession Planning tile for the tablet.

This example illustrates the Career and Succession Planning tile for the smartphone.

Click the Career and Succession Planning tile to access the Career and Succession Planning application start page.

This example illustrates the Career and Succession Planning application start page for the tablet.

A screenshot of the "Career and Succession Planning" application interface on a tablet. The top navigation bar is dark blue with the title "Career and Succession Planning" and icons for home, search, notifications (3), menu, and a "New Window" button. The left sidebar is light gray with a "Talent Administrator" header. It contains two main sections: "Position Management" with sub-items "Person Profiles", "Key Positions", and "Position Profile"; and "Career Planning" with sub-items "Career Planning" and "Succession Planning". The main content area is white and titled "Person Profiles". It includes a search instruction: "Enter any information you have and click Search. Leave fields blank for a list of all values." Below this are buttons for "Find an Existing Value" and "Add a New Value". A "Search Criteria" section contains dropdown menus for "Empl ID:", "Profile Type:", "Name:", "Last Name:", and "Alternate Character Name:", each with a "begins with" dropdown and a text input field. There are checkboxes for "Include History", "Correct History" (checked), and "Case Sensitive". At the bottom of the search section are buttons for "Search", "Clear", "Basic Search" (with a magnifying glass icon), and "Save Search Criteria". At the very bottom of the main content area are links for "Find an Existing Value" and "Add a New Value".

This example illustrates the Career and Succession Planning application start page for the smartphone.

This application start page is a navigation collection that enables administrators to access frequently-used Career and Succession Planning components from one location. The left panel of this page lists the components collected under three categories:

- Position Management
- Career Planning
- Succession Planning

The right panel displays the component selected in the left panel.
