Third-Party Content, Products, and Services Disclaimer

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

About this Document

This document lists and describes various features in Oracle Revenue Management and Billing which can be used in the financial services domain. It describes all screens related to these features and explains how to perform various tasks through these screens.

Intended Audience

This document is intended for the following audience:

- End-users
- System Administrators
- Consulting Team
- Implementation Team
- Development Team

Organization of the Document

Each banking feature is described in a separate chapter in this document. All screens related to the feature and tasks related to the screen are explained in each chapter. This document contains the following chapters:

Chapter Number	Chapter Name	Chapter Description
Chapter 1	Leveraging User Experience Features	Describes various features that enhance the user experience.
Chapter 2	Customer Registration	Describes how to create a person and account through a customer registration object.
Chapter 3	Customer 360° View	Explains how to view in-depth information about the person or account in the **Customer 360° View** screen. It also explains how to view the enrolled products, effective price assignments, and effective price list assignments of a person or account. In addition, it explains how to view the detailed information about the bill.
Chapter 4	Customer 360° Dashboard	Provides information about the comprehensive, real-time, and interactive view of the customer's profile, financials, product and pricing, billing and payments, disputes, and deals using the **Customer 360° Dashboard** screen.
Chapter 5	Account 360° Dashboard	Provides information about the comprehensive, real-time, and interactive view of the account's profile, financial's, product and pricing, billing and payments, disputes and adjustments, and deals using the **Account 360° Dashboard** screen.
Chapter 6	Billing Dashboard	Provides comprehensive details about the billing and collection status for a selected billing period.

Chapter Number	Chapter Name	Chapter Description
Chapter 7	Invoicing Group	Describes the invoicing group and explains how to create a master account. It also explains how to add or remove a member from a master account.
Chapter 8	Pricing Management	Explains the different concepts of the pricing model supported in the application. It explains how to define a parameter, price item, price list, tiering criterion, variance parameter, and person to person relationship type sequence. It also explains how to define pricing for a price item, how to assign a price item to a person, account, or price list, and how to assign a price list to a person or account.
Chapter 9	Division	Describes the different types of division. It also explains how to define a division.
Chapter 10	Approval Workflow	Describes the approval workflow process and explains how to perform various tasks involved in the process. It explains how to implement the approval workflow process for an entity, such as account, person, and so on. It explains how to define an approval workflow group, approval workflow chain, approval workflow criterion type, approval workflow group chain linkage, approval workflow reasons, and approval workflow settings.
Chapter 11	Multi-Currency Accounts	Lists and describes the business processes that are enhanced to implement the multi-currency accounts feature.
Chapter 12	Rules Engine	Describes how the rules engine function. It explains how to define, execute, and maintain business rules separately from the application code.
Chapter 13	Alternate Sequential Bill Numbers	Explains how to generate alternate sequential bill numbers which are either unique throughout the system or within the division.
Chapter 14	Currency Conversion	Lists and describes the business processes where the currency conversion feature can be enabled in the system. It explains how to enable the currency conversion feature for each business process. It also explains how to create different types of exchange rates in the system.
Chapter 15	Transaction Feed Management	Describes the transaction feed management process and its sub-processes. It explains how to execute each sub-process. It also explains how to view the details of various transactions uploaded in the system. In addition, it explains how to create a transaction source, transaction record type, transaction aggregation rule, aggregation schedule, and disaggregation request.
Chapter 16	On Demand Billing	Explains how to generate adhoc bills using the on demand billing process. It explains how to create a file type and file group, how to upload a usage data file, how to generate adhoc bills for a file group, and how to freeze the adhoc bills of a file group.
Chapter 17	Upload Validated Payment Data	Explains how to upload and validate the payment records before you move them to the staging area. It also explains how to create payment events and payments using the validated payment records.
Chapter 18	Freeze Payments on Notification	Explains how the system freezes or cancels the automatic payments, voids the refund requests and cancels the refund

Chapter Number	Chapter Name	Chapter Description
		adjustments when the review comments are received from the auto clearing house.
Chapter 19	Construct	Describes the construct based billing and settlement feature. It explains how to create templates and different types of constructs, such as invoice construct, invoice and settlement construct, and settlement construct. It also explains how to view the billing and settlement hierarchy of a person or account.
Chapter 20	Trial Billing	Explains how to generate trial bills before the actual bill is generated for an account. It also explains how to view the trial bills in the system.
Chapter 21	Bill Tolerance	Explains how to define the tolerance limit for the bill amount. It also describes how the system behaves when the difference between the previous and current bill amount exceeds the positive or negative tolerance limit.
Chapter 22	GL Account Validation	Explains how to enable the static or dynamic GL account validation feature.
Chapter 23	Upload Validated Adjustment Data	Explains how to validate and upload an adjustment data file and create adjustments through an adjustment upload request.
Chapter 24	Foreign Exchange Gain Loss	Explains how the system calculates the foreign exchange gain loss on the payment and adjustment financial transactions.
Chapter 25	Payment Request	Explains how to create or transfer payments through a payment request.
Chapter 26	Account Receivable Central	Explains how to use the **Account Receivable Central** screen to search for a bill which you need to offset against another bill. It explains how to perform single, mass, and cross currency offset against one or more bills. It also enables you to create a hold request, refund request, write off request, and dispute request through this screen.
Chapter 27	Offset Request	Explains how to offset the bill's outstanding amount against one or more bills through an offset request. It explains how to create the offset request types and offset requests in the system.
Chapter 28	Funding Request	Describes how to change the automatic payment amount through the funding process. It explains how to create the funding request types and funding requests in the system.
Chapter 29	Hold Request	Describes how to hold some processes and/or bills at the account or person level for a time period through a hold request. It explains how to create the hold request types and hold requests in the system.
Chapter 30	Delinquency Central	Explains how to track the overdue processes of a delinquent account through the **Delinquency Central** screen. It also explains how to create a hold request, payment arrangement, and promise to pay for a delinquent account from this screen.
Chapter 31	Upload Request	Explains how to do the following through an upload request: • Update bill cycle of accounts • Update contract riders in contracts

Chapter Number	Chapter Name	Chapter Description
		• Create hold requests, refund requests, write off requests, or billable charges • Reinstate the policies • Create sort records for bill groups • Create derivation and pricing parameters for bill groups
Chapter 32	General Ledger (GL) Accounting Template	Describes how to override the distribution code used for creating FT GL entries using the **GL Accounting Template** feature. It explains how to create the GL accounting templates for each process and sub processes combination.
Chapter 33	Accrual	Describes how to calculate, create, and reverse accrual for accounts. It explains how to create the accrual cycles, accrual types, and accruals for the accounts in the system.
Chapter 34	Payment Agreement Request	Describes how to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. It explains how to create the payment agreement request types and payment agreement requests in the system.
Chapter 35	Dispute Request	Describes how to track and close a dispute against a particular bill, bill segment, and/or adjustment through a dispute request. It explains how to create the dispute request types and dispute requests in the system.
Chapter 36	Earning Credit Rate	Explains how to create the financial transaction distribution (ECR) object when the adjustment and/or bill segment financial transaction created against an ECR contract is frozen. It also explains how to distribute the credit or debit amount on the financial transaction distribution object to different accounts based on the distribution hierarchy.
Chapter 37	Deferred Revenue Recognition	Describes how to recognize the deferred revenue in the system. It explains how to create a deferred revenue recognition template for each distribution code and contract type combination. It also explains how to generate the schedule for a deferred revenue recognition. In addition, it explains how to edit the deferred revenue recognition schedule.
Chapter 38	Product Lifecycle Management	Describes the entire lifecycle of a product from inception to service and then to the retirement. It explains how to create various types of products, such as standard and packaged products. It explains how to create a product service, product, and product versions in the system. It also explains how to enroll an account for different types of products.
Chapter 39	Subscription Billing	Describes the service based billing wherein the customers pay a subscription price to have access to a product or service. It explains how to create the subscription types and subscriptions on the accounts.
Chapter 40	Mass Pricing Update	Describes how to update multiple price assignments of a person, account, price list, or product at the same time. It explains how to increase or decrease the rate in a price assignment or forcibly end date a price assignment through a mass pricing update request. It also explains how to create the mass pricing update request types and mass pricing update requests in the system.

Chapter Number	Chapter Name	Chapter Description
Chapter 41	Price Item, Parameter, and SQI Upload	Describes how to upload the price item, parameter, and SQI files through the **File Upload Interface** utility. It explains how information should be structured while uploading the price item, parameter, and SQI files in the XML or CSV format. It also explains how to define different file request types for adding or editing the price items, parameters, and SQIs in different formats.
Chapter 42	Product and Product Version Upload	Describes how to upload the product and product version files through the **File Upload Interface** utility. It explains how information should be structured while uploading the product and product version files in the XML or CSV format. It also explains how to define different file request types for adding or editing the products and product versions in different formats.
Chapter 43	Price List and Price Item Pricing Upload	Describes how to upload the price list and price assignment files through the **File Upload Interface** utility. It explains how information should be structured while uploading the price list and price assignment files in the XML or CSV format. It also explains how to define different file request types for adding or editing the price lists and price assignments in different formats.
Chapter 44	Invoice Request	Describes how to create adhoc regular and trial bills for an account through an invoice request. It explains how to create the invoice request types and invoice requests in the system.
Chapter 45	Refund/Write Off Request	Describes how to refund a payment or credit bill or bill line item and write off a debit bill or bill line item through a refund or write off request, respectively. It explains how to create the refund or write off request types and refund or write off requests in the system.
Chapter 46	Deal Pricing Management	Describes how to create deals for an existing customer, account, or prospect using various simulation types. It explains how to simulate, approve, finalize, and accept the deals. It also explains how to apply back or orchestrate the deal on customer onboarding.
Chapter 47	Relationship Manager Workbench	Describes how a relationship manager can obtain a holistic view of all its customers.
Chapter 48	Hold Request Creation, Modification, Release, and View Through Inbound Web Service	Lists various business services using which you can create, edit, and release a hold request and view the details of a hold request.
Chapter 49	Hold Direct Debit Instruction	Describes how to hold a direct debit (i.e. automatic payment) for a bill until the confirmation is received from the customer. It explains how to create the auto pay request types and auto pay requests in the system.
Chapter 50	Garbling Customer Information	Explains how to garble the personal information of a customer, such as the customer name, address, email ID, social security number or any other identifier, birth date, gender, and so on, on receiving the data erasure request from the customer.
Chapter 51	Deleting Inactive Customer or Closed Account Information	Explains how to delete all records of a person or account from the system.

Chapter Number	Chapter Name	Chapter Description
Chapter 52	Retail Banking Product Management	Explains how to maintain a variety of products and services for the retail banking domain.
Chapter 53	Retail Banking Product Inbound Web Services	Explains how to derive the eligible market product, offer, and bundle for a person or an account through an inbound web service. It also explains how to view the details of a retail banking product, market product, offer, and bundle through an inbound web service.
Chapter 54	Deal Pricing Management through Inbound Web Services	Explains how to manage prospects and deals through the inbound web services.
Chapter 55	Chatbot	Explains how the system provides digital assistance to the user to have conversational experiences with ORMB through text, chat, and voice interfaces.
Chapter 56	Billing Anomaly Detection with Artificial Intelligence (AI) and Machine Learning (ML)	Explains how to use machine learning to detect anomalies in the bills and bill segments before the bill completion.
Chapter 57	Automatic Refund	Explains how to create automatic refunds when a credit bill or a credit adjustment is created or when there is an overpayment.
Chapter 58	Reporting	Explains how to create reports in various formats using the Apache FOP (Formatting Objects Processor) framework. It also lists and describes various FOP reports that are shipped with the product.
Chapter 59	Invoice Extract in UBL Format	Describes how to extract the invoices in the Universal Business Language (UBL) format using the Extract Template feature.
Chapter 60	Bill Correction	Explains a robust bill correction model through which you complete the end-to-end bill correction process from the existing bill cancellation to the new bill generation.
Chapter 61	Transaction Anomaly Detection	Explains machine learning techniques to analyze historical transaction data and detect anomalies within current datasets for preventing fraud and ensuring security in transactions.
Appendix A	Most Commonly Used Tasks	Lists and describes some of the common tasks that you may perform while using the application.
Appendix B	Administration	Describes how to create UI maps and set various feature configurations in the system.

Conventions

The following conventions are used across this document:

Convention	Meaning
boldface	Boldface indicates graphical user interface elements associated with an action, or terms defined in the text.
italic	Italic indicates a document or book title.
`Monospace`	Monospace indicates information that an end-user needs to enter in the application.

Related Documents

You can refer to the following documents for more information:

Document Name	Description
Oracle Revenue Management and Billing Version 26.1.0.0.0 Release Notes	Lists the new features and enhancements made in this release. It contains high-level information about the supported platforms, framework upgrade, supported upgrades, unsupported integrations, and media pack downloads. It also lists the discontinued features, bug fixes, and known issues in this release.
Oracle Revenue Management and Billing Version 26.1.0.0.0 Release Overview Guide	Describes the new features, enhancements, user interface level changes, and database level changes made in this release. The new features and enhancements are classified under three categories – Generic (which is intended for both domains), Financial Services, and Insurance. It lists and describes enhancements made in the framework. It also encloses the ORMB and OUAF deprecation notices and enables you to access the product documentation.
Oracle Utilities Application Framework Business Process Guide	Explains how to get acquainted with the user interface. It explains the different types of pages or portals that you may come across in the application. It explains how to set the user preferences and how to create, manage, assign, and complete a To Do in the application. It also explains how to submit reports and view historic reports in the application.
Oracle Utilities Application Framework Administrative Guide	Explains the general, security, user, designing, developing, and scripting options available in Oracle Utilities Application Framework (OUAF). It describes the user interface, database, configuration, and reporting tools available in OUAF. In addition, it provides information about the application viewer, how to configure incoming and outgoing messages, and how to integrate Lightweight Directory Access Protocol (LDAP), Oracle Identity Manager (OIM), and Batch Scheduler with Oracle Revenue Management and Billing (ORMB).
Oracle Revenue Management and Billing Business Process Guide	Explains how to maintain the demographic, geographic, and financial objects (i.e. accounts) of a customer. It explains how to manage a customer's bills, payments, adjustments, credits, collections processing, statements and deposits in Oracle Revenue Management and Billing (ORMB). It also describes the financial transactions, case management, sales and marketing functions, rates engine, quotations, loans, how to monitor and execute job streams, and how to manage workflows, notifications and overdue processing. In addition, it explains how to extract the data from the system using an extract template. The features listed and described in this document can be used in both financial services and health insurance domains.
Oracle Revenue Management and Billing Administrative Guide	Explains how to configure various features and functionalities in Oracle Revenue Management and Billing (ORMB). For example, billing, payments, adjustments, financial transactions, credits, collections processing, loans, service credits, background processes, quotations, case management, security, overdue processing, batch scheduler, workflow and notifications, etc.

Document Name	Description
	The information available in this document can be used in both financial services and health insurance domains.
Oracle Revenue Management and Billing TFM - Batch Execution Guide	Explains the sequence in which the batches should be executed while performing various tasks in the Transaction Feed Management (TFM) module. It provides detailed information about each TFM batch and its parameters. It also indicates the restart and multi-threading ability of each batch. In addition, it recommends values for various parameters which can be used for tuning batch performance as per the available hardware.
Oracle Revenue Management and Billing Batch Guide	Provides detailed information about various batches which are used in different modules, such as billing, payments, financial transaction, pricing management, funding request, offset request, hold request, upload request, inbound message, payment agreement request, accruals, earnings credit rate, ILM, deferred revenue recognition, reconciliation, garbling, repricing, entity audit, statements, etc. It also contains information about the batch parameters and the batch restart and multi-threading abilities.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Part
I

Leveraging User Experience Features

Topics:

- Unified Search Feature
- Enabling Mandatory Field Indicator

This chapter describes how to use the following features that enhance the user experience:

- **Unified Search Feature** - Helps to quickly access the screens by eliminating number of clicks rather than using the navigation menus.
- **Enabling Mandatory Field Indicator** - Helps to identify the fields which are mandatory while defining the respective entity.

Unified Search Feature

The **Search** field in the **Application** toolbar allows you to search for business entities (such as persons and accounts) in addition to the standard search for menu items. For example, you can search for a person using its name or primary identifier and account using its primary identifier. The unified search feature is a simplified version of search that allows you to search for records using free form search text or hint codes. For more complex queries, you may navigate to the corresponding advanced search screens.

You can use the following hints to search for the respective entities:

Hint	Description	Example
/	Used to search for a menu item to navigate directly to the corresponding page or BPA script rather than using the menus to navigate to the desired page or script.	/Customer Registration
n:	Used to search for a customer using the person or customer name. Here, you can specify the percentage (%) symbol as a wildcard character. The customers that meet the search criteria are shown in the drop-down list. Once you select a customer from the list, the **Customer 360° Information** screen appears with the details of the respective customer.	n: james n: leo%do
id:	Used to search for a customer using its primary identifier. Here, you cannot specify the percentage (%) symbol as a wildcard character. The customers that meet the search criteria are shown in the drop-down list. Once you select a customer from the list, the **Customer 360° Information** screen appears with the details of the respective customer.	id: 344234423
aid:	Used to search for an account using its primary identifier. Here, you cannot specify the percentage (%) symbol as a wildcard character. The accounts that meet the search criteria are shown in the drop-down list. Once you select an account from the list, the **Customer 360° Information** screen appears with the details of the respective account.	aid: 0586096368

If you want to search for a person or account using any additional search criteria, you can directly access the **Customer 360° View** screen by clicking the **Advanced Search** link in the **Search** field.

Enabling Mandatory Field Indicator

Until now, the mandatory field indicator (i.e., the Asterisk symbol (*)) was not displayed in the user interfaces. This resulted in bad user experience and increased the lead time to complete a process in the application. Now, to overcome these issues, you can configure the system such that mandatory field indicator '*' is displayed for the required fields in the user interface.

To enable the mandatory field indicator for the required fields in the user interface, you need to set the `com.oracle.ouaf.ui.disableRequiredFieldIndicators` property in the `spl.template.properties` file to **False**. Note that, by default, the `com.oracle.ouaf.ui.disableRequiredFieldIndicators` property is set to **True**. On changing the value of this property from **True** to **False**, the mandatory field indicator (*) appears next to the required fields in the user interface.

On enabling the mandatory field indicator, the **Asterisk** (*) symbol appears corresponding to the required fields on almost all screens throughout the application. There is no way to disable it for a specific screen. However, there are some exceptions on enabling the mandatory field indicator:

- The **Asterisk** (*) symbol does not appear corresponding to the required fields in the **Search** portals or AWB pop-up windows.
- If a field is required for an algorithm program, the **Asterisk** (*) symbol does not appear corresponding to the respective field.
- The **Asterisk** (*) symbol does not appear corresponding to the required checkboxes whose data is stored as the Boolean value (i.e. True or False) in the database.
- There are some screens where the mandatory field indicator feature is not operational at present. We are working on such screens and it would be fixed in the upcoming releases. You can refer to the 36919824 bug for the list of such screens where the mandatory field indicator is not displayed at present.

Note:

This configuration works as expected only when the **Style Sheet** option type of the **C1_UICONFIG** feature configuration is set to **c1/c1_cisDisabled.css**.

At present, this feature is tested and certified only for those user interfaces which are accessible to the financial services domain.

Part II

Customer Registration

Topics:

- Customer Registration (Without Approval) Status Transition
- Customer Registration (With Approval) Status Transition
- Customer Registration Template
- Customer Registration Type
- Customer Registration (Used for Searching)
- Customer Registration (Used for Viewing)

Until now, you were able to create person and account from the different screens. Now, ORMB provides the ability to create a person and multiple accounts for the person from the same user interface. A new object named **Customer Registration** is introduced in this release. Through a customer registration object, you can create person, accounts and contracts at the same time from the same interface. Before creating a customer registration object, you need to create the following:

- **Customer Registration Template** - A customer registration template encapsulates the following information:
- List of pages that should appear when you create a person or account using the respective customer registration template
- List of sections that should appear in each page
- Field or characteristic attributes, such as:
  - Default value for a field or characteristic type
  - Default value for a person or account identifier type or phone type
  - Primary identifier type for a person or account
  - Mandatory field in each section
  - Enable or disable the field value, identifier type, identifier value, characteristic type, characteristic value, phone type, or phone number

You can create multiple customer registration templates for person and account. Depending on whether you are creating a customer registration template for person or account, you can include the following pages and define field or characteristic attributes for the following sections:

Template Category	Template Page	Template Section
Person	Main	Person Main
Person	Main	Person Names
Person	Main	Person Identifiers
Person	Main	Person Phones
Person	Contact Information	Person Address
Person	Contact Information	Person Email

- **Customer Registration Type** - A customer registration type encapsulates the following information:
  - Users with a particular access group can only create a customer registration object using the customer registration type.
  - Whether the customer registration type can be used to create a customer registration object from the user interface, through the inbound message, or through the **File Upload Interface** utility.
  - Whether the approval is required when you create, edit, or delete a customer registration object.
  - The business objects using which the person, account, and address should be created when a customer registration object is created using the customer registration type.
  - A customer registration template which indicates the pages and sections that should appear when you are creating a customer registration object using the customer registration type. You can specify one customer registration template for person and one or more customer registration templates for account.
- Information, such as person names, person identifiers, person phones, person characteristics, person addresses, person hierarchy, accounts, account identifiers, account characteristics, account auto pay information, account persons, account bill routing information, or credit rating history, which should be copied when you create a copy of a customer registration object which is created using the customer registration type.

While creating a customer registration object, you need to specify the following:

- A customer registration type using which the customer registration object should be created
- A source system from the customer information is received
- A type of person that you want to create through the customer registration object

Once you specify the above details, the **Customer Registration** screen appears with a set of pages and sections which are added in the respective person template. The default values for the fields, characteristic types, identifier types, and phone types are shown as specified in the person template. In addition, the field values, characteristic types, characteristic values, identifier types, identifier values, phone types, and phone numbers are disabled as specified in the person template. On the **Accounts** page, you can view one row for each account template which is added in the customer registration type. You can then edit the row and thereby create an account for the person. You can create multiple accounts for the person using the same or different template.

Note: The system creates effective dated address using the address business object which is specified in the customer registration type. By default, the account override address is effective from the date when the customer registration object is created in the system.

On clicking the **View/Edit** icon or the **Add New Account** button, the **Customer Registration - Add Account** screen appears with a set of pages and sections which are added in the respective account template. The default values for the fields, characteristic types, and identifier types are shown as specified in the account template. In addition, the field values, characteristic types, characteristic values, identifier types, and identifier values are disabled as specified in the account template.

You can save the person and account details as and when you are entering the data by clicking the **Save as Draft** button. On clicking the **Save as Draft** button, the system creates a customer registration object in the **Draft** status. Once all person and account details are specified, you can click the **Validate and Save** button. The system then validates the information. You can edit, delete, or submit a customer registration object when it is in the **Draft** status. On submitting a customer registration object, the person and accounts are created in the system. If an algorithm created using the **C1-CRECONT** algorithm type is attached to the **Post-Processing** system event of the account business object (which is specified in the customer registration type), the system creates the contracts for each account. Finally, the status of the customer registration object is changed to **Complete**.

You can optionally configure the approval process for the customer registration. If the **Approval Required** option is selected in the customer registration type, the status of the customer registration object is changed to **Approval In Progress** on submitting it. A To Do using the approval To Do type is created and assigned to the users with the approval To Do role. The approver can then review the customer registration object and accordingly approve, reject, or request the submitter to resubmit the customer registration object for approval. On approving a customer registration object, the person, accounts, and contracts (if the required algorithm is attached) are created in the system. Finally, the status of the customer registration object is changed to **Complete**.

If the approver rejects a customer registration object due to some reason, the status of the customer registration object is changed to **Rejected**. However, if the approver requests the submitter to resubmit a customer registration object for approval after making the required changes, the status of the customer registration object is changed to **Draft**. The submitter can then make the required changes and resubmit the customer registration object for approval.

Note: The system enables you to create maximum 10 accounts for a person through a customer registration object from the user interface.

You can also create a customer registration object using the **File Upload Interface** utility. On creating a customer registration object using the **File Upload Interface** utility, the status of the customer registration object is set to **Draft**. You can then submit the customer registration object manually from the user interface. Note that, at present, only the XML format is supported for creating a customer registration object using the **File Upload Interface** utility.

To implement the **Customer Registration** feature, the following new screens are introduced in this release:

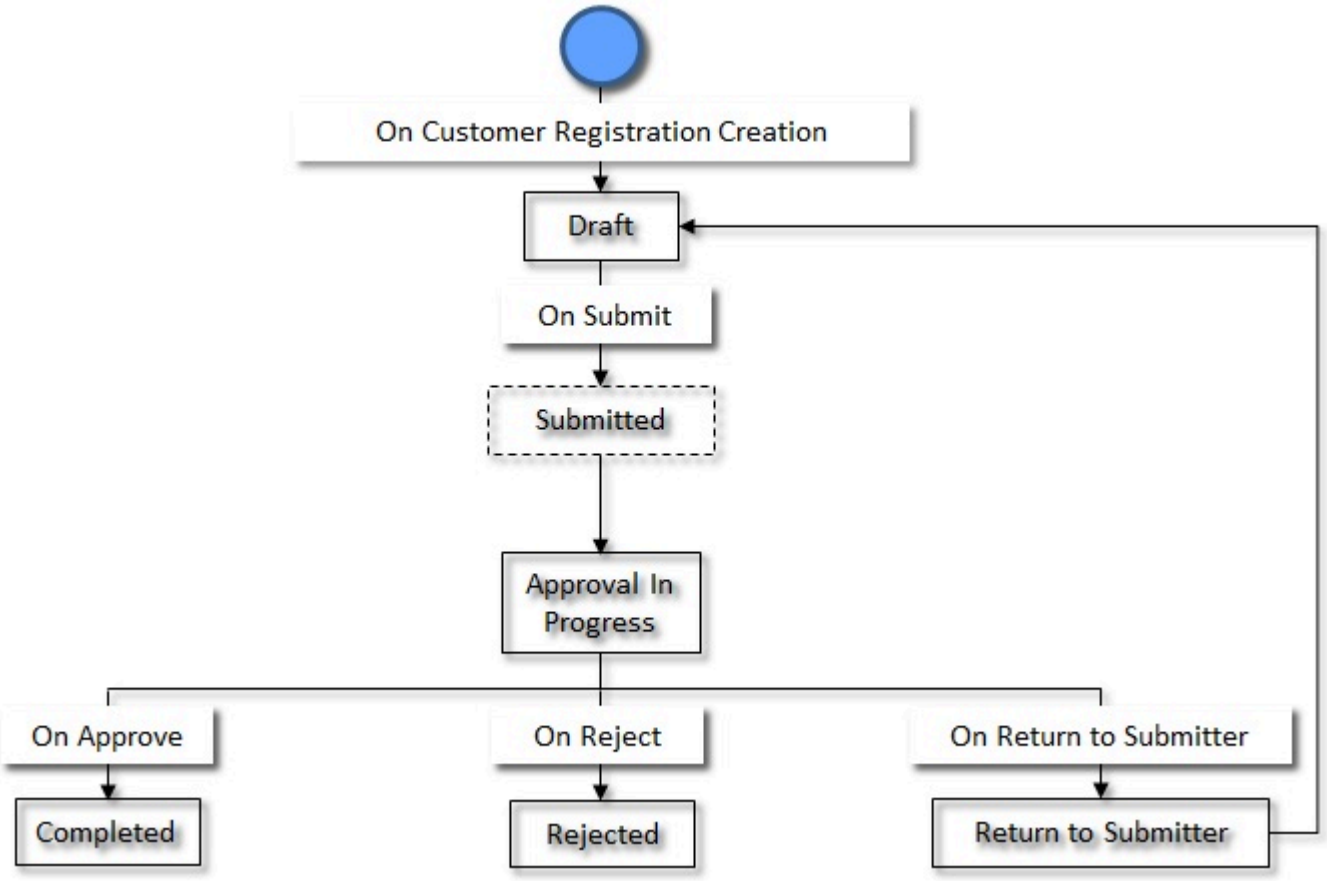
- Customer Registration Template
- Customer Registration Type
- Customer Registration

Customer Registration (Without Approval) Status Transition

The following figure graphically indicates how a customer registration object moves from one status to another when the approval process is not configured in the customer registration type:

Customer Registration (With Approval) Status Transition

The following figure graphically indicates how a customer registration object moves from one status to another when the approval process is configured in the customer registration type:



Customer Registration Template

A customer registration template encapsulates the following information:

- List of pages that should appear when you create a person, account, policy, or policy plan using the respective customer registration template
- List of sections that should appear in each page
- Field or characteristic attributes, such as:
  - Default value for a field or characteristic type
  - Default value for a person or account identifier type or phone type
  - Primary identifier type for a person or account
  - Mandatory field in each section
  - Enable or disable the field value, identifier type, identifier value, characteristic type, characteristic value, phone type, or phone number

You can create multiple customer registration templates for person, account, policy and policy plan. Depending on whether you are creating a customer registration template for person, account, policy or policy plan, you can include the following pages and define field or characteristic attributes for the following sections:

The following table lists the pages and sections that are available in the respective template category:

Template Category	Template Page	Template Section
Person	Main	Person Main

Template Category	Template Page	Template Section
		Person Names
		Person Identifiers
		Person Phones
	Contact Information	Person Address
		Person Email
	Accounts	-
	Person Hierarchy	Person Hierarchy - Main
		Person Hierarchy - Characteristics
	Person Characteristics	Person Characteristics
	Policies	Policies
		Parent Policies
	Registration Characteristics	Customer Registration Characteristics
Account	Main	Account Information
		Account Identifiers
	Auto Pay	Account Autopay
	Persons	Main
		Account Address Override Information
		Bill Routing
	Account Characteristics	Account Characteristics
Policy	Policy - Main	Policy Main
		Policy Persons
		Policy Characteristics
Policy Plan	Plan	Plan - Main
		Plan - Characteristics

Search Customer Registration Template

The **Search Customer Registration Template** zone allows you to search for a customer registration template using various search criteria. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for customer registration templates using the banking template or the healthcare template details. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Banking Template** - Used to indicate whether you want to search for customer registration templates created using the **C1-CustomerRegistrationTmplBK** business object. • **Healthcare Template** - Used to indicate whether you want to search for customer registration templates created using the **C1-CustomerRegistrationTmplHC** business object. **Note:** By default, the **Banking Template** option is selected.	
Template	Used to search for a particular template.	No
Description	Used to search for customer registration templates having a particular description.	No
Template Category	Used to search for customer registration templates which belong to a particular category. The valid values are: • Account • Person • Policy • Policy Plan **Note:** The **Policy** and **Policy Plan** options appear when you select the **Healthcare Template** option from the **Search By** list.	No

Note: You must specify at least one search criterion while searching for a customer registration template.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Template	Displays the customer registration template.
Description	Displays the description of the customer registration template.
Template Category	Displays the category to which the customer registration template belongs. The valid values are: • Account • Person • Policy • Policy Plan
Edit	On clicking the **Edit**(✎) icon, the **Customer Registration Template** screen appears where you can edit the details of the customer registration template.

Column Name	Column Description
Duplicate	On clicking the **Duplicate**(⧉) icon, the **Customer Registration Template** screen appears where you can define a new customer registration template using an existing customer registration template.
Delete	On clicking the **Delete** (🗑) icon, you can delete the customer registration template. **Note:** You can delete a customer registration template when a customer registration is not yet defined using the customer registration template.

On clicking the **Broadcast** (📡) icon corresponding to a customer registration template, the **Customer Registration Template** zone appears with the details of the respective customer registration template.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Customer Registration Template

The **Customer Registration Template** zone displays the details of the customer registration template. It also allows you to edit, copy, and delete the customer registration template. It contains the following sections

- **Main** - Displays the basic information about the customer registration template. It contains the following fields:

Field Name	Field Description
Template	Displays the customer registration template.
Template Category	Indicates the category for which the customer registration template is created in the system. The valid values are: • Account • Person • Policy • Policy Plan **Note:** The **Policy** and **Policy Plan** template categories appear when the customer registration template is created using the **C1-CustomerRegistrationTmplHC** business object.
Description	Displays the description of the customer registration template.
Detailed Description	Displays additional information about the customer registration template.

- **Template Pages** - The **Template Pages** section lists the template pages, template sections added for a particular template category in a customer registration template. It contains the following columns:

Column Name	Column Description
Template Page	Indicates the template page which is added for the template category.
Template Section	Indicates the template section which is defined for the template page.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration template.
Delete	Used to delete the customer registration template. **Note:** You can delete a customer registration template when a customer registration is not yet created using the customer registration template.
Duplicate	Used to create a new customer registration template using an existing customer registration template.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration template is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Customer Registration Template** zone does not appear in the **Customer Registration Template** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the customer registration template in the **Search Customer Registration Template** zone.

Searching for a Customer Registration Template

Prerequisites

To search for a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Customer registration templates defined in the application
- Customer registration templates associated with the template categories

Procedure

To search for a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.
   A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Template** sub-menu.
   The **Customer Registration Template** screen appears.
4. Enter the search criteria in the **Search Customer Registration Template** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of customer registration templates that meet the search criteria appears in the **Search Results** section.

Viewing the Customer Registration Template Details

Procedure

To view the details of a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the customer registration *t*emplate whose details you want to view.
   The **Customer Registration Template** zone appears.
3. View the details of the customer registration template in the **Customer Registration Template** zone.

Defining a Customer Registration Template

Prerequisites

To define a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To define a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.
   A sub-menu appears.
3. Click the **Add** option from the **Customer Registration Template** sub-menu.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Template Business Object	Used to indicate the business object using which you want to define the customer registration template. The valid values are: • **Customer Registration Template - Banking** - Used to indicate that you want to define a customer registration template using the **C1-CustomerRegistrationTmplBK** business object. • **Customer Registration Template - Health Care** - Used to indicate that you want to define a customer registration template using the **C1-CustomerRegistrationTmplHC** business object.	Yes

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Template** screen.

4. Select the required customer registration template business object from the respective field.
5. Click **OK**.

   The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the selected business object. It contains the following sections:

   - **Main** - Used to specify basic details about the customer registration template.
   - **Template Pages** - Used to add template pages and its related sections for the customer registration template.
   - **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: • Account • Person • Policy • Policy Plan **Note:** The **Policy** and **Policy Plan** options appear when you are defining a customer registration template using the **C1-CustomerRegistrationTmplHC** business object.	Yes
Business Object	Indicates the business object using which you want to define the customer registration template.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

6. Enter the required details in the **Main** section.
7. Add the template pages and template sections for the customer registration template in the **Template Pages** section.
8. Set the field attributes for the template sections in the **Template Pages** section.
9. Click **Save**.
   The customer registration template is defined.

Adding the Pages and Sections in a Customer Registration Template

Prerequisites

To add a page and its related sections in a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To define a customer registration template:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer *r*egistration template.

   The **Template Pages** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template Page	Used to indicate the page which you want to add in a customer registration template for a particular template category.	Yes (Conditional) **Note:** This field is required while adding pages and sections in a customer registration template.
Template Section	Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template. **Note:** On clicking the **Add** (+) icon, the following columns appear: **Column Name** / **Column Description** Template Section — Used to indicate the section for a particular page. Field Attributes — Used to define the field attributes of a section. **Note:** On clicking the **Add** (+) icon, you can define the field attributes for the section.	Yes (Conditional) **Note:** This field is required while adding pages and sections in a customer registration template.

The following table lists the various pages and sections that you can include in a customer registration template:

Template Category	Template Pages		Template Sections	
	Template Page	**Mandatory (Yes or No)**	**Template Section**	**Mandatory (Yes or No)**
Account	Auto Pay	No	Account Autopay	No
	Account Characteristics	No	Account Characteristics	No

Template Category	Template Pages		Template Sections	
	Template Page	**Mandatory (Yes or No)**	**Template Section**	**Mandatory (Yes or No)**
	Credit Ratings **Note:** This template page appears when you are defining, editing, or copying a customer registration template which is created using the **C1-CustomerRegistrationTmplBK** business object.	No	Credit Rating	No
	Main	Yes	Account Identifiers	Yes
			Account Information	Yes
	Persons	Yes	Account Address Override Information	No
			Bill Routing	Yes
			Main	Yes
Person	Accounts	No	-	-
	Contact Information	No	Person Address	No
			Person Email	No

Template Category	Template Pages		Template Sections	
	Template Page	**Mandatory (Yes or No)**	**Template Section**	**Mandatory (Yes or No)**
	Deal Information **Note:** This template page appears when you are defining, editing, or copying a customer registration template which is created using the **C1-CustomerRegistrationTmplBK** business object.	No	Deal-Main	No
	Main	Yes	Person Identifiers	Yes
			Person Main	Yes
			Person Names	Yes
			Person Phones	No
	Person Characteristics	No	Person Characteristics	No
	Person Hierarchy	No	Person Hierarchy-Characteristics	No
			Person Hierarchy-Main	No

Template Category	Template Pages		Template Sections	
	Template Page	**Mandatory (Yes or No)**	**Template Section**	**Mandatory (Yes or No)**
	Policies **Note:** This template page appears only when you are defining, editing, or copying a customer registration template which is created using the **C1-Customer Registration TmplHC** business object.	No	Parent Policy	No
			Policies	No
	Registration Characteristics	No	Customer Registration Characteristics	No
Policy **Note:** This template category appears only when you are defining, editing, or copying a customer registration template which is created using the **C1-CustomerRegistration TmplHC** business object.	Policy-Main	Yes	Policy Characteristics	No
			Policy-Main	Yes
			Policy Persons	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
Policy Plan **Note:** This template category appears when you are defining, editing, or copying a customer registration template which is created using the **C1-CustomerRegistrationTmplHC** business object.	Plan	Yes	Plan-Characteristics	No
			Plan-Main	Yes

2. Enter the required details in the **Template Pages** section.
3. Set the field attributes for the template section, if required.
4. If you want to add more than one page or section for the customer registration template, click the **Add** (+) icon and *t*hen repeat step *2*.

   Note: However, if you want to remove a page or section from the customer registration template, click the **Delete** (🗑) icon corresponding to the page or section.
5. Click **Save**.
   The pages and sections are added in the customer registration template.

   Note:

   You can add all the template pages available for a particular template category by clicking the **Select All** check box in the upper left corner of the **Template Pages** section.

   You cannot edit or delete a template page or section if a customer registration is already defined using the customer registration template.

Setting the Field Attributes for a Template Section

Prerequisites

To set the field attributes for a template section, you should have:

- Template pages and sections associated with the template category
- Fields for the sections defined in the application

Procedure

To set the field attributes for a template section:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer *r*egistration template.

   The **Template Pages** section contains the following fields:

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td>Template Page</td><td>Used to indicate the page which you want to add in a customer registration template for a particular template category.</td><td>Yes (Conditional)
Note: This field is required while adding pages and sections in a customer registration template.</td></tr>
<tr><td>Template Section</td><td>Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template.
Note: On clicking the Add (+) icon, the following columns appear:
<table>
<tr><th>Column Name</th><th>Column Description</th></tr>
<tr><td>Template Section</td><td>Used to indicate the section for a particular page.</td></tr>
<tr><td>Field Attributes</td><td>Used to define the field attributes of a section.
Note: On clicking the Add (+) icon, you can define the field attributes for the section.</td></tr>
</table></td><td>Yes (Conditional)
Note: This field is required while adding pages and sections in a customer registration template.</td></tr>
</table>

2. Select the template page and template section from the respective columns.
3. Click the **Add** (+) icon in the **Field Attributes** column corresponding to the template section whose field *a*ttributes you want to set.

   It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence of the field attribute.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		Note: This field is required while setting the field attributes for a template section.
Field	Used to indicate the field for which you want to set attributes. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Field Search** window appears. On specifying the field, the description of the field appears corresponding to the field.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Default Field Value	Used to indicate the default value for the field in the template section. **Note:** On specifying a field, the **Search** (🔍) icon appears corresponding to the **Default Field Value** field. On clicking the **Search** icon, a window appears depending on the field that you have selected. On specifying the default field value, the description of the default field value appears corresponding to the default field value.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Required	Used to indicate whether the field is mandatory in the template section. **Note:** By default, the check box in the **Required** column is disabled. It is enabled when you specify the field in the **Field** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Field Value	Used to indicate whether the field is disabled in the template section. **Note:** By default, the check box in the **Disable Field Value** column is disabled. It is enabled when you specify the field in the **Field** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Identifier Type	Used to indicate the type of identifier for which you want to set attributes. **Note:** On specifying a field, the **Search** (🔍) icon appears corresponding to the **Identifier Type** field. On clicking the	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.

Field Name	Field Description	Mandatory (Yes or No)
	Search icon, the **Search Zone for Person Identifier** window appears. On specifying the identifier type, the description of the identifier type appears corresponding to the **Identifier Type** field.	
Identifier Value	Used to specify the value for the identifier type for which you want to set attributes. **Note:** By default, this field is disabled. It is enabled when you specify the identifier type in the **Identifier Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Primary ID	Used to indicate whether the identifier type and identifier value are primary or not. **Note:** By default, the check box in the **Primary ID** field is disabled. It is enabled when you specify the identifier type in the **Identifier Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Identifier Type	Used to indicate whether the identifier type is disabled in the template section. **Note:** By default, the check box in the **Disable Identifier Type** column is disabled. It is enabled when you specify the identifier type in the **Identifier Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Identifier Value	Used to indicate whether the identifier value is disabled in the template section. **Note:** By default, the check box in the **Disable Identifier Value** column is disabled. It is enabled when you specify the identifier value in the **Identifier Value** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Name Type	Used to indicate the type of name for which you want to set attributes. **Note:** On specifying a field, the **Search** (🔍) icon appears corresponding to the **Name Type** field. On clicking the **Search** icon, the **Search Zone for Person Name Type** window appears. On specifying the name type, the description of the name type appears corresponding to the **Name Type** field.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.

Field Name	Field Description	Mandatory (Yes or No)
Name	Used to specify the name of the person. **Note:** By default, this field is disabled. It is enabled when you specify the name type in the **Name Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Name Type	Used to indicate whether the name type is disabled in the template section. **Note:** By default, the check box in the **Disable Name Type** column is disabled. It is enabled only when you specify the name type in the **Name Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Name	Used to indicate whether the specified name of the person is disabled in the template section. **Note:** By default, the check box in the **Disable Name** column is disabled. It is enabled when you specify the name in the **Name** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Phone Type	Used to specify the type of phone for which you want to set attributes. **Note:** On specifying a field, the**Search** (🔍) icon appears corresponding to the **Phone Type** field. On clicking the **Search** icon, the **Search Zone for Phone Type** window appears. On specifying the phone type, the description of the phone type appears corresponding to the **Phone Type** field.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Phone Number	Used to specify the phone number. **Note:** By default, this field is disabled. It is enabled when you specify the phone type in the **Phone Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Phone Type	Used to indicate whether the phone type is disabled in the template section. **Note:** By default, the check box in the **Disable Phone Type** column is disabled. It is enabled when you specify the phone type in the **Phone Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.

Field Name	Field Description	Mandatory (Yes or No)
Disable Phone Number	Used to indicate whether the specified phone number is disabled in the template section. **Note:** By default, the check box in the **Disable Phone Number** column is disabled. It is enabled when you specify the phone number in the **Phone Number** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Characteristic Information	Used to indicate the characteristic type and characteristic value for which you want to set attributes. **Note:** On specifying the characteristic type, the characteristic value field appears in the **Characteristic Information** column. On specifying a predefined characteristic type, the**Search** (🔍) icon appears corresponding to the characteristic value field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the characteristic value field..	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Characteristic Type	Used to indicate whether the characteristic type is disabled in the template section. **Note:** By default, the check box in the **Disable Characteristic Type** column is disabled. It is enabled when you specify the characteristic type in the **Characteristic Type** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.
Disable Characteristic Value	Used to indicate whether the characteristic is disabled in the template section. **Note:** By default, the check box in the **Disable Characteristic Value** column is disabled. It is enabled when you specify the characteristic value in the **Characteristic Value** column.	Yes (Conditional) **Note:** This field is required while setting the field attributes for a template section.

4. Enter the required details in the **Template Pages** section.
5. If you want to set more than one field attribute for the template section, click the **Add** (+) icon and then *r*epeat step *2*.

Note: However, if you want to remove a field attribute from the template section, click the **Delete** () icon corresponding to the field.

6. Click **Save**.
   The field attributes are set for the template section.

Editing a Customer Registration Template

Prerequisites

To edit a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To edit a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Edit** () icon in the **Edit** column corresponding to the customer registration template whose details you want to edit.

   The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template is defined. It contains the following sections:

   - **Main** - Used to specify basic details about the customer registration template.
   - **Template Pages** - Used to add template pages and its related sections for the customer registration template.
   - **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Displays the customer registration template.	Not applicable
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: • Account • Person • Policy • Policy Plan **Note:** The **Policy** and **Policy Plan** options appear when you are defining	Yes

Field Name	Field Description	Mandatory (Yes or No)
	a customer registration template using the **C1-CustomerRegistrationTmplHC** business object.	
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

Tip: Alternatively, you can edit the details of a customer registration template by clicking the **Edit** button in the **Customer Registration Template** zone.

3. Modify the details in the **Main** section, if required.
4. Add, edit, or remove the template pages and template sections from the customer registration template, if required.
5. Add, edit, or remove the field attributes from the template section, if required.
6. Click **Save**.
   The changes made to the customer registration template are saved.

Note: You can edit a customer registration template only when a customer registration it is not yet defined using the customer registration template.

Copying a Customer Registration Template

Instead of creating a customer registration template from scratch, you can create a new customer registration template using an existing customer registration template. This is possible through copying a customer registration template. On copying a customer registration template, the details including the template pages, template sections, and field attributes for the template sections are copied to the new customer registration template. You can then edit the details, if required.

Prerequisites

To copy a customer registration template, you should have:

- Customer registration template (whose copy you want to create) defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

Procedure

To copy a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Duplicate** (⧉) icon in the **Duplicate** column corresponding to the customer registration template whose copy you want to create.

   The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template whose copy you want to create is defined. It contains the following sections:

   - **Main** - Used to specify basic details about the customer registration template.
   - **Template Pages** - Used to add template pages and its related sections for the customer registration template.
   - **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: • Account • Person • Policy • Policy Plan **Note:** The **Policy** and **Policy Plan** options appear when you are defining a customer registration template using the **C1-CustomerRegistrationTmplHC** business object.	Yes
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

   Tip: Alternatively, you can copy a customer registration template by clicking the **Duplicate** button in the **Customer Registration Template** zone.
3. Enter the required details in the **Main** section.
4. Add, edit, or remove the template pages and template sections from the customer registration template, if required.
5. Add, edit, or remove the field attributes from the template section, if required.
6. Click **Save**.
   The new customer registration template is defined.

Deleting a Customer Registration Template

Procedure

To delete a Customer Registration Template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Delete** (🗑) icon in the **Delete** column corresponding to the customer *r*egistration template that you want to delete.

   A message appears confirming whether you want to delete the customer registration template.
3. Click **OK**.
   The customer registration template is deleted.

Note: You can delete a customer registration template when a customer registration is not yet created using the customer registration template.

Tip: Alternatively, you can delete a customer registration template by clicking the **Delete** button in the **Customer Registration Template** zone.

Customer Registration Type

A customer registration type encapsulates the following information:

- Users with a particular access group can only create a customer registration object using the customer registration type
- Whether the customer registration type can be used to create a customer registration object from the user interface, through the inbound message, or through the **File Upload Interface** utility
- Whether the approval is required when you create, edit, or delete a customer registration object
- Whether the final level approval is required once the approver at the first level approves the customer registration object
- Whether a To Do should be created indicating that the users have to manually create the billing hierarchy and pricing for the parent customer.

- The business objects using which the person, account, policy plan, membership, and address should be created when a customer registration object is created using the customer registration type
- A customer registration template which indicates the pages and sections that should appear when you are creating a customer registration object using the customer registration type. You can specify one customer registration template for person and one or more customer registration templates for account, policy, and policy plan.
- Information, such as person names, person identifiers, person phones, person characteristics, person addresses, person hierarchy, accounts, account identifiers, account characteristics, account auto pay information, account persons, account bill routing information, policies, policy plans, policy characteristics, or policy plan characteristics, which should be copied when you create a copy of a customer registration object which is created using the customer registration type.

Customer Registration Type List

The **Customer Registration Type List** zone lists the customer registration types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Customer Registration Type	Displays the customer registration type.
Description	Displays the description of the customer registration type.
Edit	On clicking the **Edit** (✎) icon, the **Customer Registration Type** screen appears where you can edit the details of the customer registration type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Customer Registration Type** screen appears where you can define a new customer registration type using an existing customer registration type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the customer registration type. **Note:** You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.

You can filter the list using various search criteria (such as, **Customer Registration Type** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to a customer registration type, the **Customer Registration Type** zone appears with the details of the respective customer registration type.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Customer Registration Type

The **Customer Registration Type** zone displays the details of the customer registration type. It contains the following sections:

- **Main** - Displays the basic information about the customer registration type. It contains the following fields:

Field Name	Field Description
Customer Registration Type	Displays the customer registration type.
Description	Displays the description of the customer registration type.
Customer Registration Business Object	Indicates the business object using which the customer registration is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. The valid values are: • **Customer Registration - Banking** - Indicates customer registration is created using the **C1-CustomerRegistrationBanking** business object. • **Customer Registration - Health Care** - Indicates customer registration is created using the **C1-CustomerRegistrationHC** business object. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the customer registration type.
Status	Indicates the status of the customer registration type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a customer registration type to **Inactive** when the corresponding customer registration is in a status other than **Processed** or **Rejected**.
Access Group	Displays the user group that can access the customer registration created using the customer registration type. **Note:** It has a link. On clicking the link, the **Access Group** screen appears where you can view the details of the respective access group.

Field Name	Field Description
Registration Source	Indicates the source through which the customer registration is created using the customer registration type. The valid values are: • File Upload • Inbound Message • Manual

- **Additional Data** - Displays additional information about the customer registration type. It contains the following fields:

Field Name	Field Description
Approval Required	Indicates whether approval is required while creating the customer registration using the customer registration type.
Approval To Do Type	Indicates that the To Do entry of the specified To Do type is created when you submit the customer registration for approval. **Note:** This field appears when the **Approval Required** check box is selected. It has a link. On clicking the link, the **To Do Type** screen appears with the details of the respective To Do type.
Approval To Do Role	Indicates that users with the specified To Do role can only approve, reject, or resubmit the customer registration for approval. **Note:** This field appears when the **Approval Required** check box is selected. It has a link. On clicking the link, the **To Do Role** screen appears with the details of the respective To Do role.
Submitter To Do Type	Indicates the To Do entry of the specified To Do type is created when the customer registration is resubmitted by the approver. **Note:** It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates the users with the specified To Do role for whom the To Do task is created when the customer registration is resubmitted by the approver. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Final Approval Required	Indicates whether the final approval is required once the approver at the first level approves the customer registration. **Note:** This field appears when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object. The final approval is required when the **Manual Billing Hierarchy and Pricing** option check box is selected.

Field Name	Field Description
Final Approval To Do Type	Indicates that the To Do entry of the specified To Do type is created when you submit the customer registration for final approval. **Note:** It has a link. On clicking the link, the **To Do Type** screen appears with the details of the respective To Do type. This field appears when the **Final Approval Required** check box is selected.
Final Approval To Do Role	Indicates that users with the specified To Do role can only approve or resubmit the customer registration for final approval. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role. This field appears when the **Final Approval Required** check box is selected.
Manual Billing Hierarchy and Pricing	Indicates whether the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters are created manually by the user while defining the customer registration. **Note:** This field appears when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object. This feature is used only for customer registration objects where the person type is set to **Parent Customer**.
Billing Hierarchy and Pricing To Do Type	Indicates the To Do entry of the specified To Do type is created for the user to define or edit the billing hierarchy and pricing for the parent customer manually. **Note:** It has a link. On clicking the link, the **To Do Type** screen appears with the details of the respective To Do type. This field appears when the **Manual Billing Hierarchy and Pricing** check box is selected.
Billing Hierarchy and Pricing To Do Role	Indicates users with the specified To Do role can only define or edit the billing hierarchy and pricing for the parent customer manually. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role. This field appears when the **Manual Billing Hierarchy and Pricing** check box is selected.
Person Business Object	Indicates the business object using which the person is created while defining the customer registration.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Account Business Object	Indicates the business object using which the account is created while defining the customer registration. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Policy Plan Business Object	Indicates the business object using which the policy plan is created while defining the customer registration. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object. This field appears when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object.
Benefits Business Object	Indicates the business object using which the benefit is created while defining the customer registration. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Membership Business Object	Indicates the business object using which the membership is created while defining the customer registration. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object. This field appears when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object.
Address Business Object	Indicates the business object using which the address is created while defining the customer registration. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Statement Construct Business Object	Indicates the business object using which the statement construct is created while defining the customer registration. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics defined for the customer registration type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.

Column Name	Column Description
Characteristic Value	Displays the value of the characteristic type.

- **Customer Registration Templates** - Lists the templates that are associated with the customer registration type for creating a customer registration. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence of the customer registration template.
Template Category	Indicates the category to which the customer registration template belongs. The valid values are: • Person • Account • Policy • Policy Plan **Note:** The **Policy** and **Policy Plan** template categories appear when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object.
Template	Displays the customer registration template associated with the customer registration type. **Note:** It has a link. On clicking the link, the **Customer Registration Template** screen appears where you can view the details of the respective customer registration template.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration type.
Delete	Used to delete the customer registration type. **Note:** You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.
Duplicate	Used to create a new customer registration type using an existing customer registration type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- **Copy Customer Registration Details** - Enables you to specify the type of information you want to copy while defining a customer registration using an existing customer registration. It contains the following fields:

Column Name	Column Description
Person Names	Indicates whether you want to copy the person details while copying a customer registration.

Column Name	Column Description
Accounts	Indicates whether you want to copy the account details while copying a customer registration.
Person Identifiers	Indicates whether you want to copy the person identifier details while copying a customer registration.
Account Identifiers	Indicates whether you want to copy the account identifier details while copying a customer registration.
Person Phones	Indicates whether you want to copy the phone details of the person while copying a customer registration.
Account Characteristics	Indicates whether you want to copy the characteristic details of the account while copying a customer registration.
Person Characteristics	Indicates whether you want to copy the characteristic details of the person while copying a customer registration.
Account Auto Pay Information	Indicates whether you want to copy the automatic payment details of the account while copying a customer registration.
Person Addresses	Indicates whether you want to copy the address details of the person while copying a customer registration.
Account Persons	Indicates whether you want to copy the details of the persons related to the account while copying a customer registration.
Person Hierarchy	Indicates whether you want to copy the person hierarchy details while copying a customer registration.
Account Override Address	Indicates whether you want to copy the account override address details while copying a customer registration.
Bill Routing Information	Indicates whether you want to copy the bill routing details of the account while copying a customer registration.
Credit Rating History	Indicates whether you want to copy the credit rating history details while copying a customer registration.
Policies	Indicates whether you want to copy the policy details while copying a customer registration. **Note:** This field appears when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object.
Policy Plans	Indicates whether you want to copy the policy plan details while copying a customer registration. **Note:** This field appears only when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object.
Policy Characteristics	Indicates whether you want to copy the policy characteristic details while copying a customer registration. **Note:** This field appears when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object.
Policy Plan Characteristics	Indicates whether you want to copy the policy plan characteristic details while copying a customer registration. **Note:** This field appears when the **Customer Registration Type** is created using the **C1-CustRegTypeHealthCare** business object.

By default, the **Customer Registration Type** zone does not appear in the **Customer Registration Type** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to a customer registration type in the **Customer Registration Type List** zone.

Searching for a Customer Registration Type

Prerequisites

To search for a customer registration type, you should have:

- Customer registration types defined in the application

Procedure

To search for a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Type** sub-menu.
   The **Customer Registration Type** screen appears with a list of customer registration types in the **Customer Registration Type List** zone.
4. Click the **Filters** (▽) icon in the title bar of the **Customer Registration Type List** zone.
   It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to search for a particular customer registration type.	No
Description	Used to search for customer registration types having a particular description.	No

5. Enter the search criteria in the **Customer Registration Type List** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.
   A list of customer registration types that meet the search criteria appears in the **Search Results** section.

Defining a Customer Registration Type

Prerequisites

To define a customer registration type, you should have:

- Customer registration type business objects defined in the application
- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

  Note: The policy plan and membership business objects are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.
- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

  Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.
- Characteristic types defined in the application
- Template categories defined in the application

Procedure

To define a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Customer Registration Type** sub-menu.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type Business Object	Used to indicate the business object using which you want to create the customer registration type. The valid values are: • Customer Registration Type - Banking • Customer Registration Type - Healthcare	Yes

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Type** screen.

Note: The **Select Business Object** screen appears when there are multiple customer registration type business objects defined in the application. If there is only one customer registration type business object defined in the application, the **Customer Registration Type** screen appears.

4. Select the required customer registration business object from the respective field.
5. Click **OK**.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.

- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. • Active • Inactive	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. **Note:** The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears. On specifying the access group, the description of the access group appears corresponding to the **Access Group** field.	Yes
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• File Upload • Inbound Message • Manual	

6. Enter the required details in the **Main** section.
7. Define additional information about the customer registration type in the **Additional Data** section.
8. Define a list of characteristics for the customer registration type in the **Characteristics** section.
9. Associate customer registration templates with the customer registration type in the **Customer Registration Templates** section
10. Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
11. Click **Save**.
    The customer registration type is defined.

Defining Additional Data for a Customer Registration Type

Prerequisites

To define additional data for a customer registration type, you should have:

- Person, account, policy plan, membership, and address business objects defined in the application

  Note: The policy plan and membership business objects are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.
- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

  Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

Procedure

To define additional data for a customer registration type:

1. Ensure that the **Additional Data** section is expanded when you are defining, editing, or copying a customer registration type.

The **Additional Data** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required while creating the customer registration using the customer registration type.	Yes (Conditional) **Note:** This field is required for approving the customer registration which is created using the customer registration type.
Approval To Do Type	Used to indicate the To Do entry of the specified To Do type is created when you submit the customer registration for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the customer registration which is created using the customer registration type.
Approval To Do Role	Used to indicate the users with the specified To Do role can approve, reject, or resubmit the customer registration for approval. **Note:** This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the customer registration which is created using the customer registration type.
Submitter To Do Type	Used to indicate the To Do entry of the specified To Do type is created when the customer registration is resubmitted by the approver. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field.	Yes (Conditional) **Note:** This field is required for resubmitting the customer registration for approval.

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate the users with the specified To Do role for whom the To Do task is created when the customer registration is resubmitted by the approver.	Yes (Conditional) **Note:** This field is required for resubmitting the customer registration for approval.
Final Approval Required	Used to indicate whether final approval is required once the approver at the first level approves the customer registration. **Note:** This field appears when you are defining, editing, or copying a **Customer Registration Type** using the **C1-CustRegTypeHealthCare** business object. The final approval is required when the **Manual Billing Hierarchy and Pricing** option check box is selected.	Yes (Conditional) **Note:** This field is required for approving the customer registration which is created using the customer registration type.
Final Approval To Do Type	Used to indicate the To Do entry of the specified To Do type is created when you submit the customer registration for final approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Final Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Final Approval To Do Type** field. This field appears when the **Final Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for final approval of the customer registration.
Final Approval To Do Role	Used to indicate the users with the specified To Do role can only approve or resubmit the customer registration for final approval. **Note:** This field appears when the **Final Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for final approval of the customer registration.
Manual Billing Hierarchy and Pricing	Used to indicate whether the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters are created manually by the user while defining the customer registration. **Note:** The **Manual Billing Hierarchy and Pricing** option can be used only for customer	Yes (Conditional) **Note:** This field is required for creating the billing hierarchy and pricing for the

Defining a Characteristic for a Customer Registration Type

Prerequisites

To define a characteristic for a customer registration type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration Type**)

Procedure

To define a characteristic for a customer registration type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a customer registration type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Customer Registration Type**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the customer registration type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the customer registration type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the customer registration type, click the **Add** (+) icon *a*nd then repeat step *2*.

   Note: However, if you want to remove a characteristic from the customer registration type, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The characteristic is defined for the customer registration type.

Associating a Customer Registration Template with a Customer Registration Type

Prerequisites

To associate a customer registration template with a customer registration type, you should have:

- Template categories defined in the application
- Customer registration templates associated to the template categories

Procedure

To associate a customer registration template with a customer registration type:

1. Ensure that the **Customer Registration Templates** section is expanded when you are defining, editing, or *c*opying a customer registration type.

   The **Customer Registration Templates** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence for the customer registration template.	Yes (Conditional) **Note:** This field is required when you are associating a customer registration template with a customer registration type.
Template Category	Used to indicate the category to which the customer registration template belongs. The valid values are: • Person • Account • Policy • Policy Plan **Note:** The **Policy** and **Policy Plan** template categories appear when you are defining, editing, or copying a **Customer Registration Type** using the **C1-CustRegTypeHealthCare** business object. You can associate only one person template category and multiple account, policy, and policy plan template categories with the customer registration type.	Yes (Conditional) **Note:** This field is required when you are associating a customer registration template with a customer registration type.
Template	Used to specify the customer registration template which you want to associate with the customer registration type. **Note:** The **Search** (🔍) icon appears corresponding to the **Template** field. On clicking the **Search** icon, the **Customer Registration Template Search** window appears. On specifying the template, the description of the template appears corresponding to the **Template** field.	Yes (Conditional) **Note:** This field is required when you are associating a customer registration template with a customer registration type.

2. Enter the required details in the **Customer Registration Templates** section.

3. If you want to define more than one template for the customer registration type, click the **Add** (+) icon and *t*hen repeat step *2*.

   Note: However, if you want to remove a template from the customer registration type, click the **Delete** (🗑) icon corresponding to the customer registration template.

4. Click **Save**.
   The customer registration template is associated with the customer registration type.

Setting Attributes to Define a Customer Registration Using the Existing Customer Registration

Prerequisites

To set an attribute for defining a customer registration using the existing customer registration, you should have:

- **Person** attributes defined in the application
- **Account** attributes defined in the application
- **Policy** attributes defined in the application

  Note: The **Policy** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.
- **Policy Plan** attributes defined in the application

  Note: The **Policy Plan** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

Procedure

To set an attribute for defining a customer registration using the existing customer registration:

1. Ensure that the **Copy Customer Registration Details** section is expanded when you are defining, editing, or *c*opying a customer registration type.

   The **Copy Customer Registration Details** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Names	Used to indicate whether you want to copy the person details while copying a customer registration.	No
Accounts	Used to indicate whether you want to copy the account details while copying a customer registration.	No
Person Identifiers	Used to indicate whether you want to copy the person identifier details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Identifiers	Used to indicate whether you want to copy the account identifier details while copying a customer registration. **Note:** The check box of this field is enabled when the **Accounts** check box is selected in the **Copy Customer Registration Details** section.	No
Person Phones	Used to indicate whether you want to copy the phone details of the person while copying a customer registration.	No
Account Characteristics	Used to indicate whether you want to copy the characteristic details of the account while copying a customer registration. **Note:** The check box of this field is enabled when the **Accounts** check box is selected in the **Copy Customer Registration Details** section.	No
Person Characteristics	Used to indicate whether you want to copy the characteristic details of the person while copying a customer registration.	No
Account Auto pay Information	Used to indicate whether you want to copy the automatic payment details of the account while copying a customer registration. **Note:** The check box of this field is enabled when the **Accounts** check box is selected in the **Copy Customer Registration Details** section.	No
Person Addresses	Used to indicate whether you want to copy the address details of the person while copying a customer registration.	No
Account Persons	Used to indicate whether you want to copy the details of the persons related to the account while copying a customer registration. **Note:** The check box of this field is enabled when the **Accounts** check box is selected in the **Copy Customer Registration Details** section.	No
Person Hierarchy	Used to indicate whether you want to copy the person hierarchy details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Override Address	Used to indicate whether you want to copy the account override address details while copying a customer registration. **Note:** The check box of this field is enabled when the **Accounts** check box is selected in the **Copy Customer Registration Details** section.	No
Bill Routing Information	Used to indicate whether you want to copy the bill routing details of the account while copying a customer registration. **Note:** The check box of this field is enabled when the **Accounts** check box is selected in the **Copy Customer Registration Details** section.	No
Credit Rating History	Used to indicate whether you want to copy the credit rating history details while copying a customer registration. **Note:** The check box of this field is enabled when the **Accounts** check box is selected in the **Copy Customer Registration Details** section.	No
Policies	Used to indicate whether you want to copy the policy details while copying a customer registration. **Note:** This field appears only when you are defining, editing, or copying a **Customer Registration Type** using the **C1-CustRegTypeHealthCare** business object.	No
Policy Plans	Used to indicate whether you want to copy the policy plan details while copying a customer registration. **Note:** This field appears when you are defining, editing, or copying a **Customer Registration Type** using the **C1-CustRegTypeHealthCare** business object. The check box of this field is enabled only when the **Policies** check box is selected in the **Copy Customer Registration Details** section.	No

Field Name	Field Description	Mandatory (Yes or No)
Policy Characteristics	Used to indicate whether you want to copy the policy characteristic details while copying a customer registration. **Note:** This field appears when you are defining, editing, or copying a **Customer Registration Type** using the **C1-CustRegTypeHealthCare** business object. The check box of this field is enabled only when the **Policies** check box is selected in the **Copy Customer Registration Details** section.	No
Policy Plan Characteristics	Used to indicate whether you want to copy the policy plan characteristic details while copying a customer registration. **Note:** This field appears when you are defining, editing, or copying a **Customer Registration Type** using the **C1-CustRegTypeHealthCare** business object. The check box of this field is enabled when the **Policy Plans** check box is selected in the **Copy Customer Registration Details** section.	No

2. Select the required attributes in the **Copy Customer Registration Details** section.
3. Click **Save**.
   The attributes are set for defining a customer registration using the existing customer registration.

Editing a Customer Registration Type

Prerequisites

To edit a customer registration type, you should have:

- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application

- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

  Note: The policy plan and membership business objects are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.
- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

  Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.
- Characteristic types defined in the application
- Template categories defined in the application

Procedure

To edit a customer registration type:

1. Search for the customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the customer registration type whose details you want to edit.

   The **Customer Registration Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the customer registration type.
   - **Additional Data** - Used to define additional information about the customer registration type.
   - **Characteristics** - Used to define a list characteristics for the customer registration type.
   - **Customer Registration Templates** - Used to associate templates with the customer registration type.
   - **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.

   - **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Displays the customer registration type.	Not applicable
Business Object	Indicates the business object using which the customer registration type is created in the system.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. • Active • Inactive	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears. On specifying the access group, the description of the access group appears corresponding to the **Access Group** field.	
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: • File Upload • Inbound Message • Manual	Yes

Tip: Alternatively, you can edit the details of a customer registration type by clicking the **Edit** button in the **Customer Registration Type** zone.

3. Modify the required details in the **Main** section, if required.
4. Modify additional information about the customer registration type in the **Additional Data** section, if required.
5. Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section, if required.
6. Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section, if required.
7. Specify the type of information you want to copy while defining a customer registration using an existing *c*ustomer registration in the **Copy Customer Registration Details** section, if required.
8. Click **Save**.
   The changes made to the customer registration type are saved.

Copying a Customer Registration Type

Instead of creating a customer registration type from scratch, you can create a new customer registration type using an existing customer registration type. This is possible through copying a customer registration type. On copying a customer registration type, the details including the additional data, characteristics, customer registration templates, and attributes set to define a customer registration from the existing customer registration are copied to the new customer registration type. You can then edit the details, if required.

Prerequisites

To copy a customer registration type, you should have:

- Customer registration type (whose copy you want to create) defined in the application
- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

  Note: The policy plan and membership business objects are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.
- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

  Note: The billing hierarchy and pricing To Do types and To Do roles are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.
- Characteristic types defined in the application
- Template categories defined in the application

Procedure

To copy a customer registration type:

1. Search for a customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Duplicate** (⧉) icon in the **Duplicate** column corresponding to the *c*ustomer registration type whose copy you want to create.

   The **Customer Registration Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the customer registration type.
   - **Additional Data** - Used to define additional information about the customer registration type.
   - **Characteristics** - Used to define a list characteristics for the customer registration type.
   - **Customer Registration Templates** - Used to associate templates with the customer registration type.
   - **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.

   - **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. • Active • Inactive	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. **Note:** The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears. On specifying the access group, the description of the access group appears corresponding to the **Access Group** field.	Yes
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: • File Upload • Inbound Message • Manual	Yes

Tip: Alternatively, you can copy a customer registration type by clicking the **Duplicate** button in the **Customer Registration Type** zone.

3. Enter the required details in the **Main** section.
4. Enter additional information about the customer registration type in the **Additional Data** section.
5. Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section.
6. Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section.
7. Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
8. Click **Save**.
   The new customer registration type is defined.

Deleting a Customer Registration Type

Procedure

To delete a Customer Registration Type:

1. Search for the customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Customer Registration Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding *to* the customer registration type that you want to delete.

   A message appears confirming whether you want to delete the customer registration type.
3. Click **OK**.
   The customer registration type is deleted.

Note: You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.

Tip: Alternatively, you can delete a customer registration type by clicking the **Delete** button in the **Customer Registration Type** zone.

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search customer registration of a particular person. **Note:** This field appears when the **Person Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the person details.
Person Identifier Type	Used to indicate the person identifier type using which you want to search for customer registrations. **Note:** This field appears when the **Person Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you enter the person identifier as a search criteria, you have to select the person identifier type. This field is required for searching customer registrations using the person details.
Person Identifier	Used to specify the value of the person identifier type using which you want to search for customer registrations. **Note:** This field appears when the **Person Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you specify the person identifier type as a search criteria, you have to enter the person identifier. This field is required for searching customer registrations using the person details.
Characteristic Type	Used to search customer registrations of persons with a particular characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Customer Registration**. This field appears when the **Person Details** option is selected from the **Search By** list and the **Advanced Search** link available in the upper right corner of the **Search Customer Registration** zone is clicked.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the person details.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value of the characteristic type using which you want to search customer registrations of persons. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field. This field appears when the **Person Details** option is selected from the **Search By** list and the **Advanced Search** link available in the upper right corner of the **Search Customer Registration** zone is clicked.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the person details.
Inbound Message ID	Used to search for a customer registration which was created through a particular inbound message. **Note:** This field appears only when the **Inbound Message Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the inbound message details.
Source System	Used to search customer registrations whose information is received from a particular external system. **Note:** This field appears when the **Inbound Message Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the inbound message details.
External Source ID	Used to search for a customer registrations whose information is received from a particular external source system. **Note:** This field appears when the **Inbound Message Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the inbound message details.
External Transaction ID	Used to search for a customer registration which is created as a result of a particular transaction in the external source system.	Yes (Conditional) **Note:** This field is required for searching customer registrations

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Inbound Message Details** option is selected from the **Search By** list.	using the inbound message details.
External Batch ID	Used to search customer registrations which are created through an external batch job. **Note:** This field appears when the **Inbound Message Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the inbound message details.
Inbound Message Type	Used to search customer registrations which are created using a particular inbound message type. **Note:** This field appears when the **Inbound Message Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the inbound message details.
Request Id	Used to search customer registrations which are created from a particular file uploaded through the **File Upload Interface** utility. **Note:** This field appears when the **File Upload Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the file upload details.
File Name	Used to search customer registrations created from uploading a file with a particular name. **Note:** This field appears when the **File Upload Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the file upload details.
File Status	Used to search customer registrations created from the uploaded files having a particular status. The valid values are: • Approval Pending • Completed • Error • Pending • Rejected **Note:** This field appears when the **File Upload Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** This field is required for searching customer registrations using the file upload details.
File Request Type	Used to search customer registrations which are created from the uploaded files with a particular file request type.	Yes (Conditional) **Note:** This field is required for

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **File Upload Details** option is selected from the **Search By** list.	searching customer registrations using the file upload details.

Note: You must specify at least one search criterion while searching for a customer registration. One more search criterion is required when you are searching for a customer registration using the division and/or person type.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the customer registration is created in the system.
Customer Registration Information	Displays the concatenated string of information about the customer registration. **Note:** It has a link. On clicking the link, the **Customer Registration** screen appears where you can view the details of the respective customer registration.
Status	Indicates the status of the customer registration. The valid values are: • Approval In Progress • Bill Group Approved • Complete • Draft • Draft for Update • Parent Customer Approved • Pending Final Approval • Pending Pricing Correction • Rejected **Note:** The values listed above appear when the **Registration Details** option is selected from the **Search By** list. • Pending • Processed • Rejected • Voided **Note:** These values listed above appear when the **Inbound Message Details** option is selected from the **Search By** list. **Note:** This column appears only when the **Registration Details**, **Person Details**, or **Inbound Message Details** options are selected from the **Search By** list.
Request Id	Displays the request Id generated while uploading a file through the **File Upload Interface** utility for creating the customer registration object. **Note:** This column appears when the **File Upload Details** option is selected from the **Search By** list.

Column Name	Column Description
Created By	Displays the user who has created the customer registration. **Note:** This column appears when the **Registration Details**, **Person Details**, or **Inbound Message Details** options are selected from the **Search By** list.
Inbound Message Information	Displays the concatenated string of information about the inbound message. **Note:** It has a link. On clicking the link, the **Inbound Message** screen appears where you can view the details of the respective inbound message. This column appears when the **Inbound Message Details** option is selected from the **Search By** list.
File ID	Displays the file which is uploaded for creating the customer registration through the **File Upload Interface** utility. **Note:** This column appears when the **File Upload Details** option is selected from the **Search By** list.
Copy	On clicking the **Copy** (⧉) icon, the **Customer Registration** screen appears where you can define a new customer registration using an existing customer registration. **Note:** This column appears when the **Registration Details** option is selected from the **Search By** list.
Person Name	Displays the name of the person for whom the customer registration is defined in the system. **Note:** This column appears when the **Person Details** option is selected from the **Search By** list.
Inbound Message Type	Indicates the inbound message type using which the inbound message is created in the system. **Note:** This column appears when the **Inbound Message Details** option is selected from the **Search By** list.
File Name	Displays the name of the file which is uploaded for creating the customer registration through the **File Upload Interface** utility. **Note:** This column appears when the **File Upload Details** option is selected from the **Search By** list.
Primary Person Identifier Type	Indicates the primary identifier type associated with the person. **Note:** This column appears when the **Person Details** option is selected from the **Search By** list.
Source System	Indicates the source system from where the inbound message is received for creating the customer registration. **Note:** This column appears when the **Inbound Message Details** option is selected from the **Search By** list.
Request Type	Indicates the request type using which the file is uploaded through the **File Upload Interface** utility for creating the customer registration.

Column Name	Column Description
	Note: This column appears only when the **File Upload Details** option is selected from the **Search By** list.
Primary Person Identifier	Displays the primary person identifier. **Note:** This column appears when the **Person Details** option is selected from the **Search By** list.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Customer Registration

Prerequisites

To search for a customer registration, you should have:

- Customer registration business objects defined in the application
- Customer registration statuses and customer registration types defined in the application
- Divisions associated with the access group to which the user belongs
- Person types and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Inbound message statuses, inbound message types, and source systems defined in the application.
- File statuses and file request types defined in the application.

Procedure

To search for a customer registration:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Customer Registration**.
   A sub-menu appears.
3. Click the **Search** option from the **Customer Registration** sub-menu.
   The **Customer Registration** screen appears.
4. Enter the search criteria in the **Search Customer Registration** zone.

Note:

You must specify at least one search criterion while searching for a customer registration object. One more search criterion is required when you are searching for a customer registration using the division and/or person type.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify the division when you are searching for a customer registration of a person using the city.

You must specify division and/or any other criteria in the second group when you are searching for a customer registration using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the customer registration using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **Search Customer Registration** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.
   A list of customer registrations that meet the search criteria appears in the **Search Results** section.

Defining a Customer Registration

Prerequisites

To define a customer registration, you should have:

- Customer registration types, source systems, and person types defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Customer class, invoice currencies, account categories, bill cycles, accrual cycles, account identifier types, auto pay source codes, auto pay methods, auto pay route types, account relationship types, bill formats, address sources, bill route types, and collection class defined in the application

  Note: The collection class is required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.
- Deal review frequencies and currency codes defined in the application

  Note: These prerequisites are required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

Procedure

To define a customer registration:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Customer Registration**.
   A sub-menu appears.
3. Click the **Add** option from the **Customer Registration** sub-menu.

   The **Add Customer Registration** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to indicate the customer registration type using which you want to define the customer registration.	Yes
Source System	Used to indicate the external system from where the customer registration information is received.	No
Person Type	Used to indicate the type of person for whom you want to define the customer registration.	Yes

   Tip: Alternatively, you can access the **Add Customer Registration** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration** screen.
4. Select the required **Customer Registration Type** from the respective field.
5. Select the required **Source System** from the respective field, if required.
6. Select the required **Person Type** from the respective field.
7. Click **OK**.

   The **Customer Registration** screen appears. It contains the following pages:

   - **Main** - Used to specify basic information about the person.

- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Deal** - Used to specify information about the deals created for the person.

  Note: This page appears only when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.
- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	Yes
Division	Used to indicate the division to which the person belongs. **Note:** You can view only those divisions to which you have access in the **Division** list.	Yes
Person Since Date	Used to specify the date from when the person is the main customer.	Yes
Customer Segment	Used to indicate the market segment to which the person belongs. **Note:** This field appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.	Yes
Customer Tier	Used to indicate the tier of the customer segment to which the person belongs. **Note:** This field appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.	Yes
Access Group	Used to indicate the user group that can access the customer registration. **Note:**	Yes

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears. On specifying the access group, the description of the access group appears corresponding to the **Access Group** field.	
Immediate Refund	Used to indicate whether you want to initiate immediate refund for the person's accounts and its child persons' accounts.	No

8. Enter the required details in the **Main** section.
9. Add the names of the person in the **Person Names** section.
10. Add the phone details for the person in the **Person Phones** section.
11. Add the identifier details for the person in the **Person IDs** section.
12. Define the addresses of the person in the **Contact** page, if required.
13. Define a list of characteristics for the person in the **Person Characteristics** page, if required.
14. Define the person to person relationship for the person in the **Hierarchy** page, if required.
15. Add the account details of the person in the **Accounts** page, if required.
16. Add information about the deals created for the person in the **Deal** page, if required.

Note: This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

17. Define a list of characteristics for the customer registration in the **Registration Characteristics** page, if *r*equired.
18. Click **Validate and Save**.
    The customer registration is defined.

Adding the Names of a Person

Prerequisites

To add the names of a person, you should have:

- Name types defined in the application.

Procedure

To add the names of a person:

1. Ensure that the **Person Names** section is expanded in the **Main** page when you are defining, editing, or copying *a* customer registration.

   The **Person Names** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Name Type	Used to indicate the type of name which you want to add for the customer registration. **Note:** The list includes only those name types where the name type entity is set to **Customer Registration**.	Yes (Conditional) **Note:** This field is required when you are adding a name for customer registration.
Name	Used to specify the name of the person.	Yes (Conditional) **Note:** This field is required when you are adding a name for customer registration.

2. Enter the required details in the **Person Names** section.
3. If you want to add more than one person name for the customer registration, click the **Add** (+) icon and then *r*epeat step *2*.

   Note: However, if you want to remove a person name from the customer registration, click the **Delete** (🗑) icon corresponding to the person name.
4. Click **Validate and Save**.
   The names are added for the person.

Adding the Contact Details of a Person

Prerequisites

To add the contact details of a person, you should have:

- Address type codes and countries defined in the application.

Procedure

To add the contact details of a person:

1. Ensure that the **Person Addresses** section in the **Contact** page is expanded when you are defining, editing, or *c*opying a customer registration.

   The **Person Addresses** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Address Type Code	Used to indicate the type of address that you want to add for the person. **Note:** The list includes only those address type codes where the address type code entity is set to **Customer Registration**.	Yes
Effective Date	Used to specify the date from when the address is effective for the person.	Yes
Season	Used to specify the season for which the address is effective for the person. **Note:** This field appears when you select the **Person Seasonal** option from the Address Type Code field.	Yes (Conditional) **Note:** This field is required while adding the seasonal contact details of a person.
Country	Used to indicate the country where the person is located. **Note:** The list includes only those countries which are already defined in the system. On selecting a country, only those address fields which are set as **Optional** while defining the country appear in the **Person Addresses** section. Also, the labels of the address fields will change depending on the	Yes

Field Name	Field Description	Mandatory (Yes or No)
	business label which is defined for the respective address field in the **Country** screen.	
Address 1	Used to specify the first line of the address. It may contain details, such as house number and apartment name.	No
Address 2	Used to specify the second line of the address. It may contain details, such as street name.	No
City	Used to specify the city name.	No
Address 3	Used to specify the third line of the address. It may contain the landmark details.	No
County	Used to specify the county name.	No
State	Used to indicate the state where the city or county is located. **Note:** The states listed in this field change depending on the country that you have selected.	No
Province	Used to specify the location within the country where the person is located.	No
Address 4	Used to specify the fourth line of the address.	No
Postal	Used to specify the postal or zip code of the address.	No
House Type	Used to indicate the type of the house. **Note:** The list includes only those values which are defined in the **HOUSE_TYPE** lookup field.	No
In City Limit	Used to indicate whether the address is within the city limit. The valid values are: • Yes • No	No
Geographic Code	Used to specify the geographic code of the address.	No

Note: The above mentioned fields appear in the **Person Addresses** section when the respective data is available for the person.

In addition, the **Person Addresses** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Override Mailing Name - Name1	Used to specify the name using which you want to override the person's mailing name.	Yes (Conditional) **Note:** This field is required while overriding the persons contact name.

Field Name	Field Description	Mandatory (Yes or No)
Override Mailing Name - Name2	Used to specify the name using which you want to override the person's override mailing name 1.	Yes (Conditional) **Note:** This field is required while overriding the persons **Override Mailing Name - Name1**.
Override Mailing Name - Name3	Used to specify the name using which you want to override the person's override mailing name 2.	Yes (Conditional) **Note:** This field is required while overriding the persons **Override Mailing Name - Name2**.
Email Address	Used to specify the email address of the person.	No

2. Enter the required details in the **Person Addresses** section.
3. If you want to add more than one contact details of the person, click the **Add** (+) icon in the upper right corner *o*f this section and then repeat step *2*.

   Note: However, if you want to remove the contact details of the person, click the **Delete** (🗑) icon in the upper right corner of this section.
4. Click **Validate and Save**.
   The contact details are added for the person.

Defining a Characteristic for a Person

Prerequisites

To define a characteristic for a person, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)

Procedure

To define a characteristic for a person:

1. Ensure that the **Characteristics** section is expanded in the **Person Characteristics** page when you are defining, *e*diting, or copying a customer registration.

   The **Characteristics** section contains the following columns:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the person.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		Note: This field is required while defining a characteristic for the person.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Customer Registration**.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the person.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the person.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the person, click the **Add** (+) icon and then *r*epeat step *2*.

   Note: However, if you want to remove a characteristic from the person, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Validate and Save**.
   The characteristic is defined for the person.

Defining a Person to Person Relationship for a Person

Prerequisites

To define a person to person relationship for a person, you should have:

- Relationship types defined in the application (where the relationship entity is set to **Customer Registration**)

Procedure

To define a person to person relationship for a person:

1. Ensure that the **Related Person Information** section is expanded in the **Hierarchy** page when you are *d*efining, editing, or copying a customer registration.

   The **Related Person Information** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Related Person ID	Used to indicate the person with whom you want to define the person to person relationship of the main customer. **Note:** The **Search** (🔍) icon appears corresponding to the **Related Person ID** field. On clicking the **Search** icon, the **Person Search** window appears. On specifying the person, the description of the person appears corresponding to the **Related Person ID** field.	Yes (Conditional) **Note:** This field is required while defining a person to person relationship for a person.
Parent/Child	Used to indicate whether the related person is a parent or a child. The valid values are: • Parent • Child	Yes (Conditional) **Note:** This field is required while defining a person to person relationship for a person.
Relationship Type	Used to indicate the person to person relationship type. **Note:** The list includes only those relationship types where the relationship entity is set to **Customer Registration**.	Yes (Conditional) **Note:** This field is required while defining a person to person relationship for a person.
Start Date	Used to indicate the date from when the person to person relationship is effective. **Note:** The start date cannot be later than the end date.	Yes (Conditional) **Note:** This field is required while defining a person to person relationship for a person.
End Date	Used to indicate the date till when the person to person relationship is effective. **Note:** The end date cannot be earlier than the start date.	No
Financial Relationship	Used to indicate whether the related person is financially responsible or not.	Yes (Conditional) **Note:** This field is required while defining a person to

Column Name	Column Description	Mandatory (Yes or No)
		person relationship for a person.
Characteristics	On clicking the **Add** (+) icon, you can define a list of characteristics for the person to person relationship.	No

2. Enter the required details in the **Related Person Information** section.
3. If you want to define more than one person to person relationship for the person, click the **Add** (+) icon and *t*hen repeat step *2*.

Note: However, if you want to remove a person to person relationship from the person, click the **Delete** (🗑) icon corresponding to the related person.

4. Click **Validate and Save**.
The person to person relationship is defined for the person.

Defining a Characteristic for a Person to Person Relationship

Prerequisites

To define a characteristic for a person to person relationship, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Person Relationship**)

Procedure

To define a characteristic for a person to person relationship:

1. Ensure that the **Related Person Information** section is expanded in the **Hierarchy** page when you are *d*efining, editing, or copying a customer registration.
2. Click the **Add** (+) icon in the **Characteristics** column corresponding to the related person.

The following columns appear in the **Related Person Information** section.

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the person to person relationship.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the person to person relationship.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)

Column Name	Column Description	Mandatory (Yes or No)
	Note: The list includes only those characteristic types where the characteristic entity is set to **Person Relationship**.	**Note:** This field is required while defining a characteristic for the person to person relationship.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the person to person relationship.

3. Enter the required details in the **Related Person Information** section.
4. If you want to define more than one characteristic for the person to person relationship, click the **Add** (+) *i*con and then *r*epeat step *2*.

   Note: However, if you want to remove a characteristic from the person to person relationship, click the **Delete** (🗑) icon corresponding to the characteristic.
5. Click **Validate and Save**.
   The characteristic is defined for the person to person relationship.

Adding an Account for a Person

Prerequisites

To add the account for a person, you should have:

- Customer class, divisions, currencies, account categories, access groups, accrual cycles, and bill cycles defined in the application
- Account identifier types defined in the application

- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Collection class defined in the application

Note: The collection class is required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

Procedure

To add an account for a person:

1. Ensure that the **Accounts** section is expanded in the **Accounts** page when you are adding, editing, or removing *a*n account of a person.

   The **Accounts** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the account.	Not applicable
Template	Displays the account template using which the account is added for the person.	Not applicable
Customer Class	Indicates the customer class to which the account belongs.	Not applicable
Division	Indicates the division to which the account belongs.	Not applicable
Primary Identifier Type	Indicates the primary identifier type using which the account is added for the person.	Not applicable
Identifier Value	Displays the value of the primary identifier type.	Not applicable
Account Information	Displays the concatenated string of information about the account that is added for the person.	Not applicable
View / Edit	On clicking the **View / Edit** (✎) icon, you can view or edit the details of the account.	Not applicable

   Note: No information appears in the above columns if an account is not yet added for the person.

2. Click the **Add New Account** button in the **Accounts** section.

   The **Customer Registration - Add Account** screen appears. It contains the following pages:

   - **Main** - Used to specify basic information about the account.
   - **Auto Pay** - Used to add the automatic payment details of the account.
   - **Persons** - Used to associate a person to the account.
   - **Account Characteristics** - Used to define a list of characteristics for the account.
   - **Credit Ratings** - Used to add the credit rating details for the account.

   Note: This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

   The **Main** page contains the following sections:

   - **Main** - Used to specify basic details about the account.
   - **Account Identifiers** - Used to add the identifier details for the account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs. **Note:** You can only view those divisions to which you have access in the **Division** list.	Yes
Set Up Date	Used to specify the date when the account was initially set up for the person. **Note:** By default, the current date appears in this field.	Yes
Invoice Currency	Used to indicate the currency in which you want to generate invoice for the account. **Note:** The list includes only those currencies which are defined in the system.	Yes
Account Category	Used to indicate the category to which the account belongs. The valid values are: • **Invoice Account** - Indicates that the account will be used to bill charges of the usage accounts. It will not have charges of its own. • **Settlement Account** - Indicates that the account will be used only for settlement (i.e., for payments). • **Usage Account** - Indicates that the account will have its own charges. If the usage account is linked to any construct, the usage account's charges are billed through an invoice account. Otherwise, the usage account is billed individually. **Note:** The list includes only those values which are present in the **ACCT_USAGE_FLG** lookup field.	Yes
Access Group	Used to indicate the users who have right to view and update the details of the account. **Note:** The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears. On specifying the access group, the description of the access group	Yes

Field Name	Field Description	Mandatory (Yes or No)
	appears corresponding to the **Access Group** field.	
Exclude Accrual	Used to indicate whether you want to exclude the account during accrual calculation. **Note:** The account is eligible for accrual, by default, when the division to which the account belongs is eligible for accrual. If you want to exclude the account from accrual, you must click the **Exclude Accrual** option. On clicking the **Exclude Accrual** option, the **Accrual Cycle** and **Accrual Type** fields are disabled.	No
Accrual Cycle	Used to indicate the accrual cycle for the account. **Note:** The **Search** (🔍) icon appears corresponding to the **Accrual Cycle** field. On clicking the **Search** icon, the **Accrual Cycle Search for Cust Reg** window appears. On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the **Accrual Cycle** field. This field is disabled when you select the **Exclude Accrual** option.	No
Accrual Type	Used to indicate the accrual type that you want to use for the account during accrual calculation. **Note:** You can only specify an account level accrual type that is associated with the division to which the account belongs. The **Search** (🔍) icon appears corresponding to the **Accrual Type** field. On clicking the **Search** icon, the **Accrual Type Search for Cust Reg** window appears. On specifying the accrual type, the description of the accrual type appears corresponding to the **Accrual Type** field.	No

Field Name	Field Description	Mandatory (Yes or No)
	This field is disabled when you select the **Exclude Accrual** option.	
Product	Used to indicate the product for which the account is enrolled. **Note:** The **Search** (🔍) icon appears corresponding to the **Product** field. On clicking the **Search** icon, the **Search Product** window appears.	Yes (Conditional) **Note:** This field is required while enrolling an account for a product.
Eligible for Repricing	Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed. **Note:** Only accounts where the person and child person are the main customers are considered for repricing. The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.	No
Bill Cycle	Used to indicate the bill cycle for the account.	No
Bill Lead Days	Used to indicate whether you want to bill the account in advance. You need to specify the number of days that is used to derive the cut-off date for advance billing. **Note:** In case you don't want to bill the account in advance, you must specify **0** in this field.	Yes
Comments	Used to specify additional information about the account.	No
Immediate Refund	Used to indicate whether you want to initiate immediate refund for the account.	No

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
5. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
6. Associate or disassociate persons from the account in the **Persons** page, if required.
7. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
8. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
9. Click **Validate and Save**.
   The account is added for the person.

Adding the Identifier Details of an Account

Prerequisites

To add the identifier details of an account, you should have:

- Account identifier types defined in the application.

Procedure

To add the identifier details of an account:

1. Ensure that the **Account Identifiers** section is expanded in the **Customer Registration - Add Account** *s*creen when you are adding or editing the account of a person.

   The **Account Identifiers** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Primary ID	Used to indicate whether the account identifier is primary or not.	Yes
Account Identifier Type	Used to indicate the identifier type for the account.	Yes (Conditional) **Note:** This field is required while adding an account identifier.
Primary Account Identifier	Used to specify the primary account identifier for the account identifier type.	Yes (Conditional) **Note:** This field is required while adding an account identifier.

   Note: You must specify at least one primary identifier while adding an account for a person.

2. Enter the required details in the **Account Identifiers** section.
3. If you want to add more than one account identifier for the account, click the **Add** (+) icon and then repeat *s*tep *2*.

Note: However, if you want to remove an account identifier from the account, click the **Delete** (🗑) icon corresponding to the account identifier type.

4. Click **Validate and Save**.
   The identifier details are added for the account.

Adding the Automatic Payment Details of an Account

Prerequisites

To add the automatic payment details of an account, you should have:

- Auto pay source codes, auto pay methods, and auto pay route types defined in the application

Procedure

To add the automatic payment details of an account:

1. Ensure that the **Auto Pay** page is expanded in the **Customer Registration - Add Account** screen when you *a*re adding or editing the account of a person.

   The **Auto Pay** page contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Defer Auto Pay Date	Used to specify the date after which automatic payments can be created for the account. The system will hold the automatic payment process for the account till the specified duration. It will allow to create automatic payments for the debit bills through a batch process only after the specified date.	No
Rule Based Auto Pay	Used to indicate whether you want to define the rule based auto pay instructions for the account.	No
Auto Pay Usage	Used to indicate whether the auto pay option is available for automatic credit, automatic debit, or for both automatic credit and debit. The valid values are: • **Credit** - Used to indicate that the auto pay option is only available for automatic refunds. • **Credit and Debit** - Used to indicate that the auto pay option is available for	Yes

Field Name	Field Description	Mandatory (Yes or No)
	both automatic refunds and automatic payments. • **Debit** - Used to indicate that the auto pay option is only available for automatic payments. **Note:** You can define multiple auto pay options for an account with the same priority but with different auto pay usage. In other words, multiple auto pay options for an account with the same auto pay usage cannot have the same priority.	
Start Date	Used to indicate the date from when the automatic payment option is effective for the account. **Note:** The start date cannot be later than the end date.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
End Date	Used to indicate the date till when the automatic payment option is effective for the account. **Note:** The end date cannot be earlier than the start date.	No
Percentage	Used to specify the contribution of payment amount in percentage from the auto pay source (i.e., bank account) when the **Split Automatic Payment** feature is used. It is used to split the automatic payment in percentage between two or more automatic payment options.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Priority	Used to indicate the order in which the system should consider the automatic payment option when multiple automatic payment options are defined for the same date range.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Auto Pay Source Code	Used to indicate the financial institution that receives the automatic payment request. **Note:** The **Search** (🔍) icon appears corresponding to the **Auto Pay Source Code** field. On clicking the **Search** icon, the **Auto Pay Source Search** window appears. On specifying the auto pay source code, the description of the auto pay source code appears corresponding to the **Auto Pay Source Code** field.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Method	Used to indicate the method using which you want the system to process the automatic payment for the account. The valid values are: • Direct Debit • Payment Advice	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Auto Pay Route Type	Used to indicate when and how the automatic payment request of the account is routed to the financial institution. **Note:** The **Search** (🔍) icon appears corresponding to the **Auto Pay Route Type** field. On clicking the **Search** icon, the **Auto Pay Route Type Search** window appears. On specifying the auto pay route type, the description of the auto pay route type appears corresponding to the **Auto Pay Route Type** field.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Account Number	Used to specify the account number for which you want to add the automatic payment details.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Expires On	Used to specify the month and year of expiry for the automatic payment of the account.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Name	Used to specify the account name for which you want to add the automatic payment details.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Maximum Withdrawal Amount	Used to specify the maximum amount which can be withdrawn from the account through the automatic payment method.	Yes (Conditional) **Note:** This field is required while adding the automatic payment details of the account
Comments	Used to specify additional information about the automatic payment for the account.	No

2. Enter the required details in the **Auto Pay** page.
3. If you want to add more than one automatic payment details of the account, click the **Add** (+) icon and then *r*epeat step *2*.

Note: However, if you want to remove an automatic payment detail from the account, click the **Delete** ( ) icon.

4. Click **Validate and Save**.
   The automatic payment details are added for the account.

Adding the Deal Information for a Person

Prerequisites

To add the deal information for a person, you should have:

- Deal review frequencies and currencies defined in the application.

Procedure

To add the deal information for a person:

1. Ensure that the **Deal Information** section is expanded in the **Deal** page when you are defining, editing, or *c*opying a customer registration.

   The **Deal Information** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Deal ID	Used to specify the deal which is created for the person.	Yes (Conditional) **Note:** This field is required while adding the deal information for a person.
Start Date	Used to specify the date from when the deal is effective for the person. **Note:** The start date cannot be later than the end date.	Yes (Conditional) **Note:** This field is required while adding the deal information for a person.
End Date	Used to specify the date till when the deal is effective for the person. **Note:** The end date cannot be earlier than the start date.	Yes (Conditional) **Note:** This field is required while adding the deal information for a person.
Deal Review Frequency	Used to indicate the periodic analysis of the deal usage as per the commitments made by the person. The valid values are:	Yes (Conditional) **Note:** This field is required while adding

Column Name	Column Description	Mandatory (Yes or No)
	• Annual • Monthly • Weekly	the deal information for a person.
Currency Code	Used to indicate the currency in which the deal is defined in the system. **Note:** The list includes only those currencies which are already defined in the system.	Yes (Conditional) **Note:** This field is required while adding the deal information for a person.
Prospect	Used to indicate whether the person is a prospect customer or not. The valid values are: • Yes • No	Yes (Conditional) **Note:** This field is required while adding the deal information for a person.
Relationship Manager	Used to specify the name of the relationship manager.	Yes (Conditional) **Note:** This field is required while adding the deal information for a person.

Note: The **Deal Information** page appears in the **Customer Registration** screen when you are defining, editing, or copying a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

2. Enter the required details in the **Deal Information** section.
3. If you want to add more than one deal information for the person, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a deal information from the person, click the **Delete** (🗑) icon corresponding to the deal.

4. Click **Validate and Save**.
   The deal information is added for the person.

Defining a Characteristic for a Customer Registration

Prerequisites

To define a characteristic for a customer registration, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)

Procedure

To define a characteristic for a customer registration:

1. Ensure that the **Characteristics** section is expanded in the **Registration Characteristics** page when you are *d*efining, editing, or copying a customer registration.

