Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

1. Preface

1.1 Introduction

This document helps you get acquainted with the information on inter-connecting Oracle Banking Retail and SME Lending Cloud Service (OBRSL) with Oracle Banking Liquidity Management (OBLM).

Besides this user manual, while maintaining the interface related details, you can invoke the context sensitive help available for each field in OBRSL. This help describes the purpose of each field within a screen. You can obtain this information by placing the cursor on the relevant field and striking the <F1> key on the keyboard.

1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office data entry Clerks	Input functions for maintenance related to the interface
End of day operators	Processing during end of day
Implementation Teams	For setting up integration

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Critical Patches

Oracle advises customers to get all their security and vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.5 Organization

This chapter is organized into following chapters:

Chapter	Description
Chapter 1	<i>Preface</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Oracle OBRSL - OBLM Integration</i> explains the integration between Oracle FLEXCUBE Universal Banking and Oracle Banking Liquidity Management.

1.6 Acronyms and Abbreviations

Abbreviation	Description
System	Unless and otherwise specified, it always refers to Oracle Banking Retail and SME Lending Cloud Service
OBRSL	Oracle Banking Retail and SME Lending Cloud Service
OBLM	Oracle Banking Liquidity Management
Source System	Oracle Banking Retail and SME Lending Cloud Service (OBRSL)
GI	Generic Interface

1.7 Glossary of Icons

This user manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

1.8 Related Information Sources

Along with this user manual you may also refer the following related resources:

- CASA User Manual
- User Defined Fields User Manual

2. Oracle OBRSL - OBLM Integration

The integration between the Oracle Banking Retail and SME Lending Cloud Service (OBRSL) and Oracle Banking Liquidity Management (OBLM) enables the financial institutions to get value dated balance or credit-debit turnover for given set of accounts that participate in Liquidity Management.

This chapter contains the following sections:

- [Section 2.1, "Scope"](#)
- [Section 2.2, "Prerequisites"](#)
- [Section 2.3, "Integration Process"](#)
- [Section 2.3, "Integration Process"](#)
- [Section 2.4, "Assumptions"](#)

2.1 Scope

This section describes the scope of the integration with respect to OBRSL and OBLM.

This section contains the following topics:

- [Section 2.1.1, "Fetching Value Dated Balance through Webservice"](#)
- [Section 2.1.2, "Generating Balance Report at EOD through GI Batch"](#)

2.1.1 Fetching Value Dated Balance through Webservice

You can fetch the value dated balance or credit-debit turnover through a webservice by providing the account details, balance type and value date.

2.1.2 Generating Balance Report at EOD through GI Batch

You can generate a balance file at EOD for all the accounts that participate in the Liquidity Management. This file will be uploaded into the OBLM system for reconciliation.

2.2 Prerequisites

Set up Oracle FLEXCUBE Universal Banking Application and Oracle Global Liquidity Management Application.

Refer the 'Oracle FLEXCUBE Universal Banking Installation' manual.

2.3 Integration Process

This section contains the following topic:

- [Section 2.3.1, "Fetching Value Dated Balance"](#)
- [Section 2.3.2, "Generating EOD Batch at EOD"](#)

2.3.1 Fetching Value Dated Balance

You have to specify the account number, transaction date and balance type to query the value dated balance for a particular account.

You can specify the balance type as 'VDBALANCE' or 'DRCRTURNOVER'. If the balance type is VDBALANCE then value dated balance will be returned. If the balance type is DRCRTURNOVER, then the sum total of debit/credit will be returned.

2.3.2 Generating EOD Batch at EOD

You can create a GI Batch to be run at EOD which will generate a balance file at branch EOD for all the accounts that participate in Liquidity Management.

You can create a UDF check box in User Defined Fields Maintenance (UDDUDFMT) screen and link it to Customer Accounts Maintenance (STDCUSAC) using UDDFNMPPT. This check box should be enabled for all the accounts that participate in liquidity management.

2.4 Assumptions

Liquidity management should be enabled for the Customer Accounts, then GI will pick them up during EOD batch.
