U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are “commercial computer software” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Table of Contents

- 1. **PREFACE 1-1**
 - 1.1 INTRODUCTION..... 1-1
 - 1.2 AUDIENCE..... 1-1
 - 1.3 DOCUMENTATION ACCESSIBILITY 1-1
 - 1.4 ORGANIZATION 1-1

- 2. **REST API SERVICES - OVERVIEW 2-1**
 - 2.1 INTRODUCTION..... 2-1
 - 2.1.1 *Rest HTTP Headers* 2-2
 - 2.2 REST SERVICES CHANGES 2-2

1. Preface

1.1 Introduction

This User Guide is intended to familiarize you with the light-weight REST-based services of Oracle Banking Retail and SME Lending Cloud Service. The manual gives you an overview of the services developed, input/request parameters, and the response of each REST service.

1.2 Audience

The manual is intended for integrating external systems to Oracle Banking Retail and SME Lending Cloud Service using the RESTful framework.

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Organization

The manual is organized into the following chapters

<u>Chapter</u>	<u>Description</u>
Chapter 1	<i>Preface</i> - Gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Rest API - An Overview</i> provides a snapshot of the features of the entire module.

2. Rest API Services - Overview

2.1 Introduction

Oracle Banking Retail and SME Lending Cloud Service has adopted the industry standard of providing light-weight services through Representational State Transfer (popularly known as REST) services. These lightweight services support the current trend of mobile/tablet-based applications. These services help to improve the response time for tablet/mobile applications, as these applications are very chatty, involve numerous hits to the server, and the expected response time is minimal for each of the requests.

The REST/Fine-grain services using GET methods are listed below:

1. Customer, Customer Accounts
2. Loan accounts for a customer
3. Loan account balance
4. Loan installment/EMI details
5. Loan account Principal balance
6. Loan guarantor details
7. Loan security details
8. Corporate deposit details
9. Credit Card
10. Standing Instructions
11. Currency Exchange Rates

More information on the above-listed services can be found in the respective sections of the User manual.

Each of the services listed above will be a URL. These URLs can be tested using any of the available browser plug-ins, like Postman, RestEasy, etc. Also, these services can be integrated with an API manager, depending on its use. Below is the format of a Get account balance service example, which will take the customer account number and branch code as input

[http://\(IP\):\(Port\)/AccountBalanceService/AccountBalance/QueryAcctBal/brhcode/{brhcode}/custAcNo/{custAcNo}](http://(IP):(Port)/AccountBalanceService/AccountBalance/QueryAcctBal/brhcode/{brhcode}/custAcNo/{custAcNo})

The input for the GET services is passed as a part of the URL and if more than one input needs to be passed they should be separated by a forward slash (/). Apart from passing the customer number as a part of the URL, the services also expect a few header parameters to be passed to the service. The following are the header parameters passed:

1. userId : Flexcube UBS login user Id
2. branch : The bank branch to which the user belongs
3. msgId : A alphanumeric input from the consumer
4. source : Source of the request whether it is FCUBS or an external system
5. Content-Type: This mentions the format of the input /output. Since we are using the JSON format we will give the content-type as application/json.
6. Entity : Entity ID

UserId, password and msgId are for authenticating the user accessing the service. More information on authentication can be found under Section 2.

The list of services will be discussed in detail in the following chapters.

2.1.1 Rest HTTP Headers

The following are the headers that are expected in all the requests that are sent to the Rest API application.

1. userId - Oracle FLEXCUBE UBS login user name.
2. password – Encrypted Oracle FLEXCUBE UBS login password.
3. msgId –This message ID will be a unique ID to identify the request.
4. branch – The branch code from where the request is sent.
5. source – The source code of the external system.

2.2 Rest Services Changes

Support for Rest Services is enhanced to all modules of Oracle Banking Retail and SME Lending Cloud Service.

Fine grained services are introduced as part of the new release, which caters to niche requests

List of services enabled

Rest_Services.xlsx

The document attached will have the services introduced newly along the existing services.