   The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the customer registration.	Yes (Conditional) **Note:** This field is required while defining a characteristic for a customer registration.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Customer Registration**.	Yes (Conditional) **Note:** This field is required while defining a characteristic for a customer registration.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for a customer registration.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the customer registration, click the **Add** (+) icon and *t*hen repeat step *2*.

   Note: However, if you want to remove a characteristic from the customer registration, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Validate and Save**.
   The characteristic is defined for the customer registration.

Editing the Account Details of a Person

Prerequisites

To edit the account details of a person, you should have:

- Customer class, divisions, currencies, access groups, accrual cycles, and bill cycles defined in the application
- Account identifier types defined in the application
- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Collection class defined in the application

Note: The collection class is required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

Procedure

To edit the account details of a person:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column *c*orresponding to the customer registration whose account details you want to edit.
   The **Main** tab appears in the **Customer Registration** screen.
3. Click the **Edit** button in the **Customer Registration** zone.
   The **Main** page appears in the **Customer Registration** screen.
4. Ensure that the **Accounts** section is expanded in the **Accounts** page.

5. Click the **Edit**(✎) icon in the **View / Edit** column corresponding to the account whose details you want to edit.

   The **Customer Registration - Add Account** screen appears. It contains the following pages:

   - **Main** - Used to specify basic information about the account.
   - **Auto Pay** - Used to add the automatic payment details of the account.
   - **Persons** - Used to associate a person to the account.
   - **Account Characteristics** - Used to define a list of characteristics for the account.
   - **Credit Ratings** - Used to add the credit rating details for the account.

   Note: This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

   The **Main** page contains the following sections:

   - **Main** - Used to specify basic details about the account.
   - **Account Identifiers** - Used to add the identifier details for the account.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs. **Note:** You can only view those divisions to which you have access in the **Division** list.	Yes
Set Up Date	Displays the date from when the account is configured for the person.	Not applicable
Invoice Currency	Used to indicate the currency which you want to use for generating the invoice of the account. **Note:** The list includes only those currencies which are defined in the system.	Yes
Account Category	Displays the category to which the account belongs. The valid values are: • Invoice Account • Settlement Account • Usage Account **Note:** The list includes only those values which are present in the **ACCT_USAGE_FLG** lookup field.	Not applicable
Access Group	Used to indicate the user group that can access the account for the person. **Note:** The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon,	Yes

Field Name	Field Description	Mandatory (Yes or No)
	the **Access Group Search** window appears. On specifying the access group, the description of the access group appears corresponding to the **Access Group** field.	
Exclude Accrual	Used to indicate whether the account is eligible for accrual. **Note:** By default, the account is eligible for accrual if the division to which the account belongs is eligible for accrual. If you do not want the account to be eligible for accrual, you must select the **Exclude Accrual** check box. On selecting the **Exclude Accrual** check box, the **Accrual Cycle** field is disabled.	No
Accrual Cycle	Used to indicate the accrual cycle of the account in the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Accrual Cycle** field. On clicking the **Search** icon, the **Accrual Cycle Search for Cust Reg** window appears. On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the **Accrual Cycle** field. This field is disabled when you click the **Exclude Accrual** check box.	No
Product	Used to indicate the product for which the account is enrolled. **Note:** The **Search** (🔍) icon appears corresponding to the **Product** field. On clicking the **Search** icon, the **Search Product** window appears.	Yes (Conditional) **Note:** This field is required while enrolling an account for a product.
Eligible for Repricing	Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed. **Note:** Only accounts where the person and child person are the main customers are considered for repricing.	No

Field Name	Field Description	Mandatory (Yes or No)
	The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.	
Bill Cycle	Used to indicate the bill cycle for the account.	No
Bill Lead Days	Used to specify the number of days which is used to derive the cut-off date for advance billing. **Note:** In case you don't want to bill the account in advance, you must specify **0** in this field.	Yes
Comments	Used to specify additional information about the account.	No

6. Modify the required details of the account in the **Main** page.
7. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
8. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
9. Associate or disassociate persons from the account in the **Persons** page, if required.
10. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
11. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
12. Click **Validate and Save**.
    The changes made to the account are saved.

Copying a Customer Registration

Instead of creating a customer registration from scratch, you can create a new customer registration using an existing customer registration. This is possible through copying a customer registration. On copying a customer registration, the details including the characteristics are copied to the new customer registration. You can then edit the details, if required.

Prerequisites

To copy a customer registration, you should have:

- Customer registration (whose copy you want to create) defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic Types defined in the application
- Relationship types defined in the application
- Customer class, invoice currencies, account categories, bill cycles, accrual cycles, account identifier types, auto pay source codes, auto pay methods, auto pay route types, account relationship types, bill formats, address sources, bill route types, and collection class defined in the application

  Note: The collection class is required when you are copying a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.
- Deal review frequencies and currency codes defined in the application

  Note: These prerequisites are required when you are copying a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

Procedure

To copy a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.
2. Click the **Copy** (⧉) icon in the **Copy** column corresponding to the customer registration whose copy you want *t*o create.

   The **Customer Registration** screen appears. It contains the following pages:

   - **Main** - Used to specify basic information about the person.
   - **Contact** - Used to specify the contact information about the person.
   - **Person Characteristics** - Used to define a list of characteristics for the person.
   - **Hierarchy** - Used to define the person to person relationship for the person
   - **Accounts** - Used to add the account details of the person.
   - **Deal** - Used to specify information about the deals created for the person.

     Note: This page appears only when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.
   - **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

   The **Main** page contains the following sections:

   - **Main** - Used to specify basic details about the person.
   - **Person Name** - Used to add the person names for customer registration.
   - **Person Phones** - Used to add the person phone details for customer registration.
   - **Person IDs** - Used to add the person identifiers for customer registration.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	No

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which the person belongs.	Not applicable
Person Since Date	Used to specify the date from when the person is the main customer.	No
Customer Segment	Used to indicate the customer segment to which the person belongs. **Note:** This field appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.	No
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs. **Note:** This field appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.	No
Access Group	Used to indicate the user group that can access the customer registration. **Note:** The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears.	No

3. Enter the required details in the **Main** section.
4. Add or remove the names of the person in the **Person Names** section.
5. Add or remove the phone details for the person in the **Person Phones** section.
6. Add, edit, or remove the identifier details for the person in the **Person IDs** section.
7. Define, edit, or remove the addresses of the person in the **Contact** page, if required.
8. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
9. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
10. Add, edit, or remove the account details of the person in the **Accounts** page, if required.
11. Add, edit, or remove information about the deals created for the person in the **Deal** page, if required.

    Note: This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.
12. Define, edit, or remove characteristics of the customer registration in the **Registration Characteristics** page, *if* required.
13. Click **Validate and Save**.
    The new customer registration is defined.

Effective Date	Displays the date from when the characteristic is effective for the account.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

Auto Pay Details - Displays the automatic payment details of the account. It contains the following fields:

Field Name	Field Description
Defer Auto Pay Date	Displays the date after which automatic payments can be created for the account.
Rule Based Auto Pay	Indicates whether you can define the rule based auto pay instructions for the account.
Auto Pay Usage	Indicates whether the auto pay option is available for automatic credit, automatic debit, or for both automatic credit and debit. The valid values are: • Credit • Credit and Debit • Debit
Start Date	Displays the date from when the automatic payment option is effective for the account.
End Date	Displays the date till when the automatic payment option is effective for the account.
Percentage	Displays the contribution of payment amount in percentage from the auto pay source (i.e., bank account) when the **Split Automatic Payment** feature is used.
Priority	Displays the order in which the system should consider the automatic payment option when multiple automatic payment options are defined for the same date range.
Auto Pay Source Code	Indicates the financial institution that receives the automatic payment request.
Auto Pay Route Type	Indicates when and how the automatic payment request of the account is routed to the financial institution.
Account Number	Displays the account number for which the automatic payment is defined.
Expires On	Displays the month and year of expiry for the automatic payment of the account.
Name	Displays the account name for which the automatic payment is defined.
Maximum Withdrawal Amount	Displays the maximum amount which can be withdrawn from the account through the automatic payment method.
Comments	Displays additional information about the automatic payment for the account.

- **Account Credit Rating** - Displays the credit rating details of the account. It contains the following fields:

Field Name	Field Description
Collection Class	Indicates how the account's debt is reviewed by the credit and collections processes (i.e., the account debt monitor and the write-off monitor).
Postpone Credit Review Until	Displays the date till when you want to postpone the account's debt review by the credit and collections processes (i.e., the account debt monitor and the write-off monitor).
Last Credit Review Date	Displays the last review date of the account's debt by the account debt monitor.
Current Credit Rating	Displays the current credit rating.
Current Cash Only Score	Displays the current cash only score.
Start Date	Displays the date from when the credit rating transaction affects the account's credit rating and cash-only score.
End Date	Displays the date till when the credit rating transaction affects the account's credit rating and cash-only score.
Affect Credit Rating By	Displays the effect of the credit rating transaction on the account's credit score.
Affect Cash-Only Score By	Displays the effect of the credit rating transaction on the account's cash-only score.
Comments	Displays additional information about the credit rating for the account.

Note: The **Account Credit Rating** section appears when you are viewing the details of a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

- **Account Persons** - Displays the details of the persons associated to the account. It contains the following fields:

Field Name	Field Description
Person ID	Indicates the person associated to the account.
Person Name	Displays the name of the person associated to the account.
Main Customer	Indicates whether the associated person is the main customer of the account.
Financially Responsible	Indicates whether the associated person is financially responsible for the account's debt.
Account Relationship Type	Indicates the relationship of the associated person with the main account.

- **Account Override Address** - Displays the overridden address of the account. It contains the following fields:

Column Name	Column Description
Country	Indicates the country where the account main customer is located.
Address 1	Displays the first line of the address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the address. It may contain details, such as street name.
Address 3	Displays the third line of the address. It may contain the landmark details.
Address 4	Displays the fourth line of the address.

Column Name	Column Description
City	Displays the city name.
County	Displays the county name.
State	Indicates the state where the city or county is located.
Province	Displays the location within the country where the person is located.
Postal	Displays the postal or zip code of the address.
House Type	Indicates the type of the house.
In City Limit	Indicates whether the address is within the city limit. The valid values are: • Yes • No
Geographic Code	Displays the geographic code of the address.

Note:

The above mentioned fields appear in the **Account Override Address** section when the respective data is available for the person.

Also, the labels of the address fields will change depending on the business label which is defined for the respective address field in the **Country** screen.

- **Bill Routing Information** - Displays the bill routing information of the account. It contains the following fields:

Field Name	Field Description
Receives Copy of Bill	Indicates whether you want the person to receive a copy of the account's bill.
Bill Format	Indicates the format in which you want the person to receive the account's bill. The valid values are: • Detailed • Summary
Address Source	Indicates the address where you want the person to receive the account's bill. The valid values are: • Account Override • Main • Multiple Account Override • Person
Number of Bill copies	Displays the number of copies of the account's bill you want the person to receive. **Note:** This field appears when the **Receives Copy of Bill** check box is selected.
Bill Route Type	Indicates how the account's bill is sent to the person. **Note:** This field appears when the **Receives Copy of Bill** check box is selected.
Receives Notification	Indicates whether you want the person to receive notifications about the account's bill.

Field Name	Field Description
	Note: By default, the **Receives Notification** check box is selected if the person is the main customer of the account.

Editing the Customer Registration Details

Prerequisites

To define a customer registration, you should have:

- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Customer class, invoice currencies, account categories, bill cycles, accrual cycles, account identifier types, auto pay source codes, auto pay methods, auto pay route types, account relationship types, bill formats, address sources, bill route types, and collection class defined in the application

  Note: The collection class is required when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.
- Deal review frequencies and currency codes defined in the application

  Note: These prerequisites are required when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

Procedure

To edit a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding *to* the customer registration whose details you want to edit.
   The **Main** tab appears in the **Customer Registration** screen.
3. Click the **Edit** button in the **Customer Registration** zone.

   The **Customer Registration** screen appears. It contains the following pages:

   - **Main** - Used to specify basic information about the person.
   - **Contact** - Used to specify the contact information about the person.
   - **Person Characteristics** - Used to define a list of characteristics for the person.
   - **Hierarchy** - Used to define the person to person relationship for the person
   - **Accounts** - Used to add the account details of the person.
   - **Deal** - Used to specify information about the deals created for the person.

     Note: This page appears only when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.
   - **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

   The **Main** page contains the following sections:

   - **Main** - Used to specify basic details about the person.
   - **Person Name** - Used to add the person names for customer registration.
   - **Person Phones** - Used to add the person phone details for customer registration.
   - **Person IDs** - Used to add the person identifiers for customer registration.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	Yes
Division	Used to indicate the division to which the person belongs. **Note:** You can view only those divisions to which you have access in the **Division** list.	Yes
Person Since Date	Used to specify the date from when the person is the main customer.	Yes
Customer Segment	Used to indicate the market segment to which the person belongs. **Note:** This field appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.	Yes
Customer Tier	Used to indicate the tier of the customer segment to which the person belongs. **Note:** This field appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.	Yes
Access Group	Used to indicate the user group that can access the customer registration. **Note:** The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears. On specifying the access group, the description of the access group appears corresponding to the **Access Group** field.	Yes
Immediate Refund	Used to indicate whether you want to initiate immediate refund for the person's accounts and its child persons' accounts.	No

4. Modify the required details in the **Main** section.
5. Add, edit, or remove the names of the person in the **Person Names** section.
6. Add, edit, or remove the phone details of the person in the **Person Phones** section.

7. Add or remove the identifier details of the person in the **Person IDs** section.
8. Define, edit, or remove the address of the person in the **Contact** page, if required.
9. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
10. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
11. Add, edit, or remove the account details of the person in the **Accounts** page, if required.
12. Add, edit, or remove information about the deals created for the person in the **Deal** page, if required.

Note: This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

13. Define, edit, or remove characteristics of the customer registration in the **Registration Characteristics** page, *if* required.
14. Click **Validate and Save**.
    The changes made to the customer registration are saved.

Approving a Customer Registration

You can view the number of customer registrations which are pending for an approval in the **Customer Registration** screen. The approver can review, and accordingly approve, reject, or ask the submitter to resubmit the customer registration based on the observations.

Note: The system will not allow you to approve, reject or resubmit a customer registration submitted by you.

Procedure

To approve a customer registration:

1. Do either of the following:

If you want to...	Then...
Approve a customer registration through the Customer Registration screen	**a.** Search for the customer registration in the **Customer Registration** screen. **b.** In the **Search Results** section, click the link in the **Customer Registration ID** column corresponding to the customer registration which you want to review.
Approve a customer registration from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-CustomerRegistration** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. **e.** Click **Search**. The **To Do Type Search** screen appears.

The **Customer Registration** screen appears.

2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is accurate, then click the **Approve** button in the **Customer Registration** zone.

Note: The **Approve** button appears when:

- The status of customer registration is in the **Approval In Progress**.
- A user with the approval To Do role is reviewing the customer registration.

Rejecting a Customer Registration

Prerequisites

To reject a customer registration, you should have:

- Reasons defined for the **Rejected** status of the **C1-CustomerRegistration** business object in the **Status Reason** screen

Note: The system will not allow you to approve, reject or resubmit a customer registration submitted by you.

Procedure

To reject a customer registration:

1. Do either of the following:

If you want to...	Then...
Reject a customer registration through the Customer Registration screen	**a.** Search for the customer registration in the **Customer Registration** screen. **b.** In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration which you want to review.
Reject a customer registration from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-CustomerRegistration** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the customer registration that you want to review.

   The **Customer Registration** screen appears.
2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is incorrect, then click the **Reject** button in the **Customer Registration** zone.

   The **Reject Customer Registration** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the customer registration. **Note:** The list includes only those reasons which are defined for the **Rejected** status of the **C1-CustomerRegistration** business object in the **Status Reason** screen.	Yes
Comments	Used to specify additional information while rejecting the customer registration.	No

   Note: The **Reject** button appears when:
   - The customer registration is in the **Approval In Progress** status.
   - A user with the approval To Do role is reviewing the customer registration.
4. Select the reason for rejection of the customer registration from the **Status Reason** field.
5. Click **Save**.
   The status of the customer registration is changed to **Rejected**.

Requesting to Resubmit a Customer Registration for Approval

Procedure

To initiate a resubmission request for a customer registration:

1. Do either of the following:

If you want to...	Then...
Request the submitter to resubmit a customer registration through the Customer Registration screen	**a.** Search for the customer registration in the **Customer Registration** screen. **b.** In the **Search Results** section, click the link in the **Customer Registration ID** column corresponding to the customer registration which you want to review.
Request the submitter to resubmit a customer registration from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-CustomerRegistration** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the customer registration that you want to review.

   The **Customer Registration** screen appears.
2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is incomplete and you want the submitter to make the required changes and resubmit the customer registration for approval, then click the **Re Submit** button in the **Customer Registration** zone.

   The **Resubmit Customer Registration** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes which the submitter should make in the customer registration before resubmitting it for approval.	Yes

Note: The **Re Submit** button appears when:

- The customer registration is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the customer registration.

4. Enter the comments in the respective field and then click **Save**.
   A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the customer registration type. In addition, the status of the customer registration is changed to **Draft**.

Part III

Customer 360° View

Topics:

- Customer 360° View
- Customer 360° Information
- Bill Information

Oracle Revenue Management and Billing provides you with the ability to quickly view in-depth information about the person by aggregating data from the application and presenting the same on a screen named **Customer 360° View**. This data can then be easily used for analysis. You can use the person or account details to view the 360° information of the person, such as:

- Basic details, additional attributes, linked accounts, hierarchy, and the customer contacts of a person
- Basic details, additional attributes, enrolled products, account persons list, automatic payment options, billing history, payment history, dispute details, hold details, and overdue processes details of the person's account
- Basic details of the assigned products, price list assignments, and effective price assignments for the person’s account.
- Basic details of the bill, adjustments which are swept onto the bill, activities (such as, payment, offset, refund, or write off) through which the bill is settled, high level summary and details of the bill segments included the bill, active hold requests due to which the bill is kept on hold, offset requests through which the bill is offset against another bill, and refund and write off requests through which the bill or its bill segment is either refunded or written off.

In other words, this feature allows you to drill down to see or act on all current and historical revenue management and billing details. This allows you to professionally and efficiently handle customer inquiries and complaints at the first point of contact, raising your customer service from previously unattainable levels and reducing the associated time and cost.

Customer 360° View

The **Customer 360° View** screen allows you to search for a person and account using various search criteria. You can then view the 360° information of the person and the person's account, and vice-versa. This screen contains the following zone:

- 360° Search on page 200

360° Search

The **360° Search** zone allows you to search for a person and its accounts overall information using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for the overall information of a person using the person or account details. The valid values are: • Person • Account **Note:** By default, the **Person** option is selected.	Yes
Division	Used to search persons or accounts which belong to a particular division.	No
Person Name	Used to search for a particular person using its primary or secondary name. If you specify the person name while searching for an account, the system searches all accounts where the person is the main customer. **Note:** This field appears when: • The **Person** option is selected from the **Search By** list. • The **Advanced Search** link is clicked while searching for an account.	No
Customer Segment	Used to search for a person which belong to a particular business component. **Note:** This field appears only when the **Person** option is selected from the **Search By** list and the **Advanced Search** link at the upper right corner of the **360° Search** zone is clicked.	No
Address	Used to search persons with a particular address or accounts whose main customer has a particular address. **Note:** This field appears when the **Advanced Search** link available in the right side of the **360° Search** zone is clicked.	No

Field Name	Field Description	Mandatory (Yes or No)
Phone Number	Used to search a person with a particular phone number. **Note:** This field appears when the **Person** option is selected from the **Search By** list and the **Advanced Search** link available in the right side of the **360° Search** zone is clicked.	No
Person Type	Used to search persons of a particular type. The valid values are: • Bill Group • Broker • Business • Group • Parent Customer • Person • Reinsurer Person • TPA Person **Note:** This field appears when the **Advanced Search** link available in the right side of the **360° Search** zone is clicked.	No
Prospect Person	Used to search for persons which are prospects for whom a deal is defined in the system. The valid values are: • Yes • No **Note:** This field appears when the **Person** option is selected from the **Search By** list and the **Advanced Search** link available in the right side of the **360° Search** zone is clicked.	No
City	Used to search persons who belong to a particular city or accounts' whose main customer belongs to a particular city. **Note:** This field appears when the **Advanced Search** link available in the right side of the **360° Search** zone is clicked.	No
Person ID	Used to search a particular person. **Note:** This field appears when the **Person** option is selected from the **Search By** list.	No
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for a person or account. **Note:** This field appears when: • The **Person** option is selected from the **Search By** list. • The **Account** option is selected from the **Search By** list and the **Advanced Search**	Yes (Conditional) **Note:** If you specify the person identifier as a search criteria, you have to select the person identifier type.

Field Name	Field Description	Mandatory (Yes or No)
	link available in the right side of the **360° Search** zone is clicked.	
Person Identifier	Used to search for a person or account by specifying the person identifier. **Note:** This field appears when: • The **Person** option is selected from the **Search By** list. • The **Account** option is selected from the **Search By** list and the **Advanced Search** link available in the right side of the **360° Search** zone is clicked.	Yes (Conditional) **Note:** If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Characteristic Type	Used to search persons or accounts with a particular type of characteristic. **Note:** This field appears when the **Advanced Search** link available in the right side of the **360° Search** zone is clicked.	No
Characteristic Value	Used to search persons or accounts with a particular characteristic. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** If you specify the characteristic type as a search criteria, you have to enter the characteristic value.
Customer Class	Used to search accounts which belong to a particular customer class. **Note:** This field appears when the **Account** option is selected from the **Search By** list.	No
Account ID	Used to search a particular account. **Note:** This field appears when the **Account** option is selected from the **Search By** list.	No
Account Identifier Type	Used to indicate the account identifier type based on which you want to search for an account. **Note:** This field appears when the **Account** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you specify the account identifier as a search criteria, you have to select the

Field Name	Field Description	Mandatory (Yes or No)
		account identifier type.
Account Identifier	Used to search an account with a particular identifier. **Note:** This field appears when the **Account** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Account Category	Used to search for accounts which belong to a particular account category. The valid values are: • Invoice Account • Settlement Account • Usage Account **Note:** This field appears when the **Account** option is selected from the **Search By** list.	No
Product	Used to search for accounts which are enrolled for a particular product. **Note:** The **Search** (🔍) icon appears corresponding to the **Product** field. On clicking the **Search** icon, the **Product Search** window appears.	No

Note:

You must specify at least one search criterion while searching for a person or account. One more search criterion is required when you are searching for a person or account using the division and/or customer class.

If you have specified any other search criterion along with the person ID or account ID the system ignores the additional search criterion and searches using the person ID or account ID respectively.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays information about the person. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person. This column appears only when you are searching for a person in the **360° Search** zone.
Person Name	Displays the name of the person.

Column Name	Column Description
	Note: This column appears only when you are searching for a person in the **360° Search** zone.
Primary Person Identifier Type	Indicates the primary identifier type associated with the person. **Note:** This column appears only when you are searching for a person in the **360° Search** zone.
Primary Person Identifier	Displays the primary person identifier. **Note:** This column appears only when you are searching for a person in the **360° Search** zone.
Account Information	Displays information about the account. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. This column appears only when you are searching for a account in the **360° Search** zone.
Primary Account Identifier Type	Indicates the primary identifier type associated with the account. **Note:** This column appears only when you are searching for a account in the **360° Search** zone.
Primary Account Identifier	Displays the primary account identifier. **Note:** This column appears only when you are searching for a account in the **360° Search** zone.
Main Customer	Indicates the main customer of the account. **Note:** This column appears only when you are searching for a account in the **360° Search** zone.
Division	Indicates the division to which the person or account belongs.

Note:

You can view the 360° information of the person or account by clicking the **View** (🔗) icon corresponding to the record in the **Search Results** section.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Person

Prerequisites

To search for a person, you should have:

- Divisions, customer segments, person types, and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)

Procedure

To search for a person:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.
   The **Customer 360° View** screen appears.
3. Select the **Person** option from the **Search By** list to indicate that you want to search for a person.
4. Enter the required search criteria in the **360° Search** zone.

   Note:

   You must specify at least one search criterion while searching for a person. One more search criterion is required when you are searching for a person using the division and/or customer class.

   The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

   You must specify division and/or customer segment when you are searching for a person using the city.

   You must specify division, customer segment, or any other criteria in the second group when you are searching for a person using the person type.

   If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the person using the person ID.

   ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

   The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.
5. Click **Search**.
   A list of persons that meet the search criteria appears in the **Search Results** section.

Searching for an Account

Prerequisites

To search for an account, you should have:

- Divisions, customer classes, person types, person identifier types, account categories, and account identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

Procedure

To search for an account:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, click **Customer Management** and then click **Customer 360° View**.
   The **Customer 360° View** screen appears.
3. Select the **Account** option from the **Search By** list to indicate that you want to search for an account.
4. Enter the required search criteria in the **360° Search** zone.

   Note:

   You must specify at least one search criterion while searching for an account. One more search criterion is required when you are searching for an account using the division and/or customer class.

   The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the fourth criteria group) and account identifier (in the third criteria group), the system searches using the account identifier instead of the person name.

   You must specify division and/or customer class when you are searching for an account using the city.

   If you have specified any other search criterion along with the account ID, the system ignores the additional search criterion and searches for the account using the account ID.

   ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

   The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.
5. Click **Search**.
   A list of accounts that meet the search criteria appears in the **Search Results** section.

- Hold Details on page 250

Person Information

The **Person Information** zone displays the details of the person. It contains the following sections:

- **Main** - Displays the basic information about the person. It contains the following fields:

Field Name	Field Description
Person Information	Displays information about the person. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the person.
Person Type	Indicates the type of the person. The valid values are: • Bill Group • Broker • Business • Group • Parent Customer • Person • Reinsurer Person • TPA Person
Immediate Refund	Indicates whether the person’s accounts and its child persons’ accounts are eligible for the automatic refund process.
Division	Displays the division to which the person belongs.
Relationship Manager	Displays the user who primarily deals with the person and offers various services to the person.

- **Person Identifiers** - Lists various types of identification associated with the person. It contains the following columns:

Column Name	Column Description
Person Identifier Type	Indicates the person identifier type.
Person Identifier	Displays the value of the person identifier type.

- **Financial Details** - Lists various types of financial details associated with the person. It contains the following fields:

Field Name	Field Description
Current Balance	Displays the current amount payable on the person's account.
Payoff Balance	Displays the total amount that is paid against the person's account.
Overdue Amount	Displays the overdue amount payable under the overdue process of the person's account.
Dispute Amount	Displays the dispute amount payable under the dispute request created for the person's account.

- **Contact Information** - Displays the contact details of the person. It contains the following fields:

Field Name	Field Description
Country	Indicates the country where the person is located.
Address 1	Displays the first line of the person's address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the person's address. It may contain details, such as street name.
Address 3	Displays the third line of the person's address. It may contain the landmark details.
Address 4	Displays the fourth line of the person's address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the person resides within the city limit. The valid values are: • Yes • No
City	Displays the city where the person is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the person is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.
Email ID	Displays the e-mail ID of the person.

Note: The above mentioned fields appear in the **Contact Information** section when the respective data is available for the person.

- **Phone Details** - Lists the phone details of the person. It contains the following columns:

Column Name	Column Description
Phone Type	Indicates the type of the phone number.
Phone Number	Displays the phone number of the person.

Additional Attributes

The **Additional Attributes** zone lists the characteristics of the person. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the person.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value. **Note:** The data appears in this column when the type of characteristic value is set to **Predefined Value** or **Foreign Key Value**.

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Linked Accounts

The **Linked Accounts** zone displays all the accounts of the person. It contains the following field:

Field Name	Field Description
Search By	Used to indicate the type of search to be performed. The valid values are: • Linked Accounts • Billing and Settlement Hierarchy

In addition, the **Linked Accounts** zone contains the following columns:

Column Name	Column Description
Account Information	Displays information about the account of the person. In addition, this column has a context menu (⌄) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. This field appears when the **Linked Accounts** option is selected from the **Search By** list.
Primary Account Identifier	Displays the primary account identifier of the account. **Note:** This field appears when the **Linked Accounts** option is selected from the **Search By** list.

Column Name	Column Description
Division	Displays the division to which the account belongs.
Billing Account Information	Displays information about the billing account of the person. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** This field appears when the **Billing and Settlement Hierarchy** option is selected from the **Search By** list.
Invoice Construct	Displays information about the invoice construct created for the account. **Note:** This field appears when the **Billing and Settlement Hierarchy** option is selected from the **Search By** list.
IGA Master Account	Displays information about the IGA master membership of the account. **Note:** This field appears when the **Billing and Settlement Hierarchy** option is selected from the **Search By** list.
Settlement Construct	Displays information about the settlement construct created for the account. **Note:** This field appears when the **Billing and Settlement Hierarchy** option is selected from the **Search By** list.
Account Autopay	Indicates whether the automatic payment process is defined for the account. The valid values are: • Yes • No **Note:** This field appears when the **Billing and Settlement Hierarchy** option is selected from the **Search By** list.

Note:

You can add one or more accounts to the person by clicking the **Add Account** link in the upper right corner of this zone.

You can view the **Customer 360° Information - Account** screen by clicking the **View** (🔗) icon corresponding to the record in the **Linked Accounts** zone.

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Person Hierarchy

The **Person Hierarchy** zone lists the following types of hierarchy in a tree structure:

- **Billing Hierarchy** - Indicates the parent-child relationship between the accounts used to consolidate charge into a single bill. It contains the following columns:

Column Name	Column Description
Construct Information	Displays the basic details of the construct. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Criteria	Indicates the bind variable for which you need to define the value.

Column Name	Column Description
	Note: The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Invoice Accounts	Displays the information of the invoice account. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Linked Accounts	Displays the details of all the linked account details of a particular person/ account hierarchy. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Start Date	Displays the date from when the construct is effective.
End Date	Displays the date till when the construct is effective.
Independent Usage Account	Indicates whether the account is billed separately for its usage. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.

- **Default Hierarchy** - Indicates the relationship between the person and its accounts. It contains the following columns:

Column Name	Column Description
Hierarchy	Displays information about the hierarchy. **Note:** It has a link. On clicking the link, the **Customer 360° Information** screen appears where you can view the details of the respective person or account.
Division	Indicates the division to which the hierarchy is associated.
Start Date	Displays the date from when the hierarchy is associated with the division.

Agreed Pricing	Indicates whether a predefined pricing agreement exists between the customer and the linked accounts. The valid values are:
	• Yes
	Note: It has a link. On clicking the link, the system behaves in the following manner:
	  • For customer, **Pricing(Person)** screen appears where you can view the details of all agreed price assignments of the customer.
	  • For account, **Pricing(Account)** screen appears where you can view the details of all agreed price assignments of the account.
	• No

Price List	Displays the price list which is assigned to customer.
Action	On clicking the **Drop-down** (▼) icon, corresponding to the customer or account, a list appears which helps in navigating to other screens in the application.

- **Settlement Hierarchy** - Indicates the parent-child relationship between the accounts which is responsible for paying the charges of related accounts. It contains the following columns:

Column Name	Column Description
Construct Information	Displays the basic details of the construct. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Criteria	Indicates the bind variable for which you need to define the value. **Note:** The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Settlement Accounts	Displays the information of the settlement account. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Linked Accounts	Displays the details of all the linked account details of a particular person/ account hierarchy. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Start Date	Displays the date from when the construct is effective.
End Date	Displays the date till when the construct is effective.

- **Statement Hierarchy** - Indicates the parent-child relationship between the accounts which is used to combine account activity from related account into a single statement. It contains the following column:

Column Name	Column Description
Statement Account	Displays the information of the statement account. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.

Customer Contacts

The **Customer Contacts** zone displays information about when and why the person was contacted. It contains the following columns:

Column Name	Column Description
Contact Date	Displays the date when the person was contacted.
Customer Contact Information	Displays information about the customer contact. **Note:** It has a link. On clicking the link, the **Customer Contact** screen appears where you can view the details of the customer contact.
Contact Type	Indicates the reason for the customer contact.
Comments	Displays additional information about the customer contact.

You can add one or more contacts related to the person by clicking the **Add Contact** link in the upper right corner of this zone.

You can filter the list using various search criteria (such as, **On or Before Contact Date**, **Contact Class**, **Contact Type**, and **Show Open Contacts Only**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Enrolled Products

The **Enrolled Products** zone lists the products to which the person's accounts are enrolled. It contains the following columns:

Column Name	Column Description
Product	Displays the name of the enrolled product. **Note:** It has a link. On clicking the link, the **Product** screen appears where you can view the details of the respective product.
Product Type	Indicates the type of the enrolled product.
Product Version	Displays the version of the enrolled product. **Note:** It has a link. On clicking the link, the **Product Version** screen appears where you can view the details of the respective product version.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Product Enrollment Information

The **Product Enrollment Information** zone lists the accounts of the person which are enrolled for the product version. It contains the following columns:

Column Name	Column Description
Account Information	Displays the concatenated string of information about the person's account that is enrolled for the product version. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Start Date	Displays the date from when the account is enrolled for the product version.
End Date	Displays the date till when the account is enrolled for the product version.
Product Priority	Displays the priority of the enrolled product version.

By default, the **Product Enrollment Information** zone does not appear in the **Customer 360° Information - Person** tab. It appears when you click the **Broadcast** (ᯤ) icon corresponding to an enrolled product in the **Enrolled Products** zone.

Billing History

The **Billing History** zone lists all the billing information of the person's account. It contains the following columns:

Column Name	Column Description
Account Information	Displays the concatenated string of information about the person's account separated by a comma (,). In addition, a context menu (⌄) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the account.

Column Name	Column Description
Bill Information	Displays the concatenated string of information about the bill separated by a comma (,). In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the bill.
Bill Amount	Displays the bill amount.
Unpaid Amount	Displays the unpaid amount of the bill.
Days Past Due	Displays the number of days past after the due date.
Billing Method	Displays the method used for generating bill.
Bill	On clicking the **View** (📄) icon corresponding to a bill, the **Bill** screen appears where you can view the details of the bill.

You can filter the list using the **On or before Bill Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Trial/Pending Bills

The **Trial/Pending Bills** zone lists the trial and pending bills which are created for the person. It contains the following columns:

Column Name	Column Description
Account Information	Displays the concatenated string of information about the person's account separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the account.
Bill Information	Displays the concatenated string of information about the bill separated by comma (,). **Note:** It has a link. On clicking the link, the **Trial Bill** screen appears where you can view the details of the respective bill.
Bill Amount	Displays the trial/pending bill amount.
Bill Method	Displays the method used for generating the bill.

You can filter the list using various search criteria such as (**Period Start Date**, **Period End Date**, **Period Min Amount**, **Max Amount**, and **Billing Method**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Payment History

The **Payment History** zone lists all the payment information of the person's account. It contains the following columns:

Column Name	Column Description
Account Information	Displays the concatenated string of information about the person's account separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the account.
Payment Event Information	Displays the concatenated string of information about the payment event of the account separated by a comma (,). **Note:** It has a link. On clicking the link, the **Payment Event** screen appears where you can view the details of the payment event.
Payment Date	Displays the date when the payment is created or canceled for the account.
Payment Amount	Displays the amount paid through the tender.
Payment Status	Displays the current status of payment. The valid values are: • Canceled • Error • Freezable • Frozen • Incomplete
Tender Source	Displays the tender source through which the payment is remitted.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Dispute Details

The **Dispute Details** zone lists the dispute requests that are created for the person's account. It contains the following columns:

Column Name	Column Description
Account Information	Displays the concatenated string of information about the person's account separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the account.
Dispute Request Information	Displays the concatenated string of information about the dispute request separated by a comma (,). **Note:** It has a link. On clicking the link, the **Dispute Request** screen appears where you can view the details of the dispute request.
Dispute Amount	Displays the amount which is on dispute for the account.
Status	Displays the status of the dispute request.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Hold Details

The **Hold Details** zone lists the hold requests which are created for the person. Note that only those hold requests are listed in this zone where the respective entity's start date is earlier than or equal to the system date and the entity's end date is later than or equal to the system date. However, note that the system does not list the hold requests which are either in the **Rejected** or **Released** status.

If two or more processes are kept on hold for the person through a hold request, the system will list multiple records for the hold request — one each for the process kept on hold through the hold request. This zone contains the following columns:

Column Name	Column Description
Account Information	Displays the concatenated string of information about the person's account separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the account.
Hold Request Information	Displays information about the hold request. **Note:** It has a link. On clicking the link, the **Hold Request** screen appears where you can view the details of the respective hold request.
Entity	Indicates the type of entity for which the hold request is created. The valid value is: • Account
Hold Process	Indicates the process that is kept on hold for the person.
Hold Reason	Indicates the reason why the hold request is created for the entity.
Start Date	Displays the date from when the hold request is effective.
End Date	Displays the date till when the hold request is effective.
Status	Indicates the status of the hold request. The valid value is: • Draft

Customer 360° Information - Account

The **Account** tab displays the basic details, account persons, enrolled products, characteristics, automatic payment details, timeline, billing history, payment history, dispute details, hold details, overdue process details, and trial bills of an account. It contains the following zones:

- Account Information on page 224
- Auto Pay Details on page 227
- Additional Attributes on page 227
- Enrolled Products on page 228
- Account Persons on page 228
- Error Transactions on page 229
- Timeline on page 230
- Billing History on page 234
- Trial/Pending Bills on page 234
- Payment History on page 235
- Dispute Details on page 235

- Hold Details on page 235
- Overdue Process Details on page 236

Account Information

The **Account Information** zone displays the details of the account. It contains the following sections:

- **Main** - Displays the basic information about the account. It contains the following fields:

Field Name	Field Description
Account Information	Displays the concatenated string of information about the account separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the account.
Division	Displays the division to which the account belongs.
Credit Rating	Displays the current credit rating of the account. **Note:** It has a link. On clicking the link, the **Account-C&C** tab appears where you can view the details of the credit rating.

- **Accounting Information** - Displays various accounting related information. It contains the following fields:

Field Name	Field Description
Eligible for Accrual	Indicates whether accrual is calculated for the account. The valid values are: • Yes • No
Accrual Cycle	Indicates the accrual cycle for the account.
Account on Hold	Indicates whether the account is on hold. The valid values are: • Yes • No
Account on Dispute	Indicates whether an account is on dispute. The valid values are: • Yes • No
Overdue Process for Account	Indicates whether an overdue process is created for the account. The valid values are: • Yes • No
Immediate Refund	Indicates whether the account has opted for the automatic refund process. The valid values are: • Yes • No
ECR Eligibility	Indicates whether the account is eligible for generating the earnings credit rate (ECR). The valid values are: • Yes

Field Name	Field Description
	• No
ECR Offset Eligibility	Indicates whether the account is eligible for generating the earnings credit rate (ECR) offset. The valid values are: • Yes • No
ECR Offset Distribution Type	Indicates the type of the ECR offset distribution for the account.
ECR Account Distribution Priority	Displays the priority of the ECR distribution for the account.
ECR Expiration Cycle	Indicates the ECR expiration cycle.

- **Contact Information** - Displays the contact details of the account's main customer. It contains the following fields:

Field Name	Field Description
Address Source	Indicates which address should be used to route the account's bills and/or quotes via the postal service.
Country	Indicates the country where the main customer is located.
Address 1	Displays the first line of the main customer's address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the main customer's address. It may contain details, such as street name.
Address 3	Displays the third line of the main customer's address. It may contain the landmark details.
Address 4	Displays the fourth line of the main customer's address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the main customer resides within the city limit. The valid values are: • Yes • No
City	Displays the city where the main customer is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the main customer is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.

Note:

The above mentioned fields except **Address Source** appear in the **Contact Information** section when the address source of the main customer is set to **Account Override** and the respective data is available for the account.

- **Account Identifiers** - Lists various types of identification associated with the account. It contains the following columns:

Column Name	Column Description
Account Identifier Type	Indicates the account identifier type.
Account Identifier	Displays the value of the account identifier type.

- **Billing Information** - Displays the billing information of the account. It contains the following fields:

Field Name	Field Description
Bill Cycle	Indicates the bill cycle of the account. **Note:** It has a link. On clicking the link, the **Bill Cycle** screen appears where you can view the details of the bill cycle. This field appears when the respective data is available for the account.
Last Bill	Displays the concatenated string of information about the last processed bill of the account separated by a comma (,). **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the bill. This field appears when last bill information exists for the account.
Previous Bill	Displays the concatenated string of information about the bill prior to the last bill of the account separated by a comma (,). **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the bill. This field appears when previous bill information exists for the account.
Pending Bill	Displays the concatenated string of information about the pending bill of the account. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the bill. This field appears when pending bill information exists for the account.
Auto Pay	Indicates whether automatic payment option is defined for the account. The valid values are: • Yes • No

- **Financial Details** - Displays the financial details of the account. It contains the following fields:

Field Name	Field Description
Current Balance	Displays the current amount payable on the account.

Field Name	Field Description
Payoff Balance	Displays the total amount that is paid against the account.
Overdue Amount	Displays the overdue amount payable under the overdue process of the account.
Dispute Amount	Displays the dispute amount payable under the dispute request created for the account.
Last Payment Information	Displays the concatenated string of information about the last payment made on the account. **Note:** It has a link. On clicking the link, the **Payment Event** screen appears where you can view the details of the payments made on the account. This field appears when last payment exists for the account.

Auto Pay Details

The **Auto Pay Details** zone lists the automatic payment options defined for the account. It contains the following columns:

Column Name	Column Description
Auto Pay Source Code	Indicates the source of funds used to make the automatic payment. For example, debit card or credit card.
Ext. Account No./Card No.	Displays the external account number/ Card number for the debit or credit card.
Auto Pay Usage	Indicates whether the auto pay option is available for automatic credit, automatic debit, or for both automatic credit and debit. The valid values are: • Credit • Credit and Debit • Debit
Last Four Digits of Card	Displays the last four digits of the debit or credit card. **Note:** The data appears in this column when the external type of the auto pay source code's tender type is set to **Credit Card Withdrawal**.
Percentage	Indicates the percentage of automatic payment that must be made through the automatic payment option.
Start Date	Displays the date from when the automatic payment option is effective.
End Date	Displays the date till when the automatic payment option is effective.
Priority	Indicates the order in which the automatic payment option should be considered for the effective date range.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Additional Attributes

The **Additional Attributes** zone lists the characteristics of the account. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the account.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value. **Note:** The data appears in this column when the type of characteristic value is set to **Predefined Value** or **Foreign Key Value**.

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Enrolled Products

The **Enrolled Products** zone lists the products for which the account is enrolled. It contains the following columns:

Column Name	Column Description
Product	Displays the product for which the account is enrolled. **Note:** It has a link. On clicking the link, the **Product** screen appears where you can view the details of the respective product.
Product Version	Displays the version of the enrolled product. **Note:** It has a link. On clicking the link, the **Product Version** screen appears where you can view the details of the respective product version.
Start Date	Displays the start date of the product enrollment.
End Date	Displays the end date of the product enrollment.
Product Type	Indicates the type of the enrolled product.
Product Priority	Displays the enrollment priority of the product.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view additional information about the enrolled product in the **Product and Pricing** tab by clicking the **View** (🔗) icon corresponding to a product in the **Enrolled Products** zone.

Account Persons

The **Account Persons** zone lists all the persons to which the account is linked. It contains the following columns:

Column Name	Column Description
Person Information	Displays information about the person to which the account is linked. In addition, this column has a context menu (⌄) which helps in navigating to other screens in the application.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.
Relationship Type	Indicates how the person is related to the account.
Main Customer	Indicates whether the person is a main customer. The valid values are: • Yes • No .
Financially Responsible	Indicates whether the person is financially responsible. The valid values are: • Yes • No

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view additional information about the person in the **Person** tab by clicking the **View** (🔗) icon corresponding to the person in the **Account Persons** zone.

Error Transactions

The **Error Transactions** zone lists all the error transactions of the account. It contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID. **Note:** It has a link. On clicking the link, the **Transaction Detail View** screen appears where you can view the details of the respective transaction.
Transaction Source	Displays the source from where the transaction is received.
Transaction Upload Date	Displays the date when the transaction is uploaded in the system.
Transaction Date	Displays the date when the transaction was performed.
Transaction Amount	Displays the transaction amount.
Transaction Volume	Displays the transaction volume.
Error Message	Displays the reason why the validation, price item determination, or billable charge creation process failed.

On clicking the **Broadcast** (📡) icon corresponding to a transaction, the **Transaction Legs** zone appears with the details of the respective transaction.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Transaction Legs

The **Transaction Legs** zone allows you to view the legs of a transaction. It contains the following columns:

Column Name	Column Description
Transaction ID	Indicates the transaction to which the transaction leg belongs.
Transaction Leg Status	Indicates the status of the transaction leg. The valid values are: • Uploaded • Initial Price Item Derived • Ignored • Error • Cancelled • Completed • Invalid
Account Information	Displays the concatenated string of information about the account which bears the charges for the transaction separated by a comma (,). The string includes the account identifier type, account identifier, and division (to which the derived account belongs).
Initial Price Item Code	Indicates the initial price item to which the transaction is mapped.
Price Item Parameters	Displays a comma-separated list of parameter values. It indicates the price item parameters and their values which are used along with the final price item for determining price item pricing.
Final Price Item Code	Indicates the final price item to which the transaction is mapped.
Rule	Indicates the rule which was met while determining the initial price item for the transaction. **Note:** It has a link. On clicking the link, the **Rule** screen appears where you can view the details of the respective rule.
Price Assignment ID	Indicates the effective pricing which is available for the account, price item or regular bundle (to which the price item belongs) or parent (regular) bundle (to which the regular bundle belongs) and/or variance parameter or price item parameters (parameter group) combination on the processing date.
Aggregate Transaction	Indicates whether the transaction leg is aggregated. The valid values are: • Yes • No
Billable Charge ID	Indicates the billable charge in which the transaction leg is included for billing.
Division	Indicates the division to which the derived account belongs. The derived account means the account which will bear the charges for the transaction.
Sequence	Displays the sequence number of the transaction leg.
Error Message	Indicates the reason why the price item pricing verification or billable charge creation process failed.

By default, the **Transaction Legs** zone does not appear in the **Customer 360° Information - Account** screen. It appears when you click the **Broadcast** (((•))) icon corresponding to a transaction in the **Error Transactions** zone.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Timeline

The **Timeline** zone displays the following information in a graphical presentation:

- Number of regular bills created for the account in a particular month
- Number of adhoc bills created for the account in a particular month
- Number of payments created for the account in a particular month
- Number of dispute requests created for the account in a particular month
- Number of active hold requests created for the account in a particular month

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Month	Used to indicate the month till when you want to display the above stated information. **Note:** By default, the current month appears in this field.	Yes
Year	Used to indicate the year till when you want to display the above stated information. **Note:** By default, the current year appears in this field.	Yes

Depending on the month and year specified in the above fields, the data for the respective month and previous 11 months is presented in the grid. For example, if the Month and Year is set to April 2017, then the data for the May 2016, Jun 2016, Jul 2016, Aug 2016, Sep 2016, Oct 2016, Nov 2016, Dec 2016, Jan 2017, Feb 2017, Mar 2017, and Apr 2017 appears in the grid. To view the data for a different period, you must accordingly change the month and year and then click **Search** (⊳) icon.

You can use the **Previous Year** (⋘), **Previous Month** (⋖), **Next Month** (⋗), and **Next Year** (⋙) icons to change the values specified in the above mentioned fields.

The following table indicates the data and the manner in which the data is presented in the grid:

Row Name	Row Description
Regular Bills	A small icon appears for each regular bill created for the account in the respective month. For example, if three regular bills are created for the account in the month of Jan 2017, two bills are created in the month of Feb 2017, and one bill is created in the month of Apr 2017, then three icons appear in the Jan 2017 column, two icons appear in the Feb 2017 column, and one icon appears in the Apr 2017 column. A text indicating the day of the month on which the bill was due appears on the icon. You can either display the day of the due date or bill date on the icon depending on the requirement. The following table indicates the color in which the icon appears depending on the condition which is satisfied: **If the bill is...** / **Then the icon appears in...** Fully Matched / Green Unmatched / Red On clicking the icon, the corresponding bill information appears at the bottom of the zone. It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the bill. **Note:** If you want to display the day of the due date on the icon, you must set the **Date To Use (D-Due Date, B-Bill Date)** parameter in the **C1-TL-OI-EVT** algorithm to **D**. However, if you want to display the day of the bill date on the icon, you must set the

<table>
<tr><th>Row Name</th><th>Row Description</th></tr>
<tr><td></td><td>Date To Use (D-Due Date, B-Bill Date) parameter in the C1-TL-OI-EVT algorithm to B.

You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the C1-TL-OI-EVT algorithm.</td></tr>
<tr><td>Adhoc Bills</td><td>A small icon appears for each adhoc bill created for the account in the respective month. For example, if three adhoc bills are created for the account in the month of Jan 2017, two bills are created in the month of Feb 2017, and one bill is created in the month of Apr 2017, then three icons appear in the Jan 2017 column, two icons appear in the Feb 2017 column, and one icon appears in the Apr 2017 column. A text indicating the day of the month on which the bill was due appears on the icon. You can either display the day of the due date or bill date on the icon depending on the requirement. The following table indicates the color in which the icon appears depending on the condition which is satisfied:

<table>
<tr><th>If the bill is...</th><th>Then the icon appears in...</th></tr>
<tr><td>Fully Matched</td><td>Green</td></tr>
<tr><td>Unmatched</td><td>Red</td></tr>
</table>

On clicking the icon, the corresponding bill information appears at the bottom of the zone. It has a link. On clicking the link, the Bill screen appears where you can view the details of the bill.

Note:

If you want to display the day of the due date on the icon, you must set the Date To Use (D-Due Date, B-Bill Date) parameter in the C1-TL-OI-EVT algorithm to D. However, if you want to display the day of the bill date on the icon, you must set the Date To Use (D-Due Date, B-Bill Date) parameter in the C1-TL-OI-EVT algorithm to B.

You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the C1-TL-OI-EVT algorithm.</td></tr>
<tr><td>Payments</td><td>A small icon appears for each payment created for the account in the respective month. For example, if one payment is created for the account in the month of Aug 2016, three payments are created in the month of Dec 2016, and four payments are created in the month of Mar 2017, then one icon appears in the Aug 2016 column, three icons appear in the Dec 2016 column, and four icons appear in the Mar 2017 column. A text indicating the day of the month on which the payment was created appears on the icon. The following table indicates the color in which the icon appears depending on the status of the payment:

<table>
<tr><th>Status</th><th>Color</th></tr>
<tr><td>Frozen</td><td>Green</td></tr>
<tr><td>Canceled</td><td>Red</td></tr>
<tr><td>Freezable</td><td>Blue</td></tr>
<tr><td>Error</td><td>Red</td></tr>
<tr><td>Incomplete</td><td>Yellow</td></tr>
</table>
</td></tr>
</table>

<table>
<tr><th>Row Name</th><th>Row Description</th></tr>
<tr><td></td><td>On clicking the icon, the corresponding payment information appears at the bottom of the zone. It has a link. On clicking the link, the Payment screen appears where you can view the details of the payment.

Note: You can change the color in which the text appears on the icon and the color in which the icon appears in the different status through the C1-TL-PY-EVT algorithm.</td></tr>
<tr><td>Dispute Requests</td><td>A small icon appears for each dispute request created for the account in the respective month. For example, if one dispute request is created for the account in the month of Aug 2016, three dispute requests are created in the month of Dec 2016, and four dispute request are created in the month of Mar 2017, then one icon appears in the Aug 2016 column, three icons appear in the Dec 2016 column, and four icons appear in the Mar 2017 column. A text indicating the day of the month on which the dispute request was created appears on the icon. The following table indicates the color in which the icon appears depending on the status of the dispute request:

<table>
<tr><th>Status</th><th>Color</th></tr>
<tr><td>Active</td><td>Green</td></tr>
<tr><td>Approved</td><td>Green</td></tr>
<tr><td>Rejected</td><td>Red</td></tr>
<tr><td>Approval In Progress</td><td>Orange</td></tr>
<tr><td>Draft</td><td>Orange</td></tr>
</table>

On clicking the icon, the corresponding dispute information appears at the bottom of the zone. It has a link. On clicking the link, the Dispute Request screen appears where you can view the details of the dispute.

Note: You can change the color in which the text appears on the icon and the color in which the icon appears in the different status through the C1-TL-DP-EVT algorithm.</td></tr>
<tr><td>Processes on Hold</td><td>A small icon appears for each active hold request for the account in the respective month depending upon the number of processes on hold. For example, if there is one active hold request having two processes on hold for the account in the month of Aug 2016 and two active hold requests as H1 and H2, having one process on hold for H1 hold request and four processes on hold for H2 hold request for the month of Dec 2016, then two icon appears in the Aug 2016 column and five icons appear in the Dec 2016 column. A text indicating the day of the month on which an entity was kept on hold appears on the icon. The following table indicates the color in which the icon appears depending on the status of the hold request:

<table>
<tr><th>Status</th><th>Color</th></tr>
<tr><td>Active</td><td>Green</td></tr>
</table>

On clicking the icon, the corresponding hold information appears at the bottom of the zone. It has a link. On clicking the link, the Hold Request screen appears where you can view the details of the dispute.

Note: You can change the color in which the text appears on the icon and the color in which the icon appears in the different status through the C1-TL-HR-EVT algorithm.</td></tr>
</table>

Billing History

The **Billing History** zone lists all the billing information of the account. It contains the following columns:

Column Name	Column Description
Bill Information	Displays the concatenated string of information about the bill separated by a comma (,). In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the bill.
Bill Amount	Displays the bill amount.
Unpaid Amount	Displays the unpaid amount of the bill.
Days Past Due	Displays the number of days past after the due date.
Billing Method	Displays the method used for generating bill.
Bill	On clicking the **View** (📄) icon corresponding to a bill, the **Bill** screen appears where you can view the details of the bill.

You can filter the list using the **On or before Bill Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Note:

You can add one or more bill to the person's account by clicking the **Add Bill** link in the upper right corner of this zone.

You can search the bill anomaly in the **Diagnostic Central** screen by clicking the **Bill Anomaly Search** link in the upper right corner of this zone.

You can view additional information about the bill in the **Bill Information** screen by clicking the **View** (🔗) icon corresponding to the bill in the **Billing History** zone.

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Trial/Pending Bills

The **Trial/Pending Bills** zone lists the trial and pending which are created for the account. It contains the following columns:

Column Name	Column Description
Bill Information	Displays the concatenated string of information about the bill separated by a comma (,). **Note:** It has a link. On clicking the link, the **Trail Bill** screen appears where you can view the details of the respective trial bill.
Bill Amount	Displays the trial/pending bill amount.
Bill Method	Displays the method used for generating the bill.

You can filter the list using various search criteria such as (**Period Start Date**, **Period End Date**, **Period Min Amount**, **Max Amount** and **Billing Method**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Payment History

The **Payment History** zone lists all the payment information of the account. It contains the following columns:

Column Name	Column Description
Payment Event Information	Displays the concatenated string of information about the payment event of the account separated by a comma (,). **Note:** It has a link. On clicking the link, the **Payment Event** screen appears where you can view the details of the payment event.
Payment Date	Displays the date when the payment is created or canceled for the account.
Payment Amount	Displays the amount paid through the tender.
Payment Status	Displays the current status of payment. The valid values are: • Canceled • Error • Freezable • Frozen • Incomplete
Tender Source	Displays the tender source through which the payment is remitted.

Note:

You can add one or more payment to the person's account by clicking the **Add Payment** link in the upper right corner of this zone.

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Dispute Details

The **Dispute Details** zone lists the dispute requests that are created for the account. It contains the following columns:

Column Name	Column Description
Dispute Request Information	Displays the concatenated string of information about the dispute request separated by a comma (,). **Note:** It has a link. On clicking the link, the **Dispute Request** screen appears where you can view the details of the dispute request.
Dispute Amount	Displays the amount which is on dispute for the account.
Status	Displays the status of the dispute request.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Hold Details

The **Hold Details** zone lists the hold requests which are created for the account. Note that only those hold requests are listed in this zone where the respective entity’s start date is earlier than or equal to the system date and the entity’s end date is later than or equal to the system date. However, note that the system does not list the hold requests which are either in the **Rejected** or **Released** status.

If two or more processes are kept on hold for the account through a hold request, the system will list multiple records for the hold request — one each for the process kept on hold through the hold request. This zone contains the following columns:

Column Name	Column Description
Hold Request Information	Displays information about the hold request. **Note:** It has a link. On clicking the link, the **Hold Request** screen appears where you can view the details of the respective hold request.
Status	Indicates the status of the hold request. The valid value is: • Draft
Entity	Indicates the type of entity for which the hold request is created. The valid value is: • Account
Hold Reason	Indicates the reason why the hold request is created for the entity.
Hold Process	Indicates the process that is kept on hold for the account.
Start Date	Displays the date from when the hold request is effective.
End Date	Displays the date till when the hold request is effective.

Overdue Process Details

The **Overdue Process Details** zone lists the overdue processes created for the bills of the account. It contains the following columns:

Column Name	Column Description
Overdue Process Information	Indicates the overdue process which is initiated for the bill and is currently in the **Active** status. In addition, a context menu (⌄) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Overdue Process** screen appears where you can view the details of the respective overdue process.
Overdue Amount	Displays the overdue amount for the account.
Number of Overdue Bills	Displays the total number of bills that are overdue for the account.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Customer 360° Information - Product and Pricing

The **Product and Pricing** tab allows you to view the details of the following:

- Products and its associated price items to which the account or account's of the person are enrolled
- Assigned price lists and its price items for the account or person
- Effective price assignments for the account or person

The **Product and Pricing** tab contains the following zones:

- Product on page 237
- Associated Price Items on page 238

Note: By default, the **Associated Price Items** zone does not appear in the **Product and Pricing** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the product in the **Product** zone.

- Price List Assignments on page 238
- Price List Price Items on page 239

Note: By default, the **Price List Price Items** zone does not appear in the **Product and Pricing** tab. It appears when you click the **Broadcast** (📡) icon corresponding to a price list in the **Price List Assignments** zone.

- Effective Price Assignments for Account on page 240

Note: The **Effective Price Assignments for Account** zone appears when you are viewing the enrolled products of an account.

- Effective Price Assignments for Person on page 244

Note: The **Effective Price Assignments for Person** zone appears when you are viewing the enrolled products for the persons account.

Product

The **Product** zone lists the following in a tree structure:

- Information string about the product for which the account or account's of the person are enrolled

Note: It has a link. On clicking the link, the **Product** screen appears where you can view the details of the respective product.

- Information string about the product version

Note: It has a link. On clicking the link, the **Product Version** screen appears where you can view the details of the respective product.

- Information about the product services which are offered by the product version
- Information about the add-on product services which are offered in the packaged product.

Note:

By default, the data does not appear in the **Product** zone. It appears when you click the **View** (🔗) icon corresponding to a product in the **Enrolled Products** zone of the **Account** or **Person** tab of the **Customer 360° Information** screen.

On clicking the **Broadcast** (📡) icon corresponding to the product, the **Associated Price Items** zone appears where you can view the associated price items of the product.

For more information on...	See...

Associated Price Items

The **Associated Price Items** zone displays information about the price items associated with the product. It contains the following columns:

Field Name	Field Description
Sequence No.	Displays the sequence number of the associated price item.
Pricing Information	Displays the concatenated string of information about the price item pricing. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of the respective price item pricing.
Price Item	Displays the price item.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Associated Price Items** zone does not appear in the **Product and Pricing** tab. It appears when you click the **Broadcast** (ᯤ) icon corresponding to a product in the **Product** zone.

Price List Assignments

The **Price List Assignments** zone allows you to view and filter price lists that are currently assigned to the account or account's of the person. You will not find any records in this zone if the account or account's of the person does not have any price list assigned to it. It contains the following columns:

Column Name	Column Description
Sequence No.	Displays the sequence number of the assigned price list.
Price List Information	Displays the concatenated string of information about the price list which is assigned to the account or account's of the person. **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the assigned price list.
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: • **Account Agreed** - Indicates price item pricing is agreed for the account. • **Account Price List** - Indicates price item pricing is defined in the price list which is assigned to the account. • **Account Inherited Price List** - Indicates price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Customer Agreed** - Indicates price item pricing is agreed for the main customer in the customer hierarchy. • **Customer Price List** - Indicates price item pricing is defined in the price list which is assigned to the main customer. • **Default Price List** - Indicates price item pricing defined in the price list is available in the default price list. • **Global Price List** - Indicates price item pricing defined in the price list is available in the global price list. • **Customer Inherited Price List** - Indicates price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the main customer.

Column Name	Column Description
	• **Parent Customer Agreed** - Indicates price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Price List** - Indicates price item pricing is defined in the price list which is assigned to the parent customer. • **Parent Customer Inherited Price List** - Indicates price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer. • **Product Default Price List** - Indicates product defined in the price list is available in the default price list.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** icon corresponding to the assigned price list, the **Price List Price Items** zone appears where you can view the price items assigned to the price list.

Price List Price Items

The **Price List Price Items** zone lists the price items that are assigned to the price list. You will not find any record in this zone if the price list does not have any price item assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string of information about the price item pricing for the price list separated by a comma (,). In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of the respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameters based on the price item pricing is defined for the price list. The order in which the parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item). **Note:** Information in this column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • Draft • Active • Inactive • Proposed • Rejected • Template
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • Regular • Post Processing

Column Name	Column Description
	• Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.

By default, the **Price List Price Items** zone does not appear in the **Product and Pricing** tab of the **Customer 360° Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the assigned price list in the **Price List Assignments** zone.

You can filter the list using the **Price Item**, **Effective Start Date** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Effective Price Assignments for Account

The **Effective Price Assignments for Account** zone lists the price item pricing (i.e. price assignments) which are effective on the current date. In other words, it lists effective pricing for price items or price item bundles assigned to the account either directly or through the customer hierarchy. The order in which the price assignments are listed is controlled by the **Price Assignment Search** algorithm defined for the division to which the account belongs. If required, you can filter effective price assignments using various search criteria.

Note:

The **Effective Price Assignments for Account** zone appears when the **Customer 360° Information** is searched for account.

If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

The **Effective Price Assignments for Account** zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Indicates the account whose effective price assignments are listed in this zone.	Not applicable
Effective Pricing Date	Used to search price assignments which are effective on a particular date. **Note:**	No

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. By default, this field is set to the system date.	
Pricing Status	Used to search price assignments with a particular status. The valid values are: • Active • Draft • Pending In Approval • Proposed • Recommended **Note:** By default, the **Active** option is selected.	No

Show Product, Default, and Global Pricing	Used to search price assignments inherited from the default or global price list. The valid values are:
	• **Yes** - Used when you want to search price assignments inherited from either of the following:
	  • Product-specific default price list defined for the division
	  • Default price list defined for the division
	  • Global price list
	• **No** - Used when you do not want to search price assignments inherited from either of the following:
	  • Product-specific default price list defined for the division
	  • Default price list defined for the division
	  • Global price list
	
	Note: By default, the **No** option is selected.
		No

Price Item	Used to search price assignments of a particular price item or price item bundle. **Note:** The **Search** ( ) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears where you can search for the respective price item.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string of information about price item pricing and the pricing ID for the account. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of the respective price item pricing.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Displays multiple parameters based on which the pricing is defined for the price item or price item bundle for assignment. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: • Account Agreed • Account Price List • Account Inherited Price List • Customer Agreed • Customer Price List • Default Price List • Global Price List • Customer Inherited Price List • Parent Customer Agreed • Parent Customer Price List • Parent Customer Inherited Price List • Product Default Price List
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the Rate Info column. However, if the price assignment has more than one price components, then, the **Rate Info** column contains a string indicating the tiering type and pricing currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the **Price Item Pricing** screen.
Price List Information	Displays information about the price list which is assigned to the account.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the respective rate schedule.
View Rate	On clicking the **View** (🔗) icon, the **Effective Pricing Information** screen appears where you can view the details of the respective rate of the price item pricing. **Note:** The **View** icon appears when the **Price Item Type** is set to **Rate**.
Edit	On clicking the **Edit** (✎) icon, the **Price Item Pricing** screen appears where you can edit the details of the existing price item pricing. **Note:** The **Edit** icon appears when the assignment level is **Account Agreed**.
Override	On clicking the **Override** (🎯) icon, the **Price Item Pricing** screen appears where you can override the price item pricing. **Note:** You can override a price item pricing assigned at any level in the customer hierarchy. On overriding a price item pricing, a new price item pricing which is specific to the account is defined at the account level and is then called account agreed pricing. A customer agreed or account agreed price assignment is effective for a particular duration and do not expire until you specify the end date manually. However, if you set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **Y**, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **N**.
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The number of records that can be displayed in the **Search Results** section is controlled via the **C1_PR_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1_PR_REC** feature configuration. For more information, refer to Setting the C1_PR_REC Feature Configuration on page 4656

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Effective Price Assignments for Person

The **Effective Price Assignments for Person** zone lists the price item pricing (i.e. price assignments) which are effective on the current date. In other words, it lists effective pricing for price items or price item bundles assigned to the person either directly or through the customer hierarchy. The order in which the price assignments are listed is controlled by the **Price Assignment Search** algorithm defined for the division to which the person belongs. If required, you can filter effective price assignments using various search criteria.

Note:

The **Effective Price Assignments for Person** zone appears when the **Customer 360° Information** is searched for person.

If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

The **Effective Price Assignments for Person** zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Indicates the person whose effective price assignments are listed in this zone.	Not applicable
Effective Pricing Date	Used to search price assignments which are effective on a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. By default, this field is set to the system date.	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	Used to search price assignments with a particular status. The valid values are: • Active • Draft • Pending In Approval • Proposed • Recommended **Note:** By default, the **Active** option is selected.	No

Show Product, Default, and Global Pricing	Used to indicate whether you want to search price assignments inherited from the default or global price list. The valid values are:
	• **Yes** - Used when you want to search price assignments inherited from either of the following:
	  • Default price list defined for the division
	  • Global price list
	• **No** - Used when you do not want to search price assignments inherited from either of the following:
	  • Default price list defined for the division
	  • Global price list
	Note: By default, the **No** option is selected.
		No

Price Item	Used to search price assignments of a particular price item or price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears where you can search for the respective price item.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string of information about price item pricing and the pricing ID for the person. In addition, this column has a context menu (⌄) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears with the details of the respective price item pricing.
Price Item	Displays the price item or price item bundle code.
Pricing Parameters	Displays multiple parameters based on which the pricing is defined for the price item or price item bundle for assignment.

Column Name	Column Description
	Note: This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: • Customer Agreed • Customer Price List • Customer Inherited Price List • Default Price List • Global Price List • Parent Customer Agreed • Parent Customer Price List • Parent Customer Inherited Price List
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the Rate Info column. However, if the price assignment has more than one price components, then the Rate Info column contains a string indicating the tiering type and pricing currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the Price Item Pricing screen.
Price List Information	Displays information about the price list which is assigned to the person. **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the respective rate schedule.
Edit	On clicking the **Edit** (✎) icon, the **Price Item Pricing** screen appears where you can edit the details of the existing price item pricing. **Note:** The **Edit** icon appears when the assignment level is **Customer Agreed**.
Override	On clicking the **Override** (⚑) icon, the **Price Item Pricing** screen appears where you can override the price item pricing. **Note:** You can override a price item pricing assigned at any level in the customer hierarchy. On overriding a price item pricing, a new price

	item pricing which is specific to the account is defined at the account level and is then called account agreed pricing. A customer agreed or account agreed price assignments are effective for a particular duration and do not expire until you specify the end date manually. However, if you set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **Y**, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **N**.
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The number of records that can be displayed in the **Search Results** section is controlled via the **C1_PR_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1_PR_REC** feature configuration. For more information, refer to Setting the C1_PR_REC Feature Configuration on page 4656

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Viewing Enrollment Details of a Product

Procedure

To view the enrollment details of a product:

1. Search for the person whose accounts are enrolled for a product in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose product enrollment details you want to view.
   The **Person** tab appears in the **Customer 360° Information** screen.
3. In the **Enrolled Products** zone, click the **Broadcast** icon (📡) corresponding to the product whose enrollment details you want to view.
   The **Product Enrollment Information** zone appears.

4. View the enrollment details of the product in the **Product Enrollment Information** zone.

Viewing the Bill Information

Procedure

To view the bill information:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the account whose details you want *t*o view.
   The **Account** tab appears in the **Customer 360° Information** screen.
3. In the **Billing History** zone, click the **View** (🔗) icon corresponding to the bill whose details you want to *v*iew.

   The **Bill Information** screen appears. It contains the following zones:

   - Bill Information on page 249
   - Settlement Activities
   - Hold Details on page 250
   - Offset Details on page 251
   - Bill Line Items on page 253
   - Garnishment Details
   - Refund and Write Off Details on page 251
   - Dispute Details on page 252
4. View the basic details of the bill in the **Bill Information** zone.
5. View the settlement activities of the bill in the **Settlement Activities** zone.
6. View the active hold requests due to which the bill is kept on hold in the **Hold Details** zone.
7. View the offset requests through which the bill is offset against another bill in the **Offset Details** zone.
8. View the selected bill's bill line item in the **Bill Line Items** zone.
9. View the garnishment adjustments of the bill in the **Garnishment Details** zone.
10. View the refund and write off requests through which the bill or its bill segment is either refunded or written off in the **Refund and Write Off Details** zone.
11. View the dispute requests that are created against the bill in the **Dispute Details** zone.

Viewing Price Items Associated to a Product

Procedure

To view the price items associated to a product:

1. Search for the account or person whose accounts are enrolled for a product in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the account or person whose details you want to view.
   The **Account** or **Person** tab appears in the **Customer 360° Information** screen respectively.
3. Click the **View** (🔗) icon corresponding to a product in the **Enrolled Products** zone.
   The **Product and Pricing** tab appears.
4. In the **Product** zone, click the **Broadcast** (📡) icon corresponding to the product whose associated price items you want to view.
   The **Associated Price Items** zone appears.
5. View the associated price items of the product in the **Associated Price Items** zone.

Bill Information

The **Bill Information** screen allows you to view:

- Basic details about the bill
- Active hold requests due to which the bill is kept on hold
- Offset requests through which the bill is offset against another bill
- Refund and write off requests through which the bill or its bill segment is either refunded or written off
- Dispute requests due to which bill is kept on hold
- Bill line items of the bill

The **Bill Information** screen contains of the following zones:

- Bill Information on page 249
- Hold Details on page 250
- Offset Details on page 251
- Refund and Write Off Details on page 251
- Dispute Details on page 252
- Bill Line Items on page 253

Bill Information

The **Bill Information** zone displays the details of the bill. It contains the following section:

- **Main** - Displays the basic information about the bill. It contains the following fields:

Field Name	Field Description
Bill Information	Displays the concatenated string of information about the bill separated by a comma (,). In addition, a context menu (⌄) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.
Alternate Bill ID	Displays the alternate bill ID. **Note:** This field appears only when the respective data is available for the bill.
Account Information	Indicates the account for which the bill is generated. In addition, a context menu (⌄) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.

Hold Details

The **Hold Details** zone lists the hold requests through which the bill is kept on hold or through which the bill generation process of the respective person or account is kept on hold. Note that only those hold requests are listed in this zone where the respective entities' start date is earlier than or equal to the system date and the entities' end date is later than or equal to the system date. It contains the following columns:

Column Name	Column Description
Hold Request Information	Displays information about the hold request. **Note:** It has a link. On clicking the link, the **Hold Request** screen appears where you can view the details of the respective hold request.
Status	Indicates the current status of the hold request. The valid values are: • Draft • Active
Entity	Indicates the type of entity for which the hold request is created. The valid values are: • Account • Bill • Person
Entity Information	Displays the concatenated string of information about the entity for which the hold request is created separated by a comma (,). In addition, this column has a context menu (⌄) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account**, **Bill**, or **Person** screen appears, respectively, where you can view the details of the respective entity.
Start Date	Displays the date from when the hold request is effective.
End Date	Displays the date till when the hold request is effective.

Offset Details

The **Offset Details** zone lists the offset requests through which the bill is offset against another bill. It contains the following columns:

Column Name	Column Description
Offset Request Information	Displays the concatenated string of information about the offset request separated by a comma (,). **Note:** It has a link. On clicking the link, the **Offset Request** screen appears where you can view the details of the respective offset request.
Offset Amount	Indicates the bill amount which is offset against another bill.
Creation Mode	Indicates the mode in which the offset request is created in the system. The valid values are: • Automatic • Manual
Offset Category	Indicates the category to which the offset request type belongs. The valid values are: • Advance Deposit • Auto Maintenance • Regular

Refund and Write Off Details

The **Refund and Write Off Details** zone lists the refund and write off requests through which the bill or its bill segment is either refunded or written off. It contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the refund or write off request is created.
Refund/Write Off Request Information	Displays the concatenated string of information about the refund or write off request separated by a comma (,). **Note:** It has a link. On clicking the link, the **Refund Request** or **Write Off Request** screen appears depending on whether the request is created for refund or write off.
Refund/Write Off Amount	Displays the total refund or write off amount.
Status	Indicates the status of the refund or write off request. The valid values are: • Approval In Progress • Cancelled • Deferred Processing • Draft • Processed • Rejected • Voided

Column Name	Column Description
Action	Indicates whether the request is created for refund or write off. The valid values are: • Refund • Write Off
Account Information	Displays the concatenated string of information about the account for which the refund or write off request is created. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Created By	Indicates the user who has created the refund or write off request.

You can filter the list using the **Action** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Dispute Details

The **Dispute Details** zone lists the dispute requests that are created for the bill of an account. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the dispute request is created for the bill.
Dispute Request ID	Displays the concatenated string of information about the dispute request separated by a comma (,). **Note:** It has a link. On clicking the link, the **Dispute Request** screen appears where you can view the details of the respective dispute request.
Dispute Amount	Displays the amount which is on dispute for the bill.
Status	Displays the current status of the dispute request. The valid values are: • Approval In Progress • Canceled • Draft • Processed • Rejected
Account Information	Displays the concatenated string of information about the account for which the bill dispute request is created separated by a comma (,). In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Created By	Indicates the user who has created the dispute request.

Bill Line Items

The **Bill Line Items** zone lists the information about the selected bill's bill line items. It contains the following columns:

Column Name	Column Description
Bill Line Item	Displays the concatenated string of information about the bill line item of the selected bills separated by a comma (,). The valid values are: • Bill Segment • Adjustment
Bill Line Item Information	Displays the concatenated string of information about the bill line item separated by a comma (,). In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill Segment** or **Adjustment** screen appears where you can view the details of the respective bill segment or adjustment.
Amount	Displays the amount of the bill line item.
Contract Information	Displays the concatenated string of information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.

You can filter the list using the **Bill Segment Date From** and **To** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Part
IV

Customer 360° Dashboard

Topics:

- Customer Hierarchy
- Financials
- Product and Pricing
- Billing and Payments
- Disputes and Adjustments
- Deals

Oracle Revenue Management and Billing offers a 360° dashboard that provides comprehensive, real-time, and interactive view of the customer's profile, financials, product and pricing, billing and payments, disputes, and deals. This dashboard built on Oracle's Redwood design principles organizes the functional data using scoreboards at the top of the screen. You can access the required information with minimal clicks, thereby enhancing the user experience and screen efficiency.

At present, we have offered this enhanced 360° dashboard to view the information at the customer level and not at the account level. For account level 360° information, you can continue to use the old **Customer 360° Information** screen until we design the new enhanced **Account 360° Dashboard** in the upcoming release. You can access the new **Customer 360° Dashboard** from the **Customer 360° View** screen.

The **Customer 360° Dashboard** displays key customer information at the top of the screen. The display order in which the key customer attributes are shown is configurable with the option to view more attributes in the drawer (i.e., side panel). The **Quick Links** in the extreme right-corner enables you to launch the entity-specific context menu and navigate to other screens in the application. The screen is functionally split into different scoreboards. Each scoreboard provides a quick overview of key metrics (KPI), such as total usage accounts in the customer hierarchy, total outstanding amount of the customer, number of effective prices, total overdue amount, total dispute amount, and number of active deals, apart from the detailed information. The different scoreboards in **Customer 360° Dashboard** are:

- Customer Hierarchy on page 257
- Financials on page 257
- Product and Pricing on page 257
- Billing and Payments on page 258
- Deals on page 259

If all the accounts in the customer hierarchy have the same invoice currency, the system displays all the statistics in the respective invoice currency. But, if all the accounts in the customer hierarchy do not have the same invoice currency, the system does the currency conversion in the customer's division currency and displays the statistics in the division's base currency. However, if the customer does not belong to any division, the system does the currency conversion in the implementation currency (i.e., currency defined in the installation options) and displays the statistics in the implementation currency.

To address this currency conversion requirement for **Customer 360° Dashboard**, the following new columns are added to the **C1_FT_EXT** table - IMPL_CURCY_CD, IMPL_CURRENCY_AMT, IMPL_CURRENCY_EXCHRATE, IMPL_CURRENCY_EXCHRATE_ID,

ACCT_DIV_CURCY_CD, ACCT_DIV_CURCY_AMT, ACCT_DIV_EXCHRATE, ACCT_DIV_CUR_EXCHRATE_ID, PER_DIV_CURCY_CD, PER_DIV_CURCY_AMT, PER_DIV_EXCHRATE, PER_DIV_CUR_EXCHRATE_ID.

A new batch named **C1-FTUPD** is introduced in this release. It is a one-time upgrade batch that you need to execute before using the new Customer 360° dashboard. It will update the data in the newly introduced columns for the required financial transactions. The system will then accordingly do the currency conversion and display the statistics in the dashboard. However, before executing this batch, you need to attach an algorithm created using the **C1-CREFTEXT** algorithm type to the **Post FT Creation** system event of all the customer classes.

Customer Hierarchy

The **Customer Hierarchy** scoreboard displays the legal hierarchy of the customer. It contains the following tabs:

- **Default Hierarchy** – Indicates the immediate parent customer (if any), customer, its accounts, child persons, child person's accounts, grandchild persons, and grandchild person's accounts in the customer hierarchy. The system displays the hierarchy icon corresponding to the persons that indicates whether the person is an independent person, parent person, person at the middle layer, or child person in the hierarchy. It also displays the division to which the person or account belongs. The system indicates whether any agreed pricing exists for the person or account. If so, the system indicates the number of agreed pricing available for the respective person or account. Similarly, the system indicates whether any price list is assigned to the person or account. If so, the system indicates the number of price list assignments available for the respective person or account. A hyperlink appears on the information strings in the **Agreed Pricing** and **Price List** columns. If you click the agreed pricing link, you can view the details of all the agreed price item pricing in the **Agreed Pricing Information** screen.

  Similarly, if you click the price list assignment link, you can view the list of price list assignments in the side panel.
- **Billing Hierarchy** – Displays all the effective invoice constructs where the customer's invoice accounts are included. It also lists the usage accounts linked to the respective invoice construct. Note that these linked usage accounts may belong to the customer or any other customer in the system. Additionally, the usage accounts of the customer which are not yet included to any invoice construct are listed as the unassigned usage accounts.
- **Settlement Hierarchy** – Displays all the effective settlement constructs where the customer's settlement accounts are included. It also lists the usage and invoice accounts linked to the respective settlement construct. Note that these linked usage and invoice accounts may belong to the customer or any other customer in the system.
- **Statement Hierarchy** – Lists the statement constructs in which any of its account or contract from the hierarchy is included.

Financials

The **Financials** scoreboard provides insights into customer's financial performance. It contains the following three panels:

- **Revenue Trend** – Displays the amount billed to the customer for various services over past 13 months. You can view the data in both tabular and graphical formats. The total revenue of the customer is shown as the lifetime value.
- **Product Usage Trend** – Displays the number of services availed in past 13 months. You can view the data in both tabular and graphical formats.
- **Product Revenue** – Displays the revenue generated from each service offered to the customer. You can view the data in both tabular and graphical formats. You can opt to sort the data in order of top (descending) or least (ascending) performance. You can view the data at the price item, hierarchy entity, or parent hierarchy entity level.

Product and Pricing

The **Product and Pricing** scoreboards provides information about the price items and price lists assigned to the customer. It contains the following three panels:

- **Effective Price Assignments** – Lists the effective pricing of the customer. It contains the following tabs:
  - **Customer** – Lists all the effective pricing of the customer in the tabular or hierarchy format.
  - **Account Agreed Pricing** – Lists all the effective account agreed pricing from the customer hierarchy in the tabular format.

- **Price List Assignment Information** – Lists the price lists which are assigned to the customer. It contains the following tabs:
  - **Customer View** – Lists all the price lists which are directly or indirectly assigned to the customer. On clicking the hyperlink, you can view the pricing details of the price list in the **Price List Pricing Information** screen.
  - **Account View** – Lists all the price lists which are directly assigned to the accounts in the customer hierarchy. On clicking the hyperlink, you can view the pricing details of the price list in the **Price List Pricing Information** screen.
- **Product Enrolled** – Lists the products which are assigned to the customer.

Billing and Payments

The **Billing and Payments** scoreboard displays the billed vs settled amounts of the customer. It contains the following three panels:

- **Bills** – Indicates the number of bills created for the customer and the total billed amount in the given period. You can change the period using the given filters. In the tabular and graphical formats, you can view the number of bills under each category – Completed Bills, Bills in Review, Ready For Completion, Anomaly Bills, Bills in Error. You can also click the category to view the details of all the bills under the respective category.
- **Bills Vs Payments** – Displays the total billed amount and payments received against those bills for last 6 months in the tabular and graphical formats.
- **Payments** – Enables you to view all the payments of the customer for the given period under each category – draft, allocated, partially allocated, unallocated. On clicking the **More Details** link, you can view the details of the payments in the respective category.
- **Outstanding Dues By Aging Bucket** – Displays the overdue bills of the customer in different aging buckets using the graphical format. On clicking the **More Details** link, you can view the details of all the overdue bills.

Disputes and Adjustments

The **Disputes and Adjustments** scoreboard provides insights into customer's financial performance. It contains the following three panels:

- **Dispute Requests** – Classifies all the dispute requests of the customer under two status categories – **In Progress** and **Processed**. Each status category is associated with a set of underlying lifecycle statuses. For example, **In Progress** will show all the dispute requests in the **Draft** and **Approval In Progress** statuses. On clicking the **View All** link, you can view the details of all the dispute requests.
- **Hold Requests** – Classifies all the hold requests of the customer under two status categories – **Active** and **In Progress**. Each status category is associated with a set of underlying lifecycle statuses. For example, **Active** will show all the hold requests in the **Active**, **Release Approval In Progress**, and **Return Release Request to Submitter** statuses. On clicking the **View All** link, you can view the details of all the hold requests.
- **Adjustments** – Classifies all the refund, write off, and other adjustments of the customer under two status categories – **In Progress** and **Processed**. Each status category is associated with a set of underlying lifecycle statuses. On clicking the **View All** link, you can view the details of the refund, write off, and other adjustments.

Note: When you click the **View All** link, the system, by default, lists the records which belong to the respective status category in the side panel. However, you can filter the records based on the status in the side panel. Additionally, you can view the details of records with a status (if any) other than the ones included in the above-mentioned status categories.

Deals

The **Deals** scoreboard displays the deal information of the customer. It contains the following panel:

- **Deals** – Classifies all the deals of the customer and its accounts under two status categories – **Active Deals** and **Pending Deals**. Each status category is associated with a set of underlying lifecycle statuses. For example, **Active Deals** will show all the deals in the **Closed**, **Fully Orchestrated**, **Partially Orchestrated**, and **Pending for Review** statuses. You can also add a deal for a customer or an account through this panel. On clicking the **View All** link, you can view the details of the deals.

Note: When you click the **View All** link, the system, by default, lists the deals which belong to the respective status category in the side panel. However, you can filter the deals based on the status in the side panel. Additionally, you can view the details of deals with a status (if any) other than the ones included in the above-mentioned status categories.

Part V

Account 360° Dashboard

In this release, Oracle Revenue Management and Billing offers a 360° dashboard that provides comprehensive, real-time, and interactive view of the account’s profile, financial’s, product and pricing, billing and payments, disputes and adjustments, and deals. This dashboard built on Oracle's Redwood design principles organizes the functional data using scoreboards at the top of the screen. You can access the required information with minimal clicks, thereby enhancing the user experience and screen efficiency.

Unlike the **Customer 360° Dashboard** which focuses on the individual customer and its associated accounts, the Account 360° Dashboard displays information exclusively for a specific account.

Part VI

Billing Dashboard

Topics:

- Bill Contributions and Billing Variations
- AI Insight in Billing Dashboard

A new dashboard named billing statistics dashboard is offered by Oracle Revenue Management and Billing in this release that provides comprehensive details about the billing and collection status for a selected billing period. By default, the system considers the billing statistics for the current month which can be changed by clicking the **Filters** ( ) icon available in the top right corner of the dashboard. At present, the dashboard offers you to view the billing statistics for the last 12 months. You can also view the billing statistics for a particular division to which you have access in system. If you filter the data for a particular division, then, all the amounts shown in the dashboard will be in the division currency. Also, you can filter the data for viewing the billing statistics of a particular bill cycle period.

Bill Contributions and Billing Variations

The billing dashboard is now enhanced to view two read-only dashboard areas and/or tabs for analyzing billed revenue: **Bill Contributions**, which shows where revenue came from in a selected period, and **Billing Variation**, which compares that period with the preceding one. Both use the dashboard's bill creation month and optional bill cycle and division filters.

- **Bill Contributions**

  The **Bill Contributions** tab on the **Billing Dashboard** screen now shows the number of contributing price items. This metric helps you see how many price items contributed a nonzero billed amount for the period you are viewing. The count follows the dashboard filter options such as, Bill Creation Month, Division, and Bill Cycle. Price Items with a zero billed amount are excluded. The metric uses the same period, division, and access rules as the Price Item detailed view, so you can use that view to explore the contributions behind the count.

  Note: Bill-cycle results use an eligible completed bill-cycle period. If there are no qualifying Price Items, the scorecard displays 0.

  The **Bill Contributions** tab contains the following scorecards:

  - **Top & Bottom Analysis:** This scorecard helps you to see which Product Groups, Parent Price Items, and Price Items contribute the most or least billed revenue for a selected period. You can also perform the following actions on this scorecard:
    - Choose a hierarchy to view its top 10 or bottom 10 contributors.
    - Switch between a chart for a quick comparison and a table for a closer look.

      Note: The panel opens with Product Group, Top Performing, and chart view selected.
    - Click the **View All** link to see every matching contributor with a nonzero billed amount. The detailed view shows each contributor's bill count and billed amount and lets you sort the results from highest to lowest or lowest to highest.
    - For Price Items, turn on **Pricing Parameter View** to see separate results for each pricing parameter group. You can also select a Price Item code to open its existing detail page.

      Note: Results use the selected bill creation month, or the latest eligible completed period when you select a bill cycle. Your division selection narrows the results, and amounts appear in the applicable currency. Only data you are authorized to view is included in the scorecard.
  - **Customers by Revenue:** This scorecard helps you see which customers contributed the most or least billed revenue for the selected billing period.
    - The panel opens in chart view with the top performing customers. Switch to least performing to see the lowest contributors or change between chart and table views. Each summary shows up to 10 customers.
    - Click the **View All** link to open all customers' revenue analysis. This view includes every matching customer with a nonzero revenue total, rather than only the 10 shown in the summary. You can order the full list from highest to lowest or lowest to highest revenue. Click on the customer's name in the detailed view to open that customer's **Customer 360** page.

    Note:

    Results follow the Billing Dashboard's selected Bill Creation Month and optional Bill Cycle and Division filters. With no Bill Cycle selected, the panel uses the selected month. With a Bill Cycle selected, it uses the latest eligible completed billing window.

    Revenue is shown in the selected division's currency when a division filter is applied; otherwise, it uses the implementation currency. Customers with a zero-revenue total are excluded. Rankings use the signed revenue amount, so a customer with negative revenue may appear among the least performing customers.

    The panel shows only customers and divisions to which you have access in the system.

- **Billing Variations**

  The **Billing Variation** tab on the **Billing Dashboard** screen displays the bill amount for the selected period. You can view the amount by month or by bill cycle, depending on the filters you apply. If no bill cycle is selected, the scorecard uses the selected month. If a bill cycle is selected, it uses the applicable bill-cycle period. The **Billing Variations** tab contains the following scorecards:

  - **Performance by Revenue Variation:** This scorecard helps you see how revenue has changed between the current and previous billing periods. It highlights changes at the Product Group, Parent Price Item, and Price Item levels. You can also perform the following actions on this scorecard:
    - Switch between Product Group, Parent Price Item, and Price Item to see revenue variation at the level you need.
    - View up to 10 results with the highest absolute variation or up to 10 with the lowest absolute variation for the selected level.
    - Compare amounts or percentages - Amount variation shows the difference in revenue between periods. Percentage variation shows the change relative to the previous period.
    - Switch views without changing your selection.
    - Using the filter option, set a minimum variation threshold to focus on changes that matter to you.

      Note: The dashboard shows results whose absolute variation is greater than the threshold. You can keep separate amounts and percentage thresholds for each hierarchy level. Percentage thresholds must be between 0 and 100.
    - Click the **View All** link to open a detailed list of every result that meets the active criteria.

      Note: In **Price Item** view, you can also separate results by pricing parameter group and open a price item's maintenance context from its entry.
  - **Customers by Revenue Variation:** This scorecard helps you see which customers had the largest and smallest revenue changes between the selected billing period and the preceding period. It compares monthly periods or bill-cycle periods, depending on your dashboard selection. You can also perform the following actions on this scorecard:
    - Switch between the monetary change and the percentage change for each customer.
    - View up to 10 customers in each group for the selected measure.
    - Switch views to examine the same summary data in the format that works best for you.
    - Set a minimum amount or percentage threshold or reset it to see results without that filter.
    - Click the **View All Customers** link for a detailed list, then sort it by highest or lowest variation. Select an authorized customer to open that customer's record.

      Note:

      Revenue variation is the current period's revenue minus the previous period's revenue. A positive value indicates an increase; a negative value indicates a decrease. Greatest and least rankings use the size of the change, so a large decrease can appear among the greatest variations.

      A threshold includes changes greater than the value you enter. For example, a threshold of 100 excludes a change of exactly 100. Amounts appear in the division's currency when a division is selected; otherwise, they appear in the implementation currency.

      The panel is read-only. It shows only customer data that your existing access permissions allow you to view.

AI Insight in Billing Dashboard

Insight generation now uses a hybrid approach. The application calculates metrics and structures the results, then either uses an LLM to write the narrative from relevant data or fills a predefined template without calling an LLM. This makes template insights faster and more predictable, reduces data sent to the model in LLM mode, and improves consistency and metric accuracy. The **Insights** panel presents an overview, key metrics, correlations, and anomalies.

To implement the hybrid approach, a new option type **LLM required/not required** in the **C1-AIMLFC** feature configuration is introduced in this release.

The **Billing Dashboard** now provides two AI-generated insights to help you understand billing activity and spot items that may need attention.

- **Billing Dashboard Summary Insights**

  The **Billing Dashboard** now brings key billing results and review activity together in a summary. You can use it to spot differences from past billing periods and identify billing cycles that may need attention.

  The insight includes:

  - **Bill count and amount comparisons:** Used to view how the latest bill run compares with historical averages for the number of bills and the total billed amount. The summary shows whether each result is above or below its average.
  - **Bill review progress:** Used to view how many bills are in review, the average number of days they have been in review, and the longest time a bill has remained in review.
  - **Billing cycle insights:** Used to view which billing cycles have bills in review or error, where billing anomalies have been detected, and which cycles show successful completion or progress. Overall indicators such as At Risk and Healthy help you assess cycle status quickly.

  The summary uses the bill cycle and bill creation month selected on the dashboard, along with the billing data for that context.

  Note:

  The averages come from the completed bills in the billing trend data. They use up to 12 preceding billing periods and exclude the most recent billing period.

  The average billed amount is rounded to two decimal places whereas, the average bill count is rounded to a whole number.

- **Billing Trend Insights**

  Billing Trend Insights helps you to understand how the billing activity changes over time. It summarizes the bill count and billed amount shown in the **Billing Trend Summary** chart, making it easier to spot unusual periods and decide where to look more closely.

  The insight includes:

  - **Trend overview:** A summary of bill count and billed amount across the reporting period, including the highest, lowest, and ending values.
  - **Bill count pattern:** The periods with the most and fewest bills and how bill volume changed over time.
  - **Billed amount pattern:** The periods with the highest and lowest billed amounts and how billed revenue changed over time.
  - **Key metrics:** Average bill count and billed amount, alongside the peak and low values and their corresponding periods.
  - **Trend comparison:** Periods when bill count and billed amount rose or fell together, and periods when they moved in different directions.
  - **Items to review:** Periods with no billing activity or a zero billed amount.

Part VII

Invoicing Group

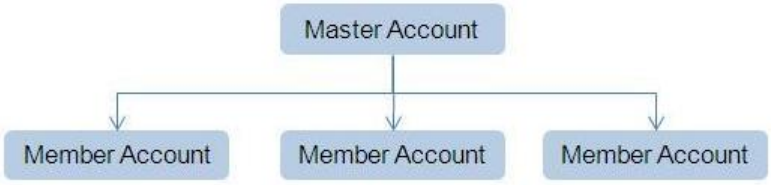
Topics:

- Manage Invoicing Groups
- Invoicing Group Maintenance - Add/Edit
- Invoicing Group Information

Invoicing group allows you to combine the charges for multiple accounts onto one bill for each billing period. It consists of the following:

- **Master Account** - The group level account that controls the billing.
- **Member Accounts** - The accounts whose bills are aggregated at the group level.

The following figure is a graphical representation of an invoicing group:



You can create an invoicing group by adding member accounts to the master account. An account can be the master account in the invoicing group when its **Invoice Group Account** characteristic type is set to **Y**. On the other hand, an account can be added as a member to the master account when its **Invoice Group Account** characteristic type is set to **N**.

Note: You can define the Invoice Group Account characteristic for the account when the **Invoice Group Account** option type in the **C1_ACCTINFO** feature configuration is set. If the **Invoice Group Account** option type in the **C1_ACCTINFO** feature configuration is not set, you will not be able to indicate whether the account is a master or member account. For more information, refer to Setting the C1_ACCTINFO Feature Configuration on page 4622.

There is no restriction on the number of accounts that can be added to the master account. The accounts in the invoicing group can belong to different persons and may have different currencies, but they should be from the same banking division and person hierarchy. If the member accounts have a different invoice currency from the master account, the member account's charges will be converted to the master account's currency during billing.

Balances are maintained at the master account level. Bills are added to the master account's balance, and payments are subtracted from that balance. However, the charges can be traced back to the originating member accounts. The master account cannot have charges of its own; all charges come from the member accounts. However, when an account does not belong to any master account, it is billed individually with its charges appearing on the bill.

The contracts linked at the member level are duplicated at the master level when member accounts are added to the master account. However, note that only contracts which are eligible for billing are duplicated at the master

level. Once a contract is duplicated at the master level, you need to activate the contract at the master level. Otherwise, the charges will be billed to the member account instead of the master account.

Manage Invoicing Groups

The **Manage Invoicing Groups** screen allows you to search for the master and member accounts using various search criteria. Through this screen, you can navigate to the **Invoicing Group Maintenance - Add/Edit** and **Invoicing Group Information** screens.

This screen contains the following two sections:

- Search Criteria
- Search Results

Searching for a Master Account

Prerequisites

To search for a master account, you should have:

- Divisions, billing cycles, and customer classes defined in the application
- Master accounts created in the application

Procedure

To search for a master account:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, click **Billing Management** and then click **Manage Invoicing Groups**.
   The **Manage Invoicing Groups** screen appears.

Field Name	Field Description	Mandatory (Yes or No)
Invoicing Group Assignment Type	Used to indicate whether you want to search for a master or member account.	Yes
Account ID	Used to specify the account ID.	No
Division	Used to specify the division whose accounts you want to search.	No
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) **Note:** If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier type.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to enter the account identifier.

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Used to specify the person whose accounts you want to search.	Yes (Conditional) **Note:** If you specify the billing cycle or person class as a search criteria, you have to specify the person name.
Billing Cycle	Used to specify the billing cycle during which the account is billed.	No
Person Class	Used to specify the customer class of the account.	No

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the first group is used for searching. For example, if you enter Account ID and Person Name (which are in different criteria groups), the system searches using Account ID, which appears before Person Name.

Note: You must specify at least one search criterion while searching for a master account.

3. Select **Master** from the **Invoicing Group Assignment Type** list.
4. Specify the search criteria in any of the criteria groups.
5. Click **Search**.

The master accounts that meet the search criteria and to which you have access based on the account's access group appear in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Account ID	Displays the master account ID. **Note:** It has a link. On clicking the link, the **Invoicing Group Maintenance - Add/Edit** screen appears where you can view the details of the respective master account.
Account Identifier Type	Displays the account identifier type of the master account.
Account Identifier	Displays the value of the account identifier type.
Account Currency	Displays the invoice currency of the master account.
Division	Displays the division to which the master account belongs.
Person Name	Displays the name of the main customer.
Customer Class	Displays the customer class of the master account.
Billing Cycle	Displays the billing cycle during which the master account is billed.

Searching for a Member Account

Prerequisites

To search for a member account, you should have:

- Divisions, billing cycles, and customer classes defined in the application
- Accounts added as a member to the master accounts

Procedure

To search for a member account:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, click **Billing Management** and then click **Manage Invoicing Groups**.

