1 Introduction

Overview of Security Reference

If you are an IT Security Manager, this guide is for you. Use the reference information for implementing security for an offering in Oracle Applications Cloud. Depending on the needs of your enterprise, determine what works best for your offering, and make the required configuration changes.

Broadly, the reference information includes these details:

- Abstract and job roles for an offering
- Duty roles and the role hierarchy for each job role and abstract role
- Privileges that are required to perform duties defined by a duty role
- Data security policies for each job role or abstract role
- Policies that protect personally identifiable information

To know more about the roles, privileges, and policies and to learn how to implement and administer security for your offering, refer to your product security guide.

How to Use This Guide

You can review the information in this guide to decide how to assign roles and privileges to specific users. For each role, you will find these details:

- The role hierarchy that lists the other inherited roles
- A list of duties assigned to that role
- Privileges granted to that role
- Data security policies and their implementation scope

Note: The changes you make to the security reference implementation are preserved during upgrades or maintenance patches.

Risk Management Offering

This guide describes the security reference implementation for the Risk Management offering.

There is a set of common roles that are required to set up and administer an offering. For information about these common roles, see the Oracle Applications Cloud Security Reference for Common Features guide.

Advisory Note on Subscription Impact

Assigning predefined roles and privileges as is to users may impact subscription usage, even if you haven't purchased the subscription. Privileges that are assigned but remain unused can still account for subscription consumption.

Before you assign predefined roles with privileges, evaluate the business needs of your users. Do your users need the entire role and all its privileges in full scope? Or, do they need the role but only a few of its privileges? Evaluating what your users need will help you avoid potential security risks and also keep a check on the subscription consumption.

If you want users to have the predefined role in full scope and have purchased all the impacted cloud services, you can assign the role with privileges as is. For example, only while setting up an application, you may need to assign the predefined Application Implementation Consultant role as is. Once the setup is complete, you can unassign it. Otherwise, Oracle recommends that you make a copy of that predefined role, remove the privileges you don't need, and assign only the required privileges. For a list of all predefined roles with privileges that impact subscription usage, see the spreadsheet [Predefined Roles with Subscription Impact](#). To give you an example, here's an indicative list of the top three roles that impact subscription usage:

- Employee (ORA_PER_EMPLOYEE_ABSTRACT)
- Application Implementation Consultant (ORA_ASM_APPLICATION_IMPLEMENTATION_CONSULTANT_JOB)
- Contingent Worker (ORA_PER_CONTINGENT_WORKER_ABSTRACT)

For insights into how Oracle measures and counts Oracle Fusion licenses, see [Metrics Description for Fusion Offerings](#)

2 What's New

Overview

This release of the offering includes new job roles, abstract roles, duties, aggregate privileges, or privileges.

New Aggregate Privileges

This table lists the new aggregate privileges for the Risk Management offering.

Aggregate Privilege	Description
Create Mass Check-Ins By Manager	Allows managers to mass create check-in documents
Manage Risk Intelligent Agent	Allows management and testing of Risk Management intelligent agents, tools and documents.
Request Assignment Change By Worker	Allows workers to request change to their assignment.

New Privileges

This table lists the new privileges for the Risk Management offering.

Granted Role	Privilege	Description
Algorithm Data Synchronization	Manage Risk Management Data Integration Configurations	Allows for the setup and management of external data sources.
Contingent Worker	Request Deletion of Time Entries	Allows workers to request deletion of time entries.
Employee	Access My Wellness, Corporate Social Responsibility, and Personal Brand	Allows employees to manage Wellness, Corporate Social Responsibility, and Personal Brand activities.
Employee	Request Deletion of Time Entries	Allows workers to request deletion of time entries.

Granted Role	Privilege	Description
Line Manager	Access Team Wellness, Corporate Social Responsibility, and Personal Brand	Allows line managers to manage team's Wellness, Corporate Social Responsibility, and Personal Brand activities.
Line Manager	Use REST Service - Peer Salary Percentiles Read Only	Allows the user to call the GET methods associated with the peer salary percentiles REST Service.
Product Search	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Risk Management Security Administrator	Edit Algorithm Tasks	Allows for the editing of access, transaction, and change tracking algorithm task results.
Risk Management Security Administrator	Edit Algorithms	Allows for the editing of access, transaction, and change tracking algorithms.
Risk Management Security Administrator	View Algorithm Tasks	Allows for the viewing of access, transaction, and change tracking algorithm task results.
Risk Management Security Administrator	View Algorithms	Allows for the viewing of access, transaction, and change tracking algorithms.
View Item Redwood	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.

3 Roles

Access Certification Administrator (Job Role)

Individual responsible for all aspects of configuration and managing access certifications.

Role Hierarchy

The Access Certification Administrator job role directly and indirectly inherits these roles.

- Access Certification Administrator
 - Access Certification Certifier
 - Access Certification Configuration and Maintenance
 - Access Certification Manager
 - Access Certification Owner
 - Access Certification Transaction Analysis
 - Access Certification Viewer
 - Risk Management Folder Reporting
 - Upload data for GRC Attachments

Duties

This table lists the duties assigned directly and indirectly to the Access Certification Administrator job role.