Rest Documentations

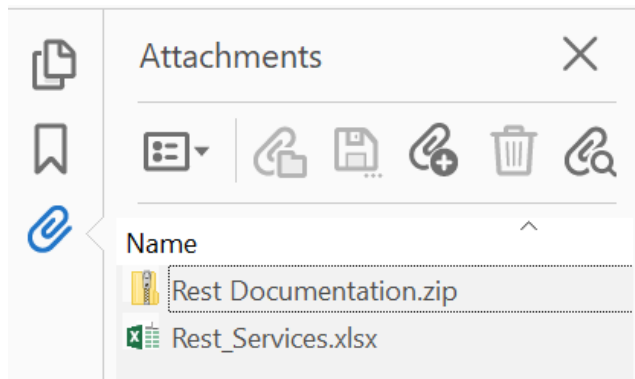

Rest
Documentation.zip

Perform the following steps to view the **Rest_Services.xlsx** and **Rest Documentaion.zip** attachments:

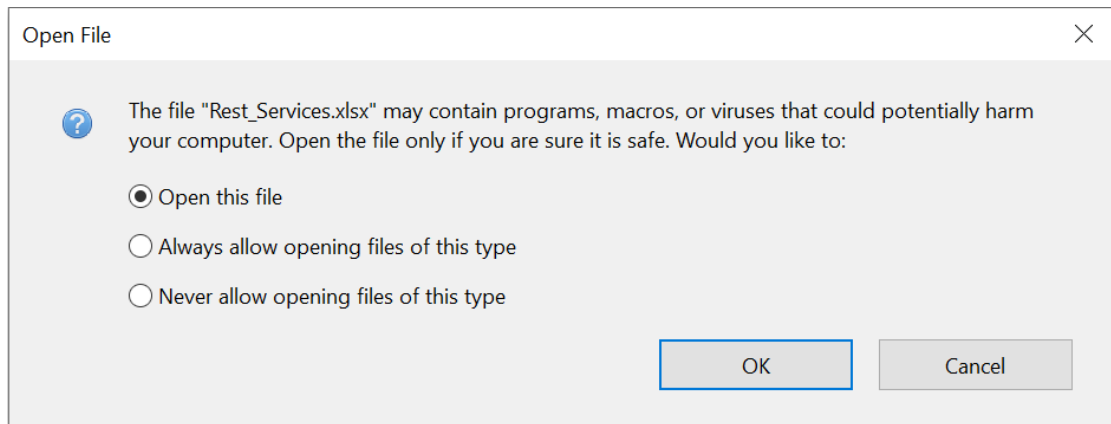

1. Download the **Rest API Services User Guide** to local drive or desktop.
2. Open the **Rest API Services User Guide** pdf.

Note: It is recommended to open the document in Adobe Acrobat Reader.

3. Click  icon on the left pane of the opened document.
 - Under the **Attachments** column, all attached files are displayed.