   The **Manage Invoicing Groups** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoicing Group Assignment Type	Used to indicate whether you want to search for a master or member account.	Yes
Account ID	Used to specify the account ID.	No
Division	Used to specify the division whose accounts you want to search.	No
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) **Note:** If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier type.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Person Name	Used to specify the person whose accounts you want to search.	Yes (Conditional) **Note:** If you specify the billing cycle or customer class as a search criteria, you have to specify the person name.
Billing Cycle	Used to specify the billing cycle during which the account is billed.	No
Customer Class	Used to specify the customer class of the account.	No

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the first group is used for searching. For example, if you enter Account ID and Person Name (which are in different criteria groups), the system searches using Account ID, which appears before Person Name.

Note: You must specify at least one search criterion while searching for a member account.

3. Select **Member** from the **Invoicing Group Assignment Type** list.
4. Specify the search criteria in any of the criteria groups.
5. Click **Search**.

The member accounts that meet the search criteria and to which you have access based on the account's access group appear in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Account ID	Displays the member account ID. **Note:** It has a link. On clicking the link, the **Invoicing Group Information** screen appears where you can view the details of the respective member account.
Account Identifier Type	Displays the account identifier type of the member account.
Account Identifier	Displays the value of the account identifier type.
Account Currency	Displays the invoice currency of the member account. **Note:** If the member account has a different invoice currency from the master account, the member account's charges will be converted to the master account's currency during billing.
Division	Displays the division to which the member account belongs.
Person Name	Displays the main person of the member account.
Customer Class	Displays the customer class of the member account.
Master Account Identifier Type	Displays the primary account identifier type of the master account.
Master Account Identifier	Displays the value of the primary account identifier type.
Master Person Name	Displays the main person of the master account.
Billing Cycle	Displays the billing cycle during which the member account is billed.

Invoicing Group Maintenance - Add/Edit

The **Invoicing Group Maintenance - Add/Edit** screen allows you to view the details of the master account. It also allows you to add, edit, and remove member accounts from the master account. This screen consists of the following zones:

- Account Information on page 274
- Member Accounts on page 274
- Edit Member Account Assignment on page 275
- Search Accounts to Add on page 275
- Add Member on page 276

Account Information

The **Account Information** zone displays the details of the master account. This zone contains the following fields:

Field Name	Field Description
Invoicing Group Assignment Type	Indicates that the selected account is a master account.
Person Name	Displays the name of the main customer.
Primary Account Identifier	Displays the primary account identifier type of the master account along with its value.
Customer Class	Displays the customer class of the master account.
Account Currency	Displays the invoice currency of the master account.
Billing Cycle	Displays the billing cycle during which the master account is billed.
Division	Displays the division to which the master account belongs.

Note: All fields in the **Account Information** zone are read-only.

Member Accounts

The **Member Accounts** zone lists the member accounts of the master account. This zone contains the following columns:

Column Name	Column Description
Account Identifier Type	Displays the primary account identifier type of the member account.
Account Identifier	Displays the value of the primary account identifier type.
Account Currency	Displays the invoice currency of the member account. **Note:** During billing, the charges for the member account are calculated in this currency and then converted to the master account's currency.
Effective Start Date	Displays the date from when the charges for the member account appears on the bill of the master account.
Effective End Date	Displays the date till when the charges for the member account appears on the bill of the master account.
Person Name	Displays the name of the main customer.
Customer Class	Displays the customer class of the member account.
Billing Cycle	Displays the billing cycle during which the member account is billed. **Note:** If the account is removed from the master account, it will be billed during this billing cycle.

On clicking the **Broadcast** (ᯤ) icon corresponding to the member account, the **Edit Member Account Assignment** zone appears with the details of the respective member account.

Edit Member Account Assignment

The **Edit Member Account Assignment** zone allows you to edit the assignment details of the member account. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to modify the date from when you want the charges for the member account to appear on the bill of the master account. **Note:** You can modify the date when it is a future date.	Yes
Invoicing Group Assignment Type	Indicates that the account is a member account.	Not applicable
Effective End Date	Used to modify the date till when you want the charges for the member account to appear on the bill of the master account. **Note:** You can modify the date when it is not a past date.	No
Primary Account Identifier	Displays the primary account identifier type of the member account along with its value.	Not applicable

Note: If a bill is already generated for the master account, you cannot modify the effective start and end dates.

This zone contains the following two buttons:

Button Name	Button Description
Save	Used to save the changes made in this zone.
Remove Member	Used to remove the member from the master account.

By default, the **Edit Member Account Assignment** zone does not appear in the **Invoicing Group Maintenance - Add/Edit** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to the member account in the **Member Accounts** zone.

Search Accounts to Add

The **Search Accounts to Add** zone lists accounts defined within the division and person hierarchy to which the master account belongs. The list also includes those accounts that are already added to the master account. You can filter the accounts using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the account ID.	No
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) **Note:** If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier type.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Person Name	Used to specify the person whose accounts you want to search.	No
Billing Cycle	Used to specify the billing cycle of the account.	No
Customer Class	Used to specify the customer class of the account.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Account ID	Displays the account ID.
Customer Name	Displays the name of the main customer.
Account Identifier Type	Displays the account identifier type.
Account Identifier	Displays the value of the account identifier type.
Account Currency	Displays the invoice currency of the account.
Division	Displays the division to which the account belongs.
Customer Class	Displays the customer class of the account.
Billing Cycle	Displays the billing cycle during which the account is billed.

On clicking the **Broadcast** (((•))) icon corresponding to the account, the **Add Member** zone appears with the details of the respective account.

Add Member

The **Add Member** zone allows you to add a member to the master account. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Displays the name of the main customer.	Not applicable
Primary Account Identifier	Displays the primary account identifier type of the account along with its value.	Not applicable
Account Currency	Displays the invoice currency of the account.	Not applicable
Customer Class	Displays the customer class of the account.	Not applicable
Effective Start Date	Used to specify the date from when you want the charges for the member account to appear on the bill of the master account. **Note:** The effective start date should be earlier than or equal to the member account's contract end date.	Yes
Billing Cycle	Displays the billing cycle during which the account is billed.	Not applicable

This zone contains the following button:

Button Name	Button Description
Save	Used to add a member to the master account.

By default, the **Add Member** zone does not appear in the **Invoicing Group Maintenance - Add/Edit** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the account in the **Search Accounts to Add** zone.

How to add a member to the master account	Adding a Member to the Master Account on page 277

Adding a Member to the Master Account

Prerequisites

To add a member to the master account, you should have:

- Accounts within the same banking division and person hierarchy where the value of the **Invoice Group Account** characteristic type is set to **N**
- Accounts with active contracts

Note: You cannot add an account as a member to a master account if that account is already a member of another master during that overlapping period.

Procedure

To add a member to the master account:

1. Access the **Invoicing Group Maintenance - Add/Edit** screen.
2. In the **Search Accounts to Add** zone, click the **Broadcast** (📡) icon corresponding to the account that you want *to* add to the master account.
   The **Add Member** zone appears.

3. Enter the date from when you want the charges for the member account to appear on the bill of the master account *i*n the **Effective Start Date** field.

   Note: The effective start date should be earlier than or equal to the member account's contract end date.

4. Click **Save**.
   The account is added to the master account. The contracts at the member level are duplicated at the master level.

   Note: Once a contract is duplicated at the master level, you need to activate the contract at the master level. Otherwise, the charges will be billed to the member account instead of the master account.

- Eligible Price Lists
- Rate Definition
- Tiering Criterion
- Person to Person Relationship Type Sequence

Oracle Revenue Management and Billing allows you to define prices for price item and services offered to the customers. These prices are either standard prices defined in the price lists or override prices that are specific to a customer or an account. The system allows you to define prices at various levels in a customer hierarchy (for example, at the account level, main customer level, or at the parent customer level). You can also define prices in the account's price list, main customer's price list, parent customer's price list, price list's parent price list. As prices can be defined at multiple places, the order in which the system searches for effective price item pricing will affect the price charged to the customer. The search order is configurable, and can vary with each division. You need to define the search order in the price assignment search algorithm (which is also known as crawling algorithm) and then attach the algorithm to the division. You can change the search order at any time.

You need to define the price assignment search algorithm using the C1_PRASN algorithm type. The price assignment search algorithm is used while:

- Listing effective price item pricing for an account or a customer
- Fetching effective price item pricing while creating recurring and non-recurring bill segments
- Fetching effective post processing pricing while creating post processing bill segments
- Fetching effective price item pricing in the **Price Item Pricing Verification (C1-TXNVP)** batch

For more information about the price assignment search algorithm, see Price Assignment Search Mechanism on page 293.

Since a global customer is not associated to any division, the system cannot determine the price assignment search order for a global customer. Hence, the default search order is defined for global customers through the **C1_PRASNORDR** feature configuration. You can change this default search order, if required.

The prices that are specific to a customer or an account are referred to as customer agreed or account agreed prices, respectively. You can override these agreed prices. Customer agreed or account agreed prices are effective for a particular duration and do not expire until you manually specify the end date. However, if you set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **Y**, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **N**.

The system allows you to define the following types of pricing:

- Flat Pricing
- Tiered Pricing

For more information about the types of pricing, see Types of Pricing on page 288.

The price for a price item or service may differ depending upon various transaction, customer or account attributes. Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. This multi parameter based pricing feature enables the price analyst to define price item and its parameters which influence pricing. You can then define pricing for the price item based on these parameters. Bundles are offered to customers to provide discounted rates. You can also define pricing for bundles based on multiple parameters. To enable the multi parameter based pricing feature, you must set the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration to **True**. For more information about the multi parameter based pricing feature, see Multi Parameter Based Pricing on page 289.

Prerequisites

To setup the pricing management feature, you need to do the following:

- Define the required SQIs, divisions, To Do types, and To Do roles in the system.
- Define the required parameters in the system.
- Define the required variance parameters and tiering criterion in the system.
- Define the tiering setup for rate components in the system.
- Define the required hierarchy entities in the system.
- Define the required entity hierarchy relationships in the system.
- Define the required price items and price item relationships in the system.
- Define the required price lists in the system.
- Define an algorithm using the **C1_PRASN_PP** algorithm type and attach it to the **Price Assignment Search** algorithm spot of the required divisions.
- Define an algorithm using the **C1-CUSRLALGT** algorithm type and attach it to the **Person relationship type sequence algorithm** parameter of the **C1_PRASN_PP** algorithm.
- Set the following feature configurations in the system:
  - C1-EHRCONFIG
  - C1_EXP_OVRD
  - C1_FM
  - C1_PER_REL
  - C1_PPARM_FLG
  - C1_PR_REC
  - C1_PRASNORDR
  - C1_PRICING
- Set the **Skip Priceitem Contract Type Validation** option type of the **C1_FINTRANOP** feature configuration.
- Set the batch control type of the **Identify Entities for Repricing (C1-REPC1)** and **Process Repricing Request (C1-REPC2)** batches to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about these batches, see *Oracle Revenue Management and Billing Batch Guide*.

Types of Pricing

The system allows you to define the following types of pricing:

- **Flat Pricing** - Used when you want to charge a fixed price per unit to the customer.
- **Tiered Pricing** - Used when standard flat pricing is not sufficient to meet the business needs. Through tiered pricing, you can offer more favorable pricing to the customers based on service quantity utilization. For example, CG Limited uses wire transfer services provided by a large bank. If CG Limited initiates up to 1,000 wire transfers, the fee charged by the bank will be $5 per transfer. If CG Limited initiates more than 1,000 wire transfers, the fee will be $3 per transfer. To introduce this flexibility in the pricing model, the following tiered pricing is defined:

Quantity Range	Rate ($) per transfer
0 - 1000	5
1000+	3

You can define two types of tiered pricing:

- **Step Tiered Pricing** - The rate of the first tiering range is used to calculate the charge for the maximum quantity in the range, and for incremental service quantity utilization, the rate of the progressive tiering range is used. This happens till the utilized quantity is exhausted. For example, when you define the following step tiered pricing for Price Item A and the user consumes 60,000 units of the same, the system will charge the first 45,000 units at $2 per unit and the remaining 15,000 units at $1 per unit:

Quantity Range	Rate ($) per unit
0 - 45000	2
45000+	1

- **Threshold Tiered Pricing** - The rate of the tiering range within which the service quantity utilization falls is used to calculate the charge for the entire volume. For example, when you define the following threshold tiered pricing for Price Item A and the user consumes 75,000 units of the same, the system will charge 75,000 units at $1 per unit as the service quantity utilization falls within 45000+ tiering range:

Quantity Range	Rate ($) per unit
0 - 45000	2

Quantity Range	Rate ($) per unit
45000+	1

Variance Parameter Based Pricing

Information will be available shortly!

Multi Parameter Based Pricing

Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. You can also define pricing for bundles based on multiple parameters. You can enable or disable the multi parameter based pricing feature by setting the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration. For more information, see Setting the C1_PPARM_FLG Feature Configuration on page 4655.

If the multi parameter based pricing feature is disabled, you can define pricing for a price item based on the variance parameter. If the multi parameter based pricing feature is enabled, you can define pricing for a price item based on multiple parameters. For example:

Price Item A	Country	Currency
Pricing 1	US	USD
Pricing 2	Germany	USD

Pricing 1 and Pricing 2 are defined for Price Item A based on two parameters - Country and Currency. Before you define pricing based on country and currency, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the price item (i.e. Price item A).

Then, when you define Pricing 1 for Price item A, you need to set the following price item parameters:

- Country - US
- Currency - USD

Similarly, you need to define Pricing 2 with Country set to Germany and Currency set to USD.

The following table lists the tiering ranges defined in Pricing 1 where price item parameters are set to US, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	2	Number of Transactions	Price Item A	US, USD	0	5000
20	1	Number of Transactions	Price Item A	US, USD	5000	

The following table lists the tiering ranges defined in Pricing 2 where price item parameters are set to Germany, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	4	Number of Transactions	Price Item A	Germany, USD	0	1000

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
20	3	Number of Transactions	Price Item A	Germany, USD	1000	

Now, when the user performs 1500 transactions (in USD) of Price Item A in Germany, 12000 transactions (in USD) of Price Item A in US, the system creates two billable charges. In one billable charge (with Price Item A, US and USD combination), the system uses $1 as the rate for calculating charges, and in another billable charge (with Price Item A, Germany and USD combination), the system uses $3 as the rate for calculating charges.

Note that in this case the parameters based on which you have defined pricing and tiering ranges are same. You can use different parameters while defining pricing and tiering ranges, if required. You can also use another price item or bundle and its parameters while defining tiering ranges. For example:

The following table lists the tiering ranges of Pricing 1 defined for Price Item A where price item parameters are set to US, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	2	Number of Transactions	Price Item B	Germany, USD	0	100
20	1	Number of Transactions	Price Item B	Germany, USD	100	200
30	0.5	Number of Transactions	Price Item B	Germany, USD	200	

Now, when the user performs 1500 transactions (in USD) of Price Item A in US, 200 transactions (in USD) of Price Item B in Germany, the system creates one billable charge. The system adds the transactions with the following combinations and then determines the range of Price Item A within which the total units (i.e. 200) fall:

- Price Item B, Germany, USD

In this case, the total units fall in the 100 - 200 range of Price Item A, and therefore the system uses $1 as the rate for calculating charges (i.e. 1500*1=1500).

Some parameters might be mandatory and some might be optional while defining price item pricing. You can define price item pricing based on these parameters at various levels, such as:

- Account Agreed
- Account Price List
- Account Inherited Price List
- Customer Agreed
- Customer Price List
- Customer Inherited Price List
- Parent Customer Agreed
- Parent Customer Price List
- Parent Customer Inherited Price List
- Default Price List
- Global Price List

As prices can be defined at multiple levels, the system first searches for exact match at all levels (using the search order). If the system finds the exact match at multiple levels, the price assignment at the higher precedence level is considered. Let us understand this with the help of an example.

Pricing 1 is defined for Price Item A with the following parameters at the Account Agreed level:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	-	BT
Country	No	1	US
Currency	No	2	USD

Pricing 2 is defined for Price Item A with the following parameters at the Parent Customer Agreed level:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	-	BT
Country	No	1	US
Currency	No	2	USD

Pricing 3 is defined for Price Item A with the following parameters at the Account Price List level:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	-	BT
Country	No	1	US
Currency	No	2	-

Now, when the user performs transactions (with the type set to BT in US) of Price Item A in USD, the system searches for price with exact match (Type - BT, Country - US, and Currency - USD). The exact match is available at two levels - Account Agreed and Parent Customer Agreed. The system considers the price at the Account Agreed level because this level has higher precedence.

Depending on the search order defined for the division (to which the account belongs), the level with higher precedence changes. Accordingly, the price assignment at the higher precedence level is considered for calculating the charges.

If the system does not finds the exact match at any level, it searches for the best fit match at all levels. Let us understand how the best fit match is determined with the help of an example.

Pricing 1 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	-	BT
Country	No	1	US
Currency	No	2	-

Pricing 2 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	-	BT
Country	No	1	-
Currency	No	2	USD

Pricing 3 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	-	BT
Country	No	1	-
Currency	No	2	-

Pricing 4 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	-	BT
Country	No	1	US
Currency	No	2	GBP

The system has Pricing 1, Pricing 2, Pricing 3, and Pricing 4 defined for Price Item A. Now, when the user performs transactions (with the type set to BT in US) of Price Item A in USD, the system does not find price with exact match (Type - BT, Country - US, and Currency - USD). Therefore, it searches for the best fit match.

While searching for the best fit match, the system rules out the optional parameter with lowest priority (i.e. Currency) and checks whether the price (with Type - BT and Country - US) is available. If the price is available, the system considers the price as the best fit match. Therefore, in this case, Pricing 1 is considered as the best fit match.

Suppose, if the price (with Type - BT and Country - US) is not available, then the system rules out the optional parameter with next lowest priority (i.e. Country) and checks whether the price (with Type - BT and Currency - USD) is available. If the price is available, the system considers the price as the best fit match. In this case, Pricing 2 would be considered as the best fit match. If the system finds the best fit match with same weight at multiple levels, the price assignment at the higher precedence level is considered.

Multiple Parameter Based Post-Processing Pricing

Until now, while deriving the post-processing bill segments, the system aggregated the regular bill segments of related price items without considering the price item parameters. Now, if you specify a price item parameter while associating regular price items with a post-processing price item and if the pricing for the post-processing price item is based on the price item parameter, the system aggregates the bill segments of regular price item and price item parameter combination. The system searches for the exact match. In this case, if the exact match is not found, the system does not aggregate the bill segments of the related price item. For example, the PR1 post processing price item is associated with the following regular price items:

Regular Price Item	Price Item Parameter
R1	Country = US
R2	Country = US

And, the pricing for PR1 post processing price item is based on Country = US. Now, if the following bill segments are generated for R1 and R2 in a bill:

Bill Segment	Price Item	Parameter 1	Parameter 2
BS1	R1	Country = US	-
BS2	R1	Country = US	Currency = USD
BS3	R1	Country = US	-

Bill Segment	Price Item	Parameter 1	Parameter 2
BS4	R1	-	-
BS5	R2	Country = US	-
BS6	R2	Country = US	-

Then, the system will aggregate the following regular bill segments while creating the post-processing bill segment for PR1:

- BS1
- BS3
- BS5
- BS6

However, if you specify a price item parameter while associating regular price items with a post-processing price item, but the pricing for the post-processing price item is not based on the price item parameter, the system aggregates all bill segments of regular price item irrespective of the price item parameter. For example, the PR1 post processing price item is associated with the following regular price items:

Regular Price Item	Price Item Parameter
R1	Country = US
R2	-

And, the pricing for PR1 post processing price item is not based on a price item parameter. Now, if the following bill segments are generated for R1 and R2 in a bill:

Bill Segment	Price Item	Parameter 1	Parameter 2
BS1	R1	Country = US	-
BS2	R1	Country = US	Currency = USD
BS3	R1	Country = US	-
BS4	R1	-	-
BS5	R2	Country = US	-
BS6	R2	-	-

Then, the system will aggregate the following regular bill segments while creating the post-processing bill segment for PR1:

- BS1
- BS2
- BS3
- BS4
- BS5
- BS6

Price Assignment Search Mechanism

The price assignment search algorithm searches effective price item pricing based on the following parameters:

- **Search Order** - Used to indicate the order in which the system must search effective price item pricing at various levels in the customer hierarchy. This is a mandatory parameter. The valid values are:

If you select the following value...	Then the effective price item pricing is searched at the following levels in the specified order...
AGREED_PRICELIST	1. **Account Agreed** - Means price item pricing is agreed for the account in the hierarchy. 2. **Account Price List** - Means price item pricing is defined within the price list which is assigned to the account. 3. **Account Inherited Price List** - Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the account. 4. **Customer Agreed** - Means price item pricing is agreed for the customer in the hierarchy. 5. **Customer Price List** - Means price item pricing is defined within the price list which is assigned to the customer. 6. **Customer Inherited Price List** - Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the customer. 7. **Parent Customer Agreed** - Means price item pricing is agreed for the parent customer in the hierarchy. 8. **Parent Customer Price List** - Means price item pricing is defined within the price list which is assigned to the parent customer. 9. **Parent Customer Inherited Price List** - Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the parent customer.
AGREED_FIRST	1. **Account Agreed** - Means price item pricing is agreed for the account in the hierarchy. 2. **Customer Agreed** - Means price item pricing is agreed for the customer in the hierarchy. 3. **Parent Customer Agreed** - Means price item pricing is agreed for the parent customer in the hierarchy. 4. **Account Price List** - Means price item pricing is defined within the price list which is assigned to the account. 5. **Account Inherited Price List** - Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the account. 6. **Customer Price List** - Means price item pricing is defined within the price list which is assigned to the customer. 7. **Customer Inherited Price List** - Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the customer. 8. **Parent Customer Price List** - Means price item pricing is defined within the price list which is assigned to the parent customer. 9. **Parent Customer Inherited Price List** - Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the parent customer.

Note: In these price assignment search orders, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence.

- **Default Price List ID** - Used to indicate the default price list. If the effective price item pricing is not available at any level in the customer hierarchy, the system checks whether the default price list is specified in the price assignment search algorithm. If the default price list is specified in the algorithm, the system checks whether effective price item pricing is available in the default price list.
- **Global Price List** - Used to indicate whether the system should consider the price item pricing defined in the global price list. If the effective price item pricing is not available in the default price list or if the default price list

is not specified in the price assignment search algorithm, the system checks whether it should consider the price item pricing defined in the global price list. The valid values are:

- Y
- N

Finally, if the effective price item pricing is not available in either default and/or global price list, an error message occurs indicating that the effective price item pricing is not available in the system.

- **Prefer Price Item Over Bundle** - Used to indicate whether to prefer price item, regular bundle, or parent bundle pricing when the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) are assigned at the same level. The valid values are:
  - Y
  - N

  If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system first searches whether effective pricing is available for the price item. If the effective pricing is not available for the price item, then the system searches whether effective pricing is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system searches whether effective pricing is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system first searches whether effective pricing is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system searches whether effective pricing is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system searches whether effective pricing is available for the price item at the same level.
- **Person Relationship Type Sequence Algorithm** - Used to attach an algorithm which is defined using the C1-CUSRLALGT algorithm type. The attached algorithm is used while searching effective price item pricing at the parent customer level. It indicates whether the system should search person to person relationship type sequence defined:
  - For the division, price item, and price item parameters combination
  - For the division
  - In the C1_PER_REL feature configuration

For more information on...	See...
Person to Person Relationship Type Sequence	Person Relationship Type Sequence on page 295

Person Relationship Type Sequence

When the price assignment search algorithm searches effective price item pricing at the parent customer level, the system determines the parent customer's person to person relationship type whose price item pricing should be considered. The person to person relationship type sequence indicates the order in which relationship type should be considered while searching for effective price item pricing at the parent customer level. For example, if a customer has two parents - Parent 1 with the relationship type set to "Subsidiary" and Parent 2 with the relationship type set to "Franchise Owner", and the following person to person relationship type sequence is defined in the system:

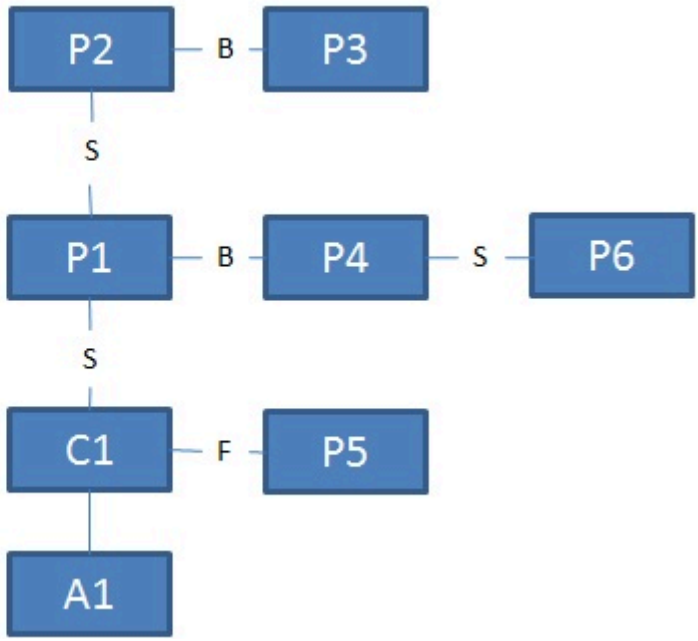
Sequence Number	Relationship Type
10	Subsidiary
20	Franchise Owner

In the above example, the system will inherit effective price item pricing (if available) from Parent 1 or within its hierarchy. If the effective price item pricing is not available in the Parent 1 hierarchy, the system will inherit effective

price item pricing (if available) from Parent 2 or within its hierarchy. If the effective price item pricing is not available in the Parent 2 hierarchy, an error message occurs indicating that the effective price item pricing is not available.

While searching effective pricing at the parent customer level based on the person to person relationship type sequence, the system will use the depth first search mechanism. Let us understand this with the help of an example.

Person To Person Relationship Type Sequence	
Sequence Number	**Relationship Type**
10	Subsidiary (S)
20	Branch (B)
30	Franchise Owner (F)



In the above example, if the effective pricing is not available at the account or customer level, the system will search effective pricing at the parent customer level in the following order:

- P1 (because the first relationship type in the sequence is Subsidiary)
- P2 (grandparent of P1 irrespective of the relationship type)
- P3 (because the second relationship type in the sequence is Branch)
- P4 (because the second relationship type in the sequence is Branch)
- P6 (grandparent of P4 irrespective of the relationship type)
- P5 (because the third relationship type in the sequence is Franchise Owner)

The system provides you the flexibility to define person to person relationship type sequence:

- For each division, price item, and price item parameters combination
- For each division
- In the C1_PER_REL feature configuration

The system will first check whether the person to person relationship type sequence is defined for the division, price item, and price item parameters combination. If the person to person relationship type sequence is defined for the division, price item, and price item parameters combination, the system will search effective price item pricing at the parent customer level based on the sequence defined for the combination. However, if the person to person relationship type sequence is not defined for the division, price item, and price item parameters combination, the system will check whether the person to person relationship type sequence is defined for the division. If the person to person relationship type sequence is defined for the division, the system will search effective price item pricing at the parent customer level based on the sequence defined for the division. However, if the person to person relationship type sequence is not defined for the division, the system will consider the person to person relationship type sequence defined in the C1_PER_REL feature configuration and accordingly search the effective price item pricing at the parent customer level.

To enable the system to search person to person relationship type sequence at different levels, you need to create an algorithm of the C1-CUSRLALGT algorithm type and attach it to the **Person Relationship Type Sequence**

Algorithm parameter in the price assignment search algorithm. The C1-CUSRLALGT algorithm type has the following parameters:

- **Check on Division, Price Item and Price Item Parameters Combination** - Used to indicate whether you want the system to search person to person relationship type sequence defined for the division, price item, and price item parameters combination. This is a mandatory parameter. The valid values are:
  - Y
  - N

  By default, the value is set to **N**.
- **Check on Division** - Used to indicate whether you want the system to search person to person relationship type sequence defined for the division. This is a mandatory parameter. The valid values are:
  - Y
  - N

  By default, the value is set to **N**.
- **Check on Feature Configuration** - Used to indicate whether you want the system to consider the person to person relationship type sequence defined in the **C1_PER_REL** feature configuration. This is a mandatory parameter. The valid values are:
  - **A** - Used when you want to consider all person to person relationship types defined in the feature configuration (in the specified sequence).
  - **F** - Used when you want to only consider the person to person relationship type defined with the lowest sequence in the feature configuration.
  - **N** - Used when you do not want to consider the person to person relationship type sequence defined in the C1_PER_REL feature configuration.

  By default, the value is set to **F**.

Pricing Eligibility

Oracle Revenue Management and Billing enables you to define pricing eligibility criteria using the account, person, and product attributes while defining a price item pricing. For example, a bank offers a product named 12 Month Standard Certificate of Deposit (CD). The interest rate charged to a person for this product differs based on two parameters - Deposit Amount and Person Type (Preferred and Non-Preferred). The following table lists the interest rates offered for the 12 Month Standard Certificate of Deposit (CD) product:

Deposit Amount	Non-Preferred	Preferred
Less than $5,000	0.13%	0.20%
Greater than $5,000	0.15%	0.22%

Earlier, you were able to define different interest rates based on different parameters using the rate eligibility feature at the rate component level. Considering the above example, you had to define four rate components. The respective rate component would appear while defining price item pricing based on the following:

- The value defined for the **Deposit Amount** characteristic on the account
- The value defined for the **Customer Type** characteristic on the main customer

However, now, you can implement the above scenario using a single rate component instead of maintaining four different rate components. Now, while defining price item pricing, you need to define four different price components for a rate component. For each price component, you need to define the pricing eligibility criteria in the following manner:

Price Component	Rate	Pricing Eligibility Criteria	If True	If False
P1	0.13%	Deposit Amount > 5000	Check Next Condition	Return False
P1	0.13%	Person Type = Non-Preferred	Return True	Return False
P2	0.15%	Deposit Amount < 5000	Check Next Condition	Return False
P2	0.15%	Person Type = Non-Preferred	Return True	Return False
P3	0.20%	Deposit Amount > 5000	Check Next Condition	Return False
P3	0.20%	Person Type = Preferred	Return True	Return False
P4	0.22%	Deposit Amount < 5000	Check Next Condition	Return False
P4	0.22%	Person Type = Preferred	Return True	Return False

You can define pricing eligibility criteria when the appropriate parameters are created in the system. These parameters must be mapped to either of the following:

- Account attributes, characteristics, usage amounts, or usage counters
- Person attributes, characteristics, usage amounts, or usage counters
- Product attributes or characteristics
- Service Quantity Identifier
- Custom algorithm which returns the appropriate value

In the above example, you can define the pricing eligibility criteria when the following parameters are defined in the system:

Parameter	Source Entity	Source Type	Source Type Code	Value Type
Deposit Amount	Account	Usage Amount	Deposit Amount	Adhoc
Customer Type	Person	Characteristic	Person Type	Predefined

You can define pricing eligibility criteria for rate components whose tiering type is set to **Flat**, **Threshold**, or **Step**. Each criterion in the pricing eligibility criteria is executed in the specified sequence. If the value of the pricing eligibility criteria is **True**, the rate of the respective price component is passed to the rate component for further calculations.

Persisting Interest Rate for Rate Type Price Items

While defining a price item, you can indicate whether the price item is available for pricing and billing or only for pricing. If the price item is available only for pricing, you can indicate the type of the price item. The valid values for the price item type are:

- Rate (i.e. Interest Rate)
- Fees

If the type of a price item is **Rate**, the system calculates and persist the rate for the price item. The rate is persisted only for the price item pricing which is either assigned or inherited by an account. If the account or person attributes are changed, the system allows you to recalculate and persist the interest rate for rate type price items. This process is known as **Repricing**.

Related Topics

For more information on...	See...
Repricing	Repricing on page 299

Persisting Fee for Fee Type Price Items

While defining a price item, you can indicate whether the price item is available for pricing and billing or only for pricing. If the price item is available only for pricing, you can indicate the type of the price item. The valid values for the price item type are:

- Rate
- Fees

The input elements Pricing Frequency, Advance Pricing should be populated if **Price Item** is available for **Pricing Only**, **Price Item Type** is **Fees** and **Price Assignment Type** is **Post-Processing**.

If the type of a price item is **Fee**, the system calculates and persist the fee for the price item.

Note: The **Process Fees Request and Persist Fees for an Account (C1-ACFEE)** batch is used to calculate and persist the fees for the account. It must be executed when a user wants to store fees.

Repricing	Repricing on page 299

Repricing

If the account or person attributes are changed, the system allows you to recalculate and persist the interest rate for rate type price items. This process is known as **Repricing**. The **Repricing** process is triggered in the following scenarios when:

- You edit the attributes and characteristics of an account.
- You add or delete the usage amount and counter details of an account.
- You edit the attributes and characteristics of a person.
- You add or delete the usage amount and counter details of a person.
- You define or edit the price item pricing of an active price list which is assigned to an account or a person.
- You define, edit, override, or copy the price item pricing of an account or a person.
- You assign a price list to an account or a person, or edit the price list assignment details of an account or a person.

The system behaves in the following manner in the above scenarios:

Scenario	System Behaviour
On editing the attributes and characteristics of an account	The system checks whether the account is eligible for repricing. If the account is eligible for repricing, the system checks whether a parameter for the account

Scenario	System Behaviour
	attribute or characteristic whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the **CI_REPRC_REQ_DTL** table. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** On editing the account attributes, the effective date is set to the date when you edit the account attributes. However, on editing the account's characteristic, the effective date is set to the date from when the characteristic is effective for the account.
On adding or deleting the usage amount and counter details of an account	The system checks whether the account is eligible for repricing. If the account is eligible for repricing, the system checks whether a parameter for the usage amount or counter whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the **CI_REPRC_REQ_DTL** table. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** The effective date is set to the date from when the usage amount or counter is effective for the account.
On editing the attributes and characteristics of a person	The system identifies all accounts which belong to the person and its child persons, and then checks whether the identified accounts are eligible for repricing. If one or more accounts are eligible for repricing, the system checks whether a parameter for the person attribute or characteristic whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the **CI_REPRC_REQ_DTL** table. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** Only accounts where the person and child person are the main customers are considered for repricing. On editing the person attributes, the effective date is set to the date when you edit the person attributes. However, on editing the person's characteristic, the effective date is set to the date from when the characteristic is effective for the person.
On adding or deleting the usage amount and counter details of a person	The system identifies all accounts which belong to the person and its child persons, and then checks whether the identified accounts are eligible for repricing. If one or more accounts are eligible for repricing, the system checks whether a parameter for the usage amount or counter whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the **CI_REPRC_REQ_DTL** table. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:**

Scenario	System Behaviour
	Only accounts where the person and child person are the main customers are considered for repricing. The effective date is set to the date from when the usage amount or counter is effective for the person.
On assigning a price list to an account or editing the price list assignment details of an account	The system creates a repricing request for the account, price item, and effective date combination in the **CI_REPRC_REQ_DTL** table. If the price assignment end date and/or price list assignment end date is available, the system creates two repricing requests - one request where the effective date is set to the start date and another request where the effective date is set to the end date. The effective date is set to the price assignment start date or price list assignment start date depending on the following conditions: • If the Price Assignment Start Date is later than the Price List Assignment Start Date, then the effective date is set to Price Assignment Start Date. • If the Price Assignment Start Date is earlier than or equal to the Price List Assignment Start Date, then the effective date is set to Price List Assignment Start Date. However, the effective date is set to the price assignment end date or price list assignment end date depending on the following conditions: • If the Price Assignment End Date is earlier than the Price List Assignment End Date, then the effective date is set to Price Assignment End Date + 1 Day. • If the Price Assignment End Date is later than or equal to the Price List Assignment End Date, then the effective date is set to Price List Assignment End Date + 1 Day. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.
On assigning a price list to a person or editing the price list assignment details of a person	The system identifies all accounts which belong to the person and its child persons, and then creates a repricing request for the account, price item, and effective date combination in the **CI_REPRC_REQ_DTL** table. If the price assignment end date and/or price list assignment end date is available, the system creates two repricing requests - one request where the effective date is set to the start date and another request where the effective date is set to the end date. The effective date is set to the price assignment start date or price list assignment start date depending on the following conditions: • If the Price Assignment Start Date is later than the Price List Assignment Start Date, then the effective date is set to Price Assignment Start Date. • If the Price Assignment Start Date is earlier than or equal to the Price List Assignment Start Date, then the effective date is set to Price List Assignment Start Date. However, the effective date is set to the price assignment end date or price list assignment end date depending on the following conditions: • If the Price Assignment End Date is earlier than the Price List Assignment End Date, then the effective date is set to Price Assignment End Date + 1 Day.

Scenario	System Behaviour
	• If the Price Assignment End Date is later than or equal to the Price List Assignment End Date, then the effective date is set to Price List Assignment End Date + 1 Day. **Note:** If the Price List Assignment Start Date and Price List Assignment End Date are earlier than the current date, repricing requests for the accounts are not created in the **CI_REPRC_REQ_DTL** table. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** Only accounts where the person and child person are the main customers are considered for repricing. The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.
On defining, editing, overriding, or copying the price item pricing of an account	The system creates a repricing request for the account, price item, and effective date combination in the **CI_REPRC_REQ_DTL** table. If the price assignment end date is specified, the system creates two repricing requests - one request where the effective date is set to the price assignment start date and another request where the effective date is set to the price assignment end date + 1 Day. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.
On defining, editing, overriding, or copying the price item pricing of a person	The system identifies all accounts which belong to the person and its child persons, and then creates a repricing request for the account, price item, and effective date combination in the **CI_REPRC_REQ_DTL** table. If the price assignment end date is specified, the system creates two repricing requests - one request where the effective date is set to the price assignment start date and another request where the effective date is set to the price assignment end date + 1 Day. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** Only accounts where the person and child person are the main customers are considered for repricing. The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.
On defining or editing the price item pricing of an active price list which is assigned to an account or a person	The system creates an entry for the price item pricing in the **CI_REPRC_ENTITY_DTL** table. On executing the **Identify Accounts for Repricing (C1-REPC1)** batch, the system identifies the following in the specified order: **1.** Price list on which the price item pricing is assigned **2.** Account or Person on which the price list is assigned **3.** All accounts which belong to the person and its child persons when the price list is assigned to a person

Scenario	System Behaviour
	Once the accounts are identified, the system checks whether the identified accounts are eligible for repricing. If one or more accounts are eligible for repricing, a repricing request is created for the account, price item, and effective date combination in the **CI_REPRC_REQ_DTL** table. If the price assignment end date is specified, the system creates two repricing requests - one request where the effective date is set to the price assignment start date and another request where the effective date is set to the price assignment end date + 1 Day. On executing the **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batch, you can recalculate and persist the rate for the account in the **CI_PRCE_CALC** table. **Note:** Only accounts where the person and child person are the main customers are considered for repricing.

For more information about the **Identify Accounts for Repricing (C1-REPC1)** and **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

To enable the repricing feature, you need to do the following:

- Define an algorithm using the **C1-REPRCACCT** algorithm type and attach it to the **Audit** algorithm spot of the **C1-AccountBO** business object
- Define an algorithm using the **C1-REPRCACBC** algorithm type and attach it to the **Audit** algorithm spot of the **C1-ACCBALCNT** business object
- Define an algorithm using the **C1-REPRCPERS** algorithm type and attach it to the **Audit** algorithm spot of the **C1_PERSON_BO** business object
- Define an algorithm using the **C1-REPRCPEBC** algorithm type and attach it to the **Audit** algorithm spot of the **C1-PERBALCNT** business object
- Define an algorithm using the **C1_PLASGNAUD** algorithm type and attach it to the **Audit** algorithm spot of the **C1_PLASGNADD** and **C1_PLASGNEDIT** business objects
- Define an algorithm using the **C1-PRCASGNAD** algorithm type and attach it to the **Audit** algorithm spot of the **C1_PRICEASGN_BO** business object
- Define an algorithm using the **C1-REPRCPLPA** algorithm type and attach it to the **Audit** algorithm spot of the **C1_PRICEASGN_BO** business object
- Define the required parameters for the account and person attributes, characteristics, usage amount and usage counter

Two-Dimensional Pricing

Oracle Revenue Management and Billing enables you to define two-dimensional pricing for a price item. In the two-dimensional pricing, you can offer rates based on utilization of two service quantity identifiers (SQIs). For example, the rate for a price item can vary for each customer depending on the number of ATM transactions and current monthly balance as shown below: Current Monthly Balance Number of ATM Transactions 0-25 25-50 50-75 75-100 0-10000 2 1.9 1.8 1.7 10000-50000 1.6 1.5 1.4 1.3 50000-100000 1.2 1.1 1.0 0.9 100000-500000 0.8 0.7 0.6 0.5 The system allows you to define two-dimensional pricing in a gird which has X-axis and Y-axis. Both, the X-axis and Y-axis should contain service quantity identifiers (SQIs). The two-dimensional pricing is composed of threshold and step tiered pricing. The X-axis is a threshold tier and Y-axis is a step tier. On creating two-dimensional pricing, one price component is created for each X-axis and Y-axis combination. The step tier is stored as the tiering range whereas the threshold tier is stored as the eligibility criteria in the price component. Note that the tiering ranges and eligibility criteria are automatically created in the price component. You cannot manually add a tiering range and eligibility criteria in the price component. You can define two-dimensional pricing when the tiering type of the rate components in the rate schedule is set to STEP. A new field named Pricing Rule Type is added in the Price

Item Pricing screen. If you select the Two-Dimensional option from the Pricing Rule Type list, you can define two-dimensional pricing for the price item. However, if you do not select the Two-Dimensional option from the Pricing Rule Type list, you can define traditional flat, step, or tiered pricing for the price item. Besides selecting the Two-Dimensional option from the Pricing Rule Type list, you also need to select the Pricing Eligibility option while defining the two-dimensional pricing for the price item.

Price Assignment UI/UX Redesign

The following changes are made in the price assignment approval workflow screens:

- **Approve Price Assignment screen:**
  - New columns named **Product Group**, **Parent Price Item**, **Parameters**, **Rate Info (New Value)**, and **Rate Info (Old Value)** are added in the **List of Price Assignments** zone. On clicking the **Rate Info (New Value)**, you can view the pricing information that is pending for approval. Whereas, on clicking the **Rate Info (Old Value)**, you can view the current price item pricing.
  - The **Description** column is removed from the **List of Price Assignments** zone.
  - In the **Comparison:New Versus Existing** zone, the changes made in the existing pricing information is highlighted in aqua and the newly added information is highlighted in yellow.
- **Modify Price Assignment screen:**
  - The **Modify/Resolve Price Assignment** screen is now in sync with the new price assignment UI.
  - Earlier any changes saved in the **Modify/Resolve Price Assignment** screen would get reflected only against the approval transaction ID. Now, the changes also gets reflected in the pending price assignment UI as well as the **Approve Price Assignment** screen.
- **Resolve Price Assignment screen:**
  - The **Modify/Resolve Price Assignment** screen is now in sync with the new price assignment UI.
  - Earlier any changes saved in the **Resolve Price Assignment** screen would get reflected only against the approval transaction ID. Now, the changes also gets reflected in the pending price assignment UI as well as the **Approve Price Assignment** screen.

Types of Price Item Bundle

The system allows you to define the following types of price item bundle:

- Regular Bundle on page 304
- Phantom Bundle on page 308
- Ratio Bundle on page 306

Regular Bundle

In case of a regular bundle, pricing is defined at the bundle level. The system determines the rate by identifying the tiering range within which the total service quantities used for all price items in the bundle fall. Note that the rate is determined from the tiering range of the price component whose pricing eligibility criteria is met. Let us understand this with the help of an example.

Bundle X, which is a regular bundle, contains the following three price items:

- Price Item A
- Price Item B
- Price Item C

The following tiered pricing is defined for Bundle X:

Quantity Range	Rate ($) per unit
1 - 3000	3
3001 - 4000	2
4001 - 8000	1

Note: In the above example, the assumption is that there only one rate component, one price component within the rate component, and pricing eligibility criteria is not defined for the price component.

Now, when the user consumes 1500 units of Price Item A, 1000 units of Price Item B, and 2000 units of Price Item C, the system adds the quantities of services used for all price items in Bundle X (i.e. 1500+1000+2000=4500), and then determines the range within which the total units (i.e. 4500) fall. In this case, the total units fall in the 4001 - 8000 range, and therefore the system uses $1 as the rate for calculating charges.

If the multi parameter based pricing feature is enabled, you can define pricing for regular bundles based on multiple parameters. For example:

Bundle X	Country	Currency
Pricing 1	US	USD
Pricing 2	Germany	USD

Pricing 1 and Pricing 2 are defined for Bundle X based on two parameters - Country and Currency. Before you define pricing based on country and currency, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the regular bundle (i.e. Bundle X) and then add price items (i.e. Price Item A, Price Item B, and Price Item C) to the bundle. Note that you can add a price item to a regular bundle when the regular bundle and price item have same parameters associated with them for the specified date range. Therefore, before adding Price Item A, Price Item B, and Price Item C to Bundle X, you should ensure that Country and Currency are also associated with these price items.

Then, when you define Pricing 1 for Bundle X, you need to set the following price item parameters:

- Country - US
- Currency - USD

Similarly, you need to define Pricing 2 with Country set to Germany and Currency set to USD.

The following table lists the tiering ranges defined in Pricing 1 where price item parameters are set to US, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	2	Number of Transactions	Bundle X	US, USD	0	500
20	1	Number of Transactions	Bundle X	US, USD	500	

The following table lists the tiering ranges defined in Pricing 2 where price item parameters are set to Germany, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	4	Number of Transactions	Bundle X	Germany, USD	0	1000

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
20	3	Number of Transactions	Bundle X	Germany, USD	1000	

Now, when the user performs 500 transactions (in USD) of Bundle X in Germany, 1200 transactions (in USD) of Bundle X in US, the system creates two billable charges. In one billable charge (with Bundle X, US and USD combination), the system uses $1 as the rate for calculating charges, and in another billable charge (with Bundle X, Germany and USD combination), the system uses $4 as the rate for calculating charges.

Ratio Bundle

In case of a ratio bundle, pricing is not defined at the bundle level. Instead, pricing is defined separately for each price item in the bundle.

A ratio expresses the magnitude of quantities relative to each other. It has two factors - Numerator and Denominator. For ratio bundle, the ratio of price item quantities is used to determine the rate for volume based pricing. To determine within which range of ratio limit does the price item utilization falls, the ratio of price item quantities is used. Once the range limits are determined, the rate specified for that range is applied to the quantity of the price item used. Let us understand this with the help of an example.

Bundle X, which is a ratio bundle, contains the following price items:

- **Price Item A** - It has been added to the bundle using the price item relationship type as Numerator. It has the following tiered pricing defined in the system:

Quantity Range	Rate ($) per unit
0 - 0.6	4
0.6 - 0.9	3
0.9+	2

- **Price Item B** - It has been added to the bundle using the price item relationship type as Numerator. It has the following tiered pricing defined in the system:

Quantity Range	Rate ($) per unit
0 - 0.6	5
0.6 - 0.9	4
0.9+	3

- **Price Item C** - It has been added to the bundle using the price item relationship type as Denominator. It has the following tiered pricing defined in the system:

Quantity Range	Rate ($) per unit
0 - 0.6	3
0.6 - 0.9	2
0.9+	1

Now, when the user consumes 500 units of Price Item A, 2500 units of Price Item B, and 4000 units of Price Item C, the system calculates the ratio of price item quantities (i.e. (500+2500)/4000=0.75). Once the ratio is calculated, the system determines the range of each price item within which the ratio (i.e. 0.75) falls. In this case, the ratio falls in

the 0.6 - 0.9 range of Price Item A, B, and C. Therefore, the system uses $3, $4, and $2, respectively, as the rate for calculating charges (i.e. ((500*3)=1500, (2500*4)=10000, and (4000*2)=8000).

If the multi parameter based pricing feature is enabled, you can determine the price item utilization in a ratio bundle based on multiple parameters. For example:

Bundle X	Country	Currency
Price Item A	US	USD
Price Item B	Germany	USD
Price Item C	England	USD

Price Item A, Price Item B, and Price Item C are added in Bundle X. Price Item A, Price Item B, and Price Item C utilization in Bundle X is determined based on two parameters - Country and Currency. Before you add price item to a ratio bundle, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the price items (i.e. Price Item A, Price Item B, and Price Item C) and then add these price items to the bundle (i.e. Bundle X).

While adding Price Item A to Bundle X, you need to set the following price item parameters:

- Country - US
- Currency - USD

Similarly, you need to add Price Item B to Bundle X with Country set to Germany and Currency set to USD, and Price Item C with Country set to England and Currency set to USD.

The following table lists the tiered pricing defined for Price Item A:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	5	Number of Transactions	Bundle X		0	1.75
20	4	Number of Transactions	Bundle X		1.75	2.50
30	3	Number of Transactions	Bundle X		2.50	

The following table lists the tiered pricing defined for Price Item B:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	5	Number of Transactions	Bundle X		0	3.5
20	4	Number of Transactions	Bundle X		3.5	

The following table lists the tiered pricing defined for Price Item C:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	2	Number of Transactions	Bundle X		0	2.0
20	1	Number of Transactions	Bundle X		2.0	

Now, when the user performs 5000 transactions (in USD) of Price Item A in US, 6000 transactions (in USD) of Price Item B in Germany, and 5000 transactions (in USD) of Price Item C in England, the system creates three billable charges - one for each price item (i.e. Price Item A, Price Item B, and Price Item C). The system calculates the ratio of transactions with the following combinations and then determines the range of each price item within which the ratio (i.e. 2.2) falls:

- Price Item A, US, USD
- Price Item B, Germany, USD
- Price Item C, England, USD

In this case, the ratio falls in the 1.75 - 2.50 range of Price Item A, the 0 - 3.5 range of Price Item B, and in the 2.0 - Infinite range of Price Item C. Therefore, the system uses $4, $5, and $1 as the rate for calculating charges (i.e. (5000*4)=20000 , (6000*5)=30000 , and (5000*1)=5000).

You can also add a price item more than once in a ratio bundle with different set of parameters. For example:

Bundle X	Relationship Type	Country	Currency
Price Item A	Numerator	US	USD
Price Item A	Numerator	England	USD
Price Item B	Numerator	Germany	USD
Price Item C	Denominator	England	USD
Price Item C	Denominator	US	USD

In this case, the system calculates the ratio of transactions with the following combinations and then determines the range of each price item (i.e. Price Item A, Price Item B, and Price Item C) within which the ratio falls:

- Price Item A, US, USD
- Price Item A, England, USD
- Price Item B, Germany, USD
- Price Item C, England, USD
- Price Item C, US, USD

Phantom Bundle

In case of a phantom bundle, pricing is not defined at the bundle level. Instead, pricing is defined separately for each price item in the bundle. The system determines the price by identifying the tiering range of each price item within which the total quantities of services used for all price items in the bundle fall. Let us understand this with the help of an example.

Bundle A, which is a phantom bundle, contains the following two price items:

- **Price Item X** - The following tiered pricing is defined for Price Item X:

Quantity Range	Rate ($) per unit
1 - 3000	3
3001 - 6000	2

- **Price Item Y** - The following tiered pricing is defined for Price Item Y:

Quantity Range	Rate ($) per unit
1 - 5000	2
5001 - 10000	1

Now, when the user consumes 2500 units of Price Item X and 3500 units of Price Item Y, the system adds the quantities of services used for all price items in Bundle A (i.e. 2500+3500=6000), and then determines the range of each price item within which the total units (i.e. 6000) fall. In this case, the total units fall in the 3001 - 6000 range of Price Item X and the 5001 - 10000 range of Price Item Y, and therefore the system uses $2 and $1, respectively, as the

rate for calculating charges (i.e. (2500*2)= 5000 and (3500*1)=3500). This helps the customer to take advantage of the lowest rate.

If the multi parameter based pricing feature is enabled, you can determine the price item utilization in a phantom bundle based on multiple parameters. For example:

Bundle A	Country	Currency
Price Item X	US	USD
Price Item Y	Germany	USD

Price Item X and Price Item Y are added in Bundle A. Price Item X and Price Item Y utilization in Bundle A is determined based on two parameters - Country and Currency. Before you add price item to a phantom bundle, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the price items (i.e. Price Item X and Price Item Y) and then add these price items to the bundle (i.e. Bundle A).

While adding Price Item X to Bundle A, you need to set the following price item parameters:

- Country - US
- Currency - USD

Similarly, you need to add Product Y to Bundle A with Country set to Germany and Currency set to USD.

The following table lists the tiered pricing defined for Price Item X:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	3	Number of Transactions	Bundle A		0	5000
20	2	Number of Transactions	Bundle A		5000	10000
30	1	Number of Transactions	Bundle A		10000	

The following table lists the tiered pricing defined for Price Item Y:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Item Parameters	From	To
10	5	Number of Transactions	Bundle A		0	5000
20	4	Number of Transactions	Bundle A		5000	

Now, when the user performs 5000 transactions (in USD) of Price Item Y in Germany, 6000 transactions (in USD) of Price Item X in US, the system creates two billable charges - one for Price Item X and another for Price Item Y. The system adds the transactions with the following combinations and then determines the range of each price item within which the total units (i.e. 11000) fall:

- Price Item X, US, USD
- Price Item Y, Germany, USD

In this case, the total units fall in the 10000 - Infinite range of Price Item X and the 5000 - Infinite range of Price Item Y, and therefore the system uses $1 and $4, respectively, as the rate for calculating charges (i.e. (5000*4)= 20000 and (6000*1)=6000).

You can also add a price item more than once in a phantom bundle with different set of parameters. For example:

Bundle A	Country	Currency
Price Item X	US	USD
Price Item X	Germany	USD

Bundle A	Country	Currency
Price Item Y	Germany	USD
Price Item Y	US	USD

In this case, the system adds the transactions with the following combinations and then determines the range of each price item (i.e. Price Item X and Price Item Y) within which the total units fall:

- Price Item X, US, USD
- Price Item X, Germany, USD
- Price Item Y, Germany, USD
- Price Item Y, US, USD

Parameter

The pricing for a price item may differ depending upon various transaction, person, account, or product attributes. Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. In addition, you can define the pricing, price list, and product eligibility criteria using one or more parameters.

Each parameter must be mapped to the following:

- **Source Entity** - Indicates the entity from where the parameter value is derived. A source entity can be account, person, product, transaction, service quantity identifier, or an algorithm.
- **Source Type** - Indicates the type of source from where the parameter value is derived. A source type can be field, characteristic, usage amount, or usage counter.
- **Source Type Code** - Indicates the source (such as, field, characteristic, usage amount, usage counter, SQI, or algorithm) from where the parameter value is derived.

The system allows you to define the following types of parameters:

- **Adhoc** - Used to store an adhoc value.
- **Predefined** - Used to store a predefined value. For example, you can create a parameter named **Country** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
AUT	Austria
AUS	Australia
CAN	Canada
CHN	China

In such case, while defining the pricing for a price item using the **Country** parameter, you can use any one of the above mentioned parameter values.

Another example, you can create a parameter named **Health Coverage Class** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

In such case, while defining the pricing for a price item using the **Health Coverage Class** parameter, you can use any one of the above mentioned parameter values.

- **Reference** - Used to store a value which is already present in a table. For example, you can create a parameter named **Country** where the value type is set to **Reference** and the reference entity is set to **CI_COUNTRY_L** (i.e. where the description of all countries is stored). In such case, while defining the pricing for a price item using the **Country** parameter, you can specify a country which is present in the **CI_COUNTRY_L** table in the parameter value.

Parameter (Used for Searching)

The **Parameter** screen allows you to search for a parameter using various search criteria. It also allows you to define a parameter. It contains the following zone:

- Search Parameter on page 311

Through this screen, you can navigate to the following screen:

- Parameter (Used for Viewing) on page 344

Search Parameter

The **Search Parameter** zone allows you to search for a parameter using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search for a particular parameter.	No
Value Type	Used to search for parameters in which a particular type of value is stored. The valid values are: • Adhoc • Predefined • Reference **Note:** The list includes only those values which are defined in the **PRICE_PARM_TYPE_FLG** lookup field.	No
Source Entity	Used to search parameters whose value is derived from a particular entity. The valid values are: • Account • Algorithm • Benefit • Customer Class • Delinquency Event Type • Division • Health Plan • Health Product • Membership • Membership Person • Person • Policy	No

Field Name	Field Description	Mandatory (Yes or No)
	• Policy Plan • Product • Service Quantity Identifier • State • Transaction **Note:** The list includes only those values which are defined in the **SOURCE_ENTITY_FLG** lookup field.	
Source Type	Used to search for parameters whose value is derived from a particular type of source. The valid values are: • Characteristic • Field • Usage Amount • Usage Counter **Note:** The list includes only those values which are defined in the **SOURCE_TYPE_FLG** lookup field.	No
Description	Used to search for parameters having a particular description.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Parameter	Displays the parameter.
Description	Displays the description of the parameter.
Value Type	Indicates the type of value that you want to store in the parameter. The valid values are: • Adhoc • Predefined • Reference
Source Entity	Indicates the entity from where the parameter value is derived. The valid values are: • Account • Algorithm • Benefit • Customer Class • Delinquency Event Type • Division • Health Plan • Health Product • Membership • Membership Person • Person • Policy • Policy Plan

Column Name	Column Description
	• Product • Service Quantity Identifier • State • Transaction
Source Type	Indicates the type of source from where the parameter value is derived. The valid values are: • Characteristic • Field • Usage Amount • Usage Counter
View	On clicking the **View** (🔗) icon, the **Parameter** screen appears where you can view the details of the respective parameter.
Edit	On clicking the **Edit** (✎) icon, the **Parameter** screen appears where you can edit the details of the parameter.
Delete	On clicking the **Delete** (🗑) icon, a message appears confirming whether you want to delete the parameter. **Note:** You can delete a parameter when the following conditions are met: • It is not yet associated to any price item or price item bundle. • It is not yet used while defining the pricing, price list, or pricing eligibility criteria.
Copy	On clicking the **Copy** (⧉) icon corresponding to a parameter, the **Parameter** screen appears where you can define a new parameter using an existing parameter.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Parameter**, **Value Type**, **Source Entity**, **Source Type**, and **Description**) available in the **Filter** area. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Searching for a Parameter

Procedure

To search for a parameter:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.
   The **Parameter** screen appears.
3. Enter the search criteria in the **Search Parameter** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of parameters that meet the search criteria appears in the **Search Results** section.

Defining a Parameter

Prerequisites

To define a parameter, you should have:

- Validation algorithm defined using the **C1_PPARM_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)
- The **Fetch Type Source (C1-FetchSourceTypeVal)** business service defined in the application
- Source entities and source types defined in the application
- Value types and source type codes defined in the application

Note:

A sample algorithm type named **C1_PPARM_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

Procedure

To define a parameter:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.
   The **Parameter** screen appears.
3. Click the **Add** button available in the **Page Title** area of the **Parameter** screen.

   The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter. **Note:** You cannot specify any special character except underscore (_) in the parameter name.	Yes
Source Entity	Used to indicate the source entity using which the parameter value is derived. The valid values are: • Account • Algorithm • Benefit • Customer Class • Delinquency Event Type • Division • Health Plan **Note:** This option is not applicable for the banking business. • Health Product **Note:** This option is not applicable for the banking business. • Membership **Note:** This option is not applicable for the banking business. • Membership Person **Note:** This option is not applicable for the banking business. • Person • Policy • Policy Plan **Note:** This option is not applicable for the banking business. • Product **Note:** This option is not applicable for the health insurance business. • Service Quantity Identifier • State • Transaction **Note:** The list includes only those values which are defined in the**SOURCE_ENTITY_FLG** lookup field.	Yes
Description	Used to specify the description for the parameter.	Yes
Source Type	Used to indicate the source type using which the parameter value is derived. The valid values are: • Characteristic • Field • Usage Amount • Usage Counter	Yes

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>Note:
This field appears when the Account, Person, Benefit, Health Plan, Health Product, Membership, Membership Person, Person, Policy, Policy Plan, Product, or State option is selected from the Source Entity list.
The Usage Amount and Usage Counter options do not appear in the Source Type list when the Benefit, Health Plan, Health Product, Membership, Membership Person, Policy, Policy Plan, Product, or State option is selected from the Source Entity list.
This is a read-only field. By default, the Field option is selected when the Customer Class, Delinquency Event Type, and Division option is selected from the Source Entity list.
The list includes only those values which are defined in the SOURCE_TYPE_FLG lookup field.</td><td></td></tr>
<tr><td>Value Type</td><td>Used to indicate the type of value that you want to store in the parameter. The valid values are:
Adhoc
Predefined
Reference
Note: The list includes only those values which are defined in the PRICE_PARM_TYPE_FLG lookup field.</td><td>Yes</td></tr>
<tr><td>Source Type Code</td><td>Used to indicate the source type code using which the parameter value is derived.
Note:
This field does not appear when the Transaction option is selected from the Source Entity list.
The following table indicates the values that are listed in the Source Type Code field depending on the source entity and source type combination:<table><tr><th>Source Entity</th><th>Source Type</th><th>Source Type Code</th></tr><tr><td>Account</td><td>Characteristic</td><td>Lists all characteristics where the characteristic entity is set to Account.</td></tr><tr><td>Account</td><td>Field</td><td>Lists all fields of the CI_ACCT table.</td></tr><tr><td>Account</td><td>Usage Amount</td><td>The list includes only those values which</td></tr></table></td><td>Yes</td></tr>
</table>

Field Name	Field Description	Mandatory (Yes or No)

</td><td></td></tr>
<tr><td>Validation Algorithm</td><td>Used to indicate the algorithm using which you want to validate the adhoc parameter value.
Note:
This field appears when the Adhoc option is selected from the Value Type list.
The Search (🔍) icon appears corresponding to the Validation Algorithm field. On clicking the Search icon, the Algorithm Search window appears.
On specifying the algorithm, the description of the algorithm appears corresponding to the Validation Algorithm field.</td><td>No</td></tr>
<tr><td>Reference Entity</td><td>Used to indicate the reference table whose primary key (column) you want to set as the reference entity.
Note:
This field appears only when the Reference option is selected from the Value Type list.
The Search (🔍) icon appears corresponding to the Reference Entity field. On clicking the Search icon, the Reference Table Search window appears.
On specifying the entity, the description of the entity appears corresponding to the Reference Entity field.
You can only specify a language table, where the DESCR column is available, in the Reference Entity field.</td><td>Yes</td></tr>
</table>

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define the predefined values for the parameter. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Values	Used to specify the value for the parameter. **Note:** You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes (Conditional) **Note:** This field is required while defining the predefined parameter values.
Description	Used to specify the description for the parameter value.	Yes (Conditional) **Note:** This field is required while defining the predefined parameter values.

Note:

The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list. At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add** (+) icon and then specify the details.

However, if you want to remove a predefined value from the parameter, click the **Delete** (🗑) icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing. **Note:** This option appears when the **Account**, **Person**, **Product**, **State**, or the **Transaction** option is selected from the **Source Entity** list. By default, this option is selected when the **Transaction** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while associating the parameter with a price item.
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria. **Note:** This option appears when the **Account**, **Algorithm**, **Membership**, **Membership Person**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a pricing eligibility criteria using the parameter.

Option Name	Option Description	Mandatory (Yes or No)
Pricing Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing rule eligibility criteria. **Note:** This option appears only when the **Membership** or the **Membership Person** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while using the parameter for defining a rule based pricing eligibility criteria.
Business Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the business rule eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Customer Class**, **Delinquency Event Type**, **Division**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Policy**, or the **Policy Plan** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while using the parameter for defining a rule based business eligibility criteria.
Price List Eligibility Criteria	Used to indicate whether the parameter is used for defining the price list eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a price list eligibility criteria using the parameter.
Product Eligibility Criteria	Used to indicate whether the parameter is used for defining the product eligibility criteria. **Note:** This option appears only when the **Account**, **Person**, **Product**, or the **State** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a product eligibility criteria using the parameter.
Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the rule eligibility criteria. **Note:** This option does not appear when the **Customer Class**, **Delinquency Event Type**, **Division Product**, **Service Quantity Identifier**, or the **Transaction** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a rule eligibility criteria using the parameter.

Note: You must select at least one option in the **Parameter Usage** section.

4. Enter the required details in the **Parameter** screen.
5. Click **Save**.
   The parameter is defined.

Note: If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

Editing a Parameter

Prerequisites

To edit a parameter, you should have:

- Validation algorithm defined using the **C1_PPARM_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)
- The **Fetch Type Source (C1-FetchSourceTypeVal)** business service defined in the application
- Source entities and source types defined in the application
- Source type codes defined in the application

Note:

A sample algorithm type named **C1_PPARM_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

Procedure

To edit a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the parameter *w*hose details you want to edit.

   The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Displays the parameter. **Note:** This is a read-only field.	Not applicable
Source Entity	Used to indicate the source entity using which the parameter value is derived. The valid values are: • Account • Algorithm • Benefit • Customer Class	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Delinquency Event Type • Division • Health Plan **Note:** This option is not applicable for the banking business. • Health Product **Note:** This option is not applicable for the banking business. • Membership **Note:** This option is not applicable for the banking business. • Membership Person **Note:** This option is not applicable for the banking business. • Person • Policy • Policy Plan **Note:** This option is not applicable for the banking business. • Product **Note:** This option is not applicable for the health insurance business. • Service Quantity Identifier • State • Transaction **Note:** The list includes only those values which are defined in the**SOURCE_ENTITY_FLG** lookup field.	
Description	Used to specify the description for the parameter.	Yes
Source Type	Used to indicate the source type using which the parameter value is derived. The valid values are: • Characteristic • Field • Usage Amount • Usage Counter **Note:** This field appears when the **Account**, **Person**, **Benefit**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Person**, **Policy**, **Policy Plan**, **Product**, or **State** option is selected from the **Source Entity** list. The **Usage Amount** and **Usage Counter** options do not appear in the **Source Type** list when the **Benefit**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Policy**, **Policy Plan**, **Product**, or **State** option is selected from the **Source Entity** list.	Yes

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>This is a read-only field. By default, the Field option is selected when the Customer Class, Delinquency Event Type, and Division option is selected from the Source Entity list.

The list includes only those values which are defined in the SOURCE_TYPE_FLG lookup field.</td><td></td></tr>
<tr><td>Value Type</td><td>Used to indicate the type of value that you want to store in the parameter. The valid values are:
Adhoc
Predefined
Reference
Note: The list includes only those values which are defined in the PRICE_PARM_TYPE_FLG lookup field.</td><td>Not applicable</td></tr>
<tr><td>Source Type Code</td><td>Used to indicate the source type code using which the parameter value is derived.

Note:

This field does not appear when the Transaction option is selected from the Source Entity list.

The following table indicates the values that are listed in the Source Type Code field depending on the source entity and source type combination:<table><tr><th>Source Entity</th><th>Source Type</th><th>Source Type Code</th></tr><tr><td>Account</td><td>Characteristic</td><td>Lists all characteristics where the characteristic entity is set to Account.</td></tr><tr><td>Account</td><td>Field</td><td>Lists all fields of the CI_ACCT table.</td></tr><tr><td>Account</td><td>Usage Amount</td><td>The list includes only those values which are defined in the BAL_FLG lookup field.</td></tr><tr><td>Account</td><td>Usage Counter</td><td>The list includes only those values which are defined in the CNT_FLG lookup field.</td></tr><tr><td>Algorithm</td><td>-</td><td>Lists all algorithms which are defined using the C1-PPARM-ENT algorithm type.</td></tr></table></td><td>Yes</td></tr>

Field Name	Field Description	Mandatory (Yes or No)
	This field appears only when the **Reference** option is selected from the **Value Type** list. The **Search** (🔍) icon appears corresponding to the **Reference Entity** field. On clicking the **Search** icon, the **Reference Table Search** window appears. On specifying the entity, the description of the entity appears corresponding to the **Reference Entity** field. You can only specify a language table, where the **DESCR** column is available, in the **Reference Entity** field.	

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define the predefined values for the parameter. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Values	Used to specify the value for the parameter. **Note:** You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes (Conditional) **Note:** This field is required while defining the predefined parameter values.
Description	Used to specify the description for the parameter value.	Yes (Conditional) **Note:** This field is required while defining the predefined parameter values.

Note:

The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list. At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add** (+) icon and then specify the details.

However, if you want to remove a predefined value from the parameter, click the **Delete** (🗑) icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional) **Note:** This option is required while associating the

Option Name	Option Description	Mandatory (Yes or No)
	Note: This option appears when the **Account**, **Person**, **Product**, **State**, or the **Transaction** option is selected from the **Source Entity** list. By default, this option is selected when the **Transaction** option is selected from the **Source Entity** list.	parameter with a price item.
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria. **Note:** This option appears when the **Account**, **Algorithm**, **Membership**, **Membership Person**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a pricing eligibility criteria using the parameter.
Pricing Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing rule eligibility criteria. **Note:** This option appears only when the **Membership** or the **Membership Person** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while using the parameter for defining a rule based pricing eligibility criteria.
Business Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the business rule eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Customer Class**, **Delinquency Event Type**, **Division**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Policy**, or the **Policy Plan** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while using the parameter for defining a rule based business eligibility criteria.
Price List Eligibility Criteria	Used to indicate whether the parameter is used for defining the price list eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a price list eligibility criteria using the parameter.
Product Eligibility Criteria	Used to indicate whether the parameter is used for defining the product eligibility criteria.	Yes (Conditional) **Note:** This option is

Option Name	Option Description	Mandatory (Yes or No)
	Note: This option appears only when the **Account**, **Person**, **Product**, or the **State** option is selected from the **Source Entity** list.	required while defining a product eligibility criteria using the parameter.
Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the rule eligibility criteria. **Note:** This option does not appear when the **Customer Class**, **Delinquency Event Type**, **Division Product**, **Service Quantity Identifier**, or the **Transaction** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a rule eligibility criteria using the parameter.

Note: You must select at least one option in the **Parameter Usage** section.

3. Modify the required details in the **Parameter** screen.
4. Click **Save**.
   The changes made to the parameter are saved.

Deleting a Parameter

Procedure

To delete a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Delete** () icon in the **Delete** column corresponding to the *p*arameter that you want to delete.

   A message appears confirming whether you want to delete the parameter.

   Note:

   You can delete a parameter only when the following conditions are met:

   - It is not yet associated to any price item or price item bundle.
   - It is not yet used while defining the pricing, business rule, price list, product eligibility, or rule eligibility criteria.

3. Click **OK**.
   The parameter is deleted.

Copying a Parameter

Instead of creating a parameter from scratch, you can define a new parameter using an existing parameter. This is possible through copying a parameter. On copying a parameter, the details including the predefined values, validation algorithm, and reference entity (depending upon the value type) are copied to the new parameter along with the parameter usage details. You can then edit the details, if required.

Prerequisites

To copy a parameter, you should have:

- Parameter (whose copy you want to create) defined in the application
- Validation algorithm defined using the **C1_PPARM_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)
- The **Fetch Type Source (C1-FetchSourceTypeVal)** business service defined in the application.
- Source entities and source types defined in the application
- Source type codes defined in the application

Note:

A sample algorithm type named **C1_PPARM_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

Procedure

To copy a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Copy** (⧉) icon in the **Copy** column corresponding to the parameter *w*hose copy you want to create.

   The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter. **Note:** You cannot specify any special character except underscore (_) in the parameter name.	Not applicable
Source Entity	Used to indicate the source entity using which the parameter value is derived. The valid values are: • Account • Algorithm • Benefit • Customer Class • Delinquency Event Type • Division	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Health Plan **Note:** This option is not applicable for the banking business. • Health Product **Note:** This option is not applicable for the banking business. • Membership **Note:** This option is not applicable for the banking business. • Membership Person **Note:** This option is not applicable for the banking business. • Person • Policy • Policy Plan **Note:** This option is not applicable for the banking business. • Product **Note:** This option is not applicable for the health insurance business. • Service Quantity Identifier • State • Transaction **Note:** The list includes only those values which are defined in the**SOURCE_ENTITY_FLG** lookup field.	
Description	Used to specify the description for the parameter.	Yes
Source Type	Used to indicate the source type using which the parameter value is derived. The valid values are: • Characteristic • Field • Usage Amount • Usage Counter **Note:** This field appears when the **Account**, **Person**, **Benefit**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Person**, **Policy**, **Policy Plan**, **Product**, or **State** option is selected from the **Source Entity** list. The **Usage Amount** and **Usage Counter** options do not appear in the **Source Type** list when the **Benefit**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Policy**, **Policy Plan**, **Product**, or **State** option is selected from the **Source Entity** list.	Yes

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>This is a read-only field. By default, the Field option is selected when the Customer Class, Delinquency Event Type, and Division option is selected from the Source Entity list.

</table>

Field Name	Field Description	Mandatory (Yes or No)
	This field appears only when the **Reference** option is selected from the **Value Type** list. The **Search** (🔍) icon appears corresponding to the **Reference Entity** field. On clicking the **Search** icon, the **Reference Table Search** window appears. On specifying the entity, the description of the entity appears corresponding to the **Reference Entity** field. You can only specify a language table, where the **DESCR** column is available, in the **Reference Entity** field.	

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define the predefined values for the parameter. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Values	Used to specify the value for the parameter. **Note:** You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes (Conditional) **Note:** This field is required while defining the predefined parameter values.
Description	Used to specify the description for the parameter value.	Yes (Conditional) **Note:** This field is required while defining the predefined parameter values.

Note:

The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list. At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add** (+) icon and then specify the details.

However, if you want to remove a predefined value from the parameter, click the **Delete** (🗑) icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where you want to use the parameter in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)
Price Item	Used to indicate whether the parameter is associated with a price item or price item bundle. If the parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional) **Note:** This option is required while associating the

Option Name	Option Description	Mandatory (Yes or No)
	Note: This option appears when the **Account**, **Person**, **Product**, **State**, or the **Transaction** option is selected from the **Source Entity** list. By default, this option is selected when the **Transaction** option is selected from the **Source Entity** list.	parameter with a price item.
Pricing Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing eligibility criteria. **Note:** This option appears when the **Account**, **Algorithm**, **Membership**, **Membership Person**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a pricing eligibility criteria using the parameter.
Pricing Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the pricing rule eligibility criteria. **Note:** This option appears only when the **Membership** or the **Membership Person** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while using the parameter for defining a rule based pricing eligibility criteria.
Business Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the business rule eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Customer Class**, **Delinquency Event Type**, **Division**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Policy**, or the **Policy Plan** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while using the parameter for defining a rule based business eligibility criteria.
Price List Eligibility Criteria	Used to indicate whether the parameter is used for defining the price list eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a price list eligibility criteria using the parameter.
Product Eligibility Criteria	Used to indicate whether the parameter is used for defining the product eligibility criteria.	Yes (Conditional) **Note:** This option is

Option Name	Option Description	Mandatory (Yes or No)
	Note: This option appears only when the **Account**, **Person**, **Product**, or the **State** option is selected from the **Source Entity** list.	required while defining a product eligibility criteria using the parameter.
Rule Eligibility Criteria	Used to indicate whether the parameter is used for defining the rule eligibility criteria. **Note:** This option does not appear when the **Customer Class**, **Delinquency Event Type**, **Division Product**, **Service Quantity Identifier**, or the **Transaction** option is selected from the **Source Entity** list.	Yes (Conditional) **Note:** This option is required while defining a rule eligibility criteria using the parameter.

Note: You must select at least one option in the **Parameter Usage** section.

3. Enter the required details in the **Parameter** screen.
4. Click **Save**.
   The new parameter is defined.

Note: If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

Parameter (Used for Viewing)

Once you create a parameter, the **Parameter** screen allows you to:

- View the details of the parameter

This screen consists of the following zone:

- Parameter on page 344

Parameter

The **Parameter** zone displays the details of the parameter. It contains the following sections:

- **Main** - Displays the basic information about the parameter. It contains the following fields:

Field Name	Field Description
Parameter	Displays the parameter name.
Description	Displays the description of the parameter.
Value Type	Indicates the type of value that you want to store in the parameter. The valid values are: • Adhoc • Predefined • Reference
Validation Algorithm	Indicates the algorithm using which you want to validate the adhoc parameter value. **Note:** This field appears when the **Adhoc** option is selected from the **Value Type** list. It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm.
Referenced Table	Indicates the reference table whose primary key (i.e. column) is used to validate the parameter value. **Note:** This field appears when the **Reference** option is selected from the **Value Type** list. It has a link. On clicking the link, the **Table** screen appears where you can view the details of the respective table.
Source Entity	Indicates the source entity using which the parameter value is derived. The valid values are: • Account • Algorithm • Benefit • Customer Class • Delinquency Event Type • Division • Health Plan

Field Name	Field Description
	Note: This option is not applicable for the banking business. • Health Product **Note:** This option is not applicable for the banking business. • Membership **Note:** This option is not applicable for the banking business. • Membership Person **Note:** This option is not applicable for the banking business. • Person • Policy • Policy Plan **Note:** This option is not applicable for the banking business. • Product **Note:** This option is not applicable for the health insurance business. • Service Quantity Identifier • State • Transaction
Source Type	Indicates the source type using which the parameter value is derived. The valid values are: • Characteristic • Field • Usage Amount • Usage Counter **Note:** This field appears when the **Account**, **Person**, **Benefit**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Person**, **Policy**, **Policy Plan**, **Product**, or **State** option is selected from the **Source Entity** list. The **Usage Amount** and **Usage Counter** options do not appear in the **Source Type** list when the **Benefit**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Policy**, **Policy Plan**, **Product**, or **State** option is selected from the **Source Entity** list.
Source Type Code	Used to indicate the source type code using which the parameter value is derived. **Note:** This field does not appear when the **Transaction** option is selected from the **Source Entity** list.

- **Parameter Values** - Lists the predefined values of the parameter. It contains the following columns:

Column Name	Column Description
Parameter Value	Displays the value of the parameter.

Column Name	Column Description
Description	Displays the description of the parameter value.

Note: The **Parameter Values** section appears when the **Predefined** option is selected from the **Value Type** list.

- **Parameter Usage** - Indicates where you can use the parameter in the system. It contains the following options:

Option Name	Option Description
Price Item	Indicates whether the parameter is associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing. **Note:** This option appears when the **Account**, **Person**, **Product**, **State**, or the **Transaction** option is selected from the **Source Entity** list.
Pricing Eligibility Criteria	Indicates whether the parameter is used for defining the pricing eligibility criteria. **Note:** This option appears when the **Account**, **Algorithm**, **Membership**, **Membership Person**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.
Pricing Rule Eligibility Criteria	Indicates whether the parameter is used for defining the pricing rule eligibility criteria. **Note:** This option appears only when the **Membership** or the **Membership Person** option is selected from the **Source Entity** list.
Business Rule Eligibility Criteria	Indicates whether the parameter is used for defining the business rule eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Customer Class**, **Delinquency Event Type**, **Division**, **Health Plan**, **Health Product**, **Membership**, **Membership Person**, **Policy**, or the **Policy Plan** option is selected from the **Source Entity** list.
Price List Eligibility Criteria	Indicates whether the parameter is used for defining the price list eligibility criteria. **Note:** This option appears only when the **Account**, **Algorithm**, **Person**, **Product**, **Service Quantity Identifier**, or the **State** option is selected from the **Source Entity** list.
Product Eligibility Criteria	Indicates whether the parameter is used for defining the product eligibility criteria. **Note:** This option appears only when the **Account**, **Person**, **Product**, or the **State** option is selected from the **Source Entity** list.
Rule Eligibility Criteria	Indicates whether the parameter is used for defining the rule eligibility criteria. **Note:** This option does not appear when the **Customer Class**, **Delinquency Event Type**, **Division Product**, **Service Quantity Identifier**, or the **Transaction** option is selected from the **Source Entity** list.

Entity Hierarchy Relationship

An entity hierarchy relationship enables you to group related services (i.e. price items) offered to the customers under one group header for the reporting purposes. You can define group headers as hierarchy entities in the system. For example, you can group all payment services, such as `Auto Clearing House (ACH) Transfer`, `Auto Clearing House (ACH) Reversal`, `Lockbox Service`, `Dealer Debit`, and so on under a group header (i.e. hierarchy entity) named `Payments`.

You can include hierarchy entities at different levels and thereby design the structure for an entity hierarchy relationship. For example, you can create three hierarchy entities named `Cash Management`, `Payments`, and `e-Statements`. Then, while designing the structure of an entity hierarchy relationship named `CASHMGT`, you include the `Cash Management` hierarchy entity at the first or root level and then the `Payments` and `e-Statements` hierarchy entities at the second level.

While defining a hierarchy entity, you need to specify the following:

- Level at which you can include the hierarchy entity in an entity hierarchy relationship.
- Division to which the hierarchy entity is associated.

You can include a hierarchy entity in an entity hierarchy relationship when the hierarchy entity is associated with the division for which the entity hierarchy relationship is created. You can associate a hierarchy entity with one or more divisions. While associating a hierarchy entity with a division, you need to specify the date from when the hierarchy entity is associated with the division. The system allows you to include a hierarchy entity in an entity hierarchy relationship when the hierarchy entity is effective for the division on the entity hierarchy relationship start date.

At present, the system supports maximum 10 levels in an entity hierarchy relationship. Therefore, you can define hierarchy entities for upto 9 levels (i.e. Level 1, Level 2, ..., Level 9). The last level (i.e. Level 10) is reserved for a price item that you want to include in an entity hierarchy relationship. If you do not require 10 levels in an entity hierarchy relationship, you can set a lower maximum limit in the **Maximum Hierarchy Level** option type of the **C1-EHRCONFIG** feature configuration. However, note that the system will allow you to create a hierarchy entity upto one level less than the level specified in the **Maximum Hierarchy Level** option type. For example, if you set the value of the **Maximum Hierarchy Level** option type to 5, the system allows you to create hierarchy entities for upto four levels (i.e. Level 1, Level 2, Level 3, and Level 4). The last level (i.e. Level 5) is reserved for a price item that you want to include in an entity hierarchy relationship. Therefore, you need to accordingly set the value as per the business requirements.

While defining an entity hierarchy relationship, you need to specify the following:

- Division for which you want to create the entity hierarchy relationship.
- The date range for which the entity hierarchy relationship is effective for the division.
- The hierarchy entity that you want to include at the first or root level (i.e. Level 1) in the entity hierarchy relationship. Here, you can only specify a hierarchy entity where the entity level is set to Level 1.

  Note: This is the root from where the entity hierarchy relationship starts and hence only Level 1 entities are allowed to be placed at the root of the entity hierarchy relationship.
- The hierarchy entities that you want to include at the subsequent levels (i.e. Level 2, Level 3, and so on) in the entity hierarchy relationship and their respective parent hierarchy entity.

Note: You can include only those hierarchy entities which are associated with the division for which the entity hierarchy relationship is created and which are effective for the division on the entity hierarchy relationship start date.

You can include multiple hierarchy entities at the same level. But, you need to ensure that the parent hierarchy entity for such parallel levels is same. For example, when you include the `Payments` and `e-Statements` hierarchy entities at the same level, you need to ensure that their parent hierarchy entity is set to `Cash Management`.

```
Cash Management
    Payments
```

```
        ACH Transfer
```

Associating a price item or price item bundle with a hierarchy entity does not has any impact on the billing module. At present, the price item hierarchy is only displayed in the Deal Modelling and Simulation module.

While editing an entity hierarchy relationship, you cannot change the hierarchy entity at the first level when a price item is associated with a hierarchy entity either at the first or subsequent level in the entity hierarchy relationship. In addition, you cannot delete an entity level from the entity hierarchy relationship or change the details of an entity level when a price item is associated with the hierarchy entity at the respective entity level or at any level in the vertical hierarchy of the entity hierarchy relationship. Let us assume we have the following entity hierarchy relationship…

```
Cash Management
    Payments
        ACH Transfer
        ACH Reversal
        Lockbox Service
        Dealer Debit
    e-Statements
        TWIST Statement
        CAMT Statement
        SWIFT Statement
```

In the above entity hierarchy relationship, you cannot remove the `Payments` or `e-Statements` entity level or change the details of the `Payments` or `e-Statements` entity level because the price items are associated with the `Payments` and `e-Statements` hierarchy entities. In addition, you cannot change the hierarchy entity at the root level because the price items are associated with the `Payments` and `e-Statements` entity levels which is in the vertical hierarchy of `Cash Management`.

Associate an Entity Hierarchy Relationship with Multiple Divisions

Until now, you were able to associate an entity hierarchy relationship with only one division at a time. Now, you can associate an entity hierarchy relationship with multiple divisions. You can include a hierarchy entity in an entity hierarchy relationship only when the hierarchy entity is associated with all the divisions to which the entity hierarchy relationship is associated. Let us understand this with the help of an example. Let us assume that the following hierarchy entities exist in the system:

Hierarchy Entity	Entity Level	Divisions
Cash Management	Level 1	New England, Middle Atlantic
Payments	Level 2	New England, Middle Atlantic, East North Central, East South Central, West South Central
e-Statements	Level 2	New England, Middle Atlantic, Mountain, Pacific, West South Central
ACH Transfer	Level 3	New England, Middle Atlantic, West South Central, East North Central
ACH Reversal	Level 3	Middle Atlantic, East North Central, West North Central, South Atlantic
TWIST Statement	Level 3	East North Central, West North Central, South Atlantic
CAMT Statement	Level 3	New England
Lockbox Service	Level 3	West South Central, East North Central

Let us assume that an entity hierarchy relationship named H1 is associated with the New England and Middle Atlantic divisions. Now, if you want to include the hierarchy entities in the H1 entity hierarchy relationship, you can only associate those hierarchy entities that are associated with the divisions to which the H1 entity hierarchy relationship is associated. In this case, you can include the following hierarchy entities in the H1 entity hierarchy relationship at the above-mentioned levels:

- Cash Management
- Payments
- e-Statements
- ACH Transfer

Hierarchy Entity (Used for Searching)

The **Hierarchy Entity** screen allows you to search for a hierarchy entity using various search criteria. It also allows you to define a hierarchy entity. It contains the following zone:

- Search Hierarchy Entity on page 349

Through this screen, you can navigate to the following screen:

- Hierarchy Entity (Used for Viewing) on page 356

Search Hierarchy Entity

The **Search Hierarchy Entity** zone allows you to search for a hierarchy entity using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Entity	Used to search a particular hierarchy entity.	No
Description	Used to search hierarchy entities with a particular description.	No
Entity Level	Used to search hierarchy entities which can be included at a particular level in an entity hierarchy relationship. The valid values are: • Level 1 • Level 2 • Level 3 • Level 4 • Level 5 • Level 6 • Level 7 • Level 8 • Level 9	No
Status	Used to search hierarchy entities with a particular status. The valid values are: • Active • Inactive	No
Division	Used to search hierarchy entities which are associated with a particular division.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can view only those divisions to which you have access in the **Division** list.	

Note: You must specify at least one search criterion while searching for a hierarchy entity.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Hierarchy Entity Information	Displays information about the hierarchy entity. **Note:** It has a link. On clicking the link, the **Hierarchy Entity** screen appears where you can view the details of the respective hierarchy entity.
Entity Level	Indicates the level at which the hierarchy entity can be included in an entity hierarchy relationship. The valid values are: • Level 1 • Level 2 • Level 3 • Level 4 • Level 5 • Level 6 • Level 7 • Level 8 • Level 9
Status	Indicates the status of the hierarchy entity. The valid values are: • Active • Inactive
Division	Indicates the division to which the hierarchy entity is associated.
Effective Date	Displays the date from when the hierarchy entity is associated with the division.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Hierarchy Entity

Prerequisites

To search for a hierarchy entity, you should have:

- Hierarchy entity defined in the application
- Hierarchy entity associated with the division to which the user belongs

Procedure

To search for a hierarchy entity:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Hierarchy Entity**.
   The **Hierarchy Entity** screen appears.
3. Enter the search criteria in the **Search Hierarchy Entity** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of hierarchy entities that meet the search criteria appears in the **Search Results** section.

Viewing the Hierarchy Entity Details

Procedure

To view the details of a hierarchy entity:

1. Search for the hierarchy entity in the **Hierarchy Entity** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Entity Information** column corresponding to *t*he hierarchy entity whose details you want to view.

   The **Hierarchy Entity** screen appears. It contains the following zone:

   - Hierarchy Entity on page 356
3. View the details of the hierarchy entity in the **Hierarchy Entity** zone.

Defining a Hierarchy Entity

Prerequisites

To define a hierarchy entity, you should have:

- Value defined for the **Maximum Hierarchy Level** option type in the **C1-EHRCONFIG** feature configuration

Procedure

To define a hierarchy entity:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click the **Add** button corresponding to the **Hierarchy Entity** option.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Entity Business Object	Used to indicate the business object using which you want to create the hierarchy entity in the system.	Yes

   Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Hierarchy Entity** screen.

   Note: The **Select Business Object** screen appears when there are multiple hierarchy entity business objects defined in the application. If there is only one hierarchy entity business object defined in the application, the **Hierarchy Entity** screen appears.
3. Select the required hierarchy entity business object from the respective field.
4. Click **OK**.

   The **Hierarchy Entity** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the hierarchy entity.
   - **Division** - Used to associate the hierarchy entity with one or more divisions.
   - **Characteristics** - Used to define a list of characteristics for the hierarchy entity.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Entity	Used to specify the hierarchy entity.	Yes
Description	Used to specify the description for the hierarchy entity.	Yes
Entity Level	Used to indicate the level at which the hierarchy entity can be included in an entity hierarchy relationship. The valid values are: • Level 1 • Level 2 • Level 3 • Level 4 • Level 5 • Level 6 • Level 7 • Level 8 • Level 9 **Note:** At present, the system supports maximum 10 levels in an entity hierarchy relationship. Therefore, you can define hierarchy entities for upto 9 levels (i.e. Level 1, Level 2, ..., Level 9). The last level (i.e. Level 10) is reserved for a price item that you want to include in an entity	Yes

Field Name	Field Description	Mandatory (Yes or No)
	hierarchy relationship. If you do not require 10 levels in an entity hierarchy relationship, you can set a lower maximum limit in the **Maximum Hierarchy Level** option type of the **C1-EHRCONFIG** feature configuration. However, note that the system will allow you to create a hierarchy entity upto one level less than the level specified in the **Maximum Hierarchy Level** option type. For example, if you set the value of the **Maximum Hierarchy Level** option type to 5, the system allows you to create hierarchy entities for upto four levels (i.e. Level 1, Level 2, Level 3, and Level 4). The last level (i.e. Level 5) is reserved for a price item that you want to include in an entity hierarchy relationship. Therefore, you need to accordingly set the value as per the business requirements. In such case, the system will list only the first four levels in the **Entity Level** field.	
Status	Indicates the status of the hierarchy entity. By default, the value is set to **Active**.	Not applicable
Business Object	Indicates the business object using which you are defining the hierarchy entity.	Not applicable
Sort Sequence	Used to specify the sequence in which the hierarchy entity should appear in the price item hierarchy of the deal pricing management module.	No

5. Enter the required details in the **Main** section.
6. Associate the hierarchy entity with one or more divisions in the **Division** section.
7. Define characteristics for the hierarchy entity in the **Characteristics** section, if required.
8. Click **Save**.
   The hierarchy entity is defined.

Associating a Hierarchy Entity with a Division

Prerequisites

To associate a hierarchy entity with a division, you should have:

- Divisions defined in the application

Procedure

To associate a hierarchy entity with a division:

1. Ensure that the **Division** section is expanded when you are defining, *e*diting, or copying a hierarchy entity.

   The **Division** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when you want to associate the hierarchy entity with the division.	Yes
Division	Used to indicate the division to which you want to associate the hierarchy entity. **Note:** You can only view those divisions to which you have access in the **Division** list.	Yes

2. Enter the required details in the **Division** section.

   Note: You cannot change the details of a division when the hierarchy entity is included in an entity hierarchy relationship which is created for the division.

3. If you want to associate the hierarchy entity with more than one division, click the **Add** (+) icon and then repeat step *2*.

   Note: If you want to remove the hierarchy entity from a division, click the **Delete** (🗑) icon corresponding to the division. However, note that you cannot remove a hierarchy entity from a division when the hierarchy entity is included in an entity hierarchy relationship which is created for the division.

4. Click **Save**.
   The hierarchy entity is associated with the division.

Defining a Characteristic for a Hierarchy Entity

Prerequisites

To define a characteristic for a hierarchy entity, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Hierarchy Entity**)

Procedure

To define a characteristic for a hierarchy entity:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a hierarchy *e*ntity.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the hierarchy entity.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the hierarchy entity.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Hierarchy Entity**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the hierarchy entity.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the hierarchy entity.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the hierarchy entity, click the **Add** (+) icon and *t*hen repeat *s*tep 2.

   Note: However, if you want to remove a characteristic from the hierarchy entity, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The characteristic is defined for the hierarchy entity.

Hierarchy Entity (Used for Viewing)

The **Hierarchy Entity** screen allows you to view the details of the hierarchy entity. It also allows you to edit, delete, and copy the hierarchy entity. It contains the following zone:

- Hierarchy Entity on page 356

Hierarchy Entity

The **Hierarchy Entity** zone displays the details of the hierarchy entity. It contains the following sections:

- **Main** - Displays basic information about the hierarchy entity. It contains the following fields:

Field Name	Field Description
Hierarchy Entity	Displays the hierarchy entity.
Description	Displays the description of the hierarchy entity.
Entity Level	Indicates the level at which the hierarchy entity can be included in an entity hierarchy relationship. The valid values are: • Level 1 • Level 2 • Level 3 • Level 4 • Level 5 • Level 6 • Level 7 • Level 8 • Level 9
Status	Indicates the status of the hierarchy entity. The valid values are: • Active • Inactive
Sort Sequence	Displays the sequence in which the hierarchy entity should appear in the price item hierarchy of the deal pricing management module.

- **Divisions** - Lists the divisions to which the hierarchy entity is associated. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the hierarchy entity is associated with the division.
Division	Indicates the division to which the hierarchy entity is associated. **Note:** It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.

- **Characteristics** - Lists the characteristics defined for the hierarchy entity. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the hierarchy entity.
Characteristic Type	Displays the characteristic type.

Column Name	Column Description
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the hierarchy entity.
Delete	Used to delete the hierarchy entity. **Note:** You can delete a hierarchy entity only when it is not yet included in any entity hierarchy relationship.
Duplicate	Used to create a new hierarchy entity using an existing hierarchy entity.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the hierarchy entity is created in the system. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Editing a Hierarchy Entity

Prerequisites

To edit a hierarchy entity, you should have:

- Value defined for the **Maximum Hierarchy Level** option type in the **C1-EHRCONFIG** feature configuration

Procedure

To edit a hierarchy entity:

1. Search for the hierarchy entity in the **Hierarchy Entity** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Entity Information** column corresponding to *t*he hierarchy entity whose details you want to edit.
   The **Hierarchy Entity** screen appears.
3. Click the **Edit** button in the **Hierarchy Entity** zone.

The **Hierarchy Entity** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the hierarchy entity.
- **Division** - Used to associate the hierarchy entity with one or more divisions.
- **Characteristics** - Used to define the characteristics for the hierarchy entity.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Entity	Displays the hierarchy entity.	Not applicable
Description	Used to specify the description for the hierarchy entity.	Yes
Entity Level	Used to indicate the level at which the hierarchy entity can be included in an entity hierarchy relationship. The valid values are: • Level 1 • Level 2 • Level 3 • Level 4 • Level 5 • Level 6 • Level 7 • Level 8 • Level 9 **Note:** At present, the system supports maximum 10 levels in an entity hierarchy relationship. Therefore, you can define hierarchy entities for upto 9 levels (i.e. Level 1, Level 2, ..., Level 9). The last level (i.e. Level 10) is reserved for a price item that you want to include in an entity hierarchy relationship. If you do not require 10 levels in an entity hierarchy relationship, you can set a lower maximum limit in the **Maximum Hierarchy Level** option type of the **C1-EHRCONFIG** feature configuration. However, note that the system will allow you to create a hierarchy entity upto one level less than the level specified in the **Maximum Hierarchy Level** option type. For example, if you set the value of the **Maximum Hierarchy Level** option type to 5, the system allows you to create hierarchy entities for upto four levels (i.e. Level 1, Level 2, Level 3, and Level 4). The last level (i.e. Level 5) is reserved for a price item that you want to include in an entity hierarchy relationship.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Therefore, you need to accordingly set the value as per the business requirements. In such case, the system will list only the first four levels in the **Entity Level** field. You cannot change the entity level of a hierarchy entity when the hierarchy entity is already included in an entity hierarchy relationship.	
Status	Used to indicate the status of the hierarchy entity. The valid values are: • Active • Inactive **Note:** You cannot inactivate a hierarchy entity when the hierarchy entity is already included in an entity hierarchy relationship.	Yes
Business Object	Indicates the business object which is used while defining the hierarchy entity.	Not applicable
Sort Sequence	Used to specify the sequence in which the hierarchy entity should appear in the price item hierarchy of the deal pricing management module.	No

4. Modify the required details in the **Main** section.
5. Associate or disassociate the hierarchy entity from the divisions, if required.

   Note: If the hierarchy entity is associated to a division to which you do not have access, then, the corresponding row in the **Division** section is grayed out.
6. Define, edit, or remove characteristics from the hierarchy entity, if required.
7. Click **Save**.
   The changes made to the hierarchy entity are saved.

Deleting a Hierarchy Entity

Procedure

To delete a hierarchy entity:

1. Search for the hierarchy entity in the **Hierarchy Entity** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Entity Information** column corresponding to *t*he hierarchy entity that you want to delete.
   The **Hierarchy Entity** screen appears.
3. Click the **Delete** button in the **Hierarchy Entity** zone.
   A message appears confirming whether you want to delete the hierarchy entity.

   Note: You can delete a hierarchy entity only when it is not yet included in any entity hierarchy relationship.
4. Click **OK**.
   The hierarchy entity is deleted.

Copying a Hierarchy Entity

Instead of creating a hierarchy entity from scratch, you can create a new hierarchy entity using an existing hierarchy entity. This is possible through copying a hierarchy entity. On copying a hierarchy entity, the details including the divisions and characteristics are also copied to the new hierarchy entity. You can then edit the details, if required.