Duty Role	Description
Access Certification Certifier	The Access Certification Certifier is responsible for managing the certification of a set of role and user combinations grouped into worksheets.
Access Certification Configuration and Maintenance	The administrator is responsible for initial configuration of the application, and for continued maintenance and support of data security policies.
Access Certification Manager	The Access Certification Manager is responsible for managing the completion of a set of worksheet certifications.
Access Certification Owner	The Access Certification Owner is responsible for defining new certifications and for managing the certification process until it is finalized.

Duty Role	Description
Access Certification Transaction Analysis	BI duty role to analyze Access Certification transactional information.
Access Certification Viewer	Individual who can view certifications.
Risk Management Folder Reporting	Grants access to the Risk Management web catalog folder.
Upload data for GRC Attachments	Allows to upload data file to import GRC attachments.

Access Request Security Administrator (Job Role)

Individual responsible for managing access provisioning requests.

Privileges

This table lists privileges granted to duties of the Access Request Security Administrator job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	Access Requests	Allows user to submit requests for themselves or on behalf of others.
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	Administer Access Requests	Allows user to administer and approve access requests.
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	Manage Data Access for Users	Manage data access for user provisioned roles.
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	Manage Procurement Agent by REST Service	Allows management of procurement agents using the REST service.
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	Perform Manual Access Removals	Allows security administrator to perform manual access removals and approve removal requests.
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	Review Access Requests	Allows user to review role requests that have been specifically assigned to them.
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	View Access Removals	Allows user to view manual and automated removal requests.
Access Request Security Administrator	Individual responsible for managing access provisioning requests.	View Access Requests	Allows user to view all requests submitted.

Advanced Access Controls Analyst (Job Role)

Individual responsible for managing and auditing enterprise advanced access controls.

Role Hierarchy

The Advanced Access Controls Analyst job role directly and indirectly inherits these roles.

- Advanced Access Controls Analyst
 - Access Control Manager
 - Access Control Manager Viewer
 - Access Incident Results Manager
 - Access Incident Results Manager Viewer
 - Access Model Manager
 - Access Model Manager Viewer
 - Access Provisioning Rules Manager
 - Advanced Access Control Model Transaction Analysis
 - Advanced Access Control Transaction Analysis
 - Advanced Controls Administrator
 - Manage Advanced Controls REST Services
 - Risk Management Folder Reporting
 - Upload data for GRC Attachments

Duties

This table lists the duties assigned directly and indirectly to the Advanced Access Controls Analyst job role.

Duty Role	Description
Access Control Manager	The access control manager is responsible for defining and managing controls and user-defined access points in Advanced Controls.
Access Control Manager Viewer	View access controls and user-defined access points in Advanced Controls.

Duty Role	Description
Access Incident Results Manager	The access incident results manager is responsible for review, remediation, and running simulations of incidents in Advanced Controls.
Access Incident Results Manager Viewer	View access incident results and simulations in Advanced Controls.
Access Model Manager	The access model manager is responsible for defining and managing models, entitlements, global conditions, and user-defined access points in Advanced Controls.
Access Model Manager Viewer	View access models, entitlements, and global conditions in Advanced Controls.
Access Provisioning Rules Manager	Allows access to define provisioning rules and perform role analysis.
Advanced Access Control Model Transaction Analysis	BI duty role to analyze Advanced Access Control Models transactional information.
Advanced Access Control Transaction Analysis	BI duty role to analyze Advanced Access Controls transactional information.
Advanced Controls Administrator	Defines and manages setup and administration tasks for Advanced Controls.
Manage Advanced Controls REST Services	Manages access to REST Services for Advanced Controls.
Risk Management Folder Reporting	Grants access to the Risk Management web catalog folder.
Upload data for GRC Attachments	Allows to upload data file to import GRC attachments.

Risk Administrator (Job Role)

Individual responsible for performing risk administration duties.

Role Hierarchy

The Risk Administrator job role directly and indirectly inherits these roles.

- Risk Administrator
 - Access Certification Transaction Analysis

- Advanced Access Control Transaction Analysis
- Advanced Controls Administrator
- Advanced Financial Control Transaction Analysis
- Algorithm Data Synchronization
- Financial Reporting Compliance Transaction Analysis
- Manage Risk Intelligent Agent
- Perspective Manager
- Risk Management Administrator
- Risk Management Folder Reporting
- Risk Management Security Administrator
- Risk Management Security Viewer

Duties

This table lists the duties assigned directly and indirectly to the Risk Administrator job role.

Duty Role	Description
Access Certification Transaction Analysis	BI duty role to analyze Access Certification transactional information.
Advanced Access Control Transaction Analysis	BI duty role to analyze Advanced Access Controls transactional information.
Advanced Controls Administrator	Defines and manages setup and administration tasks for Advanced Controls.
Advanced Financial Control Transaction Analysis	BI duty role to analyze Advanced Financial Controls transactional information.
Algorithm Data Synchronization	Performs data synchronization tasks to support algorithms for Risk Management.
Financial Reporting Compliance Transaction Analysis	BI duty role to analyze Financial Reporting Compliance transactional information.
Perspective Manager	Views, creates, and edits perspective hierarchies.
Risk Management Administrator	Defines and manages setup and administration tasks for Risk Management.
Risk Management Folder Reporting	Grants access to the Risk Management web catalog folder.