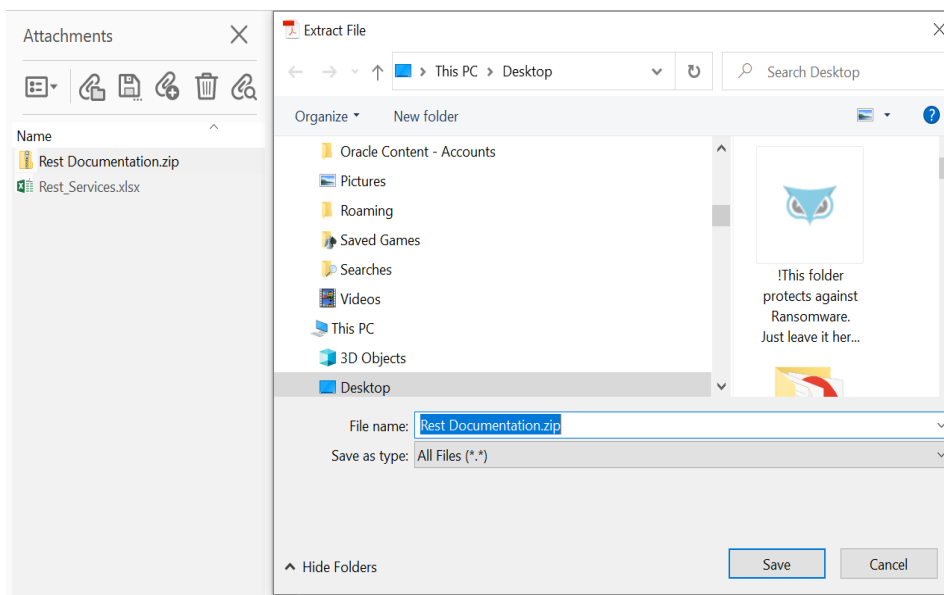

4. On the Attachments pane, right-click on the attachment, and click **Open Attachment** option.
 - The **Open File** window is displayed.

5. In the **Open File** window, select the **Open this file** option, and click **OK**.
 - The selected attachment is opened in a pre-defined file format such as Excel, Zip, etc.

Perform the following steps to download or save the **Rest_Services.xlsx** and **Rest Documentaion.zip** attachments:

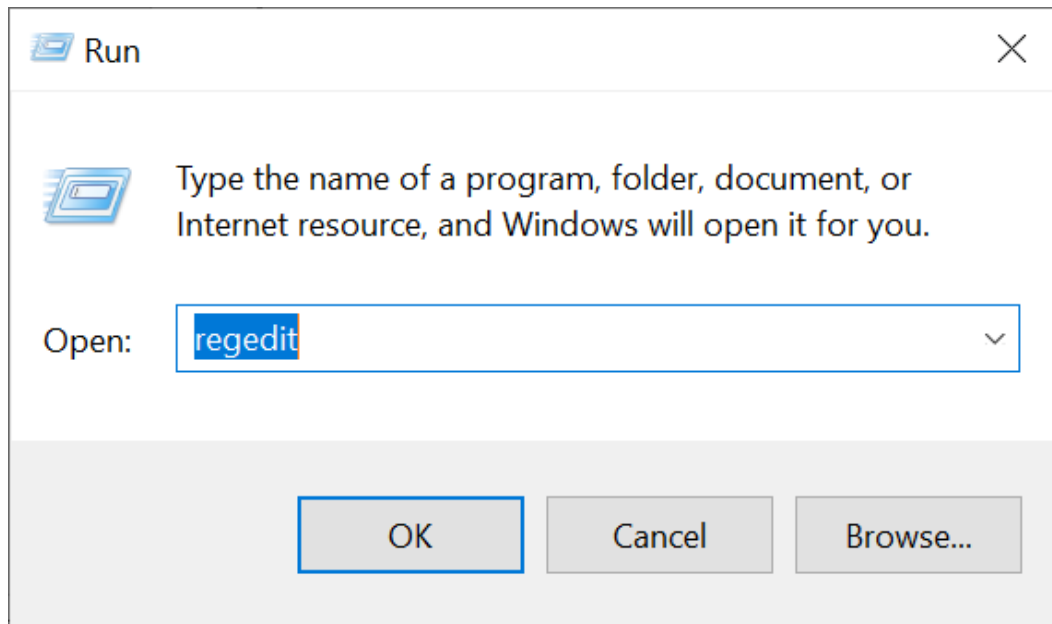

1. Under the **Attachments** column, right-click on the attachment to be saved and click the **Save Attachment** option.
 - **Extract File** window is displayed.
2. Select the destination folder and click **Save**.