Prerequisites

To copy a hierarchy entity, you should have:

- Hierarchy entity (whose copy you want to create) defined in the application
- Value defined for the **Maximum Hierarchy Level** option type in the **C1-EHRCONFIG** feature configuration

Procedure

To copy a hierarchy entity:

1. Search for the hierarchy entity in the **Hierarchy Entity** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Entity Information** column corresponding to *t*he hierarchy entity whose copy you want to create.
   The **Hierarchy Entity** screen appears.
3. Click the **Duplicate** button in the **Hierarchy Entity** zone.

   The **Hierarchy Entity** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the hierarchy entity.
   - **Division** - Used to associate the hierarchy entity with one or more divisions.
   - **Characteristics** - Used to define the characteristics for the hierarchy entity.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Entity	Used to specify the hierarchy entity.	Yes
Description	Used to specify the description for the hierarchy entity.	Yes
Entity Level	Used to indicate the level at which the hierarchy entity can be included in an entity hierarchy relationship. The valid values are: • Level 1 • Level 2 • Level 3 • Level 4 • Level 5 • Level 6 • Level 7 • Level 8 • Level 9 **Note:** At present, the system supports maximum 10 levels in an entity hierarchy relationship. Therefore, you can define hierarchy entities for upto 9 levels (i.e. Level 1, Level 2, ..., Level 9). The last level (i.e. Level 10) is reserved for a price item that you want to include in an entity hierarchy relationship. If you do not require 10 levels in an entity hierarchy relationship, you can set a lower maximum limit in the **Maximum Hierarchy Level** option type of the **C1-EHRCONFIG** feature configuration. However, note that the system will allow you to create a hierarchy entity upto one level less than the level specified in the **Maximum Hierarchy Level** option type. For example, if you set the value of the **Maximum Hierarchy Level** option type to 5, the system allows you to create hierarchy entities for upto four levels (i.e. Level 1, Level 2, Level 3, and Level 4). The last level (i.e. Level 5) is reserved for a price item that you want to include in an entity hierarchy relationship. Therefore, you need to accordingly set the value as per the business requirements. In such case, the system will list only the first four levels in the **Entity Level** field.	Yes
Status	Indicates the status of the hierarchy entity.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	Note: By default, the value is set to **Active**.	
Business Object	Indicates the business object which is used while defining the hierarchy entity.	Not applicable
Sort Sequence	Used to specify the sequence in which the hierarchy entity should appear in the price item hierarchy of the deal pricing management module.	No

4. Enter the required details in the **Main** section.
5. Associate or disassociate the hierarchy entity from the divisions, if required.

   Note: If the hierarchy entity is associated to a division to which you do not have access, then the corresponding row in the **Division** section is grayed out.
6. Define, edit, or remove characteristics of the hierarchy entity, if required.
7. Click **Save**.
   The new hierarchy entity is defined.

Entity Hierarchy Relationship (Used for Searching)

The **Entity Hierarchy Relationship** screen allows you to search for an entity hierarchy relationship using various search criteria. It also allows you to define an entity hierarchy relationship. It contains the following zone:

- Search Hierarchy on page 362

Through this screen, you can navigate to the following screen:

- Entity Hierarchy Relationship (Used for Viewing) on page 372

Search Hierarchy

The **Search Hierarchy** zone allows you to search for an entity hierarchy relationship using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to search a particular entity hierarchy relationship.	No
Start Date	Used to search entity hierarchy relationships which are effective from a particular date onwards.	No
Division	Used to search entity hierarchy relationships which are created for a particular division.	No
End Date	Used to search entity hierarchy relationships which are effective till a particular date.	No
Description	Used to search entity hierarchy relationships having a particular description.	No

Note: You must specify at least one search criterion while searching for an entity hierarchy relationship.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Hierarchy Information	Displays information about the entity hierarchy relationship. **Note:** It has a link. On clicking the link, the **Entity Hierarchy Relationship** screen appears where you can view the details of the respective entity hierarchy relationship.
Division	Indicates the division for which the entity hierarchy relationship is created.
Start Date	Displays the date from when the entity hierarchy relationship is effective for the division.
End Date	Displays the date till when the entity hierarchy relationship is effective for the division.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for an Entity Hierarchy Relationship

Prerequisites

To search for an entity hierarchy relationship, you should have:

- Entity hierarchy relationship defined in the application
- Entity hierarchy relationship associated with the division to which the user belongs

Procedure

To search for an entity hierarchy relationship:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Entity Hierarchy Relationship**.
   The **Entity Hierarchy Relationship** screen appears.
3. Enter the search criteria in the **Search Hierarchy** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of entity hierarchy relationships that meet the search criteria appears in the **Search Results** section.

Defining an Entity Hierarchy Relationship

Prerequisites

To define an entity hierarchy relationship, you should have:

- Hierarchy entities defined in the application
- Hierarchy entities associated with the division for which you want to define the entity hierarchy relationship
- Value defined for the **Maximum Hierarchy Level** option type in the **C1-EHRCONFIG** feature configuration

Procedure

To define an entity hierarchy relationship:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click the **Add** button corresponding to the **Entity Hierarchy Relationship** option.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Entity Hierarchy Relationship Business Object	Used to indicate the business object using which you want to create the entity hierarchy relationship.	Yes

   Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Entity Hierarchy Relationship** screen.

   Note: The **Select Business Object** screen appears when there are multiple entity hierarchy relationship business objects defined in the application. If there is only one entity hierarchy relationship business object defined in the application, the **Entity Hierarchy Relationship** screen appears.
3. Select the required entity hierarchy relationship business object from the respective field.

4. Click **OK**.

   The **Entity Hierarchy Relationship** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the entity hierarchy relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to specify the entity hierarchy relationship.	Yes
Description	Used to specify the description for the entity hierarchy relationship.	Yes
Start Date	Used to specify the date from when the entity hierarchy relationship is effective for the division. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **Start Date** cannot be later than the **End Date**.	Yes
End Date	Used to specify the date till when the entity hierarchy relationship is effective for the division. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **End Date** cannot be earlier than the **Start Date**.	No
Entity Level	Indicates the level at which you want to include the hierarchy entity. By default, the value is set to **Level 1**.	Not applicable
Hierarchy Entity	Used to indicate the hierarchy entity that you want to include at the first level in the entity hierarchy relationship. **Note:** The **Search** (🔍) icon appears corresponding to the **Hierarchy Entity** field. On clicking the **Search** icon, the **Hierarchy Entity Child Search** window appears where you can search for the respective hierarchy entity. The search results appear in the **Hierarchy Entity Child Search** window only when the division and start date is specified for the entity hierarchy relationship.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	The list includes only those hierarchy entities: • Which can be included at the first level in the entity hierarchy relationship • Which are effective for the specified division on the entity hierarchy relationship start date	
Business Object	Indicates the business object using which you are defining the entity hierarchy relationship.	Not applicable

5. Enter the required details in the **Main** section.
6. Associate the entity hierarchy relationship with one or more divisions.
7. Add hierarchy entity and its parent hierarchy entity for the subsequent levels in the **Hierarchy Details** *s*ection.
8. Click **Save**.
   The entity hierarchy relationship is defined.

Note: You cannot define multiple entity hierarchy relationships for a division with the same entity hierarchy relationship start date.

Associating an Entity Hierarchy Relationship with a Division

Prerequisites

To associate an entity hierarchy relationship with a division, you should have:

- Divisions defined in the application
- Divisions associated with the access group to which the user belongs
- Entity hierarchy relationship defined in the application

Procedure

To associate an entity hierarchy relationship with a division:

1. Ensure that the **Division** section is expanded in the **Entity Hierarchy Relationship** screen when you are defining, editing, or copying an entity hierarchy relationship.

   The **Division** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Select one or more division	Used to indicate the division and/or divisions to which you want to associate the entity hierarchy relationship.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: On clicking the field, a list of divisions appear to which the user has access in the application. You can then select the required division and/or divisions from the list. You can also filter the required division and/or divisions by using the **Search** (🔍) option available in the list.	

In addition, the **Division** section contains the following buttons:

Button Name	Button Description
Select All	Used to associate the entity hierarchy relationship to all the available divisions at once.
De-Select All	Used to disassociate the entity hierarchy relationship from all the selected divisions at once.

2. Enter the required details in the **Division** section.
3. Click **Save**.
   The entity hierarchy relationship is associated with the division.

Adding Hierarchy Entity in an Entity Hierarchy Relationship

Prerequisites

To add a hierarchy entity in an entity hierarchy relationship, you should have:

- Hierarchy entities defined in the application
- Hierarchy entities associated with the division to which the parent hierarchy entity belongs

Procedure

To add a hierarchy entity in an entity hierarchy relationship:

1. Ensure that the **Hierarchy Details** section is expanded in the **Entity Hierarchy Relationship** screen when you are defining, editing, or copying an entity hierarchy relationship.

   The **Hierarchy Details** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Entity Level	Used to indicate the subsequent level at which you want to include the hierarchy entity. The valid values are: • Level 2 • Level 3 • Level 4 • Level 5 • Level 6 • Level 7 • Level 8 • Level 9 **Note:** The levels listed in this field vary depending on the value specified in **Maximum Hierarchy Level** option type of the **C1-EHRCONFIG** feature configuration. For example, if the **Maximum Hierarchy Level** option type is set to 5, the system will list only three levels (i.e. Level 2, Level 3, and Level 4) in the **Entity Level** field. However, if the **Maximum Hierarchy Level** option type is set to 10, the system will list only eight levels (i.e. Level 2, Level 3, Level 4, Level 5, Level 6, Level 7, Level 8, and Level 9) in the **Entity Level** field.	Yes
Hierarchy Entity	Used to indicate the hierarchy entity that you want to include at the specified level (for example, Level 2) in the entity hierarchy relationship. **Note:** The **Search** (🔍) icon appears corresponding to the **Hierarchy Entity** field. On clicking the **Search** icon, the **Hierarchy Entity Child Search** window appears where you can search for the respective hierarchy entity. You can search for hierarchy entities only when the division and start date is specified for the entity hierarchy relationship. You can search for only those hierarchy entities: • Which can be included at the specified level in the entity hierarchy relationship • Which are effective for the specified division on the entity hierarchy relationship start date	Yes

Field Name	Field Description	Mandatory (Yes or No)
Parent Hierarchy Entity	Used to indicate the parent hierarchy entity. **Note:** The **Search** (🔍) icon appears corresponding to the **Parent Hierarchy Entity** field. On clicking the **Search** icon, the **Hierarchy Entity Parent Search** window appears where you can search for the respective parent hierarchy entity. You can search for parent hierarchy entities only when the division and start date is specified for the entity hierarchy relationship. You can search for only those parent hierarchy entities: • Which can be included at the specified level minus one level in the entity hierarchy relationship • Which are effective for the specified division on the entity hierarchy relationship start date For example, if you specify the hierarchy entity for Level 2, the system will list hierarchy entities which can be included at the first level in the **Parent Hierarchy Entity** field. And, if you specify the hierarchy entity for Level 5, the system will list hierarchy entities which can be included at the fourth level in the **Parent Hierarchy Entity** field. Here, note that you must select the hierarchy entity which is already included in the entity hierarchy relationship.	Yes
Start Date	Used to specify the date from when the hierarchy entity is associated in the entity hierarchy relationship at the specified entity level. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **Start Date** cannot be later than the **End Date**.	Yes
End Date	Used to specify the date till when the hierarchy entity is associated in the entity hierarchy relationship at the specified entity level. **Note:**	No

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **End Date** cannot be earlier than the **Start Date**.	
Price Items	On clicking the **Add** (📄) icon you can associate price items with the hierarchy entity at the specified entity level of the entity hierarchy relationship.	No

2. Enter the required details in the **Hierarchy Details** section.
3. If you want to add more than one hierarchy entity in the entity hierarchy relationship, click the **Add** (+) icon and then repeat step 1.

   Note: However, if you want to remove a hierarchy entity from the entity hierarchy relationship, click the **Delete** (🗑) icon corresponding to the hierarchy entity.

   Note: You can include multiple hierarchy entities at the same level. But, you need to ensure that the parent hierarchy entity for such parallel levels is same.
4. Associate price items with the hierarchy entity in the entity hierarchy relationship, if required.
5. Click **Save**.
   The hierarchy entity is added in the entity hierarchy relationship.

Associating a Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship

Prerequisites

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship, you should have:

- Hierarchy entities defined in the application
- Hierarchy entity associated with its parent hierarchy entity for the subsequent entity level
- Price items or price item bundles (which you want to associate with the hierarchy entity) defined in the application

Procedure

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship:

1. Ensure that the **Hierarchy Details** section is expanded in the **Entity Hierarchy Relationship** screen when you are defining, editing, or copying an entity hierarchy relationship.
2. Click the **Add** (+) icon in the **Price Items** column corresponding to the hierarchy entity to which you want to associate the price item or price item bundle.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item or price item bundle that you want to associate with the hierarchy entity. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search With Division** window appears where you can search for the respective price item in the division to which the hierarchy entity belongs.	Yes (Conditional) **Note:** This field is required while associating a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship.
Start Date	Used to specify the date from when the price item or price item bundle is associated with the hierarchy entity. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **Start Date** cannot be later than the **End Date.**	Yes (Conditional) **Note:** This field is required while associating a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship.
End Date	Used to specify the date till when the price item or price item bundle is associated with the hierarchy entity. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **End Date** cannot be earlier than the **Start Date**.	No

3. Enter the required details in the **Price Items** grid.
4. If you want to associate more than one price item or price item bundle with the hierarchy entity, click the **Add** (+) icon and then repeat step 3.

   Note: However, if you want to remove a price item or price item bundle from the hierarchy entity, click the **Delete** (🗑) icon corresponding to the price item.
5. Click **Save**.
   The price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship.

Viewing the Entity Hierarchy Relationship Details

Procedure

To view the details of an entity hierarchy relationship:

1. Search for the entity hierarchy relationship in the **Entity Hierarchy Relationship** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Information** column corresponding to the entity *h*ierarchy relationship whose details you want to view.

   The **Entity Hierarchy Relationship** screen appears. It contains the following zones:

   - Hierarchy on page 372
   - Hierarchy Relationship Tree on page 374
3. View the basic details of the entity hierarchy relationship in the **Hierarchy** zone.
4. View the structure of the entity hierarchy relationship (i.e. how the hierarchy entities are included at different levels) in the **Hierarchy Relationship Tree** zone.

Related Topics

For more information on...	See...
How to search for an entity hierarchy relationship	Searching for an Entity Hierarchy Relationship on page 363
Entity Hierarchy Relationship screen	Entity Hierarchy Relationship (Used for Viewing) on page 372

Entity Hierarchy Relationship (Used for Viewing)

The **Entity Hierarchy Relationship** screen allows you to view the details of the entity hierarchy relationship. It also allows you to edit, delete, and copy the entity hierarchy relationship. It contains the following zones:

- Hierarchy on page 372
- Hierarchy Relationship Tree on page 374

Hierarchy

The **Hierarchy** zone displays the details of the entity hierarchy relationship. It contains the following sections:

- **Main** - Displays basic information about the entity hierarchy relationship. It contains the following fields:

Field Name	Field Description
Hierarchy	Displays the entity hierarchy relationship.

Field Name	Field Description
Description	Displays the description of the entity hierarchy relationship.
Division	Indicates the division for which the entity hierarchy relationship is created. **Note:** It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.
Hierarchy Entity	Indicates the hierarchy entity that is included at the first level in the entity hierarchy relationship.
Start Date	Displays the date from when the entity hierarchy relationship is effective for the division.
End Date	Displays the date till when the entity hierarchy relationship is effective for the division.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the entity hierarchy relationship.
Delete	Used to delete the entity hierarchy relationship. **Note:** You can delete an entity hierarchy relationship when price items are not yet associated with a hierarchy entity at any level in the entity hierarchy relationship.
Duplicate	Used to define a new entity hierarchy relationship using an existing entity hierarchy relationship.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the entity hierarchy relationship is created. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Related Topics

For more information on...	See...
How to edit an entity hierarchy relationship	Editing an Entity Hierarchy Relationship on page 375
How to delete an entity hierarchy relationship	Deleting an Entity Hierarchy Relationship on page 377
How to copy an entity hierarchy relationship	Copying an Entity Hierarchy Relationship on page 377

Divisions

The **Division** zone lists the divisions to which the entity hierarchy relationship is associated. It contains the following column:

Column Name	Column Description
Division	Indicates the division to which the entity hierarchy relationship is associated. **Note:** It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.

Related Topics

For more information on...	See...
How to associate an entity hierarchy relationship with a division	Associating an Entity Hierarchy Relationship with a Division on page 366

Hierarchy Relationship Tree

The **Hierarchy Relationship Tree** zone lists the following in a tree structure:

- Information string of the hierarchy entity at the first level in the entity hierarchy relationship
- Information string of the hierarchy entities at the subsequent levels in the entity hierarchy relationship
- Information string of the price items which are associated with the hierarchy entities at different levels in the entity hierarchy relationship

For example,

The following table indicates the node type of each node shown in the above example:

Node	Node Type
Cash Management, US (at the first level)	Hierarchy Entity
Payments, US (at the second level)	Hierarchy Entity
ACH Payment	Price Item
ACH Return	Price Item
ACH Reversal	Price Item
Statements, US (at the second level)	Hierarchy Entity
Mini Statement	Price Item
Yearly Statement	Price Item

Each node in the tree has a link. If you click the link on the hierarchy entity node, the **Hierarchy Entity** screen appears where you can view the details of the respective hierarchy entity. However, if you click the link on the price item node, the **Price Item** screen appears where you can view the details of the respective price item.

The **Hierarchy Relationship Tree** zone contains the following field:

Field Name	Field Description
Hierarchy	Displays the entity hierarchy relationship.

In addition, it contains the following buttons:

Button Name	Button Description
Expand All	Used to expand all nodes at once in the entity hierarchy relationship.
Collapse All	Used to collapse all nodes at once in the entity hierarchy relationship.

Note: The hierarchy entities and price items are sorted in the **Hierarchy Relationship Tree** zone based on their respective sort sequence. If two or more hierarchy entities and price items have the same sort sequence, then the system sorts them in the ascending alphabetical order of the information string. Also, if the sort sequence is not defined for the hierarchy entities and price items, then the system sorts them in the ascending alphabetical order of the information string.

Editing an Entity Hierarchy Relationship

Prerequisites

To edit an entity hierarchy relationship, you should have:

- Hierarchy entities defined in the application
- Hierarchy entities associated with the division whose entity hierarchy relationship you want to edit
- Value defined for the **Maximum Hierarchy Level** option type in the **C1-EHRCONFIG** feature configuration

Procedure

To edit an entity hierarchy relationship:

1. Search for the entity hierarchy relationship in the **Entity Hierarchy Relationship** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Information** column corresponding to the entity *h*ierarchy relationship whose details you want to edit.
   The **Entity Hierarchy Relationship** screen appears.
3. Click the **Edit** button in the **Hierarchy** zone.

   The **Entity Hierarchy Relationship** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the entity hierarchy relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to specify the entity hierarchy relationship.	Yes
Description	Used to specify the description for the entity hierarchy relationship.	Yes
Start Date	Used to specify the date from when the entity hierarchy relationship is effective for the division. **Note:**	Yes

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The **Start Date** cannot be later than the **End Date**.	
End Date	Used to specify the date till when the entity hierarchy relationship is effective for the division. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The **End Date** cannot be earlier than the **Start Date**.	No
Entity Level	Indicates the level at which you want to include the hierarchy entity. By default, the value is set to **Level 1**.	Not applicable
Hierarchy Entity	Used to indicate the hierarchy entity that you want to include at the first level in the entity hierarchy relationship. **Note:** The **Search** ( ) icon appears corresponding to the **Hierarchy Entity** field. On clicking the **Search** icon, the **Hierarchy Entity Child Search** window appears where you can search for the respective hierarchy entity. The search results appear in the **Hierarchy Entity Child Search** window only when the division and start date is specified for the entity hierarchy relationship. The list includes only those hierarchy entities: • Which can be included at the first level in the entity hierarchy relationship • Which are effective for the specified division on the entity hierarchy relationship start date	Yes
Business Object	Indicates the business object using which you are defining the entity hierarchy relationship.	Not applicable

4. Modify the required details in the **Main** section.
5. Associate or disassociate the entity hierarchy relationship from one or more divisions.

6. Add or remove hierarchy entity and its parent hierarchy entity for the subsequent levels in the **Hierarchy Details** *s*ection, if required.
7. Click **Save**.
   The changes made to the entity hierarchy relationship are saved.

Deleting an Entity Hierarchy Relationship

Procedure

To delete an entity hierarchy relationship:

1. Search for the entity hierarchy relationship in the **Entity Hierarchy Relationship** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Information** column corresponding to the entity *h*ierarchy relationship that you want to delete.
   The **Entity Hierarchy Relationship** screen appears.
3. Click the **Delete** button in the **Hierarchy** zone.
   A message appears confirming whether you want to delete the entity hierarchy relationship.

   Note: You can delete an entity hierarchy relationship when price items are not yet associated with a hierarchy entity at any level in the entity hierarchy relationship.
4. Click **OK**.
   The entity hierarchy relationship is deleted.

Related Topics

Copying an Entity Hierarchy Relationship

Instead of creating an entity hierarchy relationship from scratch, you can create a new entity hierarchy relationship using an existing entity hierarchy relationship. This is possible through copying an entity hierarchy relationship. On copying an entity hierarchy relationship, the details including the entity levels are copied to the new entity hierarchy relationship. You can then edit the details, if required.

Note: On copying an entity hierarchy relationship, if a price item is associated to a hierarchy entity at any level in the entity hierarchy relationship, the price tem is not copied to the new entity hierarchy relationship.

Prerequisites

To copy an entity hierarchy relationship, you should have:

- Entity hierarchy relationship (whose copy you want to create) defined in the application
- Hierarchy entities defined in the application
- Hierarchy entities associated with the division for which you want to create an entity hierarchy relationship
- Value defined for the **Maximum Hierarchy Level** option type in the **C1-EHRCONFIG** feature configuration

Procedure

To copy an entity hierarchy relationship:

1. Search for the entity hierarchy relationship in the **Entity Hierarchy Relationship** screen.
2. In the **Search Results** section, click the link in the **Hierarchy Information** column corresponding to the entity *h*ierarchy relationship whose copy you want to create.
   The **Entity Hierarchy Relationship** screen appears.
3. Click the **Duplicate** button in the **Hierarchy** zone.

   The **Entity Hierarchy Relationship** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the entity hierarchy relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to specify the entity hierarchy relationship.	Yes
Description	Used to specify the description for the entity hierarchy relationship.	Yes
Start Date	Used to specify the date from when the entity hierarchy relationship is effective for the division. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **Start Date** cannot be later than the **End Date**.	Yes
End Date	Used to specify the date till when the entity hierarchy relationship is effective for the division. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **End Date** cannot be earlier than the **Start Date**.	No
Entity Level	Indicates the level at which you want to include the hierarchy entity. By default, the value is set to **Level 1**.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Entity	Used to indicate the hierarchy entity that you want to include at the first level in the entity hierarchy relationship. **Note:** The **Search** (🔍) icon appears corresponding to the **Hierarchy Entity** field. On clicking the **Search** icon, the **Hierarchy Entity Child Search** window appears where you can search for the respective hierarchy entity. The search results appear in the **Hierarchy Entity Child Search** window only when the division and start date is specified for the entity hierarchy relationship. The list includes only those hierarchy entities: • Which can be included at the first level in the entity hierarchy relationship • Which are effective for the specified division on the entity hierarchy relationship start date	Yes
Business Object	Indicates the business object using which you are defining the entity hierarchy relationship.	Not applicable

4. Enter the required details in the **Main** section.
5. Associate or disassociate the entity hierarchy relationship from one or more divisions.
6. Add or remove hierarchy entity and its parent hierarchy entity for the subsequent levels in the **Hierarchy Details** section, if required.
7. Click **Save**.
   The new entity hierarchy relationship is defined.

Note: You cannot define multiple entity hierarchy relationships for a division with the same entity hierarchy relationship start date.

Price Item (Financial Services Business)

A bank may offer wide range of services to its customers. For example, Direct Debit, Credit Transfer, Stop Payment, etc. Oracle Revenue Management and Billing enables you to define each service as a price item. Once a price item is created, you can define pricing for the price item and then create charges against it in the system. You can define pricing at various levels in the customer hierarchy. For more information, see Price Assignment Search Mechanism on page 293.

You can group two or more price items together. While associating a price item with another price item, you need to indicate how the child price item is related to the parent price item. The system enables you to relate two price items using either of the following relationship types:

- Child Price Item
- Custom
- Other
- Price Item
- Product Group
- Service
- Service Group

For example, you can create two price items named Credit Transfer (CRTRN) and Credit Refund (CRRFD) and then associate the CRRFD price item with the CRTRN price item using the **Child Price Item** relationship type. The grouping of price items is done only for the informational purposes and it does not has any billing impact.

You can also create a price item bundle and then add price items to the price item bundle. For example, you can create a price item bundle named Fund Transfer (FDTRN) and then add the CRTRN and CRRFD price items to the bundle. You may use a price item bundle in the following scenarios:

- To offer volume discounts by charging a lower price for a group of services
- To group high and low selling services together

Based on the requirements, you can define the following types of price item bundles in the system:

- Regular Bundle on page 304
- Phantom Bundle on page 308
- Ratio Bundle on page 306

The system enables you to create price items or price item bundles which can be used for:

- **Pricing** - It means that pricing can be defined for the price item or price item bundle, but no charges can be created against it in the system.
- **Pricing and Billing** - It means that pricing can be defined for the price item or price item bundle and charges can be created against it in the system.

The system enables you to create the following types of price items or price item bundles:

- **Rate Based Price Items** - The interest rate based services would include services on which interest is charged to the customers (for example, loan interest which is calculated on the borrowed amount) or services on which the interest is paid to the customers (for example, savings interest which is calculated on the daily outstanding balance). At present, you can define interest rate based price items which can be used for only pricing and not pricing and billing. Also, you cannot create interest rate based price item bundles in the system.
- **Fees Based Price Items** - The fees based services would include services on which fees is charged to the customers either annually or at regular intervals (for example, ATM service for which the bank charges annual fee). You can create fees based price items or price item bundles which can be used for pricing or pricing and billing in the system.

You need to associate a contract type with a price item or price item bundle. The system allows you to create a charge (i.e. billable charge) for a price item or price item bundle on an account when a contract of the contract type which is

associated with the price item or price item bundle is already present on the account. You can specify a contract type when a price item or price item bundle is used for pricing and billing. If a price item or price item bundle is used for only pricing and not pricing and billing, the system automatically associates the contract type, which is specified in the **Default Contract Type** option type of the **C1_PRICING** feature configuration, with the price item or price item bundle.

You can assign a price item or price item bundle to a person, account, or price list. While assigning a price item or price item bundle, you need to define a pricing for the price item or price item bundle. You can define a standard price for a price item or price item bundle in the price list and then assign the price list to one or more persons or accounts. For more information about price list, see Price List on page 463. You can also define an override price for a price item or price item bundle that is specific to a person or account.

You can create price items or price item bundles which can be assigned to any price list except global price list or which can assigned to only global price lists. For more information about global price list, see Price List on page 463.

You can define a price item manger To Do type and To Do role for each price item or price item bundle. The system creates a To Do using the price item manager To Do type when the deal creator or approver requests the price item manager (i.e. clicks the **Send Price Items for Approval** button) to approve the average price for the price item or price item bundle offered in a deal. The users with the price item manager To Do role can only approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits of the price item manager To Do role.

You can associate one or more parameters where the parameter usage is set to **Price Item** with a price item or price item bundle. These parameters can then be used for:

- Aggregating transactions which are mapped to the price item or price item bundle
- Defining multi parameter based pricing for the price item or price item bundle

If the parameter usage is set to **Aggregation** while associating a parameter with a price item or price item bundle, the parameter is only used for aggregating transactions which are mapped to the price item or price item bundle. However, if the parameter usage is set to **Pricing** while associating a parameter with a price item or price item bundle, the parameter is used for aggregating transactions as well as for defining multi parameter based pricing for the price item or price item bundle. Note that you can associate parameters only to regular price item bundles and not to ratio and phantom price item bundles.

You can associate a price item or price item bundle to one or more divisions. You can assign a price item or price item bundle to an account, person, or price list when the account, person, or price list belongs to the division to which the price item or price item bundle is associated. In addition, you can do the following when a price item or price item bundle is associated to a division:

- Associate the Service Quantity Identifiers (SQIs) with the Price Item or Price Item Bundle for the Division
- Define the Accrual Type Criteria of the Price Item or Price Item Bundle for the Division
- Associate the Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of the Division
- Define the Cost of the Price Item or Price Item Bundle for the Division
- Define the Average Price Floor and Ceil Limits of the Price Item or Price Item Bundle for the Division
- Define the Division-Specific Characteristics for the Price Item or Price Item Bundle

Price Item (Used for Searching)

The **Price Item** screen allows you to search for a price item or price item bundle using various search criteria. It also allows you to create and copy a price item or price item bundle. It contains the following zone:

- Search Price Item on page 382

Through this screen, you can navigate to the following screens:

- Price Item (Used for Viewing) on page 423

- Price Item Relationship on page 440
- Price Item Assignments on page 461

Search Price Item

The **Search Price Item** zone allows you to search for a price item or price item bundle using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price item or price item bundle using the price item details. The valid value is: • Price Item Details **Note:** By default, the **Price Item Details** option is selected.	Yes
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
Division	Used to search price items or price item bundles which are associated with a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list.	No
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: • Yes • No	No
Price Item Usage	Used to search price items or price item bundles which is available for pricing or pricing and billing. The valid values are: • Pricing • Pricing and Billing **Note:** By default, the **Pricing and Billing** option is selected.	No
Bundle	Used to indicate whether you want to search a price item bundle. The valid values are: • Yes • No	No
Price Item Type	Used to search a particular type of price items or price item bundles. The valid values are: • Fees • Rate	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Pricing** option is selected from the **Price Item Usage** list.	

Note: You must specify at least one search criterion while searching for a price item or price item bundle.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle. **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item or price item bundle.
Bundle Type	Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: • Phantom • Ratio • Regular However, if the price item bundle is available for pricing and its price item type is set to **Fees**, the valid value is: • Regular
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: • Rate • Fees
Price Item Usage	Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: • Pricing • Pricing and Billing
Copy	On clicking the **Copy** (⧉) icon, the **Price Item** screen appears where you can create a new price item or price item bundle using an existing price item or price item bundle.
Price Item Assigned To	On clicking the **View** (🔗) icon in the **Price Item Assigned To** column, the **Price Item Assignments** screen appears where you can view the persons, accounts, and active price lists to which the price item or price item bundle is assigned.
Price Item Relationship	On clicking the **View** (🔗) icon in the **Price Item Relationship** column, the **Price Item Relationship** screen appears where you can view the list of the price items and price item bundles associated with the parent price item or added to the price item bundle.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Price Item or Price Item Bundle

Prerequisites

To search for a price item or price item bundle, you should have:

- Divisions defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To search for a price item or price item bundle:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.
   A sub-menu appears.
3. Click the **Search** option from the **Price Item** sub-menu.
   The **Price Item** screen appears.
4. Enter the search criteria in the **Search Price Item** zone depending on whether you want to search for a *p*rice item or price item bundle.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of price items or price item bundles that meet the search criteria appears in the **Search Results** section.

Defining a Price Item or Price Item Bundle

Prerequisites

To define a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application

- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1_PRICING** feature configuration

Procedure

To define a price item or price item bundle:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.
   A sub-menu appears.
3. Click the **Add** option from the **Price Item** sub-menu.

   The **Price Item** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price item or price item bundle.
   - **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

     Note:

     The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

     You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.
   - **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
     - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
     - Define the accrual type criteria of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

       Note: This step is not applicable for the health insurance business.
     - Define the cost of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Define the average price floor and ceil limits of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Define the negotiability floor and ceil values of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Define the division-specific characteristics for the price item or price item bundle
   - **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: • **Pricing** - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system. **Note:** This option is not applicable for the health insurance business. • **Pricing and Billing** - Used when you want to define pricing and create charges for the price item or price item bundle in the system. **Note:** By default, the **Pricing and Billing** option is selected.	Yes
Price Item Type	Used to indicate the type of the price item or price item bundle. The valid values are: • **Rate** - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items. **Note:** This option is not applicable for the health insurance business. • **Fees** - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item. **Note:** This field appears when the **Pricing** option is selected from the **Price Item Usage** list. By default, the **Fees** option is selected. You cannot create a price item bundle when the **Pricing** option is selected from the **Price Item Usage** list and **Rate** option is selected from the **Price Item Type** list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to **Fees**. Therefore, this field does not appear when the **Pricing and Billing** option is selected from the **Price Item Usage** list.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle	Used to indicate whether you want to create a price item bundle. The valid values are: • Yes • No **Note:** By default, the **No** option is selected. This field is not applicable for the health insurance business.	Yes
Bundle Type	Used to indicate the type of the price item bundle. If the **Pricing and Billing** option is selected from the **Price Item Usage** list, the valid values are: • Regular Bundle on page 304 • Phantom Bundle on page 308 • Ratio Bundle on page 306 However, if the **Pricing** option is selected from the **Price Item Usage** list and the **Fees** option is selected from the **Price Item Type** list, you can only define a regular price item bundle. Therefore, by default, the value is set to **Regular**. **Note:** This field appears when the **Yes** option is selected from the **Bundle** list. This field is enabled when the **Pricing and Billing** option is selected from the **Price Item Usage** list and the **Yes** option is selected from the **Bundle** list. You cannot define a price item bundle when the **Pricing** option is selected from the **Price Item Usage** list and **Rate** option is selected from the **Price Item Type** list. This field is not applicable for the health insurance business.	Yes (Conditional) **Note:** This field is required when you are creating a price item bundle.
Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: • Yes • No **Note:** By default, the **No** option is selected.	Yes
Contract Type	Used to indicate the contract type that you want to associate with the price item or price item bundle.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Pricing and Billing** option is selected from the **Price Item Usage** list. The **Search** (🔍) icon appears corresponding to the **Contract Type** field. On clicking the **Search** icon, the **Contract Type Search** window appears.	
Price Item Manager To Do Type	Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the **Send Price Items for Approval** button) to approve the average price for the price item or price item bundle offered in a deal. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item Manager To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Price Item Manager To Do Type** field. This field is not applicable for the health insurance business.	No
Price Item Manager To Do Role	Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role. **Note:** The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type. This field is not applicable for the health insurance business.	Yes (Conditional) **Note:** This field is required when the price item manager To Do type is specified for the price item or price item bundle.
Average Price Floor and Ceil Limits	Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:	Yes (Conditional) **Note:** This field is required when

Field Name	Field Description	Mandatory (Yes or No)
	• **Absolute Value Range** - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10$ to 15$. • **Spread Amount** - Used when you want to define the average floor and ceil limits based on the spread amount. • **Spread Percentage** - Used when you want to define the average floor and ceil limits based on the spread percentage. **Note:** • Incase of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived. • This field is not applicable for the health insurance business.	you are defining the average price floor and ceil limits of the price item or price item bundle for a division.
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal pricing management module.	No
Variable Price	Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal pricing management module. **Note:** If the **Variable Price** option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system. However, if the **Variable Price** option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.	No

Tip: Alternatively, you can access the **Price Item** screen by clicking the **Add** button in the **Page Title** area of the **Price Item** screen.

4. Enter the required details in the **Main** section.

5. Associate the parameters with the price item or price item bundle, if required.

   Note: For each predefined parameter which is associated with the price item or price item bundle, you can define a *s*et of valid predefined parameter values for the price item or price item bundle, if required.
6. Associate the price item or price item bundle with the required divisions.
7. Associate the SQIs with the price item or price item bundle for the required divisions.
8. Define the accrual type criteria of the price item or price item bundle for the required divisions.

   Note: This step is not applicable for the health insurance business.
9. Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the *r*equired divisions.

   Note: This step is not applicable for the health insurance business.
10. Define the cost of the price item or price item bundle for the required divisions.

    Note: This step is not applicable for the health insurance business.
11. Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.

    Note: This step is not applicable for the health insurance business.
12. Define the negotiability floor and ceil values of the price item or price item bundle for the required divisions.

    Note: This step is not applicable for the health insurance business.
13. Define the division-specific characteristics for the price item or price item bundle. if required.
14. Define the characteristics for the price item or price item bundle, if required.
15. Click **Save**.
    The price item is defined.

    Note: While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1_PRICING** feature configuration is automatically associated to the price item or price item bundle.

Associating a Parameter with a Price Item or Price Item Bundle

You can define multi parameter based pricing for a price item or price item bundle when the parameters using which you want to define the price item pricing are associated with the respective price item or price item bundle during the pricing date range. Let us understand this with the help of an example from the financial institution domain.

The following table illustrates how a financial institution can offer different price for a price item based on the return codes:

Service	Price Item	Parameter	Parameter Value	Price
SEPA Direct Debit Return	SEPADDR	Return Code (RTURNCD)	AC01	0.1$
			AC04	0.2$
			AC06	0.3$
			AG01	0.10$

In such case, you need to first define a predefined parameter named Return Code where the parameter usage is set to **Price Item**). In the Return Code parameter, you must specify the above listed return codes (i.e. AC01, AC04, AC06, and AG01) as the predefined values. Then, in order to define multi parameter based pricing for the SEPADDR price item using the Return Code parameter, you must associate the Return Code parameter with the SEPADDR price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Return Code	10	Yes	-

Let us understand this with the help of another example from the health insurance domain.

The following table illustrates how a self-funded customer can be charged different admin fee for the services based on health coverage class and network type:

Service	Price Item	Health Coverage Class	Network Type	Fees
Claim Based Fees	CLBDFS	Medical	In	$100
		Medical	Out	$150
		Dental	In	$50
		Dental	Out	$75

In such case, you need to first define two predefined parameters named Health Coverage Class and Network Type where the parameter usage is set to **Price Item**). In the Health Coverage Class parameter, you must specify the above listed values (i.e. Medical and Dental)) as the predefined values. And, in the Network Type parameter, you must specify the above listed values (i.e. In and Out)) as the predefined values. Then, in order to define parameter based pricing for the CLBDFS price item using the Health Coverage Class and Network Type parameters, you must associate these parameters with the CLBDFS price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Health Coverage Class	10	Yes	-
Network Type	20	Yes	-

Prerequisites

To associate a parameter with a price item or price item bundle, you should have:

- Parameters defined in the application (where the parameter usage is set to **Price Item**)

Procedure

To associate a parameter with a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.

   The **Parameters** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the parameter is associated with the price item or price item bundle. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes
Effective End Date	Used to specify the date till when the parameter is associated with the price item or price item bundle. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Parameter	Used to indicate the parameter that you want to associate with the price item or price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears. In the **Parameter Search** window, the system allows you to search only those	Yes

Field Name	Field Description	Mandatory (Yes or No)
	parameters where the parameter usage is set to **Price Item**. If you select a predefined parameter, the **Add** (icon appears corresponding to the **Parameter** field. On clicking the **Add** icon, a grid appears where you can specify a list of predefined parameter values which are valid for the price item or price item bundle while defining its pricing. If you do not list any predefined parameter value in this grid, the system enables you to specify any predefined value of the parameter while defining the pricing for the price item or price item bundle.	
Business Label	Used to specify a business label for the parameter. If you specify the business label for a parameter, the business label appears throughout the application instead of the parameter name.	No
Display Order	Used to indicate the order in which the parameter and its value should appear in the pricing parameter information string across the application.	Yes
Parameter Usage	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: • **Aggregation** - Used when you want to use the parameter for aggregating transactions. • **Pricing** - Used when you want to use the parameter for aggregating transactions as well as for defining the price item pricing.	Yes
Mandatory	Used to indicate whether the parameter is mandatory while defining the price item pricing.	No
Priority	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle. **Note:** This field is disabled when the **Mandatory** option is selected.	Yes (Conditional) **Note:** This field is required when the **Mandatory** option is not selected.

Note:

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

2. Enter the required details in the **Parameters** section.
3. If you want to associate more than one parameter with the price item or price item bundle, click the **Add** (+) *i*con and then repeat step 2.

Note:

However, if you want to remove a parameter from the price item or price item bundle, click the **Delete** () icon corresponding to the parameter. You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

4. For each predefined parameter which is associated with the price item or price item bundle, you can define a set *of* valid predefined parameter values for the price item or price item bundle, if required.
5. Click **Save**.
   The parameters are associated with the price item or price item bundle.

Note: By default, the priority of all parameters which are mandatory is set to 0.

For more information on...	See...
How to define a price item or price item bundle	Defining a Price Item or Price Item Bundle on page 384
How to edit a price item or price item bundle	Editing a Price Item or Price Item Bundle on page 434
How to copy a price item or price item bundle	Copying a Price Item or Price Item Bundle on page 415
How to define the valid predefined parameter values for a price item or price item bundle	Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle on page 394

Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle

A predefined parameter may have hundreds of values defined in the system. But, there might be situations when only certain predefined parameter values are applicable for a price item or price item bundle while defining its pricing. In such case, you can define a set of valid predefined parameter values for a price item or price item bundle. For example, the Return Code parameter has the following predefined parameter values:

Parameter Value	Description
AC01	Account Identifier Incorrect (i.e. invalid IBAN)
AC04	Account Closed
AC06	Account Blocked
AG01	Direct Debit Forbidden for Regulatory Reasons
AG02	Operation/Transaction Code Incorrect
AM04	Insufficient Funds
AM05	Duplicate Collection
MD01	Unauthorized Transaction
MD06	Disputed Authorized Transaction

If only the MD01 and MD06 predefined parameter values are applicable for the SEPA Debit Refund (SEPADRF) price item, you can define MD01 and MD06 as the valid predefined parameter values for the SEPADRF price item. In such case, the system will allow you to define the pricing for the SEPADRF price item only using the MD01 or MD06 parameter value. However, if all the above listed predefined parameter values are applicable for the SEPA Direct

Debit Return (SEPADDR) price item, you must not define the valid predefined parameter values for the SEPADDR price item. In such case, the system will allow you to define the pricing for the SEPADDR price item using any of the above listed parameter value.

Another example, the Health Coverage Class parameter has the following predefined parameter values:

Parameter Value	Description
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

If only the MEDICAL and DENTAL predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you can define MEDICAL and DENTAL as the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item only using the MEDICAL or DENTAL parameter value. However, if all the above listed predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you must not define the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item using any of the above listed parameter value.

Prerequisites

To define the valid predefined parameter values for a price item or price item bundle, you should have:

- Predefined values defined for the parameter which is associated with the price item or price item bundle
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the valid predefined parameter values for a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.
   The **Parameters** section appears.
2. Click the **Add** (+) icon in the **Parameter** column corresponding to the predefined parameter which is associated with the price item or price item bundle.

   The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter Value** field. On clicking the **Search** icon, the **Predefined Parameter Value Search** window appears. On specifying the valid predefined parameter value for a price item or price item bundle, the description of the predefined parameter value appears corresponding to the **Parameter Value** field.	Yes (Conditional) **Note:** This field is required when you are defining the valid predefined parameter values for the price item or price item bundle.

3. Enter a predefined parameter value which is valid for the price item or price item bundle while defining its pricing.
4. If you want to define more than one valid predefined parameter value for the price item or price item bundle, *c*lick the **Add** (+) icon and then repeat step 3.

   Note: However, if you want to remove a valid predefined parameter value from the price item or price item bundle, click the **Delete** (🗑) icon corresponding to the parameter value. You can remove a valid predefined parameter value from the price item or price item bundle when the parameter value is not yet used for defining the price item pricing.
5. Click **Save**.
   The valid predefined parameter values are defined for the price item or price item bundle.

How to associate a parameter with a price item or price item bundle	Associating a Parameter with a Price Item or Price Item Bundle on page 391

Associating a Price Item or Price Item Bundle with a Division

You can assign a price item or price item bundle to a person or account when the price item or price item bundle is associated with the division to which the person or account belongs. Let us understand this with the help of an example from the financial institution domain.

The following table illustrates how a price item can be associated with one or more divisions in the financial institution domain:

Price Item	Division
SEPA Direct Debit Return (SEPADDR)	001-AL
	002-CA
	003-FL
	004-IN
Stop Payment (STPPMT)	002-CA
	003-FL
	004-IN

In such case, you can assign the SEPADDR price item to any person or account which belongs to the 001-AL, 002-CA, 003-FL, or 004-IN division. However, you can assign the STPPMT price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

Let us understand this with the help of an example from the health insurance domain.

The following table illustrates how a price item can be associated with one or more divisions in the health insurance domain:

Price Item	Division
Claim Based Fees (CLBDFS)	002-CA
	003-FL
	004-IN

In such case, you can charge the CLBDFS price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

Prerequisites

To associate a price item or price item bundle with a division, you should have:

- Divisions defined in the application
- Divisions associated with the access group to which the user (i.e. who is performing this action) belongs

Procedure

To associate a price item or price item bundle with a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.

   The **Divisions** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQIs	On clicking the **Add** (+) icon, you can associate an SQI with the price item or price item bundle for the division.	Not applicable
Division Characteristics	On clicking the **Add** (+) icon, you can define a division-specific characteristic for the price item or price item bundle.	Not applicable
Accrual Type Criteria	On clicking the **Add** (+) icon, you can define the accrual type criteria of the price item or price item bundle for the division. **Note:** This feature is not applicable for the health insurance business.	Not applicable
Entity Hierarchy	On clicking the **Add** (+) icon, you can associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the division. **Note:** This feature is not applicable for the health insurance business.	Not applicable
Costs	On clicking the **Add** (+) icon, you can define the cost of the price item or price item bundle for the division. **Note:** This feature is not applicable for the health insurance business.	Not applicable
Floor and Ceiling Type	On clicking the **Add** (+) icon, you can define the average price floor and ceil limits of the price item or price item bundle for the division. **Note:** This feature is not applicable for the health insurance business.	Not applicable
Negotiability	On clicking the **Add** (+) icon, you can define the negotiability floor and ceil limits of the price item or price item bundle for the division. **Note:** This feature is not applicable for the health insurance business.	No

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the price item or price item bundle. **Note:** You can only view those divisions to which you have access in the **Division** list.	Yes (Conditional) **Note:** This field is required while associating the price item or price item bundle with a division.

2. Select the division from the respective field.
3. If you want to associate the price item or price item bundle with more than one division, click the **Add** (+) *i*con and then repeat step *2*.

   Note: However, if you want to remove the price item or price item bundle from a division, click the **Delete** (🗑) icon corresponding to the division. You cannot remove the price item or price item bundle from a division when it is assigned to a person or account which belongs to the division.
4. Associate the SQIs with the price item or price item bundle for the required divisions.
5. Define the accrual type criteria of the price item or price item bundle for the required divisions.

   Note: This step is not applicable for the health insurance business object.
6. Associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the *r*equired divisions.

   Note: This step is not applicable for the health insurance business object.
7. Define the cost of the price item or price item bundle for the required divisions.

   Note: This step is not applicable for the health insurance business object.
8. Define the floor and ceiling type of the price item or price item bundle for the required divisions.

   Note: This step is not applicable for the health insurance business object.
9. Define the rate negotiability floor and ceil limits of the price item or price item bundle for the required divisions.

   Note: This step is not applicable for the health insurance business object.
10. Define the division-specific characteristics for the price item or price item bundle. if required.
11. Click **Save**.
    The price item or price item bundle is associated with the divisions.

    Tip: Alternatively, you can associate a price item or price item bundle with a division using the **Division** screen. For more information, see Associating a Price Item or Price Item Bundle with a Division on page 798.

Associating an SQI with a Price Item or Price Item Bundle for a Division

In the transaction aggregation process, an SQI based billable charge is created for a price item or price item bundle (to which a transaction is mapped) when:

- The SQIs are associated with the price item or price item bundle for the division to which the account (i.e. for which the billable charge is created) belongs.
- The transaction aggregation rules are defined for such SQIs in the system.

Let us assume that the A1 account belongs to the 201-NJ division and the A2 account belongs to the 209-CA division.

The following table illustrates how you can define division-specific SQIs for a price item in the financial institution domain:

Price Item	Division	Service Quantity Identifiers (SQIs)
Stop Payments (STPY)	201-NJ	Number of Transactions (NBRTXN)
		Transaction Volume (TXNVOL)
		Transaction Amount (TXNAMT)
	209-CA	Number of Transactions (NBRTXN)
		Transaction Amount (TXNAMT)

Now, when an SQI based billable charge is created for the A1 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Volume (TXNVOL)
- Transaction Amount (TXNAMT)

And, when an SQI based billable charge is created for the A2 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Amount (TXNAMT)

Another example, you can calculate the enrollment based fees for a self-funded customer based on Per Subscriber Per Month or Per Member Per Month for the 201-NJ and 209-CA divisions. Therefore, you need to associate two SQIs – Subscriber Count and Member Count with the Enrollment Based Fees (ERBDFS) price item.

The following table illustrates how you can define division-specific SQIs for a price item in the health insurance domain:

Price Item	Division	Service Quantity Identifiers (SQIs)
Enrollment Based Fees (ERBDFS)	201-NJ	Subscriber Count (SUBCNT)
		Member Count (MEMCNT)
	209-CA	Subscriber Count (SUBCNT)
		Member Count (MEMCNT)

Prerequisites

To associate an SQI with a price item or price item bundle for a division, you should have:

- Service Quantity Identifiers (SQIs) defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To associate an SQI with a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.
   The **Divisions** section appears.
2. Click the **Add** (+) icon in the **SQIs** column corresponding to the division for which you want to associate *S*QIs with the price item or price item bundle.

   The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQI	Used to indicate the SQI that you want to associate with the price item or price item bundle for the division. **Note:** The **Search** (🔍) icon appears corresponding to the **SQI** field. On clicking the **Search** icon, the **Service Quantity Identifier Search** window appears. On specifying the SQI, the description of the SQI appears corresponding to the **SQI** field.	Yes (Conditional) **Note:** This field is required while associating an SQI with the price item or price item bundle for the division.

3. Enter the required details in the **SQIs** grid.
4. If you want to associate more than one SQI with the price item or price item bundle for the division, click the **Add** (+) icon *a*nd then repeat step 3.

   Note: However, if you want to remove an SQI from the price item or price item bundle for the division, click the **Delete** (🗑) icon corresponding to the SQI. You cannot remove an SQI from the price item or price item bundle for the division when an SQI based billable charge is created using the SQI.
5. Click **Save**.
   The SQIs are associated with the price item or price item bundle for the division.

Defining a Division-Specific Characteristic for a Price Item or Price Item Bundle

Prerequisites

To define a division-specific characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Division/Price Item Combination**)
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define a division-specific characteristic for a price item or price item bundle:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.
   The **Divisions** section appears.
2. Click the **Add** (+) icon in the **Division Characteristics** column corresponding to the division for which you *w*ant to define division-specific price item or price item bundle characteristics.

   The following fields appear in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division. **Note:** You can either manually specify the date or select it using the **Date Picker** (calendar) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required while defining a division-specific characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Division/ Price Item Combination**.	Yes (Conditional) **Note:** This field is required while defining a division-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (magnifier) icon appears	Yes (Conditional) **Note:** This field is required while defining a division-specific

Field Name	Field Description	Mandatory (Yes or No)
	corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	characteristic for the price item or price item bundle.

3. Enter the required details in the **Divisions** section.
4. If you want to define more than one division-specific characteristic for the price item or price item bundle, click *t*he **Add** (+) icon and then repeat step 3.

   Note: However, if you want to remove a division-specific characteristic from the price item or price item bundle, click the **Delete** (🗑) icon corresponding to the characteristic.
5. Click **Save**.
   The division-specific characteristics are defined for the price item or price item bundle.

Defining the Accrual Type Criteria of a Price Item or Price Item Bundle for a Division

The accrual type criteria of a price item or price item bundle is referred when the accrual is calculated for an account using an accrual type where the **Price Item Accrual Criteria Required** option is selected. The system behaves in the following manner when the **Price Item Accrual Criteria Required** option is selected in the accrual type:

If the accrual type criteria of a price item or price item bundle is set to...	Then...
Actual	The system considers the billable charges of the price item for accrual when the following conditions are met: • The price item is not excluded in the accrual type. • The accrual is calculated for an account using the accrual type where the accrual criteria is set to **Actual**.
Historical	The system considers the billable charges of the price item for accrual when the following conditions are met: • The price item is not excluded in the accrual type. • The accrual is calculated for an account using the accrual type where the accrual criteria is set to **Historical**.
Not Applicable	The system considers the billable charges of the price item for accrual when the following conditions are met:

If the accrual type criteria of a price item or price item bundle is set to...	Then...
	• The price item is not excluded in the accrual type • The accrual is calculated for an account using the accrual type where the accrual criteria is set to **Actual** or **Historical**.

The system enables you to define accrual type criteria of a price item or price item bundle for each division. For example, you can maintain different accrual type criteria of the Stop Payments (STPY) price item for each division as shown below:

The following table illustrates how you can define different accrual type criteria for a price item in each division:

Price Item	Division	Accrual Type Criteria
Stop Payments (STPY)	201-NJ	Actual
	209-CA	Historical
	210-FL	Not Applicable
	215-OX	Actual
	220-AL	Historical
	223-NJ	Not Applicable

Prerequisites

To define the accrual type criteria of a price item or price item bundle for a division, you should have:

- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the accrual type criteria of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.
   The **Divisions** section appears.
2. Click the **Add** (+) icon in the **Accrual Type Criteria** column corresponding to the division for which you want *t*o define accrual type criteria of the price item or price item bundle.

   The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	Used to indicate whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: • **Actual** - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to **Actual**. • **Historical** - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to **Historical**.	Yes (Conditional) **Note:** This field is required while defining the accrual type criteria of the price item or price item bundle for the division.

Field Name	Field Description	Mandatory (Yes or No)
	• **Not Applicable** - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to **Actual** or **Historical**. **Note:** By default, the **Not Applicable** option is selected.	

3. Select the accrual type criteria from the respective field.
4. Click **Save**.
   The accrual type criteria of the price item or price item bundle is defined for the division.

Associating a Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division

Once you design the structure of an entity hierarchy relationship, you can associate a price item or price item bundle with a hierarchy entity at any level in the entity hierarchy relationship. You can associate a price item or price item bundle with a hierarchy entity only from the **Price Item** screen. The system enables you to define division-specific hierarchy for a price item or price item bundle. Therefore, while associating a price item or price item bundle with a hierarchy entity, you can select a hierarchy entity from any entity hierarchy relationship which is created for the division. However, the system checks whether the association date range is within the entity hierarchy relationship date range.

For example, you can associate the ACH Transfer (ACHTRN) price item with the Payments hierarchy entity in the Cash Management entity hierarchy relationship as shown below:

```
Cash Management
    Payments
        ACH Transfer
```

Associating a price item or price item bundle with a hierarchy entity does not has any impact on the billing module. At present, the price item hierarchy is only displayed in the Deal Modelling and Simulation module.

Prerequisites

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division, you should have:

- Entity hierarchy relationships defined for the required divisions
- Hierarchy entities included at the required levels in the entity hierarchy relationship
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.
   The **Divisions** section appears.
2. Click the **Add** (+) icon in the **Entity Hierarchy** column corresponding to the division for which you want to *d*efine price item or price item bundle hierarchy.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to indicate the entity hierarchy relationship in which you want to include the price item or price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to the **Hierarchy** field. On clicking the **Search** icon, the **Hierarchy Search** window appears.	Yes (Conditional) **Note:** This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
Parent Entity	Used to indicate the hierarchy entity to which you want to associate the price item or price item bundle. **Note:** The list appears when the entity hierarchy relationship is specified in the **Hierarchy** field. It contains the hierarchy entities which are included at the root and subsequent levels in the entity hierarchy relationship.	Yes (Conditional) **Note:** This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
Start Date	Used to specify the date from when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship. **Note:** The start date cannot be later than the end date. The start date cannot be earlier than the entity hierarchy relationship start date. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
End Date	Used to specify the date till when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship. **Note:** The end date cannot be earlier than the start date.	No

Field Name	Field Description	Mandatory (Yes or No)
	The end date cannot be later than the entity hierarchy relationship end date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	

3. Enter the required details in the **Entity Hierarchy** grid.
4. If you want to associate the price item or price item bundle to more the one hierarchy entity in the same or *d*ifferent entity hierarchy relationship, click the **Add** (+) icon and then repeat step 3.

Note:

You cannot associate the price item or price item bundle to multiple hierarchy entities in the same or different entity hierarchy relationship for the same or overlapping date range.

However, if you want to disassociate the price item or price item bundle from a hierarchy entity of an entity hierarchy relationship, click the **Delete** ( ) icon corresponding to the hierarchy and parent entity combination.

5. Click **Save**.
   The price item or price item bundle is associated with a hierarchy entity in an entity hierarchy relationship of the division.

Defining the Cost of a Price Item or Price Item Bundle for a Division

Oracle Revenue Management and Billing enables you to maintain the different types of fixed and variable costs of a price item or price item bundle for each division. The system uses the fixed and variable cost information while calculating the cost of a price item or price item bundle in a deal. It considers the cost which is defined for the division to which the account or person belongs. It derives the fixed and/or variable cost which is effective on the deal start date.

The system enables you to maintain the following types of costs in different currencies:

- Additional Cost - Fixed
- Additional Cost - Variable
- Fixed Internal
- Fixed Third Party
- Variable Internal
- Variable Third Party

While calculating the cost of a price item or price item bundle in a deal, the system converts the cost in the deal currency when the cost currency is different from the deal currency. As the name implies, the fixed cost is an expense that does not change with the increase or decrease in the price item volume or commitments. Therefore, the total fixed cost is equal to the sum of fixed cost which is effective on the deal start date for the division. However, the variable cost is an expense that change with the increase or decrease in the price item volume or commitments. Therefore, the

total variable cost is equal to the sum of multiplication of variable cost (which is effective on the deal start date for the division) and price item volume or commitments.

Let us understand this with the help of an example:

The following table illustrates how you can define division-specific costs for a price item:

Price Item	Division	Cost Type	Cost Amount
PI1	201-NJ	Fixed Third Party Cost	$5
		Fixed Internal Cost	$3
		Additional Fixed Cost	$1
		Variable Third Party Cost	$0.1
		Variable Internal Cost	$0.65
		Additional Variable Cost	$0.5

If a deal is created for a person who belongs to the 201-NJ division and if the PI1 price item is assigned to the person in the deal and if the original volume and proposed commitment of the PI1 price item in the deal is set to 100 and 200, respectively, the system calculates the cost of the PI1 price item in the following manner:

The following table illustrates how the original and proposed cost is calculated for a price item in a deal:

Original Cost	
Total Fixed Cost	$5 + $3 + $1 = $9
Total Variable Cost	(100*$0.1) + (100*$0.65) + (100*$0.5) = $10 + $65 + $50 = $125
Total Cost	$9 + $125 = $134
Proposed Cost	
Total Fixed Cost	$5 + $3 + $1 = $9
Total Variable Cost	(200*$0.1) + (200*$0.65) + (200*$0.5) = $20 + $130 + $100 = $250
Total Cost	$9 + $250 = $259

Here, the assumption is the deal and cost currency is same (i.e. USD). The system then uses the total original and proposed costs for calculating the original and proposed profitability of the deal.

Prerequisites

To define the cost of a price item or price item bundle for a division, you should have:

- Currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the cost of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.
   The **Divisions** section appears.
2. Click the **Add** ( ) icon in the **Costs** column corresponding to the division for which you want to define the *c*osts of the price item or price item bundle.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the cost of the price item or price item bundle is effective for the division. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required while defining the cost of the price item or price item bundle for the division.
Cost Type	Used to indicate the type of cost incurred in the division for the price item or price item bundle. The valid values are: • Additional Fixed Cost • Additional Variable Cost • Fixed Third Party Cost • Fixed Internal Cost • Variable Internal Cost • Variable Third Party Cost	Yes (Conditional) **Note:** This field is required while defining the cost of the price item or price item bundle for the division.
Cost Value	Used to specify the cost amount.	Yes (Conditional) **Note:** This field is required while defining the cost of the price item or price item bundle for the division.
Cost Currency	Used to specify the currency in which you want to define the cost. The system does currency conversion when the cost currency is different from the deal currency. **Note:** The list includes only those currencies which are already defined in the system.	Yes (Conditional) **Note:** This field is required while defining the cost of the price item or price item bundle for the division.

3. Enter the required details in the **Costs** grid.
4. If you want to define more than one cost of the price item or price item bundle for the division, click the **Add** (+) icon *a*nd then repeat step 3.

   Note: However, if you want to remove the cost of the price item or price item bundle from the division, click the **Delete** (🗑) icon corresponding to the cost.
5. Click **Save**.
   The cost of the price item or price item bundle is defined for the division.

Defining the Average Price Floor and Ceil Values of a Price Item or Price Item Bundle for a Division

Oracle Revenue Management and Billing enables you to define the average price floor and ceil limits of a price item or price item bundle for each division. Before you define the average price floor and ceil limits, you need to specify the floor and ceiling type for the price item or price item bundle. At present, the system supports the following floor and ceiling types for a price item or price item bundle:

- Absolute Value Range

Once the floor and ceiling type of a price item or price item bundle is set to **Absolute Value Range**, you can define the average price floor and ceil limits of the price item or price item bundle for the required divisions. The system enables you to define different average price floor and ceil limits for different To Do roles. The system uses the average price floor and ceil limits while approving the average price of the price item or price item bundle in a deal. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the average price of the P1 price item in a deal is $25 and the floor and ceil limits of the deal creator's To Do role is set to $10-$15, then the deal creator cannot approve the average price of the P1 price item in the deal.

If the average price floor and ceil limits is not defined for the deal creator's or approver's To Do role, the status of the price item or price item bundle in the deal is changed to **Error**. If the average price floor and ceil limits is defined for the deal creator's or approver's To Do role, but the average price of the price item or price item bundle is not within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Pending for Approval**. However, if the average price floor and ceil limits is defined for the deal creator's or approver's To Do role and the average price of the price item or price item bundle is within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Approved**.

Here, you can also define the average price floor and ceil limits for the price item manager's To Do role. Note that the price item manger can approve the average price of the price item or price item bundle in a deal when the average price of the price item or price item bundle is within the floor and ceil limits of the price item manager's To Do role.

- Spread Amount

Once the average price floor and ceil type of a price item or price item bundle is set to **Spread Amount**, the system calculates the average price floor and ceil limits based on the average price and spread amount. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

Average Price = Price Item Revenue/Price Item Commitments

The system then considers the spread amount specified for the relationship manager's To Do role in the price item. Using the spread amount and average price, the system calculates the average price floor and ceil limit values. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread amount set by you is 10 and the system calculated average price of the P1 price item in a deal is $25 then the system sets the floor and ceil limits of the deal creator's To Do role to $15-$35. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price

of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- Spread Percentage

Once the average price floor and ceil type of a price item is set to the **Spread Percentage**, the system calculates the average price floor and ceil limits based on the average price and spread percentage. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

Average Price = Price Item Revenue/Price Item Commitments

The system then considers the spread parentage specified for the relationship manager's To Do role in the price item. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The deal creator or an approver at any level in the division or approver system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread percentage set by you is 10 and the system calculated average price of the P1 price item in a deal is $50 then the system sets the floor and ceil limits of the deal creator's To Do role to $45-$55. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

Prerequisites

To define the average price floor and ceil limits of a price item or price item bundle for a division, you should have:

- To Do roles and currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the average price floor and ceil limits of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.
   The **Divisions** section appears.
2. Click the **Add** (+) icon in the **Average Price Floor and Ceil Limits** column corresponding to the division for *w*hich you want to define the average price floor and ceil limits of the price item or price item bundle.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Role	Used to indicate that users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits. **Note:** The **Search** (🔍) icon appears corresponding to the **To Do Role** field. On clicking the **Search** icon, the **To Do Role Search** window appears.	Yes (Conditional) **Note:** This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.

Field Name	Field Description	Mandatory (Yes or No)
	On specifying the To Do role, the description of the To Do role appears corresponding to the **To Do Role** field.	
Floor Value	Used to specify the floor (i.e. lower) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is below the floor limit. **Note:** The floor value cannot be greater than the ceil value. **Note:** This field appear when you select the **Absolute Value Range** option from the **Average Price Floor and Ceil Limits** list for a price item or price item bundle.	Yes (Conditional) **Note:** This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.
Ceil Value	Used to specify the ceil (i.e. upper) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is above the ceil limit. **Note:** The ceil value cannot be lower than the floor value. **Note:** This field appear when you select the **Absolute Value Range** option from the **Average Price Floor and Ceil Limits** list for a price item or price item bundle.	Yes (Conditional) **Note:** This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.
Spread Amount	Used to specify the spread amount specified while defining a price item or price item bundle or assigned to a To Do role. **Note:** This field appears when you select the **Spread Amount** option from the **Average Price Floor and Ceil Limits** list for a price item or price item bundle.	Yes (Conditional) **Note:** This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.
Spread Percentage	Used to specify the spread percentage specified while defining a price item or price item bundle or assigned to a To Do role. **Note:** This column appears only when you select the **Spread Percentage** option from the **Average Price Floor and Ceil Limits** list for a price item or price item bundle.	Yes (Conditional) **Note:** This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.
Floor and Ceil Currency	Used to indicate the currency in which you want to define the floor and ceil limits. The system	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	does the currency conversion when the pricing currency is different from the floor and ceil currency. **Note:** The list includes only those currencies which are already defined in the system.	**Note:** This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.

3. Enter the required details in the **Average Price Floor and Ceil Limits** grid.
4. If you want to define the average price floor and ceil limits for more than one To Do role, click the **Add** (+) *i*con and then repeat step 3.

   Note: However, if you want to remove the average price floor and ceil limits of a To Do role from the division, click the **Delete** (🗑) icon corresponding to the To Do role.
5. Click **Save**.
   The average price floor and ceil limits of the price item or price item bundle are defined for the division.

Defining the Rate Negotiability Floor and Ceil Values of a Price Item or Price Item Bundle for a Division

Oracle Revenue Management and Billing enables you to indicate whether the rate is negotiable for a price item or price item bundle for each division. If you wish to enable the rate negotiability, you need to define the negotiability floor and ceil limits for a division of a price item at the price item level or at the price assignment level. You can set different negotiability criteria for the divisions with which the price item is associated. If the rate negotiability feature is configured for a price item, the system enables:

- The relationship manager to propose a negotiated rate for the price item
- The product level approver, division level approver, and deal level approver to recommend a rate for the price item

In order to indicate whether the rate is negotiable or not, the **Negotiability** field is introduced in the system. On enabling this field, the system allows you to edit or override rate of the deal. Once the negotiability option is set, you need to specify the rate negotiability floor and ceil limits for a price item or price item bundle.

Once the floor and ceil limits are defined, you can also choose to validate whether the negotiated rate is within the range of negotiability floor and ceil limits or not. To implement this, the **Negotiate Rate Only within Range** field is introduced. If this field is enabled, the system validates the negotiated rate is within the specified range or not. However, you can disable this validation as well. If the negotiated rate is found to be within the specified negotiability floor and ceil limits, the system allows you to edit or override the rate of a price item in a deal. However, if the negotiated rate is not within the negotiability floor and ceil limits then an error occurs indicating the negotiability rate is not within the specified negotiability floor and ceil limits.

Once you enable the rate negotiability option for a division of a price item, you can edit or override the rate of a price item in a deal when the customer or account to which the price item is assigned belongs to the division. If you disable the rate negotiability option, you cannot edit or override the rate of a price item in a deal when the customer or account to which the price item is assigned belongs to the division.

Prerequisites

To define the rate negotiability floor and ceil limits of a price item or price item bundle for a division, you should have:

- Currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

Procedure

To define the rate negotiability floor and ceil limits of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price *i*tem or price item bundle.
   The **Divisions** section appears.
2. Click the **Add** (+) icon in the **Negotiability** column corresponding to the division for *w*hich you want to define the rate negotiability floor and ceil limits of the price item or price item bundle.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Negotiability Switch	Used to specify whether the rate is negotiable for a price item or not. The valid values are: • Yes • No If you select yes option then you can edit or override the rate of a price item or price item bundle in a deal when the customer or account to which is the price item is assigned belongs to the division otherwise not.	No
Only Within Range	Used to validate whether the negotiated rate is within the floor and ceil limits or not. The valid values are: • Yes • No **Note:** This field is enabled when you select **Yes** option for the **Negotiability** field.	No
Negotiability Floor Value	Used to specify the floor (i.e. lower) limit for the rate negotiation. **Note:** The floor value cannot be greater than the ceil value.	No
Negotiability Ceil Value	Used to specify the ceil (i.e. upper) limit for the rate negotiation. **Note:** The ceil value cannot be lower than the floor value.	No
Currency	Used to indicate the currency in which you want to define the rate negotiability floor and ceil limits. The system does the currency conversion when the pricing currency is different from the floor and ceil currency.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The list includes only those currencies which are already defined in the system.	

3. Enter the required details in the **Negotiability** grid.
4. If you want to define more than one rate negotiability floor and ceil value of a price item or price item bundle *f*or the division, click the **Add** (+) icon and then repeat step 3.

   Note: However, if you want to remove the rate negotiability floor and ceil value of a price item or price item bundle from the division, click the **Delete** (🗑) icon corresponding to the To Do role.
5. Click **Save**.
   The rate negotiability floor and ceil limits of the price item or price item bundle are defined for the division.

Defining a Characteristic for a Price Item or Price Item Bundle

Prerequisites

To define a characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

Procedure

To define a characteristic for a price item or price item bundle:

1. Click the **Price Item Characteristics** or **Show All** link in the **Section** pane when you are defining, editing, or *c*opying a price item or price item bundle.

   The **Price Item Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Price Item**.	Yes (Conditional) **Note:** This field is required while defining a characteristic for

Field Name	Field Description	Mandatory (Yes or No)
		the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item or price item bundle.

2. Enter the required details in the **Price Item Characteristics** section.
3. If you want to define more than one characteristic for the price item or price item bundle, click the **Add** (+) *i*con and then repeat step 2.

   Note: However, if you want to remove a characteristic from the price item or price item bundle, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The characteristics are defined for the price item or price item bundle.

How to copy a price item or price item bundle	Copying a Price Item or Price Item Bundle on page 415

Copying a Price Item or Price Item Bundle

Instead of creating a price item or price item bundle from scratch, you can create a new price item or price item bundle using an existing price item or price item bundle. This is possible through copying a price item or price item bundle. On copying a price item or price item bundle, the details including the following are copied to the new price item or price item bundle:

- Parameters and Divisions associated with the price item or price item bundle
- SQIs associated with the price item or price item bundle for the divisions
- Division-specific characteristics of the price item or price item bundle
- Accrual type criteria of the price item or price item bundle for the divisions
- Hierarchy entity to which the price item or price item bundle is associated in the divisions
- Cost of the price item or price item bundle for the divisions
- Average price floor and ceil limits of the price item or price item bundle for the divisions
- Negotiability floor and ceil values of the price item or price item bundle for the required divisions

You can then edit the details, if required.

Prerequisites

To copy a price item or price item bundle, you should have:

- Price item or price item bundle (whose copy you want to create) defined in the application
- Price item or price item bundle (whose copy you want to create) associated with the division to which the user (i.e. who is performing this action) belongs
- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1_PRICING** feature configuration

Procedure

To copy a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **Copy** (⧉) icon in the **Duplicate** column corresponding to the price item *or* price item bundle whose copy you want to create.

   The **Price Item** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price item or price item bundle.
   - **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

     Note:

     The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

     You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.
   - **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
     - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
     - Define the accrual type criteria of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

       Note: This step is not applicable for the health insurance business.
     - Define the cost of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Define the average price floor and ceil limits of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Define the negotiability floor and ceil values of the price item or price item bundle for a division

       Note: This step is not applicable for the health insurance business.
     - Define the division-specific characteristics for the price item or price item bundle
   - **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: • **Pricing** - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system. **Note:** This option is not applicable for the health insurance business. • **Pricing and Billing** - Used when you want to define pricing and create charges for the price item or price item bundle in the system.	Yes
Price Item Type	Used to indicate the type of the price item or price item bundle. The valid values are: • **Rate** - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items. **Note:** This option is not applicable for the health insurance business. • **Fees** - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item. **Note:** This field appears when the **Pricing** option is selected from the **Price Item Usage** list. You cannot create a price item bundle when the **Pricing** option is selected from the **Price Item Usage** list and **Rate** option is selected from the **Price Item Type** list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to **Fees**. Therefore, this field does not appear when the **Pricing and Billing** option is selected from the **Price Item Usage** list.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle	Used to indicate whether you want to create a price item bundle. The valid values are: • Yes • No **Note:** This field is not applicable for the health insurance business.	Yes
Bundle Type	Used to indicate the type of the price item bundle. If the**Pricing and Billing** option is selected from the **Price Item Usage** list, the valid values are: • Regular Bundle on page 304 • Phantom Bundle on page 308 • Ratio Bundle on page 306 However, if the **Pricing** option is selected from the **Price Item Usage** list and the **Fees** option is selected from the **Price Item Type** list, you can only define a regular price item bundle. Therefore, by default, the value is set to **Regular**. **Note:** This field appears when the **Yes** option is selected from the **Bundle** list. This field is enabled when the **Pricing and Billing** option is selected from the **Price Item Usage** list and the **Yes** option is selected from the **Bundle** list. You cannot define a price item bundle when the **Pricing** option is selected from the **Price Item Usage** list and **Rate** option is selected from the **Price Item Type** list. This field is not applicable for the health insurance business.	Yes (Conditional) **Note:** This field is required when you are creating a price item bundle.
Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: • Yes • No	Yes
Contract Type	Used to indicate the contract type that you want to associate with the price item or price item bundle. **Note:** This field appears when the **Pricing and Billing** option is selected from the **Price Item Usage** list.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to the **Contract Type** field. On clicking the **Search** icon, the **Contract Type Search** window appears.	
Price Item Manager To Do Type	Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the **Send Price Items for Approval** button) to approve the average price for the price item or price item bundle offered in a deal. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item Manager To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Price Item Manager To Do Type** field. This field is not applicable for the health insurance business.	No
Price Item Manager To Do Role	Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role. **Note:** The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type. This field is not applicable for the health insurance business.	Yes (Conditional) **Note:** This field is required when the price item manager To Do type is specified for the price item or price item bundle.
Average Price Floor and Ceiling Limits	Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is: • **Absolute Value Range** - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item	Yes (Conditional) **Note:** This field is required when you are defining the average price floor and ceil limits of the price item or

Field Name	Field Description	Mandatory (Yes or No)
	or price item bundle should be between 10$ to 15$. • **Spread Amount** - Used when you want to define the average floor and ceil limits based on the spread amount. • **Spread Percentage** - Used when you want to define the average floor and ceil limits based on the spread percentage. **Note:** • Incase of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived. • This field is not applicable for the health insurance business.	price item bundle for a division.
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal pricing management module.	No
Variable Price	Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal pricing management module. **Note:** If the **Variable Price** option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system. However, if the **Variable Price** option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.	No

3. Enter the required details in the **Main** section.
4. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.

   Note: For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.
5. Associate or disassociate the price item or price item bundle from the required divisions.
6. Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.
7. Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

8. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy *r*elationship of the required divisions.

Note: This step is not applicable for the health insurance business.

9. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.

Note: This step is not applicable for the health insurance business.

10. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the *r*equired divisions.

Note: This step is not applicable for the health insurance business.

11. Define, edit or remove the negotiability floor and ceil values of the price item or price item bundle for the *r*equired divisions.

Note: This step is not applicable for the health insurance business.

12. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.
13. Define, edit, or remove characteristics of the price item or price item bundle, if required.
14. Click **Save**.
The new price item is defined.

Note:

While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1_PRICING** feature configuration is automatically associated to the price item or price item bundle.

The system allows you to add a price item to the new price item bundle when:

- Price item and price item bundle (whose copy you are creating) are associated to the same contract type.
- Price item is associated with the division to which the price item bundle (whose copy you are creating) is associated.
- Another price item bundle with the same price item, relationship type, and date range combination does not exist in the system.

Viewing the Price Item or Price Item Bundle Details

Procedure

To view the details of a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price *i*tem or price item bundle whose details you want to view.

   The **Price Item** screen appears. It contains the following zones:

   - Price Item on page 424
   - Price Item Characteristics on page 426
   - Parameters on page 426
   - Predefined Parameter Values for Price Item on page 427
   - Divisions on page 427
   - Division-Specific SQIs for Price Item on page 428
   - Division-Specific Characteristics for Price Item on page 428
   - Division-Specific Accrual Type Criteria for Price Item on page 429
   - Division-Specific Hierarchy for Price Item on page 429
   - Division-Specific Cost for Price Item on page 431
   - Division-Specific Negotiability for Price Item on page 430
   - Division-Specific Floor and Ceil Values for Price Item on page 432
   - Price Item Relationship on page 433
3. View the basic details of the price item or price item bundle in the **Price Item** zone.
4. View the characteristics of the price item or price item bundle in the **Price Item Characteristics** zone.
5. View the parameters associated with the price item or price item bundle in the **Parameters** zone.

6. View the valid predefined parameter values of the price item or price item bundle in the **Predefined Parameter Values for Price Item** zone.
7. View the divisions to which the price item or price item bundle is associated in the **Divisions** zone.
8. View the SQIs associated with the price item or price item bundle for a division in the **Division-Specific SQIs for Price Item** zone.
9. View the division-specific characteristics of the price item or price item bundle in the **Division-Specific Characteristics for Price Item** zone.
10. View the accrual type criteria of the price item or price item bundle for a division in the **Division-Specific Accrual Type Criteria for Price Item** zone.

    Note: This step is not applicable for the health insurance business.
11. View the hierarchy entity to which the price item or price item bundle is associated in a division in the **Division-Specific Hierarchy for Price Item** zone.

    Note: This step is not applicable for the health insurance business.
12. View the cost of the price item or price item bundle for a division in the **Division-Specific Cost for Price Item** zone.

    Note: This step is not applicable for the health insurance business.
13. View the average price floor and ceil limits of the price item or price item bundle for a division in the **Division-Specific Floor and Ceil Values for Price Item** zone.

    Note: This step is not applicable for the health insurance business.
14. View the negotiability floor and ceil values of the price item or price item bundle for a division in the **Division-Specific Negotiability Floor for Price Item** zone.

    Note: This step is not applicable for the health insurance business.
15. View the price items or price item bundles related to the parent price item or price item bundle in the **Price Item Relationship** zone.

    Note: This step is not applicable for the health insurance business.

Price Item

The **Price Item** zone displays the details of the price item or price item bundle. It contains the following sections:

- **Main** - Displays basic information about the price item or price item bundle. It contains the following fields:

Field Name	Field Description
Price Item	Displays the price item or price item bundle.
Description	Displays the description of the price item or price item bundle.
Price Item Usage	Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: • Pricing • Pricing and Billing
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: • Rate • Fees **Note:** This field appears when the **Pricing** option is selected from the **Price Item Usage** list.
Bundle	Indicates whether the price item is a bundle. The valid values are: • Yes • No
Bundle Type	Indicates the type of the price item bundle. The valid values are: • Phantom • Ratio • Regular **Note:** This field appears when the **Yes** option is selected from the **Bundle** list.
Global Price List	Indicates whether the price item or price item bundle can be assigned to a global price list. The valid values are: • Yes • No
Contract Type	Displays the contract type to which the price item or price item bundle is associated.
Price Item Manager To Do Type	Indicates the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the **Send Price**

Field Name	Field Description
	Items for Approval button) to approve the average price for the price item or price item bundle offered in a deal. **Note:** It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Price Item Manager To Do Role	Indicates that users with the specified To Do role can approve the average price of the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits of the To Do role. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Average Price Floor and Ceil Limits	Indicates the manner in which you want to define the average price floor and ceil limits of the price item or price item bundle. The valid values are: • Absolute Value Range • Spread Amount • Spread Percentage
Sort Sequence	Displays the sequence in which the price item appears in the price item hierarchy of the deal pricing management module.
Variable Price	Indicates whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal management module. **Note:** If the **Variable Price** option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system. However, if the **Variable Price** option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.

- **Record Actions** - The **Record Actions** section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price item or price item bundle.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item or price item bundle is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Price Item Characteristics

The **Price Item Characteristics** zone lists the characteristics of the price item or the price item bundle. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item or price item bundle.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic. **Note:** By default, this field appears when selecting a value for the corresponding **Characteristic Type**.

Parameters

The **Parameters** zone lists the parameters which are associated with the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the parameter is associated with the price item or price item bundle.
Effective End Date	Displays the date till when the parameter is associated with the price item or price item bundle.
Parameter	Indicates the parameter which is associated with the price item or price item bundle. **Note:** It has a link. On clicking the link, the **Parameter** screen appears where you can view the details of the respective parameter.
Business Label	Displays the business label of the parameter.
Display Order	Indicates the order in which the parameter and its value should appear in the pricing parameter information string across the application.
Parameter Usage	Indicates whether you can use the parameter for aggregation and/or for defining the price item pricing. The valid values are: • Aggregation • Pricing

Column Name	Column Description
Mandatory	Indicates whether the parameter is mandatory while defining the price item pricing.
Priority	Indicates the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.

On clicking the **Broadcast** (📡) icon corresponding to a parameter, the **Predefined Parameter Values for Price Item** zone appears where you can view the valid predefined parameter values of the price item or price item bundle.

Divisions

The **Divisions** zone lists the divisions to which the price item or price item bundle is associated. It contains the following column:

Column Name	Column Description
Division	Indicates the division to which the price item or price item bundle is associated. **Note:** It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.

On clicking the **Broadcast** (📡) icon corresponding to a division, the **Division-Specific SQIs for Price Item**, **Division-Specific Characteristics for Price Item**, **Division-Specific Accrual Type Criteria for Price Item**, **Division-Specific Hierarchy for Price Item**, **Division-Specific Cost for Price Item**, **Division-Specific Average Price Floor and Ceil Values for Price Item** and **Division-Specific Negotiability Floor and Ceil Values for Price Item** zones appear.

You can filter the list using the **Division** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Division-Specific Hierarchy for Price Item

The **Division-Specific Hierarchy for Price Item** zone lists the following in a tree structure:

- Information string of the hierarchy entity at the first level in the entity hierarchy relationship
- Information string of the hierarchy entities at the subsequent levels in the entity hierarchy relationship
- Information string of the price items which are associated with the hierarchy entities at different levels in the entity hierarchy relationship

For example,

Here, the Cash Management, US (at the first level), Payments, US (at the second level), and Statements, US (at the second level) are the hierarchy entity nodes. And, the ACH Payment, ACH Return, ACH Reversal, Mini Statement, and Yearly Statement are the price item nodes.

Each node in the tree has a link. If you click the link on the hierarchy entity node, the **Hierarchy Entity** screen appears where you can view the details of the respective hierarchy entity. However, if you click the link on the price item node, the **Price Item** screen appears where you can view the details of the respective price item.

It contains the following field:

Field Name	Field Description
Hierarchy	Displays the entity hierarchy relationship code.

In addition, it contains the following buttons:

Button Name	Button Description
Expand All	Used to expand all nodes at once in the entity hierarchy relationship.
Collapse All	Used to collapse all nodes at once in the entity hierarchy relationship.

By default, the **Division-Specific Hierarchy for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a division in the **Divisions** zone.

Division-Specific Negotiability for Price Item

The **Division-Specific Negotiability for Price Item** zone lists the negotiability floor and ceil limits of a price item or price item bundle which are defined for the division. It contains the following columns:

Column Name	Column Description
Negotiability Floor Value	Indicates the floor (i.e. lower) limit for the rate negotiation.
Negotiability Ceil Value	Indicates the ceil (i.e. upper) limit for the rate negotiation.
Currency	Indicates the currency used to define the rate negotiability floor and ceil limits.

Column Name	Column Description
	Note: The system does the currency conversion when the pricing currency is different from the floor and ceil currency.
Negotiability Switch	Indicates if the rate of a price item is negotiable or not in a deal. The valid values are: • Yes • No
Only Within Range Switch	Indicates that the system should validate whether the negotiated rate is within the negotiability floor and ceil limits or not. The valid values are: • Yes • No **Note:** This field is enabled when the **Yes** option is selected for the **Negotiability Switch** list

By default, the **Division-Specific Negotiability for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a division in the **Divisions** zone.

Division-Specific Floor and Ceil Values for Price Item

The **Division-Specific Floor and Ceil Values for Price Item** zone lists the average price floor and ceil limits of the price item or price item bundle which are defined for the division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates that users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Floor Value	Displays the floor (i.e. lower) limit of the To Do role. **Note:** This column appears when the **Absolute Value Range** option is selected for the **Average Price Floor and Ceil Limits** list for a price item or price item bundle.
Ceil Value	Displays the ceil (i.e. upper) limit of the To Do role. **Note:** This column appears when the **Absolute Value Range** option is selected for the **Average Price Floor and Ceil Type** list for a price item or price item bundle.
Floor and Ceil Currency	Indicates the currency in which the average price floor and ceil limits are defined for the price item or price item bundle. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Spread Amount	Indicates the spread amount specified while defining a price item or price item bundle or assigned to a To Do role. **Note:** This column appears when the **Spread Amount** option is selected for the **Average Price Floor and Ceil Type** list for a price item or price item bundle.
Spread Percentage	Indicates the spread percentage specified while defining a price item or price item bundle or assigned to a To Do role. **Note:** This column appears when the **Spread Percentage** option is selected for the **Average Price Floor and Ceil Type** list for a price item or price item bundle.

By default, the **Division-Specific Floor and Ceil Values for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a division in the **Divisions** zone.

Price Item Relationship

The **Price Item Relationship** zone lists the price items or price item bundles which are associated with the parent price item or added to the price item bundle. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle. **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item or price item bundle.
Effective Start Date	Displays the date from when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Effective End Date	Displays the date till when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Relationship Type	Indicates how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group
Bundle Type	Indicates the type of the price item bundle. The valid values are: • Phantom • Ratio • Regular **Note:** The data appears in this column when the associated price item is a bundle.
Price Item Parameters	Displays the parameters and their values based on which you want to determine pricing for the price item or price item bundle.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Price Item**, **Description**, **Effective Start Date**, and **Relationship Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

You can associate or disassociate a price item or price item bundle from a parent price item and add or remove a price item or price item bundle from a price item bundle by clicking the **Add/Edit** link in the upper right corner of this zone.

Editing a Price Item or Price Item Bundle

Prerequisites

To edit a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1_PRICING** feature configuration

Procedure

To edit a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price *i*tem or price item bundle whose details you want to edit.
   The **Price Item** screen appears.
3. Click the **Edit** button in the **Price Item** zone.

   The **Price Item** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price item or price item bundle.
   - **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

     Note:

     The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **True**.

     You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.
   - **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
     - Associate the service quantity identifiers (SQIs) with the price item or price item bundle for a division
     - Define the accrual type criteria of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division

Note: This step is not applicable for the health insurance business.

- Define the cost of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the average price floor and ceil limits of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the negotiability floor and ceil values of the price item or price item bundle for a division

Note: This step is not applicable for the health insurance business.

- Define the division-specific characteristics for the price item or price item bundle

- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Displays the price item or price item bundle.	Not applicable
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: • **Pricing** - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system. **Note:** This option is not applicable for the health insurance business. • **Pricing and Billing** - Used when you want to define pricing and create charges for the price item or price item bundle in the system. **Note:** You can change the price item usage of a price item or price item bundle from **Pricing** to **Pricing and Billing**. But, you cannot change the price item usage of a price item or price item bundle from **Pricing and Billing** to **Pricing**.	Yes
Price Item Type	Used to indicate the type of the price item or price item bundle. The valid values are: • **Rate** - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest	Yes

Field Name	Field Description	Mandatory (Yes or No)
	services (i.e. price items) are rate based price items. **Note:** This option is not applicable for the health insurance business. • **Fees** - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item. **Note:** This field appears when the **Pricing** option is selected from the **Price Item Usage** list. You cannot create a price item bundle when the **Pricing** option is selected from the **Price Item Usage** list and **Rate** option is selected from the **Price Item Type** list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to **Fees**. Therefore, this field does not appear when the **Pricing and Billing** option is selected from the **Price Item Usage** list.	
Bundle	Used to indicate whether you want to create a price item bundle. The valid values are: • Yes • No **Note:** This field is not applicable for the health insurance business.	Yes
Bundle Type	Used to indicate the type of the price item bundle. If the**Pricing and Billing** option is selected from the **Price Item Usage** list, the valid values are: • Regular Bundle on page 304 • Phantom Bundle on page 308 • Ratio Bundle on page 306 However, if the **Pricing** option is selected from the **Price Item Usage** list and the **Fees** option is selected from the **Price Item Type** list, you can only define a regular price item bundle. Therefore, by default, the value is set to **Regular**. **Note:** This field appears when the **Yes** option is selected from the **Bundle** list.	Yes (Conditional) **Note:** This field is required when you are creating a price item bundle.

Field Name	Field Description	Mandatory (Yes or No)
	This field is enabled when the **Pricing and Billing** option is selected from the **Price Item Usage** list and the **Yes** option is selected from the **Bundle** list. You cannot define a price item bundle when the **Pricing** option is selected from the **Price Item Usage** list and **Rate** option is selected from the **Price Item Type** list. This field is not applicable for the health insurance business.	
Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: • Yes • No	Yes
Contract Type	Used to indicate the contract type that you want to associate with the price item or price item bundle. **Note:** This field appears when the **Pricing and Billing** option is selected from the **Price Item Usage** list. The **Search** (🔍) icon appears corresponding to the **Contract Type** field. On clicking the **Search** icon, the **Contract Type Search** window appears.	Yes
Price Item Manager To Do Type	Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the **Send Price Items for Approval** button) to approve the average price for the price item or price item bundle offered in a deal. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item Manager To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Price Item Manager To Do Type** field. This field is not applicable for the health insurance business.	No

Field Name	Field Description	Mandatory (Yes or No)
Price Item Manager To Do Role	Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role. **Note:** The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type. This field is not applicable for the health insurance business.	Yes (Conditional) **Note:** This field is required when the price item manager To Do type is specified for the price item or price item bundle.
Average Price Floor and Ceil Limits	Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is: • **Absolute Value Range** - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10$ to 15$. • **Spread Amount** - Used when you want to define the average floor and ceil limits based on the spread amount. • **Spread Percentage** - Used when you want to define the average floor and ceil limits based on the spread percentage. **Note:** • Incase of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived. • This field is not applicable for the health insurance business.	Yes (Conditional) **Note:** This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.
Sort Sequence	Used to specify the sequence in which the price item should appear in the price item hierarchy of the deal pricing management module.	No
Variable Price	Used to indicate whether the system inherits the pricing of the price item from the price list while orchestrating a deal in the deal pricing management module.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: If the **Variable Price** option is selected, the pricing offered for a price item to an entity in the deal is overridden when the price list pricing is changed after orchestrating the deal in the system. However, if the **Variable Price** option is not selected, the pricing offered for a price item to an entity in the deal is not overridden when the price list pricing is changed in the system. This enables the relationship manager to create deals for an existing customers, accounts, and prospects where the pricing of the price items are fixed for a particular timeframe.	

4. Modify the required details in the **Main** section.
5. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.

   Note:

   You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

   You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

   For each predefined parameter which is associated with the price item or price item bundle, you can define a *s*et of valid predefined parameter values for the price item or price item bundle, if required.
6. Associate or disassociate the price item or price item bundle from the divisions, if required.

   Note: If the price item or price item bundle is associated to a division to which you do not have access, then the corresponding row in the **Divisions** section is grayed out.
7. Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.
8. Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.

   Note: This step is not applicable for the health insurance business.
9. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy *r*elationship of the required divisions.

   Note: This step is not applicable for the health insurance business.
10. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.

    Note: This step is not applicable for the health insurance business.
11. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the *r*equired divisions.

    Note: This step is not applicable for the health insurance business.

12. Define, edit or remove the rate negotiability floor and ceil values of the price item or price item bundle for the *r*equired divisions.

Note: This step is not applicable for the health insurance business.

13. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.
14. Define, edit, or remove characteristics of the price item or price item bundle, if required.
15. Click **Save**.
    The changes made to the price item or price item bundle are saved.

Price Item Relationship

Oracle Revenue Management and Billing allows you to associate two or more price items with each other, and thereby group them for various reasons, such as reporting, billing, and so on. In other words, you can define a price item to price item relationship. The price item to which a set of price items are associated is called a parent price item. You can also create a price item bundle and then add price items to the price item bundle. The main objective behind grouping price items or creating price item bundles is to offer discounts based on the volume across price items, facilitate minimum or maximum charge calculations across price items, or offer common price across price items.

While associating a price item with a parent price item or adding a price item to a price item bundle, you need to specify how the price item is related to the parent price item or price item bundle. You can add a price item to a price item bundle using the following relationship types:

- **Bundle** - Used while adding price items in the regular and phantom price item bundles.
- **Denominator** - Used while adding price items in the ratio price item bundles.
- **Numerator** - Used while adding price items in the ratio price item bundles.

However, you can associate a price item or price item bundle with a parent price item using the following relationship types:

- Other
- Custom
- Price Item
- Child Price Item
- Product Group
- Service
- Service Group

Note:

You cannot add same set of price items using the same relationship type while defining two or more bundles with the same bundle type. For example, you cannot add P1 and P2 using the relationship type as Bundle while defining regular bundles named BUN1 and BUN2. However, you can use same set of price items while defining two or more price item to price item relationships.

If the multi parameter based pricing feature is enabled, you can add same set of price item and price item parameter combination (using the same relationship type) in more than one bundle (having the same bundle type) provided the price item parameter values are different.

The **Price Item Relationship** screen allows you to view the price items that are already associated with the parent price item or added to the price item bundle. It also allows you to associate or disassociate a price item or price item bundle from the parent price item, or add or remove a price item or price item bundle from the price item bundle. This screen consists of the following zone:

- Assigned Price Items on page 441

Assigned Price Items

The **Assigned Price Items** zone lists the price items or price item bundles that are already associated with the parent price item or added to the price item bundle. You will not find any records in this zone if the parent price item does not have any price item or price item bundle associated with it or if the price item bundle does not have any price item or price item bundle added to it. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search a particular price item or price item bundle which is associated with the parent price item or added to the price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
Effective Start Date	Used to search price items or price item bundles which are associated with the parent price item or added to the price item bundle from a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to search price items or price item bundles which are related to the parent price item or added to the price item bundle using a particular relationship type. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle. **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item or price item bundle.
Effective Start Date	Displays the date from when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Effective End Date	Displays the date till when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Relationship Type	Indicates how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group **Note:** The **Bundle** relationship type is used while adding price items in the regular and phantom price item bundles. The **Denominator** and **Numerator** relationship types are used while adding price items in the ratio price item bundles. And, all other relationship types, such as **Other**, **Custom**, **Price Item**, **Service**, and **Service Group** are used while associating price items to the parent price item.
Price Item Parameters	Indicates the parameters based on which you want to determine pricing for the price item.

You can associate or disassociate a price item or price item bundle from a parent price item, or add or remove a price item or price item bundle from a price item bundle by clicking the **Add/Edit** link in the upper right corner of this zone.

Associate Price Items for Relationship Based Pricing

The **Associate Price Items for Relationship Based Pricing** zone allows users to associate price item or price item bundle under a parent price item for relationship based pricing. It ensures that selected price items share the same pricing parameters and division. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date when the relationship based pricing for the associated price items becomes effective.
End Date	Displays the date until which the relationship based pricing for the associated price items remains active.
Parameter	Displays the parameter(s) which is associated with the price item or price item bundle under a parent price item for relationship based pricing.
Division	Displays the division(s) for which the relationship based pricing for the associated price items is valid.
Relation Operator	Displays the relational operator to define the relation between the parameter name and value.
Edit	On clicking the **Edit** (✎) icon corresponding to a price item, the **Associate Price Items for Relationship Based Pricing** screen appears where you can edit the details of the price item or price item bundle for relationship based pricing.

You can associate one or more price items with the parent price item to offer relationship based pricing by clicking the **Add** link in the upper right corner of this zone.

On clicking the **Broadcast** (ᯤ) icon corresponding to a start date, the **Associate Price Item Relationship** zone appears with the details of the respective price item or price item bundle.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Associating a Price Item or Price Item Bundle with a Parent Price Item

Prerequisites

To associate a price item or price item bundle with a parent price item, you should have:

- Parent price item associated with the division to which the user belongs
- Price item or price item bundle associated to at least one division to which the parent price item belongs.

Procedure

To associate a price item or price item bundle with a parent price item:

1. Search for the parent price item in the **Price Item** screen.
2. In the **Search Results** section, click the **Price Item Relationship** (🔗) icon in the **Price Item Relationship** *c*olumn corresponding to the parent price item to which you want to associate a price item or price item bundle.
   The **Price Item Relationship** screen appears.
3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.

   The **Price Item Relationship** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price Item	Displays a parent price item.	Not Applicable
Price Item	Used to search a particular price item or price item bundle which is associated with the parent price item or added to the price item bundle.	No

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to search price items or price item bundles with a particular description.	No
Effective Start Date	Used to search price items or price item bundles which are associated with the parent price item or added to the price item bundle from a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Relationship Type	Used to search price items or price item bundles which are related to the parent price item or added to the price item bundle using a particular relationship type. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group	No

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item or price item bundle that you want to associate with the parent price item. **Note:** The **Search** ( ) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears.	Yes
Relationship Type	Used to indicate how the price item or price item bundle is related with the parent price item. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can use the **Other**, **Custom**, **Price Item**, **Service**, or **Service Group** relationship type while associating a price item or price item bundle to the parent price item.	
Effective Start Date	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item. **Note:** The effective start date cannot be later than the effective end date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
Effective End Date	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Price Item Parameters	Used to specify the parameters and their values based on which you want to determine pricing for the price item or price item bundle. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**. The **Search** ( ) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Parameters** screen appears. You must not use the **Price Item Parameters** field while associating a price item or price item bundle with a parent price item. This is because it is designed to be used while adding a price item or price item bundle to the ratio and phantom price item bundles.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Characteristics	On clicking the **Add** (+) icon, you can define relationship-specific characteristics for the price item or price item bundle.	Not applicable

4. Enter the required details in the **Price Item Relationship** screen.

   Note: You can associate the same set of price items or price item bundles using the same relationship type to more than one parent price item. For example, you can associate the **P1** and **P2** price items using the **Service** relationship type to the **PP1** and **PP2** price items.

5. Define relationship-specific characteristics for the price item or price item bundle, if required.
6. If you want to associate more than one price item or price item bundle with the parent price item, click the **Add** (+) icon and then repeat the steps from 4 to 5.

   Note: However, if you want to disassociate a price item or price item bundle from a parent price item, click the **Delete** (🗑) icon corresponding to the price item or price item bundle.

7. Click **Save**.
   The price item or price item bundle is associated with the parent price item.

Adding a Price Item or Price Item Bundle to a Price Item Bundle

Prerequisites

To add a price item or price item bundle to a price item bundle, you should have:

- Price item bundle (to which you want to add a price item or price item bundle) associated with the division to which the user belongs
- Price item bundle (to which you want to add a price item or price item bundle) and price item or price item bundle (which you want to add) associated to the same contract type
- Parameters associated with the price item or price item bundle (which you want to add) when you want to determine pricing for the price item based on the parameters in the ratio and phantom price item bundles
- Regular price item bundle (to which you want to add a price item or price item bundle) and price item or price item bundle (which you want to add) associated with the same parameters

  Note: Not only the parameters, but also their details such as parameter usage, mandatory flag, and priority should be identical. Also, the date from when the parameters are effective for the price item bundle (to which you want to add a price item or price item bundle) should be earlier than or equal to the date from when the parameters are effective for the price item or price item bundle (which you want to add).

- Price item or price item bundle (which you want to add) associated to at least one division to which the price item bundle (to which you want to add a price item or price item bundle) belongs

Procedure

To add a price item or price item bundle to a price item bundle:

1. Search for the price item bundle in the **Price Item** screen.

2. In the **Search Results** section, click the **View** (🔗) icon in the **Price Item Relationship** column corresponding *to* the price item bundle to which you want to add a price item or price item bundle.
   The **Price Item Relationship** screen appears.
3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.

   The **Price Item Relationship** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price Item	Displays a parent price item.	Not Applicable
Price Item	Used to search a particular price item or price item bundle which is associated with the parent price item or added to the price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
Effective Start Date	Used to search price items or price item bundles which are associated with the parent price item or added to the price item bundle from a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Relationship Type	Used to search price items or price item bundles which are related to the parent price item or added to the price item bundle using a particular relationship type. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group	No

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item or price item bundle that you want to add to the price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears.	Yes
Relationship Type	Used to indicate how the price item or price item bundle is related to the price item bundle. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group **Note:** You can use the **Bundle** relationship type while adding a price item or price item bundle in the regular and phantom price item bundles. However, you can use the **Denominator** and **Numerator** relationship type while adding a price item or price item bundle in the ratio price item bundles.	
Effective Start Date	Used to specify the date from when the price item or price item bundle is added to the price item bundle. **Note:** The effective start date cannot be later than the effective end date. You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	Yes
Effective End Date	Used to specify the date till when the price item or price item bundle is added to the price item bundle. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	No
Price Item Parameters	Used to specify the parameters and their values based on which you want to determine pricing for the price item or price item bundle. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	No

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to the **Price Item Parameters** field. On clicking the **Search** icon, the **Price Item Parameters** screen appears.	
Characteristics	On clicking the **Add** (📄) icon, you can define relationship-specific characteristics for the price item or price item bundle.	Not applicable

4. Enter the required details in the **Price Item Relationship** screen.

Note:

You can add a price item or price item bundle to a regular price item bundle when the regular price item bundle (to which you want to add a price item or price item bundle) and price item or price item bundle (which you want to add) are associated with the same parameters for the specified date range.

You cannot add the same set of price items using the same relationship type to two or more price item bundles with the same bundle type. For example, you cannot add **P1** and **P2** using the **Bundle** relationship type to the **BUN1** and **BUN2** regular price item bundles.

If the multi parameter based pricing feature is enabled, you can add the same set of price item and price item parameter combination (using the same relationship type) to more than one bundle (with the same bundle type) provided the price item parameter values are different.

You cannot add the same price item or price item bundle in numerator and denominator while defining a ratio price item bundle.

5. Define relationship-specific characteristics for the price item or price item bundle, if required.
6. If you want to add more than one price item or price item bundle to the price item bundle, click the **Add** (+) *i*con and then repeat the steps from 4 to 5.

Note: However, if you want to remove a price item or price item bundle from a price item bundle, click the **Delete** (🗑) icon corresponding to the price item or price item bundle.

7. Click **Save**.
   The price item or price item bundle is added to the price item bundle.

Setting the Parameters for a Price Item or Price Item Bundle

Prerequisites

To set the parameters for a price item or price item bundle, you should have:

- Parameters (where the **Parameter Usage** field is set to **Pricing**) associated with the price item or price item bundle

Procedure

To set the parameters for a price item or price item bundle:

1. Click the **Search** (🔍) icon corresponding to the **Price Item Parameters** field.

   The **Price Item Parameters** screen appears. It contains the following fields:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle for which you want to set the parameters.
Description	Displays the description of the price item or price item bundle.

   In addition, this screen contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item Parameter	Indicates the parameter which is associated with the price item or price item bundle. **Note:** Here, the system displays the price item parameter where the **Parameter Usage** field is set to **Pricing**.	Not applicable
Mandatory	Indicates whether the parameter is mandatory while defining the price item pricing. The valid values are: • Yes • No	Not applicable
Priority	Indicates the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle. **Note:** The priority for all parameters which are mandatory is set to 0.	Not applicable
Parameter Value	Used to specify the parameter value. **Note:** If the parameter value type is **Predefined** or **Reference**, the **Search** (🔍) icon appears corresponding to the **Parameter Value** field. On clicking the **Search** icon, you can search for a parameter value. You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.	Yes (Conditional) **Note:** This field is required when you want to determine pricing for the price item or price item bundle based on the parameter.

2. Enter the required details in the **Price Item Parameters** screen.

3. Click **OK**.
   A comma-separated list of values appear in the **Price Item Parameters** column corresponding to the price item or price item bundle. The order in which parameter values appear in the price item parameter information string is controlled by the display order (which is defined while associating a parameter with a price item).

   Note: The value specified for a parameter whose value type is set to **Adhoc** is validated using the validation algorithm attached to the respective parameter.

Defining Relationship-Specific Characteristics for a Price Item or Price Item Bundle

Prerequisites

To define relationship-specific characteristics for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Relationship**)

Procedure

To define relationship-specific characteristics for a price item or price item bundle:

1. Click the **Add** (+) icon in the **Characteristics** column corresponding to the price item or price item bundle for which you want to define relationship-specific characteristics.

   A grid appears corresponding to the price item or price item bundle with the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the relationship-specific characteristic is effective for the price item or price item bundle.	Yes (Conditional) **Note:** This field is required when you are defining a relationship-specific characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Price Item Relationship**.	Yes (Conditional) **Note:** This field is required when you are defining a relationship-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears	Yes (Conditional) **Note:** This field is required when you are defining a relationship-specific

Field Name	Field Description	Mandatory (Yes or No)
	corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	characteristic for the price item or price item bundle.

2. Enter the required details in the **Characteristics** grid.
3. If you want to define more than one relationship-specific characteristic for the price item or price item bundle, *c*lick the **Add** (+) icon and then repeat step 2.

   Note: However, if you want to remove a relationship-specific characteristic from the price item or price item bundle, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The relationship-specific characteristics are defined for the price item or price item bundle.

Disassociating a Price Item or Price Item Bundle from a Parent Price Item

Prerequisites

To disassociate a price item or price item bundle from a parent price item, you should have:

- Parent price item associated with the division to which the user belongs

Procedure

To disassociate a price item or price item bundle from a parent price item:

1. Search for the parent price item in the **Price Item** screen.
2. In the **Search Results** section, click the **View** (🔗) icon in the **Price Item Relationship** column corresponding *t*o the parent price item from which you want to disassociate a price item or price item bundle.
   The **Price Item Relationship** screen appears.
3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.
   The **Price Item Relationship** screen appears.
4. Filter the price items or price item bundles associated to the parent price item, if required.
5. In the **Search Results** section, click the **Delete** (🗑) icon corresponding to the price item or price item bundle that you want to *d*isassociate from the parent price item.
6. Click **Save**.
   The price item or price item bundle is disassociated from the parent price item.

Filtering the Price Items or Price Item Bundles Associated with a Parent Price Item

Prerequisites

To filter the price items or price item bundles associated with a parent price item, you should have:

- Parent price item associated with the division to which the user belongs

Procedure

To filter the price items or price item bundles associated with a parent price item:

1. Search for the parent price item in the **Price Item** screen.

2. In the **Search Results** section, click the **View** (🔗) icon in the **Price Item Relationship** column corresponding *to* the parent price item whose details you want to view.
   The **Price Item Relationship** screen appears.
3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.

   The **Price Item Relationship** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price Item	Displays a parent price item.	Not Applicable
Price Item	Used to search a particular price item or price item bundle which is associated with the parent price item or added to the price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
Effective Start Date	Used to search price items or price item bundles which are associated with the parent price item or added to the price item bundle from a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Relationship Type	Used to search price items or price item bundles which are related to the parent price item or added to the price item bundle using a particular relationship type. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group	No

4. Enter the search criteria in the **Price Item Relationship** screen.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   The search results are filtered based on the specified criteria.

Filtering the Price Items or Price Item Bundles Added to a Price Item Bundle

Prerequisites

To filter the price items or price item bundles added to a price item bundle, you should have:

- Price item bundle associated with the division to which the user belongs

Procedure

To filter the price items or price item bundles added to a price item bundle:

1. Search for the price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **View** (🔗) icon in the **Price Item Relationship** column corresponding *t*o the price item bundle whose details you want to view.
   The **Price Item Relationship** screen appears.
3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.

   The **Price Item Relationship** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price Item	Displays a parent price item.	Not Applicable
Price Item	Used to search a particular price item or price item bundle which is associated with the parent price item or added to the price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
Effective Start Date	Used to search price items or price item bundles which are associated with the parent price item or added to the price item bundle from a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Relationship Type	Used to search price items or price item bundles which are related to the parent price item or added to the price item bundle using a particular relationship type. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other	No

Field Name	Field Description	Mandatory (Yes or No)
	• Price Item • Product Group • Service • Service Group	

4. Enter the search criteria in the **Price Item Relationship** screen.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   The search results are filtered based on the specified criteria.

Associating a Price Item with a Parent Price Item for Relationship Based Pricing

Prerequisites

To associate a price item or price item bundle under a parent price item for relationship based pricing, you should have:

- Parent price item associated with the division to which the user belongs.
- Price item or price item bundle associated to at least one division to which the parent price item belongs.

Procedure

To associate a price item or price item bundle under a parent price item for relationship based pricing:

1. Search for the parent price item in the **Price Item** screen.
2. In the **Search Results** section, click the **Price Item Relationship** (🔗) icon in the **Price Item Relationship** column corresponding to the parent price item to which you want to associate a price item or price item bundle for relationship based pricing.
   The **Price Item Relationship** screen appears.
3. Click the **Add** link in the upper right corner of the **Associate Price Items for Relationship Based Pricing** zone.

   The **Associate Price Items for Relationship Based Pricing** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Displays a price item under which you want to associate price item or price item bundle for relationship based pricing.	Not Applicable
Start Date	Used to specify the date when the relationship based pricing for the associated price item(s) becomes effective.	Yes

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date until which the relationship based pricing for the associated price item(s) remains active.	No
Relationship Type	Used to indicate how the price item or price item bundle is related with the parent price item. The valid values are: • Bundle • Child Price Item • Custom • Denominator • Numerator • Other • Price Item • Product Group • Service • Service Group	Yes
Relation Operator	Used to indicate how the parameter name and its value are related to each other. The valid values are: • < • <= • == • > • >=	No

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter(s) that you want to associate with price item or price item bundle under a parent price item for relationship based pricing. **Note:** The system only allows you to select a parameter which is associated with the parent price item and which is effective on the association start date. The selected parameter should also be associated with the other selected price items and should be effective on the association start date. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Parameters Search** window appears.	Yes
Parameter Information	Displays the information related to the parameter.	Not Applicable

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to specify the parameter value.	Yes

Note: If you want to add more than one parameter and its value with the parent price item, click the **Add** (+) icon. However, if you want to remove a parameter and its value from a parent price item, click the **Delete** (🗑) icon corresponding to the parameter.

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division(s) for which the relationship based pricing for the associated price item(s) is valid. **Note:** The system only allows you to select a division which is associated with the parent price item. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Get Price Item Level Division** window appears.	

Note: If you want to add more than one division with the parent price item for which relationship based pricing is valid, click the **Add** (+) icon. However, if you want to remove a division from a parent price item, click the **Delete** (🗑) icon corresponding to the division.

Field Name	Field Description	Mandatory (Yes or No)
Associated Price Item Code	Used to indicate the price item or price item bundle that you want to associate with the parent price item. **Note:** The system only allows you to select the price item which is associated to the parent price item's division. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears.	Yes

Note: If you want to associate more than one price item or price item bundle with the parent price item, click the **Add** (+) icon. However, if you want to disassociate a price item or price item bundle from a parent price item, click the **Delete** (🗑) icon corresponding to the associated price item code.

4. Enter the required details in the **Associate Price Items for Relationship Based Pricing** screen.
5. Click **Save**.
   The price item or price item bundle is associated with the parent price item for relationship based pricing.

Price Item Assignments

The **Price Item Assignments** screen allows you to view the active price lists, persons, and accounts where the price item or price item bundle is assigned. It contains the following zones:

- Active Price Lists where Price Item is Assigned on page 461
- Persons to whom Price Item is Assigned on page 461
- Accounts where Price Item is Assigned on page 462

Active Price Lists where Price Item is Assigned

The **Active Price Lists where Price Item is Assigned** zone lists the active price lists where the pricing is defined for the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Price List Information	Indicates the price list where the price item or price item bundle is assigned. **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment.
Availability End Date	Displays the date till when the price list is available for assignment.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Description**, **Price Assignment Start Date**, **Price Assignment End Date**, **Availability Start Date** , and **Availability End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Price List

A price list allows you to define standard prices for a group of price items. In other words, a price list is a rate card for price items or services which are offered to the accounts or persons. You can create more than one price list. For example, you can create a price list for large, medium-sized, and small customers. You can also create a set of price lists for different regions. You can define two types of price lists - **Standard** and **Promotional**. You can also set eligibility criteria for the price list with effective start date, end date, and description. At present, there is no

functionality associated with the price list type. The implementation team can use the price list type to define the custom logic as per the business requirements.

A price list and price item pricing within the price list are effective for a particular duration. You can define multiple pricing for the same price item and variance parameter or product parameters combination within a price list when the price item pricing date range is different. You can assign the same price item in multiple price lists and define different pricing for the price item in each price list based on the business requirements.

The system enables you to specify the duration for which the price list is available for assignment to an account or a person. However, note that at present, the availability start and end dates are not used in the product while assigning a price list to an account or a person. If required, the implementation team can build the custom logic using the availability start and end dates in the product.

Once you create a price list, you have to assign price items to the price list and define pricing for each price item assigned to the price list. The price lists are then assigned to accounts or persons to indicate the prices that will be charged for various price items or services offered to them. You can assign multiple price lists to an account or a person for an overlapping date range. But, you need to specify the priority or order for the price list in which the pricing from the price list should be considered. You can also assign the same price list to multiple accounts or persons.

You can define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit price item pricing from the price list hierarchy.

The system allows you to create the following:

- **Default Price List** - You can create a price list and set it as a default price list for a particular division. To define a default price list for a division, you need to set the value for the **Default Price List ID** parameter in the price assignment search algorithm which is attached to the division. If the effective price item pricing is not available at any level in the customer hierarchy, the system checks whether the default price list is specified in the price assignment search algorithm. If the default price list is specified in the algorithm, the system checks whether effective price item pricing is available in the default price list and accordingly uses the price item pricing. You can have the same price list as a the default price list for multiple divisions.
- **Global Price List** - You can create one global price list in the system. It is used when the price item pricing is not available at any level in the customer hierarchy and in the default price list associated with the division. You can assign only those price items in the global price list whose the **Global Price List** option is set to **Yes**. The global price list is used while searching an effective price item pricing when the **Global Price List** parameter in the price assignment search algorithm (attached to the division) is set to **Y**. Finally, if the effective price item pricing is not available in the default and/or global price list, an error message occurs indicating that the effective price item pricing is not available in the system.
- **Template Price List** - You can define a template price list and assign template price item pricing to a template price list. You cannot assign template price list to an account or a person. You can only create a copy of a template price item pricing which is assigned to a template price list. Once you create a copy of the template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

Price List (Used for Searching)

The **Price List** screen allows you to search for a price list using various search criteria. It also allows you to define a price list. It contains the following zones:

- Search Price List on page 465
- Price List Price Items on page 468
- Price Item Pricing on page 470
- Price Assignment Tree on page 475

Through this screen, you can navigate to the following screens:

- Price List Price Item Pricing on page 504

- Price List Assignments on page 563
- Entities Eligible for Price List Assignment on page 565
- Price Item Pricing (Used for Viewing) on page 670

Search Price List

The **Search Price List** zone allows you to search for a price list using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price list using the price list details. The valid value is: • Price List Details **Note:** By default, the **Price List Details** option is selected.	Yes
Price List ID	Used to search a particular price list.	No
Price List Description	Used to search price lists with a particular description.	No
Effective Start Date	Used to search price lists which are effective from a particular date onwards. **Note:** You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	No
Effective End Date	Used to search price lists which are effective till a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	No
Price List Type	Used to search price lists which belong to a particular type. The valid values are: • Promotional • Standard **Note:** By default, the **Standard** option is selected.	No
Global Price List	Used to indicate whether you want to search global price lists. The valid values are: • Yes • No	No
Availability Start Date	Used to search price lists which are available for assignment to an account or a person from a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you click the **Advanced Search** link in the top right corner of this zone.	
Availability End Date	Used to search price lists which are available for assignment to an account or a person till a particular date. **Note:** This field appears when you click the **Advanced Search** link in the top right corner of this zone. You can either manually specify the date or select it using the **Date Picker** (icon) corresponding to the field.	No
Status	Used to search price lists with a particular status. The valid values are: • Active • Inactive • Proposed • Template **Note:** This field appears when you click the **Advanced Search** link in the top right corner of this zone. You can either manually specify the date or select it using the **Date Picker** (icon) corresponding to the field.	No
Division	Used to search price lists which are associated with a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list.	No
Parent Price List	Used to search price lists which inherit pricing from a particular parent price list. **Note:** The **Search** (icon) appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** window appears where you can search for the respective parent price list. This field appears when you click the **Advanced Search** link in the top right corner of this zone.	No

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List Effective Date	Used to search price lists that inherit pricing from a particular parent price list which is effective from a particular date onwards. **Note:** This field appears when you click the **Advanced Search** link in the top right corner of this zone. You can either manually specify the date or select it using the **Date Picker** (icon) corresponding to the field.	No

Note: You must specify at least one search criterion while searching for a price list.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays the concatenated string of information about the price list separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Status	Indicates the current status of the price list. The valid values are: • Active • Inactive • Proposed • Template
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.
Copy	On clicking the **Duplicate** (icon) icon, the **Price List** screen appears where you can create a new price list using an existing price list.
Price List Pricing	On clicking the **View** (icon) icon in the **Price List Pricing** column, the **Price List Price Item Pricing** screen appears where you can view and edit a list of price items pricing information assigned to the price list.
Price List Assigned To	On clicking the **View** (icon) icon in the **Price List Assigned To** column, the **Price List Assignments** screen appears where you can view the details of the persons and accounts to which the price list is assigned.
Eligible Accounts/Persons	On clicking the **View** (icon) icon in the **Eligible Accounts/Persons** column, the **Entities Eligible for Price List Assignment** screen appears where you can search for a list of eligible accounts and persons to which you want to assign the price list in a particular division.

Note:

However, when you search for a price list by specifying the date (which can be current, past or future date) in the **Parent Price List Effective Date** field, the system retrieves the price lists that meet the search criteria along with the details of the parent price list that is effective on that date.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (⧩) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the **Price List Information** field, the **Price List Price Items** zone appears where you can view a list of price items to which the price list is assigned.

Price List Price Items

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a comma (,) for the price list. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the pricing information of the respective price list.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Used to specify multiple parameters based on which you want to determine the pricing utilization. **Note:** This column appears only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Pricing Status	Displays the status of pricing for the price item. The valid values are: • Draft

Column Name	Column Description
	• Active • Inactive • Proposed • Rejected • Template • Recommended
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the **Rate Info** column. However, if the price assignment has more than one price components, then the **Rate Info** column contains a string indicating the tiering type and pricing currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the **Price Item Pricing** screen.
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Copy	On clicking the **Duplicate** (⧉) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing using an existing price item pricing.

By default, the **Price List Price Items** zone does not appear in the **Price List** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the price list in the **Search Price List** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the **Pricing Information** field, the **Price Item Pricing** and **Pricing Structure** zones appear where you can view the details about the price item pricing and its structure.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Price Item Pricing

The **Price Item Pricing** zone displays the details of the price item pricing. It contains the following sections:

- **Pricing Information** - Displays basic information about the pricing of the price item. It contains the following fields:

Field Name	Field Description
Start Date	Displays the date from when the pricing of the price item is effective.
End Date	Displays the date till when the pricing of the price item is effective.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to**Fees**. • **Post Processing - Price Item Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • **Regular** - Indicates that the pricing is used to generate regular bill segment. **Note:** This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. By default, the **Regular** option is selected in the **Bundle Type** field for price item which are applicable for **Pricing** and cannot be edited. The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type.
Pricing Eligibility	Indicates whether the price item pricing is eligible for pricing assignment or not.
Pricing Status	Indicates the pricing assignment status of the price item pricing. The valid values are:

Field Name	Field Description
	• Draft • Active • Inactive • Proposed • Rejected • Template • Recommended
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the currency.
Rate Schedule	Indicates the rate schedule that is used to define the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the rate schedule.
Pricing Rule Type	Indicates the pricing rule type. The valid value is: • Two-Dimensional
Print Zero	Indicates the zero pricing displayed in the bill. The valid values are: • Yes • No
Price Assignment Usage	Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • All Customers • New Customers

- **Deal Information** - Displays the average price floor and ceil type defined in a price item pricing. It contains the following fields:

Field Name	Field Description
Average Price Floor and Ceil Limits	Indicates the manner in which you want to define the average price floor and ceil limits of the price item or price item bundle in a deal. The valid values are: • Absolute Value Range • Spread Amount • Spread Percentage

- **TFM Information** - Displays the transactions mapped to the price item pricing. It contains the following fields:

Field Name	Field Description
Ignore Transaction	Indicates whether the transactions mapped to the price item pricing is considered for billing or not. The valid values are: • Yes • No
Do Not Aggregate Switch	Indicates whether the transactions mapped to the price item pricing is aggregated for billing or not. The valid values are:

Field Name	Field Description
	• Yes • No
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions **Note:** This field appears when the **Do Not Aggregate Switch** is set to **No**.

Note:

The **TFM Information** section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1_FM feature configuration** is set to **Y** and **Price Item Usage** field is set to **Pricing and Billing**.

The **TFM Information** section does not appear when the **Price Item Usage** field is set to **Only Pricing** and the **Price Item Type** field is set to **Fees**, then, only the **Pricing Frequency** field appears.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Price Item and Parameter Information** - Displays the parameter details for the price item pricing. It contains the following field:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle whose pricing details are listed in this section. **Note:** It has a link. On clicking the link, the **Price Item** screen appears with the details of the respective price item.

In addition, this section contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
Parameter Value	Displays the parameter value.

- **Division-Specific Floor & Ceil For Price Item** - Lists the average price floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates that the users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Ceil Value	Displays the ceil (i.e. upper) limit of the To Do role. **Note:** This column appears when the **Absolute Value Range** option is selected for the **Average Price Floor and Ceil Type** list for a price item or price item bundle.
Floor Value	Displays the floor (i.e. lower) limit of the To Do role. **Note:** This column appears when the **Absolute Value Range** option is selected for the **Average Price Floor and Ceil Type** list for a price item or price item bundle.
Spread Amount	Indicates the spread amount specified while defining a price item or price item bundle or assigned to a To Do role. **Note:** This column appears when the **Spread Amount** option is selected for the **Average Price Floor and Ceil Type** list for a price item or price item bundle.
Spread Percentage	Indicates the spread percentage specified while defining a price item or price item bundle or assigned to a To Do role. **Note:** This column appears when the **Spread Percentage** option is selected for the **Average Price Floor and Ceil Type** list for a price item or price item bundle.
Currency Code	Indicates the currency in which the average price floor and ceil limits are defined for the price item or price item bundle. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Division	Indicates the division to which the price item belongs. **Note:** It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.

- **Negotiability** - Lists the negotiability floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Division	Indicates the division to which the price item belongs.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.
Ceil Value	Indicates the ceil (i.e. lower) limit for the rate negotiation.
Floor Value	Indicates the floor (i.e. lower) limit for the rate negotiation.

- **Division-Specific SQIs for Price Item** - Lists the SQIs associated with the price item pricing for a particular division. It contains the following columns:

Column Name	Column Description
SQI	Displays the Service Quantity Identifier (SQI) associated with the price item or price item bundle for a division.
Daily Service Quanity	Displays the SQI value which is calculated using the transaction aggregation rule defined for the price item - division combination.
Usage Period	Displays the period for which you want to aggregate the deal data to determine the scope of the deal.
Division	Indicates the division to which the price item belongs.

- **Division-Specific Cost for Price Item** - Lists the costs of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Cost Type	Indicates the type of cost incurred in the division for the price item or price item. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal • Fixed Third Party • Variable Internal • Variable Third Party
Cost Value	Displays the cost amount.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item pricing is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Price Item Pricing** zone does not appear in the **Price List** screen. It appears when you click the **Broadcast** ( ) icon corresponding to the price item pricing in the **Price List Price Item** zone.

Price Assignment Tree

The **Price Assignment Tree** zone displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details.

It also allows you to do the following:

- Define, edit, copy, or delete the price component of the rate component

  Note: You can define, edit, copy, or delete the price component of the rate component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.
- Define, edit, copy, or delete the tiering criteria of the price component

  Note: You can define, edit, copy, or delete the tiering criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.
- Define, edit, copy, or delete the pricing eligibility criteria of the price component

  Note: You can define, edit, copy, or delete the pricing eligibility criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.

The **Price Assignment Tree** zone contains the following buttons:

Button Name	Button Description
Expand All	On clicking the **Expand All** button, all nodes in the price assignment tree are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price assignment tree are collapsed at once.

In addition, the **Price Assignment Tree** zone contains the following section:

- **Pricing & Commitment Details** - Displays the pricing and commitments information associated with the price item.

Note: You cannot define, edit, copy, or delete a price component when you are accessing the **Price Assignment Tree** zone in the **Pricing (Person)**, **Pricing (Account)**, or **Price List** screen.

Searching for a Price List

Prerequisites

To search for a price list, you should have:

- Divisions defined in the application
- Price list associated with the division to which the user belongs

Procedure

To search for a price list:

1. Click the **Menu** (☰) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.
   A sub-menu appears.
3. Click the **Search** option from the **Price List** sub-menu.
   The **Price List** screen appears.
4. Enter the search criteria in the **Search Price List** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of price lists that meet the search criteria appears in the **Search Results** section.

   Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Defining a Price List

Procedure

To define a price list:

1. Click the **Menu** (☰) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.
   A sub-menu appears.
3. Click the **Add** option from the **Price List** sub-menu.

   The **Price List** screen appears. It consists the following sections:

   - **Main** - Used to specify basic details about the price list.
   - **Hierarchy** - Used to associate the price list with one or more parent price lists for a particular duration.
   - **Divisions** - Used to associate the price list with one or more divisions.
   - **Eligibility** - Used to define eligibility criteria for the price list.
   - **Characteristics** - Used to define the characteristics for the price list.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective. **Note:** By default, the current date appears in this field. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes
Effective End Date	Used to specify the date till when the price list is effective. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Price List Type	Used to indicate the type of the price list. The valid values are: • Standard • Promotional	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: By default, the **Standard** option is selected.	
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: • Yes • No	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person. **Note:** At present, the availability start date is not used in the price item while assigning a price list to an account or a person. It is available for future use. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person. **Note:** The availability end date cannot be earlier than the availability start date. At present, the availability end date is not used in the price item while assigning a price list to an account or a person. It is available for future use. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or commitments at the time of deal pricing.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No
Status	Used to indicate the status of the price list. The valid values are: • **Active** - Used to indicate that the price list can be used for pricing and billing. • **Inactive** - Used to indicate that the price list is no longer available for pricing and billing.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Proposed** - Used to indicate that the price list is used for quotations. • **Template** - Used to indicate that the price list is a template price list. **Note:** By default, the **Active** option is selected.	

Tip: Alternatively, you can access the **Price List** screen by clicking the **Add** button in the **Page Title** area of the **Price List** screen.

4. Enter the required details in the **Main** section.

Note: By default the **Main** section is displayed.

5. Associate the price list with one or more parent price list, if required.
6. Associate price list with one or more divisions, if required.
7. Define eligibility criteria for the price list, if required.
8. Define characteristics for the price list, if required.
9. Click **Save**.

Note:

The price list ID is generated automatically when the price list is created.

You can expand all the sections at once by clicking the **Show All** link in the **Section** pane.

Defining the Price List Hierarchy

Prerequisites

To define the price list hierarchy, you should have:

- Parent price lists defined in the application

Oracle Revenue Management and Billing allows you to define the price list hierarchy. It helps you to inherit the price item pricing from the parent price list if the price item pricing is not available in the price list (assigned to the account, person, or parent person). And, if the price item pricing is not available in the parent price list, the system will search for the price item pricing in the parent's parent price list (i.e. in the grandparent price list) and continue till it reaches the last level in the hierarchy.

In other words, when you define the price list hierarchy and assign the price list to an account or a person, the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. However, if the price item pricing is available on both the assigned and parent price lists, the system derives the price item pricing from the assigned price list.

You can define multiple parent price lists for a price list. But, only one parent price list is effective for a particular duration. Two or more price lists can have the same parent price list.

Procedure

To define the price list hierarchy:

1. Click the **Hierarchy** or **Show All** link from the **Section** pane when you are defining, editing, or copying a price list.

   The **Hierarchy** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List Effective From Date	Used to specify the date from when the price list inherits pricing from the parent price list. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when you are associating the price list with a parent price list.
Parent Price List Effective To Date	Used to specify the date till when the price list inherits pricing from the parent price list. **Note:** The parent price list effective to date cannot be earlier than the parent price list effective from date and later than price list effective end date. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Parent Price List	Used to specify the parent price list ID to which you want to associate the price list. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** window appears. On specifying the parent price list, the description of the parent price list appears corresponding to the **Parent Price List** field.	Yes (Conditional) **Note:** This field is required when you are associating the price list with a parent price list.

2. Enter the required details in the **Hierarchy** section.

   Note: You can search for a price list by clicking the **Search** (🔍) icon corresponding to the **Parent Price List** field.

3. If you want to associate the price list with more than one parent price list, click the **Add** (+) icon corresponding to the parent price list and then repeat *s*tep 2.

   Note:

   You can associate a price list with multiple parent price lists. But, only one parent price list is effective for a particular duration. Also, while associating a price list with a parent price list, you can only specify a price list which is effective during the specified duration.

If you want to remove a parent price list from the price list hierarchy, click the **Delete** (🗑) icon corresponding to the parent price list.

4. Click **Save**.
   The price list is associated with the parent price lists.

Defining a Characteristic for a Price List

Prerequisites

To define a characteristic for a price list, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List**)

Procedure

To define a characteristics for a price list:

1. Click the **Characteristics** or **Show All** link from the **Section** pane when you are defining, editing, or copying a price list.

   The **Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the price list.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Price List**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the price list.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the price list.

Field Name	Field Description	Mandatory (Yes or No)
	value appears corresponding to the **Characteristic Value** field.	

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price list, click the **Add** (+) icon and then repeat *s*tep 2.

Note: However, if you want to remove a characteristic from the price list, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.
The characteristics are defined for the price list.

Associating a Price List with a Division

You can assign a price list only to those accounts or persons which belong to the division to which the price list is associated. Therefore, you need to associate the price list with appropriate divisions.

Prerequisites

To associate a price list with a division, you should have:

- Divisions defined in the application

Procedure

To associate a price list with a division:

1. Click the **Divisions** or **Show All** link from the **Section** pane when you are defining, editing, or copying a price list.

   The **Divisions** section appears. It contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the price list. **Note:** You can only view those divisions to which you have access in the **Division** list.	No

2. Select the required division from the list.
3. If you want to associate the price list with more than one division, click the **Add** (+) icon corresponding to the division and then repeat step *2*.

Note: However, if you want to remove the price list from a division, click the **Delete** (🗑) icon corresponding to the division.

4. Click **Save**.
The price list is associated with the divisions.

Tip: Alternatively, you can associate a price list with a division using the **Division** screen.

Defining Eligibility Criteria for a Price List

Prerequisites

To define eligibility criteria for a price list, you should have:

- Parameters defined in the application where the **Price List Eligibility Criteria** option is selected.

Procedure

To define eligibility criteria for a price list:

1. Click the **Eligibility** or **Show All** link from the **Section** pane when you are defining, editing, or copying a price list.

   The **Eligibility** section appears. It contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Criteria	On clicking the **Add** (+) icon, you can define an eligibility criteria for a price list.	Yes (Conditional) **Note:** This field is required when you are defining an eligibility criteria for the price list.
Effective Start Date	Used to specify the date from when the criteria is effective for the price list. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when you are defining an eligibility criteria for the price list.
Effective End Date	Used to specify the date till when the criteria is effective for the price list. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Description	Used to specify the description for the criteria type.	Yes

2. Enter the required details in the **Eligibility** section.
3. If you want to define more than one eligibility criteria for the price list, click the **Add** (+) icon and then *r*epeat step *2*.

Note: However, if you want to remove the eligibility criteria, click the **Delete** (🗑) icon corresponding to the criteria.

4. Click the **Add** (⊕) icon in the **Criteria** column to associate eligibility criteria of parameters for the price list.

   The following fields appear in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Display Sequence	Used to indicate the order in which the price list eligibility criteria should be executed.	Yes
Parameter	Used to indicate the parameter (on the left hand side) which is used in the pricing eligibility criteria. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective parent price list.	Yes
Operator	Used to specify the relational operator to define the relation between the parameter name and value. The valid values are: • < • <= • <> • = • > • >= • Between • In • Like • Not In	Yes
Parameter Value Type	Used to indicate whether the parameter (on the left hand side) must be compared against another parameter (on the right hand side) or directly against a parameter value. The valid values are: • Parameter • Value	Yes
Parameter	Used to indicate the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side). **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective parent price list.	Yes
Parameter Value	Used to indicate the parameter value against which you want to compare the parameter (on the left hand side).	Yes

Column Name	Column Description	Mandatory (Yes or No)
Is True	Used to indicate what should happen when the condition is true (satisfied). The valid values are: • **Check Next Condition** - Used to indicate that the condition with consecutive sequence number should be executed. • **Rule Is False** - Used to indicate that the action specified in the **Rule False Action** field should be executed • **Rule Is True** - Used to indicate that the action specified in the **Rule True Action** field should be executed.	Yes
Is False	Used to indicate what should happen when the condition is false (not satisfied). The valid values are: • **Check Next Condition** - Used to indicate that the condition with consecutive sequence number should be executed. • **Rule Is False** - Used to indicate that the action specified in the **Rule False Action** field should be executed • **Rule Is True** - Used to indicate that the action specified in the **Rule True Action** field should be executed.	Yes
Is Insufficient	Used to indicate what should happen when the data is insufficient. The valid values are: • **Check Next Condition** - Used to indicate that the condition with consecutive sequence number should be executed. • **Rule Is False** - Used to indicate that the action specified in the **Rule False Action** field should be executed • **Rule Is True** - Used to indicate that the action specified in the **Rule True Action** field should be executed.	Yes

5. Enter the required details for the **Eligibility Criteria Parameters** in the **Eligibility Criteria** section.

   Note: You can search for a parameter by clicking the **Search** (🔍) icon appears corresponding to the respective field.

6. If you want to define more than one parameter with eligibility-criteria for the price list, click the **Add** (+) icon *a*nd then repeat step 3.

   Note: However, if you want to remove a parameter with eligibility-criteria from the price list, click the **Delete** (🗑) icon corresponding to it.

7. Click **Save**.
   The eligibility criteria are defined for the price list.

Copying a Price List

Instead of creating a price list from scratch, you can create a new price list using an existing price list. This is possible through copying a price list. On copying a price list, the details including the pricing parameters, divisions, characteristics, eligibility criteria, and the assigned price items are copied to the new price list. You can then edit the details, if required.

Prerequisites

To copy a price list, you should have:

- Price list (whose copy you want to create) defined in the application
- Price list (whose copy you want to create) associated with the division to which the user belongs

Procedure

To copy a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Copy** (⧉) icon in the **Copy** column corresponding to the price *l*ist using which you want to define a new price list.

   The **Price List** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price list.
   - **Hierarchy** - Used to define parent price list for the price list for a particular duration.
   - **Divisions** - Used to associate price list with one or more divisions.
   - **Eligibility Criteria** - Used to define eligibility criteria for price list.
   - **Characteristics** - Used to define the characteristics (which are applicable across divisions) for the price list.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes
Effective End Date	Used to specify the date till when the price list is effective. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Price List Type	Used to indicate the type of the price list. The valid values are: • Standard	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Promotional	
Global Price List	Used to Indicate whether the price list is a global price list. The valid values are: • Yes • No	Yes
Availability Start Date	Used to specify the date from when the price list is available for assignment to an account or a person. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
Availability End date	Used to specify the date till when the price list is available for assignment to an account or a person. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or commitments at the time of deal pricing.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	Yes
Status	Used to indicate the status of the price list. The valid values are: • Active • Inactive • Proposed • Template	Yes
Copy Pricing	Used to indicate whether you want to copy the pricing information to the price list. The valid values are: • All • None	Yes (Conditional)

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the parent price list details, if required.
5. Associate or disassociate the price list from the required divisions.
6. Define, edit, or remove the price list eligibility criteria and parameter eligibility criteria for price list in the, if required.
7. Define, edit, or remove characteristics of the price list, if required.
8. Click **Save**.
   The new price list is defined.

Note:

The price list ID is generated automatically when the price list is defined.

You can expand all the sections at once by clicking the **Show All** link in the **Section** pane.

Viewing the Price List Details

Procedure

To view the details of a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the link in the **Price List Information** column corresponding to *t*he price list whose details you want to view.

   The **Price List** screen appears. It contains the following zones:

   - Price List on page 489
   - Eligibility Criteria on page 491
   - Price List Price Items on page 468
   - Price Item Pricing on page 494
   - Price Assignment Tree on page 475
3. View the basic details, hierarchy, divisions, and characteristics of the price list in the **Price List** zone.
4. View the eligibility criteria to which the price list is associated in the **Eligibility Criteria** zone.
5. View the price items that are assigned to the price list in the **Price List Price Items** zone.
6. View the price item pricing assigned to the price list in the **Price Item Pricing** and **Price Assignment Tree** zones.

Viewing Accounts and Persons Eligible for Price List Assignment

Prerequisites

To view accounts and persons eligible for price list assignment, you should have:

- Accounts and Persons created in the application.
- Price list defined in the application

Procedure

To view accounts and persons eligible for price list assignment:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Eligible Accounts/Persons** (🔗) icon in the **Eligible Accounts/Persons** column corresponding to the price list whose details you want to view.
   The **Entities Eligible for Price List Assignment** screen appears.
3. View the accounts eligible for the price list assignment in the **Eligible Accounts** zone.
4. View the persons eligible for the price list assignment in the **Eligible Persons** zone.

Price List (Used for Viewing)

The **Price List** screen allows you to view the details of a price list. It also allows you to edit a price list. It contains the following zones:

- Price List on page 489
- Eligibility Criteria on page 491
- Price List Price Items on page 468
- Price Item Pricing on page 470
- Price Assignment Tree on page 475

Price List

The **Price List** zone displays the details of the price list. It contains the following sections:

- **Main** - Displays basic information about the price list. It contains the following fields:

Field Name	Field Description
Price List ID	Displays the price list ID.
Price List Description	Displays the description for the price list.
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Price List Type	Indicates the type of the price list. The valid values are: • Standard • Promotional
Global Price List	Indicates whether the price list is a global price list. The valid values are: • Yes • No
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End date	Displays the date till when the price list is available for assignment to an account or a person.
Available for Deal Pricing	Indicates whether the price list can be assigned with a person or an account.
Standard for Deal Pricing	Indicates whether the price list can be considered to compare the average floor and ceil limit with the standard and avergae price of a price item associated with a price lisr.
Validity Period (in Days)	Displays the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.
Status	Indicates the status of the price list. The valid values are: • **Active** - Indicates that the price list is used for billing. • **Inactive** - Indicates that the price list is no longer used for billing. • **Proposed** - Indicates that the price list is used for quotations. • **Template** - Indicates that the price list is a template price list.

- **Hierarchy** - Lists the parent price list from which the price list has inherited the price item pricing for a particular duration. It contains the following columns:

Column Name	Column Description
Parent Price List	Displays the ID of the parent price list.
Parent Price List Effective From Date	Displays the date from when the price list can inherit pricing from the parent price list.
Parent Price List Effective To Date	Displays the date till when the price list can inherit pricing from the parent price list.

- **Divisions** - Lists the divisions to which the price list is associated. It contains the following column:

Column Name	Column Description
Division	Displays the division to which the price list is associated.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.

- **Characteristics** - Lists the characteristics that are associated with the price list. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price list.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

- **Record Actions** - This section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price list.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price list is created. In addition, a context menu ( ) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Eligibility Criteria

The **Eligibility Criteria** zone lists the eligibility criteria of the price list. It contains the following columns:

Field Name	Field Description
Effective Start Date	Displays the date from when the criteria is effective for the price list.
Effective End Date	Displays the date till when the criteria is effective for the price list.
Description	Displays the description for the criteria type.
Sequence	Indicates the order in which the price list eligibility criteria should be executed.
Parameter	Indicates the parameter (on the left hand side) is used in the pricing eligibility criteria. **Note:** It has a link. On clicking the link, the **Parameter** screen appears with the details of the respective parameter.

Field Name	Field Description
Operator	Displays the relational operator to define the relation between the parameter name and value. The valid values are: • < • <= • <> • = • > • >= • Between • In • Like • Not In
Parameter Value Type	Indicates whether the parameter (on the left hand side) must be compared against another parameter (on the right hand side) or directly against a parameter value. The valid values are: • Parameter • Value
Parameter	Indicates the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side).
Parameter Value	Indicates the parameter value against which you want to compare the parameter (on the left hand side).
Is True	Indicates what happens when the condition is true (satisfied). The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number should be executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field should be executed • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field should be executed.
Is False	Indicates what happens when the condition is false (not satisfied). The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number should be executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field should be executed • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field should be executed.
Is Insufficient	Indicates what happens when the data is insufficient. The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number should be executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field should be executed • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field should be executed.

Price List Price Items

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a comma (,) for the price list. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the pricing information of the respective price list.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Used to specify multiple parameters based on which you want to determine the pricing utilization. **Note:** This column appears only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Pricing Status	Displays the status of pricing for the price item. The valid values are: • Draft • Active • Inactive • Proposed • Rejected • Template • Recommended
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the **Rate Info** column. However, if the price assignment has more than one price components, then the **Rate Info** column contains a string indicating the tiering type and pricing currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the **Price Item Pricing** screen.
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • Regular • Post Processing

Column Name	Column Description
	• Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Copy	On clicking the **Duplicate** (⧉) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing using an existing price item pricing.

By default, the **Price List Price Items** zone does not appear in the **Price List** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the price list in the **Search Price List** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the **Pricing Information** field, the **Price Item Pricing** and **Pricing Structure** zones appear where you can view the details about the price item pricing and its structure.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Price Item Pricing

The **Price Item Pricing** zone displays the details of the price item pricing. It contains the following sections:

- **Pricing Information** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Start Date	Displays the date from when the pricing of the price item is effective.
End Date	Displays the date till when the pricing of the price item is effective.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account and as a result, the post processing bill segment is generated on the invoice account.

Field Name	Field Description
	Note: This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. • **Post Processing - Price Item Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • **Regular** - Indicates that the pricing is used to generate regular bill segment.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item or not.
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Active** - Indicates that the price assignment can be used for pricing and billing. • **Inactive** - Indicates that the price assignment is no longer available for pricing and billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for deal simulation and awaiting approval. • **Rejected** - Indicates that the price assignment is rejected in the system. • **Template** - Indicates that the price assignment is created as a template. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for deal simulation by the deal approver to the relationship manager.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Rate Schedule	Indicates the rate schedule that is used to define the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the respective rate schedule.
Pricing Rule Type	Indicates the pricing rule type. The valid value is: • Two-Dimensional **Note:** If you select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define two-dimensional pricing for the price item.

Field Name	Field Description
	However, if you do not select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define traditional flat, step, or tiered pricing for the price item. Also, you need to select the **Pricing Eligibility** option while defining a two-dimensional pricing for the price item.
Print Zero	Indicates whether the zero pricing is displayed in the bill. The valid values are: • Yes • No
Price Assignment Usage	Indicates whether the price item pricing is applicable for all customers or only for the new customers. The valid values are: • All Customers • New Customers **Note:** This field appears when you are viewing the details of a price item pricing assigned to a price list.
Pricing Frequency	Indicates the pricing frequency for the price item. **Note:** This field appears when the **Price Item Usage** is set to **Pricing** and the **Price Item Type** is set to **Fees** while defining the price item.

- **Deal Information** - Displays information about how the average price floor and ceil limits of the price item pricing is mapped to a deal. It contains the following field:

Field Name	Field Description
Average Price Floor and Ceil Limits	Indicates the manner in which the average price floor and ceil limits of the price item pricing is defined for the deal. The valid values are: • **Absolute Value Range** - Indicates that the average price floor and ceil limits for the price item pricing is defined using absolute values. • **Spread Amount** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread amount. • **Spread Percentage** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread percentage. **Note:** In case of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage the average floor and ceil limits are derived.

- **TFM Information** - Displays the transaction feed management information mapped to the price item pricing. It contains the following fields:

Field Name	Field Description
Ignore Transaction	Indicates whether the transactions mapped to the price item pricing are considered for billing or not. The valid values are: • Yes • No

Field Name	Field Description
Do Not Aggregate Switch	Indicates whether aggregation is required while rating the transactions mapped to the price item pricing before billing. The valid values are: • **Yes** - Indicates that aggregation is not required while rating the transactions mapped to the price item pricing before billing. • **No** - Indicates that aggregation is required while rating the transactions mapped to the price item pricing before billing.
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item pricing are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions **Note:** This field appears when the **Do Not Aggregate Switch** is set to **No**.

Note:

TFM Information section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1_FM feature configuration** is set to **Y** and the **Price Item Usage** field is set to **Pricing and Billing** while defining the price item.

Price Item and Parameter Information - Lists the parameters based on which the price item pricing is defined. It contains the following field:

Field Name	Field Description
Price Item	Displays the concatenated string of information about the price item or price item bundle for which the pricing is defined separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the price item.

In addition, the **Price Item and Parameter Information** section contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter using which the price item pricing is defined in the system.

Column Name	Column Description
Parameter Value	Displays the value of the parameter.

- **Division-Specific SQIs for Price Item** - Lists the SQIs associated with the price item pricing for a particular division. It contains the following columns:

Column Name	Column Description
SQI	Displays the SQI associated with the price item for pricing. **Note:** It has a link. On clicking the link, the **Service Quantity Identifier** screen appears where you can view the details of the respective SQI.
Daily Service Quantity	Displays the SQI usage for a single day.
Usage Period	Displays the duration for which the SQI is associated with the price item for pricing.
Division	Indicates the division for which the SQI is associated with the price item for pricing.

- **Division-Specific Cost for Price Item** - Lists the cost of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Cost Type	Indicates the type of cost incurred in the division for the price item pricing. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal • Fixed Third Party • Variable Internal • Variable Third Party
Cost Value	Displays the cost amount.

Note: By default, the **Pricing Currency** is considered as the currency code in which the cost is specified.

- **Division-Specific Floor & Ceil for Price Item** - Lists the average price floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates the users with the specified To Do role who can approve the average price of the price item in the price item pricing when it is within the specified floor and ceil limits. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Ceil Value	Displays the ceil (i.e. upper) limit for the To Do role to approve the average price of the price item. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.

Column Name	Column Description
Floor Value	Displays the floor (i.e. lower) limit for the To Do role to approve the average price of the price item. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Currency Code	Indicates the currency in which the average price floor and ceil limits are defined for the price item pricing. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Spread Amount	Displays the spread amount of the To Do role for approving the average price of the price item. **Note:** This column appears when the **Spread Amount** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Spread Percentage	Displays the spread percentage of the To Do role for approving the average price of the price item. **Note:** This column appears when the **Spread Percentage** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Division	Indicates the division for which the average price floor and ceil values of the price item is defined.

- **Negotiability** - Lists the negotiability floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the negotiability floor and ceil limits of the price item pricing is defined.
Ceil Value	Displays the ceil (i.e. upper) limit for the rate negotiation.
Floor Value	Displays the floor (i.e. lower) limit for the rate negotiation.

Note: By default, the pricing currency is considered as the currency code in which the negotiability floor and ceil limits of the price item pricing is defined.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item pricing is defined in the system. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Price Assignment Tree

The **Price Assignment Tree** zone displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details.

It also allows you to do the following:

- Define, edit, copy, or delete the price component of the rate component

  Note: You can define, edit, copy, or delete the price component of the rate component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.
- Define, edit, copy, or delete the tiering criteria of the price component

  Note: You can define, edit, copy, or delete the tiering criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.
- Define, edit, copy, or delete the pricing eligibility criteria of the price component

  Note: You can define, edit, copy, or delete the pricing eligibility criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.

The **Price Assignment Tree** zone contains the following buttons:

Button Name	Button Description
Expand All	On clicking the **Expand All** button, all nodes in the price assignment tree are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price assignment tree are collapsed at once.

In addition, the **Price Assignment Tree** zone contains the following section:

- **Pricing & Commitment Details** - Displays the pricing and commitments information associated with the price item.

Note: You cannot define, edit, copy, or delete a price component when you are accessing the **Price Assignment Tree** zone in the **Pricing (Person)**, **Pricing (Account)**, or **Price List** screen.

Editing a Price List

Procedure

To edit a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the link in the **Price List Information** column corresponding to the price list whose details you want to edit.
   The **Price List** screen appears.
3. Click the **Edit** button in the **Price List** zone.

   The **Price List** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price list.
   - **Hierarchy** - Used to define parent price list to inherit price item pricing for the price list for a particular duration.
   - **Divisions** - Used to associate price list with one or more divisions.
   - **Eligibility Criteria** - Used to define eligibility criteria for the price list.
   - **Characteristics** - Used to define the characteristics (which are applicable across divisions) for the price list.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective. **Note:** The system will not allow you to change the effective start date when: • There is a price item assigned to the price list on that date.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• The price list is assigned to an account or a person on that date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
Effective End Date	Used to specify the date till when the price list is effective. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Price List Type	Used to indicate the type of the price list. The valid values are: • Standard • Promotional	Yes
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: • Yes • No	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person. **Note:** At present, the availability start date is not used in the product while assigning a price list to an account or a person. It is available for future use. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person. **Note:** The availability end date cannot be earlier than the availability start date. At present, the availability end date is not used in the product while assigning a price list to an account or a person. It is available for future use.	No

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No
Status	Used to indicate the status of the price list. The valid values are: • **Active** - Used to indicate that the price list is used for billing. This value appears when you are editing a proposed price list • **Proposed** - Used to indicate that the price list is used for quotations. • **Template** - Used to indicate that the price list is a template price list. **Note:** You cannot change the status of an active and a template price list.	Yes

4. Modify the details in the **Main** section, if required.

   Note: By default the **Main** section is displayed.

5. Add, edit or remove parent price list from the price list hierarchy, if required.
6. Associate or disassociate the price list from the divisions, if required.

   Note: You can only view those divisions to which you have access in the **Division** list. If the price list is associated to a division to which you do not have access, then the **Divisions** section is grayed out.

7. Define, edit, or remove eligibility criteria from the price list, if required
8. Define, edit, or remove characteristics of the price list, if required.
9. Click **Save**.
   The changes made to the price list are saved.

   Note: You can expand all the sections at once by clicking the **Show All** link in the **Section** pane.

Price List Price Item Pricing

Once a price list is created, you can either assign a price item to the price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to the price list. The **Price List Price Item Pricing** screen allows you to:

- View and filter the price items that are assigned to the price list
- Search and assign price items to the price list
- Copy a price item pricing and assign it to the price list

The **Price List Price Item Pricing** screen contains the following zones:

- Price List Price Items on page 504
- Search Price Item or Price Item Pricing on page 506

Price List Price Items

The **Price List Price Items** zone lists the price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string of information about the price item pricing separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of the respective price item pricing.
Price Item	Displays the price item or price item bundle associated with the price list.
Pricing Parameters	Displays a comma-separated list of parameter values based on which the pricing is defined for the price item. The order in which the parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item).
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • **Active** - Indicates that the price assignment is used for billing. • **Draft** - Indicates that the price assignment is created as a draft. • **Inactive** - Indicates that the price assignment is no longer used for billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Rejected** - Indicates that the price assignment is rejected. • **Template** - Indicates that the price assignment is a template price list. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal.
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the **Rate Info** column.

Column Name	Column Description
	However, if the price assignment has more than one price components, then the **Rate Info** column contains a string indicating the tiering type and pricing currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the **Price Item Pricing** screen.
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. • **Post Processing - Price Item Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • **Regular** - Indicates that the pricing is used to generate regular bill segment.
Edit	On clicking the **Edit** (✎) icon, the **Price Item Pricing** screen appears where you can edit the details of the price item pricing.
Delete	On clicking the **Delete** (🗑) icon, you can remove the price item pricing from the price list. **Note:** The **Delete** icon appears in this column only when the price list is not yet assigned to any account or person.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Search Price Item or Price Item Pricing

You can assign a price item or price item bundle to a price list and then define pricing for the price item or price item bundle, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item or Price Item Pricing** zone allows you to search for a price item pricing which is assigned to an account, person, or price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item or Price Item Pricing** zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search price item, pricing assigned to price list and override pricing for an account, or person. The valid values are: • Price Item Search • Price list Pricing • Account Override Pricing • Person Override Pricing • Standard Product Version • Packaged Product Version • Packaged Product Version-Add On Service	Yes
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description. **Note:** This field appears when you select the **Price Item** option from the **Search By** list.	No
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: • Yes • No	No
Bundle	Used to indicate whether you want to search for price item bundles. The valid values are: • Yes • No	No
Hierarchy Entity	Used to search for price item pricing for a particular hierarchy entity.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Hierarchy Entity Search** window appears where you can search for the respective hierarchy entity.	
Price List ID	Used to search pricing of price items or price item bundles which are assigned to a particular price list. **Note:** This field appears when you select the **Price List Pricing** option from the **Search By** list. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** window appears where you can search for the respective price list.	No
Effective Start Date	Used to search price item pricing on price lists which are effective from a particular date onwards. **Note:** This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Pricing Status	Used to search price item pricing with a particular status. The valid values are: • Active • Inactive • Draft • Proposed • Rejected • Template • Pending In Approval • Recommended **Note:** This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or	No

Field Name	Field Description	Mandatory (Yes or No)
	Person Override Pricing option from the **Search By** list.	
Effective End Date	Used to search price item pricing on price lists which are effective till a particular date. **Note:** This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** (icon) corresponding to the field.	No
Price Assignment Type	Used to search a particular type of the price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	No
Account ID	Used to search pricing of price items or price item bundles which are assigned to a particular account. **Note:** This field appears when you select the **Account Override Pricing** option from the **Search By** list.	Yes
Person ID	Used to search pricing of price items or price item bundles which are assigned to a particular person. **Note:** This field appears when you select the **Person Override Pricing** option from the **Search By** list.	Yes
Product Code	Used to search for the pricing of price items for a particular product. **Note:** The **Search** (icon) appears corresponding to this field. On clicking the **Search** icon, the **Product**	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Search window appears where you can search for the respective product. This field appears when you select the **Standard Product Version**, **Packaged Product Version**, or **Packaged Product Version-Add On Service** option from the **Search By** list.	
Effective Date	Used to search price item pricing on price lists which are effective from a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** () icon corresponding to the field. This field appears when you select the **Standard Product Version**, **Packaged Product Version**, or **Packaged Product Version-Add On Service** option from the **Search By** list.	No

Note:

You must specify at least one search criterion while searching for a price item or price item bundle.

You can search for an account, person by clicking the **Search** () icon corresponding to the respective field.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price items or price item bundles that are associated with the division to which the price list belongs. It may also include price items or price item bundles that are already assigned to the price list in case those price items or price item bundles match the search criteria.

  The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the **Assign** ( ) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing.
Price Item Information	Displays details of the price item or price item bundle. **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item or price item bundle.
Copy	On clicking the **Copy** ( ) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing using an existing price item pricing.
Pricing Information	Displays details of the price item pricing. **Note:** It has a link. On clicking the link, the **View Price Item Pricing** window appears with the details of the respective price item pricing.

Column Name	Column Description
Account Information	Indicates the account to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** This column appears when you select the **Account Override Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. The account information string appears when an algorithm defined using the **C1-AC-INFO** algorithm type is attached to the **Account Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
Person Information	Indicates the person to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** This column appears only when you select the **Person Override Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person. The person information string appears when an algorithm defined using the **PERS-INFO** algorithm type is attached to the **Person Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
Price List Information	Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** This column appears when you select the **Price List Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective person.
Variance Parameter	Indicates the variance parameter which is used for defining the price item pricing. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.
Pricing Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item or price item bundle). **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Effective Start Date	Displays the date from when the price item pricing is effective.

Column Name	Column Description
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Pricing Status	Indicates the status of the price item pricing. The valid values are: • Active • Inactive • Proposed • Rejected • Template • Recommended
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Price Assignment Usage	Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • AC • NC
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.
Price Item	Displays the price item or price item bundle code. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can define the pricing for the respective price item or price item bundle.
Description	Displays the description of the price item or price item bundle.
Global Price List	Indicates whether the price item or price item bundle can be assigned to a global price list. The valid values are: • Y • N
Unit of Measure	Indicates the unit of measure associated with the price item or price item bundle.
Bundle	Indicates whether the price item is a bundle or not. The valid values are: • Y • N
Owner ID	Displays the ID of the person for whose account the price list is created.
Party ID	Displays the third party ID.
Price List ID	Indicates the price list to which the price item pricing is assigned.

Column Name	Column Description
	Note: This column appears when you select the **Price List Pricing** option from the **Search By** list.
Price Assignment ID	Displays the price assignment ID.
Price Assignment Owner Type Flag	Displays whether price list or party is the owner of the price assignment.
Bundle Type	Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: • Phantom • Ratio • Regular However, if the price item bundle is available for only pricing and the price item type is **Fees** then the valid value is **Regular**. **Note:** This column appears when you select the **Yes** option from the **Bundle** list.
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: • Rate • Fees

Editing a Price Item Pricing of a Price List

Prerequisites

To edit a price item pricing of a price list, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

Procedure

To edit a price item pricing of a price list:

1. Do either of the following:

If you want to...	Then...
Edit pricing of a price item that is assigned to a price list from Price List screen	**a.** Search for the price list in the **Price List** screen. **b.** In the **Search Results** section of **Price List Price Items** zone, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to view. The **Price Item Pricing** screen appears. **c.** Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.
Edit pricing of a price item that is assigned to a price list from Price List Price Item Pricing screen	**a.** Search for the price list in the **Price List** screen. In the **Search Results** section, click the **Price List Pricing** (🔗) icon corresponding to the price list whose *d*etails you want to view. The **Price List Price Item Pricing** screen appears. **b.** Price items assigned to the price list appears in the **Price List Price Items** zone. **c.** You can edit the pricing item pricing through the following alternatives: **1.** First alternative, • In the **Search Results** section of **Price List Price Items** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit. The **Price Item Pricing** screen appears to edit the pricing details of a price item.

If you want to...	Then...
	2. Second alternative, • Search for a price item in the **Search Price Item or Price Item Pricing** zone. In the **Search Results** section, click the **Assign** ( ) icon corresponding to the price item. • Enter the required details in the **Price Item Pricing** screen and click **Save**. The **Price Item Pricing** screen appears. • Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item pricing.
- **Deal Information** - Used to indicate the average price floor and ceil type to define the floor and ceil *l*imits for the price item or price item bundle
- **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

  Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
- **Characteristics** - Used to define the characteristics for the price item pricing.
- **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.

  Note: This section appears when **Price Assignment Type** is **Regular**.
- **Commitments** - Used to indicate the basic details about the pricing and commitments such as costs, floor and ceil limits, and negotiability specific to a division.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** The effective start date cannot be later than the effective end date. If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range. This field will be in read-only mode when the price assignment has been used.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	Yes
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing. **Note:** This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Active** - Indicates that the price assignment is used for billing. • **Inactive** - Indicates that the price assignment is no longer used for billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Template** - Indicates that the price assignment is a template price list. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal. **Note:** If a price assignment is in **Active** status, you can change its status to **Inactive**. If a price assignment is in **Draft** status, you cannot change its status to **Proposed**.	
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are editing a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • All Customers • New Customers	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

2. Modify the details in the **Main** section, if required.

   Note:

   If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.

   While editing a price item pricing, you can not only edit the existing tiering combination details, but also add additional tiering combinations until the maximum tiering combinations limit is met.

   You can search for price item parameter, rate schedule and parameter code by clicking the **Search** (🔍) icon corresponding to the respective fields.
3. Edit the deal information in a price item pricing, if required.
4. Edit the TFM information in a price item pricing, if required.
5. Edit the characteristics for a price item pricing, if required.
6. Edit the parameters for a price item pricing, if required.
7. Edit the pricing commitments, if required.
8. Click **Save**.
   The changes made to the price item pricing are saved.

Assigning a Price Item to a Price List

Prerequisites

To assign a price item to a price list, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

Procedure

To assign a price item to a price list:

1. Do either of the following:

If you want to...	Then...
Define pricing of a price item that is assigned to a price list from Price List screen	**a.** Search for the price list in the **Price List** screen. **b.** In the **Search Results** section of **Price List Price Items** zone, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to view. The **Price Item Pricing** screen appears. **c.** Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.
Define pricing of a price item that is assigned to a price list from Price List Price Item Pricing screen	**a.** Search for the price list in the **Price List** screen. In the **Search Results** section, click the **Price List Pricing** (🔗) icon corresponding to the price list whose *d*etails you want to view. The **Price List Price Item Pricing** screen appears. **b.** Price items assigned to the price list appears in the **Price List Price Items** zone. **c.** You can edit the pricing item pricing through the following alternatives: **1.** First alternative, • In the **Search Results** section of **Price List Price Items** zone, click the **Edit** (🔗) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **2.** Second alternative,

If you want to...	Then...
	• Search for a price item in the **Search Price Item or Price Item Pricing** zone. In the **Search Results** section, click the **Assign** ( ) icon corresponding to the price item. • Enter the required details in the **Price Item Pricing** screen and click **Save**. The **Price Item Pricing** screen appears. • Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item pricing.
- **Deal Information** - Used to indicate the average price floor and ceil type to define the floor and ceil *l*imits for the price item or price item bundle
- **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

  Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
- **Characteristics** - Used to define the characteristics for the price item pricing.
- **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.

  Note: This section appears when **Price Assignment Type** is **Regular**.
- **Commitments** - Used to indicate the basic details about the pricing and commitments such as costs, floor and ceil limits, and negotiability specific to a division.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** The effective start date cannot be later than the effective end date. If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	This field will be in read-only mode when the price assignment has been used.	
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	Yes
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing. **Note:** This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Active** - Indicates that the price assignment is used for billing. • **Inactive** - Indicates that the price assignment is no longer used for billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Template** - Indicates that the price assignment is a template price list. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal. **Note:** If a price assignment is in **Active** status, you can change its status to **Inactive**. If a price assignment is in **Draft** status, you cannot change its status to **Proposed**.	
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are editing a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • All Customers • New Customers	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

2. Define the details in the **Main** section.
3. Define the deal information in a price item pricing.
4. Define the TFM information in a price item pricing.
5. Define the characteristics for a price item pricing.
6. Define the parameters for a price item pricing.
7. Select the required division from the **Commitments** section to define the commitments of a price item pricing.
8. Define the cost of the price item or price item bundle for the required divisions
9. Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.
10. Define the negotiability floor and ceil values of the price item or price item bundle for the required divisions
11. Click **Save**.
    The pricing is defined for a price item.

Defining the Deal Information in a Price Item Pricing

Procedure

To define the deal information in a price item pricing:

1. Ensure that the **Deal Information** section is expanded when you are defining, editing, or overriding a price item pricing.
   The **Deal Information** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Average Price Floor and Ceil Limits	Used to indicate the manner in which the average price floor and ceil limits of the price item pricing is defined for the deal. The valid values are: • **Absolute Value Range** - Used to indicate that the average price floor and ceil limits for the price item pricing is defined using absolute values. • **Spread Amount** - Used to indicate that the average price floor and ceil limits for the price item pricing is defined based on the spread amount. • **Spread Percentage** - Used to indicate that the average price floor and ceil limits for the price item pricing is defined based on the spread percentage. **Note:** In case of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage the average floor and ceil limits of the price item are derived for the deal.	Yes (Conditional) **Note:** This field is required while defining the average price floor and ceil limits of the price item for the deal.

2. Enter the required details in the **Deal Information** section.
3. Click **Save**.
   The deal information is defined for the price item pricing.

Defining TFM Information in a Price Item Pricing

Prerequisites

To define the TFM information in a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Aggregation or rating criteria to be defined for the price item pricing

Procedure

To define the TFM information in a price item pricing:

1. Ensure that the **TFM Information** section is expanded when you are defining, editing, or overriding a price item pricing.
   The **TFM Information** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Ignore Transaction	Used to indicate whether the transactions mapped to the price item are considered for billing or not. The valid values are: • Yes • No **Note:** By default, the **No** option is selected.	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.
Do Not Aggregate Switch	Used to indicate whether aggregation is required while rating the transactions mapped to the price item pricing before billing. The valid values are: • **Yes** - Indicates that aggregation is not required while rating the transactions mapped to the price item pricing before billing. • **No** - Indicates that aggregation is required while rating the transactions mapped to the price item pricing before billing. **Note:** By default, the **Yes** option is selected.	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: • Weekly • Monthly • Quarterly • Yearly **Note:** The list includes only those aggregation schedules where the schedule type is set to **Only Pricing**.	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.

Field Name	Field Description	Mandatory (Yes or No)
	Note: This option appears when the **Do Not Aggregate Switch** is set to **No**. **Note:** By default, the **Do Not Rate Transactions** option is selected.	

2. Enter the required details in the **TFM Information** section.

   Note: **TFM Information** section appears when the **Show Default Values** in Price Item Pricing option type of **C1_FM feature configuration** is set to **Y** and **Price Item Usage** for the respective price item is set to **Pricing and Billing**.

3. Click **Save**.
   The TFM information is defined in the price item pricing.

Defining a Characteristic for a Price Item Pricing

Prerequisites

To define a characteristic for a price item pricing, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Assignment**)

Procedure

To define a characteristic for a price item pricing:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or overriding a price item pricing.
   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item pricing.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Price Item**.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item pricing.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item pricing.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price item pricing, click the **Add** (+) icon and then *r*epeat step 2.

   Note: However, if you want to remove a characteristic from the price item pricing, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The characteristic is defined for the price item pricing.

Defining a Parameter for a Price Item Pricing

Prerequisites

To define a parameter for a price item pricing, you should have:

- Parameters associated with the price item, in case, you want to define price item pricing based on multiple parameters

Procedure

To define a parameter for a price item pricing:

1. Ensure that the **Price Item and Parameter Information** section is expanded when you are defining, editing, or overriding a price *i*tem pricing.
   The **Price Item and Parameter Information** section contains the following field:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle for which you want to define pricing parameters.

In addition, this section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter using which you want to define pricing for the price item. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears where you can search for the required parameter. The search results displays only those parameters where the **Price Item** check box is selected.	Yes
Parameter Information	Displays information about the parameter.	Not applicable
Parameter Value	Used to specify the value of the parameter. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears where you can search for the required parameter. The **Search** icon appears only when the value type of the parameter is set to **Predefined** or **Reference**.	Yes

2. Enter the required details in the **Price Item and Parameter Information** section.
3. If you want to add more than one parameter while defining or editing pricing for the price item, click the **Add** (+) icon *a*nd then repeat step 2.

   Note: However, if you want to remove a parameter from the price item pricing, click the **Delete** (🗑) icon corresponding to the parameter.
4. Click **Save**.
   The parameter is defined for the price item pricing.

Defining the Division-Specific Cost of a Price item in the Price Item Pricing

Prerequisites

To define the division-specific cost of a price item in the price item pricing you should have:

- Price items or price item bundles associated with the division to which the user belongs

Procedure

To define the division-specific cost of a price item in the price item pricing:

1. Ensure that the **Commitments** section is expanded when you are defining, editing, or overriding a price item pricing.
2. Select the division from the **Division** column for which you want to define the cost of the price item in the price item pricing.
3. Click the **Add** (+) icon in the **Costs** column corresponding to the division for which you want to define the cost of the price item in the price item pricing.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Cost Type	Used to indicate the type of cost incurred in the division for the price item pricing. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal • Fixed Third Party • Variable Internal • Variable Third Party	Yes (Conditional) **Note:** This field is required while defining the division-specific cost of the price item in the price item pricing.
Cost Value	Used to specify the cost amount.	Yes (Conditional) **Note:** This field is required while defining the division-specific cost of the price item in the price item pricing.

   Note: By default, the **Pricing Currency** is considered as the currency for defining the division-specific cost of the price item in the price item pricing.
4. Enter the required details in the **Costs** grid.
5. If you want to define more than one division-specific cost of the price item in the price item pricing, click the **Add** (+) icon and then repeat step 3.

   Note: However, if you want to remove the division-specific cost of the price item from the price item pricing, click the **Delete** (🗑) icon corresponding to the cost.
6. Click **Save**.
   The division-specific cost of the price item in the price item pricing is defined.

Defining the Division-Specific Average Price Limits of a Price item in the Price Item Pricing

Prerequisites

To define the division-specific average price limits of a price item in the price item pricing, you should have:

- To Do roles and currencies defined in the application
- Price items or price item bundles associated with the division to which the user belongs

Procedure

To define the division-specific average price limits of the price item in the price item pricing:

1. Ensure that the **Commitments** section is expanded when you are defining, editing, or overriding a price *i*tem pricing.
2. Select the division from the **Division** column for which you want to define the average price limits of the price item in the price item pricing.
3. Click the **Add** (+) icon in the **Floor and Ceiling Type** column corresponding to the division for which you want to define the division-specific average price limits of the price item in the price item pricing.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Role	Used to indicate that users with the specified To Do role can approve the average price of the price item in the price item pricing when it is within the specified floor and ceil limits. **Note:** The **Search** (🔍) icon appears corresponding to the **To Do Role** field. On clicking the **Search** icon, the **To Do Role Search** window appears. On specifying the To Do role, the description of the To Do role appears corresponding to the **To Do Role** field.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.
Floor Value	Used to specify the floor (i.e. lower) limit of the To Do role for approving the average price of the price item in the price item pricing. **Note:** The floor value cannot be greater than the ceil value. This field appears only when you select **Absolute Value Range** option from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.
Ceil Value	Used to specify the ceil (i.e. upper) limit of the To Do role for approving the average price of the price item in the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the division-

Field Name	Field Description	Mandatory (Yes or No)
	Note: The ceil value cannot be lower than the floor value. This field appears only when you select **Absolute Value Range** option from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.	specific average price floor and ceil limits of the price item in the price item pricing.
Spread Amount	Used to specify the spread amount of the To Do role for approving the average price of the price item in the price item pricing. **Note:** This field appears only when you select the **Spread Amount** option from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.
Spread Percentage	Used to specify the spread percentage of the To Do role for approving the average price of the price item in the price item pricing. **Note:** This field appears only when you select the **Spread Percentage** option from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.
Floor and Ceil Currency	Used to indicate the currency in which you want to define the average price floor and ceil limits of the price item in the price item pricing. **Note:** The list includes only those currencies which are already defined in the system. The system does the currency conversion when the pricing currency is different from the floor and ceil currency.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.

4. Enter the required details in the **Floor and Ceiling Type** grid.

   Note: The **Floor and Ceiling Type** grid appears only when you select an option from the **Average Price Floor and Ceil Limits** field in the **Deal Information** section.

5. If you want to define the average price limits for more than one To Do role in the division, click the **Add** (+) *i*con and then repeat step 3.

   Note: However, if you want to remove the average price limits of a To Do role from the division, click the **Delete** (🗑) icon corresponding to the To Do role.

6. Click **Save**.
   The division-specific average price limits of the price item in the price item pricing is defined.

Defining the Division-Specific Rate Negotiability Limits of a Price item in the Price Item Pricing

Prerequisites

To define the division-specific rate negotiability limits of a price item in the price item pricing, you should have:

- Currencies defined in the application
- Price items associated with the division to which the user belongs

Procedure

To define the division-specific rate negotiability limits of a price item in the price item pricing:

1. Ensure that the **Commitments** section is expanded when you are defining, editing, or overriding a price *i*tem pricing.
2. Select the division from the **Division** column for which you want to define the rate negotiability limits of a price item in the price item pricing
3. Click the **Add** (+) icon in the **Negotiability** column corresponding to the division for which you want to define the division-specific rate negotiability limits of the price item in the price item pricing.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Negotiability Floor Value	Used to specify the floor (i.e. lower) limit for the rate negotiation. **Note:** The floor value cannot be greater than the ceil value.	Yes (Conditional) **Note:** This field is required while defining the division-specific rate negotiability limits of the price item in the price item pricing.
Negotiability Ceil Value	Used to specify the ceil (i.e. upper) limit for the rate negotiation. **Note:** The ceil value cannot be lower than the floor value.	Yes (Conditional) **Note:** This field is required while defining the division-specific rate negotiability limits of the price item in the price item pricing.

Note: By default, the **Pricing Currency** is considered as the currency for defining the division-specific rate negotiability limits of the price item in the price item pricing.

4. Enter the required details in the **Negotiability** grid.
5. Click **Save**.
   The division-specific rate negotiability limits of the price item in the price item pricing is defined.

Copying a Price Item Pricing

Prerequisites

To copy a price item pricing and assign it to a price list, you should have:

- Price list (to which you want to assign the price item pricing) defined in the application
- Price list associated with the division to which the user belongs
- Price item pricing (whose copy you want to create) defined in the application

Procedure

To copy a price item pricing and assign it to a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Price List Pricing** (🔗) icon in the **Price List Pricing** column corresponding to the price *l*ist to which you want to assign a price item pricing.
   The **Price List Price Item Pricing** screen appears.
3. In the **Search Price Item** zone, select the required option from the **Search By** list to indicate whether *y*ou want to search price item pricing assigned to an account, person, or a price list.
   The fields in the **Search Criteria** section change depending on the option that you select from the **Search By** list.
4. Enter the search criteria in the **Search Price Item** zone to search for the price item pricing *w*hose copy you want to create and assign it to the price list.
5. Click **Search**.
   A list of price item pricing that meet the search criteria appears in the **Search Results** section.
6. In the **Search Results** section, click the **Copy** (📋) icon in the **Copy** column corresponding to the price item *p*ricing whose copy you want to create.
   The **Price Item Pricing** screen appears.
7. Modify the required pricing details.

   Note:

   If you change the effective start and end dates while copying a price item pricing, you need to specify the parameters which are effective during that date range.

   While copying a price item pricing, you can not only edit the existing tiering combination details, but can also add additional tiering combinations until the maximum tiering combinations limit is met.

   If you are creating a copy of active, proposed, inactive, rejected, or template price item pricing, you can save the new price item pricing in the **Active**, **Proposed**, or **Template** status.
8. Edit the characteristics of the price item pricing, if required.
9. Click **Save**.
   A new price item pricing is defined and assigned to the price list.

Price List Assignment

Once a price list is defined, you can assign it to accounts or persons to indicate the prices that will be charged for the price items or services offered to the accounts or persons. You can assign multiple price lists to an account or a person along with the priority or order in which the pricing should be considered. You can also define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit the price item pricing from the price list hierarchy.

For example, suppose you have PL1 (with priority 10) and PL2 (with priority 20) assigned to an account or a person. While determining pricing for a price item, the system will search for the price item pricing in PL1. If the system does not find the price item pricing in PL1, it will search for the price item pricing in PL2. The system will behave in this manner when the price list inheritance for PL1 is set to **No** during the price list assignment.

If the price list inheritance while assigning PL1 and PL2 to an account or a person is set to **Yes**, the system will search for the price item pricing in PL1. If the system does not find the price item pricing in PL1, it will search for the price item pricing from the price list hierarchy defined for PL1. However, if the system does not find the price item pricing from the price list hierarchy of PL1, it will then search for the price item pricing in PL2 (assigned to the account or person with priority 20). If the system still does not find the price item pricing in PL2, it will search for the price item pricing from the price list hierarchy defined for PL2.

The **Price List Assignment** screen allows you to search and assign a price list to an account or a person. It also allows you to view the price lists that are already assigned to an account or a person. It contains the following zones:

- Price List Assignments on page 534
- Price List Price Items on page 537
- Search Price List for Assignment on page 545

Price List Assignments

The **Price List Assignments** zone allows you to view and filter price lists that are currently assigned to the account or person. You can also search for the price lists assigned to the account or person which are either inactive or expired. You will not find any records in this zone if the account does not have any price lists assigned to it. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for the current, inactive, or historical price list assignments. The valid values are: • Current Price List Assignments	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Inactive Price List Assignments • Historical Price List Assignments **Note:** By default, the **Current Price List Assignments** option is selected.	
Price List ID	Used to search a particular price list assigned to an account or a person. **Note:** The **Search** (🔍) icon appears corresponding to the **Price List ID** field. On clicking the **Search** icon, the **Price List Search** window appears.	No
Price List Description	Used to search price lists which are assigned to the account or person having a particular description.	No
Effective Start Date	Used to search price lists which are assigned to the account or person from a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Effective End Date	Used to search price lists which are assigned to the account or person till a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Assignment Status	Used to search price list assignments with a particular status. The valid values are: • Active • Proposed • Rejected • Recommended • Inactive **Note:** The **Inactive** option is not available in the **Assignment Status** list when you have selected the **Current Price List Assignments** or **Historical Price List Assignments** option from the **Search By** list. This field is disabled, and by default, the **Inactive** option is selected when you select the **Inactive Price List Assignments** option from the **Search By** list.	No
Price List Inheritance	Used to search price list assignments where the account or person inherits price item pricing from the price list hierarchy. The valid values are: • Yes	No

Field Name	Field Description	Mandatory (Yes or No)
	• No	

Note: You must specify at least one search criterion while searching for price list assignments.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays information about the price list which is assigned to the account or person. **Note:** It has a link. On clicking the link, the **Price List** screen appears with the details of the respective price list.
Effective Start Date	Displays the date from when the price list is assigned to the account or person.
Effective End Date	Displays the date till when the price list is assigned to the account or person.
Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the account or person.
Assignment Status	Indicates the status of the price list assignment. The valid values are: • Active • Proposed • Rejected • Recommended • Inactive
Price List Inheritance	Indicates whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the account or person can inherit the price item pricing from the price list hierarchy.
Edit	On clicking the **Edit** (✎) icon, the **Price List Assignment** screen appears where you can edit the price list assignment details.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to the assigned price list, the **Price List Price Items** zone appears where you can view the price items assigned to the price list.

Price List Price Items

The **Price List Price Items** zone lists the price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays information about the price item pricing. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of the price item pricing.
Price Item	Displays the price item or price item bundle associated with the price list.
Pricing Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item). **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Pricing Status	Indicates the status of the price item pricing. The valid values are: • Active • Inactive • Proposed • Rejected • Template
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the **Rate Info** column. However, if the price assignment has more than one price components, then the **Rate Info** column contains a string indicating the tiering type and pricing currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the **Price Item Pricing** screen.
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price assignment for price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.

Column Name	Column Description
Copy	On clicking the **Copy** (⧉) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing using an existing price item pricing.

By default, the **Price List Price Items** zone does not appear in the **Price List Assignment** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the assigned price list in the **Price List Assignments** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the pricing information, the **Price Item Pricing** and **Price Assignment Tree** zone appears where you can view the price item pricing.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Price Item Pricing

The **Price Item Pricing** zone displays the details of the price item pricing. It contains the following sections:

- **Pricing Information** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Start Date	Displays the date from when the pricing of the price item is effective.
End Date	Displays the date till when the pricing of the price item is effective.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account and as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. • **Post Processing - Price Item Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • **Regular** - Indicates that the pricing is used to generate regular bill segment.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item or not.

Field Name	Field Description
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Active** - Indicates that the price assignment can be used for pricing and billing. • **Inactive** - Indicates that the price assignment is no longer available for pricing and billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for deal simulation and awaiting approval. • **Rejected** - Indicates that the price assignment is rejected in the system. • **Template** - Indicates that the price assignment is created as a template. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for deal simulation by the deal approver to the relationship manager.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Rate Schedule	Indicates the rate schedule that is used to define the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the respective rate schedule.
Pricing Rule Type	Indicates the pricing rule type. The valid value is: • Two-Dimensional **Note:** If you select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define two-dimensional pricing for the price item. However, if you do not select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define traditional flat, step, or tiered pricing for the price item. Also, you need to select the **Pricing Eligibility** option while defining a two-dimensional pricing for the price item.
Print Zero	Indicates whether the zero pricing is displayed in the bill. The valid values are: • Yes • No
Price Assignment Usage	Indicates whether the price item pricing is applicable for all customers or only for the new customers. The valid values are:

Field Name	Field Description
	• All Customers • New Customers **Note:** This field appears when you are viewing the details of a price item pricing assigned to a price list.
Pricing Frequency	Indicates the pricing frequency for the price item. **Note:** This field appears when the **Price Item Usage** is set to **Pricing** and the **Price Item Type** is set to **Fees** while defining the price item.

- **Deal Information** - Displays information about how the average price floor and ceil limits of the price item pricing is mapped to a deal. It contains the following field:

Field Name	Field Description
Average Price Floor and Ceil Limits	Indicates the manner in which the average price floor and ceil limits of the price item pricing is defined for the deal. The valid values are: • **Absolute Value Range** - Indicates that the average price floor and ceil limits for the price item pricing is defined using absolute values. • **Spread Amount** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread amount. • **Spread Percentage** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread percentage. **Note:** In case of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage the average floor and ceil limits are derived.

- **TFM Information** - Displays the transaction feed management information mapped to the price item pricing. It contains the following fields:

Field Name	Field Description
Ignore Transaction	Indicates whether the transactions mapped to the price item pricing are considered for billing or not. The valid values are: • Yes • No
Do Not Aggregate Switch	Indicates whether aggregation is required while rating the transactions mapped to the price item pricing before billing. The valid values are: • **Yes** - Indicates that aggregation is not required while rating the transactions mapped to the price item pricing before billing. • **No** - Indicates that aggregation is required while rating the transactions mapped to the price item pricing before billing.
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly

Field Name	Field Description
	• Yearly
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item pricing are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions **Note:** This field appears when the **Do Not Aggregate Switch** is set to **No**.

Note:

TFM Information section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1_FM feature configuration** is set to **Y** and the **Price Item Usage** field is set to **Pricing and Billing** while defining the price item.

Price Item and Parameter Information - Lists the parameters based on which the price item pricing is defined. It contains the following field:

Field Name	Field Description
Price Item	Displays the concatenated string of information about the price item or price item bundle for which the pricing is defined separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the price item.

In addition, the **Price Item and Parameter Information** section contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter using which the price item pricing is defined in the system.
Parameter Value	Displays the value of the parameter.

- **Division-Specific SQIs for Price Item** - Lists the SQIs associated with the price item pricing for a particular division. It contains the following columns:

Column Name	Column Description
SQI	Displays the SQI associated with the price item for pricing. **Note:** It has a link. On clicking the link, the **Service Quantity Identifier** screen appears where you can view the details of the respective SQI.
Daily Service Quantity	Displays the SQI usage for a single day.

Column Name	Column Description
Usage Period	Displays the duration for which the SQI is associated with the price item for pricing.
Division	Indicates the division for which the SQI is associated with the price item for pricing.

- **Division-Specific Cost for Price Item** - Lists the cost of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Cost Type	Indicates the type of cost incurred in the division for the price item pricing. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal • Fixed Third Party • Variable Internal • Variable Third Party
Cost Value	Displays the cost amount.

Note: By default, the **Pricing Currency** is considered as the currency code in which the cost is specified.

- **Division-Specific Floor & Ceil for Price Item** - Lists the average price floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates the users with the specified To Do role who can approve the average price of the price item in the price item pricing when it is within the specified floor and ceil limits. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Ceil Value	Displays the ceil (i.e. upper) limit for the To Do role to approve the average price of the price item. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.
Floor Value	Displays the floor (i.e. lower) limit for the To Do role to approve the average price of the price item. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Currency Code	Indicates the currency in which the average price floor and ceil limits are defined for the price item pricing. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.

Column Name	Column Description
Spread Amount	Displays the spread amount of the To Do role for approving the average price of the price item. **Note:** This column appears when the **Spread Amount** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Spread Percentage	Displays the spread percentage of the To Do role for approving the average price of the price item. **Note:** This column appears when the **Spread Percentage** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Division	Indicates the division for which the average price floor and ceil values of the price item is defined.

- **Negotiability** - Lists the negotiability floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the negotiability floor and ceil limits of the price item pricing is defined.
Ceil Value	Displays the ceil (i.e. upper) limit for the rate negotiation.
Floor Value	Displays the floor (i.e. lower) limit for the rate negotiation.

Note: By default, the pricing currency is considered as the currency code in which the negotiability floor and ceil limits of the price item pricing is defined.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item pricing is defined in the system. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Price Assignment Tree

The **Price Assignment Tree** zone displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details.

It also allows you to do the following:

- Define, edit, copy, or delete the price component of the rate component

  Note: You can define, edit, copy, or delete the price component of the rate component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.
- Define, edit, copy, or delete the tiering criteria of the price component

  Note: You can define, edit, copy, or delete the tiering criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.
- Define, edit, copy, or delete the pricing eligibility criteria of the price component

  Note: You can define, edit, copy, or delete the pricing eligibility criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.

The **Price Assignment Tree** zone contains the following buttons:

Button Name	Button Description
Expand All	On clicking the **Expand All** button, all nodes in the price assignment tree are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price assignment tree are collapsed at once.

In addition, the **Price Assignment Tree** zone contains the following section:

- **Pricing & Commitment Details** - Displays the pricing and commitments information associated with the price item.

Note: You cannot define, edit, copy, or delete a price component when you are accessing the **Price Assignment Tree** zone in the **Pricing (Person)**, **Pricing (Account)**, or **Price List** screen.

Search Price List for Assignment

The **Search Price List for Assignment** zone allows you to search for a price list that you want to assign to the account or person. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search against all price lists or against those price lists which are already assigned to an account or a person. The valid values are: • Price List • Assigned Price List **Note:** By default, the **Price List** option is selected.	Yes
Price List ID	Used to search a particular price list. **Note:** The **Search** (🔍) icon appears corresponding to the **Price List ID** field. On clicking the **Search** icon, the **Price List Search** window appears.	No
Price List Description	Used to search price lists with a particular description.	No
Effective Start Date	If you have selected the **Price List** option from the **Search By** list, this field is used to search price lists which are effective from a particular date onwards. However, if you have selected the **Assigned Price List** option from the **Search By** list, this field is used to search price lists which are assigned to an account or a person from a particular date onwards. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Effective End Date	If you have selected the **Price List** option from the **Search By** list, this field is used to search price lists which are effective till a particular date. However, if you have selected the **Assigned Price List** option from the **Search By** list, this field is used to search price lists which are assigned to an account or a person till a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
Account ID	Used to search price lists assigned to a particular account. **Note:** The **Search** ( ) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears. This field appears when the **Assigned Price List** option is selected from the **Search By** list.	No
Person ID	Used to search price lists assigned to a particular person. **Note:** The **Search** ( ) icon appears corresponding to the **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears. This field appears when the **Assigned Price List** option is selected from the **Search By** list.	No
Status	Used to search price lists with a particular status. The valid values are: • Active • Inactive • Proposed **Note:** This field appears when the **Price List** option is selected from the **Search By** list.	No
Price List Type	Used to search a particular type of price lists. The valid values are: • Standard • Promotional **Note:** This field appears when the **Price List** option is selected from the **Search By** list.	No
Only Eligible Price Lists	Used to search price lists which are eligible for the account or person. **Note:** This field appears when the **Price List** option is selected from the **Search By** list.	No
Eligibility Date	Used to search price lists which are eligible for the account or person from a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: **Note:** This field appears when the **Price List** option is selected from the **Search By** list. By default, the current date appears in this field when the **Only Eligible Price Lists** option is selected. You can change the value, if required. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	

Note: You must specify at least one search criterion while searching for a price list.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price lists that are associated with the division to which the account belongs. It may also include price lists that are already assigned to the account in case those price lists match the search criteria.

  The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the **Assign** ( ) icon, the **Price List Assignment** screen appears where you can assign the price list to the account or person.
Price List Information	Displays the information about the price list. **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Account Information	Displays the information about the account. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. This field appears when the following conditions are met: • When you are viewing the price list assignments of an account. • When the Assigned Price List option is selected from the Search By list.
Person Information	Displays the information about the person. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person. This field appears when the following conditions are met: • When you are viewing the price list assignments of a person. • When the Assigned Price List option is selected from the Search By list.
Effective Start Date	If you have selected the **Price List** option from the **Search By** list, the date from when the price list is effective appears in this column. However, if you have selected the

Column Name	Column Description
	Assigned Price List option from the **Search By** list, the date from when the price list is assigned to the account or person appears in this column.
Effective End Date	If you have selected the **Price List** option from the **Search By** list, the date till when the price list is effective appears in this column. However, if you have selected the **Assigned Price List** option from the **Search By** list, the date till when the price list is assigned to the account or person appears in this column.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Viewing Price Lists Assigned to an Account

Procedure

To view the price lists assigned to an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the account whose *d*etails you want to view.
   A menu appears.
3. Click the **Go To Price List Assignment** menu option.

   The **Price List Assignment** screen appears. It contains the following zones:

   - **Price List Assignments** - Lists the price lists that are already assigned to the account.
   - **Price List Price Items** - Lists the price items that are assigned to the price list.
   - **Search Price List for Assignment** - Enables you to search for a price list that you want to assign to the account.
   - **Price Item Pricing** - Displays the details of the price item pricing.
   - **Price Assignment Tree** - Displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details.
4. Do either of the following:

If...	Then
If you want to view the price lists which are currently assigned to an account	**a.** Ensure that the **Current Price List Assignments** option is selected from the **Search By** list. **b.** Enter the required search criteria and then click **Search**. The price lists which are currently assigned to the account appears in the search results.

If...	Then
If you want to view the price lists assigned to an account which are inactive	**a.** Select the **Inactive Price List Assignments** option from the **Search By** list. **b.** Enter the required search criteria and then click **Search**. The price lists assigned to an account which are inactive appears in the search results.
If you want to view the price lists assigned to an account which are expired	**a.** Select the **Historical Price List Assignments** option from the **Search By** list. **b.** Enter the required search criteria and then click **Search**. The price lists assigned to an account which are expired appears in the search results.

Assigning a Price List to an Account

Prerequisites

To assign a price list to an account, you should have:

- Price list defined in the application
- Price list associated with the division to which the account belongs
- Value defined for the **Default Price List Priority** option type in the **C1_PRICING** feature configuration

Procedure

To assign a price list to an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the account whose details you want to edit.
   A menu appears.
3. Click the **Go To Price List Assignment** menu option.

   The **Price List Assignment** screen appears. It contains the following zones:

   - **Price List Assignments** - Lists the price lists that are already assigned to the account.
   - **Price List Price Items** - Lists the price items that are assigned to the price list.
   - **Search Price List for Assignment** - Enables you to search for a price list that you want to assign to the account.
   - **Price Item Pricing** - Displays the details of the price item pricing.
   - **Price Assignment Tree** - Displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details.
4. In the **Search Price List for Assignment** zone, select the **Price List** or **Assigned Price List** option from the **Search By** list depending on whether you want to search against all price lists or against those price lists which are already assigned to an account or a person.
5. Enter the search criteria in the **Search Price List for Assignment** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
6. Click **Search**.

   A list of price lists that meet the search criteria appears in the **Search Results** section.

   Note: The search results include only those price lists that are associated with the division to which the account belongs. It may also include price lists that are already assigned to the account in case those price lists match the search criteria.
7. In the **Search Results** section, click the **Assign** (✍) icon corresponding to the price list that you want to assign to the account.

   The **Price List Assignment** screen appears. It consists of the following sections:

   - **Main** - Used to specify basic information while assigning the price list to the account.
   - **Characteristics** - Used to define the characteristics for the price list assignment.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account Information	Indicates the account to which you want to assign the price list.	Not applicable
Price List Information	Displays the information about the price list.	Not applicable
Effective Start Date	Used to specify the date from when you want to assign the price list to the account. **Note:** The price list assignment start date cannot be earlier than the price list effective start date or later than the price list effective end date.	Yes
Effective End Date	Used to specify the date till when you want to assign the price list to the account.	No

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>Note:
The effective end date cannot be earlier than the effective start date.
If the validity period is specified for the price list, the price list assignment end date should be earlier than or equal to the following whichever is earlier:
Price list assignment validity end date (which is price list assignment start date + validity period)
Price list effective end date
Let us understand this with the help of the following example:<table><tr><td>Price List Effective Start Date</td><td>01-Jan-2015</td></tr><tr><td>Price List Effective End Date</td><td>31-Jan-2015</td></tr><tr><td>Validity Period</td><td>15 Days</td></tr><tr><td>Price List Assignment Start Date</td><td>15-Jan-2015</td></tr><tr><td>Price List Assignment Validity End Date</td><td>30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)</td></tr></table>In the above example, the price list assignment end date must be earlier than or equal to the price list assignment validity end date because the price list assignment validity end date is earlier than the price list effective end date.</td><td></td></tr>
<tr><td>Priority</td><td>Used to specify the order in which the price list should be considered while determining the price item pricing for the account.</td><td>Yes</td></tr>
<tr><td>Price List Inheritance</td><td>Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are:
Yes - Used to indicate that the account can inherit the price item pricing from the price list hierarchy.
No - Used to indicate that the account cannot inherit the price item pricing from the price list hierarchy.</td><td>Yes</td></tr>
<tr><td>Assignment Status</td><td>Used to indicate the status of the price list assignment. The valid values are:
Active - Used to indicate that you want to use the price item pricing on the price list for billing.
Proposed - Used to indicate that you want to use the price item pricing on the price list for quotations.</td><td>Yes</td></tr>
</table>

8. Enter the required details in the **Main** section.
9. Define characteristics for the price list assignment, if required.
10. Click **Save**.
    The price list is assigned to the account.

Assigning a Price List to a Person

Prerequisites

To assign a price list to a person, you should have:

- Price list defined in the application
- Price list associated with the division to which the person belongs
- Value defined for the **Default Price List Priority** option type in the **C1_PRICING** feature configuration

Procedure

To assign a price list to a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the person whose *d*etails you want to edit.
   A menu appears.
3. Click the **Go To Price List Assignment** menu option.

   The **Price List Assignment** screen appears. It contains the following zones:

   - **Price List Assignments** - Lists the price lists that are already assigned to the person.
   - **Price List Price Items** - Lists the price items that are assigned to the price list.
   - **Search Price List for Assignment** - Enables you to search for a price list that you want to assign to the person.
   - **Price Item Pricing** - Displays the details of the price item pricing.
   - **Price Assignment Tree** - Displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details.
4. In the **Search Price List for Assignment** zone, select the **Price List** or **Assigned Price List** option from the **Search By** list depending on whether you want to search against all price lists or against those price lists which *a*re already assigned to an account or a person.
5. Enter the search criteria in the **Search Price List for Assignment** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

   A list of price lists that meet the search criteria appears in the **Search Results** section.

   Note: The search results include only those price lists that are associated with the division to which the person belongs. It may also include price lists that are already assigned to the person in case those price lists match the search criteria.

7. In the **Search Results** section, click the **Assign** ( ) icon corresponding to the price list that you want to *a*ssign to the person.

   The **Price List Assignment** screen appears. It consists of the following sections:

   - **Main** - Used to specify basic information while assigning the price list to the person.
   - **Characteristics** - Used to define the characteristics for the price list assignment.