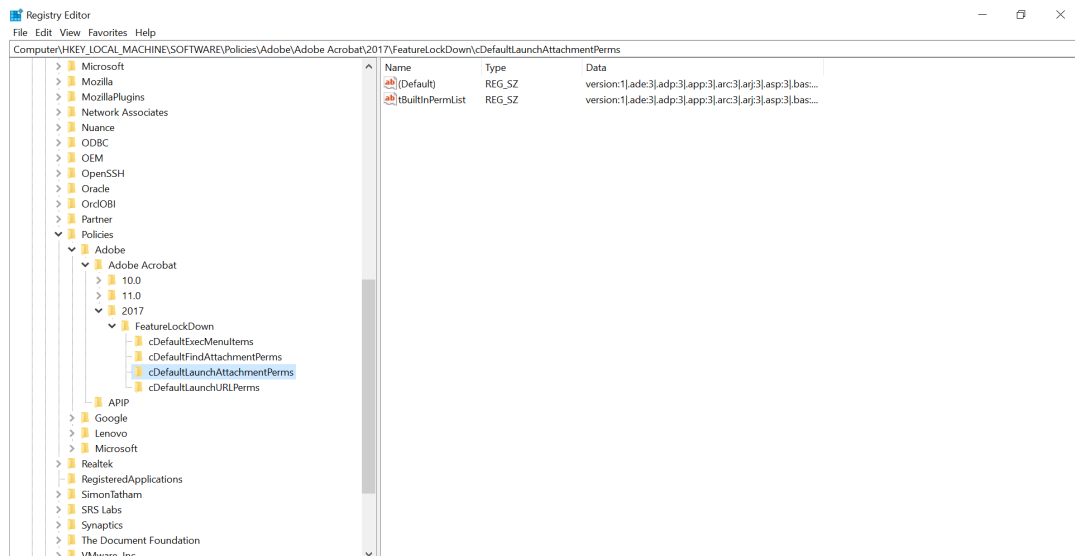

Troubleshooting Steps:

If you are unable to open the **Rest Documentaion.zip** attachment, refer to the following steps:

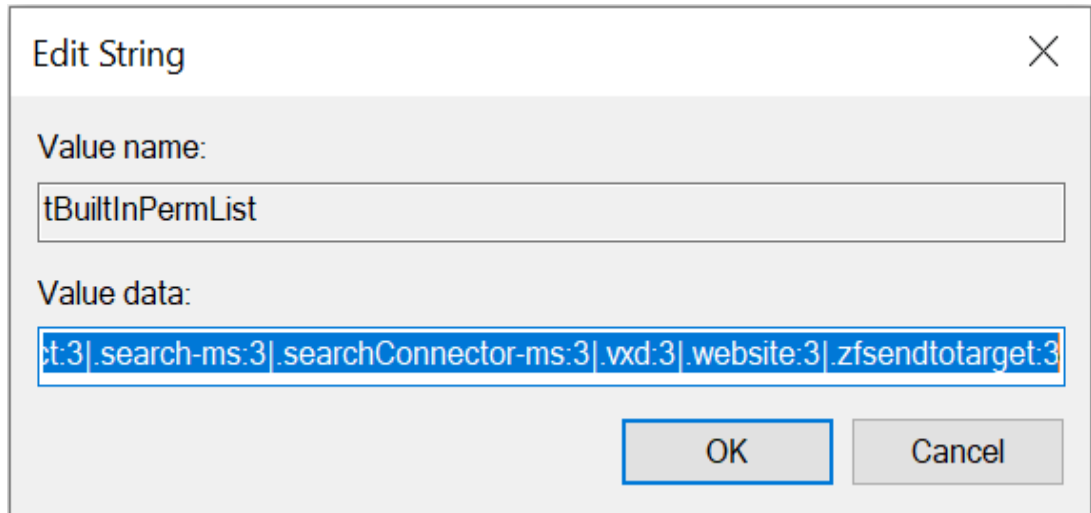

1. Open the **Run** application from the **Start** menu.
 - The **Run** pop-up window is displayed.
2. Type **regedit** into the **Open** box and click **OK**.

- The **User Account Control** window is displayed.
- 3. On **User Account Control** window, click **Yes** to allow the **Registry Editor** application to make changes to the device.
- The **Registry Editor** application is displayed.
- 4. Navigate to the following registry key:
HKEY_LOCAL_MACHINE\software\policies\adobe\AdobeAcrobat\DC\Feature LockDown\cDefaultLaunchAttachmentPerms

- 5. Double-click on **tBuiltInPermList**.
- The **Edit String** pop-up window is displayed.

- In the **Value Data** field, locate the .zip file type extension and change the subsequent number to **1**.