   The **Main** section contains the following fields:

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td>Person Information</td><td>Indicates the person to whom you want to assign the price list.</td><td>Not applicable</td></tr>
<tr><td>Price List Information</td><td>Displays the information about the price list.</td><td>Not applicable</td></tr>
<tr><td>Effective Start Date</td><td>Used to specify the date from when you want to assign the price list to the person.
Note: The price list assignment start date cannot be earlier than the price list effective start date or later than the price list effective end date.</td><td>Yes</td></tr>
<tr><td>Effective End Date</td><td>Used to specify the date till when you want to assign the price list to the person.
Note:
The effective end date cannot be earlier than the effective start date.
If the validity period is specified for the price list, the price list assignment end date should be earlier than or equal to the following whichever is earlier:
• Price list assignment validity end date (which is price list assignment start date + validity period)
• Price list effective end date
Let us understand this with the help of the following example:
<table>
<tr><td>Price List Effective Start Date</td><td>01-Jan-2015</td></tr>
<tr><td>Price List Effective End Date</td><td>31-Jan-2015</td></tr>
<tr><td>Validity Period</td><td>15 Days</td></tr>
<tr><td>Price List Assignment Start Date</td><td>15-Jan-2015</td></tr>
</table>
</td><td>No</td></tr>
</table>

Field Name	Field Description	Mandatory (Yes or No)
	Price List Assignment Validity End Date: 30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days) In the above example, the price list assignment end date must be earlier than or equal to the price list assignment validity end date because the price list assignment validity end date is earlier than the price list effective end date.	
Priority	Used to specify the order in which the price list should be considered while determining the price item pricing for the person.	Yes
Price List Inheritance	Used to indicate whether the person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are: • **Yes** - Used to indicate that the person can inherit the price item pricing from the price list hierarchy. • **No** - Used to indicate that the person cannot inherit the price item pricing from the price list hierarchy.	Yes
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: • **Active** - Used to indicate that you want to use the price item pricing on the price list for billing. • **Proposed** - Used to indicate that you want to use the price item pricing on the price list for quotations.	Yes

8. Enter the required details in the **Main** section.
9. Define characteristics for the price list assignment, if required.
10. Click **Save**.
    The price list is assigned to the person.

Defining a Characteristic for a Price List Assignment

Prerequisites

To define a characteristic for a price list assignment, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List Assignment**)

Procedure

To define a characteristic for a price list assignment:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing characteristics for a *p*rice list assignment.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list assignment.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the price list assignment.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Price List Assignment**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the price list assignment.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the price list assignment.

2. Enter the required details in the **Characteristics** section.

   Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the price list assignment, click the **Add** (+) icon and *t*hen repeat step *2*.

   Note: However, if you want to remove a characteristic from the price list assignment, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.
   The characteristics are defined for the price list assignment.

Price List Assignments

The **Price List Assignments** screen allows you to view the persons and accounts where the price list is assigned. It contains the following zones:

- Persons to whom Price List is Assigned on page 563
- Accounts where Price List is Assigned on page 564

Persons to whom Price List is Assigned

The **Persons to whom Price List is Assigned** zone displays the details of the persons to whom the price list is assigned. It contains the following columns:

Column Name	Column Description
Person ID	Displays the person ID.
Person Information	Displays the concatenated string of information about the person separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.
Price List Assignment Start Date	Displays the date from when the price list is assigned to the person.
Price List Assignment End Date	Displays the date till when the price list is assigned to the person.
Division	Displays the division to which the person belongs.
Price List Assignment ID	Displays the price list assignment ID.

You can filter the list using various search criteria (such as, **Person ID**, **Price List Assignment Start Date**, **Price List Assignment End Date** and **Division**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Viewing Accounts and Persons where Price List is Assigned

Procedure

To view the accounts and persons where the price list is assigned:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **View** (🔗) icon in the **Price List Assigned To** column corresponding to the price list whose assignment details you want to view.
   The **Price List Assignments** screen appears.
3. View the persons to whom the price list is assigned in the **Persons to whom Price List is Assigned** zone and view the accounts where the price list is assigned in the **Accounts where Price List is Assigned** zone.

Entities Eligible for Price List Assignment

The **Entities Eligible for Price List Assignment** screen allows you to view the accounts and persons that are eligible for the price list assignment. It also allows you to search for a list of eligible accounts and persons and assign them to the price list. It contains the following zones:

- Eligible Accounts on page 565
- Eligible Persons on page 566

Eligible Accounts

The **Eligible Accounts** zone allows you to search for the accounts that are eligible for the price list assignment. It also allows you to assign the price list to one or more eligible accounts. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division whose eligible accounts you want to search for the price list assignment. **Note:** You can view only those divisions to which you have access in the **Division** list. Also, the list shows only those divisions to which the price list is associated.	Yes
Effective Date	Used to search accounts by specifying the date from when they are eligible for price list assignment. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Account ID	Used to search a particular account to which you want to assign the price list. **Note:** The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears where you can search for the respective account. On specifying the account, the account information appears	No

Field Name	Field Description	Mandatory (Yes or No)
	corresponding to the **Account ID** field. The account information has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.	

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Account Information	Displays the concatenated string of information about the account separated by a comma (,). In addition, a context menu (⌄) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Assigned	Indicates whether the price list is assigned to the account or not. The valid values are: • Yes • No

You can select one or more accounts for price list assignment by clicking the check box corresponding to the **Account Information** column.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, the **Search Results** section contains the following button:

Button Name	Button Description
Assign	On clicking the **Assign** button, you can assign the price list to the selected account/accounts.

Eligible Persons

The **Eligible Persons** zone allows you to search for the persons that are eligible for the price list assignment. It also allows you to assign the price list to one or more eligible persons. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division whose eligible persons you want to search for the price list assignment. **Note:** You can view only those divisions to which you have access in the **Division** list. Also, the list shows only those divisions to which the price list is associated.	Yes
Effective Date	Used to search persons by specifying the date from when they are eligible for price list assignment. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Person ID	Used to search a particular person to whom you want to assign the price list. **Note:** The **Search** ( ) icon appears corresponding to the **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears where you can search for the respective person. On specifying the person, the person information appears corresponding to the **Person ID** field. The person information has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays the concatenated string of information about the person separated by a comma (,). In addition, a context menu ( ) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.
Assigned	Indicates whether the price list is assigned to the person or not. The valid values are: • Yes

Column Name	Column Description
	• No

You can select one or more persons for price list assignment by clicking the check box corresponding to the **Person Information** column.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, the **Search Results** section contains the following button:

Button Name	Button Description
Assign	On clicking the **Assign** button, you can assign the price list to the selected person/persons.

Assigning a Price List to One or More Eligible Accounts

Prerequisites

To assign a price list to one or more eligible accounts, you should have:

- Price list defined in the application
- Accounts created in the application
- Price list associated with the division to which the account/accounts belong.
- Value defined for the **Default Price List Priority** option type in the **C1_PRICING** feature configuration

Procedure

To assign a price list to one or more eligible accounts:

1. Search for the eligible accounts in the **Eligible Accounts** zone of the **Entities Eligible for Price List Assignment** screen.
2. In the **Search Results** section, click the check box corresponding to the account/accounts to which you want to assign the price list.
3. Click the **Assign** button available in the upper left corner of the **Search Results** section.
   The **Price List Assignment** screen appears. It contains the following two sections:
   - **Main** - Used to specify basic details about the price list assignment.
   - **Characteristics** - Used to define a list of characteristics for the price list assignment.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Information	Displays the concatenated string of information about the price list separated by a comma (,).	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the price list assignment is effective for the account/ accounts. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
Effective End Date	Used to specify the date till when the price list assignment is effective for the account/ accounts. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Priority	Used to specify the order in which the price list is considered while determining the price item pricing for the account.	No
Price List Inheritance	Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are: • Yes • No	No
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: • Active • Proposed	No
Priority Indicator	Used to set the priority of the price list assignment. The valid values are: • **Highest** - Used when you want the price list assignment to have the highest priority. It checks whether there are any other price list assignments for the account, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with highest priority minus one. • **Lowest** - Used when you want the price list assignment to have the lowest priority. It checks whether there are any other price list assignments for the account, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the	No

Field Name	Field Description	Mandatory (Yes or No)
	existing price list assignment with lowest priority plus one.	

4. Enter the required details in the **Main** section.
5. Define a list of characteristics for the price list assignment in the **Characteristics** section, if required/
6. Click **Save**.
   The price list is assigned to the selected account/accounts.

Assigning a Price List to One or More Eligible Persons

Prerequisites

To assign a price list to one or more eligible persons, you should have:

- Price list defined in the application
- Persons created in the application
- Price list associated with the division to which the person/persons belong.
- Value defined for the **Default Price List Priority** option type in the **C1_PRICING** feature configuration

Procedure

To assign a price list to one or more eligible persons:

1. Search for the eligible persons in the **Eligible Persons** zone of the **Entities Eligible for Price List Assignment** screen.
2. In the **Search Results** section, click the check box corresponding to the person/persons to whom you want to assign the price list.
3. Click the **Assign** button available in the upper left corner of the **Search Results** section.
   The **Price List Assignment** screen appears. It contains the following two sections:
   - **Main** - Used to specify basic details about the price list assignment.
   - **Characteristics** - Used to define a list of characteristics for the price list assignment.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Information	Displays the concatenated string of information about the price list separated by a comma (,).	Not applicable
Effective Start Date	Used to specify the date from when the price list assignment is effective for the person/ persons.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
Effective End Date	Used to specify the date till when the price list assignment is effective for the person/persons. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Priority	Used to specify the order in which the price list is considered while determining the price item pricing for the person.	No
Price List Inheritance	Used to indicate whether the person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are: • Yes • No	No
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: • Active • Proposed	No
Priority Indicator	Used to set the priority of the price list assignment. The valid values are: • **Highest** - Used when you want the price list assignment to have the highest priority. It checks whether there are any other price list assignments for the person, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with highest priority minus one. • **Lowest** - Used when you want the price list assignment to have the lowest priority. It checks whether there are any other price list assignments for the person, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with lowest priority plus one.	No

4. Enter the required details in the **Main** section.
5. Define a list of characteristics for the price list assignment in the **Characteristics** section, if required/
6. Click **Save**.
   The price list is assigned to the selected person/persons.

Defining a Characteristic for a Price List Assignment

Prerequisites

To define a characteristic for a price list assignment, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List Assignment**)

Procedure

To define a characteristic for a price list assignment:

1. Ensure that the **Characteristics** section is expanded when you are assigning a price list to *m*ultiple persons or accounts or when you are editing the price list assignment details of multiple persons or accounts.

   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list assignment. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price list assignment.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Price List Assignment**.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price list assignment.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** ( ) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price list assignment.

Field Name	Field Description	Mandatory (Yes or No)
	On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price list assignment, click the **Add** (+) icon and *t*hen repeat step *2*.

   Note: However, if you want to remove a characteristic from the price list assignment, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The characteristic is defined for the price list assignment.

Price List Simulation

Oracle Revenue Management and Billing provides you a price list simulator wherein you can simulate the pricing and analyze the revenue impact. A new screen named **Price List Simulation** is introduced in this release. It enables you to search for a price list whose price item pricing you want to simulate. You can search for:

- Price lists assigned to customers or accounts where a particular characteristic is defined
- Price lists where a particular price item is assigned
- Price list which is associated with a particular product
- Price lists with a particular description

Once you search for a price list, you can simulate the pricing in a particular currency. On clicking the icon in the **Price List Simulation - Proposal** column, the **Price List Simulation - Proposal** screen appears where you can individually update the price and/or volume of a price item or mass update the price and/or volume of the price items in the price list. On simulating the price list, the **Price List Simulation Results** screen appears where you view the details of the simulation. The details include:

- List of accounts which would be affected with the change in price
- Original and proposed revenue and the revenue impact due to change in the price

On clicking the **Simulate** button, the system creates the simulation in the **Pending** status. On clicking the **Request Approval** button corresponding to a simulation, the system changes the status of the simulation to **Approved**. The system enables you to extract the effective pricing and simulation results in the Excel format.

Price List Simulation

The **Price List Simulation** screen allows you to search for a price list whose price item pricing you want to simulate using various search criteria. You can create a price list simulation proposal and also view the simulation details of a price list. This screen contains the following zone:

- Search Price List on page 574

Search Price List

The **Search Price List** zone allows you to search for a price list using various search criteria. It contains the following sections:

- **Characteristic Filters** - The **Characteristic Filters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Entity	Used to search for a price list using the type of entity. The valid value are: • Account • Person	Yes(Conditional) **Note:** This field is required while searching price list which are assigned to customers or accounts using a particular characteristic.
Characteristic Type	Used to search price list which is defined using a particular characteristics.	Yes(Conditional) **Note:** This field is required while searching price list which are assigned to customers or accounts using a particular characteristic.
Operator	Used to search price list using the relational operators. The valid values are: • < • <= • = • > • >= • <>	Yes(Conditional) **Note:** This field is required while searching price list which are assigned to customers or accounts using a particular characteristic.
Characteristic Value	Used to search price list using the characteristic value.	Yes(Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears where you can search for the respective characteristic value.	**Note:** This field is required while searching price list which are assigned to customers or accounts using a particular characteristic.

Note: If you want to filter more than one characteristic for the price list, click the **Add** (+) icon corresponding to the entity field.

- **Account**-The **Account** section contains following fields:

Field Name	Field Description
Characteristic Type	Displays the characteristics type of the characteristics using which the price list is assigned to the account.
Operator	Displays the relation operator which is used to define the relation between characteristic type and characteristic value.
Characteristic Value	Displays the characteristic using which the price list assigned to the account.

- **Person**-The **Person** section contains following fields:

Field Name	Field Description
Characteristic Type	Displays the characteristics type of the characteristics using which the price list is assigned to the person.
Operator	Displays the relation operator which is used to define the relation between characteristic type and characteristic value.
Characteristic Value	Displays the characteristic using which the price list assigned to the person.

- **Pricelist, Product and Priceitem Filters** - Used to search a price list using price list, price item or product. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search for a price list to which a particular price item is assigned. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears.	Yes(Conditional) **Note:** This field is required while searching price list where a particular

Field Name	Field Description	Mandatory (Yes or No)
		price item is assigned.
Product	Used to search price list which belong to a particular product. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Product Search** window appears.	Yes(Conditional) **Note:** This field is required while searching price list of a product.
Price List ID	Used to search a particular price list. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** window appears.	Yes(Conditional) **Note:** This field is required while searching a particular price list.
Price List Description	Used to search for a price list by specifying the description of the price list.	Yes(Conditional) **Note:** This field is required while searching price list where a particular price list description is specified.

Note: If you specify the characteristics section, you need to specify either price item, price list or the product.

- **Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Results** section contains the following columns:

Column Name	Column Description
Price List ID	Displays the price list ID.
Price List Information	Displays the description about the price list.
Status	Displays the current status of the price list. The valid values are: • Active • Inactive
Effective Start Date	Displays the date from when the price list is available for assignment to an account or a person.

Column Name	Column Description
Effective End Date	Displays the date till when the price list is available for assignment to an account or a person.
Currency	Used to specify the currency using which you want to simulate the price list.
Price List Simulation - Proposal	On clicking the **Price List Simulation - Proposal** (+) icon, the **Price List Simulation - Proposal** screen appears where you can modify the volume and pricing of the price items in the price list for simulation. **Note:** The **Price List Simulation - Proposal** icon appears only when you select the required currency from the **Simulation Currency** list.
Price List Simulation Results	On clicking the **Price List Simulation Results** ( ) icon, the **Price List Simulation Results** screen appears where you can view the results for all the simulated version of all the price list for a particular entity.

Searching for a Price List

Prerequisites

To search for a price list, you should have:

- Price list simulation entities and their characteristics defined in the application

Procedure

To search for a price list:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List Simulation**.
   The **Price List Simulation** screen appears.
3. Enter the search criteria in the **Search Price List** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of price lists that meet the search criteria appears in the **Results** section.

Viewing the Price List Simulation Details

Procedure

To view the details of a price list simulation:

1. Search for the price list in the **Price List Simulation** screen.
2. In the **Results** section, click the **Price List Simulation Results** (icon in the **Price List Simulation Results** column corresponding to the price list whose details you want to view.

   The **Price List Simulation Results** screen appears.
3. View the details of the price list simulation in the **Price List Simulation View** zone.

Creating a Price list Simulation Proposal

Prerequisites

To create a price list simulation proposal, you should have:

- Price lists defined in the system
- Price item pricing defined for the price items associated to the price list

Procedure

To create a price list simulation proposal:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List Simulation**.
   The **Price List Simulation** screen appears.
3. Do either of the following:

If you want to...	Then...
Create a new simulation proposal for a price list	**a.** Search for the required price list that you want to simulate from the **Search Price List** zone. A list of the price lists matching the search criteria appears in the **Search Results** section. **b.** Select the simulation currency from the **Currency** list corresponding to the price list that you want to simulate. In the search result section, click the **Add** (+) icon in the **Price List Simulation - Proposal** column corresponding to the simulated price list.
Create a new simulation proposal for an already simulated price list	**a.** Search for the price list whose simulation details you want to view from the **Search Price List** zone.

If you want to...	Then...
	In the search result section, select the simulation currency from the **Currency** list corresponding to the price list that you want to simulate.

The **Price List Simulation - Proposal** screen appears. It contains the following field:

- **Filters** - This section contains the following fields:

Field Name	Field Description
Price List ID	Indicates the price list for which you want to propose a simulation.
Product	Used to propose simulation for price items in the price list which belong to a particular product.
Simulation Period	Used to specify the period for which you want to propose the price list simulation. The valid values are: • 1 month • 3 months • 6 months • 12 months • 36 months **Note:** By default, the **36 months** option is selected.

- **New Simulation** - Used to propose simulation by modifying the volume or the pricing of the price items associated with the price list. It contains the following fields:

Field Name	Field Description
Short Description	Used to specify the description of the price list simulation version.
Long Description	Used to specify additional information about the price list simulation.
Currency	Used to specify the currency in which you want to calculate the price list simulation. **Note:** If the simulation currency is different from the price list pricing currency, the system does the currency conversion.
Mass Volume Update(%)	Used to update the commitments (in percentage) of all the selected price items available in the price list at once. **Note:** You can slide the range slider in the left or right direction in order to decrease or increase the commitments respectively. You can exclude a price item of the price list, product, or price item hierarchy from the **Mass Volume Update** by selecting the **Exclude** checkbox corresponding to the respective price item.
Mass Price Update(%)	Used to update the mass pricing of the price items in percentage which is applicable for the entire price list.

Field Name	Field Description
	Note: You can slide the range slider in the left or right direction in order to increase or decrease the pricing respectively. You can exclude a price item of the price list, product, or price item hierarchy from the **Mass Price Update** by selecting the **Exclude** checkbox corresponding to the respective price item.
Total Accounts affected	Displays the total number of affected price items or products associated with a particular account for which you want to perform the simulation.

It also contains the following columns:

Column Name	Column Description
Affected Accounts	Displays the affected price items or products associated with a particular account for which you want to perform the simulation.
Usage Unit	Indicates the usage unit I.e, (**Service Quantity Identifier**) associated with the price item pricing.
Price	Displays the concatenated string consisting of the pricing information such as rate component, pricing type and pricing currency which are separated by a comma (,) for the price list. **Note:** This link appears when you expand the respective price item. It has a link. On clicking the link, the **Rate Component Tree** screen appears where you can view the pricing structure details of the respective price item.
Actual Volume	Displays the actual commitments of the price item for a particular account.
Average Unit Price	Displays the actual average price charged for each unit of a price item. It is represented by the following formula: `Actual Average Unit Price = Actual Revenue / Actual Volume`
Original Revenue	Displays the revenue generated through the actual price item pricing and actual volume of a price item.
Proposed Volume	Displays the proposed commitments of the price item for a particular account.
Proposed Average Unit Price	Displays the proposed average price charged for each unit of a price item. `Proposed Average Unit Price = Proposed Revenue / Proposed Volume`
Exclude	Used to specify whether you want to exclude a price item of a price list, product, or a price item hierarchy from the mass volume and/or pricing update.

4. Enter the required details in the **Price List Simulation - Proposal** screen.

5. Propose new pricing and/or volume for the price items of the price list.
6. Click **Simulate** to simulate the price list.
   The price list simulation proposal is created.

Price List Simulation - Proposal

The **Price List Simulation - Proposal** screen allows you to propose or modify the volume and/or pricing of the price items in a price list in order to simulate a price list. You can individually or mass update the volume and/or pricing of the price items associated with the price list. Once an update is proposed in the volume and/or pricing of the price item, you can simulate the price list to analyze the results and the overall revenue impact. This screen contains the following zone:

- Enter Proposed Pricing and Volumes on page 581

Enter Proposed Pricing and Volumes

The **Enter Proposed Pricing and Volumes** zone allows you to propose or modify the volume and/or pricing for the price items associated with a price list/product/price item pricing. You can either increase or decrease the volume and/or pricing of the price items. Once an update is proposed in the volume and/or pricing of the price item, you can simulate the respective price list. It contains the following sections:

- **Filters** - This section contains the following fields:

Field Name	Field Description
Price List ID	Indicates the price list for which you want to propose a simulation.
Product	Used to propose simulation for price items in the price list which belong to a particular product.
Simulation Period	Used to specify the period for which you want to propose the price list simulation. The valid values are: • 1 month • 3 months • 6 months • 12 months • 36 months **Note:** By default, the **36 months** option is selected.

- **New Simulation** - Used to propose simulation by modifying the volume or the pricing of the price items associated with the price list. It contains the following fields:

Field Name	Field Description
Short Description	Used to specify the description of the price list simulation version.
Long Description	Used to specify additional information about the price list simulation.
Currency	Used to specify the currency in which you want to calculate the price list simulation. **Note:** If the simulation currency is different from the price list pricing currency, the system does the currency conversion.
Mass Volume Update(%)	Used to update the commitments (in percentage) of all the selected price items available in the price list at once. **Note:** You can slide the range slider in the left or right direction in order to decrease or increase the commitments respectively. You can exclude a price item of the price list, product, or price item hierarchy from the **Mass Volume Update** by selecting the **Exclude** checkbox corresponding to the respective price item.
Mass Price Update(%)	Used to update the mass pricing of the price items in percentage which is applicable for the entire price list. **Note:** You can slide the range slider in the left or right direction in order to increase or decrease the pricing respectively. You can exclude a price item of the price list, product, or price item hierarchy from the **Mass Price Update** by selecting the **Exclude** checkbox corresponding to the respective price item.
Total Accounts affected	Displays the total number of affected price items or products associated with a particular account for which you want to perform the simulation.

It also contains the following columns:

Column Name	Column Description
Affected Accounts	Displays the affected price items or products associated with a particular account for which you want to perform the simulation.
Usage Unit	Indicates the usage unit I.e, (**Service Quantity Identifier**) associated with the price item pricing.
Price	Displays the concatenated string consisting of the pricing information such as rate component, pricing type and pricing currency which are separated by a comma (,) for the price list. **Note:** This link appears when you expand the respective price item. It has a link. On clicking the link, the **Rate Component Tree** screen appears where you can view the pricing structure details of the respective price item.
Actual Volume	Displays the actual commitments of the price item for a particular account.

Column Name	Column Description
Average Unit Price	Displays the actual average price charged for each unit of a price item. It is represented by the following formula: `Actual Average Unit Price = Actual Revenue / Actual Volume`
Original Revenue	Displays the revenue generated through the actual price item pricing and actual volume of a price item.
Proposed Volume	Displays the proposed commitments of the price item for a particular account.
Proposed Average Unit Price	Displays the proposed average price charged for each unit of a price item. `Proposed Average Unit Price = Proposed Revenue / Proposed Volume`
Exclude	Used to specify whether you want to exclude a price item of a price list, product, or a price item hierarchy from the mass volume and/or pricing update.

Simulating a Price List

Prerequisites

To simulate a price list, you should have:

- Account details defined in the application
- Price items of a price list associated with a product
- Price item pricing defined for the respective price list associated with the account
- Bill generated for the account

Procedure

To simulate a price list:

1. Search for the price list in the **Price List Simulation** screen.
2. In the **Search Results** section, select the required currency from the **Simulation Currency** list corresponding to the price list that you want *t*o simulate.
3. On selecting the currency, the **Price List Simulation - Proposal** (+) icon appears.
4. Click **Price List Simulation - Proposal** icon.
   The **Price List Simulation - Proposal** screen appears. It contains the following zone:
   - **Enter Proposed Pricing and Volumes** - Used to propose or modify the volume and pricing of the price items associated with a price list/product/price item hierarchy. It contains following sections:
   - **Filters** - This section contains the following fields:

Field Name	Field Description
Price List ID	Used to indicate the price list for which you want to propose a simulation.

Field Name	Field Description
Product	Used to propose simulation for price items in the price list which belong to a particular product.
Simulation Period	Used to specify the period for which you want to propose the price list simulation. The valid values are: • 1 month • 3 months • 6 months • 12 months • 36 months **Note:** By default, the **36 months** option is selected.

- **New Simulation** - Used to propose simulation by modifying the volume or the pricing of the price items associated with the price list. It contains the following fields:

Field Name	Field Description
Short Description	Used to specify the description of the price list simulation version.
Long Description	Used to specify additional information about the price list simulation.
Currency	Used to specify the currency in which you want to calculate the price list simulation. **Note:** If the simulation currency is different from the price list pricing currency, the system does the currency conversion.
Mass Volume Update(%)	Used to update the commitments (in percentage) of all the selected price items available in the price list at once. **Note:** You can slide the range slider in the left or right direction in order to decrease or increase the commitments respectively. You can exclude a price item of the price list, product, or price item hierarchy from the **Mass Volume Update** by selecting the **Exclude** checkbox corresponding to the respective price item.
Mass Price Update(%)	Used to update the mass pricing of the price items in percentage which is applicable for the entire price list. **Note:** You can slide the range slider in the left or right direction in order to increase or decrease the pricing respectively. You can exclude a price item of the price list, product, or price item hierarchy from the **Mass Price Update** by selecting the **Exclude** checkbox corresponding to the respective price item.
Total Accounts affected	Displays the total number of affected price items or products associated with a particular account for which you want to perform the simulation.

It also contains the following columns:

Column Name	Column Description
Affected Accounts	Displays the affected price items or products associated with a particular account for which you want to perform the simulation.
Usage Unit	Indicates the usage unit I.e, (**Service Quantity Identifier**) associated with the price item pricing.
Price	Displays the concatenated string consisting of the pricing information such as rate component, pricing type and pricing currency which are separated by a comma (,) for the price list. **Note:** This link appears when you expand the respective price item. It has a link. On clicking the link, the **Rate Component Tree** screen appears where you can view the pricing structure details of the respective price item.
Actual Volume	Displays the actual commitments of the price item for a particular account.
Average Unit Price	Displays the actual average price charged for each unit of a price item. It is represented by the following formula: `Actual Average Unit Price = Actual Revenue / Actual Volume`
Original Revenue	Displays the revenue generated through the actual price item pricing and actual volume of a price item.
Proposed Volume	Displays the proposed commitments of the price item for a particular account.
Proposed Average Unit Price	Displays the proposed average price charged for each unit of a price item. `Proposed Average Unit Price = Proposed Revenue / Proposed Volume`
Exclude	Used to specify whether you want to exclude a price item of a price list, product, or a price item hierarchy from the mass volume and/or pricing update.

5. Filter the results using the **Filters** section, if required.
6. Propose or modify new values for **Mass Volume Update** and/or **Mass Price Update** fields, if required.
7. Click **Simulate**.
   The **Price List Simulation Results** screen appears where you can analyze the simulation results.

Price List Simulation Results

The **Price List Simulation Results** screen allows you to view all the simulation results of a price list. You can analyze the simulation results of a price list. You can also request the approval for the price list simulation. The system enables you to extract the effective pricing and simulation results in the Excel format. This screen contains the following zone:

- Price List Simulation View on page 586

Price List Simulation View

The **Price List Simulation View** zone lists all the simulations associated with the price list. You can view the details of all the simulations performed for the associated price list. Also, you can request approval for a particular price list simulation. It allows you to extract the effective pricing and/or simulation results in excel format. This zone contains the following sections:

- **Filters** - The **Filters** section contains the following fields:

Field Name	Field Description
Price List ID	Used to specify the price list for which the simulation is requested.
Product	Used to search a product with a particular description.
Simulation Period	Used to specify the period which is back calculated from the system date to fetch the validity for the proposed pricing. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.
View Person and Account Level Details	Used to indicate whether you want to show or hide the person or account details associated with the price list.

It also contains the following columns:

Affected Accounts	Displays the affected price items or products of a particular account whose simulation details you are viewing. **Note:** This field appears when you expand the simulation details which you want to view.
Standard Price	Displays the price item pricing information associated with a particular account.
Actual Volume	Displays the actual commitments of the price item for a particular account.
Proposed Volume	Displays the proposed commitments of the price item for a particular account
Average Unit Price	Displays the actual average price charged for each unit of a price item. It is represented by the following formula: `Average Unit Price = Actual Revenue / Actual Volume`

Proposed Average Unit Price	Displays the proposed average price charged for each unit of a price item. It is represented by the following formula: `Proposed Average Unit Price = Proposed Revenue / Proposed Volume`
Original Revenue	Displays the revenue generated from the actual price item pricing and actual volume of a price item.
Proposed Revenue	Displays the revenue generated from the proposed price item pricing and proposed volume of a price item..
Revenue Impact (%)	Displays the average revenue generated from the price item pricing and commitments. It is represented by the following formula: `Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100 / Original Revenue`
Extract Effective Pricing	Used to extract the effective pricing details in the excel format.
Extract Simulation Results	Used to extract the simulation results in the excel format.
Request Approval	On clicking this button, the system creates a To Do based approval request for price list simulation.

Legend	Legend Description
ORIGINAL	Indicates the original commitments and pricing statistics of a price item.
PROPOSED	Indicates the proposed commitments and pricing statistics of a price item.

Analyzing the Results of a Price List Simulation

Procedure

To analyze the results of a price list simulation:

1. Search for the price list in the **Price List Simulation** screen.
2. In the **Search Results** section, click the **Price List Simulation- Proposal** (+ icon in the **Price List Simulation - Proposal** column corresponding to *t*he price list you want to simulate.

The **Price List Simulation - Proposal** screen appears.

3. Propose new volume and price for the price item of the price list you want to simulate.
4. Click **Simulate**.

Note: Alternatively, you can click on the **Price List Simulation Results** ( ) icon in the **Price List Simulation Results** column corresponding to the price list whose simulation *r*esults you want to analyze in the price list search results section.

The **Price List Simulation Results** screen appears. It contains the following zone:

- **Price List Simulation View** - Lists all the simulation results associated with a particular price list. It contains the following section:

  Filters - The **Filters** section contains the following fields:

Field Name	Field Description
Price List ID	Used to specify the price list for which the simulation is requested.
Product	Used to search a product with a particular description.
Simulation Period	Used to specify the period which is back calculated from the system date to fetch the validity for the proposed pricing. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.
View Person and Account Level Details	Used to indicate whether you want to show or hide the person or account details associated with the price list.

  It also contains the following columns:

Affected Accounts	Displays the total number of affected price items or products of a particular account whose simulation details you are viewing. **Note:** This field appears when you expand the simulation details which you want to view.
Standard Price	Displays the price item pricing information associated with a particular account.
Actual Volume	Displays the actual commitments of the price item for a particular account.
Proposed Volume	Displays the proposed commitments of the price item for a particular account
Average Unit Price	Displays the actual average price charged for each unit of a price item. It is represented by the following formula: `Average Unit Price = Actual Revenue / Actual Volume`
Proposed Average Unit Price	Displays the proposed average price charged for each unit of a price item. It is represented by the following formula: `Proposed Average Unit Price = Proposed Revenue / Proposed Volume`
Original Revenue	Displays the revenue generated from the actual price item pricing and actual volume of a price item.

Proposed Revenue	Displays the revenue generated from the proposed price item pricing and proposed volume of a price item..
Revenue Impact (%)	Displays the average revenue generated from the price item pricing and commitments. It is represented by the following formula: `Revenue Variation (%) = (Proposed Revenue - Original Revenue)*100 / Original Revenue`
Extract Effective Pricing	Used to extract the effective pricing details in the excel format.
Extract Simulation Results	Used to extract the simulation results in the excel format.
Request Approval	On clicking this button, the system creates a To Do based approval request for price list simulation.

Legend	Legend Description
ORIGINAL	Indicates the original commitments and pricing statistics of a price item.
PROPOSED	Indicates the proposed commitments and pricing statistics of a price item.

5. Expand the simulation version that you want to view.
6. Analyze the updated volume and pricing for the price items of the price list.
7. Analyze the percentage variation in the revenue of the price items.

Submitting a Price List Simulation for Approval

Prerequisites

To submit a price list simulation for approval, you should have:

- Price list simulation available in the pending status

Procedure

To submit a price list simulation for approval:

1. Search for the price list in the **Price List Simulation** screen.
2. In the **Search Results** section, click the **Price List Simulation- Proposal** (+ icon in the **Price List Simulation - Proposal** column corresponding to *t*he price list you want to submit for approval.
   The **Price List Simulation - Proposal** screen appears.
3. Propose new volume and price for the price item of the price list you want to submit for approval.
4. Click **Simulate**.

Note: Alternatively, you can click on the **Price List Simulation Results** ( ) icon in the **Price List Simulation Results** column corresponding to the price list whose simulation *r*esults you want to analyze in the price list search results section.

The **Price List Simulation Result** screen appears.

5. Analyze the details of the price list simulation which you want to submit for approval.
6. Click **Request Approval** button corresponding to the price list simulation which you want to submit for approval.
   The price list simulation is approved.

Extracting the Effective Pricing of a Price List Simulation

Procedure

To extract the effective pricing of a price list simulation:

1. Search for the price list whose effective pricing details you want extract in the **Price List Simulation** screen.
2. In the **Results** section, click the **Price List Simulation Result** ( ) icon in the **Price List Simulation Result** column corresponding to the price list whose effective pricing details you want extract.
   The **Price List Simulation Result** screen appears.
3. Click on the **Extract Effective Pricing** link corresponding to the price list simulation whose effective pricing details you want to extract.
   The effective pricing details are extracted in the excel format.

Pricing (Account)

The **Pricing (Account)** screen allows you to:

- View the list of effective price assignments of an account
- View the details of an assigned or inherited price item pricing
- Search and assign price items or price item bundles to an account
- Extract the effective price assignments of an account
- Edit or override a price item pricing
- Copy a price item pricing and assign it to an account

The **Pricing (Account)** screen contains the following zones:

- Effective Price Assignments for Account on page 591
- Price Item Pricing on page 671
- Price Assignment Tree on page 475
- Search Price Item or Price Item Pricing on page 643

Effective Price Assignments for Account

The **Effective Price Assignments for Account** zone lists the price item pricing (i.e. price assignments) which are effective on the current date. In other words, it lists effective pricing for price items or price item bundles assigned to the account either directly or through the customer hierarchy. The order in which the price assignments are listed is controlled by the **Price Assignment Search** algorithm defined for the division to which the account belongs. If required, you can filter effective price assignments using various search criteria.

Note: If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

The **Effective Price Assignments for Account** zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Indicates the account whose effective price assignments are listed in this zone.	Not applicable
Effective Pricing Date	Used to search price assignments which are effective on a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: By default, this field is set to the system date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
Assignment Level	Used to search price assignments at a particular level in the customer hierarchy. The valid values are: • **Account Agreed** - Means price item pricing is agreed for the account. • **Account Price List** - Means price item pricing is defined in the price list which is assigned to the account. • **Account Inherited Price List** - Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account. • **Bundle pricing** - Means price item pricing is defined for the price item bundle. • **Customer Agreed** - Means price item pricing is agreed for the main customer in the customer hierarchy. • **Customer Price List** - Means price item pricing is defined in the price list which is assigned to the main customer. • **Default Price List** - Means price item pricing defined in the price list is available in the default price list. • **Global Price List** - Means price item pricing defined in the price list is available in the global price list. • **Customer Inherited Price List** - Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the main customer. • **Market Product Pricing** - Means price item pricing is defined on market-specific rules. • **Offer Pricing** - Means price item pricing is related to an offer. • **Parent Customer Agreed** - Means price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Price List** - Means price item pricing is defined in the price list which is assigned to the parent customer. • **Parent Customer Inherited Price List** - Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.	No

Field Name	Field Description	Mandatory (Yes or No)
	• **Product Default Price List** - Means product defined in the price list is available in the default price list.	
Parent Person	Used to search price assignments which are inherited from a particular parent customer.	No
Pricing Status	Used to search price assignments with a particular status. The valid values are: • Active • Draft • Pending In Approval **Note:** Used to search price assignments that are defined for a deal and awaiting approval. • Proposed **Note:** Used to search price assignments that are proposed for a deal and awaiting approval. • Recommended **Note:** Used to search price assignments that are recommended for a deal. **Note:** By default, the **Active** option is selected.	No

Show Product, Default and Global Pricing	Used to indicate whether you want to search price assignments inherited from the default or global price list. The valid values are:
	• **Yes** - Used when you want to search price assignments inherited from either of the following:
	  • Product-specific default price list defined for the division
	  • Default price list defined for the division
	  • Global price list
	• **No** - Used when you do not want to search price assignments inherited from either of the following:
	  • Product-specific default price list defined for the division
	  • Default price list defined for the division
	  • Global price list
	Note: By default, the **No** option is selected.
		No

Price Item	Used to search price assignments of a particular price item or price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item**	No

Field Name	Field Description	Mandatory (Yes or No)
	Search window appears where you can search for the respective price item.	
Description	Used to search price assignments of a price item or price item bundle having a particular description.	No
Search Type	Used to search price assignments using the following values: • Best Fit • Exact Match **Note:** By default, the **Exact Match** option is selected.	No

- **Price Item Parameters** - The **Price Item Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search price assignments which are defined using a particular parameter. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective parameter. This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	No
Parameter Value	Used to specify the value of the parameter using which you want to search the effective price assignments of the account. **Note:** If you select a predefined or a reference parameter, the **Search** (🔍) icon appears corresponding to the **Parameter Value** field. On clicking the **Search** icon, the **Predefined Parameter Value Search** window or the **Parameter Value Search** window appears where you can select the respective parameter value. This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	No

Note:

You can only use those parameters where the source entity is set to **Transaction**.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string of information about the price item pricing. The information also contains the pricing ID of the price item pricing generated for the account. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the detail of the respective price item pricing.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Displays the parameters based on which the price item pricing is defined for the account. **Note:** The information in this column appears only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: • Account Agreed • Account Inherited Price List • Account Price List • Bundle Pricing • Customer Agreed • Customer Price List • Default Price List • Global Price List • Market Product Pricing • Offer Pricing • Customer Inherited Price List • Parent Customer Agreed • Parent Customer Price List • Parent Customer Inherited Price List • Product Default Price List
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the **Rate Info** column. However, if the price assignment has more than one price components, then the **Rate Info** column contains a string indicating the tiering type and pricing

Column Name	Column Description
	currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the **Price Item Pricing** screen.
Price List Information	Displays the information about the price list to which the price item pricing is assigned.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Edit	On clicking the **Edit** (✎) icon, the **Price Item Pricing** screen appears where you can edit the details of the price item pricing. **Note:** The **Edit** icon appears when the assignment level is **Account Agreed**.
Override	On clicking the **Override** (🚫) icon, the **Price Item Pricing** screen appears where you can override the price item pricing. **Note:** You can override a price item pricing assigned at any level in the customer hierarchy. On overriding a price item pricing, a new price item pricing which is specific to the account is defined at the account level and is then called account agreed pricing. A customer agreed or account agreed price assignments are effective for a particular duration and do not expire until you specify the end date manually. However, if you set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **Y**, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **N**.
Effective Start Date	Displays the date from when the price item pricing is effective for the account.
Effective End Date	Displays the date till when the price item pricing is effective for the account.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.

Note:

The number of records that can be displayed in the **Search Results** section is controlled via the **C1_PR_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1_PR_REC** feature configuration. For more information, refer to Setting the C1_PR_REC Feature Configuration on page 4656.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can extract the effective price assignments of an account by clicking the **Extract** button in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to a particular pricing information, the **Price Item Pricing** and **Price Assignment Tree** zones appear where you can view the details about the respective price item pricing.

Price Item Pricing

The **Price Item Pricing** zone displays the details of the price item pricing. It contains the following sections:

- **Pricing Information** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Start Date	Displays the date from when the pricing of the price item is effective for the account.
End Date	Displays the date till when the pricing of the price item is effective for the account.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account and as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. • **Post Processing - Price Item Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • **Regular** - Indicates that the pricing is used to generate regular bill segment. **Note:** This field is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. By default, the **Regular** option is selected in the **Price Assignment Type** field for price item which are applicable for **Pricing** and cannot be edited. The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the

Field Name	Field Description
	price item and when the price item is associated with another price item using the **Price Item** relationship type.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item or not.
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Active** - Indicates that the price assignment can be used for pricing and billing. • **Inactive** - Indicates that the price assignment is no longer available for pricing and billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for deal simulation and awaiting approval. • **Rejected** - Indicates that the price assignment is rejected in the system. • **Template** - Indicates that the price assignment is created as a template. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for deal simulation by the deal approver to the relationship manager.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Rate Schedule	Indicates the rate schedule that is used to define the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the rate schedule.
Pricing Rule Type	Indicates the pricing rule type. The valid value is: • Two-Dimensional **Note:** If you select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define two-dimensional pricing for the price item. However, if you do not select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define traditional flat, step, or tiered pricing for the price item. Also, you need to select the **Pricing Eligibility** option while defining a two-dimensional pricing for the price item.
Print Zero	Indicates whether the zero pricing is displayed in the bill. The valid values are:

Field Name	Field Description
	• Yes • No
Price Assignment Usage	Indicates whether the price item pricing is applicable for all customers or only for the new customers. The valid values are: • All Customers • New Customers **Note:** This field appears when you are viewing the details of a price item pricing assigned to a price list.
Pricing Frequency	Indicates the pricing frequency for the price item. **Note:** This field appears when you select the **Price Item Usage** as **Pricing** and **Price Item Type** as **Fees** while defining the price item.

- **Deal Information** - Displays information about how the average price floor and ceil limits of the price item pricing is mapped to a deal. It contains the following field:

Field Name	Field Description
Average Price Floor and Ceil Limits	Indicates the manner in which the average price floor and ceil limits of the price item pricing is defined for the deal. The valid values are: • **Absolute Value Range** - Indicates that the average price floor and ceil limits for the price item pricing is defined using absolute values. • **Spread Amount** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread amount. • **Spread Percentage** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread percentage. **Note:** In case of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage the average floor and ceil limits are derived.

- **TFM Information** - Displays the transaction feed management information mapped to the price item pricing. It contains the following fields:

Field Name	Field Description
Ignore Transaction	Indicates whether the transactions mapped to the price item pricing are considered for billing or not. The valid values are: • Yes • No
Do Not Aggregate Switch	Indicates whether aggregation is required while rating the transactions mapped to the price item pricing before billing. The valid values are: • **Yes** - Indicates that aggregation is not required while rating the transactions mapped to the price item pricing before billing. • **No** - Indicates that aggregation is required while rating the transactions mapped to the price item pricing before billing.
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are:

Field Name	Field Description
	• Daily • Weekly • Monthly • Quarterly • Yearly
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item pricing are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions **Note:** This field appears when the **Do Not Aggregate Switch** is set to **No**.

Note:

TFM Information section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1_FM feature configuration** is set to **Y** and **Price Item Usage** field is set to **Pricing and Billing**.

TFM Information section does not appear when the **Price Item Usage** field is set to **Only Pricing** and the **Price Item Type** field is set to **Fees**, then, only the **Pricing Frequency** field appears.

- **Price Item and Parameter Information** - Lists the parameters based on which the price item pricing is defined. It contains the following field:

Field Name	Field Description
Price Item	Displays the concatenated string of information about the price item or price item bundle for which the pricing is defined separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the price item.

In addition, the **Price Item and Parameter Information** section contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
Parameter Value	Displays the value of the parameter.

- **Division-Specific SQIs for Price Item** - Lists the SQIs associated with the price item pricing for a particular division. It contains the following columns:

Column Name	Column Description
SQI	Displays the SQI associated with the price item for pricing.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Service Quantity Identifier** screen appears where you can view the details of the respective SQI.
Daily Service Quantity	Displays the SQI usage for a single day.
Usage Period	Displays the duration for which the SQI is associated with the price item for pricing.
Division	Indicates the division for which the SQI is associated with the price item for pricing.

- **Division-Specific Cost for Price Item** - Lists the costs of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Cost Type	Indicates the type of cost incurred in the division for the price item pricing. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal • Fixed Third Party • Variable Internal • Variable Third Party
Cost Value	Displays the cost amount.

Note: By default, the **Pricing Currency** is considered as the currency code in which the cost is specified.

- **Division-Specific Floor & Ceil For Price Item** - Lists the average price floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates the users with the specified To Do role who can approve the average price of the price item in the price item pricing when it is within the specified floor and ceil limits. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Ceil Value	Displays the ceil (i.e. upper) limit for the To Do role to approve the average price of the price item pricing. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Floor Value	Displays the floor (i.e. lower) limit for the To Do role to approve the average price of the price item pricing. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.

Column Name	Column Description
Currency Code	Indicates the currency in which the average price floor and ceil limits are defined for the price item pricing. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Spread Amount	Displays the spread amount of the To Do role for approving the average price of the price item pricing. **Note:** This column appears when the **Spread Amount** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Spread Percentage	Displays the spread percentage of the To Do role for approving the average price of the price item in the price item pricing. **Note:** This column appears when the **Spread Percentage** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Division	Indicates the division for which the average price floor and ceil values of the price item pricing is defined.

- **Negotiability** - Lists the negotiability floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the negotiability floor and ceil limits of the price item pricing is defined.
Floor Value	Displays the floor (i.e. lower) limit for the rate negotiation.
Ceil Value	Displays the ceil (i.e. upper) limit for the rate negotiation.

Note: By default, the pricing currency is considered as the currency code in which the negotiability floor and ceil limits of the price item pricing is defined.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item pricing is defined in the system. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Price Item Pricing** zone does not appear in the **Pricing (Account)** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to the respective pricing information in the **Search Results** section of the **Effective Price Assignments for Account** zone.

Price Assignment Tree

The **Price Assignment Tree** zone displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details. It contains the following buttons:

Button Name	Button Description
Expand All	On clicking the **Expand All** button, all nodes in the price assignment tree are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price assignment tree are collapsed at once.

In addition, the **Price Assignment Tree** zone contains the following section:

- **Pricing & Commitment Details** - Displays the pricing and commitments information of the price item assigned to the account.

By default, the **Price Assignment Tree** zone does not appear in the **Pricing (Account)** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to the **Pricing Information** field in the search result of **Effective Price Assignments for Account** zone.

Note: You cannot define, edit, copy, or delete a price component when you are accessing the **Price Assignment Tree** zone from the **Pricing (Account)** screen.

Search Price Item or Price Item Pricing

You can either assign a price item to a price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item or Price Item Pricing** zone allows you to search for a price item pricing which is assigned to an account, person, or a price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, deal information, TFM information, pricing parameters, and characteristics and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item or Price Item Pricing** zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search price item pricing for a price item, account, person, or a price list. The valid values are: • Price Item Search • Price List Pricing • Account Override Pricing • Person Override Pricing	Yes
Price Item	Used to search pricing for a particular price item or price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears where you can search for the respective price item or price item bundle. The search icon does not appear when you select the **Price Item Search** option from the **Search By** list.	No
Description	Used to search price items or price item bundles having a particular description.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Price Item Search** option from the **Search By** list.	
Global Price List	Used to search price items or price item bundles which are assigned to a global price list. The valid values are: • Yes • No **Note:** This field appears when you select the **Price Item Search** option from the **Search By** list.	No
Bundle	Used to indicate whether you want to search for the pricing of a price item bundle or not. The valid values are: • Yes • No **Note:** This field appears when you select the **Price Item Search** option from the **Search By** list.	No
Hierarchy Entity	Used to search for price item pricing which belongs to a particular hierarchy entity. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Hierarchy Entity Search** window appears where you can search for the respective hierarchy entity.	No
Price List ID	Used to search for price item pricing which is assigned to a particular price list. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** window appears where you can search for the respective price list. This field appears when you select the **Price List Pricing** option from the **Search By** list.	No
Effective Start Date	Used to search price item pricing for a price list, account, or person which are effective from a particular date onwards. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No

Field Name	Field Description	Mandatory (Yes or No)
	This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	
Effective End Date	Used to search price item pricing for a price list, account, or person which are effective till a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	No
Pricing Status	Used to search price item pricing which is in a particular status. The valid values are: • Active • Draft • Inactive • Pending In Approval • Proposed • Recommended • Rejected • Template **Note:** This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	No
Price Assignment Type	Used to search for a particular type of price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	No
Account ID	Used to search price item pricing of a particular account. **Note:** The **Search** () icon appears corresponding to this field. On clicking the **Search** icon, the	No

Field Name	Field Description	Mandatory (Yes or No)
	Account Search window appears where you can search for the respective account. This field appears when you select the **Account Override Pricing** option from the **Search By** list.	
Person ID	Used to search price item pricing of a particular person. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Person Search** window appears where you can search for the respective person. This field appears when you select the **Person Override Pricing** option from the **Search By** list.	No

Note:

You must specify at least one search criterion while searching for a price item or a price item bundle.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price items or price item bundles that are associated with the division to which the account belongs. It may also include price items or price item bundles that are already assigned to the account in case those price items or price item bundles match the search criteria.

  The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the **Assign** (📝) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing for the account. **Note:** This column appears when you select the **Price Item Search** option from the **Search By** list.
Price Item Information	Displays the concatenated string of information about the price item or price item bundle separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item or price item bundle. This column appears only when you select the **Price Item Search** option from the **Search By** list.
Copy	On clicking the **Copy** (📋) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing using an existing price item pricing. **Note:** This column appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Pricing Information	Displays the concatenated string of information about the price item pricing separated by a comma (,). In addition, a context menu (⌄) appears corresponding to this field which helps in navigating to other screens in the application.

Column Name	Column Description
	Note: This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Price List Information	Displays the concatenated string of information about the price list to which the price item pricing is assigned separated by a comma (,). **Note:** This column appears only when you select the **Price List Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Account Information	Displays the concatenated string of information about the account to which the price item pricing is assigned separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** This column appears only when you select the **Account Override Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. The account information string appears when an algorithm defined using the **C1-AC-INFO** algorithm type is attached to the **Account Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
Person Information	Displays the concatenated string of information about the person to which the price item pricing is assigned separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** This column appears only when you select the **Person Override Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person. The person information string appears when an algorithm defined using the **PERS-INFO** algorithm type is attached to the **Person Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
Pricing Parameters	Displays a comma-separated list of parameters using which the price item pricing is defined. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item or price item bundle). **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list and when the **Multi Price Parameter** option type of the

Column Name	Column Description
	Multi Parameter Based Pricing (C1_PPARM_FLG) feature configuration is set to **False**.
Effective Start Date	Displays the date from when the price item pricing is effective. **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Effective End Date	Displays the date till when the price item pricing is effective. **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the respective rate schedule. This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Price Assignment Usage	Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • All Customers • New Customers **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list and when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Viewing the Effective Price Assignments of an Account

Prerequisites

To view the effective price assignments of an account, you should have:

- Price items or price item bundles assigned to the account either directly or through the customer hierarchy

Procedure

To view the effective price assignments of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account whose effective price assignments you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Account)** screen appears.
4. View the pricing of the price items or price item bundles assigned to the account (either directly or through the *c*ustomer hierarchy) in the **Effective Price Assignments for Account** zone.

How to filter the effective price assignments of an account	Filtering the Effective Price Assignments of an Account on page 610

Filtering the Effective Price Assignments of an Account

Prerequisites

To filter the effective price assignments of an account, you should have:

- Price items or price item bundles defined in the application
- Parameters defined in the application (where the source entity is set to **Transaction**)
- Price items or price item bundles assigned to the account either directly or through the customer hierarchy

Procedure

To filter the effective price assignments of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account whose effective price assignments you want to view.

A menu appears.

3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Account)** screen appears.
4. Enter the search criteria in the **Effective Price Assignments for Account** zone.

Note:

You can filter the list using various search criteria (such as, **Assignment Level**, **Effective Pricing Date**, **Parent Person**, **Pricing Status**, **Show Product, Default and Global Pricing**, **Search Type** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** ( ) icon in the upper right corner of this zone.

You can also filter the effective price assignments for the account by specifying the price item pricing parameters in the **Price Item Parameters** section of the **Effective Price Assignments for Account** zone.

The **Price Item Parameters** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to filter the effective price assignments for the account by specifying the price item pricing parameter. **Note:** The **Search** ( ) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective price item pricing parameter.	Yes (Conditional) **Note:** This field is required to filter the effective price assignments for the account using the price item pricing parameters.
Parameter Value	Used to specify the value of the price item pricing parameter.	Yes (Conditional) **Note:** This field is required to filter the effective price assignments for the account using the price item pricing parameters.

If you want to add more than one price item pricing parameter in the search criteria, click the **Add** (+) icon and then enter the parameter name and its value. However, if you want to remove a price item pricing parameter from the search criteria, click the **Delete** ( ) icon corresponding to the price item pricing parameter.

You can only use those price item pricing parameters where the source entity is set to **Transaction**.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of price assignments which are effective on the specified date and that meet the search criteria are listed in the **Search Results** section of the **Effective Price Assignments for Account** zone.

Extracting Effective Price Assignments of an Account

Prerequisites

To extract effective price assignments of an account, you should have:

- Price items or price item bundles assigned to the account either directly or through the customer hierarchy

Procedure

To extract effective price assignments of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account whose *d*etails you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Account)** screen appears.
4. Filter the effective price assignments of the account, if required.
5. Click the **Extract** button in the **Effective Price Assignments for Account** zone.
   The **Effective Pricing Extraction** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	Used to indicate the format in which you want to extract the effective price assignments of the account. The valid values are: • Excel • PDF	Yes

6. Click the **Extract** button.
   The effective pricing of the account is extracted in the selected format.

Note: If you extract the effective pricing in the **PDF** format, the effective pricing window appears with the details of the effective pricing of the account. You can then download the file into your local system. However, if you extract the effective pricing in the **Excel** format, the details of the effective pricing of the account is automatically downloaded into your local system.

The extracted **Excel** format contain the following fields:

Field Name	Field Description
Extracted By	Displays the user who has extracted the effective pricing of the account.
Extracted On	Displays the date of the extraction.
Customer	Displays information about the customer to which the account belongs.

Field Name	Field Description
Account	Displays information about the account whose effective pricing is extracted.

In addition, the extracted **Excel** format contains the following columns:

Column Name	Column Description
Price Item / Price Item Group	Displays the price item or the price item bundle.
Price Item Parameters	Displays the parameters based on which the pricing of the price item is defined. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price	Displays information about the effective price item pricing for the account.

The extracted **PDF** format contain the following fields:

Field Name	Field Description
Customer	Displays information about the customer to which the account belongs.
Account	Displays information about the account whose effective pricing is extracted.

In addition, the extracted **PDF** format contains the following columns:

Column Name	Column Description
Price Item / Price Item Group	Displays the price item or the price item bundle.
Price Item Parameters	Displays the parameters based on which the pricing of the price item is defined. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price	Displays information about the effective price item pricing for the account.

Copying a Price Item Pricing

Prerequisites

To copy a price item pricing and assign it to an account, you should have:

- Account (to which you want to assign the price item pricing) defined in the application
- Account associated with the division to which the user belongs
- Price item pricing (whose copy you want to create) defined in the application

Procedure

To copy a price item pricing and assign it to an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account for which you want to copy a price item pricing.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Account)** screen appears.
4. In the **Search Price Item or Price Item Pricing** zone, select the required option from the **Search By** list to indicate whether you *w*ant to search price item pricing assigned to an account, person, or a price list.

   Note: The fields in the **Search Criteria** section change depending on the option that you select from the **Search By** list.
5. Enter the search criteria in the **Search Price Item or Price Item Pricing** zone to search for the price item pricing whose copy you *w*ant to create and assign it to the account.
6. Click **Search**.
   A list of price assignments that meet the search criteria appears in the **Search Results** section.
7. In the **Search Results** section, click the **Copy** (⧉) icon in the **Copy** column corresponding to the price *i*tem pricing whose copy you want to create.

   The **Price Item Pricing** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price item pricing.
   - **Deal Information** - Used to specify how the average price floor and ceil limits of the price item pricing is mapped to a deal.
   - **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

     Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
   - **Characteristics** - Used to define the characteristics for the price item pricing.
   - **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.
   - **Commitments** - Used to specify the following details about the pricing and commitments for the price item pricing:
     - Division-specific cost for the price item
     - Division-specific floor and ceil values for the price item
     - Division-specific negotiability floor and ceil values for the price item

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** By default, the current system date appears in this field. The effective start date cannot be later than the effective end date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on	Yes

Field Name	Field Description	Mandatory (Yes or No)
	both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Proposed** - Indicates that the price assignment is used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Recommended** - Indicates that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal.	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are defining a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

8. Enter the required details in the **Main** section.

   Note:

   If you change the effective start and end dates while copying a price item pricing, you need to specify the parameters which are effective during that date range.

   While copying a price item pricing, you can not only edit the existing tiering combination details, but can also add additional tiering combinations until the maximum tiering combinations limit is met.

   If you are creating a copy of active, proposed, inactive, rejected, or template price item pricing, you can save the new price item pricing in the **Active** or **Proposed** status.
9. Add, edit, or remove the deal information for the price item pricing in the **Deal Information** section, if required.
10. Add, edit, or remove the TFM Information in a price item pricing, if required.
11. Add, edit, or remove the characteristics for a price item pricing, if required.
12. Add, edit, or remove the parameters for a price item pricing, if required.
13. Add, edit, or remove the division-specific cost of the price item in the **Commitments** section, if required.
14. Add, edit, or remove the division-specific average price floor and ceil limits of the price item in the **Commitments** section, if required.
15. Add, edit, or remove the division-specific rate negotiability floor and ceil limits of the price item in the **Commitments**
16. Click **Save**.
    The changes made to the price item pricing are saved.
17. Click **Submit**.
    A new price item pricing is defined and assigned to the account.

Editing a Price Item Pricing of an Account

Prerequisites

To edit a price item pricing of an account, you should have:

- Transactions mapped to the price item defined in the application

- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

Procedure

To edit a price item pricing of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the account whose *d*etails you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Account)** screen appears.
4. Search price assignments effective for the account appears in the **Effective Price Assignments for Account** zone.
5. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item *p*ricing whose details you want to edit.
   The **Price Item Pricing** screen appears. It contains the following sections:
   - **Main** - Used to specify basic details about the price item pricing.
   - **Deal Information** - Used to specify how the average price floor and ceil limits of the price item pricing is mapped to a deal.
   - **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

     Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
   - **Characteristics** - Used to define the characteristics for the price item pricing.
   - **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.
   - **Commitments** - Used to specify the following details about the pricing and commitments for the price item pricing:
     - Division-specific cost for the price item
     - Division-specific floor and ceil values for the price item
     - Division-specific negotiability floor and ceil values for the price item

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** The effective start date cannot be later than the effective end date. If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range. This field will be in read-only mode when the price assignment has been used.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: This will not be applicable for price item which are defined for **Only Pricing**.	
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing. **Note:** This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Active** - Indicates that the price assignment is used for billing. • **Inactive** - Indicates that the price assignment is no longer used for billing. • **Recommended** - Indicates that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal. **Note:** If a price assignment is in **Active** status, you can change its status to **Inactive**. If a price assignment is in **Draft** status, you cannot change its status to **Proposed**.	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are editing a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Yes • No **Note:** By default, **Yes** is selected.	
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

6. Modify the details in the **Main** section, if required.
7. Edit the deal information for the price item pricing in the **Deal Information** section.
8. Edit the TFM Information in a price item pricing, if required.
9. Edit the characteristics for a price item pricing, if required.
10. Edit the parameters for a price item pricing, if required.
11. Edit the division-specific cost of the price item in the **Commitments** section, if required.
12. Edit the division-specific average price floor and ceil limits of the price item in the **Commitments** section, if required.
13. Edit the division-specific rate negotiability floor and ceil limits of the price item in the **Commitments**
14. Click **Save**.
    The changes made to the price item pricing are saved.

- View the details of an assigned or inherited price item pricing
- Search and assign price items or price item bundles to a person
- Extract the effective price assignments of a person
- Edit or override a price item pricing
- Copy a price item pricing and assign it to a person

You can also view effective price assignments of a global person (i.e. a person who is not associated to any division) in this screen. The pricing for all price items or price item bundles assigned to the global person either directly or through a price list appears in this screen. However, you will be able to view pricing for only those price items or price item bundles that are associated to the division to which you have access.

Since a global person is not associated to any division, the system cannot determine the price assignment search order for a global person. Hence, the default search order is defined for global persons through the **C1_PRASNORDR** feature configuration. This feature configuration contains the **Price Assignment Algorithm** option type where you need to specify the algorithm which contains default search order for global persons. You can change this default search order, if required. The valid search order values are - **AGREED_PRICELIST** and **AGREED_FIRST**. You can also create a custom search order, if required.

The **Pricing (Person)** screen contains the following zones:

- Effective Price Assignments for Person on page 630
- Price Item Pricing on page 671
- Price Assignment Tree on page 475
- Search Price Item or Price Item Pricing on page 643

Effective Price Assignments for Person

The **Effective Price Assignments for Person** zone lists the price item pricing (i.e. price assignments) which are effective on the current date. In other words, it lists effective pricing for price items or price item bundles assigned to the person either directly or through the customer hierarchy. The order in which the price assignments are listed is controlled by the **Price Assignment Search** algorithm defined for the division to which the person belongs. If required, you can filter effective price assignments using various search criteria.

Note: If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for

the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

The **Effective Price Assignments for Person** zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Indicates the person whose effective price assignments are listed in this zone.	Not applicable
Effective Pricing Date	Used to search price assignments which are effective on a particular date. **Note:** By default, this field is set to the system date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Assignment Level	Used to search price assignments at a particular level in the customer hierarchy. The valid values are: • **Bundle pricing** - Means price item pricing is defined for the price item bundle. • **Customer Agreed** - Means price item pricing is agreed for the main customer in the customer hierarchy. • **Customer Price List** - Means price item pricing is defined in the price list which is assigned to the main customer. • **Default Price List** - Means price item pricing defined in the price list is available in the default price list. • **Global Price List** - Means price item pricing defined in the price list is available in the global price list. • **Customer Inherited Price List** - Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the main customer. • **Parent Customer Agreed** - Means price item pricing is agreed for the parent customer in the customer hierarchy. • **Parent Customer Price List** - Means price item pricing is defined in the price list which is assigned to the parent customer. • **Parent Customer Inherited Price List** - Means price item pricing is inherited from the parent price	No

Field Name	Field Description	Mandatory (Yes or No)
	list hierarchy defined for the price list which is assigned to the parent customer.	
Parent Person	Used to search price assignments which are inherited from a particular parent customer.	No
Pricing Status	Used to search price assignments with a particular status. The valid values are: • Active • Draft • Pending In Approval **Note:** Used to search price assignments that are defined for a deal and awaiting approval. • Proposed **Note:** Used to search price assignments that are proposed for a deal and awaiting approval. • Recommended **Note:** Used to search price assignments that are recommended for a deal. **Note:** By default, the **Active** option is selected.	No

Show Product, Default and Global Pricing	Used to indicate whether you want to search price assignments inherited from the default or global price list. The valid values are:
	• **Yes** - Used when you want to search price assignments inherited from either of the following:
	  • Product-specific default price list defined for the division
	  • Default price list defined for the division
	  • Global price list
	• **No** - Used when you do not want to search price assignments inherited from either of the following:
	  • Product-specific default price list defined for the division
	  • Default price list defined for the division
	  • Global price list
	Note: By default, the **No** option is selected.
		No

Price Item	Used to search price assignments of a particular price item or price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears where you can search for the respective price item.	No

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to search price assignments of a price item or price item bundle having a particular description.	No
Search Type	Used to search price assignments using the following values: • Best Fit • Exact Match **Note:** By default, the **Exact Match** option is selected.	No

- **Price Item Parameters** - The **Price Item Parameters** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search price assignments which are defined using a particular parameter. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective parameter. This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	No
Parameter Value	Used to specify the value of the parameter using which you want to search the effective price assignments of the person. **Note:** If you select a predefined or reference parameter, the **Search** (🔍) icon appears corresponding to the **Parameter Value** field. On clicking the **Search** icon, the **Predefined Parameter Value Search** window or the **Parameter Value Search** window appears where you can select the respective parameter value. This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	No

Note:

You can only use those parameters where the source entity is set to **Transaction**.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string of information about the price item pricing. The information also contains the pricing ID of the price item pricing generated for the account. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears with the details of the respective price item pricing.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Displays the pricing parameters based on which the pricing of the price item pricing is defined. **Note:** This column appears only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price Assignment Type	Indicates the type of price item pricing for assignment type. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: • Bundle pricing • Customer Agreed • Customer Price List • Default Price List • Global Price List • Customer Inherited Price List • Parent Customer Agreed • Parent Customer Price List • Parent Customer Inherited Price List
Rate Info	Displays the rate of the price item. **Note:** If the price assignment has only one price component, you can view the rate defined in the pricing directly through the **Rate Info** column. However, if the price assignment has more than one price components, then the **Rate Info** column contains a string indicating the tiering type and pricing currency. It also contains "..." which indicates that for more information about the pricing you should navigate to the **Price Item Pricing** screen.
Price List Information	Displays the information about the price list which is assigned to the account.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Edit	On clicking the **Edit** (✎) icon, the **Price Item Pricing** screen appears where you can edit the details of the price item pricing. **Note:** The **Edit** icon appears when the assignment level is **Customer Agreed**.

Column Name	Column Description
Override	On clicking the **Override** ( ) icon, the **Price Item Pricing** screen appears where you can override the price item pricing. **Note:** You can override a price item pricing assigned at any level in the customer hierarchy. On overriding a price item pricing, a new price item pricing which is specific to the account is defined at the account level and is then called account agreed pricing. A customer agreed or account agreed price assignments are effective for a particular duration and do not expire until you specify the end date manually. However, if you set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **Y**, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the **Expire Override Switch** option type of the **C1_EXP_OVRD** feature configuration to **N**.
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.

Note:

The number of records that can be displayed in the **Search Results** section is controlled via the **C1_PR_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1_PR_REC** feature configuration. For more information, refer to Setting the C1_PR_REC Feature Configuration on page 4656.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can extract the effective price assignments of a person by clicking the **Extract** button in the upper right corner of this zone.

On clicking the **Broadcast** ( ) icon corresponding to the **Pricing Information** field, the **Price Item Pricing** and **Price Assignment Tree** zones appear where you can view the details about the price item pricing and its structure.

Price Item Pricing

The **Price Item Pricing** zone displays the details of the price item pricing. It contains the following sections:

- **Pricing Information** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Start Date	Displays the date from when the pricing of the price item is effective for the person.
End Date	Displays the date till when the pricing of the price item is effective for the person.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account and as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. • **Post Processing - Price Item Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • **Regular** - Indicates that the pricing is used to generate regular bill segment. **Note:** This field is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. By default, the **Regular** option is selected in the **Price Assignment Type** field for price item which are applicable for **Pricing** and cannot be edited. The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item or not.
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Active** - Indicates that the price assignment can be used for pricing and billing. • **Inactive** - Indicates that the price assignment is no longer available for pricing and billing.

Field Name	Field Description
	• **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for deal simulation and awaiting approval. • **Rejected** - Indicates that the price assignment is rejected in the system. • **Template** - Indicates that the price assignment is created as a template. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for deal simulation by the deal approver to the relationship manager.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Rate Schedule	Indicates the rate schedule that is used to define the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the rate schedule.
Pricing Rule Type	Indicates the pricing rule type. The valid value is: • Two-Dimensional **Note:** If you select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define two-dimensional pricing for the price item. However, if you do not select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define traditional flat, step, or tiered pricing for the price item. Also, you need to select the **Pricing Eligibility** option while defining a two-dimensional pricing for the price item.
Print Zero	Indicates whether the zero pricing is displayed in the bill. The valid values are: • Yes • No
Price Assignment Usage	Indicates whether the price item pricing is applicable for all customers or only for the new customers. The valid values are: • All Customers • New Customers **Note:** This field appears when you are viewing the details of a price item pricing assigned to a price list.
Pricing Frequency	Indicates the pricing frequency for the price item.

Field Name	Field Description
	Note: This field appears when you select the **Price Item Usage** as **Pricing** and **Price Item Type** as **Fees** while defining the price item.

- **Deal Information** - Displays information about how the average price floor and ceil limits of the price item pricing is mapped to a deal. It contains the following field:

Field Name	Field Description
Average Price Floor and Ceil Limits	Indicates the manner in which the average price floor and ceil limits of the price item pricing is defined for the deal. The valid values are: • **Absolute Value Range** - Indicates that the average price floor and ceil limits for the price item pricing is defined using absolute values. • **Spread Amount** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread amount. • **Spread Percentage** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread percentage. **Note:** In case of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage the average floor and ceil limits are derived.

- **TFM Information** - Displays the transaction feed management information mapped to the price item pricing. It contains the following fields:

Field Name	Field Description
Ignore Transaction	Indicates whether the transactions mapped to the price item pricing are considered for billing or not. The valid values are: • Yes • No
Do Not Aggregate Switch	Indicates whether aggregation is required while rating the transactions mapped to the price item pricing before billing. The valid values are: • **Yes** - Indicates that aggregation is not required while rating the transactions mapped to the price item pricing before billing. • **No** - Indicates that aggregation is required while rating the transactions mapped to the price item pricing before billing.
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item pricing are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**.

Field Name	Field Description
	• Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions **Note:** This field appears when the **Do Not Aggregate Switch** is set to **No**.

Note:

TFM Information section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1_FM feature configuration** is set to **Y** and **Price Item Usage** field is set to **Pricing and Billing**.

TFM Information section does not appear when the **Price Item Usage** field is set to **Only Pricing** and the **Price Item Type** field is set to **Fees**, then, only the **Pricing Frequency** field appears.

- **Price Item and Parameter Information** - Lists the parameters based on which the price item pricing is defined. It contains the following field:

Field Name	Field Description
Price Item	Displays the concatenated string of information about the price item or price item bundle for which the pricing is defined separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the price item.

In addition, the **Price Item and Parameter Information** section contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
Parameter Value	Displays the value of the parameter.

- **Division-Specific SQIs for Price Item** - Lists the SQIs associated with the price item pricing for a particular division. It contains the following columns:

Column Name	Column Description
SQI	Displays the SQI associated with the price item for pricing. **Note:** It has a link. On clicking the link, the **Service Quantity Identifier** screen appears where you can view the details of the respective SQI.
Daily Service Quantity	Displays the SQI usage for a single day.
Usage Period	Displays the duration for which the SQI is associated with the price item for pricing.
Division	Indicates the division for which the SQI is associated with the price item for pricing.

- **Division-Specific Cost for Price Item** - Lists the costs of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Cost Type	Indicates the type of cost incurred in the division for the price item pricing. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal • Fixed Third Party • Variable Internal • Variable Third Party
Cost Value	Displays the cost amount.

Note: By default, the **Pricing Currency** is considered as the currency code in which the cost is specified.

- **Division-Specific Floor & Ceil For Price Item** - Lists the average price floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates the users with the specified To Do role who can approve the average price of the price item in the price item pricing when it is within the specified floor and ceil limits. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Ceil Value	Displays the ceil (i.e. upper) limit for the To Do role to approve the average price of the price item pricing. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Floor Value	Displays the floor (i.e. lower) limit for the To Do role to approve the average price of the price item pricing. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Currency Code	Indicates the currency in which the average price floor and ceil limits are defined for the price item pricing. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Spread Amount	Displays the spread amount of the To Do role for approving the average price of the price item pricing. **Note:** This column appears when the **Spread Amount** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Spread Percentage	Displays the spread percentage of the To Do role for approving the average price of the price item in the price item pricing.

Column Name	Column Description
	Note: This column appears when the **Spread Percentage** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Division	Indicates the division for which the average price floor and ceil values of the price item pricing is defined.

- **Negotiability** - Lists the negotiability floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the negotiability floor and ceil limits of the price item pricing is defined.
Floor Value	Displays the floor (i.e. lower) limit for the rate negotiation.
Ceil Value	Displays the ceil (i.e. upper) limit for the rate negotiation.

Note: By default, the pricing currency is considered as the currency code in which the negotiability floor and ceil limits of the price item pricing is defined.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item pricing is defined in the system. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Price Item Pricing** zone does not appear in the **Pricing (Person)** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the respective pricing information in the **Search Results** section of the **Effective Price Assignments for Person** zone.

Related Topics

Price Assignment Tree

The **Price Assignment Tree** zone displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details. It contains the following buttons:

Button Name	Button Description
Expand All	On clicking the **Expand All** button, all nodes in the price assignment tree are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price assignment tree are collapsed at once.

In addition, the **Price Assignment Tree** zone contains the following section:

- **Pricing & Commitment Details** - Displays the pricing and commitments information of the price item assigned to the person.

By default, the **Price Assignment Tree** zone does not appear in the **Pricing (Person)** screen. It appears when you click the **Broadcast** (((•))) icon corresponding to the **Pricing Information** field in the search result of **Effective Price Assignments for Person** zone.

Note: You cannot define, edit, copy, or delete a price component when you are accessing the **Price Assignment Tree** zone from the **Pricing (Person)** screen.

Search Price Item or Price Item Pricing

You can either assign a price item to a price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item or Price Item Pricing** zone allows you to search for a price item pricing which is assigned to an account, person, or a price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, deal information, TFM information, pricing parameters, and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item or Price Item Pricing** zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search price item pricing for a price item, account, person, or a price list. The valid values are: • Price Item • Price List Pricing • Account Override Pricing • Person Override Pricing	Yes
Price Item	Used to search pricing for a particular price item or price item bundle. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears where you can search for the respective price item or price item bundle. The search icon does not appear when you select the **Price Item Search** option from the **Search By** list.	No
Description	Used to search price items or price item bundles having a particular description. **Note:** This field appears when you select the **Price Item Search** option from the **Search By** list.	No
Global Price List	Used to search price items or price item bundles which are assigned to a global price list. The valid values are: • Yes • No	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears only when you select the **Price Item Search** option from the **Search By** list.	
Bundle	Used to indicate whether you want to search for the pricing of a price item bundle or not. The valid values are: • Yes • No **Note:** This field appears only when you select the **Price Item Search** option from the **Search By** list.	No
Hierarchy Entity	Used to search for price item pricing which belongs to a particular hierarchy entity. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Hierarchy Entity Search** window appears where you can search for the respective hierarchy entity.	No
Price List ID	Used to search for price item pricing which is assigned to a particular price list. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** window appears where you can search for the respective price list. This field appears only when you select the **Price List Pricing** option from the **Search By** list.	No
Effective Start Date	Used to search price item pricing for a price list, account, or person which are effective from a particular date onwards. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. This field appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	No
Effective End Date	Used to search price item pricing for a price list, account, or person which are effective till a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. This field appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	
Pricing Status	Used to search price item pricing which is in a particular status. The valid values are: • Active • Draft • Inactive • Pending In Approval • Proposed • Recommended • Rejected • Template **Note:** This field appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	No
Price Assignment Type	Used to search for a particular type of price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This field appears when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.	No
Account ID	Used to search price item pricing of a particular account. **Note:** The **Search** () icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** window appears where you can search for the respective account. This field appears only when you select the **Account Override Pricing** option from the **Search By** list.	No
Person ID	Used to search price item pricing of a particular person.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Person Search** window appears where you can search for the respective person. This field appears only when you select the **Person Override Pricing** option from the **Search By** list.	

Note:

You must specify at least one search criterion while searching for a price item or price item pricing.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price items or price item bundles that are associated with the division to which the person belongs. However, if the person does not belong to any division, the search will be performed against all price items or price item bundles defined in the system. It may also include price items or price item bundles that are already assigned to the person in case those price items or price item bundles match the search criteria.

  The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the **Assign** (📝) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing for the person. **Note:** This column appears only when you select the **Price Item Search** option from the **Search By** list.
Price Item Information	Displays the concatenated string of information about the price item or price item bundle separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item or price item bundle. This column appears only when you select the **Price Item Search** option from the **Search By** list.
Copy	On clicking the **Copy** (📋) icon, the **Price Item Pricing** screen appears where you can define a new price item pricing using an existing price item pricing.
Pricing Information	Displays the concatenated string of information about the price item pricing separated by a comma (,). In addition, a context menu (⌄) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Price List Information	Displays the concatenated string of information about the price list to which the price item pricing is assigned separated by a comma (,).

Column Name	Column Description
	Note: This column appears only when you select the **Price List Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Account Information	Displays the concatenated string of information about the account to which the price item pricing is assigned separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** This column appears only when you select the **Account Override Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. The account information string appears when an algorithm defined using the **C1-AC-INFO** algorithm type is attached to the **Account Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
Person Information	Displays the concatenated string of information about the person to which the price item pricing is assigned separated by a comma (,). In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** This column appears only when you select the **Person Override Pricing** option from the **Search By** list. It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person. The person information string appears when an algorithm defined using the **PERS-INFO** algorithm type is attached to the **Person Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
Pricing Parameters	Displays a comma-separated list of parameters using which the price item pricing is defined. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item or price item bundle). **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list and when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.
Effective Start Date	Displays the date from when the price item pricing is effective. **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.

Column Name	Column Description
Effective End Date	Displays the date till when the price item pricing is effective. **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the respective rate schedule. This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Price Assignment Usage	Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • All Customers • New Customers **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based **Note:** This column appears only when you select the **Price List Pricing**, **Account Override Pricing**, or **Person Override Pricing** option from the **Search By** list and when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Viewing the Effective Price Assignments of a Person

Prerequisites

To view the effective price assignments of a person, you should have:

- Price items or price item bundles assigned to the person either directly or through the customer hierarchy

Procedure

To view the effective price assignments of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the person whose effective price assignments you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Person)** screen appears.
4. View the pricing of the price items or price item bundles assigned to the person (either directly or through the customer hierarchy) in the **Effective Price Assignments for Person** zone.

Related Topics

How to filter the effective price assignments of a person	Filtering the Effective Price Assignments of a Person on page 649

Filtering the Effective Price Assignments of a Person

Prerequisites

To filter the effective price assignments of a person, you should have:

- Price items or price item bundles defined in the application
- Parameters defined in the application (where the source entity is set to **Transaction**)
- Price items or price item bundles assigned to the person either directly or through the customer hierarchy

Procedure

To filter the effective price assignments of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the person whose effective price assignments you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Person)** screen appears.
4. Enter the search criteria in the **Effective Price Assignments for Person** zone.

Note:

You can filter the list using various search criteria (such as, **Assignment Level**, **Effective Pricing Date**, **Parent Person**, **Pricing Status**, **Show Product, Default and Global Pricing**, **Search Type** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** ( ) icon in the upper right corner of this zone.

You can also filter the effective price assignments for the person by specifying the price item pricing parameters in the **Price Item Parameters** section of the **Effective Price Assignments for Person** zone.

The **Price Item Parameters** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to filter the effective price assignments for the person by specifying the price item pricing parameter. **Note:** The **Search** ( ) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective price item pricing parameter.	Yes (Conditional) **Note:** This field is required to filter the effective price assignments for the person using the price item pricing parameters.
Parameter Value	Used to specify the value of the price item pricing parameter.	Yes (Conditional) **Note:** This field is required to filter the effective price assignments for the person using the price item pricing parameters.

If you want to add more than one price item pricing parameter in the search criteria, click the **Add** (+) icon and then enter the parameter name and its value. However, if you want to remove a price item pricing parameter from the search criteria, click the **Delete** ( ) icon corresponding to the price item pricing parameter.

You can only use those price item pricing parameters where the source entity is set to **Transaction**.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of price assignments which are effective on the specified date and that meet the search criteria are listed in the **Search Results** section of the **Effective Price Assignments for Person** zone.

Extracting Effective Price Assignments of a Person

Prerequisites

To extract effective price assignments of a person, you should have:

- Price items or price item bundles assigned to the person either directly or through the customer hierarchy

Procedure

To extract effective price assignments of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the person whose *d*etails you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Person)** screen appears.
4. Search for the effective price assignments of the person, if required.
5. Click the **Extract** button in the **Effective Price Assignments for Person** zone.
   The **Effective Pricing Extraction** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Extract Format	Used to indicate the format in which you want to extract the effective price assignments of the person. The valid values are: • Excel • PDF	Yes

6. Click the **Extract** button.
   The effective pricing of the person is extracted in the selected format.

Note: If you extract the effective pricing in the **PDF** format, the effective pricing window appears with the details of the effective pricing of the person. You can then download the file into your local system. However, if you extract the effective pricing in the **Excel** format, the details of the effective pricing of the person is automatically downloaded into your local system.

The extracted **Excel** format contain the following fields:

Field Name	Field Description
Extracted By	Displays the user who has extracted the effective pricing of the person.
Extracted On	Displays the date of the extraction.
Customer	Displays information about the customer whose effective pricing is extracted.
Account	Displays information about the person's account whose effective pricing is extracted.

In addition, the extracted **Excel** format contains the following columns:

Column Name	Column Description
Price Item / Price Item Group	Displays the price item or the price item bundle.

Column Name	Column Description
Price Item Parameters	Displays the parameters based on which the pricing of the price item is defined. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price	Displays information about the effective price item pricing for the person.

The extracted **PDF** format contain the following fields:

Field Name	Field Description
Customer	Displays information about the customer whose effective pricing is extracted.
Account	Displays information about the person's account whose effective pricing is extracted.

In addition, the extracted **PDF** format contains the following columns:

Column Name	Column Description
Price Item / Price Item Group	Displays the price item or the price item bundle.
Price Item Parameters	Displays the parameters based on which the pricing of the price item is defined. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price	Displays information about the effective price item pricing for the person.

Copying a Price Item Pricing

Prerequisites

To copy a price item pricing and assign it to a person, you should have:

- Person (to which you want to assign the price item pricing) defined in the application
- Person associated with the division to which the user belongs
- Price item pricing (whose copy you want to create) defined in the application

Procedure

To copy a price item pricing and assign it to a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the person for which you want to copy a price item pricing.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Person)** screen appears.
4. In the **Search Price Item or Price Item Pricing** zone, select the required option from the **Search By** list to indicate whether you *w*ant to search price item pricing assigned to an account, person, or a price list.

   Note: The fields in the **Search Criteria** section change depending on the option that you select from the **Search By** list.
5. Enter the search criteria in the **Search Price Item or Price Item Pricing** zone to search for the price item pricing whose copy you *w*ant to create and assign it to the person.
6. Click **Search**.
   A list of price assignments that meet the search criteria appears in the **Search Results** section.
7. In the **Search Results** section, click the **Copy** (⧉) icon in the **Copy** column corresponding to the price *i*tem pricing whose copy you want to create.

   The **Price Item Pricing** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price item pricing.
   - **Deal Information** - Used to specify how the average price floor and ceil limits of the price item pricing is mapped to a deal.
   - **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

     Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
   - **Characteristics** - Used to define the characteristics for the price item pricing.
   - **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.
   - **Commitments** - Used to specify the following details about the pricing and commitments for the price item pricing:
     - Division-specific cost for the price item
     - Division-specific floor and ceil values for the price item
     - Division-specific negotiability floor and ceil values for the price item

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** By default, the current system date appears in this field. The effective start date cannot be later than the effective end date.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	Yes
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Draft** - Indicates that the price assignment is created as a draft. • **Proposed** - Indicates that the price assignment is used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Recommended** - Indicates that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal.	
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are defining a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

8. Enter the required details in the **Main** section.

Note:

If you change the effective start and end dates while copying a price item pricing, you need to specify the parameters which are effective during that date range.

While copying a price item pricing, you can not only edit the existing tiering combination details, but can also add additional tiering combinations until the maximum tiering combinations limit is met.

If you are creating a copy of active, proposed, inactive, rejected, or template price item pricing, you can save the new price item pricing in the **Active** or **Proposed** status.

9. Add, edit, or remove the deal information for the price item pricing in the **Deal Information** section, if required.
10. Add, edit, or remove the TFM Information in a price item pricing, if required.
11. Add, edit, or remove the characteristics for a price item pricing, if required.
12. Add, edit, or remove the parameters for a price item pricing, if required.
13. Add, edit, or remove the division-specific cost of the price item in the **Commitments** section, if required.
14. Add, edit, or remove the division-specific average price floor and ceil limits of the price item in the **Commitments** section, if required.
15. Add, edit, or remove the division-specific rate negotiability floor and ceil limits of the price item in the **Commitments**
16. Click **Save**.
    The changes made to the price item pricing are saved.
17. Click **Submit**.
    A new price item pricing is defined and assigned to the person.

Editing a Price Item Pricing of a Person

Prerequisites

To edit a price item pricing of a person, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

Procedure

To edit a price item pricing of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the person whose *d*etails you want to view.

A menu appears.

3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Person)** screen appears.
4. Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone.
5. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item *p*ricing whose details you want to edit.
   The **Price Item Pricing** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price item pricing.
   - **Deal Information** - Used to specify how the average price floor and ceil limits of the price item pricing is mapped to a deal.
   - **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

     Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
   - **Characteristics** - Used to define the characteristics for the price item pricing.
   - **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.
   - **Commitments** - Used to specify the following details about the pricing and commitments for the price item pricing:

     - Division-specific cost for the price item
     - Division-specific floor and ceil values for the price item
     - Division-specific negotiability floor and ceil values for the price item

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** The effective start date cannot be later than the effective end date. If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range. This field will be in read-only mode when the price assignment has been used. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date.	No

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	Yes
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing. **Note:** This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Active** - Indicates that the price assignment is used for billing. • **Inactive** - Indicates that the price assignment is no longer used for billing. • **Recommended** - Indicates that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal. **Note:** If a price assignment is in **Active** status, you can change its status to **Inactive**. If a price assignment is in **Draft** status, you cannot change its status to **Proposed**.	
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are editing a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

6. Modify the details in the **Main** section, if required.
7. Edit the deal information for the price item pricing in the **Deal Information** section.
8. Edit the TFM Information in a price item pricing, if required.

9. Edit the characteristics for a price item pricing, if required.
10. Edit the parameters for a price item pricing, if required.
11. Edit the division-specific cost of the price item in the **Commitments** section, if required.
12. Edit the division-specific average price floor and ceil limits of the price item in the **Commitments** section, if required.
13. Edit the division-specific rate negotiability floor and ceil limits of the price item in the **Commitments**
14. Click **Save**.
    The changes made to the price item pricing are saved.

Overriding a Price Item Pricing of a Person

Prerequisites

To override a price item pricing of a person, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

Procedure

To override a price item pricing of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the person whose *d*etails you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Person)** screen appears.
4. Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone.
5. In the **Search Results** section, click the **Override** (🚀) icon in the **Override** column corresponding to the *p*rice item pricing whose details you want to override.
   The **Price Item Pricing** screen appears. It contains the following sections:
   - **Main** - Used to specify basic details about the price item pricing.

- **Deal Information** - Used to specify how the average price floor and ceil limits of the price item pricing is mapped to a deal.
- **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

  Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
- **Characteristics** - Used to define the characteristics for the price item pricing.
- **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.
- **Commitments** - Used to specify the following details about the pricing and commitments for the price item pricing:
  - Division-specific cost for the price item
  - Division-specific floor and ceil values for the price item
  - Division-specific negotiability floor and ceil values for the price item

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** The effective start date cannot be later than the effective end date. If you change the effective start and end dates while overriding a price item pricing, you need to specify the parameters which are effective during that date range. This field will be in read-only mode when the price assignment has been used. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing	Yes

Field Name	Field Description	Mandatory (Yes or No)
	bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing. **Note:** This field will be in enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Proposed** - Indicates that the price assignment is used for quotations. • **Recommended** - Indicates that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: If a price assignment is in **Draft** status, you cannot change its status to **Proposed**.	
Pricing Currency	Used to indicate the currency in which you want to override the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are overriding a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

6. Modify the details in the **Main** section, if required.
7. Modify the deal information for the price item pricing in the **Deal Information** section.
8. Modify the TFM Information in a price item pricing, if required.
9. Modify the characteristics for a price item pricing, if required.
10. Modify the parameters for a price item pricing, if required.

    Note: If you change the effective end date while overriding a price item pricing, you need to specify the parameters which are effective during the date range of start and end date.
11. Modify the division-specific cost of the price item in the **Commitments** section, if required.
12. Modify the division-specific average price floor and ceil limits of the price item in the **Commitments** section, if required.
13. Modify the division-specific rate negotiability floor and ceil limits of the price item in the **Commitments**
14. Click **Save**.
    The price item pricing is overridden.

Assigning a Price Item to a Person

Prerequisites

To assign a price item to a person, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

Procedure

To assign a price item to a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (⊙) icon corresponding to the person whose *d*etails you want to view.
   A menu appears.
3. Click the **Go To Effective Pricing** menu option.
   The **Pricing (Person)** screen appears.
4. Search for the price item that you want to assign to the person in the **Search Price Item or Price Item Pricing** *z*one.
5. In the **Search Results** section, click the **Assign** (✎) icon in the **Assign** column corresponding to the price item *t*hat you want to assign to the person.

   The **Price Item Pricing** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the price item pricing.
   - **Deal Information** - Used to specify how the average price floor and ceil limits of the price item pricing is mapped to a deal.
   - **TFM Information** - Used to specify the transaction feed management information about the price item pricing.

     Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
   - **Characteristics** - Used to define the characteristics for the price item pricing.
   - **Price Item and Parameter Information** - Used to define the parameter details segment for the price item pricing.

- **Commitments** - Used to specify the following details about the pricing and commitments for the price item pricing:
  - Division-specific cost for the price item
  - Division-specific floor and ceil values for the price item
  - Division-specific negotiability floor and ceil values for the price item

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective. **Note:** By default, the current system date appears in this field. The effective start date cannot be later than the effective end date. You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	Yes
End Date	Used to specify the date till when the price item pricing is effective. **Note:** The effective end date cannot be earlier than the effective start date. You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post	Yes

Field Name	Field Description	Mandatory (Yes or No)
	processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing.	No
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Proposed** - Indicates that the price assignment is used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Recommended** - Indicates that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal.	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules control how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional	Yes (Conditional) **Note:** This field is required when you are defining a

Field Name	Field Description	Mandatory (Yes or No)
		two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when **Price Item** is defined as **Only Pricing** and **Price Item Type** is defined as **Fees**.	Yes

6. Enter the required details in the **Main** section.
7. Define the deal information for the price item pricing in the **Deal Information** section.
8. Define TFM Information in a price item pricing, if required.
9. Define characteristics for a price item pricing, if required.
10. Define parameters for a price item pricing, if required.
11. Define the division-specific cost of the price item in the **Commitments** section, if required.
12. Define the division-specific average price floor and ceil limits of the price item in the **Commitments** section, if required.
13. Define the division-specific rate negotiability floor and ceil limits of the price item in the **Commitments** section, if required.
14. Click **Save**.
    The pricing is defined for the price item.

Note: A bundle cannot be assigned if its child price items are already assigned to a person and vice versa, in the same date range.

Price Item Pricing

Oracle Revenue Management and Billing offers a new simplified price assignment screen while assigning a price item to a person, account, or a price list. This screen built on Oracle's Redwood design principles provides a single-step pricing model with two modes – **Basic** and **Advanced**. It facilitates you with the following:

- Basic view with a pricing matrix that enables you to quickly define a flat, step, or threshold pricing for the price item.
- Advanced view that provides ability to define additional tiers for step and threshold pricing, eligibility criteria, etc.
- Advanced copy pricing option which enables you to either copy the entire pricing for a new price item or create a new pricing for the same price item using an existing pricing.
- Preview option which enables you to view the entire pricing details in a single screen.
- Separate screen or a delineated section to define tiering parameters if they are different from the pricing parameters. These tiering parameters are then applicable to all the step and threshold pricing tiers.
- Define complex pricing model when the rate schedule includes both flat and step or threshold rate components in both basic and advanced modes.
- Define cross pricing model when the rate schedule includes both step and threshold rate components in the advanced mode.
- Clearly distinguish mandatory fields using the visual cues (i.e., asterisk symbol).
- Minimal steps, navigation, and clicks for a seamless user experience and improved efficiency.

Until now, you were able to assign a price item to a person, account, or a price list using the **Assign** icon in the **Search Price Item or Price Item Pricing** zone from the respective screen. Now, a new button named **Add** is added in the **Effective Price Assignments for Person**, **Effective Price Assignments for Account**, and **Price List Price Items** zones of the **Pricing (Person)**, **Pricing (Account)**, and **Price List Price Item Pricing** screens, respectively.

Once you select the price item for which you want to define the pricing, the icon in the extreme right-corner of the screen is enabled. It enables you to select the following panels – **Parameter**, **TFM Information**, **Deal Information**, and **Additional Attributes**. Each panel enables you to define the respective information.

Once the rate schedule is selected, the **Basic-Advanced** toggle button is enabled. It enables you to switch between two modes – basic and advanced. The basic mode enables you to do the following for the respective pricing model:

- **Flat** – Define rates for the rate component.
- **Threshold** – Define rates for the required threshold tiering ranges of the rate component.
- **Step** – Define rates for the required step tiering ranges of the rate component.
- **Complex Pricing** – Define flat and threshold or step rates for the rate components.
- **Cross Pricing** – Define threshold and step rates for the rate components.

The advanced mode enables you to define additional information apart from the pricing information, such as additional tiers and eligibility criteria. You can store the pricing, if required, in the draft mode. However, on saving the pricing, the system sets the status of the pricing to **Active**. On overriding or editing a price assignment, the system now invokes the new price assignment screen. Note that while editing a price assignment, you cannot store the changes in the draft mode.

You can opt to configure approval workflow for the price assignment. If the approval workflow is configured for price assignment, the system will create the price assignment in the **Pending In Approval** status. The approver can approve or reject the price assignment based on the observations. If the approver approves a price assignment, the system changes the status of the price assignment to **Active**. However, if the approver rejects a price assignment, the system deletes the price assignment (in the **Pending In Approval** status) from the system.

The **Preview** button in the new price assignment screen allows you to view all the pricing details in a single screen before you finalize and save them. Note that, in the preview mode, the system only lists the tiers which are defined in the pricing. Until now, you were able to create a new pricing for the price item using an existing pricing using the

Copy Pricing feature. Now, in addition, you can copy the entire pricing for a new price item using the **Copy Pricing** feature.

In addition, the new screen facilitates you to define two-dimensional pricing. Note that the **Basic-Advanced** toggle button is disabled whenever you select the **Two-Dimensional Pricing** option. This is because these modes are not applicable while defining a two-dimensional pricing. Note that the **Two-Dimensional Pricing** option is enabled when you select a rate schedule which has only STEP rate components.

Price Item Pricing (Used for Viewing)

Once the pricing is defined for a price item which is assigned to an account, person, or price list, the **Price Item Pricing** screen allows you to:

- Edit the details of a price item pricing

  Note: You can edit the details of a price item pricing only when it is in the **Draft**, **Proposed**, or **Template** status.
- Delete a price item pricing

  Note: You can delete a price item pricing only when it is in the **Draft**, **Proposed**, or **Template** status.
- Submit a price item pricing for approval

  Note: You can submit a price item pricing for approval only when it is in the **Draft**, **Proposed**, or **Template** status.
- View the details of price components of the rate component
- View the details of tiering criteria, pricing eligibility criteria of a price component
- Add price components of the rate components

  Note: You can add price components of the rate components for a price item pricing only when it is in the **Draft**, **Proposed**, or **Template** status.
- Add tiering components, pricing eligibility criteria of the price components

  Note: You can add tiering components, pricing eligibility criteria of the price components for a price item pricing only when it is in the **Draft**, **Proposed**, or **Template** status.
- Edit and delete the price components, tiering criteria, pricing eligibility criteria

  Note: You can edit and delete the price components, tiering criteria, pricing eligibility criteria for a price item pricing only when it is in the **Draft**, **Proposed**, or **Template** status.

Note:

When the price assignment is in **Draft** status and when:

- Approval workflow is off then status is changed from **Draft** to **Active**.
- Approval workflow is on then status is changed from **Draft** to **Pending In Approval**.

The **Price Item Pricing** screen contains the following zones:

- Price Item Pricing on page 671
- Price Item Pricing on page 494
- Price Assignment Tree on page 475
- Price Component on page 678

  Note: By default, the **Price Component** zone does not appear in the **Price Item Pricing** screen. It appears only when you click the **Add** (+) icon corresponding to the rate component in the **Price Assignment Tree** zone and when the status of the price item pricing is **Draft**, **Proposed**, or **Template**.
- Two-Dimensional Pricing on page 681

Note: The **Two-Dimensional Pricing** zone appears in the **Price Item Pricing** screen only when the **Two-Dimensional** option is selected from the **Pricing Rule Type** field and when the tiering type of the rate component which is used while defining the price item pricing is not set to **Flat**.

Price Item Pricing

The **Price Item Pricing** zone displays basic information about the price item pricing. It contains the following sections:

- **Pricing Information** - Displays information about the price item pricing. It contains the following fields:

Field Name	Field Description
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Active** - Indicates that the price assignment can be used for pricing and billing. • **Inactive** - Indicates that the price assignment is no longer available for pricing and billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for deal simulation and awaiting approval. • **Rejected** - Indicates that the price assignment is rejected in the system. • **Template** - Indicates that the price assignment is created as a template. • **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for deal simulation by the deal approver to the relationship manager.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the price item pricing. **Note:** The **Edit** button appears only when the price item pricing is in the **Draft**, **Proposed**, or **Template** status.
Delete	Used to delete the price item pricing. **Note:** The **Delete** button appears only when the price item pricing is in the **Draft**, **Proposed**, or **Template** status.
Submit	Used to submit the price item pricing for validation and processing.

Button Name	Button Description
	Note: The **Submit** button appears only when the price item pricing is in the **Draft**, **Proposed**, or **Template** status.

Price Item Pricing

The **Price Item Pricing** zone displays the details of the price item pricing. It contains the following sections:

- **Pricing Information** - Displays basic information about the price item pricing. It contains the following fields:

Field Name	Field Description
Start Date	Displays the date from when the pricing of the price item is effective.
End Date	Displays the date till when the pricing of the price item is effective.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: • **Post Processing** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. • **Post Processing - Invoice Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account and as a result, the post processing bill segment is generated on the invoice account. **Note:** This is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**. • **Post Processing - Price Item Based** - Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. • **Regular** - Indicates that the pricing is used to generate regular bill segment.
Pricing Eligibility	Indicates whether the pricing eligibility criteria is defined for the price item or not.
Pricing Status	Indicates the current status of the price item pricing. The valid values are: • **Draft** - Indicates that the price assignment is created as a draft. • **Active** - Indicates that the price assignment can be used for pricing and billing. • **Inactive** - Indicates that the price assignment is no longer available for pricing and billing. • **Proposed** - Indicates that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for deal simulation and awaiting approval. • **Rejected** - Indicates that the price assignment is rejected in the system. • **Template** - Indicates that the price assignment is created as a template.

Field Name	Field Description
	• **Recommended** - Indicates that the price assignment is a recommended price assignment. **Note:** The **Recommended** status indicates that the price assignment is recommended for deal simulation by the deal approver to the relationship manager.
Pricing Currency	Indicates the currency in which the price item pricing is defined. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Rate Schedule	Indicates the rate schedule that is used to define the price item pricing. **Note:** It has a link. On clicking the link, the **Rate Schedule** screen appears where you can view the details of the respective rate schedule.
Pricing Rule Type	Indicates the pricing rule type. The valid value is: • Two-Dimensional **Note:** If you select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define two-dimensional pricing for the price item. However, if you do not select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define traditional flat, step, or tiered pricing for the price item. Also, you need to select the **Pricing Eligibility** option while defining a two-dimensional pricing for the price item.
Print Zero	Indicates whether the zero pricing is displayed in the bill. The valid values are: • Yes • No
Price Assignment Usage	Indicates whether the price item pricing is applicable for all customers or only for the new customers. The valid values are: • All Customers • New Customers **Note:** This field appears when you are viewing the details of a price item pricing assigned to a price list.
Pricing Frequency	Indicates the pricing frequency for the price item. **Note:** This field appears when the **Price Item Usage** is set to **Pricing** and the **Price Item Type** is set to **Fees** while defining the price item.

- **Deal Information** - Displays information about how the average price floor and ceil limits of the price item pricing is mapped to a deal. It contains the following field:

Field Name	Field Description
Average Price Floor and Ceil Limits	Indicates the manner in which the average price floor and ceil limits of the price item pricing is defined for the deal. The valid values are: • **Absolute Value Range** - Indicates that the average price floor and ceil limits for the price item pricing is defined using absolute values. • **Spread Amount** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread amount. • **Spread Percentage** - Indicates that the average price floor and ceil limits for the price item pricing is defined based on the spread percentage. **Note:** In case of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage the average floor and ceil limits are derived.

- **TFM Information** - Displays the transaction feed management information mapped to the price item pricing. It contains the following fields:

Field Name	Field Description
Ignore Transaction	Indicates whether the transactions mapped to the price item pricing are considered for billing or not. The valid values are: • Yes • No
Do Not Aggregate Switch	Indicates whether aggregation is required while rating the transactions mapped to the price item pricing before billing. The valid values are: • **Yes** - Indicates that aggregation is not required while rating the transactions mapped to the price item pricing before billing. • **No** - Indicates that aggregation is required while rating the transactions mapped to the price item pricing before billing.
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: • Daily • Weekly • Monthly • Quarterly • Yearly
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item pricing are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions

Field Name	Field Description
	Note: This field appears when the **Do Not Aggregate Switch** is set to **No**.

Note:

TFM Information section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1_FM feature configuration** is set to **Y** and the **Price Item Usage** field is set to **Pricing and Billing** while defining the price item.

Price Item and Parameter Information - Lists the parameters based on which the price item pricing is defined. It contains the following field:

Field Name	Field Description
Price Item	Displays the concatenated string of information about the price item or price item bundle for which the pricing is defined separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the price item.

In addition, the **Price Item and Parameter Information** section contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter using which the price item pricing is defined in the system.
Parameter Value	Displays the value of the parameter.

- **Division-Specific SQIs for Price Item** - Lists the SQIs associated with the price item pricing for a particular division. It contains the following columns:

Column Name	Column Description
SQI	Displays the SQI associated with the price item for pricing. **Note:** It has a link. On clicking the link, the **Service Quantity Identifier** screen appears where you can view the details of the respective SQI.
Daily Service Quantity	Displays the SQI usage for a single day.
Usage Period	Displays the duration for which the SQI is associated with the price item for pricing.
Division	Indicates the division for which the SQI is associated with the price item for pricing.

- **Division-Specific Cost for Price Item** - Lists the cost of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Cost Type	Indicates the type of cost incurred in the division for the price item pricing. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal

Column Name	Column Description
	• Fixed Third Party • Variable Internal • Variable Third Party
Cost Value	Displays the cost amount.

Note: By default, the **Pricing Currency** is considered as the currency code in which the cost is specified.

- **Division-Specific Floor & Ceil for Price Item** - Lists the average price floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates the users with the specified To Do role who can approve the average price of the price item in the price item pricing when it is within the specified floor and ceil limits. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Ceil Value	Displays the ceil (i.e. upper) limit for the To Do role to approve the average price of the price item. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.
Floor Value	Displays the floor (i.e. lower) limit for the To Do role to approve the average price of the price item. **Note:** This column appears when the **Absolute Value Range** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Currency Code	Indicates the currency in which the average price floor and ceil limits are defined for the price item pricing. **Note:** It has a link. On clicking the link, the **Currency** screen appears where you can view the details of the respective currency.
Spread Amount	Displays the spread amount of the To Do role for approving the average price of the price item. **Note:** This column appears when the **Spread Amount** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Spread Percentage	Displays the spread percentage of the To Do role for approving the average price of the price item. **Note:** This column appears when the **Spread Percentage** option is selected from the **Average Price Floor and Ceil Type** list while defining the deal information in the price item pricing.
Division	Indicates the division for which the average price floor and ceil values of the price item is defined.

- **Negotiability** - Lists the negotiability floor and ceil limits of the price item pricing defined for a particular division. It contains the following columns:

Column Name	Column Description
Division	Indicates the division for which the negotiability floor and ceil limits of the price item pricing is defined.
Ceil Value	Displays the ceil (i.e. upper) limit for the rate negotiation.
Floor Value	Displays the floor (i.e. lower) limit for the rate negotiation.

Note: By default, the pricing currency is considered as the currency code in which the negotiability floor and ceil limits of the price item pricing is defined.

- **Characteristics** - Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item pricing is defined in the system. In addition, a context menu (⊙) appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Price Assignment Tree

The **Price Assignment Tree** zone displays the details about the rate components and its price components for the price item along with the tiering criteria and pricing eligibility details.

It also allows you to do the following:

- Define, edit, copy, or delete the price component of the rate component

Note: You can define, edit, copy, or delete the price component of the rate component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.

- Define, edit, copy, or delete the tiering criteria of the price component

Note: You can define, edit, copy, or delete the tiering criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.

- Define, edit, copy, or delete the pricing eligibility criteria of the price component

Note: You can define, edit, copy, or delete the pricing eligibility criteria of the price component when the price item pricing is in **Draft**, **Proposed**, or **Template** status.

The **Price Assignment Tree** zone contains the following buttons:

Button Name	Button Description
Expand All	On clicking the **Expand All** button, all nodes in the price assignment tree are expanded at once.
Collapse All	On clicking the **Collapse All** button, all nodes in the price assignment tree are collapsed at once.

In addition, the **Price Assignment Tree** zone contains the following section:

- **Pricing & Commitment Details** - Displays the pricing and commitments information associated with the price item.

Note: You cannot define, edit, copy, or delete a price component when you are accessing the **Price Assignment Tree** zone in the **Pricing (Person)**, **Pricing (Account)**, or **Price List** screen.

Price Component

The **Price Component** zone displays information about the price component of the rate component for the price item pricing that is assigned to an account, person, or price list. It contains the following fields:

Field Name	Field Description
Rate Component Information	Displays the concatenated string of information about the rate component for the price component separated by comma (,). This string contains the following: • Rate Component Sequence • Tiering Type of the Rate Component
Display Sequence	Displays the sequence in which the rate of the price component is considered for calculating the pricing of the price item
Show Price Component	Indicates whether the price component should be displayed in the bill.
Description	Displays the description of the price component.
Rate	Displays the rate defined for the price component.

In addition, the **Price Component** zone contains the following buttons:

Button Name	Button Description
Save	Used to save the changes made to the price component.
Clear	Used to discard the changes made to the price component.
Close	Used to close the **Price Component** zone.

By default, the **Price Component** zone does not appear in the **Price Item Pricing** screen. It appears when you click the **Add** (+) icon corresponding to a price component in the **Price Assignment Tree** zone and when the price item pricing is in the **Draft** status.

On clicking the **Show Price Component Tier** link, the **Tiering Criteria** section appears in the **Price Component** zone with the details of the respective tiering criteria of the price component.

The **Tiering Criteria** section contains the following fields in a grid:

Field Name	Field Description
Display Sequence	Displays the sequence number of the tiering criteria.
Tiering Criterion	Indicates the tiering criterion which is used in the tiering range.
Lower Limit	Displays the lower limit of the tiering range.
Upper Limit	Displays the upper limit of the tiering range.
Price Item	Displays the price item for which the tiering criteria is defined using the price component.
Price Item Parameters	Displays the tiering parameters using which the tiering criteria is defined for the price item. **Note:** The **Edit** (✎) icon appears corresponding to the **Price Item Parameters** field. On clicking the **Edit** icon, the **Tier Parameters** section appears where you can add, edit, or delete the tiering parameter of the price item.

Note: The **Tiering Criteria** section appears in the **Price Component** zone only when the **Tiering Type** of the rate component is **STEP** or **Threshold**.

On clicking the **Show Price Component Eligibility** link, the **Pricing Eligibility Criteria** section appears in the **Price Component** zone with the details of the respective pricing eligibility criteria of the price component.

Note: The **Show Price Component Eligibility** link appears in the **Price Component** zone only when the **Pricing Eligibility** check box is selected in the **Price Item Pricing** screen.

The **Pricing Eligibility Criteria** section contains the following fields in a grid:

Field Name	Field Description
Display Sequence	Indicates the sequence number in which the pricing eligibility criteria is executed in the rule.
Parameter	Displays the left hand side parameter which is used along with the price item for price determination. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective parameter.
Operator	Indicates the relational operator used to define the relation between the parameter name and the parameter value. The valid values are: • < • <= • <> • = • > • >= • Between • In • Like • Not In
Parameter Value Type	Indicates whether the parameter (on the left hand side) is compared against another parameter (on the right hand side) or directly against a parameter value. The valid values are: • **Parameter** - Indicates that the parameter (on the left hand side) is compared against another parameter (on the right hand side). • **Value** - Indicates that the parameter (on the left hand side) is compared against a parameter value.
Parameter Value	Indicates the parameter (on the right hand side) or the parameter value (on the right hand side) against which you want to compare the parameter (on the left hand side). **Note:** If you select the **Parameter Value Type** as **Parameter**, the **Search** (🔍) icon appears corresponding to the **Parameter Value** field where you can search for the respective parameter for comparison.
Is True	Indicates what happens when the condition is true (satisfied). The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number is executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field is executed. • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field is executed.

Field Name	Field Description
Is False	Indicates what happens when the condition is false (not satisfied). The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number is executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field is executed • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field is executed.
Is Insufficient	Indicates what happens when the data is insufficient. The valid values are: • **Check Next Condition** - Indicates that the condition with consecutive sequence number is executed. • **Rule Is False** - Indicates that the action specified in the **Rule False Action** field is executed • **Rule Is True** - Indicates that the action specified in the **Rule True Action** field is executed.

Two-Dimensional Pricing

The **Two-Dimensional Pricing** zone displays the details of the two-dimensional pricing. It contains the following field:

Field Name	Field Description
Pricing Information	Displays the concatenated string of information about the price item pricing separated by a comma (,).

In addition, the **Two-Dimensional Pricing** zone contains the following fields in a grid:

Field Name	Field Description
Step Criterion	Displays the **Price Criteria** of the price component.
Threshold Parameter	Displays the parameter of the price component eligibility.
Tiering Range	Displays the tiering range of the pricing.

Note: The **Two-Dimensional Pricing** zone appears in the **Price Item Pricing** screen only when the **Two-Dimensional** option is selected from the **Pricing Rule Type** field while defining the price item pricing.

Defining a Price Item Pricing

Prerequisites

To define pricing for a price item, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)
- Currencies defined in the application

Procedure

To define a price item pricing:

1. Do either of the following:

If you want to...	Then...
Define pricing for a price item that you want to assign to a person	**a.** Ensure that the **Search Price Item or Price Item Pricing** zone is expanded in the **Pricing (Person)** screen when you are defining the price item pricing for a person. **b.** Search for the price item in the **Search Price Item or Price Item Pricing** zone. **c.** In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item that you want to assign to the customer.
Define pricing for a price item that you want to assign to an account	**a.** Ensure that the **Search Price Item or Price Item Pricing** zone is expanded in the **Pricing (Account)** screen when you are defining the price item pricing for an account. **b.** Search for the price item in the **Search Price Item or Price Item Pricing** zone.

If you want to...	Then...
	c. In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item that you want to assign to the account.
Define pricing for a price item that you want assign to a price list	a. Ensure that the **Search Price Item or Price Item Pricing** zone is expanded in the **Price List Price Item Pricing** screen when you are defining the price item pricing for a price list. b. Search for the price item in the **Search Price Item or Price Item Pricing** zone. c. In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item that you want to assign to the price list.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item pricing.
- **Deal Information** - Used to specify how the average price floor and ceil limits of the price item pricing is mapped to a deal.
- **TFM Information** - Used to specify the transaction feed management information mapped to the price item pricing.

  Note: This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.
- **Characteristics** - Used to define a list of characteristics for the price item pricing.
- **Price Item and Parameter Information** - Used to specify the parameters based on which the price item pricing is defined.

  Note: This section appears when **Price Assignment Type** is **Regular**.
- **Commitments** - Used to specify the following details about the pricing and commitments for the price item pricing:
  - Division-specific cost for the price item
  - Division-specific floor and ceil values for the price item
  - Division-specific negotiability floor and ceil values for the price item

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the pricing of the price item is effective. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The **Start Date** cannot be later than the **End Date**. If you change the start date and the end date while editing a price item pricing, you	Yes

Field Name	Field Description	Mandatory (Yes or No)
	need to specify the parameters which are effective during that date range. This field will be in read-only mode when the price assignment has been used.	
End Date	Used to specify the date till when the pricing of the price item is effective. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The **End Date** cannot be earlier than the **Start Date**.	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Used to define the pricing eligibility criteria for the price item pricing. Used to define the pricing eligibility criteria for the price item pricing. **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. **Note:** By default, the **Regular** option is selected in the **Price Assignment Type** field. This field is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**.	
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item. **Note:** If you select the check box you can define the pricing eligibility criteria of the price item in the **Price Component** zone.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of the price item.
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Draft** - Used to indicate that the price assignment is created as a draft. • **Active** - Used to indicate that the price assignment is used for billing. • **Inactive** - Used to indicate that the price assignment is no longer used for billing. • **Proposed** - Used to indicate that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Template** - Used to indicate that the price assignment is a template price list. • **Recommended** - Used to indicate that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal. **Note:** If a price assignment is in **Active** status, you can change its status to **Inactive**. If a price assignment is in **Draft** status, you cannot change its status to **Proposed**.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules controls how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to the **Rate Schedule field**. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional **Note:** If you select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define two-dimensional pricing for the price item. However, if you do not select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define traditional flat, step, or tiered pricing for the price item. Also, you need to select the **Pricing Eligibility** option check box while defining a two-dimensional pricing for the price item.	Yes (Conditional) **Note:** This field is required for defining a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • All Customers • New Customers **Note:** By default, the **All Customers** option is selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	This field appears when you are defining a price item pricing which you want to assign to a price list.	
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears only when you select the **Price Item Usage** as **Pricing** and **Price Item Type** as **Fees** while defining the price item.	Yes

2. Enter the required details in the **Main** section.
3. Define the deal information for the price item pricing in the **Deal Information** section.
4. Define the transaction feed management information for the price item pricing in the **TFM Information** section.
5. Define the characteristics for the price item pricing in the **Characteristics** section.
6. Define parameters for the price item pricing in the **Price Item and Parameter Information** section.
7. Define the division-specific cost of the price item in the **Commitments** section, if required.
8. Define the division-specific average price floor and ceil limits of the price item in the **Commitments** section, if required.
9. Define the division-specific rate negotiability floor and ceil limits of the price item in the **Commitments** section, if required.
10. Click **Save**
    The pricing item pricing is defined.

Defining the Deal Information in a Price Item Pricing

Procedure

To define the deal information in a price item pricing:

1. Ensure that the **Deal Information** section is expanded when you are defining, editing, or overriding a price item pricing.
   The **Deal Information** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Average Price Floor and Ceil Limits	Used to indicate the manner in which the average price floor and ceil limits of the price item pricing is defined for the deal. The valid values are: • **Absolute Value Range** - Used to indicate that the average price floor and ceil limits for the price item pricing is defined using absolute values. • **Spread Amount** - Used to indicate that the average price floor and ceil limits for the price item pricing is defined based on the spread amount. • **Spread Percentage** - Used to indicate that the average price floor and ceil limits for the price item pricing is defined based on the spread percentage. **Note:** In case of **Spread Amount** and **Spread Percentage** options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage the average floor and ceil limits of the price item are derived for the deal.	Yes (Conditional) **Note:** This field is required while defining the average price floor and ceil limits of the price item for the deal.

2. Enter the required details in the **Deal Information** section.
3. Click **Save**.
   The deal information is defined for the price item pricing.

Defining TFM Information in a Price Item Pricing

Prerequisites

To define the TFM information in a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Aggregation or rating criteria to be defined for the price item pricing

Procedure

To define the TFM information in a price item pricing:

1. Ensure that the **TFM Information** section is expanded when you are defining, editing, or overriding a price item pricing.
   The **TFM Information** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Ignore Transaction	Used to indicate whether the transactions mapped to the price item are considered for billing or not. The valid values are: • Yes • No **Note:** By default, the **No** option is selected.	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.
Do Not Aggregate Switch	Used to indicate whether aggregation is required while rating the transactions mapped to the price item pricing before billing. The valid values are: • **Yes** - Indicates that aggregation is not required while rating the transactions mapped to the price item pricing before billing. • **No** - Indicates that aggregation is required while rating the transactions mapped to the price item pricing before billing. **Note:** By default, the **Yes** option is selected.	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: • Weekly • Monthly • Quarterly • Yearly	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The list includes only those aggregation schedules where the schedule type is set to **Only Pricing**.	
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: • Aggregate Transactions and Then Rate Aggregated SQs **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Do Not Rate Transactions • Rate Transaction and Aggregate Calc Lines **Note:** This field appears when the **Do Not Aggregate Switch** is set to **Yes**. • Rate Transactions **Note:** This option appears when the **Do Not Aggregate Switch** is set to **No**. **Note:** By default, the **Do Not Rate Transactions** option is selected.	Yes (Conditional) **Note:** This field is required while defining the TFM information in a price item pricing.

2. Enter the required details in the **TFM Information** section.

   Note: **TFM Information** section appears when the **Show Default Values** in Price Item Pricing option type of **C1_FM feature configuration** is set to **Y** and **Price Item Usage** for the respective price item is set to **Pricing and Billing**.

3. Click **Save**.
   The TFM information is defined in the price item pricing.

Defining a Characteristic for a Price Item Pricing

Prerequisites

To define a characteristic for a price item pricing, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Assignment**)

Procedure

To define a characteristic for a price item pricing:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or overriding a price item pricing.
   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item pricing.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Price Item**.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item pricing.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for the price item pricing.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price item pricing, click the **Add** (+) icon and then *r*epeat step 2.

   Note: However, if you want to remove a characteristic from the price item pricing, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The characteristic is defined for the price item pricing.

Defining a Parameter for a Price Item Pricing

Prerequisites

To define a parameter for a price item pricing, you should have:

- Parameters associated with the price item, in case, you want to define price item pricing based on multiple parameters

Procedure

To define a parameter for a price item pricing:

1. Ensure that the **Price Item and Parameter Information** section is expanded when you are defining, editing, or overriding a price *i*tem pricing.
   The **Price Item and Parameter Information** section contains the following field:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle for which you want to define pricing parameters.

   In addition, this section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter using which you want to define pricing for the price item. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears where you can search for the required parameter. The search results displays only those parameters where the **Price Item** check box is selected.	Yes
Parameter Information	Displays information about the parameter.	Not applicable
Parameter Value	Used to specify the value of the parameter. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Price Item Parameter Search** window appears where you can search for the required parameter. The **Search** icon appears only when the value type of the parameter is set to **Predefined** or **Reference**.	Yes

2. Enter the required details in the **Price Item and Parameter Information** section.

3. If you want to add more than one parameter while defining or editing pricing for the price item, click the **Add** (+) icon *a*nd then repeat step 2.

   Note: However, if you want to remove a parameter from the price item pricing, click the **Delete** (🗑) icon corresponding to the parameter.

4. Click **Save**.
   The parameter is defined for the price item pricing.

Defining the Division-Specific Cost of a Price item in the Price Item Pricing

Prerequisites

To define the division-specific cost of a price item in the price item pricing you should have:

- Price items or price item bundles associated with the division to which the user belongs

Procedure

To define the division-specific cost of a price item in the price item pricing:

1. Ensure that the **Commitments** section is expanded when you are defining, editing, or overriding a price *i*tem pricing.
2. Select the division from the **Division** column for which you want to define the cost of the price item in the price item pricing.
3. Click the **Add** (📄) icon in the **Costs** column corresponding to the division for which you want to define the *c*ost of the price item in the price item pricing.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Cost Type	Used to indicate the type of cost incurred in the division for the price item pricing. The valid values are: • Additional Cost - Fixed • Additional Cost - Variable • Fixed Internal • Fixed Third Party • Variable Internal • Variable Third Party	Yes (Conditional) **Note:** This field is required while defining the division-specific cost of the price item in the price item pricing.
Cost Value	Used to specify the cost amount.	Yes (Conditional) **Note:** This field is required while defining the division-specific cost of the

Field Name	Field Description	Mandatory (Yes or No)
		price item in the price item pricing.

Note: By default, the **Pricing Currency** is considered as the currency for defining the division-specific cost of the price item in the price item pricing.

4. Enter the required details in the **Costs** grid.
5. If you want to define more than one division-specific cost of the price item in the price item pricing, click the **Add** (+) icon *a*nd then repeat step 3.

Note: However, if you want to remove the division-specific cost of the price item from the price item pricing, click the **Delete** (🗑) icon corresponding to the cost.

6. Click **Save**.
   The division-specific cost of the price item in the price item pricing is defined.

Defining the Division-Specific Average Price Limits of a Price item in the Price Item Pricing

Prerequisites

To define the division-specific average price limits of a price item in the price item pricing, you should have:

- To Do roles and currencies defined in the application
- Price items or price item bundles associated with the division to which the user belongs

Procedure

To define the division-specific average price limits of the price item in the price item pricing:

1. Ensure that the **Commitments** section is expanded when you are defining, editing, or overriding a price *i*tem pricing.
2. Select the division from the **Division** column for which you want to define the average price limits of the price item in the price item pricing.
3. Click the **Add** (📄) icon in the **Floor and Ceiling Type** column corresponding to the division for which you want to define the division-specific average price limits of the price item in the price item pricing.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Role	Used to indicate that users with the specified To Do role can approve the average price of the price item in the price item pricing when it is within the specified floor and ceil limits. **Note:**	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to the **To Do Role** field. On clicking the **Search** icon, the **To Do Role Search** window appears. On specifying the To Do role, the description of the To Do role appears corresponding to the **To Do Role** field.	the price item in the price item pricing.
Floor Value	Used to specify the floor (i.e. lower) limit of the To Do role for approving the average price of the price item in the price item pricing. **Note:** The floor value cannot be greater than the ceil value. This field appears only when you select **Absolute Value Range** option from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.
Ceil Value	Used to specify the ceil (i.e. upper) limit of the To Do role for approving the average price of the price item in the price item pricing. **Note:** The ceil value cannot be lower than the floor value. This field appears only when you select **Absolute Value Range** option from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.
Spread Amount	Used to specify the spread amount of the To Do role for approving the average price of the price item in the price item pricing. **Note:** This field appears only when you select the **Spread Amount** option from the **Average Price Floor and Ceil Limits** list while defining the deal information in the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.
Spread Percentage	Used to specify the spread percentage of the To Do role for approving the average price of the price item in the price item pricing. **Note:** This field appears only when you select the **Spread Percentage** option from the **Average Price Floor and Ceil Limits** list while defining	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of

Field Name	Field Description	Mandatory (Yes or No)
	the deal information in the price item pricing.	the price item in the price item pricing.
Floor and Ceil Currency	Used to indicate the currency in which you want to define the average price floor and ceil limits of the price item in the price item pricing. **Note:** The list includes only those currencies which are already defined in the system. The system does the currency conversion when the pricing currency is different from the floor and ceil currency.	Yes (Conditional) **Note:** This field is required while defining the division-specific average price floor and ceil limits of the price item in the price item pricing.

4. Enter the required details in the **Floor and Ceiling Type** grid.

   Note: The **Floor and Ceiling Type** grid appears only when you select an option from the **Average Price Floor and Ceil Limits** field in the **Deal Information** section.

5. If you want to define the average price limits for more than one To Do role in the division, click the **Add** (+) *i*con and then repeat step 3.

   Note: However, if you want to remove the average price limits of a To Do role from the division, click the **Delete** (🗑) icon corresponding to the To Do role.

6. Click **Save**.
   The division-specific average price limits of the price item in the price item pricing is defined.

Defining the Division-Specific Rate Negotiability Limits of a Price item in the Price Item Pricing

Prerequisites

To define the division-specific rate negotiability limits of a price item in the price item pricing, you should have:

- Currencies defined in the application
- Price items associated with the division to which the user belongs

Procedure

To define the division-specific rate negotiability limits of a price item in the price item pricing:

1. Ensure that the **Commitments** section is expanded when you are defining, editing, or overriding a price *i*tem pricing.

2. Select the division from the **Division** column for which you want to define the rate negotiability limits of a price item in the price item pricing
3. Click the **Add** (+) icon in the **Negotiability** column corresponding to the division for which you want to define the division-specific rate negotiability limits of the price item in the price item pricing.

   The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Negotiability Floor Value	Used to specify the floor (i.e. lower) limit for the rate negotiation. **Note:** The floor value cannot be greater than the ceil value.	Yes (Conditional) **Note:** This field is required while defining the division-specific rate negotiability limits of the price item in the price item pricing.
Negotiability Ceil Value	Used to specify the ceil (i.e. upper) limit for the rate negotiation. **Note:** The ceil value cannot be lower than the floor value.	Yes (Conditional) **Note:** This field is required while defining the division-specific rate negotiability limits of the price item in the price item pricing.

   Note: By default, the **Pricing Currency** is considered as the currency for defining the division-specific rate negotiability limits of the price item in the price item pricing.
4. Enter the required details in the **Negotiability** grid.
5. Click **Save**.
   The division-specific rate negotiability limits of the price item in the price item pricing is defined.

Viewing the Price Components of a Rate Component

Procedure

To view the details of the price components of a rate component:

1. Do either of the following:

If you want to view...	Then...
Price components of the Price Item Pricing assigned to an account	a. Search for the account in the **Customer 360° View** screen. b. In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account whose price item pricing details you want to view.

If you want to view...	Then...
	A menu appears. **c.** Click the **Go To Effective Pricing** menu option. The **Pricing (Account)** screen appears. **d.** Price assignments effective for the account appears in the **Effective Price Assignments for Account** zone. **e.** In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to view.
Price components of the Price Item Pricing assigned to a person	**a.** Search for the person in the **Customer 360° View** screen. **b.** In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the person whose price item pricing details you want to view. A menu appears. **c.** Click the **Go To Effective Pricing** menu option. The **Pricing (Person)** screen appears. **d.** Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone. **e.** In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to view.
Price components of Price Item Pricing assigned to a price list	**a.** Search for the price list in the **Price List** screen. **b.** In the **Search Results** section, click the **View** (🔗) icon in the **Price List Pricing** column corresponding to the price list whose price item pricing details you want to view. The **Price List Price Item Pricing** screen appears. **c.** Price items assigned to the price list appears in the **Price List Price Items** zone. **d.** In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to view.

2. The **Price Item Pricing** screen appears.
3. Ensure that the **Price Assignment Tree** zone is expanded.
4. Click the **Expand All** button to expand all the rate components to which the price components are associated. View the details of the price component of a rate component in the **Price Assignment Tree** zone.

Defining a Price Component for a Rate Component

Prerequisites

To define a price component for a rate component, you should have:

- Rate component defined for the price item in the application

Procedure

To define a price component for a rate component:

1. Do either of the following:

If you want to define...	Then...
Price component of a price item pricing assigned to an account	**a.** Search for the account in the **Customer 360° View** screen. **b.** In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account whose price component details you want to define. A menu appears. **c.** Click the **Go To Effective Pricing** menu option. The **Pricing (Account)** screen appears. **d.** Price assignments effective for the account appears in the **Effective Price Assignments for Account** zone. **e.** In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to define. The **Price Item Pricing** screen appears. **Tip:** Alternatively, you can define the price component of a price item pricing assigned to an account by:

If you want to define...	Then...
	a. Searching for the price item in the **Search Price Item or Price Item Pricing** zone of the **Pricing (Account)** screen. b. In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item. The **Price Item Pricing** screen appears c. Enter the required details in the **Price Item Pricing** screen and click **Save**. d. The **Price Item Pricing** screen appears.
Price component of a price item pricing assigned to a person	a. Search for the person in the **Customer 360° View** screen. b. In the **Search Results** section, click the **Context Menu** ( ) icon corresponding to the person whose price component details you want to define. A menu appears. c. Click the **Go To Effective Pricing** menu option. The **Pricing (Person)** screen appears. d. Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone. e. In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to define. The **Price Item Pricing** screen appears. **Tip:** Alternatively, you can define the price component of a price item pricing assigned to a person by: a. Searching for the price item in the **Search Price Item or Price Item Pricing** zone of the **Pricing (Person)** screen. b. In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item. The **Price Item Pricing** screen appears c. Enter the required details in the **Price Item Pricing** screen and click **Save**. d. The **Price Item Pricing** screen appears.
Price component of a price item pricing assigned to a price list	a. Search for the price list in the **Price List** screen. b. In the **Search Results** section, click the **View** ( ) icon in the **Price List Pricing** column corresponding to the price list whose price component details you want to define. The **Price List Price Item Pricing** screen appears. c. Price items assigned to the price list appear in the **Price List Price Items** zone. d. In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to define.

If you want to define...	Then...
	The **Price Item Pricing** screen appears. **Tip:** Alternatively, you can define the price component of a price item pricing assigned to a price list by: **a.** Searching for the price item in the **Search Price Item or Price Item Pricing** zone of the **Price List Price Item Pricing** screen. **b.** In the **Search Results** section, click the **Assign** (icon) icon in the **Assign** column corresponding to the price item. The **Price Item Pricing** screen appears **c.** Enter the required details in the **Price Item Pricing** screen and click **Save**. **d.** The **Price Item Pricing** screen appears.
Price component of a price item pricing assigned to a price list	**a.** . Search for the price list in the **Price List** screen. **b.** In the **Search Results** section, click the **Broadcast** (icon) icon corresponding to the price list whose price item pricing details you want to view. The **Price List Price Items** zone appears. **c.** Click the link in the **Pricing Information** column corresponding to the price item whose price item pricing details you want to define. **d.** The **Price Item Pricing** screen appears. **Tip:** Alternatively, you can click on the **Broadcast** (icon) icon corresponding to the price item whose pricing details you want to view. The **Price Assignment Tree** zone appears in the **Price List** screen.

2. Ensure that the **Price Assignment Tree** zone is expanded when you are defining a price component for the rate component.
3. Click the **Add** (+) icon corresponding to the rate component whose price component you want to define.

Note: You can define a price component of a rate component only when the price item pricing is in the **Draft**, **Proposed**, or **Template** status.

The **Price Component** zone appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rate Component Information	Displays the concatenated string of information about the rate component for which you want to define the price component.	Not applicable
Display Sequence	Used to specify the sequence of the price component whose rate is used for calculating the pricing of the price item.	Yes (Conditional) **Note:** This field is required while defining the price

Field Name	Field Description	Mandatory (Yes or No)
		component of a rate component.
Show Price Component	Used to indicate whether the price component is displayed in the bill. **Note:** If you select the check box, the price component will be displayed in the bill.	No
Description	Used to specify the description of the price component.	Yes (Conditional) **Note:** This field is required while defining the price component of a rate component.
Rate	Used to specify the rate for the price component.	Yes (Conditional) **Note:** This field is required while defining the price component of a rate component.

In addition, the **Price Component** zone contains the following buttons:

Button Name	Button Description
Save	Used to save the changes made to the price component.
Clear	Used to discard the changes made to the price component.
Close	Used to close the **Price Component** zone.
Show Price Component Tier	Used to define, edit, or delete the tiering criteria of the price component. **Note:** The **Show Price Component Tier** button appears only when **Tiering Type** of the rate component is **STEP** or **Threshold**.
Show Price Component Eligibility	Used to define, edit, or delete the pricing eligibility criteria of the price component. **Note:** The **Show Price Component Eligibility** button appears only when the **Pricing Eligibility** check box is selected in the **Price Item Pricing** screen.

4. Enter the required details in the **Price Component** zone.
5. Define the tiering criteria for the price component, if required.
6. Define the pricing eligibility criteria for the price component, if required.
7. Click **Save**.
   The price component is defined for the rate component.

Defining a Tiering Criteria for a Price Component

Prerequisites

To define a tiering criteria for a price component, you should have:

- Tiering criterion defined in the application
- Tiering setup for the rate components defined in the application.

Procedure

To define a tiering criteria for a price component:

1. Ensure that the **Price Assignment Tree** zone is expanded in the **Price Item Pricing** screen.
2. Click the **Add** (+) icon corresponding to the rate component whose price component you want to define.
   The **Price Component** zone appears.
3. Click the **Show Price Component Tier** link.

   Note: The **Show Price Component Tier** link appears only when **Tiering Type** of the rate component is **STEP** or **Threshold**.

   The **Tiering Criteria** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Display Sequence	Used to specify the sequence in which the tiering criteria of the price component should be considered for the price item pricing.	Yes (Conditional) **Note:** This field is required while defining the tiering criteria of a price component.
Tiering Criterion	Used to indicate the tiering criterion which is used in the tiering range.	Yes (Conditional) **Note:** This field is required while defining the tiering criteria of a price component.
Lower Limit	Used to specify the lower limit of the pricing range. **Note:** The system provides you with the facility to specify the lower limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range.	Yes (Conditional) **Note:** This field is required while defining the tiering criteria of a price component.
Upper Limit	Used to specify the upper limit of the pricing range. **Note:** The system provides you with the facility to specify the upper limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range. When you define single tier with the maximum value as blank (for example, 0 to BLANK), the system will automatically replace the blank space with 999999999999999999.99.	Yes (Conditional) **Note:** This field is required while defining the tiering criteria of a price component.
Price Item	Used to indicate whether the price item or price item bundle's total usage is considered for determining the rate. By default, the price item code for which you are defining the pricing appears in this field. You can specify any other price item or bundle code, if required. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** screen appears	Yes (Conditional) **Note:** This field is required while defining the tiering criteria of a price component.

Field Name	Field Description	Mandatory (Yes or No)
	where you can search for the required price item.	
Price Item Parameters	Used to specify the parameters based on which the price item or price item bundle's total usage should be considered for determining the rate. By default, the parameters based on which you are defining the pricing appear in this field. You can specify any other parameter (where the **Pricing** flag is set to **Yes**, if required. However, you can only select parameter associated with the price item or price item bundle which is used for defining the tiering criteria. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**. The **Edit** (✎) appears corresponding to this field. On clicking the **Edit** icon, the **Tier Parameters** section appears where you can screen appears where you can specify the required parameters.	No

4. Enter the required details in the **Tiering Criteria** section.
5. If you want to define more than one tiering criteria for the price component, click the **Add** (+) icon and then *r*epeat step 2.

   Note: However, if you want to remove a tiering criteria from the price component, click the **Delete** (🗑) icon corresponding to the tiering criterion.
6. Click **Save**.
   The tiering criteria is defined for the price component.

   Note: You can define a tiering criteria for a price component only when the price item pricing is in the **Draft**, **Proposed**, or **Template** status.

Defining a Pricing Eligibility Criteria for a Price Component

Procedure

To define a pricing eligibility criteria for a price component:

1. Ensure that the **Price Assignment Tree** zone is expanded in the **Price Item Pricing** screen.
2. Click the **Add** (+) icon corresponding to the rate component whose price component you want to define. The **Price Component** zone appears.
3. Click the **Show Price Component Eligibility** link.

Note: The **Show Pricing Component Eligibility** link appears only when **Pricing Eligibility** check box is selected in the **Price Item Pricing** screen.

The **Pricing Eligibility Criteria** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Display Sequence	Used to specify the order in which the pricing eligibility criteria is executed in the rule.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.
Parameter	Used to specify the left hand side parameter which you want to use along with the price item for price determination. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the required parameter. You must not specify any special character except underscore (_) in the parameter code. Otherwise, the status of the transaction is changed to **Error (ERROR)**. This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.
Operator	Used to indicate the relational operator to define the relation between the parameter name and the parameter value. The valid values are: • < • <= • <> • = • > • >= • Between	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.

Field Name	Field Description	Mandatory (Yes or No)
	• In • Like • Not In	
Parameter Value Type	Used to indicate whether the parameter (on the left hand side) is compared against another parameter (on the right hand side) or directly against a parameter value. The valid values are: • **Parameter** - Used to indicate that the parameter (on the left hand side) is compared against another parameter (on the right hand side). • **Value** - Used to indicate that the parameter (on the left hand side) is compared against a parameter value.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.
Parameter Value	Used to specify the parameter value against which you want to compare the parameter (on the left hand side). The valid values are: **Note:** This field is enabled only when you specify the parameter in the **Parameter** field. The **Search** (🔍) icon appears corresponding to the **Parameter Value** field when the **Parameter** option is selected from **Parameter Value Type** field. On clicking the **Search** icon, the **Parameter Search** window appears. When the **Parameter** option is selected from the **Parameter Value Type** field then you must not specify any special character except underscore (_) in the parameter code. Otherwise, the status of the transaction is changed to **Error (ERROR)**. When the **Value** option is selected for the **Parameter Value Type** field then you can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon (;) in the parameter value. This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based**	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.

Field Name	Field Description	Mandatory (Yes or No)
	Pricing (C1_PPARM_FLG) feature configuration is set to **True**.	
Is True	Used to indicate what should happen when the condition is true (satisfied). The valid values are: • **Check Next Condition** - Used to indicate that the condition with consecutive sequence number is executed. • **Rule Is False** - Used to indicate that the action specified in the **Rule False Action** field is executed. • **Rule Is True** - Used to indicate that the action specified in the **Rule True Action** field is executed.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.
Is False	Used to indicate what should happen when the condition is false (not satisfied). The valid values are: • **Check Next Condition** - Used to indicate that the condition with consecutive sequence number is executed. • **Rule Is False** - Used to indicate that the action specified in the **Rule False Action** field is executed. • **Rule Is True** - Used to indicate that the action specified in the **Rule True Action** field is executed.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.
Is Insufficient	Used to indicate what should happen when the data is insufficient. The valid values are: • **Check Next Condition** - Used to indicate that the condition with consecutive sequence number is executed. • **Rule Is False** - Used to indicate that the action specified in the **Rule False Action** field is executed. • **Rule Is True** - Used to indicate that the action specified in the **Rule True Action** field is executed.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of a price component.

4. Enter the required details in the **Pricing Eligibility Criteria** section.
5. If you want to define more than one pricing eligibility criteria for the price component, click the **Add** (+) icon *a*nd then repeat step 2.

   Note: However, if you want to remove a pricing eligibility criteria from the price component, click the **Delete** (🗑) icon corresponding to the parameter.
6. Click **Save**.
   The pricing eligibility criteria is defined for the price component.

   Note: You can define a pricing eligibility criteria for a price component only when the price item pricing is in the **Draft**, **Proposed**, or **Template** status.

Editing a Tiering Criteria of a Price Component

Prerequisites

To edit a tiering criteria for a price component, you should have:

- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application.

Procedure

To edit a tiering criteria of a price component:

1. Do either of the following:

If you want to edit the tiering criteria of.....	Then...
Price components of Price Item Pricing assigned to an account	**a.** Search for the account in the **Customer 360° View** screen. **b.** In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account whose tiering criteria of a price component you want to edit. A menu appears. **c.** Click the **Go To Effective Pricing** menu option. The **Pricing (Account)** screen appears. **d.** Price assignments effective for the account appears in the **Effective Price Assignments for Account** zone. **e.** In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item for which you want to edit tiering criteria of a price component. The **Price Item Pricing** screen appears. **Tip:** Alternatively, you can access the **Price Item Pricing** screen by:

If you want to edit the tiering criteria of.....	Then...
	a. Search for a price item in the **Search Price Item or Price Item Pricing** zone. b. In the **Search Results** section, click the **Assign** ( ) icon corresponding to the price item. c. Enter the required details in the **Price Item Pricing** screen and click **Save**. d. The **Price Item Pricing** screen appears.
Price components of Price Item Pricing assigned to a person	a. Search for the person in the **Customer 360° View** screen. b. In the **Search Results** section, click the **Context Menu** ( ) icon corresponding to the person whose tiering criteria of a price component you want to edit. A menu appears. c. Click the **Go To Effective Pricing** menu option. The **Pricing (Person)** screen appears. d. Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone. e. In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item for which you want to edit tiering criteria of a price component. The **Price Item Pricing** screen appears. **Tip:** Alternatively, you can access the **Price Item Pricing** screen by: a. Search for a price item in the **Search Price Item or Price Item Pricing** zone. b. In the **Search Results** section, click the **Assign** () icon corresponding to the price item. c. Enter the required details in the **Price Item Pricing** screen and click **Save**. d. The **Price Item Pricing** screen appears.
Price components of Price Item Pricing assigned to a price list	a. Search for the price list in the **Price List** screen. b. In the **Search Results** section, click the **Price List Pricing** ( ) icon corresponding to the price list whose tiering criteria of a price component you want to edit. The **Price List Price Item Pricing** screen appears. c. Price items assigned to the price list appears in the **Price List Price Items** zone. d. In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item for which you want to edit tiering criteria of a price component. The **Price Item Pricing** screen appears. **Tip:** Alternatively, you can access the **Price Item Pricing** screen by: a. Search for a price item in the **Search Price Item or Price Item Pricing** zone.

If you want to edit the tiering criteria of.....	Then...
	b. In the **Search Results** section, click the **Assign** ( ) icon corresponding to the price item. c. Enter the required details in the **Price Item Pricing** screen and click **Save**. d. The **Price Item Pricing** screen appears.

2. Ensure that the **Price Assignment Tree** zone is expanded while defining or editing the tiering criteria of a price component.
3. Click the **Add** (+) icon corresponding to the price component whose tiering criteria you want to edit.
   The **Price Component** zone appears.
4. In the **Price Components** zone, click the **Show Price Component Tier** link.

   Note:

   The **Tiering Criteria** zone appears when **Tiering Type** for the rate component is **STEP** or **Threshold**.

   The **Tiering Criteria** section appears. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the sequence in which tiering criteria is to be considered.	Yes
Tiering Criterion	Used to select the tiering criterion which is used in the tiering range.	Yes
Lower Limit	Used to specify the lower limit of the pricing range. **Note:** The system provides you with the facility to specify the lower limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range.	Yes
Upper Limit	Used to specify the upper limit of the pricing range. **Note:** The system provides you with the facility to specify the upper limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range. When you define single tier with the maximum value as blank (for example, 0 to BLANK), the system will automatically replace the blank space with 999999999999999999.99.	Yes
Price Item	Used to Indicate whether the price item or price item bundle's total usage is considered for determining the rate. By default, the price item code for which you defined the pricing appears in this field. You can specify any other price item or bundle code, if required.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** screen appears where you can search for the required price item.	
Price Item Parameters	Used to specify the parameters based on which price item or bundle's total usage should be considered for determining the rate. By default, the parameters based on which you are defining the pricing appear in this field. You can specify any other parameters (where the **Pricing** flag is set to **Yes**), if required. However, note that you can only select parameters associated with the price item or bundle which is used for defining the tiering criteria. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**. The **Edit** (✎) appears corresponding to the **Price Item Parameters** field. On clicking the **Edit** icon, the **Parameters Search** screen appears where you can search for the required parameter.	No

5. Modify the tiering criteria for a price component.
6. Click **Save**.
   The tiering criteria is edited for a price component.

Editing a Price Item Pricing

Prerequisites

To edit a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

Procedure

To edit a price item pricing:

1. Do either of the following:

If you want to...	Then...
Edit pricing of a price item that is assigned to a person from Customer 360° View screen	**a.** Search for the person in the **Customer 360° View** screen. **b.** In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the person whose pricing details you want to edit. A menu appears. **c.** Click the **Go To Effective Pricing** menu option. The **Pricing (Person)** screen appears. **d.** Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone. **e.** You can edit the pricing item pricing through the following alternatives: **1.** First alternative, • In the **Search Results** section of **Effective Price Assignments for Person** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **2.** Second alternative, • In the **Search Results** section of **Effective Price Assignments for Person** zone, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to edit. The **Price Item Pricing** screen appears. • Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status. **3.** Third alternative, • Search for a price item in the **Search Price Item or Price Item Pricing** zone. In the **Search Results** section, click the **Assign** (✎) icon corresponding to the price item. • Enter the required details in the **Price Item Pricing** screen and click **Save**. The **Price Item Pricing** screen appears. • Click the **Edit** button in the **Record Actions** section.

If you want to...	Then...
	The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.
Edit pricing of a price item that is assigned to an account from Customer 360° View screen	**a.** Search for the person in the **Customer 360° View** screen. **b.** In the **Search Results** section, click the **Context Menu** (⊙) icon corresponding to the account whose pricing details you want to edit. A menu appears. **c.** Click the **Go To Effective Pricing** menu option. The **Pricing (Account)** screen appears. **d.** Price assignments effective for the account appears in the **Effective Price Assignments for Account** zone. **e.** You can edit the pricing item pricing through the following alternatives: **1.** First alternative, • In the **Search Results** section of **Effective Price Assignments for Account** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **2.** Second alternative, • In the **Search Results** section of **Effective Price Assignments for Account** zone, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to edit. The **Price Item Pricing** screen appears. • Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status. **3.** Third alternative, • Search for a price item in the **Search Price Item or Price Item Pricing** zone. In the **Search Results** section, click the **Assign** (✎) icon corresponding to the price item.

If you want to...	Then...
	• Enter the required details in the **Price Item Pricing** screen and click **Save**. The **Price Item Pricing** screen appears. • Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.
Edit pricing of a price item that is assigned to a price list from Price List screen	**a.** Search for the price list in the **Price List** screen. **b.** In the **Search Results** section of **Price List Price Items** zone, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to edit. The **Price Item Pricing** screen appears. **c.** Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.
Edit pricing of a price item that is assigned to a price list from Price List Price Item Pricing screen	**a.** Search for the price list in the **Price List** screen. In the **Search Results** section, click the **Price List Pricing** (🔗) icon corresponding to the price list whose pricing details you want to edit. The **Price List Price Item Pricing** screen appears. **b.** Price items assigned to the price list appears in the **Price List Price Items** zone. **c.** You can edit the pricing item pricing through the following alternatives: **1.** First alternative, • In the **Search Results** section of **Price List Price Items** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **2.** Second alternative, • Search for a price item in the **Search Price Item or Price Item Pricing** zone. In the **Search Results** section, click the **Assign** (✔) icon corresponding to the price item.

If you want to...	Then...
	• Enter the required details in the **Price Item Pricing** screen and click **Save**. The **Price Item Pricing** screen appears. • Click the **Edit** button in the **Record Actions** section. The **Price Item Pricing** screen appears to edit the pricing details of a price item. **Note:** The **Edit** button appears when the price item pricing is in the **Draft** status.

The **Price Item Pricing** screen appears.

2. Modify the required pricing details.

Note:

If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.

You can search for parameter, rate schedule by clicking the **Search** (🔍) icon corresponding to the respective fields.

Overriding a Price Item Pricing

Prerequisites

To override a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

Procedure

To override a price item pricing:

1. Do either of the following:

If you want to...	Then...
Override price item pricing assigned to the customer either directly or through the customer hierarchy or price list	**a.** Access the **Pricing (Person)** screen. **b.** In the **Effective Price Assignment** zone, click the **Override** ( ) icon in the **Override** column corresponding to the price item pricing that you want to override.

If you want to...	Then...
Override price item pricing assigned to the account either directly or through the customer hierarchy or price list	**a.** Access the **Pricing (Account)** screen. **b.** In the **Effective Price Assignment** zone, click the **Override** ( ) icon in the **Override** column corresponding to the price item pricing that you want to override.

The **Price Item Pricing** screen appears.

2. Modify the required pricing details.

Note:

If you change the effective start and end dates while overriding a price item pricing, you need to specify the parameters which are effective during that date range.

While overriding a price item pricing, you can not only edit the existing tiering combination details, but also add additional tiering combinations until the maximum tiering combinations limit is met.

3. Modify the price assignment characteristics, if required.
4. Click **Save**.
   The price item pricing is overridden.

Editing the Two-Dimensional Pricing

Procedure

To edit a two-dimensional pricing:

1. Do either of the following:

If you want to...	Then...
Editing the Two-Dimensional Pricing of a price item that is assign to a customer	**a.** Ensure that the **Search Price Item or Price Item Pricing** zone is expanded in the **Pricing (Person)** screen when you are editing the two-dimensional pricing for a customer. **b.** Search for the price item in the **Search Price Item or Price Item Pricing** zone. **c.** In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item for which you want to edit two dimensional pricing details.
Editing the Two-Dimensional Pricing of a price item that is assign to a account	**a.** Ensure that the **Search Price Item or Price Item Pricing** zone is expanded in the **Pricing (Account)** screen when you are editing the two-dimensional pricing for an account. **b.** Search for the price item in the **Search Price Item or Price Item Pricing** zone. **c.** In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item for which you want to edit two dimensional pricing details.
Editing the Two-Dimensional Pricing of a price item that is assign to a price list	**a.** Ensure that the **Search Price Item or Price Item Pricing** zone is expanded in the **Price List Price Item Pricing** screen when you are editing the two-dimensional pricing for a price list. **b.** Search for the price item in the **Search Price Item or Price Item Pricing** zone. **c.** In the **Search Results** section, click the **Assign** ( ) icon in the **Assign** column corresponding to the price item for which you want to edit two dimensional pricing details.

The **Price Item Pricing** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the pricing of the price item is effective. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The **Start Date** cannot be later than the **End Date**. If you change the start date and the end date while editing a price item pricing, you need to specify the parameters which are effective during that date range.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	This field will be in read-only mode when the price assignment has been used.	
End Date	Used to specify the date till when the pricing of the price item is effective. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **End Date** cannot be earlier than the **Start Date** .	No
Price Assignment Type	Used to indicate the type of price assignment. The valid values are: • **Post Processing** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account. **Note:** The post processing bill segment is generated when the **Post Processing Sequence (PPSEQ)** characteristic is defined for the price item and when the price item is associated with another price item using the **Price Item** relationship type. • **Post Processing - Invoice Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**. • **Post Processing - Price Item Based** - Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account. **Note:** This will not be applicable for price item which are defined for **Only Pricing**.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Used to define the pricing eligibility criteria for the price item pricing. Used to define the pricing eligibility criteria for the price item pricing. **Regular** - Used to indicate that the pricing must be used to generate regular bill segment. **Note:** By default, the **Regular** option is selected in the **Price Assignment Type** field. This field is not applicable for price items which are defined for **Pricing** and where the **Price Item Type** field is set to **Fees**.	
Pricing Eligibility	Used to define the pricing eligibility criteria for the price item. **Note:** If you select the check box you can define the pricing eligibility criteria of the price item in the **Price Component** zone.	Yes (Conditional) **Note:** This field is required while defining the pricing eligibility criteria of the price item.
Pricing Status	Used to indicate the status of the price assignment. The valid values are: • **Draft** - Used to indicate that the price assignment is created as a draft. • **Active** - Used to indicate that the price assignment is used for billing. • **Inactive** - Used to indicate that the price assignment is no longer used for billing. • **Proposed** - Used to indicate that the price assignment is to be used for quotations. **Note:** The **Proposed** status indicates that the price assignment is defined for a deal and awaiting approval. • **Template** - Used to indicate that the price assignment is a template price list. • **Recommended** - Used to indicate that the price assignment is used for recommendation. **Note:** The **Recommended** status indicates that the price assignment is recommended for a deal. **Note:** If a price assignment is in **Active** status, you can change its status to **Inactive**. If a price assignment is in **Draft** status, you cannot change its status to **Proposed**.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. **Note:** Rate schedules controls how the bills for the price item will be calculated. The **Search** (🔍) icon appears corresponding to the **Rate Schedule field**. On clicking the **Search** icon, the **Rate Schedule Search** screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: • Two-Dimensional **Note:** If you select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define two-dimensional pricing for the price item. However, if you do not select the **Two-Dimensional** option from the **Pricing Rule Type** list, you can define traditional flat, step, or tiered pricing for the price item. Also, you need to select the **Pricing Eligibility** option check box while defining a two-dimensional pricing for the price item.	Yes (Conditional) **Note:** This field is required for defining a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: • Yes • No **Note:** By default, **Yes** is selected.	Yes
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: • All Customers • New Customers **Note:** By default, the **All Customers** option is selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	This field appears when you are defining a price item pricing which you want to assign to a price list.	
Pricing Frequency	Used to indicate pricing frequency for the price item. **Note:** This field appears when you select the **Price Item Usage** as **Pricing** and **Price Item Type** as **Fees** while defining the price item.	Yes

2. Enter the required details and click **Save**.
   The **Price Item Pricing** screen appears.

   Note: The **Two-Dimensional Pricing** zone appears in the **Price Item Pricing** screen only when the **Two-Dimensional** option is selected from the **Pricing Rule Type** field while defining the price item pricing.
3. Click the **Edit** link in the top-right of the **Two-Dimensional Pricing** zone.

   The **Two-Dimensional Pricing** screen appears. It contains the following fields in a grid:

Field Name	Field Description
Step Criterion	Used to search by the various criterion.
Threshold Parameter	Used to search by the threshold parameter.
Tiering Range	Displays the tiering range of the pricing.

4. Modify the details in the **Two-Dimensional Pricing** screen, if required.
5. If you want to add more than one threshold parameter, click the **Add** (+) icon and then enter the threshold parameter name and its value.
   However, if you want to remove a threshold parameter, click the **Delete** (🗑) icon corresponding to the parameter.
6. If you want to add more than one tiering range, click the **Add** (+) icon and then enter the specific range.
   However, if you want to remove a tiering range, click the **Delete** (🗑) icon corresponding to the range that you want to remove.
7. Click **Save**.
   The changes made to the two-dimensional pricing are saved.

Pricing Simulation

The **Pricing Simulation** screen allows you to:

- View pricing simulation details for account or price list
- View effective pricing information
- Search simulation details of account or price list

This screen consists of the following zones:

- Search Pricing on page 746

Through the **Pricing Simulation** screen, you can navigate to the following screens:

- Price Item (Used for Viewing) on page 423
- Simulation - Effective Pricing Information on page 750

Search Pricing

The **Search Pricing** zone allows you to search pricing for an account.

In case of bundles, the order in which the price item pricing is listed in this zone is based on the following condition:

- If the system finds pricing for price items that belong to a bundle before finding pricing for the bundle, then the system lists the pricing for price items that belong to the bundle, and not the pricing for the bundle. For example, let say, B0001 is a bundle, and contains C0001 and C0002 price items. If the system finds pricing for B0001, it validates whether the pricing for C0001 and C0002 has already been found. If yes, then the system lists the pricing for C0001 and C0002. If the system does not find pricing for C0001 and C0002 before finding pricing for B0001, it lists the pricing for B0001.

Note: If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following two options:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for pricing using price list or account or person details. The valid values are: • Price List • Account /Person	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: By default, **Price List** option is selected.	
Price List ID	Used to indicate Price List ID for which simulation must be created. **Note:** This field appears when the **Price List ID** option is selected for the **Search By** field. The **Search** (Q) icon appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** screen appears.	Yes
Account ID	Used to specify the account for which simulation must be created. **Note:** This field appears when the **Account** option is selected for the **Search By** field. The **Search** (Q) icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** screen appears.	Yes
Person ID	Used to specify the person for which simulation must be created. This field gets auto populated once the Account ID value is defined. **Note:** The **Search** (Q) icon appears corresponding to this field. On clicking the **Search** icon, the **Person Search** screen appears.	Yes
Simulation Date	Used to search price simulations which are effective from a particular date onwards.	Yes
Pricing Status	Used to search price assignments with a particular status. The valid values are: • Active • Proposed	No
Search Type	Used to indicate whether you want to search the price list using the following values: • Best Fit • Exact Match **Note:** By default, **Exact Match** option is selected.	No
Show Default and Global Pricing	Used to indicate whether the product is assigned to a default and global price list. The valid values are: • Yes • No	No

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price items for pricing simulation. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** screen appears.	No
Description	Used to search price assignments of a price item having a particular description.	No
View Type	Used to indicate whether you want to view summary or tiering details of price components. The valid values are: • **Detail** - Used when you want to view the details of price component with pricing eligibility and tiering criteria. • **Summary** - Used when you want to view the summary of effective price component.	No
Parameter	Used to specify multiple parameter codes based on which you want to define the pricing. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Parameter Search** screen appears.	No
Parameter Value	Displays the value of the parameter or used to specify multiple parameter value. **Note:** The **Search** (🔍) icon appears corresponding to this field when the value type for the **Parameter** is **Reference** or **Predefined**. If the value type of the **Parameter** is **Reference** then on clicking the **Search** icon, the **Reference Parameter Value Search** screen appears. If the value type of the **Parameter** is **Predefined** then on clicking the **Search** icon, the **Predefined Parameter Value Search** screen appears.	No

To add more than one **Parameter**, click the **Add** (+) icon and to delete the parameters click the **Delete** (🗑) icon corresponding to the **Parameter** field.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Note: If default Price List ID is added to the Price List Value and if **Yes** is selected for **Show Default and Global Pricing**, also if Price List is added to the product for selected account then **Search Results** section will display price list assignments for the value and product will be displayed along with the default price list assignments.

Column Name	Column Description
Price Item	Displays the price item code. **Note:** It has a link. On clicking the link, the **View Price Item** screen appears with the details of the respective price item.
Description	Displays the description of the price item.
Variance Parameters	Indicates the variance parameter which is used for defining the price item pricing. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item). A tool tip appears when you hover over this column corresponding to the price item. It indicates the price item parameters and their values used for defining the price item pricing. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based • Post Processing - Price Item Based
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy.
Price List Description	Displays the description of the price list. **Note:** The description appears when the pricing assignment type is Account Price List, or Account Inherited Price List.
Rate Description	Displays the description of the tiering setup of the rate component.
Simulate	On clicking the Simulate (🔗) icon, the **Simulation - Effective Pricing Information** screen appears where you can add the **Price Item SQIs** and **Pricing Eligibility Parameters** details that can be passed for pricing simulation. **Note:** This column appears when the price item is **Rate** and **Fees**.
Effective Start Date	Displays the date from when the pricing is effective.
Effective End Date	Displays the date till when the pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the pricing is inherited.

Note:

The number of records that can be displayed in the **Search Results** section of the **Search Pricing** zone is controlled via the **C1_PR_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1_PR_REC** feature configuration. For more information, refer to Setting the C1_PR_REC Feature Configuration on page 4656.

Simulation - Effective Pricing Information

The **Simulation - Effective Pricing Information** screen contains the following sections:

- **SQIs** - This section contains the following fields:

Field Name	Field Description
SQI	Used to indicate the SQI that you want to associate with the price item. **Note:** If you want to define more than one price item SQI, click the **Add** (+) icon corresponding to this field. If you want to remove a price item SQI, click the **Delete** (🗑) icon corresponding to this field. The **Search** (🔍) icon appears corresponding to this field. On clicking the search icon, the **Search for Service Quantity Identifier** screen appears. This field is required when you want to view the effective pricing simulation.
Value	Used to indicate the SQI value that you want to associate with the price item. **Note:** If you want to define more than one value, click the **Add** (+) icon corresponding to this field. If you want to remove a price item SQI value, click the **Delete** (🗑) icon corresponding to this field.

- **Pricing Eligibility Parameters** - This section contains the following fields:

Field Name	Field Description
Parameter	Used to specify multiple parameter codes based on which you want to define the pricing **Note:** This field appears only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to true. The **Search** (🔍) icon appears corresponding to this field. On clicking the search icon, the **Parameter Search** screen appears.

Field Name	Field Description
	If you want to define more than one parameter, click the **Add** (+) icon corresponding to this field. If you want to remove a parameter, click the **Delete** (🗑) icon corresponding to this field.
Parameter Value	Displays the value of the parameter or used to specify multiple parameter value. **Note:** The **Search** (🔍) icon appears corresponding to this field appears when the value type for the **Parameter** is defined as **Reference** or **Predefined**. If the value type of the **Parameter** is **Reference**, then the **Reference Parameter Value Search** screen appears and if the value type of the **Parameter** is **Predefined**, then the **Predefined Parameter Value Search** screen appears. If you want to define more than one value, click the **Add** (+) icon corresponding to this field. If you want to remove a parameter value, click the **Delete** (🗑) icon corresponding to this field.

After providing the required information, when you click on **Simulate** button, the **Effective Pricing Information** zone appears where you can view the effective pricing simulation. This zone contains the following sections:

- **Rate Information** - This section contains the following fields:

Field Name	Field Description
Applicable Rate	Displays the rate applicable for which pricing is defined.
Contributing Price Components are	Displays how the price components are contributed.

Note: This section appears when **Price Item Type** is **Rate** .

- **Fee Information** - This section contains the following fields:

Field Name	Field Description
Applicable Fee	Displays the fee applicable for which pricing is defined.
Contributing Price Components are	Displays how the price components are contributed.

Note: This section appears when **Price Item Type** is **Fees** .

- **Price Item and Parameter Information** - This section contains the following fields:

Field Name	Field Description
Price Item	Displays the price item for which pricing is defined.
Description	Displays the description of the price item

The Parameter Information appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.

This segment contains the following fields:

Field Name	Field Description
Parameter	Specifies multiple parameter codes associated with the price items based on which pricing is defined.
Parameter Information	Displays the parameter information with concatenated comma separated values.
Parameter Value	Displays the value of the parameter.

- **TFM Information** - This section contains the following fields:

Field Name	Field Description
Ignore Transaction	Displays whether the transactions mapped to the price item is considered for billing.
Aggregation Schedule	Displays the aggregation cycle.
Aggregation Transaction	Specifies whether the transactions mapped to the price item are aggregated for billing.
Rating Criteria	Specifies how and when you rate the transaction legs mapped to the price item.

Note: This section appears when the **Price Item** is available for **Pricing and Billing**.

- **Pricing Information** - This section contains the following fields.

Field Name	Field Description
Effective Start Date	Displays the date from when the price item pricing is effective.
Pricing Currency	Specifies the currency in which you define the price item pricing.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Status	Displays the status of price assignment.
Variance Parameter	Specifies the variance based on which price item pricing is defined. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.
Rate Schedule	Specifies the rate schedule used for defining price item pricing.
Price Assignment Type	Displays the type of price assignment.
Print Zero	Specifies whether zero pricing should be displayed in the bill.
Apply To	Displays whether the price item pricing is applied to all customers or only to the new customers.
Pricing Frequency	Displays the frequency for pricing where **Price Item Type** is fees.
Advance Pricing	Displays only if **Price Item** is defined as **Pricing Only** , **Price Item Type** is defined as **Fees** and **Price Assignment Type**is defined as **Post Processing** . The valid values are: • Yes • No

Pricing Eligibility Criteria and **Tiering Criteria** for each eligibility or tier range are displayed in following fields:

Field Name	Field Description
Rate Component Sequence	Displays the sequence number of the rate component.
Tiering Type	Displays the tiering type of the rate component.
Price Component Sequence	Specifies the sequence of price component whose rate is used for calculation.
Price Component Description	Displays the description of the rate component.
Rate	Specifies the price for the price item.
Contributing Factor	Displays the availability of contributing factor.
Eligibility/Tier Details	On clicking the **Add** (+) icon, expandable details of **Tiering Criteria** and **Pricing Eligibility Criteria**are displayed.

When you click the **Add** (+) icon, if the price component is scheduled for Flat Rate then, only **Pricing Eligibility Criteria** segment appears. If the price component is scheduled for Step or Threshold then both the segments, **Tiering Criteria** and **Pricing Eligibility Criteria** appears.

Tiering Criteria segment contains the following fields:

Field Name	Field Description
Tiering Criteria	Displays the tiering criteria.
Price Item	Specifies whether the price item or bundle's total usage is considered for determining the rate.
Variance Parameter	Specifies the variance based on which price item or bundle's total usage is considered for determining the rate. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.
Price Item Parameters	Specifies the parameters based on which price item or bundle's total usage is considered for determining the rate. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
From	Specifies the lower limit of the tiering range.
To	Specify the upper limit of the tiering range.

Pricing Eligibility Criteria segment contains the following fields:

Field Name	Field Description
Sequence Number	Specifies the order in which the criteria should be executed in the rule.
Parameter	Specifies the left hand side parameter which you want to use along with the price item for price determination.

Field Name	Field Description
	Note: This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Operator	Specifies the relational operator to define the relation between the left hand side and right hand side parameters.
Parameter Value Type	Displays the type of pricing eligibility.
Parameter	Specifies the right hand side parameter which you want to use along with the price item for price determination. **Note:** This field appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Parameter Value	Specifies the parameter value.
Is True	Displays what should happen when the condition is true (satisfied).
Is False	Displays what should happen when the condition is false (not satisfied).
Is Sufficient	Displays what should happen when the data is insufficient.

This section contains the following links:

Link Name	Link Description
Expand All	Used to define all the **Tiering Criteria** and **Pricing Eligibility Criteria** segments.
Collapse All	Used to un-define the displayed **Tiering Criteria** and **Pricing Eligibility Criteria** segments.
Expand Only Contributing Factors	Used to define only those **Tiering Criteria** and **Pricing Eligibility Criteria** segments with contributing factors.

Searching Pricing Simulation for Account or Price List

Prerequisites

To search pricing simulation for an account or price list, you should have:

- Price Item, Account or Person details defined in the application

Procedure

To search pricing simulation for an account or price list:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Pricing Simulation**.
   The **Pricing Simulation** screen appears.
3. In the **Search Pricing** zone, select **Account** or **Price List** depending on what you want search pricing simulation.
4. Enter the additional search criteria, if required.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of pricing details that meet the search criteria appears in the **Search Results** section.

Viewing Pricing Simulation

Prerequisites

To view pricing simulation details of an account, you should have:

- Price items assigned to the account

Procedure

To view pricing simulation of an account:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Pricing Simulation**.
   The **Pricing Simulation** screen appears.
3. You can search for an account by entering the search criteria in the **Search Pricing** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

Exporting Effective Price Simulation

Procedure

To export effective price simulation for an account in the CSV format:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Pricing Simulation**.
   The **Pricing Simulation** screen appears.
3. You can search for an account by entering the search criteria in the **Search Pricing** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click the **Export to Excel** link in the **Search Pricing** zone.
   The **File Download** dialog box appears.
5. Click **Save**.
   The **Save As** dialog box appears.
6. Browse to the location where you want to save the file.
7. Enter the file name in the respective field, and click **Save**.
   The search results are exported in CSV format.
8. Open the CSV file in Microsoft Excel.

   It contains the following columns:

Column Name	Column Description
Price Item	Displays the price item code.
Description	Displays the description of the price item.
Variance	Indicates the variance parameter which is used for defining the price item pricing. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **False**.
Price Item Parameters	Indicates the parameters which are used for defining the price item pricing. **Note:** This column appears when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.
Price Assignment Type	Indicates the type of price assignment. The valid values are: • Regular • Post Processing • Post Processing - Invoice Based

Column Name	Column Description
	• Post Processing - Price Item Based
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy.
Price List Description	Displays the description of the price list. **Note:** The description appears when the pricing assignment type is Account Price List, Customer Price List, or Parent Customer Price List.
Rate	Displays the price of the price item. It also indicates whether the price is a Flat, Threshold, or Step price. The price can be agreed pricing, price list pricing, or pricing inherited from the price list hierarchy. If the price is applicable only to new customers, an asterisk (*) symbol appears corresponding to the price.
Price Component Description	Displays the description of the price component whose rate is used for calculation. **Note:** The data appears in this column only when the rate corresponding to the price component in the price item pricing is used for calculation.
Effective Start Date	Displays the date from when the pricing assignment is effective.
Effective End Date	Displays the date till when the pricing assignment is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
From	Displays the lower limit of the tiering range.
To	Displays the upper limit of the tiering range.
Price Assignment Usage	Indicates whether the price assignment is applicable to all customers or only to the new customers.
Price Assignment ID	Displays the ID that is generated automatically when the price assignment is done.
Parent Level	Displays the numerical level of the parent in the hierarchy from whom the pricing is inherited.
Price List ID	Displays the price list ID from where the pricing is inherited.
Price List Start Date	Displays the date from when the price list is effective.
Parent Person	Displays the name of the parent or grandparent customer from whom the pricing is inherited.
Parent Pricelist Level	Indicates the parent level when pricing is inherited from the price list hierarchy. If the pricing is inherited from the assigned price list, the parent price list level will be 0. However, if the pricing is inherited from the parent price list in the hierarchy, the parent price list level will be 1. And, if the pricing is inherited from the grandparent price list in the hierarchy, the parent price list level will be 2, and so on.
Ignore Transaction	Indicates whether the transactions mapped to the price item should be considered for billing. The valid values are: • Y • N
Aggregate Transaction	Indicates whether the transactions mapped to the price item should be aggregated for billing. The valid values are: • Y • N
Aggregation Schedule	Indicates the aggregation cycle.

Column Name	Column Description
Tiering Criterion	Indicates the tiering criterion.
Tiering Price Item	Indicates whether the price item is billed individually or at the bundle level.

Eligible Price Lists

The **Eligible Price Lists** screen allows you to:

- Search for an eligible price list
- View the eligible price list details for an account or a person
- View the pricing simulation details of an account or a person

The **Eligible Price Lists** screen contains the following zone:

- Eligible Price Lists on page 758

Through the **Eligible Price List** screen, you can navigate to the following screen:

- Pricing Simulation on page 746

Eligible Price Lists

The **Eligible Price Lists** zone allows you to search for an eligible price list for an account or a person. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search eligible price list based on the division.	Yes
Eligibility Date	Used to search price lists which are eligible for the account or person from a particular date onwards. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes
Status	Used to search eligible price list with a particular status. The valid values are: • Active • Inactive • Proposed	No
Person ID	Used to search eligible price list for a particular person.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Person Search** screen appears where you can search for the respective person.	
Account ID	Used to search eligible price list for a particular account. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** screen appears where you can search for the respective account.	No

- **Price List Eligibility Parameters** - The **Price List Eligibility Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search eligible price list which are defined using a particular parameter. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears where you can search for the respective parameter. This field appears only when the **MultiPrice Parameter** option type of the **MultiParameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	No
Parameter Value	Used to specify the value of the parameter using which you want to search the eligible price list. **Note:** If you select a predefined or a reference parameter, the **Search** (🔍) icon appears corresponding to the **Parameter Value** field. On clicking the **Search** icon, the **Predefined Parameter Value Search** window or the **Parameter Value Search** window appears where you can select the respective parameter value. This field appears only when the **MultiPrice Parameter** option type of the **MultiParameter Based Pricing (C1_PPARM_FLG)** feature configuration is set to **True**.	No

Note: If you want to add more than one parameter in the search criteria, click the **Add** (+) icon and then enter the parameter name and its value. However, if you want to remove a parameter from the search criteria, click the **Delete** (🗑) icon corresponding to **Parameter** field.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays the concatenated string of information about the price list separated by a comma (,). **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Status	Indicates the current status of the price list. The valid values are: • Active • Inactive • Proposed
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.
Simulate	On clicking the **Simulate**(🔗) icon, the **Pricing Simulation** screen appears where you can simulate the price assignments for a person or account using the price list.
View	On clicking the **View**(🔗) icon, the **Price List** screen appears with the details of the respective price list.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for an Eligible Price List

Prerequisites

To search for a eligible price list, you should have:

- Divisions defined in the application
- Eligible Price list associated with the division to which the user belongs

Procedure

To search for a eligible price list:

1. Click the **Menu** (☰) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Eligible Price List**.

The **Eligible Price List** screen appears.

3. Enter the search criteria in the **Eligible Price Lists** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of eligible price lists that meet the search criteria appears in the **Search Results** section.

Rate Definition

Rate schedules, rate versions, and rate components are used to define the formulas to calculate the total amount charged to a customer for a product. Some examples of formulas are: price times the number of transactions used and a flat monthly charge plus a percentage of the average daily balance.

The rate is a formula with variables whose values are supplied by a user by setting up a price list or override price. For example, a rate might add a flat monthly charge and a percentage of the average daily balance to arrive at the amount charged to the customer. This rate might be used to calculate the charge for multiple products, each product with its own flat amount and percentage. So, these two factors are defined as variables whose values must be entered by users when they setup price list or override price. In Oracle Revenue Management and Billing (ORMB), these variables are defined as rate components.

The system provides you with the ability to create tiered pricing in case standard flat pricing is not sufficient to meet the business needs. The **Rate Definition** screen allows you to indicate whether the rate component supports standard flat pricing or tiered pricing. It allows you to define, edit, and delete the tiering setup of a rate component. This screen consists of the following zones:

- Rate Schedule Components on page 762
- Create/Edit Rate Definition on page 763

Rate Schedule Components

The **Rate Schedule Components** zone allows you to select the rate schedule whose rate components' tiering setup you want to define or edit. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Used to select the rate schedule.	Yes

- **Search Results** - On clicking the **Search** button, the rate components of the rate schedule appear in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Rate Schedule	Displays the rate schedule.
Rate Component Sequence	Displays the sequence number of the rate component.
Rate Component Description	Displays the description of the rate component.
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.
Tiering Type	Displays the tiering type. The valid values are: • FLAT

Column Name	Column Description
	• STEP • THRESHOLD
Rate Component Map Description	Displays the description of the tiering setup of the rate component.
Rate Component Map ID	Displays the rate component map ID. **Note:** This ID is generated automatically when you define the tiering setup of the rate component.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to the rate schedule, the **Create/Edit Rate Definition** zone appears with the details of the respective rate component.

Create/Edit Rate Definition

The **Create/Edit Rate Definition** zone allows you to define and edit the tiering setup of a rate component. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Displays the rate schedule.	Not applicable
Rate Component Description	Displays the description of the rate component.	Not applicable
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.	Not applicable
Rate Component Sequence	Displays the sequence number of the rate component in the rate schedule.	Not applicable
Tiering Type	Used to specify the tiering type. The valid values are: • FLAT • STEP • THRESHOLD	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field is non-editable when you edit the tiering setup of the rate component.	
Rate Component Map Description	Used to specify the description for the tiering setup of the rate component. For example, if you want the user to enter price per transaction for a tiering range, enter `Price Per Transaction` in the **Rate Component Map Description** field.	Yes

In addition, the **Create/Edit Rate Definition** zone contains the following buttons:

Button Name	Button Description (When the Action is Add)
Save	Used to create the tiering setup for the rate component.
Delete	Used to delete the tiering setup of the rate component. **Note:** You can delete a tiering setup only when the rate component is not yet used for any product pricing. This button is disabled when you are define the tiering setup of the rate component.
Cancel	Used to clear the fields in this zone.

By default, the **Create/Edit Rate Definition** zone does not appear in the **Rate Definition** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to a **Rate Schedule** in the **Search Results** section of **Rate Schedule Components** zone.

Defining Tiering Setup of a Rate Component

Prerequisites

To define tiering setup of a rate component, you should have:

- Rate schedules defined in the application
- Rate components of the rate schedule defined in the application

Procedure

To define tiering setup of a rate component:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A drawer appears.
2. From the **Main** menu, select **Rates** and then click **Rate Definition**.
   The **Rate Definition** screen appears.
3. Select the rate schedule in the **Rate Schedule Components** zone.
4. Click **Search**.
   The rate components of the rate schedule appear in the **Search Results** section.
5. Click the **Broadcast** (📡) icon corresponding to the rate component whose tiering setup you want to define.

   The **Create/Edit Rate Definition** zone appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Displays the rate schedule.	Not applicable
Rate Component Description	Displays the description of the rate component.	Not applicable
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.	Not applicable
Rate Component Sequence	Displays the sequence number of the rate component in the rate schedule.	Not applicable
Tiering Type	Used to specify the tiering type. The valid values are: • FLAT • STEP • THRESHOLD **Note:** This field is non-editable when you edit the tiering setup of the rate component.	Yes
Rate Component Map Description	Used to specify the description for the tiering setup of the rate component. For example, if you want the user to enter price per transaction for a tiering range, enter `Price Per Transaction` in the **Rate Component Map Description** field.	Yes

6. Select the tiering type from the **Tiering Type** list.
7. Enter the description for the tiering setup of the rate component in the **Rate Component Map Description** field. For example, if you want the user to enter price per transaction for a tiering range, enter `Price Per Transaction` in the **Rate Component Map Description** field.
8. Click **Save**.
   The tiering setup of a rate component is defined.

Note: The rate component map ID is generated automatically when you define the tiering setup of the rate component.

Editing Tiering Setup of a Rate Component

Procedure

To edit tiering setup of a rate component:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A drawer appears.
2. From the **Main** menu, select **Rates** and then click **Rate Definition**.
   The **Rate Definition** screen appears.
3. Select the rate schedule in the **Rate Schedule Components** zone.
4. Click **Search**.
   The rate components of the rate schedule appear in the **Search Results** section.
5. Click the **Broadcast** (⦾) icon corresponding to the rate schedule whose tiering setup you want to edit.

   The **Create/Edit Rate Definition** zone appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Displays the rate schedule.	Not applicable
Rate Component Description	Displays the description of the rate component.	Not applicable
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.	Not applicable
Rate Component Sequence	Displays the sequence number of the rate component in the rate schedule.	Not applicable
Tiering Type	Indicates the tiering type. The valid values are: • FLAT • STEP • THRESHOLD	Not applicable
Rate Component Map Description	Used to specify the description for the tiering setup of the rate component. For example, if you want the user to enter price per transaction for a tiering range, enter `Price Per Transaction` in the **Rate Component Map Description** field.	Yes

6. Modify the description for the tiering setup of the rate component in the **Rate Component Map Description** field.
7. Click **Save**.
   The change made to the tiering setup is saved.

Deleting Tiering Setup of a Rate Component

Procedure

To delete tiering setup of a rate component:

1. Click the **Menu** (☰) icon in the **Application** toolbar.
   A drawer appears.
2. From the **Main** menu, select **Rates** and then click **Rate Definition**.
   The **Rate Definition** screen appears.
3. Select the rate schedule in the **Rate Schedule Components** zone.
4. Click **Search**.
   The rate components of the rate schedule appear in the **Search Results** section.
5. Click the **Broadcast** (📡) icon corresponding to the rate schedule whose tiering setup you want to delete.
   The **Create/Edit Rate Definition** zone appears.
6. Click **Delete**.

   The tiering setup of the rate component is deleted, and the action that can be performed on the rate component changes from **Edit** to **Add** in the **Rate Schedule Components** zone.

   Note:

   The **Delete** button is disabled when you are defining the tiering setup of the rate component.

   You can delete the tiering setup only when the rate component is not yet used for any product pricing.

Tiering Criterion

Oracle Revenue Management and Billing (ORMB) provides you with the ability to create tiered pricing in case standard flat pricing is not sufficient to meet the business needs. Through tiered pricing, you can offer more favorable pricing to the customers based on service quantity utilization.

Let us understand this with the help of an example. ABC company uses wire transfer services provided by a large bank. If ABC company initiates up to 1,000 wire transfers, the fee charged by the bank will be $5 per transfer. If ABC

company initiates more than 1,000 wire transfers, the fee will be $3 per transfer. To introduce this flexibility in the pricing model, you will have to define tiered pricing with the following tiering ranges:

- If the number of wire transfers is greater than 0 and less than or equal to 1000, then charge $5 per transfer to ABC company.
- If the number of wire transfers is greater than 1000, then charge $3 per transfer to ABC company.

In the above example, number of wire transfers is the tiering criterion, 0 - 1000 and 1000 - BLANK are tiering ranges, and $5 and $3 are rates per transfer.

The **Tiering Criterion** screen allows you to create and edit a tiering criteria. It contains the following zones:

- Create Tiering Criterion on page 769
- Tiering Criterion List on page 768
- Edit Tiering Criterion on page 768

Tiering Criterion List

The **Tiering Criterion List** zone lists the tiering criterion that are already defined in the system. It contains the following columns:

Column Name	Column Description
Tiering Criterion	Displays the tiering criterion.
Description	Displays the description of the tiering criterion.
Service Quantity Identifier	Displays the Service Quantity Identifier (SQI) associated with the tiering criterion.

On clicking the **Broadcast** (((•))) icon corresponding to the tiering criterion, the **Edit Tiering Criterion** zone appears with the details of the respective tiering criterion.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Person to Person Relationship Type Sequence

Oracle Revenue Management and Billing provides you the flexibility to define person to person relationship type sequence:

- For each division, price item, and price item parameters combination
- For each division
- In the C1_PER_REL feature configuration

The system will first check whether the person to person relationship type sequence is defined for the division, price item, and price item parameters combination. If the person to person relationship type sequence is defined for the division, price item, and price item parameters combination, the system will search effective price item pricing at the parent customer level based on the sequence defined for the combination. However, if the person to person relationship type sequence is not defined for the division, price item, and price item parameters combination, the system will check whether the person to person relationship type sequence is defined for the division. If the person to person relationship type sequence is defined for the division, the system will search effective price item pricing at the parent customer level based on the sequence defined for the division. However, if the person to person relationship type sequence is not defined for the division, the system will consider the person to person relationship type sequence defined in the C1_PER_REL feature configuration and accordingly search effective price item pricing at the parent customer level.

The **Person to Person Relationship Type Sequence** screen allows you to define, edit, and delete person to person relationship type sequence of:

- a division
- a division, price item, and price item parameters combination

This screen consists of the following zones:

- Search Person Relationship Type Sequence for Price Item on page 771
- Search Person Relationship Type Sequence for Division on page 773

Search Person Relationship Type Sequence for Price Item

The **Search Person Relationship Type Sequence for Price Item** zone allows you to search person to person relationship type sequence defined for a division, price item, and price item parameters combination. You can also define, edit, and delete person to person relationship type sequence of a division, price item, and price item parameters combination.

This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item code.	No
Price Item Description	Used to specify the description of the price item.	No
Division	Used to specify the division.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can only view those divisions to which you have access in the **Division** list.	

Note: You must specify at least one search criterion while searching person to person relationship type sequence defined for a division, price item, and price item parameters combination.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item	Displays the price item code. **Note:** It has a link. On clicking the link, the **View Price Item** screen appears with the details of the respective price item.
Description	Displays the description of the price item.
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).
Division	Indicates the division for which price item and price item parameters specific person to person relationship type sequence is defined.
View	On clicking the **View** (🔗) icon, the **Person Relationship Type Sequence for Division and Price Item** screen appears where you can view person to person relationship type sequence defined for the division, price item, and price item parameters combination.
Edit	On clicking the **Edit** (✎) icon, the **Person Relationship Type Sequence for Division and Price Item** screen appears where you can edit person to person relationship type sequence defined for the division, price item, and price item parameters combination.
Delete	On clicking the **Delete** (🗑) icon, you can delete person to person relationship type sequence defined for the division, price item, and price item parameters combination.

You can define person to person relationship type sequence for a division, price item, and price item parameters combination by clicking the **Add** link in the upper right corner of this zone.

Search Person Relationship Type Sequence for Division

The **Search Person Relationship Type Sequence for Division** zone allows you to search person to person relationship type sequence defined for a division. You can also define, edit, and delete person to person relationship type sequence of a division.

This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division. **Note:** You can only view those divisions to which you have access in the **Division** list.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Division	Indicates the division for which person to person relationship type sequence is defined.
Description	Displays the description of the division.
View	On clicking the **View** (🔗) icon, the **Person Relationship Type Sequence for Division** screen appears where you can view person to person relationship type sequence of the division.
Edit	On clicking the **Edit** (✎) icon, the **Person Relationship Type Sequence for Division** screen appears where you can edit person to person relationship type sequence of the division.
Delete	On clicking the **Delete** (🗑) icon, you can delete the person to person relationship type sequence of the division.

You can define person to person relationship type sequence for a division by clicking the **Add** link in the upper right corner of this zone.

Searching Relationship Type Sequence for a Division, Price Item, and Price Item Parameters

Prerequisites

To search person to person relationship type sequence for a division, price item, and price item parameters combination, you should have:

- Divisions defined in the application

Procedure

To search person to person relationship type sequence for a division, price item, and price item parameters combination:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Person to Person Relationship Type *S*equence**.
   The **Person to Person Relationship Type Sequence** screen appears.
3. Enter the search criteria in the **Search Person Relationship Type Sequence for Price Item** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually whenever required.
4. Click **Search**.
   A list of division, price item, and price item parameters combinations that meet the search criteria and for which person to person relationship type sequence is defined appears in the **Search Results** section.

Defining Relationship Type Sequence for a Division, Price Item, and Price Item Parameters

Prerequisites

To define person to person relationship type sequence for a division, price item, and price item parameters combination, you should have:

- Divisions defined in the application
- Price items associated with the division to which the user belongs
- Parameters associated with the price item
- Person relationship types defined in the application

Procedure

To define person to person relationship type sequence for a division, price item, and price item parameters combination:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Person to Person Relationship Type *S*equence**.
   The **Person to Person Relationship Type Sequence** screen appears.
3. Click the **Add** link in the upper right corner of the **Search Person Relationship Type Sequence for Price Item** zone.

   The **Person Relationship Type Sequence for Division and Price Item** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division for which you want to define price item and price item parameters specific person to person relationship type sequence.	Yes
Price Item	Used to specify the price item code. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** screen appears.	Yes
Price Item Parameters	Used to specify the price item parameters. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Parameters Search** screen appears.	No

   In addition, this screen contains the following section:

   - **Person Relationship Type Sequence** - This section allows you to define person to person relationship type sequence for the division, price item, and price item parameters combination. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence Number	Used to indicate the sequence in which relationship type should be considered while searching for effective price item pricing at the parent customer level.	Yes
Relationship Type	Used to indicate the person to person relationship type.	Yes

4. Enter the required details.

   Note: You can search for a price item and price item parameters by clicking the **Search** (🔍) icon corresponding to the respective field.
5. If you want to define more than one relationship type in the person to person relationship type sequence, click the **Add** (+) icon and then enter the details in the **Person Relationship Type Sequence** section.

Note: However, if you want to remove a relationship type from the person to person relationship type sequence, click the **Delete** (🗑) icon corresponding to the relationship type.

6. Click **Save**.
   The person to person relationship type sequence is defined for the division, price item, and price item parameters combination.

Editing Relationship Type Sequence of a Division, Price Item, and Price Item Parameters

Prerequisites

To edit person to person relationship type sequence of a division, price item, and price item parameters combination, you should have:

- Person relationship types defined in the application

Procedure

To edit person to person relationship type sequence of a division, price item, and price item parameters combination:

1. Search person to person relationship type sequence for the division, price item, and price item parameters combination in the **Person to Person Relationship Type Sequence** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the division, price item, and price item parameters combination whose person to person relationship type sequence you want to edit.

   The **Person Relationship Type Sequence for Division and Price Item** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Indicates the division for which price item and price item parameters specific person to person relationship type sequence is defined.	Not applicable
Price Item	Displays the price item code.	Not applicable
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).	Not applicable

   In addition, this screen contains the following section:

- **Person Relationship Type Sequence** - This section allows you to define person to person relationship type sequence for the division, price item, and price item parameters combination. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence Number	Used to indicate the sequence in which relationship type should be considered while searching for effective price item pricing at the parent customer level.	Yes
Relationship Type	Used to indicate the person to person relationship type.	Yes

3. If you want to define more than one relationship type in the person to person relationship type sequence, click the **Add** (+) icon and then enter the details in the **Person Relationship Type Sequence** section.

   Note: However, if you want to remove a relationship type from the person to person relationship type sequence, click the **Delete** (🗑) icon corresponding to the relationship type.

4. Click **Save**.
   The changes made to the person to person relationship type sequence are saved.

Deleting Relationship Type Sequence of a Division, Price Item, and Price Item Parameters

Procedure

To delete person to person relationship type sequence of a division, price item, and price item parameters combination:

1. Search person to person relationship type sequence for the division, price item, and price item parameters combination in the **Person to Person Relationship Type Sequence** screen.
2. In the **Search Results** section, click the **Delete** (🗑) icon in the **Delete** column corresponding to the division, price item, and price item parameters combination whose person to person relationship type sequence you want to delete.
   A message appears confirming whether you want to delete the person to person relationship type sequence.
3. Click **OK**.
   The person to person relationship type sequence of the division, price item, and price item parameters combination is deleted.

Procedure

To view person to person relationship type sequence of a division, price item, and price item parameters combination:

1. Search person to person relationship type sequence for the division, price item, and price item parameters combination in the **Person to Person Relationship Type Sequence** screen.
2. In the **Search Results** section, click the **View** (🔗) icon in the **View** column corresponding to the division, price item, and price item parameters combination whose person to person relationship type sequence you want to view.

   The **Person Relationship Type Sequence for Division and Price Item** screen appears. It contains the following fields:

Field Name	Field Description
Division	Indicates the division for which price item and price item parameters specific person to person relationship type sequence is defined.
Price Item	Displays the price item code.
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

   In addition, this screen contains the following section:

   - **Person Relationship Type Sequence** - This section allows you to view person to person relationship type sequence defined for the division, price item, and price item parameters combination. It contains the following columns:

Column Name	Column Description
Sequence Number	Indicates the sequence in which relationship type will be considered while searching for effective price item pricing at the parent customer level.
Relationship Type	Indicates the person to person relationship type.

3. View the person to person relationship type sequence defined for the division, price item, and price item parameters combination in the **Person Relationship Type Sequence for Division and Price Item** screen.

Part IX

Division

Topics:

- Division
- Division Group

The following two types of divisions are used while defining a contract type:

- **General Ledger (GL) Division** - GL divisions typically comprise of individual entities (for example, companies) in the general ledger. You must set up a GL division for each such entity. The GL division is used to define the accounting period for financial transactions linked to contracts. Contracts are associated with GL divisions through their contract type. The system uses accounting periods to prevent a user from creating financial transactions in the closed periods. It also uses accounting periods when it generates the flat file that contains the consolidated journal entry that is interfaced to the general ledger.
- **Division** - A division is associated with a jurisdiction. A jurisdiction is a geographic-oriented entity with unique business rules. For example, if you conduct business in California and Japan, each jurisdiction has different set of rules, and therefore you need to have a separate jurisdiction for each division. You must set up a division for each jurisdiction in which you conduct the business. For the Pricing Management functionality, setting up a division is mandatory, and the system must contain information about at least one division.

A division is associated with the following:

- **Person** - You may or may not associate person to a division. It is optional. But, when you are using division specific functionality, you have to associate person to a division while creating a local person.
- **Contract** - Contract is associated to a division through its contract type. The contract type controls multiple business rules which are defined for a given jurisdiction and contract type combination. In addition to controlling the business rules defined on the contract's contract type, the contract's division also controls the type of collection criteria used to determine if and how to collect overdue debt.
- **Account** - The division on account when combined with the account's customer class defines the jurisdiction that governs financial business rules (for example, the bill's due date, when and how late payment charges are calculated, etc.). It also allows you to assign To Do entries associated with the account to a given To Do role based on the account's division.

The system also enables you to group one or more divisions into a geographic region or segment. For more information, see Division Group on page 819.

Division

The **Division** screen allows you to define, edit, and delete a division. It consists of the following tabs:

Tab Name	Tab Description	Mandatory (Yes or No)
Main	Used to define basic details of a division.	Yes
Access Groups	Used to define the users who have right to associate objects (such as persons, accounts, price items, price lists, etc.) with this division. The users can only view those divisions to which they have access in the **Division** list used across the application.	No
Price Items	Used to define which price items are available to persons or accounts in a division. **Note:** Once the price item is created, you need to associate it with a division.	No
Price Lists	Used to define which price lists are available to persons or accounts in a division. **Note:** Once the price list is created, you need to associate it with a division. You can associate a price list with a division when all price items in the price list are already associated with the division.	No
Languages	Used to limit the languages that you can select for a person's bills and correspondence in a division.	No
Invoice Currencies	Used to limit the invoice currencies that you can select for accounts in a division. **Note:** Invoice currency is a currency in which the accounts in the division can be billed.	No
Person Identifier Types	Used to limit the person identifier types that you can select for persons in a division.	No
Algorithms	Used to associate algorithms with the division. Once a division is created, you must associate the **Price Assignment Search** algorithm to it. For the Banking functionality, this is required to ensure that the price item pricing is displayed in the correct order as defined by the algorithm. Each division can have unique hierarchy order or more than one division can have the same hierarchy order. The hierarchy order is also used in billing when the price determination is controlled by the sort order definition of the algorithm. You can define algorithms in the **Algorithm** screen. The search order is governed by the second	No

Tab Name	Tab Description	Mandatory (Yes or No)
	parameter of the algorithm, and the valid values for the same are: • **AGREED_PRICELIST** - If you use this search order, the price item pricing is searched in the following order: Account Agreed, Account Price List, Account Inherited Price List, Customer Agreed, Customer Price List, Customer Inherited Price List, Parent Customer Agreed, Parent Customer Price List, and Parent Customer Inherited Price List. **Note:** In this search order, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence. • **AGREED_FIRST** - If you use this search order, the price item pricing is searched in the following order: Account Agreed, Customer Agreed, Parent Customer Agreed, Account Price List, Account Inherited Price List, Customer Price List, Customer Inherited Price List, Parent Customer Price List, and Parent Customer Inherited Price List. **Note:** In this search order, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence.	
Characteristics	Used to define the characteristics for a division.	No
Bill Messages	Used to specify the bill messages that are valid for accounts in a division.	No
Party Char Types	Used to limit the characteristic types that you can select for persons and accounts in a division.	No
Bill Cycles	Used to limit the bill cycles that you can select for accounts in a division.	No
Account Identifier Types	Used to limit the account identifier types that you can select for accounts in a division.	No
Price Item Characteristics	Used to define division-specific characteristics for price items associated with the division.	No

Division - Main

The **Main** tab displays the basic information about the division. It contains the following fields:

Field Name	Field Description
Division	Indicates the division.

Field Name	Field Description
	Note: The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.
Description	Displays the description of the division.
Work Calendar	Indicates the work calendar which is associated with the division.
Status	Indicates the status of the division. The valid values are: • Active • Pending • Retired
Bill Format	Indicates the format in which the bills should be printed for the accounts which belong to the division. The valid values are: • Detailed • Summary
Bill Route Type	Indicates how the bills must be sent to the main customer of the accounts which belong to the division.
Base Currency	Indicates the currency in which the GL entries should be created for the accounts which belong to the division.
Time Zone	Indicates the time zones in which the division is operational.
Eligible for Accrual	Indicates whether accrual should be calculated for the accounts which belong to the division.
Accrual Cycle	Indicates the accrual cycle of the accounts which belong to the division.
Direct Credit Refund	Indicates whether you want to initiate immediate refund for the accounts through the direct credit refund mode.
A/P Request Fund	Indicates whether you want to initiate immediate refund for the accounts through the A/P request mode.
Immediate Refund	Indicates whether you want to initiate immediate refund for the accounts belonging to the division.
Local Currency	Indicates the currency that you want to use as local currency for the division.
Comments	Displays additional details about the division.
Business Object	Indicates the business object using which the division is created in the system.

In addition, the **Main** tab contains the following fields in a grid:

Field Name	Field Description
To Do Type	Indicates the To Do type for which division-specific To Do role is defined.
To Do Role	Indicates the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division.

Division - Price Item Characteristics

The **Price Item Characteristics** tab lists division-specific characteristics of price items which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Price Item	Displays the price item count associated with the selected division to which the user belongs.
Price Item	Displays the price item associated with the division to which the user belongs.
Effective Date	Indicates the date from when the price item characteristic is effective for the division.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

Searching for a Division

Procedure

To search for a division:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Division**.
   A sub-menu appears.
3. Click the **Search** option from the **Division** sub-menu.
   The **Division Search** window appears. It contains the following two sections:
   - **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search for a particular division.	No
Description	Used to search division with a particular name.	No

Note: You must specify at least one search criterion while searching for a division.

   - **Search Results** - On clicking the **Search** button corresponding to the respective field, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Division	Displays the division.
Description	Displays the description of the division.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. In the **Search Results** section, click the division whose details you want to view or edit.
   The **Division** screen appears.

Defining a Division

Prerequisites

To define a division, you should have:

- Required division business object defined in the application
- Work calendars, bill route types, currencies, time zones, accrual cycles, To Do types, and To Do roles defined in the application
- Values defined for the **BILL_FORMAT_FLG** lookup field

Procedure

To define a division:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Division**.
   A sub-menu appears.
3. Click the **Add** option from the **Division** sub-menu.
   The **Division** screen appears.
4. Ensure that the **Main** tab is selected.

   The **Main** tab contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division.	Yes
Description	Used to specify the description for the division.	Yes
Work Calendar	Used to indicate the work calendar that you want to associate with the division. The work calendar indicates the days when the division is operational. It is used to ensure that the system calculated dates (for example, bill due date, credit and collection event dates, etc.) fall on a working day. **Note:** The list includes only those work calendars which are already defined in the system.	Yes
Status	Used to indicate the status of the division. The valid values are: • **Active** - Indicates that you can use the division in the system. • **Pending** - Indicates that the division is not yet available for use. • **Retired** - Indicates that the division is no longer available for use. **Note:** The list includes only those statuses which are defined in the **DIVISION_STATUS_FLG** lookup field.	No
Bill Format	Used to specify the format in which the bills should be printed for the accounts which belong to the division. The valid values are: • Detailed • Summary **Note:** The list includes only those bill formats which are defined in the **BILL_FORMAT_FLG** lookup field.	No

Field Name	Field Description	Mandatory (Yes or No)
Bill Route Type	Used to indicate how the bills must be sent to the main customer of the accounts which belong to the division. **Note:** The list includes only those bill route types which are already defined in the system.	No
Base Currency	Used to specify the currency in which the GL entries should be created for the accounts which belong to the division. If the account's invoice currency and division's base currency are different, the system converts the GL amount from the account's invoice currency to the division's base currency. In such cases, the system creates the financial transactions for the accounts in both the currencies (i.e. account's invoice currency and division's base currency). **Note:** The list includes only those currencies which are already defined in the system.	Yes
Time Zone	Used to indicate the time zone in which the division is operational. **Note:** The list includes only those time zones which are already defined in the system.	No
Eligible for Accrual	Used to indicate whether you can calculate accrual for the accounts which belong to the division.	No
Accrual Cycle	Used to indicate the accrual cycle for the accounts which belong to the division. **Note:** This field is enabled when the **Eligible for Accrual** option is selected. The **Search** (🔍) icon appears corresponding to the **Accrual Cycle** field. On clicking the **Search** icon, the **Accrual Cycle Search** window appears.	Yes (Conditional) **Note:** The field is required when the **Eligible for Accrual** option is selected.
Direct Credit Refund	Used to indicate whether you want to initiate immediate refund for the accounts through the direct credit refund mode.	No
A/P Request Fund	Used to indicate whether you want to initiate immediate refund for the accounts through the A/P request mode.	No
Immediate Refund	Used to indicate whether you want to initiate immediate refund for the accounts belonging to the division.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field is enabled when the **Direct Credit Refund** or **A/P Request Fund** option is selected.	
Local Currency	Used to indicate the currency that you want to use as local currency for the division. The system will then consider the division's local currency as the GL's reporting currency and accordingly create an additional FT GL entry (i.e., FT GL extension record) in the division's local currency. You must specify the local currency only when it is different from the division's base currency. For more information, see FT GL in GL's Reporting Currency (i.e., Division's Local Currency). **Note:** You must specify a currency which is already defined in the system. You can add the division's local currency in the **Invoice Currencies** tab and define its rounding method for accurate calculations.	No
Comments	Used to specify additional details about the division.	No
Business Object	Used to indicate the business object using which you want to create the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Business Object** field. On clicking the **Search** icon, the **Business Object Search** window appears.	Yes

In addition, the **Main** tab contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Type	Used to indicate the To Do type for which you want to define division-specific To Do role. **Note:** The **Search** (🔍) icon appears corresponding to the **To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears.	Yes (Conditional) **Note:** This field is required when you are defining the division-specific To Do role for a To Do type.
To Do Role	Used to indicate the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division. **Note:** The **Search** (🔍) icon appears corresponding to the **To Do Role** field. On clicking the **Search** icon, the **Role for To Do Type** window appears.	Yes (Conditional) **Note:** This field is required when you are defining the division-specific To Do role for a To Do type.

5. Enter the required details in the **Main** tab.

6. Associate access groups, price items, price lists, languages, invoice currencies, person identifier types, *a*lgorithms, bill messages, party characteristic types, bill cycles, and account identifier types with the division, if *r*equired.
7. Define characteristics for the division, if required.
8. Define division-specific characteristics for the price items, if required.
9. Click the **Save** button in the **Page Title** area.
   The division is defined. The status of the division is set to **Pending**.

Associating an Access Group with a Division

On associating an access group with a division, the users which belong to the access group can view the division in the respective list across the system. These users can then create and edit the accounts of the division.

Prerequisites

To associate an access group with a division, you should have:

- Access groups defined in the application

Procedure

To associate an access group with a division:

1. Search for the division to which you want to associate an access group.
2. Click the **Access Groups** tab in the **Division** screen.

   The **Access Groups** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

   In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Access Group	Used to indicate the access group which you want to associate with the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Access Group** field. On clicking the **Search** icon, the **Access Group Search** window appears. On specifying an access group, the description of the access group appears in the **Description** field.	Yes (Conditional) **Note:** This field is required when you are associating an access group with the division.
Description	Displays the description of the access group.	Not applicable

3. Enter the required details in the **Access Groups** tab.
4. If you want to associate more than one access group with the division, click the **Add** (+) icon and then repeat *s*tep 3.

   Note: However, if you want to remove an access group from the division, click the **Delete** (🗑) icon corresponding to the access group.
5. Click the **Save** button in the **Page Title** area.
   The access group is associated with the division.

Associating a Price Item or Price Item Bundle with a Division

On associating a price item with a division, you can assign the price item to the persons and accounts which belong to the division. While associating a price item with a division, you can specify the accrual type criteria for the price item. The accrual type criteria is referred when the accrual is calculated for an account using an accrual type where

the **Price Item Accrual Criteria Required** option is selected. The system behaves in the following manner when the **Price Item Accrual Criteria Required** option is selected in the accrual type:

If the accrual type criteria is set to...	Then...
Actual	The system considers the billable charges of the price item when the accrual is calculated for an account using the accrual type where the accrual criteria is set to **Actual**.
Historical	The system considers the billable charges of the price item when the accrual is calculated for an account using the accrual type where the accrual criteria is set to **Historical**.

Prerequisites

To associate a price item with a division, you should have:

- Price items defined in the application

Procedure

To associate a price item with a division:

1. Search for the division to which you want to associate a price item.
2. Click the **Price Items** tab in the **Division** screen.

   The **Price Items** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

   In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to associate with the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears. On specifying a price item, the description of the price item appears in the **Description** field.	Yes (Conditional) **Note:** This field is required when you are associating a price item with the division.
Description	Displays the description of the price item.	Not applicable
Accrual Type Criteria	Used to indicate whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: • **Actual**	No

Field Name	Field Description	Mandatory (Yes or No)
	- Used to indicate that the billable charges of the price item should be considered for accrual when the accrual criteria in the accrual type is set to **Actual**. • **Historical** - Used to indicate that the billable charges of the price item should be considered for accrual when the accrual criteria in the accrual type is set to **Historical**. • **Not Applicable** - Used to indicate that the billable charges of the price item should be considered for accrual irrespective of the accrual criteria specified in the accrual type	

3. Enter the required details in the **Price Items** tab.
4. If you want to associate more than one price item with the division, click the **Add** (+) icon and then repeat step *3*.

   Note: However, if you want to remove a price item from the division, click the **Delete** (🗑) icon corresponding to the price item.
5. Click the **Save** button in the **Page Title** area.
   The price item is associated with the division.

Associating a Price List with a Division

Prerequisites

To associate a price list with a division, you should have:

- Price lists defined in the application

Procedure

To associate a price list with a division:

1. Search for the division to which you want to associate a price list.
2. Click the **Price Lists** tab in the **Division** screen.

   The **Price Lists** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

Field Name	Field Description
	Note: The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price List ID	Used to specify the price list which you want to associate with the division. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price List Search** window appears. On specifying a price list, the description of the price list appears in the **Description** field.	Yes (Conditional) **Note:** This field is required when you are associating a price list with a division.
Description	Displays the description of the price list.	Not applicable

3. Enter the required details in the **Price Lists** tab.
4. If you want to associate more than one price list with the division, click the **Add** (+) icon and then repeat step *3*.

   Note: However, if you want to remove a price list from the division, click the **Delete** (🗑) icon corresponding to the price list.
5. Click the **Save** button in the **Page Title** area.
   The price list is associated with the division.

Associating a Language with a Division

Prerequisites

To associate a language with a division, you should have:

- Languages defined in the application

Procedure

To associate a language with a division:

1. Search for the division to which you want to associate a language.
2. Click the **Languages** tab in the **Division** screen.

   The **Languages** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Language	Used to specify the language which you want to select for generating invoice and correspondence for the accounts in the division.	No

3. Select the language from the list.
4. If you want to associate more than one language with the division, click the **Add** (+) icon and then repeat step *3*.

   Note: However, if you want to remove a language from the division, click the **Delete** (🗑) icon corresponding to the language.
5. Click the **Save** button in the **Page Title** area.
   The language is associated with the division.

Associating an Invoice Currency with a Division

Prerequisites

To associate an invoice currency with a division, you should have:

- Currencies defined in the application

Procedure

To associate an invoice currency with a division:

1. Search for the division to which you want to associate an invoice currency.
2. Click the **Invoice Currencies** tab in the **Divisions** screen.

   The **Invoice Currencies** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Currency	Used to indicate the currency which you want to use for generating the invoice of the accounts in the division.	Yes (Conditional) **Note:** This field is required when you are associating an invoice currency with the division.
Rounding Type	Used to indicate the rounding type for the currency. The valid values are: • Down • Nearest • Up	Yes (Conditional) **Note:** This field is required when you are associating an invoice currency with the division.

3. Select the currency and its rounding type from the respective list.
4. If you want to associate more than one invoice currency with the division, click the **Add** (+) icon and then *r*epeat step 3.

   Note: However, if you want to remove an invoice currency from the division, click the **Delete** (🗑) icon corresponding to the currency.
5. Click the **Save** button in the **Page Title** area.
   The invoice currency is associated with the division.

Associating a Person Identifier Type with a Division

Prerequisites

To associate a person identifier type with a division, you should have:

- Person identifier types defined in the application

Procedure

To associate a person identifier type with a division:

1. Search for the division to which you want to associate a person identifier type.
2. Click the **Person Identifier Types** tab in the **Division** screen.

   The **Person Identifier Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional) **Note:** This field is required when you are associating a person identifier type with a division.

3. Select the person identifier type from the list.
4. If you want to associate more than one person identifier type with the division, click the **Add** (+) icon and *t*hen repeat step 3.

   Note: However, if you want to remove a person identifier type from the division, click the **Delete** (🗑) icon corresponding to the person identifier type.
5. Click the **Save** button in the **Page Title** area.
   The person identifier type is associated with the division.

Associating an Algorithm with a Division

Prerequisites

To associate an algorithm with a division, you should have:

- Required algorithms defined in the application

Procedure

To associate an algorithm with a division:

1. Search for the division to which you want to associate the algorithm.
   The **Division** screen appears.
2. Click the **Algorithms** tab.

   The **Algorithms** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division Algorithm Entity	Used to indicate the algorithm entity to which you want to attach the algorithm. The valid values are: • **ASL Accumulation Post-Processing** - Used to attach an algorithm which must be triggered for undertaking some post-processing activities on the aggregate stop-loss accumulation amount. This algorithm is invoked when you execute the **C1-ACASL** batch. **Note:** No algorithm types for this algorithm entity are shipped with the product. The implementation team can create custom algorithm type for this algorithm entity based on the customer requirements. • **ASL Accumulation Pre-Processing** - Used to attach an algorithm which must be triggered for undertaking some pre-processing activities on the aggregate stop-loss accumulation records. This algorithm is invoked when you execute the **C1-ACASL** batch. **Note:** No algorithm types for this algorithm entity are shipped with the product. The implementation team can create custom algorithm type for this algorithm entity based on the customer requirements. • **Account - Post Processing** - Used to attach an algorithm which must be triggered when you create or edit an account. **Note:** The **C1-CLSACCT** and **C1-UACM-IC** algorithm types are shipped with the product. For more information, see the algorithm type description. • **Accrual** - Used to attach an algorithm which must be triggered to create the accruals for the account. • **Contract Derivation** - Used to attach an algorithm which must be triggered to derive active contract for the account. This algorithm is invoked when you execute the **C1-TXNVP** batch. Note that this algorithm is invoked only	Yes (Conditional) **Note:** This field is required when you are associating an algorithm with the division.

Field Name	Field Description	Mandatory (Yes or No)
	when the account has multiple active contracts of the contract type which is associated with the price item. **Note:** The **SA_DERV_POPC** algorithm type is shipped with the product. For more information, see the algorithm type description.	
	• **Currency Conversion For Adjustments** - Used to attach a date or date and time based currency conversion algorithm that must be triggered while creating adjustments and FT GL entries for adjustments. **Note:** The **C1_CURALGAD** and **C1_EXCRTAD** algorithm types are shipped with the product. For more information, see C1_CURALGAD on page 1001 and C1_EXCRTAD on page 1009. • **Currency Conversion For Bill Segments** - Used to attach a date or date and time based currency conversion algorithm that must be triggered while creating bill segments and FT GL entires for bill segments. **Note:** The **C1_CURALGBS** and **C1_EXCRTBS** algorithm types are shipped with the product. For more information, see C1_CURALGBS on page 1000 and C1_EXCRTBS on page 1007. • **Currency Conversion For Payments** - Used to attach a date or date and time based currency conversion algorithm that must be triggered while creating payments, payment tenders, and FT GL entries for payments. **Note:** The **C1_CURALGPY** and **C1_EXCRTPY** algorithm types are shipped with the product. For more information, see C1_CURALGPY on page 1003 and C1_EXCRTPY on page 1011. • **GL Account Validation** - Used to attach an algorithm which must be triggered during dynamic GL account validation. **Note:** The **C1-GLVAL** and **C1-GLVAL-COB** algorithm types are shipped with the product. For more information, see the algorithm type description. • **Immediate Refund Creation** - Used to attach an algorithm that must be triggered to	

Field Name	Field Description	Mandatory (Yes or No)
	initiate automatic refund when you complete a credit bill or freeze a credit adjustment or overpayment of an account. **Note:** The **C1-IMREFCRET** algorithm type is shipped with the product. For more information, see C1-IMREFCRET on page 4496. • **Price Assignment Eligibility** - Used to attach an algorithm which must be triggered to determine whether the post-processing pricing is eligible for the account. This algorithm is invoked when you execute the **C1-BLPPR** and **POSTPROC** batches. **Note:** This algorithm is invoked while executing these batches when an algorithm created using the **C1-GENBSICPA** algorithm type is attached to the **Post-Processing (Billing)** algorithm spot of the respective contract type. The **C1-ELIGPROR** algorithm type is shipped with the product. For more information, see the algorithm type description.	
	• **Price Assignment Search** - Used to attach an algorithm which indicates the order in which the price item pricing must be determined while billing. It also indicates the order in which the price item pricing must be listed in the **Pricing (Account)** and **Pricing (Person)** screens. **Note:** The **C1_PRASN_PP** algorithm type is shipped with the product. For more information, see the algorithm type description. • **Sequential Bill Number Generation** - Used to attach an algorithm which indicates how to sequence alternate bill numbers which are unique within the division. **Note:** The **C1_ALTBLLDIV** and **C1_ALTBLDIV1** algorithm types are shipped with the product. For more information, see the algorithm type description. • **SSL Accumulation Pre-Processing** - Used to attach an algorithm which must be triggered for undertaking some pre-processing activities on the aggregate stop-loss accumulation	

Field Name	Field Description	Mandatory (Yes or No)
	records. This algorithm is invoked when you execute the **C1-ACSSL** batch. **Note:** No algorithm types for this algorithm entity are shipped with the product. The implementation team can create custom algorithm type for this algorithm entity based on the customer requirements. • **TFM - Billable Charge Post-Processing** - Used to attach an algorithm which must be triggered for undertaking some post-processing activities on the billable charges which are generated through the transaction aggregation process. This algorithm is invoked when you execute the **C1-TXNSQ** and **C1-TXNCU** batches. **Note:** The **C1_BCHG_POPC** algorithm type is shipped with the product. For more information, see the algorithm type description. • **TFM - Cancellation Pre-Processing** - Used to attach an algorithm which must be triggered for undertaking some pre-processing activities while canceling the transactions. This algorithm is invoked when you execute the **C1-TXCNC** batch. **Note:** The **C1_CNCL_PRPC** algorithm type is shipped with the product. For more information, see the algorithm type description.	
	• **TFM - Currency Conversion** - Used to attach a date or date and time based currency conversion algorithm that must be triggered while aggregating transactions. **Note:** The **C1_CURALGTFM** and **C1_EXCRTTFM** algorithm types are shipped with the product. For more information, see C1_CURALGTFM on page 1005 and C1_EXCRTTFM on page 1013. • **TFM - Disaggregation Pre-Processing** - Used to attach an algorithm which must be triggered for undertaking some pre-processing activities while disaggregating the transactions. This algorithm is invoked when you execute the **C1-PDTXN** batch. **Note:** The **C1_DSAG_PRPC** algorithm type is shipped with the product. For more information, see the algorithm type description.	

Field Name	Field Description	Mandatory (Yes or No)
	• **TFM - Price Item Derivation Post-Processing** - Used to attach an algorithm which must be triggered for undertaking some post-processing activities on the transaction legs. This algorithm is invoked when you execute the **C1-TXNIP** batch. **Note:** The **C1_PRDR_POPC** and **C1-VALECRTRN** algorithm types are shipped with the product. For more information, see the algorithm type description. • **TFM - Rate Post-Processing** - Used to attach an algorithm which must be triggered for undertaking some post-processing activities while determining rate for transaction legs. This algorithm is invoked when you execute the **C1-TXNEX** and **C1-TXNSQ** batches. **Note:** The **C1-ASOEXPOS** and **C1_RTCL_POPC** algorithm types are shipped with the product. For more information, see the algorithm type description. • **TFM - Rate Pre-Processing** - Used to attach an algorithm which must be triggered for undertaking some pre-processing activities while determining rate for transaction legs. This algorithm is invoked when you execute the **C1-TXNEX** and **C1-TXNSQ** batches. **Note:** The **C1-RETFLAT** and **C1_RTCL_PRPC** algorithm types are shipped with the product. For more information, see the algorithm type description.	
	• **TFM - Rollback Pre-Processing** - Used to attach an algorithm which must be triggered for undertaking some pre-processing activities while rolling back the transactions. This algorithm is invoked when you execute the **C1-TXNRB** batch. **Note:** The **C1_ROBK_PRPC** algorithm type is shipped with the product. For more information, see the algorithm type description. • **TFM - SSL Accumulation Post-Processing** - Used to attach an algorithm which must be triggered for undertaking some post-processing activities on the specific stop-loss accumulation amount. This algorithm is invoked when you execute the **C1-ACSSL** batch.	

Field Name	Field Description	Mandatory (Yes or No)
	Note: No algorithm types for this algorithm entity are shipped with the product. The implementation team can create custom algorithm type for this algorithm entity based on the customer requirements. • **TFM - Verify Pricing Post-Processing** - Used to attach an algorithm which must be triggered for undertaking some post-processing activities on a summary record in the **CI_TXN_DTL_PRITM_SUMMARY** table. This algorithm is invoked when you execute the **C1-TXNVP** batch. **Note:** The **C1-VRPR_POPC** algorithm type is shipped with the product. For more information, see the algorithm type description.	
Sequence Number	Used to specify the order in which the algorithms with the same entity should be executed.	Yes (Conditional) **Note:** This field is required when you are associating an algorithm with the division.
Algorithm	Used to specify the algorithm code. **Note:** The **Search** (🔍) icon appears corresponding to the **Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears.	Yes (Conditional) **Note:** This field is required when you are associating an algorithm with the division.
Description	Displays the description of the algorithm. **Note:** The description appears automatically when you specify the algorithm code in the **Algorithm** field.	Not applicable

3. Enter the required details in the **Algorithms** tab.
4. If you want to associate more than one algorithm with the division, click the **Add** (+) icon and then repeat *s*tep 3.

   Note: However, if you want to remove an algorithm from the division, click the **Delete** (🗑) icon corresponding to the algorithm.
5. Click the **Save** button in the **Page Title** area.
   The algorithm is associated with the division.

Defining a Characteristic for a Division

Prerequisites

To define a characteristic for a division, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division)

Procedure

To define a characteristic for a division:

1. Search for the division for which you want to define a characteristic.
2. Click the **Characteristics** tab in the **Division** screen.

   The **Characteristics** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

   In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the division.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the division.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to Division.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the division.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** The **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Characteristic Value Search** window appears.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the division.

Field Name	Field Description	Mandatory (Yes or No)
	On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	

3. Enter the required details in the **Characteristics** tab.
4. If you want to define more than one characteristic for the division, click the **Add** (+) icon and then repeat step *3*.

   Note: However, if you want to remove a characteristic from the division, click the **Delete** (🗑) icon corresponding to the characteristic.
5. Click the **Save** button in the **Page Title** area.
   The characteristic is defined for the division.

Associating a Bill Message with a Division

Prerequisites

To associate a bill message with a division, you should have:

- Bill messages defined in the application

Procedure

To associate a bill message with a division:

1. Search for the division to which you want to associate a bill message.
2. Click the **Bill Messages** tab in the **Division** screen.

   The **Bill Messages** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

   In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when you want the bill message to appear on the bill for the accounts in the division.	Yes (Conditional) **Note:** This field is required when you are associating a bill

Field Name	Field Description	Mandatory (Yes or No)
		message with the division.
End Date	Used to specify the date till when you want the bill message to appear on the bill for the accounts in the division.	No
Bill Message	Used to specify the bill message which is valid for the accounts in the division. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Bill Message Search** window appears. On specifying a bill message, the description of the bill message appears in the **Description** field.	Yes (Conditional) **Note:** This field is required when you are associating a bill message with the division.
Description	Displays the description of the bill message.	Not applicable

3. Enter the required details in the **Bill Messages** tab.
4. If you want to associate more than one bill message with the division, click the **Add** (+) icon and then repeat *s*tep 3.

   Note: However, if you want to remove a bill message from the division, click the **Delete** (🗑) icon corresponding to the bill message.
5. Click the **Save** button in the **Page Title** area.
   The bill message is associated with the division.

Associating a Party Characteristic Type with a Division

Prerequisites

To associate a party char type with a division, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division)

Procedure

To associate a party char type with a division:

1. Search for the division to which you want to associate a party char type.
2. Click the **Party Char Types** tab in the **Division** screen.

   The **Party Char Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Entity	Used to indicate whether the characteristic type is valid for a person or an account in the division.	Yes (Conditional) **Note:** This field is required when you are associating a party char type with the division.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to Division.	Yes (Conditional) **Note:** This field is required when you are associating a party char type with the division.

3. Enter the required details in the **Party Char Types** tab.
4. If you want to associate more than one party char type with the division, click the **Add** (+) icon and then *r*epeat step 3.

   Note: However, if you want to remove a party char type from the division, click the **Delete** (🗑) icon corresponding to the characteristic type.
5. Click the **Save** button in the **Page Title** area.
   The party char type is associated with the division.

Associating a Bill Cycle with a Division

Prerequisites

To associate a bill cycle with a division, you should have:

- Bill cycles defined in the application

Procedure

To associate a bill cycle with a division:

1. Search for the division to which you want to associate a bill cycle.
2. Click the **Bill Cycles** tab in the **Division** screen.

   The **Bill Cycles** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

   In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Cycle	Used to specify the bill cycle that is valid for the accounts associated with the division.	Yes (Conditional) **Note:** This field is required when you are associating a bill cycle with the division.

3. Select the bill cycle from the list.
4. If you want to associate more than one bill cycle with the division, click the **Add** (+) icon and then repeat step *3*.

   Note: However, if you want to remove a bill cycle from the division, click the **Delete** (🗑) icon corresponding to the bill cycle.
5. Click the **Save** button in the **Page Title** area.
   The bill cycle is associated with the division.

Associating an Account Identifier Type with a Division

Prerequisites

To associate an account identifier type with a division, you should have:

- Account identifier types defined in the application

Procedure

To associate an account identifier type with a division:

1. Search for the division to which you want to associate an account identifier type.
2. Click the **Account Identifier Types** tab in the **Division** screen.

The **Account Identifier Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier Type	Used to specify the account identifier type valid for the accounts associated with the division.	Yes (Conditional) **Note:** This field is required when you are associating an account identifier type with the division.

3. Select the account identifier type from the list.
4. If you want to associate more than one account identifier type with the division, click the **Add** (+) icon and *t*hen repeat step 3.

   Note: However, if you want to remove an account identifier type from the division, click the **Delete** (🗑) icon corresponding to the account identifier type.
5. Click the **Save** button in the **Page Title** area.
   The account identifier type is associated with the division.

Defining a Division-Specific Characteristic for a Price Item

Prerequisites

To define a division-specific characteristics for a price item, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division/Price Item Combination)
- Price item associated with the division to which the user belongs

Procedure

To define a division-specific characteristic for a price item:

1. Search for the division for which you want to define a price item characteristic.

2. Click the **Price Item Characteristics** tab in the **Division** screen.

   The **Price Item Characteristics** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division. **Note:** The **Search** (🔍) icon appears corresponding to the **Division** field. On clicking the **Search** icon, the **Division Search** window appears where you can search for a division.

   In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Indicates the price item count associated with the selected division.	No
Price Item	Indicates the price item code associated with the division to which the user belongs.	Not applicable
Effective Date	Used to specify the date from when the price item characteristic is effective for the division.	Yes (Conditional) **Note:** This field is required when you are defining a division-specific characteristic for the price item.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to Division/ Price Item Combination.	Yes (Conditional) **Note:** This field is required when you are defining a division-specific characteristic for the price item.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Characteristic Value Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a division-specific characteristic for the price item.

3. If the division has multiple price items associated with it, navigate to define a characteristic for the required price item.

   Note: You can use the **Previous** (⇦) and **Next** (⇨) buttons to navigate through the price items while defining their characteristics.

4. Enter the required details in the **Price Item Characteristics** tab.
5. If you want to define more than one division-specific characteristic for the price item, click the **Add** (+) icon *a*nd then repeat step 4.

   Note: However, if you want to remove a division-specific characteristic from the price item, click the **Delete** (🗑) icon corresponding to the characteristic.
6. Click the **Save** button in the **Page Title** area.
   The division-specific characteristic is defined for the price item.

Associating a To Do Type and To Do Role with a Division

Prerequisites

To associate a To Do type and To Do role with a division, you should have:

- To Do types and to do roles defined in the application
- To Do roles associated to the respective to do types

Procedure

To associate a To Do type and To Do role with a division:

1. Search for the division to which you want to associate a To Do type and To Do role.
2. Click the **Main** tab in the **Divisions** screen.

   The **Main** tab appears.
3. The **To Do** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Type	Used to indicate the To Do type for which you want to define division-specific To Do role. **Note:** The **Search** (🔍) icon appears corresponding to the **To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears.	Yes (Conditional) **Note:** This field is required when you are defining a To Do type for the division
To Do Role	Used to indicate the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division. **Note:** The **Search** (🔍) icon appears corresponding to the **To Do Role** field. On clicking the **Search** icon, the **Role for To Do Type** window appears.	Yes (Conditional) **Note:** This field is required when you are defining a division-specific To Do role for a To Do type

4. If you want to associate more than one To Do type and To Do role with the division, click the **Add** (+) icon and then *r*epeat step 3.

Note: However, if you want to remove a To Do type and To Do role from the division, click the **Delete** (🗑) icon corresponding to the To Do type.

5. Click the **Save** button in the **Page Title** area.
   The To Do type and To Do role is associated with the division.

Division Group

Oracle Revenue Management and Billing enables you to group one or more divisions into a geographic region or segment. This grouping can be based on various factors, such as business cut-off time, source data file availability and volume, etc. You can then process the source data of a geographic region or segment via a single job schedule. This is done with the objective to support data processing from multiple divisions in the same batch job, and thereby achieve maximum utilization of resources and improved business performance. Note that each division in the geographic region or segment is a stand-alone entity and can be processed in any order.

The **Division Group** screen enables you to define a division group where you can include one or more divisions that are already defined in the system. It also enables you edit and copy a division group. It contains the following zones:

- Division Group List on page 819
- Division Group on page 820

Note:

You can set the status of a division group to **Active** or **Inactive**. The system will then allow you to use an active division group while executing batches in the system.

At present, the division group is supported in the following batches — **C1-TXNIP**, **C1-TXNPS**, **C1-TXNVP**, **C1-TXNEX**, **C1-TXNSQ**, **C1-TXNCM**, **C1-TXNCU**, **BILLOPEN**, **BSGENREG**, **POSTPROC**, **C1-DISTG**, **C1-BSEGD**, **C1-PNBD**, **C1-IDENT**, **C1-PDTXN**, **C1-DRSUA**, **APAYCRET**, **ACTVTAPY**, **APAYACH**, **APAYDSFR**, **BALAPY**, **APYSDSFR**, **AREFRA**, **APAYRA**, **C1-GLASN**, **C1-GLS**, and **C1-GLDL**. Note that the division group functionality in all the supported batches is tested and certified for both the financial services and health insurance domains.

The existing parameter named **Division** in the above mentioned batches is enhanced to support both the division group and division. If you specify the value for the **Division** parameter, the system will first check whether it is a division group. If so, the system will perform the expected behavior for all the divisions which belong to the division group. However, if the specified value is not a division group, the system will check whether it is a division and will accordingly perform the expected behavior for the respective division. If you do not specify the value for the **Division** parameter, the system will perform the expected behavior for all the divisions in the system.

Division Group List

The **Division Group List** zone lists the division groups that are already defined in the system. It contains the following columns:

Column Name	Column Description
Division Group	Displays the division group.
Description	Displays the description of the division group.
Edit	On clicking the **Edit** (✎) icon, the **Division Group** screen appears where you can edit the details of the division group.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Division Group** screen appears where you can define a new division group using an existing division group.

You can filter the list using various search criteria (such as, **Division Group**, **Description**, **Division**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to a division group, the **Division Group** zone appears with the details of the respective division group.

Division Group

The **Division Group** zone displays the details of the division group. It contains the following sections:

- **Main** - Displays the basic information about the division group. It contains the following fields:

Field Name	Field Description
Division Group	Displays the division group.
Status	Indicates the status of the division group. The valid values are: • Active • Inactive
Description	Displays the description of the division group.

- **Divisions** - Lists the divisions that are included in the division group. It contains the following column:

Column Name	Column Description
Division	Displays the description of the division. **Note:** It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.

- **Record Actions** - Enables you to perform various actions on the division group. It contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the division group.
Duplicate	Used to create a new division group using an existing division group.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the division group is created. In addition, a context menu (▾) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Division Group** zone does not appear in the **Division Group** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the division group in the **Division Group List** zone.

Defining a Division Group

Procedure

To define a division group:

1. Click the **Menu** (☰) icon in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Division Group**.
   A sub-menu appears.
3. Click the **Add** option from the **Division Group** sub-menu.

   The **Division Group** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the division group.
   - **Divisions** - Used to specify the divisions that you want to add in the division group.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division Group	Used to specify the division group.	Yes
Status	Used to indicate the status of the division group. The valid values are: • Active • Inactive	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can only use an active division group while executing batches in the system.	
Description	Used to specify the description for the division group.	Yes

Tip: Alternatively, you can access the **Division Group** screen by clicking the **Add** button in the **Page Title** area of the **Division Group** screen.

4. Enter the required details in the **Main** section.
5. Add divisions that you want to group based on various factors (such as business cut-off time, source data file availability and volume, etc.) in the **Divisions** section.
6. Click **Save**.
   The division group is defined.

Adding a Division in a Division Group

Prerequisites

To add a division in a division group, you should have:

- Divisions defined in the application.

Procedure

To add a division in a division group:

1. Ensure that the **Divisions** section is expanded when you are defining, editing, or copying a division group.

   The **Divisions** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division that you want to add in the division group. **Note:** The list includes only those divisions which are already defined in the system.	Yes

2. Enter the required details in the **Divisions** section.

   Note: You must specify at least one division while defining, editing, or copying a division group.

3. If you want to add more than one division in the division group, click the **Add** (+) icon and then *r*epeat step *2*.

   Note: However, if you want to remove a division from the division group, click the **Delete** (🗑) icon corresponding to the division.

Editing a Division Group

Procedure

To edit a division group:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Division Group**.
   A sub-menu appears.
3. Click the **Search** option from the **Division Group** sub-menu.
   The **Division Group** screen appears.
4. In the **Division Group List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the division group whose details you want to edit.

   The **Division Group** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the division group.
   - **Divisions** - Used to specify the divisions that you want to add in the division group.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division Group	Displays the division group.	Not applicable
Status	Used to indicate the status of the division group. The valid values are: • Active • Inactive **Note:** You can only use an active division group while executing batches in the system.	Yes
Description	Used to specify the description for the division group.	Yes

   Tip: Alternatively, you can click the **Edit** button in the **Division Group** zone to edit the details of the division group.
5. Modify the required details in the **Main** section.
6. Add or remove the division from the division group, if required.
7. Click **Save**.
   The changes made to the division group are saved.

Copying a Division Group

Instead of creating a division group from scratch, you can create a new division group using an existing division group. This is possible through copying a division group. On copying a division group, the details including the divisions are copied to the new division group. You can then edit the details, if required.

Prerequisites

To copy a division group, you should have:

- Division group (whose copy you want to create) defined in the application

Procedure

To copy a division group:

1. Click the **Menu** (≡) icon in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Division Group**.
   A sub-menu appears.
3. Click the **Search** option from the **Division Group** sub-menu.
   The **Division Group** screen appears.
4. In the **Division Group List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column *c*orresponding to the division group whose copy you want to create.

   The **Division Group** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the division group.
   - **Divisions** - Used to specify the divisions that you want to add in the division group.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division Group	Used to specify the division group.	Yes
Status	Used to indicate the status of the division group. The valid values are: • Active • Inactive **Note:** You can only use an active division group while executing batches in the system.	Yes
Description	Used to specify the description for the division group.	Yes

   Tip: Alternatively, you can click the **Duplicate** button in the **Division Group** zone to create a copy of the division group.
5. Enter the required details in the **Main** section.
6. Add or remove the division from the division group, if required.

7. Click **Save**.
   The new division group is defined.

- Approval Workflow Reason
- Approval Workflow Reason (Used for Viewing)

Oracle Revenue Management and Billing may optionally be configured to use the approval workflow process whenever any addition, modification, or deletion is done manually by a user. The approval workflow process routes any changes made to the business objects (such as person, account, contract, division, and so on) to a group of people for approval. The approval workflow process allows you to manage and track all tasks involved in the approval process.

Approval workflow allows you to define the rules for requiring an approval step before the data changes are committed to the database. Once you establish the approval workflow rules, the application manages the business process flow for having data changes approved before they are reflected in the database.

The system provides you with a flexible set of options used to determine when approvals are required, and how the approval process is to be managed including:

- Turning approval on or off for individual business objects within the application
- Grouping business objects so that approval is required for the group rather than the individual business objects within the group
- Who should approve
- How many levels of approvals are required
- Different approval workflow chains based on different criteria

Once you have turned approval workflow on for an object, or a group of objects, the system will use the approval workflow configuration to manage the entire approval process including:

- Determining whether approval is required based on data changes submitted by a user
- Routing approval workflow requests to one or more qualified approvers
- Managing rejected data changes and sending these back to the submitter for resolution
- Committing the changes once all required approvals are received

Most Commonly Used Terms

Before you understand the approval workflow process, you must familiarize yourself with the following terms:

Term	Description
Submitter	A person who adds, modifies or deletes a business object, such as person, account, contract, and division is called a submitter.
Approver	A person who approves any changes made to a business object is called an approver.
Approval Workflow Group	A group of one or more business objects for which approval is required, under some or all conditions, when data changes are made.
Approval Workflow Chain	The approval workflow chain indicates how many levels of approvals are required to approve the changes made by the submitter.

Approval Workflow Process

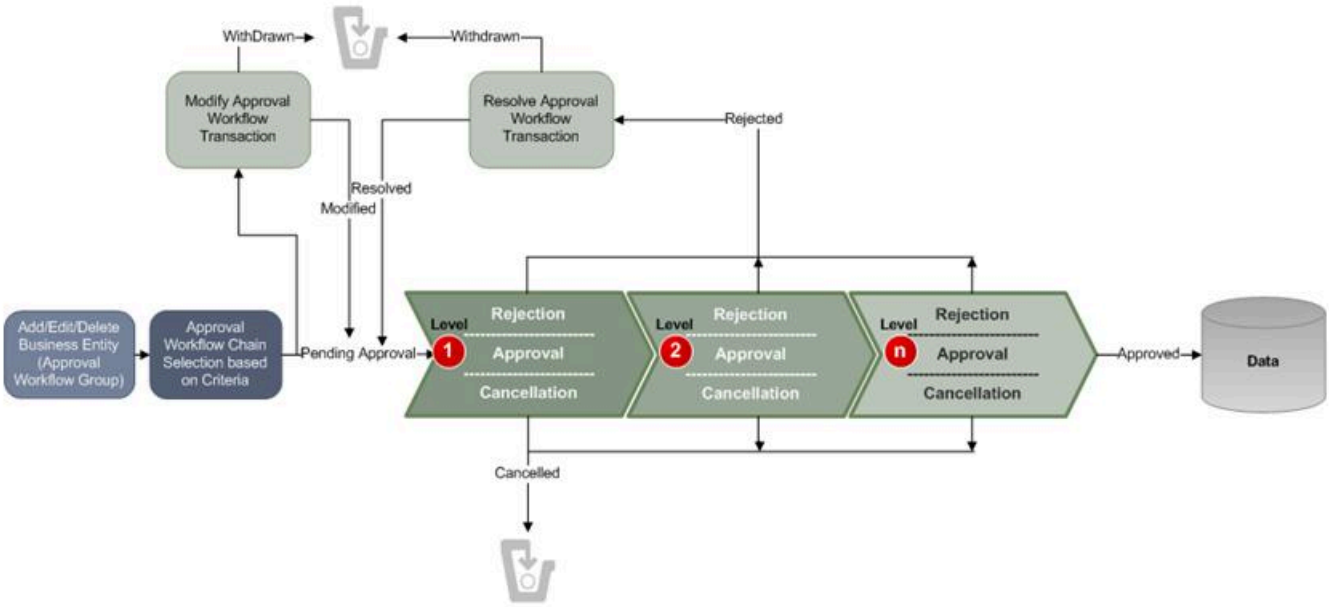
When a submitter adds, edits or deletes a business object (for example, an account) that belongs to an approval workflow group, the system checks whether approval workflow is activated for the approval workflow group. If the approval workflow is activated for the group, the system creates an approval workflow request. Every approval workflow request is uniquely identified in the system through the Approval Transaction ID.

The system identifies the approval workflow chain that must be used for approval depending on the pre-configured conditions or criteria. Based on the number of levels defined in the approval workflow chain, the request is sent to the approver at each level in the chain or hierarchy for approval. When the approver at the first level approves the request, a notification is sent to the approver at the second level for approval. This process continues till the approval is received from all levels in the hierarchy. Once the approvers at all levels approve the request, the changes are committed to the database.

However, if an approver at any level in the hierarchy rejects the request, a notification is sent to the submitter who has made the changes. The submitter then makes the required corrections based on the approver's comments and resubmits the changes for approval. In this case, the approval process starts once again from the beginning and not from the level at which the request was rejected.

The submitter also has the facility to modify the request before the approver at the first level in the hierarchy approves or rejects the request. Once the changes are made, the submitter submits the request for approval. The submitter also has the facility to cancel the request.

The following figure indicates the flow of the approval workflow process:



To implement the approval workflow process, you need to define the following:

- Approval Workflow Group (Used for Searching) on page 879
- Approval Workflow Chain (Used for Searching) on page 895
- Approval Workflow Criterion Type (Used for Searching) on page 901
- Approval Workflow Group Chain Linkage (Used for Searching) on page 907
- Approval Workflow Reason on page 924
- Approval Workflow Setting (Used for Searching) on page 917

For price list, price item and price assignment, the approval workflow configuration is shipped with ORMB. The following groups are available in the system:

- **C1PRODUCT** - Contains the C1_PRICEITEM_BO business object
- **C1PRICELST** - Contains the C1_F_ADDPLBO business object
- **C1PRICEASG** - Contains the C1_PRICECOMP and C1_PRICEASGN_BO business objects

After creating the approval workflow chains, you need to link these groups to the corresponding approval workflow chains. To setup the approval workflow process for price assignment, you need to do the following:

For Price Item	1. If a **Determine BO** algorithm is not specified for the **C1_PRICEITEM** maintenance object, create a **Determine BO** algorithm using the **F1-MOBO** algorithm type and specify **C1_PRICEITEM_BO** as the business object on this algorithm. 2. Attach this algorithm on the **Determine BO** algorithm spot of the **C1_PRICEITEM** MO. 3. Link the **C1PRODUCT** group to the appropriate approval workflow chain. 4. Activate the approval workflow for the **C1PRODUCT** group by setting the **Active** flag corresponding to the group in the **Approval Workflow Settings** screen to **Y**.

For Price List	1. If a **Determine BO** algorithm is not specified for the **C1_PRICELIST** maintenance object, create a **Determine BO** algorithm using the **F1-MOBO** algorithm type and specify **C1_F_ADDPLBO** as the business object on this algorithm. 2. Attach this algorithm on the **Determine BO** algorithm spot of the **C1_PRICELIST** MO. 3. Link the **C1PRICELST** group to the appropriate approval workflow chain.

	4. Activate the approval workflow for the **C1PRICELST** group by setting the **Active** flag corresponding to the group in the **Approval Workflow Settings** screen to **Y**.
For Price Assignments	1. If a **Determine BO** algorithm is not specified for the **C1_PRICECOMP** maintenance object, create a **Determine BO** algorithm using the **F1-MOBO** algorithm type and specify **C1_PRICECOMP** as the business object on this algorithm. 2. Attach this algorithm on the **Determine BO** algorithm spot of the **C1_PRICECOMP** MO. 3. If a **Determine BO** algorithm is not specified for the **C1_PRICEASGN** maintenance object, create a **Determine BO** algorithm using the **F1-MOBO** algorithm type and specify **C1_PRICEASGN_BO** as the business object on this algorithm. 4. Attach this algorithm on the **Determine BO** algorithm spot of the **C1_PRICEASGN** MO. 5. Link the **C1PRICEASG** group to the appropriate approval workflow chain. 6. Activate the approval workflow for the **C1PRICEASG** group by setting the **Active** flag corresponding to the group in the **Approval Workflow Settings** screen to **Y**.

Similarly, for invoicing group, the approval workflow configuration is shipped with ORMB. The following groups are available in the system:

- **C1IGADD**
- **C1IGUPD**

After creating the approval workflow chains, you need to link these groups to the corresponding approval workflow chains, and activate the approval workflow for these groups by setting the following in the **Approval Workflow Settings** screen:

- Set **Active** flag to **Yes**
- Set **Prevalidation** flag to **Yes**

Note: You must set the **Active** flag to **No** for both the groups in case you do not want to activate the approval workflow for invoicing group. If you set the **Active** flag to **Yes** for either of the groups, approval workflow is triggered when you add and/or edit an invoicing group.

Prerequisites

You need to setup the following prerequisites to implement the approval workflow process:

- **Setup Feature Configuration for Approval Workflow** - If you create new Maintenance Objects (MOs) and want the access control for these MOs in the approval workflow transactions to be based on the access group and division, then you have to create a custom algorithm and attach it to the **Approval Transaction Entity Access Algorithms** option type of the **C1_AXENTITY** feature configuration. Note that you will then have two access algorithms; one default algorithm (that is, **C1-APPTXN**) and another custom algorithm. For more information about the **C1_AXENTITY** feature configuration, see Setting the C1_AXENTITY Feature Configuration on page 4623.
- **Create and Attach Determine BO Algorithm** - To use approval workflow for a business object, check the corresponding maintenance object to see if a **Determine BO** algorithm is already attached to it. If not, create a **Determine BO** algorithm using the **F1-MOBO** algorithm type, and specify the appropriate business object name on the newly created algorithm. Attach this algorithm on the **Determine BO** algorithm spot of the maintenance object.
- **Attach Audit Algorithm to Business Objects** - To use the approval workflow process for a business object, you need to attach the **C1-APPTXNBAS** algorithm on the **Audit** algorithm spot of the business object. Unless you attach the audit algorithm to a business object, the approval workflow process will not be triggered for the

respective business object. This step is only required when you are using the base panels. If you have created custom UI maps to enter or modify data for a specific business object, this step is not needed.

- **Attach Validation Algorithms to Business Objects** - The following algorithms are shipped with ORMB:

Business Object	Basic Validation Algorithm	Pending Transaction Validation Algorithm
C1-AppBOChain	C1-GRPCHNALG	C1-APPGRPCHL
C1-AppGrp	C1-GRPALG	C1-APPGROUPV
C1-ApprovalChainEligible	C1-ADMALG	C1-APGBYPORT
C1-ApprovalTransactionChain	C1-APCHALGO	C1-APCHNPEND

The basic validation algorithms are attached to the respective business objects, and then shipped with ORMB. However, the pending transaction validation algorithms are not attached to the respective business objects. If you want to restrict the users from either editing or deleting the approval workflow group, approval workflow settings, approval workflow chain, or approval workflow group chain linkage when the respective approval workflow requests are in the **Pending**, **Work-in-Progress**, or **Rejected** state, then you must attach the pending transaction validation algorithm on the **Validation** algorithm spot of the respective business object.

- **Set Colors for Highlighting during Comparison** - While approving, rejecting, or cancelling approval workflow requests where the submitter action is Update (UPD), you will be able to compare the existing and new data. By default, any modifications are highlighted in the Yellow (9933FF) color and new additions are highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see .Setting the C1_AXENTITY Feature Configuration on page 4623.
- **Create To Do Types** - You need to create the To Do types that you want to use in the approval workflow process. Once the To Do type is created, you need to link it to the required To Do roles so that users belonging to the To Do role can view and work on the To Do type.
- **Create To Do Roles** - You need to create the To Do roles that you want to use in the approval workflow process. Once the To Do role is created, you need to add the users whom you want to assign this role.

  Note: User who is withdrawing the approval workflow request must be assigned to the To Do role to which the approver at the first level in the hierarchy is assigned. Otherwise, the user will not be able to withdraw the approval workflow request.
- **Create Input UI Map for an Approval Workflow Group** - The system provides you with the ability to automatically generate an Input UI map, and associate it with the approval workflow group. Alternatively, you can create an Input UI map manually, and attach it to the approval workflow group. For more information on how to create an Input UI map manually, see Creating Input UI Map for an Approval Workflow Group on page 4621.
- **Create Display UI Map for an Approval Workflow Group** - The system provides you with the ability to automatically generate a Display UI map, and associate it with the approval workflow group. Alternatively, you can create a Display UI map manually, and attach it to the approval workflow group. For more information on how to create a Display UI map manually, see Creating Display UI Map for an Approval Workflow Group on page 4620.

Approval Transaction

If an approver at any level in the hierarchy rejects a request, a notification is sent to the submitters having the To Do role to resolve. The submitter then makes the required corrections based on the approver's comments, and resubmits the changes for approval. In this case, the approval process starts once again from the beginning, and not from the level at which the request was rejected.

The **Approval Transaction** screen allows you to resolve or withdraw a request. It consists of the following zones:

- Search Approval Transaction on page 832
- Approval Transaction Log on page 835

Search Approval Transaction

The **Search Approval Transaction** zone allows you to search for an approval transaction using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an approval transaction using the task or approval transaction details. The valid values are: • Task Details • Approval Transaction Details **Note:** By default, the **Task Details** option is selected.	Yes
Status	Used to search approval transactions with a particular status. The valid values are: • Approved • Cancelled • Rejected • Inprocess • Pending • Deleted **Note:** This field appears when you select the **Approval Transaction Details** option from the **Search By** list.	No
Task	Used to search approval transactions with a particular task. The valid values are: • Approve • Modify • Resolve **Note:** This field appears when you select the **Task Details** option from the **Search By** list.	Yes (Conditional) **Note:** This field is required when you want to search approval transactions using the task details.
Approval Workflow Group	Used to search approval transactions created for the business objects that belong to a particular approval workflow group.	No
Division	Used to search approval transactions which belong to a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list.	No
Reference ID	Used to search approval transactions created for the business object with a particular reference ID.	No
Approval Transaction ID	Used to search for a particular approval transaction.	No

Field Name	Field Description	Mandatory (Yes or No)
Created From	Used to search approval transactions which are created from a particular date onwards.	No
Created Until	Used to search approval transactions which are created till a particular date.	No
Action	Used to search approval transactions which are created while adding, updating, or deleting a business object.	No
Submitter ID	Used to search approval transactions which are created by a particular submitter. **Note:** This field appears either when you select the **Task Details** from the **Search By** list and **Approve** option from the **Task** list or when you select the **Approval Transaction Details** from the **Search By** list and **Processing**, **Pending**, or **Deleted** option from the **Approval Transaction Status** list. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Submitter Id for Status** window appears.	No
Approver ID	Used to search approval transactions which are rejected by a particular approver. **Note:** The **Approver ID** is displayed when the approval transaction is searched by **Task Details** and **Task** is **Resolve**. It is also displayed when the approval transaction is searched by **Approval Transaction Details** and Status is **Approved**, **Canceled**, or **Rejected**. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Approver ID Search** window appears.	No

Note: You must specify at least one search criterion while searching for an approval transaction. One more search criterion is required when you are searching for an approval transaction using the **Task** field.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Approval Transaction ID	Displays the approval transaction ID. **Note:** It has a link. The link appears when you select **Task Details** option from the **Search By** list. If the **Approve** option is selected from the **Task** list then on clicking the link, **Comparison: New versus Existing** window appears with the compared details of the new and existing approval transactions. If the **Modify** option is selected from the **Task** list then on clicking the link, **Modify/Resolve Price List Assignment** window appears to modify or resolve the details of price list assignment. If the **Resolve** option is selected from the **Task** list then

Column Name	Column Description
	on clicking the link, **Modify/Resolve Price List Assignment** window appears to modify or resolve the details of price list assignment.
Approval Workflow Group	Displays the code of the approval workflow group.
Submitter Name	Displays the name of submitter who submits the approval transaction details list. **Note:** This column appears either when you select the **Approve** or **Modify** option from the **Task** list or when you select the **Processing**, **Pending**, or **Deleted** option from the **Approval Transaction Status** list.
Approver Name	Displays the name of an approver who approves an approval transaction details list. **Note:** This column appears either when you select the **Resolve** option from the **Task** list or when you select the **Approved**, **Canceled**, or **Rejected** option from the **Approval Transaction Status** list.
Submitted On	Displays the date and time on which approval transaction is submitted for approval. **Note:** This column appears either when you select the **Approve** or **Modify** option from the **Task** list or when you select the **Approved**, **Pending**, or **Deleted** option from the **Approval Transaction Details** list.
Action	Indicates the various types of action. The valid values are: • Add • Delete (DEL) • Update (UPD)
Division	Displays the division to which the approval transaction belongs.
Status	Displays the status of approval transaction. The valid values are: • Approved • Cancelled • Rejected • Processing • Pending • Deleted **Note:** This column appears either when you select **Approval Transaction Details** option from the **Search By** list of the search criteria.
To Do Type	Displays the type of **To Do** (notification) received for the approval transaction.
Approval Transaction Information	Displays additional information about the approval transaction.
Rejected On	Displays the date and time on which the transaction is rejected. **Note:** This column appears either when you select the **Resolve** option from the **Task** list or when you select the **Rejected**, option from the **Approval Transaction Details** list.
Reject Reason	Displays the reason for which the approval transaction is rejected by the approver.

Column Name	Column Description
	Note: This column appears either when you select the **Resolve** option from the **Task** list or when you select the **Rejected** option from the **Approval Transaction Details** list.
Canceled On	Displays the date and time on which the approval transaction is canceled by the user. **Note:** This column appears when you select the **Cancelled** option from the **Approval Transaction Details** list.
Cancel Reason	Displays the reason for which the approval transaction is canceled by the user. **Note:** This column appears either when you select the **Canceled** option from the **Approval Transaction Details** list.
Withdraw	Displays a link to withdraw an approval transaction. **Note:** This column appears either when you select the **Modify** or **Resolve** option from the **Task** list. It has a link and on clicking the link, a message appears to confirm the withdrawal of the respective approval transaction.

On clicking the **Broadcast** ( ) icon corresponding to the approval transaction the **Approval Transaction Log** zone appears with the approval transaction log details.

Approval Transaction Log

The **Approval Transaction Log** zone displays the complete trail of submitter and approver actions performed on the approval transaction. It contains the following columns:

Column Name	Column Description
Date Time	Displays the date and time when the action was performed on the approval transaction.
User Name	Indicates the user who has performed the action on the approval transaction.
Status	Displays the status of the approval transaction. The valid values are: • Approved • Cancelled • Rejected • InProcess • Pending • Deleted
View	It has a link. On clicking the **View** link, the **Comparison: New versus Existing** window appears where you can view the existing and new compared transactions".

Column Name	Column Description
Status Reason	Displays the status reason of the approval transaction.
Comments	Displays additional information about the approval transaction.

By default, the **Banking Approval Transaction Log** zone does not appear. It appears when you click the **Broadcast** (📡) icon corresponding to the approval transaction in the **Approval Transaction** zone.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Searching for an Approval Transaction

Procedure

To search for an approval transaction:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Approval Workflow** and then click **Approval Transaction**.
   The **Approval Transaction** screen appears.
3. Click the **Search** option from the **Approval Transaction** sub-menu.
   The **Approval Transaction** screen appears.
4. Enter the search criteria in the **Search Approval Transaction** zone depending on whether you want to search for a task or approval transaction details.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of task or approval transactions that meet the search criteria appears in the **Search Results** section.

Viewing the Log of an Approval Transaction

Procedure

To view the log of an approval transaction:

1. Search for the task or approval transaction details in the **Approval Transaction** screen.
2. In the Search Results section, click the **Broadcast** (ᯤ) icon corresponding to the approval transaction whose log details you want to view.
   The **Approval Transaction Log** zone appears.
3. View the log details of the approval transactions in the **Approval Transaction Log** zone.

Comparison: New versus Existing

You have to define the reason codes which are used when the approval workflow request is either rejected or cancelled. The reason code helps to indicate the reason why a particular request was rejected or cancelled.

The **Comparison: New versus Existing** screen allows you to view the changes in the new approval transaction compared to the existing one. It contains the following sections:

- New
- Existing

Through this screen you can do the following:

- Approve an approval transaction
- Reject an Approval Transaction
- Cancel an approval transaction
- Modify an approval transaction
- Withdraw an Approval Transaction
- Resolve an approval transaction

Approving an Approval Transaction

You can view the number of approval transactions which are pending for approval in the **Approval Transaction** screen. The approver can review, and accordingly approve, return to the submitter, revert to the original, or cancel the approval transaction based on the observations.

Note: The system will not allow you to approve, return to the submitter, revert to the original or cancel an approval transaction submitted by you.

Procedure

To approve an approval transaction:

1. Search for approval transactions with task details and status as Approve in the **Approval Transaction** screen.
2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding *t*o the approval transaction which you want to review.
   The **Comparison: New versus Existing** screen appears.
3. Review the compared existing and new approval transactions.
4. Click **Approve**.
   A message appears with confirmation on transaction approved successfully.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **OK**.
   The approval transaction is removed from the search results.

   Note:

   By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see Setting the C1_AXENTITY Feature Configuration on page 4623.
6. Review the changes and click **Approve** to accept the changes.
   The changes in the approval transaction are approved.

Rejecting an Approval Transaction

Prerequisites

To return an approval transaction to its submitter, you should have:

- Rejection reasons defined in the application

Note:

While returning an approval transaction, you need to specify the reason why you want to return the approval transaction. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the business object in the **Status Reason** screen.

The system will not allow you to approve, return or revert an approval transaction submitted by you.

Procedure

To reject an approval transaction:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding *t*o the approval transaction which you want to review.
   The **Comparison: New versus Existing** screen appears.
3. Review the compared existing and new approval transactions.
4. Click Return to Submitter." With stepresult, "The Rejection/Cancelation Reason window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Reason	Used to search a particular approval workflow reason.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify additional information while rejecting the usage record.	Yes

5. Enter the required details.
6. Click **OK**.
   The approval transaction is removed from the search results.

Canceling an Approval Transaction

Prerequisites

To revert an approval transaction to its initial status, you should have:

- Cancelation reasons defined in the application

Note:

While reverting an approval transaction, you need to specify the reason why you want to revert the approval transaction. You can select the appropriate cancelation reason when you have defined the reasons for the **Canceled** status of the business object in the **Status Reason** screen.

The system will not allow you to approve, return or revert an approval transaction submitted by you.

Procedure

To cancel an approval transaction:

1. Search for approval transactions with task details and status as Approve in the **Approval Transaction** screen.
2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding *t*o the approval transaction which you want to review.
   The **Comparison: New versus Existing** screen appears.
3. Review the compared existing and new approval transactions.
4. Click **Revert to Original**.
   The **Rejection/Cancelation Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Reason	Used to search a particular approval workflow reason.	Yes
Comments	Used to specify additional information while rejecting the usage record.	Yes

5. Enter the required details.
   A **Comparison: New versus Existing** screen appears where you can view the changes in the new transaction as compared to the existing ones.

Note:

By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see Setting the C1_AXENTITY Feature Configuration on page 4623.

6. Click **OK**.
   The approval transaction is removed from the search results.

Modifying an Approval Transaction

Prerequisites

To modify an approval transaction, you should have:

- Characteristic Types defined in the application.

Procedure

To Modify an approval transaction:

1. Search for approval transactions with task details and status as Modify in the **Approval Transaction** screen.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
2. From the **Main** menu, select **Approval Workflow** and then click **Approval Transaction**.
   A screen appears where you can review the changes, and accordingly modify or resolve the request based on your observations. In case where the submitter action is **Update (UPD)**, you will be able to compare the existing and new data, and accordingly take an action.
3. Modify the required details.
4. Click **Save**.
   The modifications made to the approval transaction are saved.

Withdrawing an Approval Transaction

Procedure

To withdraw an approval transaction:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. In the **Search Results** section, click the link in the **Withdraw** column corresponding *t*o the approval transaction which you want to withdraw.
   A message appears confirming whether you want to withdraw the approval transaction.
3. Click **OK**.
   A message appears confirming whether you want to delete the approval transaction.
4. Click **OK**.
   The approval transaction is deleted.

Resolving an Approval Transaction

Prerequisites

To resolve an approval transaction, you should have:

- Characteristic Types defined in the application.

Procedure

To resolve an approval transaction:

1. Search for approval transactions with task details and status as Resolve in the **Approval Transaction** screen.
   A list appears.
2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding *t*o the approval transaction which you want to resolve.
   A screen appears where you can review the changes, and accordingly modify or resolve the request based on your observations. In case where the submitter action is Update (UPD), you will be able to compare the existing and new data, and accordingly take an action.
3. Make the required changes.
4. Click **Save**.
   The changes resolve for the approval transaction are saved.

Approve Price Assignment

The **Approve Price Assignment** screen allows you to search for the price assignment requests that are pending in your workflow for approval. You can review the changes, and accordingly approve, reject or cancel the request based on your observations. It contains the following zones:

- Search on page 842
- List of Price Assignments on page 845
- Approve Price Assignment - Comparison: New versus Existing on page 846
- Approval Transaction Log on page 835

Search

The **Search** zone allows you to search for the price assignment requests that are pending in your workflow for approval. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for price assignments using the account, person, price list, submitter ID or transaction ID. The valid values are: • Person • Account • Price List • Submitter ID • Approval Transaction ID **Note:** By default, the **Person** option is selected.	Yes
Division	Used to search price assignments which are associated with a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list. This field appears when you select the **Person** or **Account** option from the **Search By** list.	No
Person Identifier Type	Used to specify the value for the person identifier type.	Yes (Conditional) **Note:** If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the ID linked to the person.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Person** option from the **Search By** list.	**Note:** If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Account ID	Used to search price assignments which are created for a particular account. **Note:** This field appears when you select the **Account** option from the **Search By** list.	No
Account Identifier Type	Used to select the identifier type based on which you want to search price assignments of an account. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes (Conditional) **Note:** If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the account whose price assignments you want to view. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Price List Description	Used to search price lists with a particular description. **Note:** This field appears when you select the **Price List** option from the **Search By** list.	No
Submitter ID	Used to search for price assignment requests that are created by a particular submitter. **Note:** This field appears when you select the **Submitter ID** option from the **Search By** list.	No
Approval Transaction ID	This field appears when you select the **Approval Transaction ID** option from the **Search By** list. **Note:** The approval transaction ID is generated automatically when the price assignment request is created. This field appears when you select the **Transaction ID** option from the **Search By** list.	No

Note: You must specify at least one search criterion while searching for a price assignment.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. It contains the following columns:

Column Name	Column Description
Account ID	Displays the account ID. **Note:** This column appears only when you select the **Account** option from the **Search By** list.
Account Identifier Type	Indicates the account identifier type of the account for the price assignments. **Note:** This column appears when you select the **Account** option from the **Search By** list.
Account Identifier	Displays the value of the account identifier type. **Note:** This column appears when you select the **Account** option from the **Search By** list.
Price List ID	**Note:** This column appears when you select the **Price List** option from the **Search By** list.
Price List Description	Displays the description for the price list. **Note:** This column appears when you select the **Price List** option from the **Search By** list.
Person Identifier	**Note:** This column appears when you select the **Person** option from the **Search By** list.
Person Name	Displays the name of the person. **Note:** This column appears when you select the **Person** option from the **Search By** list.
Division	Displays the division to which the account, person, or price list belongs.
Submitter ID	Displays the ID of the submitter. **Note:** This column appears when you select the **Submitter ID** option from the **Search By** list.
Approval Transaction ID	Displays the approval transaction ID. **Note:** This column appears when you select the **Approval Transaction ID** option from the **Search By** list.

On clicking the **Broadcast** (📡) icon corresponding to the account, person, price list, or submitter ID the **List of Price Assignments** zone appears with the list of price assignments.

List of Price Assignments

The **List of Price Assignments** zone lists price assignment requests specific to an account, a person, or a price list. It contains the following columns:

Column Name	Column Description
Approval Transaction ID	Displays the approval transaction id. **Note:** The approval transaction id is generated automatically when the price assignment request is created.
Submitter Name	Displays the name of the submitter.
Action	Indicates the type of action, such as **Add**, **Update (UPD)**, or **Delete (DEL)** performed by the submitter during price assignment.
Submitted On	Indicates the submitter who has created the price assignment request.
To Do Type	Displays the type of To Do (notification) received for the price assignment request.
Price Item	Displays the price item or price item code.
Description	Displays the description of the price item or price item code.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Start Date	Displays the date from when the price item pricing is effective.
End Date	Displays the date till when the price item pricing is effective.
Approval Transaction Information	Displays the additional information of an approval transaction.

Note:

By default, the **List of Price Assignments** zone does not appear in the **Approve Price Assignment** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the account, person, or price list in the **Search** zone.

Approve Price Assignment - Comparison: New versus Existing

The **Comparison: New versus Existing** zone lists the existing and the new price assignments defined in the system. You can approve, cancel, reject a price assignment through this zone. It contains the following fields:

Field Name	Field Description
Approval Transaction ID	Displays the approval transaction id.
Submitter ID	Displays the submitter id who has created the price assignment request.
Approval Transaction Information	Displays information about the approval transaction
Action	Indicates the action that can be performed on the price assignment. The valid values are: • Add - Allows you to define the tiering setup of the price assignment • DEL - Allows you to delete the tiering setup of the price assignment. • UPD - Allows you to upload the tiering setup of the price assignment.

In addition to the above fields, this zone also contains the following two sections:

- **New** - It consists of the new approved price assignments.
- **Existing** - It consists of the existing or old price assignments.

In addition, this zone also contains the following buttons:

Button Name	Button Description
Approve	Used to approve the price assignment.
Return to Submitter	Used to reject the price assignment.
Revert to Original	Used to cancel the price assignment.

Note:

By default, the **Comparison: New versus Existing** zone does not appear in the **Approve Price Assignment** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the approval transaction ID in the **List Of Price Assignments** zone.

The changes made are highlighted in both the sections for the respective fields. The fields change according to the price assignments.

You can click on **Approve** button, **Return to Submitter** button, or **Revert to Original** button to **Approve**, **Reject** or **Cancel** the price assignments, respectively.

Approval Transaction Log

The **Approval Transaction Log** zone displays the complete trail of submitter and approver actions performed on the approval transaction. It contains the following columns:

Column Name	Column Description
Date Time	Displays the date and time when the action was performed on the approval transaction.
User Name	Indicates the user who has performed the action on the approval transaction.
Status	Indicates the status of the approval transaction. The valid values are: • Approved • Cancelled • Rejected • Inprocess • Pending • Initial • Deleted
Status Reason	Indicates the reason why the approval transaction was rejected or cancelled.
Comments	Displays the additional details entered by the approver on rejecting or cancelling the approval transaction.

Note:

By default, the **Approval Transaction Log** zone does not appear in the **Approve Price Assignment** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to the approval transaction ID in the **List Of Price Assignments** zone.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

List Of Price Assignments zone	List of Price Assignments on page 862

Approving a Price Assignment for an Account

You can view the number of price assignments which are pending for approval in the **Approve Price Assignment** screen. The approver can review, and accordingly approve, reject or cancel the price assignment based on the observations.

Note: The system will not allow you to approve, reject or cancel a price assignment submitted by you.

Procedure

To approve a price assignment for an account:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Approval Workflow** and then click **Approve Price Assignment**.
   The **Approve Price Assignment** screen appears.
3. Enter the search criteria in the **Search** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of accounts that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast** (📡) icon corresponding to the account whose price assignments you want to review *for* approval.
   The **List of Price Assignments** zone appears.
6. In the **List of Price Assignments** zone, click the **Broadcast** (📡) icon corresponding to the price assignment whose details you want to review and approve.
   The **Comparison: New Versus Existing** zone appears.

   Note:

   By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see Setting the C1_AXENTITY Feature Configuration on page 4623.

   Only those users who have access to the application services for each business object within the approval workflow group will be able to view the details of the price assignment request.
7. Review the compared existing and new approval transactions.
   A message appears indicating that the price assignment request is sent to the approver at the next level in the hierarchy for approval. However, if you are the last approver in the hierarchy, a message appears indicating that the price assignment request is approved successfully.
8. Click **Approve**.
   A message appears with confirmation on transaction approved successfully.

   Tip: Alternatively, in the **List of Price Assignments** zone, you can select the check box corresponding to the price assignment request that you want to approve and then click **Approve**.
9. Click **OK**.
   The approval transaction is removed from the **List of Price Assignments** zone.

Approving a Price Assignment for a Person

Procedure

To approve a price assignment for a person:

1. Click the **Menu** link in the **Actions/Navigation** area.
   A list appears.
2. From the **Main** menu, select **Approval Workflow** and then click **Approve Price Assignment**.
   The **Approve Price Assignment** screen appears.
3. In the **Search** zone, enter the search criteria by selecting **Person** in the **Search By** field.

   Note:

   ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields

except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Search Results** appear when**Person Identifier Type** and **Person Identifier** fields are entered.

4. Click **Search**.
   A list of persons that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast** (📡) icon corresponding to the person whose price assignments you want to review *f*or approval.
   The **List of Price Assignments** zone appears.
6. Click the **Broadcast** (📡) icon corresponding to the **Transaction Id** in the **List of Price Assignments** zone, *w*hose details you want to view and approve.
   The **Comparison: New Versus Existing** zone appears.

   Note:

   By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see Setting the C1_AXENTITY Feature Configuration on page 4623.

   Only those users who have access to the application services for each business object within the approval workflow group will be able to view the details of the price assignment request.
7. Review the pricing details, tiering ranges, and price assignment characteristics, and if they are accurate, then click **Approve**.
   A message appears indicating that the price assignment request is sent to the approver at the next level in the hierarchy for approval. However, if you are the last approver in the hierarchy, a message appears indicating that the price assignment request is approved successfully.
8. Click **OK**.
   A To Do (notification) is sent to the approver at the next level in the hierarchy. You will no longer be able to view this request in your workflow for approval. In case you are the last approver in the hierarchy, the changes are committed to the database.

   Tip: Alternatively, in the **List of Price Assignments** zone, you can select the check box corresponding to the price assignment request that you want to approve, and then click **Approve**.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of accounts that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast** (ᯤ) icon corresponding to the account whose price assignments you want to review.
   The **List of Price Assignments** zone appears.
6. In the **List of Price Assignments** zone, click the **Broadcast** (ᯤ) icon corresponding to the price assignment whose details you want to review.
   The **Comparison: New Versus Existing** zone appears.

   Note:

   By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see Setting the C1_AXENTITY Feature Configuration on page 4623.

   Only those users who have access to the application services for each business object within the approval workflow group will be able to view the details of the price assignment request.
7. Review the compared existing and new approval transactions.
   The **Rejection/Cancelation Reason** screen appears.

Tip: Alternatively, in the **List of Price Assignments** zone, you can select the check box corresponding to the price assignment request that you want to reject, and then click **Revert to Original**.

8. Click **Revert to Original**.
   The **Rejection/Cancelation Reason** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Reason	Used to search a particular approval workflow reason.	Yes
Comments	Used to add additional comments.	No

9. Enter the required details.
10. Click **OK**.
    The approval transaction is removed from the **List of Price Assignments** zone.

Tip: Alternatively, you can cancel the price assignment by selecting the check box corresponding to the price assignment which you want to cancel and then click the **Revert to Original** button in the **List of Price Assignments** zone.

Modify Price Assignment

The submitter has the facility to modify or withdraw a price assignment request before the approver at the first level in the hierarchy approves or rejects the request. Once the changes are made, the submitter submits the request for approval.

The **Modify Price Assignment** screen allows you to modify or withdraw a price assignment request. It contains the following zones:

- Search on page 859
- List of Price Assignments on page 872

Search

The **Search** zone allows you to search for the price assignment request using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for price assignments using the account, person, price list, submitter ID or transaction ID. The valid values are: • Person • Account • Price List • Submitter ID • Approval Transaction ID **Note:** By default, the **Person** option is selected.	Yes
Division	Used to search price assignments which are associated with a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list. This field appears when you select the **Person** or **Account** option from the **Search By** list.	No
Person Identifier Type	Used to select the identifier type based on which you want to search price assignments through which the person's record is created or updated in the system. **Note:** This field appears when you select the **Person** option from the **Search By** list.	Yes (Conditional) **Note:** If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the value for the person identifier type.	Yes (Conditional) **Note:** If you specify the person identifier type as a search criteria, you have to enter the person identifier.

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search price assignments which are created for a particular account. **Note:** This field appears when you select the **Account** option from the **Search By** list.	No
Account Identifier Type	Used to select the identifier type based on which you want to search price assignments of an account. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes (Conditional) **Note:** If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the account whose price assignments you want to view. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Price List Description	Used to search price lists with a particular description. **Note:** This field appears when you select the **Price List** option from the **Search By** list.	No
Submitter ID	Used to search for price assignment requests that are created by a particular submitter. **Note:** This field appears when you select the **Submitter ID** option from the **Search By** list.	No
Approval Transaction ID	Used to search the price assignment request using the approval transaction ID. **Note:** The approval transaction ID is generated automatically when the price assignment request is created. This field appears when you select the **Approval Transaction ID** option from the **Search By** list.	No

Note: You must specify at least one search criterion while searching for a price assignment.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Identifier	Indicates the person for whom the price assignment is created.

Column Name	Column Description
	Note: This column appears when you select the **Person** or **Submitter ID** option from the **Search By** list.
Person Name	Displays the name of the person. **Note:** This column appears when you select the **Person** or **Submitter ID** option from the **Search By** list.
Person Identifier Type	Displays the person identifier type. **Note:** This column appears when you select the **Submitter ID** option from the **Search By** list.
Division	Displays the division to which the account, person, or price list belongs.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** This column appears when you select the **Account** or **Submitter ID** option from the **Search By** list. It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Account Identifier Type	Indicates the account identifier type of the account for the price assignments. **Note:** This column appears when you select the **Account** or **Submitter ID** option from the **Search By** list.
Account Identifier	Displays the value of the account identifier type. **Note:** This column appears when you select the **Account** or **Submitter ID** option from the **Search By** list.
Price List ID	Displays the price list ID. **Note:** This column appears only when you select the **Price List** option from the **Search By** list.
Price List Description	Displays the description for the price list. **Note:** This column appears when you select the **Price List** option from the **Search By** list. **Note:** This column appears when you are searching for price assignment requests of a price list.
Submitter ID	Displays the ID of the submitter. **Note:** This column appears when you select the **Submitter ID** option from the **Search By** list.

On clicking the **Broadcast** (📡) icon corresponding to the account, person, price list, or submitter ID the **List of Price Assignments** zone appears with the list of price assignments.

List of Price Assignments

The **List of Price Assignments** zone lists price assignment requests specific to an account, a person, or a price list. It contains the following columns:

Column Name	Column Description
Approval Transaction ID	Displays the approval transaction ID. **Note:** The approval transaction id is generated automatically when the price assignment request is created.
Submitter Name	Indicates the submitter who has created the price assignment request.
Action	Indicates the type of action, such as **Add**, **Update (UPD)**, or **Delete (DEL)**, performed by the submitter during price assignment.
Submitted On	Displays the date and time when the price assignment request was created by the submitter.
To Do Type	Displays the type of To Do (notification) received for the price assignment request.
Price Item	Displays the price item or price item code.
Description	Displays the description of the price item or price item code.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Start Date	Displays the date from when the price item pricing is effective.
End Date	Displays the date till when the price item pricing is effective.
Approval Transaction Information	Displays information about the approval transaction. **Note:** This information string is generated using the **C1-APPTXNINF** algorithm.
Modify	It has a link. On clicking the **Modify** link, the **Modify/Resolve Price Assignment** screen appears where you can modify the price assignment.
Withdraw	It has a link. On clicking the **Withdraw** link, you can withdraw and remove the approval transaction from the list of price assignments.

Column Name	Column Description
View	It has a link. On clicking the **Log** link, you can view the approval transaction log details.

By default, the **List of Price Assignments** zone does not appear in the **Modify Price Assignment** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the account, person, or price list in the **Search** zone.

Resolve Price Assignment

If an approver at any level in the hierarchy rejects a price assignment request, a notification is sent to the submitter who has made the changes. The submitter then makes the required corrections based on the approver's comments, and resubmits the changes for approval. In this case, the approval process starts once again from the beginning, and not from the level at which the request was rejected.

The **Resolve Price Assignment** screen allows you to resolve or withdraw a price assignment request. It consists of the following zones:

- Search on page 869
- List of Price Assignments on page 872

Search

The **Search** zone allows you to search for the price assignment requests rejected by approvers and pending for you to resolve. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search price assignments using various details. The valid values are: • Person • Account • Price List • Submitter ID • Approver Transaction ID **Note:** By default, the **Person** option is selected.	Yes
Division	Used to search price assignments which belong to a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list.	No
Person Identifier Type	Used to specify the identifier type based on which you want to search for price assignment requests of a person. **Note:** This field appears when you select the **Person** option from the **Search By** list.	Yes (Conditional) **Note:** If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the ID linked to the person.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Person** option from the **Search By** list.	**Note:** If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Account ID	Used to search for price assignment requests created for an account. **Note:** This field appears when you select the **Account** option from the **Search By** list.	No
Account Identifier Type	Used to specify the account identifier type of the account whose price assignment requests you want to search. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes (Conditional) **Note:** If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier type. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Price List Description	Used to search for price assignment requests created for a price list. **Note:** This field appears when you select the **Price List** option from the **Search By** list.	No
Submitter ID	Used to search for price assignment requests that are created by a particular submitter. **Note:** This field appears when you select the **Submitter ID** option from the **Search By** list.	No
Approval Transaction ID	Used to search the price assignment request using the approval transaction ID. **Note:** The approval transaction ID is generated automatically when the price assignment request is created. This field appears when you select the **Approval Transaction ID** option from the **Search By** list.	No

Note: You must specify at least one search criterion while searching for a price assignments.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Identifier	Displays the ID linked to the person. **Note:** This column appears when you are searching for price assignment requests of a person.
Person Name	Displays the name of the person. **Note:** This column appears when you are searching for price assignment requests of a person.
Division	Displays the division to which the account, person, or price list belongs.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** This column appears when you are searching for price assignment requests of an account. It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Account Identifier Type	Displays the account identifier type. **Note:** This column appears when you are searching for price assignment requests of an account.
Account Identifier	Displays the value of the account identifier type. **Note:** This column appears when you are searching for price assignment requests of an account.
Price List ID	Displays the price list ID. **Note:** qThis column appears only when you are searching for price assignment requests of a price list.
Price List Description	Displays the description of the price list. **Note:** This column appears when you are searching for price assignment requests of a price list.
Owner ID	Displays the ID of the person for whose account the approval workflow request is created.
Approval Transaction ID	Displays the approval transaction ID. **Note:** The approval transaction ID is generated automatically when the price assignment request is created.
Person Identifier Type	Displays the person identifier type. **Note:** This column appears when you are searching for price assignment requests of a person.

On clicking the **Broadcast** (📡) icon corresponding to the account, person, or price list, the **List of Price Assignments** zone appears.

List of Price Assignments

The **List of Price Assignments** zone lists price assignment requests specific to an account, a person, or a price list. It contains the following columns:

Column Name	Column Description
Approval Transaction ID	Displays the approval transaction ID. **Note:** The approval transaction ID is generated automatically when the price assignment request is created.
Submitter Name	Indicates the submitter who has created the price assignment request.
Action	Indicates the type of action, such as **Add**, **Update (UPD)**, or **Delete (DEL)** performed by the submitter during price assignment.
Submitted On	Displays the date and time when the price assignment request was created by the submitter.
To Do Type	Displays the type of To Do (notification) received for the price assignment request.
Price Item	Displays the price item code.
Description	Displays the description of the product.
Pricing Currency	Indicates the currency in which the product pricing is defined.
Start Date	Displays the date from when the product pricing is effective.
End Date	Displays the date till when the product pricing is effective.
Approver Name	Indicates the approver who has rejected the price assignment request.
Rejected On	Displays the date and time when the price assignment request was rejected by an approver.
Reject Reason	Indicates the reason why the price assignment request was rejected.
Rejection Comments	Displays the additional details entered by an approver on rejecting the price assignment request.

Column Name	Column Description
Approval Transaction Information	Displays information about the approval transaction. **Note:** This information string is generated using the **C1-APPTXNINF** algorithm.
Resolve	On clicking the **Resolve** link, you can modify the details of the price assignment request, and resubmit it for approval. On resubmitting, the approval workflow process starts once again from the first level in the hierarchy.
Withdraw	On clicking the **Withdraw** link, you can withdraw the price assignment request. Once you withdraw the request, no further action will be taken on the request.
View	On clicking the **Log** link, you can view the log of the price assignment request from the **Resolve Price Assignment** screen before resolving or withdrawing a request.

By default, the **List of Price Assignments** zone does not appear in the **Resolve Price Assignment** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the account, person, or price list in the **Search** zone.

Resolving a Price Assignment for an Account

Procedure

To resolve a price assignment for an account:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Approval Workflow** and then click **Resolve Price Assignment**.
   The **Resolve Price Assignment** screen appears.
3. In the **Search** zone, enter the search criteria, such as the division to which the account belongs, account ID, or *a*ccount identifier.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of accounts that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast** (ᯤ) icon corresponding to the account whose price assignment requests you want to *r*esolve.
   The **List of Price Assignments** zone appears.
6. Click the **Resolve** link in the **Resolve** column corresponding to the price assignment request that you want to *r*esolve.
   The **Modify/Resolve Price Assignment** screen appears where you can modify the pricing details, tiering ranges, and price assignment characteristics.

   Note: Only those users who have access to the application services for each business object within the approval workflow group will be able to resolve the request and resubmit it for approval.
7. Make the required changes.
8. Click **Save**.
   The price assignment is updated and resubmitted for approval.

Resolving a Price Assignment for a Person

Procedure

To resolve a price assignment for a person:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Approval Workflow** and then click **Resolve Price Assignment**.
   The **Resolve Price Assignment** screen appears.
3. In the **Search** zone, enter the search criteria, such as the division to which the person belongs or the *p*erson identification type and value.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of persons that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast** (ᯤ) icon corresponding to the person whose price assignment requests you want to *r*esolve.
   The **List of Price Assignments** zone appears.
6. Click the **Resolve** link in the **Resolve** column corresponding to the price assignment request that you want to *r*esolve.
   A screen appears where you can modify the pricing details, tiering ranges, and price assignment characteristics.

   Note: Only those users who have access to the application services for each business object within the approval workflow group will be able to resolve the request, and resubmit it for approval.
7. Make the required changes.
8. Click **Save**.

The price assignment is updated and resubmitted for approval.

Defining an Approval Workflow Group

Prerequisites

To define an approval workflow group, you should have:

- Input and Display UI maps created in the application in case you want to use custom UI maps.
- Dependency, Approval, and Approval Post Processing algorithms defined in the application in case you want to use any of them.

Note: Before you define an approval workflow group for the User BO, you need to attach the **C1-APPTXNBAS** algorithm on the **Audit** algorithm spot of the business object belonging to the USER-SC MO, and not the USER MO.

Procedure

To define an approval workflow group:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, Select **A** and then click **Approval Workflow Group**.
   The **Approval Workflow Group** screen appears.
3. Click the **Add** button in the **Page Title** area of **Approval Workflow Group** screen.
   The **Approval Workflow Group** screen appears. It contains the following sections:
   - **Main** - Used to specify basic details about the approval workflow group.
   - **Business Objects and Group BO Relation** - Used to add business objects and define group BO Relation for the approval workflow group.

   The **Main** section contains the following:

Field Name	Field Description	Mandatory (Yes or No)
Approval Transaction Type	Used to indicate the transaction type to which the approval workflow group belongs.	Yes
Approval Workflow Group	Used to specify the approval workflow group.	Yes
Description	Used to specify the approval workflow group with a particular description.	Yes
Display UI Map	Used to specify the UI map that you want to use for viewing data of the business objects within the approval workflow group. **Note:** You can search for a UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Display UI Map field. **Note:** If you clear the **Display UI Map** field, you need to either manually specify the UI map or	No

Field Name	Field Description	Mandatory (Yes or No)
	automatically regenerate the UI map by clicking the **Regenerate UI Maps** icon corresponding to the group in the **Approval Workflow Settings** screen.	
Input UI Map	Used to specify the UI map that you want to use for modifying data of the business objects within the approval workflow group. **Note:** You can search for a UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Input UI Map field. **Note:** If you clear the **Input UI Map** field, you need to either manually specify the UI map or automatically regenerate the UI map by clicking the **Regenerate UI Maps** icon corresponding to the group in the **Approval Workflow Settings** screen.	No
Dependency Algorithm	Used to specify the algorithm that will be triggered before creating the approval workflow group. **Note:** You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Dependency Algorithm field. **Note:** This algorithm can be used to check all prerequisites before creating the approval workflow group.	No
Approval Algorithm	Used to specify the algorithm that will be triggered after the approval workflow group is approved by the approver at the last level in the hierarchy. The following approval algorithms are shipped with ORMB: • **C1-APPPROD** - This approval algorithm is used for the C1PRODUCT group, which is shipped with ORMB. • **C1-APPPL** - This approval algorithm is used for the C1PRICELST group, which is shipped with ORMB. • **C1-APPPASG** - This approval algorithm is used for the C1PRICEASG group, which is shipped with ORMB. • **C1-APPALG** - This is a standard approval algorithm that you can use for approval workflow groups where custom logic is not required. You can also create your own approval algorithms for custom UIs. **Note:** You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Approval Algorithm field.	No
Approval Post Processing Algorithm	Used to specify the algorithm that will be triggered after the changes (which are approved by all approvers' in the hierarchy) are committed to the database. **Note:** You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍)	No

Field Name	Field Description	Mandatory (Yes or No)
	corresponding to the Approval Post Processing Algorithm field.	
Transaction Creation Algorithm	Used to specify the algorithm that will create approval workflow group. The following transaction creation algorithms are shipped with ORMB: • **C1-APPASGCR** - Used to create approval workflow group for price assignment. • **C1-AXPROD** - Used to create approval workflow group for price item. • **C1-AXUSR** - Used to create approval workflow group for user. • **C1-IGCREATE** - Used to create approval workflow group for invoicing group. • **C1-AXCREATE** - This is a standard transaction creation algorithm that you can use to create approval workflow group for most of the base objects. You can also create your own transaction creation algorithms for custom UIs. In case of the base UIs, this algorithm is only used while modifying or resolving a group. The initial approval transaction creation for base UIs takes place through the Audit algorithm attached on the business object. **Note:** You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Transaction Creation Algorithm field.	Yes
Data Retrieval Algorithm	Used to specify the algorithm that will be triggered to retrieve the original data of the business objects within the approval workflow group. This will help an approver to compare the original and new data in case where the submitter action is Update (UPD). The following data retrieval algorithms are shipped with ORMB: • **C1-APPIGDR** - Used to retrieve data for invoicing group. • **C1-AXPRICEOV** - Used to retrieve data for price assignment. • **C1_APPDATA** - This is a standard data retrieval algorithm that you can use to retrieve data for most of the base objects. You can also create your own data retrieval algorithms for custom UIs. **Note:** You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Data Retrieval Algorithm field.	Yes
Information Algorithm	Used to specify the algorithm information.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Approval Post Processing Algorithm field.	
Compare Map	Used to specify the customized Display UI map that you want to use for the approval workflow group. It overrides the UI map specified in the **Display UI Map** field. **Note:** You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Approval Post Processing Algorithm field.	No
Input Script	Used to specify the customized Input UI map that you want to use for the approval workflow group. It overrides the UI map specified in the **Input UI Map** field. **Note:** You can search for a Input UI map, code, and an algorithm by clicking the **Search** icon (🔍) corresponding to the Approval Post Processing Algorithm field.	No

4. Enter the required details.
5. Add business objects and group BO relation with the approval workflow group, if required.
6. Click **Save**.
   The approval workflow group is defined.

Adding a Business Object

Prerequisites

To add a business object in the approval workflow group, you should have:

- Business object and approval workflow group created in the application.

Procedure

To add a business object in the approval workflow group:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, Select **A**, and then click **Approval Workflow Group**.
   The **Approval Workflow Group** screen appears.
3. Click the **Add** button in the page-title area of the **Approval Workflow Group** screen.

The **Approval Workflow Group** screen appears. It contains following sections:

- **Main** - Used to specify basic details of the approval workflow group.
- **Business Objects and Group BO Relation** - Used to specify the fields that allow to define business and parent objects and link them with the approval workflow group.

The **Business Objects and Group BO Relation** section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Used to specify the Business Object Code that you want to include in the Approval Workflow Group.	Yes
Reference ID 1	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference ID 2	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference ID 3	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference ID 4	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference Foreign Key 1	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 2	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 3	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 4	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 5	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 6	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
List	Used to indicate whether the group contains one or multiple instance of the business object. For example, if you want to create a group that contains multiple account objects, you need to set this flag for the Account BO to True. If you want to create a group that contains single instance of the business object, you must set this flag for the business object to False.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Parent Business Object	Used to specify the parent business object. This should be one of the business objects within the group.	No
From Key	Used to specify the XPATH key of the field or list of fields in the parent business object.	No
To Key	Used to specify the XPATH key of the field or list of fields in the current business object.	No

Note: You can search for a business object and parent business object, by clicking the **Search** (🔍) icon placed corresponding to the **Business Object** field.

4. If you want to define more than one business and parent business object for the approval workflow group, click the **Add** (+) icon placed corresponding to the field.
5. Enter the required details in **Main** and **Business Objects and Group BO Relation** sections.
6. Click **Save**
   The business object is added in the approval workflow group.

Note: When you add business objects in an approval workflow group, you need to regenerate the Input and Display UI maps by clicking the **Regenerate UI Maps** (🔄) icon corresponding to the group in the **Approval Workflow Settings** screen. You must do this when you are using automatically generated UI maps, and not otherwise.

Defining a Group BO Relation

Prerequisites

To define a relationship between business object in the approval workflow group, you should have:

- Business objects added in the approval workflow group.

Procedure

To define a relationship between business objects in the approval workflow group:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, Select **A** and then click **Approval Workflow Group**.
   The **Approval Workflow Group** screen appears.
3. Search for an approval workflow group in the **Approval Workflow Group** screen.
4. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group.
5. The **Approval Workflow Group** screen appears. It contains following sections:
   - **Main** - Used to specify basic details of the approval workflow group.
   - **Business Objects and Group BO Relation** - Used to specify the fields that allow to define business and parent objects, and link them with the approval workflow group.
6. Define and edit the approval workflow group details from the **Main** section, if required.

7. If you only want to define a business object, enter the required details in the **Business Objects and Group BO Relation** section.
8. If you want to define a group BO relation with the business object, enter the required details in the following fields.
   a) **Parent Business Object**
   b) **From Key**
   c) **To Key**

   Note: If you want to define more than one business or parent object, click the **Add** (+) icon and then repeat step 2. However, if you want to remove a business or parent object, click the **Delete** (🗑) icon corresponding to the business or parent object field.
9. Click **Save**.
   The business object is defined, and its relationship with the parent object is also defined in the approval workflow group.

Approval Workflow Group (Used for Viewing)

Once you define an approval workflow group, the **Approval Workflow Group** screen allows you to:

- Edit the details of an approval workflow group
- Edit the details of business objects and group business object relation
- Delete an approval workflow group
- Delete a business object and a group business object relation
- View the details of an approval workflow group

This screen consists of the following zone:

- Approval Workflow Group on page 887

Approval Workflow Group

The **Approval Workflow Group** zone displays the details of the approval workflow group. It contains the following sections:

- **Main** - Displays basic information about the approval workflow group. It contains the following fields:

Field Name	Field Description
Approval Workflow Group	Displays the name of the approval workflow group.
Description	Displays the description of the approval workflow group.

Field Name	Field Description
Display UI Map	Indicates the UI map that will be used for viewing data of the business objects within the approval workflow group. **Note:** It has a link. On clicking the link, the **UI Map** screen appears where you can view the details of the respective UI Map.
Input UI Map	Indicates the UI map that will be used for modifying data of the business objects within the approval workflow group. **Note:** It has a link. On clicking the link, the **UI Map** screen appears where you can view the details of the respective UI Map.
Dependency Algorithm	Indicates the algorithm that will be triggered before creating the approval workflow request. **Note:** This algorithm can be used to check all prerequisites before creating the approval workflow request.
Approval Algorithm	Indicates the algorithm that will be triggered after the approval workflow request is approved by the approver at the last level in the hierarchy.
Approval Post Processing Algorithm	Indicates the algorithm that will be triggered after the changes (which are approved by all approvers in the hierarchy) are committed to the database.
Transaction Creation Algorithm	Indicates the algorithm that will create approval workflow requests. **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm.
Data Retrieval Algorithm	Indicates the algorithm that will be triggered to retrieve the original data of the business objects within the approval workflow group. This will help an approver to compare the original and new data in case where the submitter action is Update (UPD). **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm.
Information Algorithm	Indicates the Approval Transaction information from the Approval Transactions that are created for a particular entity, based on the inputs of the XPaths provided in the Reference IDs.
Compare Map	Indicates the customized Display UI map that you want to use for the approval workflow group. It overrides the UI map specified in the **Display UI Map** field.
Input Script	Indicates the customized Input UI map that you want to use for the approval workflow group. It overrides the UI map specified in the **Input UI Map** field.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to define, edit the approval workflow group. It is also used to delete the business objects and group BO relation.
Delete	Used to delete an approval workflow group.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the approval workflow group is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- **Business Objects And Group BO Relation** - The Business Objects And Group BO Relation contains the following fields:

Field Name	Field Description
Business Object	Indicates the Business Object that you want to include in the Approval Workflow Group.
Reference ID 1	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference ID 2	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference ID 3	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference ID 4	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference Foreign Key 1	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 2	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 3	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 4	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 5	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 6	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
List	Indicates whether the group contains one or multiple instance of the business object. For example, if you want to create a group that contains multiple account objects, you need to set this flag for the Account BO to True. If you want to create a group that contains single instance of the business object, you must set this flag for the business object to False.
Parent Business Object	Indicates the parent business object. This should be one of the business objects within the group.
From Key	Indicates the XPATH key of the field or list of fields in the parent business object.
To Key	Indicates the XPATH key of the field or list of fields in the current business object.

Editing an Approval Workflow Group

Procedure

To edit an approval workflow group:

1. Search for the approval workflow group in the **Approval Workflow Group**.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval *w*orkflow group whose details you want to edit.
   The **Approval Workflow Group** screen appears.
3. Click the **Edit** button in the **Approval workflow Group** zone.
   The **Approval Workflow Group** screen appears.
4. Modify the details of the approval workflow group, if required.
5. Define, edit, or remove business objects and group BO relation from the approval workflow group, if required.
6. Click **Save**.
   The changes made to the approval workflow group are saved.

Editing a Business Object

Procedure

To edit a business object in the approval workflow group:

1. From the **Admin** menu, select **A** and then click **Approval Workflow Group**.
   The **Approval Workflow Group** screen appears.
2. Search for an approval workflow group in the **Search Approval Workflow Group** zone.
3. In the **Search Results** section, click the link in the **Description** column corresponding to the approval *w*orkflow group whose details you want to edit.
4. The **Approval Workflow Group** zone appears. Click the **Edit** button from **Record Action** sections.

   The **Approval Workflow Group** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details of the approval workflow group.
   - **Business Objects and Group BO Relation** - Used to specify the fields that allow to define business objects and link them with the approval workflow group

   The **Business Objects and Group BO Relation** section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Displays the Business Object Code that is included in the Approval Workflow Group.	Yes
Reference ID 1	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference ID 2	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference ID 3	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference ID 4	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference Foreign Key 1	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 2	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 3	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 4	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 5	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 6	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
List	Indicates whether the group contains one or multiple instance of the business object. For example, if you want	Yes

Field Name	Field Description	Mandatory (Yes or No)
	to create a group that contains multiple account objects, you need to set this flag for the Account BO to True. If you want to create a group that contains single instance of the business object, you must set this flag for the business object to False.	
Parent Business Object	Used to specify the parent business object. This should be one of the business objects within the group.	No
From Key	Display the XPATH key of the field or list of fields in the parent business object.	No
To Key	Display the XPATH key of the field or list of fields in the current business object.	No

Note: You can search for a business object or parent business object by clicking the **Search** (🔍) icon placed corresponding to the **Business Object** and **Parent Business Object** field.

5. If you want to define more than one business object or parent object for the approval workflow group, click the **Add** (+) icon placed corresponding to the field.
6. Enter the required details in **Main** and **Business Objects and Group BO Relation** sections.
7. Click **Save**.
   The changes made to the business object in approval workflow group are saved.

Note: When you change business objects in an approval workflow group, you need to regenerate the Input and Display UI maps by clicking the **Regenerate UI Maps** (🔄) icon corresponding to the group in the **Approval Workflow Settings** screen. You must do this when you are using automatically generated UI maps, and not otherwise.

Searching for an Approval Workflow Chain

Procedure

To search the approval workflow chain:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Chain**.
   The **Approval Workflow Chain** screen appears.
3. Enter the search criteria in the **Search Approval Workflow Chain** zone.

   ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of approval workflow chains that meet the search criteria appears in the **Search Results** section.

Defining an Approval Workflow Chain

Prerequisites

To define an approval workflow chain, you should have:

- The To Do role and To Do type defined in the application.
- Action algorithms defined in the application, in case you want to use any of them.

Procedure

To define an approval workflow chain:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Chain**.
   The **Approval Workflow Chain** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Approval Workflow Chain** screen.

   The **Approval Workflow Chain** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details of the approval workflow chain.
   - **Approval Levels** - Used to specify a level in the approval workflow chain.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Chain	Used to specify the approval workflow chain	Yes
Description	Used to specify the description for the approval workflow chain	Yes
To Do Role To Resolve	Used to specify the To Do Role to indicate the users who will receive a notification when the approval transactions are rejected by an approver at any level in the hierarchy.	Yes

4. Enter the required details.
5. Define approval levels for the approval workflow chain, if required.
6. Click **Save**.
   The approval workflow chain is defined.

Defining Approval Levels for an Approval Workflow Chain

Prerequisites

To define approval levels in the approval workflow chain, you should have:

- The To Do Role and To Do Type defined in the application.
- Action algorithms defined in the application, in case you want to use any of them.

Procedure

To define an approval levels for an approval workflow chain:

1. Ensure that the **Approval Levels** section is expanded when you are defining or editing an approval workflow chain.

   The **Approval Levels** section contains the following fields

Field Name	Field Description	Mandatory (Yes or No)
Action Algorithm	Used to specify the additional action that you want the system to perform apart from generating a notification when the approver approves or rejects the request. **Note:** You can search for an action algorithm by clicking the **Search** (🔍) icon corresponding to the **Action Algorithm** field.	Yes
Approver To Do Role	Used to specify the To Do role to indicate the users who will either approve or reject the request at this level in the hierarchy. **Note:** You can search for an approver to do role by clicking the **Search** (🔍) icon corresponding to the **Approver To Do Role** field.	Yes
Approver To Do Type	Used to specify the type of notification that you want to generate when the approver approves or rejects the request. **Note:** You can search for an approver to do type by clicking the **Search** (🔍) icon corresponding to the **Approver To Do Type** field.	Yes

2. Enter the required details in the **Approval Levels** section.
3. If you want to define more than one approval level for the approval workflow chain, click the **Add** (+) icon and then repeat step 2. However, if you want to remove a approval level from the approval workflow chain, click the **Delete** (🗑) icon corresponding to the approval level.
